

Lest' We Forget

Star-Mirror: Lord God of hosts, be with us yet. Lest' we forget. Lest' we forget." When Kipling penned those words that have been repeated wherever the English language is spoken, he must have been looking forward to the United States in the years following the world war. Four years ago now the people of the United States were demanding that this country enter the war with the Allies which were fighting a losing battle against the enemies of civilization. Four years ago next Wednesday the United States formally declared that a state of war exists between the United States and Germany, and the United States had thrown her strength, her soul, her wealth into the fight on the side of humanity.

During the next few weeks the very flower of young American manhood to the number of several hundred thousand volunteered. Then came the selective draft and the young men responded and were rushed to training camps where they were given a few weeks or a few months of training and sent across" to fight for humanity and make the "world safe for democracy." We, who were too old or too young, or were prevented by other causes from going to the front, remained at home and "did our bit" in every way possible. We bought Liberty bonds, war saving stamps, worked in the harvest fields, produced more food, ate less, lived on substitutes that our own soldiers and those of our Allies might be fed and clothed and provided with arms and equipment.

The whole world looked on with amazement as the United States, totally unprepared for war, made the most rapid progress ever known in the history of the world and gathered an army of almost five million men from all parts of this great country, trained, armed and equipped them and put nearly 2,000,000 of them in France and Belgium, with the loss of but two transports and less than 270 of our men. In a few months the United States landed more men in France than England, 22 miles distant, with the greatest navy in the world to protect her transports, had been able to land in the same length of time.

Our soldiers threw themselves into the thick of the fighting and turned the tide. Germany was defeated, and the United States troops and the self-sacrificing people at home, made this possible. Greater glory was never won by any nation. Greater glory was never deserved by any people. We were united. There was no north, no south, no east, no west." There was no democratic, republican or other political party. We were all Americans, the proudest and grandest name on this earth. We threw our whole souls, our best young manhood, our wealth, our energies into the conflict and we won. German writes today give the United States the credit for winning the war and future historians will record the same verdict.

But we never hear of the grand work the United States did in the war, except from the German, French, Belgian, English or Italian press. One would think that the United States had done nothing but blunder, solicit funds from the citizens and squander them in corruption. We have heard from the partizan press that "everything was rotten." That there was graft everywhere and our navy was a failure and everything we did was wrong. Since President Wilson returned from Paris the jackals of America, the tribe that thrive on carrion, have been busily engaged trying to discredit everything America did and they have succeeded only too well. The political assassins of character, manhood and everything good, have been so busy and so successfully throwing mud and dirt and lies and slander at the administration that has just ended, that in less than four short years from the day the United States entered the war to save the world, we have entirely forgotten all of the

Poisoning Ground Squirrels

Following is a formula sent out by the Latah County Farm Bureau, for the poisoning of the Columbian ground squirrel:

Mix together dry, 1 ounce of powdered strychnine (alkaloid), 1 heaping tablespoon of baking soda, 1 scant teaspoon of saccharine, and 3 heaping tablespoons of flour. Add a half cupful of cold water and work into a smooth batter. When all lumps have been worked out of the batter, add more cold water and dilute to a smooth creamy paste. Apply this paste to 8 or 10 quarts of good, heavy, re-cleaned oats and mix thoroughly. Work until there are no dry kernels. An old tub or tight box will serve for mixing.

Each quart of poisoned grain is sufficient for 40 to 60 baits. This quantity, scattered (1 teaspoonful to a place) along squirrel trails, or on clean, hard surfaces near the holes, will not endanger stock.

N. B.—Strychnine in any form other than the commercial alkaloid is not effective in the above formula.

CAUTION—All poison containers and all utensils used in the preparation of poisons should be kept PLAINLY LABELED and OUT OF REACH of children, irresponsible persons, and livestock.

This is the formula developed for the Columbian Ground Squirrel by the Bureau of Biological Survey of the United States Department of Agriculture, and is commonly referred to as "the government formula."

Don't Worry, Girls

The United States is now harboring the worlds largest collection of bachelors, 10 million of them according to the census. There are only 100 of the celebrated American variety of girls to every 106 males in this country. The United States is the only 1 of the worlds great nations in which men now predominate, all others have a large excess of women and girls. Here's a chance for Washington to get some more revenue. Put a tax on American bachelors!

Our readers may be amused at this unique spelling, said to have been employed by a Western printer:

grand things, all of the glorious deeds, all of the marvelous progress and the undreamed of successes, because our minds have been filled with the slanders that made calamitous criminality out of the smallest mistakes.

If any one had told us when the armistice was signed that we would sit quietly and permit our soldiers, our leaders on land and sea, our ships, our every effort to be slandered, maligned and libeled for partizan politics, we would have regretted the thought, yet today there is fixed more plainly, more indelibly in the minds of the people of the United States the mistakes and weaknesses of our part in the great war, than are fixed the great glory that is ours.

"Lord God of hosts, be with us yet. Lest' we forget. Lest' we forget."

Jubilee Singers Mix Finest Opera Gems With Sweet Old Plantation "Mammy" Songs

Versatile Garner Jubilee Company Is Really Group of High-Class Musicians—All Graduates of Musical Colleges or Universities.

For the past five years Prof. George Garner has been tenor soloist and pipe organist at the largest colored church in America—the Olivette Baptist church in Chicago. He has had access to, and has chosen the finest artists in the country to make up his Jubilee Company.

The Garner Jubilee Company sings the standard opera gems with as much finesse and feeling as they do the popular "spirituals" and the old plantation melodies. They can handle the difficult numbers because they are all thorough musicians, and all graduates of accredited musical colleges or universities.

The Jubilee singers will be the last number of the lyceum course. They will appear at the Grand Theater Monday night, April 4. This will undoubtedly be the biggest drawing card of any of this season's lyceum entertainments.

After the entertainment there will be a dance at the Fraternal Temple, under the auspices of the American Legion. A negro jazz band will furnish the music for the occasion. The Legion boys will make everybody feel at home at the dance.

The floor manager has stated that he has secured several extra slide trombones to have in reserve so that if the trgmbone artist of the Jazz Bo Band blows the end off of his own instrument there will be plenty of substitutes on hand.

Badly Injured Hand

Eddie Wegner of Big Bear ridge, son of Gus Wegner, had his hand badly cut and lacerated Monday white helping Bill Hecht in the sawmill. He was wearing a glove, which was caught in a circular saw, pulling his hand between the saw blade and the guard. The teeth of the saw made a jagged cut across the back of his hand and partly severed one knuckle.

The young man was brought to Kendrick immediately where Dr. Rothwell gave him first aid. The cut was so serious that the Doctor advised that he be taken to the hospital at Lewiston. After arriving there it was found necessary by the physician in charge of the case to graft skin, taken from the boy's leg, on to the cut. Reports from the hospital state that he is getting along as well as could be expected.

Mrs. Sarah Ann Hechtner

The community was deeply grieved Thursday morning to learn of the death of Mrs. Sarah Ann Hechtner, one of the pioneers of the Leland neighborhood. Death was due to dropsy and old age.

Sarah Ann King was born in Lincoln County, Missouri, January, 1844. In 1867 she was married to Fred Hechtner. Fourteen years later she and her husband moved to Idaho and took up a homestead in the Fairview community where they lived together until 1903, when Mr. Hechtner was taken by death. If Mrs. Hechtner had lived two months longer she would have had a record of 40 years continuous residence on the old homestead.

She is survived by six children, two sons, F. W. Hechtner of Lapwai, and H. R. Hechtner of Palouse; four daughters, Mrs. E. A. Wyman of Culesac, Mrs. A. J. Webster of Palouse, Mrs. Mary McCall of Leland and Mrs. G. McMillan of Lexington, Oregon.

Mrs. Hechtner was for many years a member of the United Brethren church. The funeral services will be held at the church at Leland, Saturday morning, at 10:30 o'clock, and the body will be laid to rest beside the grave of her husband in the Cameron cemetery.

Stella Nelson

Miss Stella Nelson, daughter of Mr. and Mrs. James Nelson of Clarkston, formerly of Big Bear ridge, died at the St. Joseph Hospital at Lewiston last Friday, after a two-week's illness with the lethargic encephalitis.

Miss Nelson was a student of the Kendrick high school for several years and had Freshman standing at the University of Idaho. At the time she was taken ill she was employed as teacher at a school on the upper end of Bear ridge near Deary.

The funeral was held at Clarkston last Sunday. A large number of her friends went from here to be present at the funeral. The many beautiful floral offerings evidenced the esteem in which this young lady was held by her many friends both here and in Clarkston.

Sunday School Picnic

Last year a community gathering of the Bear Creek and Bear Ridge Sunday Schools was held near the Steele school house. At that time an organization was made for 1921, with the understanding that all of the surrounding Sunday Schools, including Deary, Avon, Park, Kendrick, Troy, Little Bear and Texas ridges, were to meet with them.

Each school is requested to appoint a committee of three to act with a general committee which was appointed last year, consisting of Leon Ingle, King Ingle, William Whybark, all of Bear ridge, and A. M. Johnson, H. M. Slocum, J. B. Kitch, of Bear Creek, who organized by making Mr. Kitch chairman, King Ingle, vice chairman and Leon Ingle, secretary.

Other committees are announced as follows:

Grounds and location: King Ingle, William Whybark, Leon Ingle and Oscar Huffman.

Program and entertainment: Mattie Ingle, Johanna Hooker and J. B. Kitch.

Music: William Whybark, who will select his own assistants. The date has been set for Flag Day, Tuesday, June 14. The place will be the same as last year, near the Steele school house.

League Play Tonight

Tonight at the Grand Theatre, the Epworth League gives their play "The Fascinating Fanny Brown". It is a farce in two acts in which everything happens from Henry wearing dresses to a dog fight between two of the "victims" in the last act. If you don't laugh it will be because you are not there.

The show starts off in a roar when preceding the play, three characters of a very "shady" nature appear on the stage and have an awful time attempting to "Embalm Ebenezer" in about fifteen minutes. You think it can't be done! We know it can't. You'll see why tonight. It's simply awful—funny. It starts promptly at 8:15 o'clock so don't disappoint yourself by being late. Something doing every minute so leave your knitting at home.

The League is raising money on a pledge they made toward the clearing up of the church debt so the proceeds are to go for a good cause. Members not in the caste are making candy and if you have a sweet tooth for home-made candy there will be stands at the back of the theatre where you can satisfy the craving.

E. E. McDowell Lost Home

Tuesday noon, while the E. E. McDowell family were eating dinner, their house caught fire from a defective flue. Mr. McDowell, on his way to the cellar, noticed the flames breaking through the roof. He started up stairs but found the whole of the upper story in flames. It was but a short time until the entire building and contents were burned to ashes.

Insurance to the amount of \$1600 was carried on the house. The loss is conservatively estimated at \$3000. The house was a large two-story frame structure, built about six years ago by P. Powell. Practically nothing in the way of household goods or clothing was saved.

J. M. Brookings

J. M. Brookings, one of the pioneers of the Potlatch country, passed away at his home at Linden, Friday morning at one o'clock, after a lingering illness. Mr. Brookings was one of the first settlers of this section coming here nearly forty years ago and settling on a homestead. Later he put in a stock of merchandise at Cameron and kept the store there for a number of years. From there he went to Southwick to engage in the same business, and then opened a store at Linden which he conducted for about 12 years.

Mr. Brookings was passed seventy years of age. He was a bachelor and leaves a sister, whose home is in Maine.

Funeral services were conducted by Rev. Galloway of Southwick, at 11 o'clock, Saturday morning, and the remains were buried in the Linden cemetery.

Big Fire at Ferdinand

A fire originating in the kitchen of the Ferdinand Hotel, Wednesday morning, caused property damage to the business section estimated at \$62,000 which was covered by insurance in the sum of \$34,800. From the hotel the flames jumped to the B. F. Nesbit drug store and from there spread to the Ferdinand Trading Company, Ferdinand Hardware Company and the residence of James Johnson.

This morning the Kendrick school will observe Arbor Day by giving the school premises a general clean-up. Trees will also be planted by the high school students on the school grounds. The selection of Arbor Day is left to the county superintendents and Miss Scattaboe gave the local schools permission to observe the day on any Friday which they might deem advisable. So today is Arbor Day in Kendrick.

Over The County

Julietta Record: The Village board has authorized the building of a new piece of road which will do away with the Aldrich hill on the road leading into town from lower Potlatch canyon. The new section of road starts at the warehouse on lower Main street and will follow around the hillside to a point about 200 feet below where the present road to the city park crosses the mill race.

A crossing will be made at this point and the road extended through the outer edge of the park to a connection with the main county road at the culvert where the mill race crosses the road. Street Commissioner Frank Taylor with the assistance of a helper started work a few days ago clearing off the brush along the hillside preparatory to building the grade necessary at the north end of the road to reach the flat on an easy grade.

The main road, when this work is completed, will pass through the outer edge of the park and the park will be fixed up with camping accommodations for the benefit of travelers who wish to stop over night or longer if they wish.

Troy News: J. B. Watson, manager of the Idaho Fire Brick Company, returned from the Coast the first of the week where he spent several days in the interest of the company. He says that business is at a standstill and conditions are generally extremely quiet. The brick business is like all, dull. They have two large orders on sight, but nothing can be done to get them, even to the cutting of prices, until a large cargo of fire brick that is in transit from Scotland arrives. Upon its arrival the brick prices will be adjusted to meet the foreign price, thus making American production cope with the foreign production.

Deary Press: Deary needs a good, live commercial club. We ought to keep pace with our neighbors in this respect. There's a good deal that could be done by concerted effort here this spring and summer. We could foster and promote home building for one thing, and we believe could get results. What would help Deary just now more than half a dozen or a dozen new homes? Would it not be possible for us all working together to offer inducements to homeseekers to come here and build homes? Could we not encourage some of our own people who are renting, to build homes of their own? There are many matters that should be worked out to the town's advantage. We've tried it both ways and we all know that a commercial club is a good thing and can be made mighty useful in putting things over.

Genesee News: According to reports the state legislature of Washington made appropriations of three and a half million dollars to be used east of the Cascade mountains in the biennium beginning April 1. Among the work to be done will be five miles of paving between Rosalia and Colfax—near Thornton and Cashup. This will indeed be welcome news to all the territory south of Spokane as many autos are stuck in the bogs near those places each season. An appropriation of \$200,000 was made for this work.

Bear Ridge House Burned

The residence on the Al McKee place, occupied by Fred Bailey's family, was totally destroyed by fire last Saturday. Most of the contents were saved. The fire is believed to have originated from a defective flue.

Clean Up Next Week

Thursday and Friday of next week (April 7 and 8) have been set aside for cleanup days. Teams will be furnished by the town to haul away rubbish from your premises if it is put in a convenient and accessible place. You will have three days the first part of the week to get ready for clean up day.

The Deary Press comments unfavorably upon the action of the recent legislature in having "bears classed as game birds", and states that it will not be surprising to have the next legislature put the ground squirrel in the game class and under the protection of the game laws of Idaho.

William Allen White of the Emporia, (Kansas) Gazette, in commenting on legislatures in general says "It was designated for another age, and it worked well in the country that was 50 years ago. But it does not work now. It only plays hell."

Even in New York State they pass freak legislation that is on a par with some we have in the west. A law was recently enacted there prohibiting any person having in his possession a firearm of a size which may be concealed upon the person. This would make it unlawful to keep such a firearm even in the home. The penalty for anyone convicted of the offense is 7 years in the penitentiary. The prevailing sentiment is that the law is a god-send to burglars, highwaymen and criminals in general.

COMMON SALT IS DANGEROUS

Hogs and Chickens Are Very Susceptible to Poisoning by Mineral—Instances Cited.

It should be borne in mind that hogs and chickens are very susceptible to poisoning by common salt.

A lady emptied ice containing salt from the ice cream refrigerator in the backyard. The chickens picked up salt enough to kill them.

A newly-wed made a cake of salt, presuming it to be sugar. It was thrown to the chickens and killed all of them.

Pigs were allowed to graze in a pasture with cattle where they had access to a salt lick; they licked the salt ravenously and all but three of the herd died.

Another case is reported where salt brine was mistaken for sugarwater and fed to hogs with garbage; the pigs were poisoned and died the following day.

Salt poisoned hogs show no symptoms for several hours, when they are taken with dizziness, increased thirst, frothing at the mouth, diarrhea, and vomiting. Keep salt away from hogs and chickens.—Geo. H. Glover, Colorado Agricultural College.

SCALES FOR TRUCK USE

Farmers as a rule have not in the past installed platform scales suitable for motortruck weighing. This fact should be taken into consideration in buying scales in the future; even if one does not own a motortruck when he decides to buy a scale it is well, in most cases at least, to buy a scale designed for weighing motortruck loads.

PRESS COMMENT ON PHILIPPINES

The Philippines! (Shenandoah (In.) Post.) Our idea of the Philippine question is to get out as quickly as possible and stay out. What do you say?

Our Little Brown Cousins (Argus, Rock Island, Ill.)

There is no mistaking that Filipinos want their independence. And it is just possible, as they insist, that they in the islands, better than we Americans over here, are the best judges of whether they are fitted for independence. The United States wants no outburst in the Philippines as England faces in Ireland. The easiest way to head off a rebellion is to give the

islands their independence before they have cause to rebel.

Shall We Let Philippines Go? (Cedar Rapids (In.) Republican.) The United States cannot continue to hold the Philippines unless this nation wants to give the lie to its own professions in the matter. The United States must keep faith with the world. The American people do not want the Philippine Islands to become their Irish question.

Filipinos Are Making Headway (Mt. Vernon (O.) Republican-News)

The Filipinos are making an intensive and intelligent campaign for independence. They are urging their claims with shrewdness and vigor. They declare that they have proven beyond question that they are capable of self-government, and they believe that with independence the Filipino will so conduct himself as to gain the respect of the world.

Fordson Tractor

Increasing Its Field of Usefulness

Many Fordsons are being equipped with rubber tires and used for a variety of city work. A large number of them are being used in Seattle and Portland, and many smaller cities for street sprinkling, street dragging and grading, also for switching cars, hauling timber in lumber yards, hauling dirt and gravel, and running rock crushers. No other tractor is used for such a variety of work. There are reasons for this. The Fordson tractor is compact therefore is capable of working in small places. It is durable and the up-keep is very light. It is economical in operating expense, and has the best service in the world. And above all, the enormous production brings the price lower than any other tractor of equal power. The Fordson Tractor, complete with fenders, canopy top, extension rims, belt pulley, filled with kerosene and lubricating oil, and delivered to any farm in the Lewiston valley or Asotin county for \$860.

terests to the tune of twelve billion dollars. It may be thought that it was Slim Hervey's intention to wait this precious pair to some bosky retreat, cover them with leaves, and hold them for ransom, but such was not the case. He desired nothing from these two potentates among a race of lucre giants beyond what might come to him through his ever-open speaking slot.

This is all he heard:
"Lewisfader is getting kind of fresh."

"That's what I been thinkin'."

"When?"

"What about Friday, when the Bunkers-Bollweevil report comes out?"

"Good idea! Friday it is."

Not another word, but, as it happened, it was enough to start Mr. Ran-

dolph honking uptown the moment he had dropped his laconic fares at their next board meeting. No one had to tell him who Lewisfader was; he had been to college with that financier's son, and if there was one thing above all others that said offspring was good at, it was blowing his father's horn. Lewisfader was this and Lewisfader was that, but principally and especially he was the central rock in the money maelstrom known to the stock market as "Amal. I. S. & C.," which had only lately dared to swell its portentous belly in the company of the most developed and vicious saurians of the financial world.

All the way uptown, Mr. Randolph's face was concentrated in the nearest approach to a frown of which it was capable. He was not, however, weighing the substance of what he had heard this way and that, for the simple reason that the moment the one word, "Lewisfader," had reached his ears, he had seen the great light and grasped his hunch beyond any thought of looking back. That part of it was settled; what worried him now was the amount of ways and means in his pocket. By thinking very hard, he added up his capital without bringing it forth to the light of day. The exact sum was sixty-eight dollars and fifty cents.

No sooner had he passed the test in mental arithmetic than he drew up a little beyond the front door of the Rocket club. He started to leave his cab, paused, considered, and then deliberately lowered the flag. As he entered the lobby of the club, four scandalized fronts leaped to bar his way. They asked him a variety of biting questions: Did he think it was a night lunchwagon? Which chambermaid was he calling on? Was he looking for Mills hotel?

"Herbert!" roared Mr. Randolph. The functionary named, head doorman for the Rocket club since first it started on its appropriately meteoric career, leaped from his dignified seat on the somnolent side lines and stared wide eyed at the servile apparition that had dared shout the open sesame to that inviolate portal.

"Mr. Randolph!" he gasped at last, and the stunned fronts started to slink away.

"Hold on, there!" said Mr. Randolph, and divested himself of cap to one, overcoat to another, gloves to the third, and asked the fourth for a light. "Herbert," he continued, in modulated tones, "the cab outside is waiting for Mr. R. H. Randolph. It may be there for some time. Have an eye kept on it."

"Yes, Mr. Randolph. I'll see to it, Mr. Randolph. George, Mr. Randolph's letters."

"Never mind the letters," countermanded the oft-named one, and proceeded to thread his way to a certain small room strategically placed well within the depths of the edifice and far from the maddening tumult of the streets. The said apartment at the moment of his arrival contained five occupants seated round a circular table of convenient height and clothed in pale green, kindest of all shades to the eye of man. There were no mirrors on the walls.

Mr. Randolph's entry was greeted first with consternation and then with shouts.

"Bobby, you old scout!"

"Herv, by great balls of sweat."

"Randy, from where the devil?"

The speakers arose and pump-

handled Mr. Randolph's arm.

"Ye gods, man, where you been? Strayed in from a fancy dress?"

"Never mind the glad rags, fellows."

said Mr. Randolph. "I was just feeling lonely for the sound of chips. Room for another?"

"The surest thing! You don't know these two chaps, do you? Mr. Seegar, passed on to us from Frisco, and Mr. Bowling-True, our latest new member, Gentlemen, this is Mr. Randy Randolph of New Haven and New York, in disguise but still the best ever."

"Table stakes?" murmured Mr. Randolph, as he took his place, apparently at random, but at the left of the two comparative strangers.

"Of course! Same old ante. Same old game. You talk as though you'd been away for a month."

For a moment, but for a moment only, Mr. Randolph was dazed. Was it possible that the last three weeks hadn't been a year? He drew out his sixty-eight dollars and fifty cents nonchalantly, as though they were merely the loose change he had on his person, bought fifty in chips, and laid the small heap of what was left of his cash on the board. The strain on his nerves during the next half-hour put that of the five days' wait for a hunch on the Street to the blush. There came a moment when all his chips were gone, and he was forced to see with a full house for his small pile of change only.

"Serves you right, Randy," said Mr. Mein. "For forgetting to pile up the ready in a table-stake game; there are two and a half million walking the streets—"

"Oh, stow it!" murmured Mr. Randolph, as he counted out his share, amounting to ninety-two dollars and fifty cents, and pushed across the rest

of the fat pot to the next best hand. He looked up and smiled. "Boys," he remarked frankly, "I'm riding a hunch with four legs. Watch me."

Five spectators did, but got little excitement of their pains. Mr. Randolph was playing that most difficult and uninteresting of poker corollaries—a tight game. Mr. Seegar turned impatient as the conviction grew upon him that he had run up against the original hard-shell who never drew to less than a pair of tens, never bluffed, and could surrender three kings without a sigh to a low straight unseen. He began to make facetious remarks

in connection with the safety-first campaign which was then at its height.

Mr. Randolph nursed his pile through five long hours up to eighteen hundred dollars. Then it was that he suddenly met a raise of two hundred on the part of Mr. Seegar, tacked on three hundred more, waited for that individual to throw in his very good hand, face up, with the resigned smile of a wise one, and then carelessly displayed in the same manner, his own three-flush, so bobtailed that the attention of the S. P. C. A. should have been called to the case.

The roar of laughter that went up from all but Mr. Seegar was more full and free than even such occasions usually produce. Mr. Mein pounded Mr. Randolph on the back.

"Bobby, old boy," he said, "that was the eternalist, patientest, and deepest-laid trap I've ever witnessed in a life-long pursuit of the only national pastime!"

Why the Brunswick Phonograph is what it is-----

WHILE we rely entirely on the inherent merit of THE BRUNSWICK to prove its own case, as it has always done—yet, it is a source of great satisfaction to occasionally reflect on the wonderful organization and resources back of it which has not only been responsible for the present unique position of esteem in which the instrument is universally held, but which also furnishes us and our clientele of BRUNSWICK owners with the satisfying assurance that THE BRUNSWICK will always be the most desired of all phonographs.

A few facts concerning the Manufacturers of the Brunswick Phonograph

They are capitalized for \$56,000,000.

—have branch offices in twenty-five cities in the United States—five in Canada, one in France, one in Cuba and one in South America.

—operate their own timber lands in Northern Michigan.

—make every part of the BRUNSWICK Phonograph in its entirety.

—are the only phonograph manufacturers in the United States, and, we think, the only one in the world, that actually does this.

—have at the present time seven factories devoted to the manufacture of phonographs and parts, and two factories to the pressing of records.

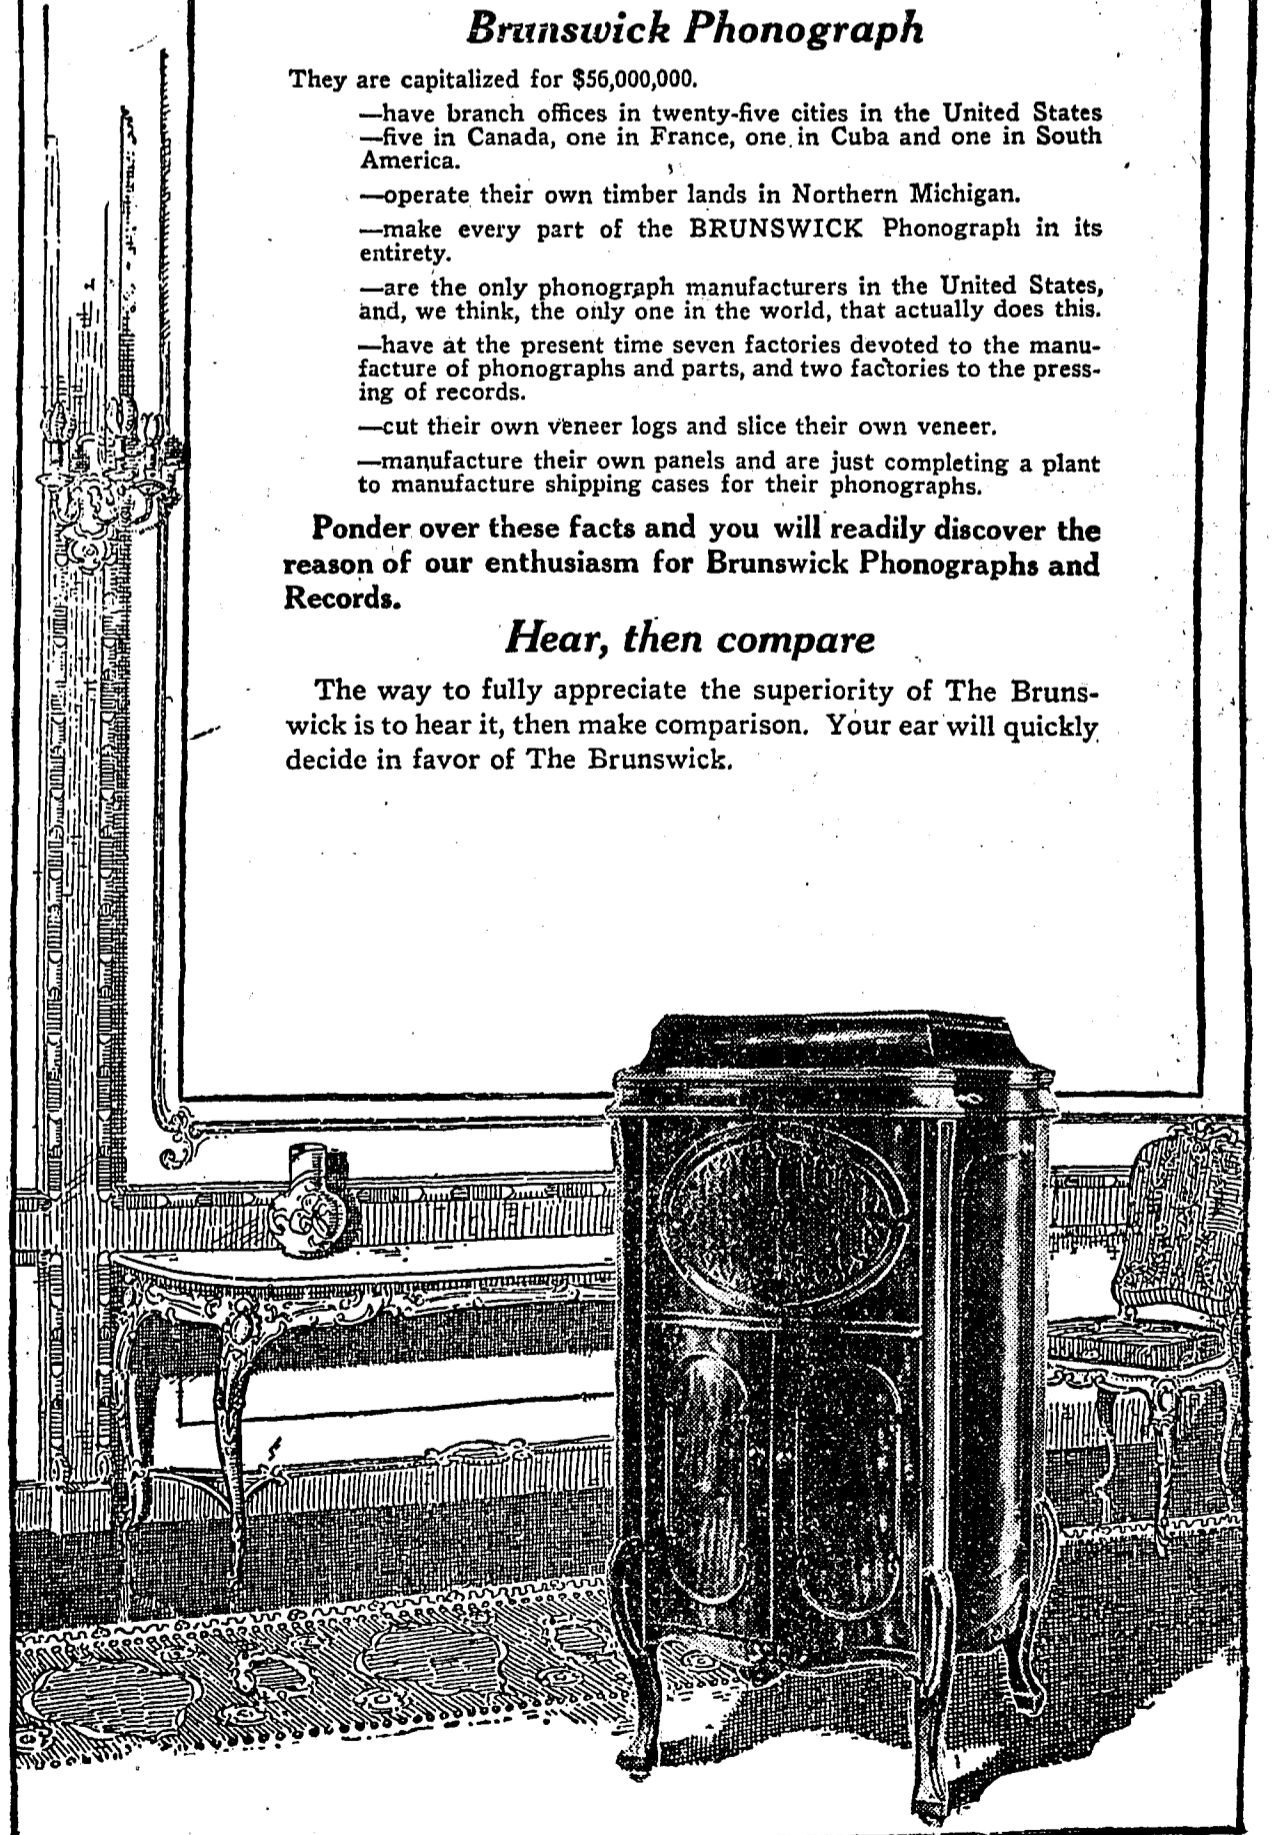

—cut their own veneer logs and slice their own veneer.

—manufacture their own panels and are just completing a plant to manufacture shipping cases for their phonographs.

Ponder over these facts and you will readily discover the reason of our enthusiasm for Brunswick Phonographs and Records.

Hear, then compare

The way to fully appreciate the superiority of The Brunswick is to hear it, then make comparison. Your ear will quickly decide in favor of The Brunswick.

HEROISM SHOWN BY AMERICAN WORKERS OF NEAR EAST RELIEF

Cables Reveal Appalling Armenian Need—Hundreds of Thousands Starving.

By CHARLES V. VICKREY
General Secretary, Near East Relief

Approximately 500 American men and women are standing loyally and heroically at their posts in Armenia, Turkey and the Near East. Many of them during the long winter of isolation are undergoing what we in America call "hardship." But these, our fellow citizens in the Near East, are volunteers serving with a high purpose, and they do not recognize hardship when they meet it.

They have had their opportunity to withdraw with honor from the field of famine and desolation. They have refused to leave, because they know that their departure would mean death for tens of thousands of women and children whom their efforts have kept alive and whom they are determined to save for a better future.

A dozen cables are on my desk from various centers in Armenia, Anatolia, Cilicia and Syria pleading piteously for the lives of hundreds of thousands who are homeless: "Sixty-five thousand refugees Constantinople alone;" "Refugees flocking into Aleppo;" "Twenty thousand refugees at Ismid;" "One hundred thousand people at Alexandropol will starve unless relief is provided;" "Refugees arriving from Caucasus, escaping persecution, naked, destitute! Urgent need to save most of them from death;" "Two hundred thousand starving between Kars and Alexandropol! Severe winter adding to distress."

Above all towers the mute appeal of the more than 100,000 little children, orphaned, homeless, whom these American relief workers have saved and whom we here at home, must sustain not only through the winter and spring, but through the summer and autumn as well. If we do not provide, they perish! And with them dies the hope of a New Near East.

The Easter season is here—the season that commemorates the Great Sacrifice for mankind. America is known as a Christian nation. She is also the wealthiest nation that history has ever known.

Can we really enjoy our wealth and claim the name of Christian if we turn a deaf ear to the appeal which General Leonard Wood, in behalf of the Near East Relief, has sent forth broadcast for a Lenten Sacrifice offering to save these little children in Bible Lands?

ASK AID FOR THE SUFFERING ARMENIANS

Distinguished Names on Lenten Sacrifice Appeal.

Major General Leonard Wood, U. S. Army, is head of a nation-wide committee making an appeal for a lenten sacrifice offering for the relief of the starving Christian populations of the Near East, in behalf of the Near East Relief, 1 Madison Avenue, New York City.

Among those who join General Wood in asking support of the work of the Near East Relief are: Andrew W. Mellon, of Pittsburgh, secretary of the treasury; ex-President William H. Taft; Frank A. Munsey; W. W. Atterbury of the Pennsylvania Railroad; President John Grier Hibben, of Princeton University; Dr. Alexis Carrel, of the Rockefeller Institute; Mrs. Carrie Chapman Catt, the suffrage leader; Mrs. Corinne Roosevelt Robinson, sister of the late President Roosevelt; Newcomb Carlton, president of the Western Union Telegraph Company; John C. WINTER GOOSE FEEDS OF MUCH IMPORTANCE

Oats Are Considered Superior to Corn for Grain.

Like Cows the Fowls Need Plenty of Fodder and They Will Eat Silage and Gather Considerable Food From Corn Fodder.

Oats are a better grain feed than corn for carrying the geese through the winter. Corn should be used sparingly as geese fatten easily and if the birds are overfat the eggs will show a low percentage of fertility.

Geese are much like cows in needing plenty of fodder. The clover chaff gathered from around the mangers is relished by geese. They will eat silage and gather considerable food from corn fodder. In fact, any green food that is suitable for dairy cows helps out in the winter ration of the flock. A flock of geese can stand much

Farmers Are Realizing More and More That Nothing But Purebred Geese Should Be Considered.

cold and they will often range on stormy days when it would be unsafe to allow the hens out. But at night a dry roosting place is needed that is free from draughts.

It pays to cull the geese in the fall and keep only the best for breeding stock. The money from geese seems to come from raising a large number while the grass is plentiful and then cashing in on the bulk of the flock before winter increases the work of caring for them. A small flock of breeders will annually produce a large flock of market geese if they are so managed that the eggs are strongly fertile and plenty of setting hens are available for brooding the first eggs.

In the winter the geese will be healthier if they are held in moderate flesh and not overfed. They cannot be neglected one day and then stuffed the next day if the best results are expected. Examine the birds every few weeks and note the condition of the body. Because of the heavy plumage it is sometimes difficult to tell the condition without handling.

SURGERY NEEDED FOR TREES

Most Persons With Little Practice Can Undertake Ordinary Repair Work Necessary.

The best, safest and most economical plan to prevent future extensive injury and decay, or to prevent the early disfigurement or death of the tree, is to attend to all injuries as soon as they occur, say specialists of the United States Department of Agriculture. This kind of work is comparatively simple and inexpensive. Tree surgery has become an established industry in all cities, and it is often profitable to employ the services of those trained in this work, but most persons can, with a little preliminary practice on the simpler types of work, undertake ordinary tree repair provided they are familiar with the use of the gouge and mallet, a saw, and a paintbrush. A steady hand and ability to climb will be necessary for work in the top of a tree.

It is the serious diseases that colds lead to that makes them dangerous. They prepare the system for the reception and development of the germs of influenza, pneumonia, tuberculosis, diphtheria, scarlet fever, whooping cough and measles. You are much more likely to contract these diseases when you have a cold. For that reason you should get rid of every cold as quickly as possible. Chamberlain's Cough Remedy will help you. It is widely known as a cure for bad colds.

She States it Mildly

While suffering with a severe attack of the grip and threatened with pneumonia, Mrs. Annie H. Cooley, of Middlefield, Conn., began using Chamberlain's Cough Remedy and was much benefited by its use. The pains in the chest soon disappeared, the cough became loose, expectation easy and in a short time she was as well as ever. Mrs. Cooley says she cannot speak too highly in praise of this remedy.

CONGRESS HEARS DRAMATIC PLEA FROM FILIPINO

Philippine Resident Commissioner Isaura Gabaldon

In a speech which was given very close attention and was frequently applauded.

"At one time," said Commissioner Gabaldon, "Congress had before it no less than thirty resolutions expressing sympathy with the aspirations of the Irish people, if not actually urging England to grant independence to Ireland. At that time, also the Filipinos were knocking at your door. Out of the womb of war, many European republics were born, and America has rejected to uphold the same. And yet the claim of the Filipinos is still unheeded. Must there be exceptions, then, in international justice?"

"My plea, gentlemen of the American Congress, is that you ignore no longer the repeated requests of a deserving people for an independence that rightfully belongs to them. The granting of independence now affords the United States a golden opportunity to give to the world unanswerable proof of its sincerity, its consistency and its altruism. It will be the greatest example of square dealing in the history of the ages."

"Do not think we are not appreciative of all you have done for us. We are. America has truly treated the Filipino people as no other nation has ever treated an alien race in all history. The high points of the American policy in the Philippines have been consistently inspired by altruism. We know that you were actuated in your labors by the desire to contribute to our own welfare."

"And we love you perhaps most of all for your solemn promise to grant us that which we hold dearer than life itself—our freedom. Independence is our national ideal. It is our all absorbing aim. It grows stronger every hour. For the spirit of nationalism never dies. Much less can it be subdued. We believe that we can never hope to be a sturdy nation if we are to rely forever on the magnanimity of the United States."

"America's task in the Philippine Islands is finished. What you have assumed as your sacred obligation in that part of the world has been fulfilled. A people with a medieval system of institutions has been transformed into a conscious nation, imbued with all that is modern in the activities of nations. And if you give us independence our gratitude to you will increase a thousand fold; it will last forever if you keep faith with us."

"There is but one issue in the Philippine question, and that is: Is there today a stable government on the Islands? In the Jones law you promised independence upon the establishment of such a stable government. Your own Governor-General has officially reported that there is a stable government in existence today, and we also have submitted plenty of evidence to substantiate its existence. Therefore, we hope and expect America will now carry out its pledge."

FINE HAT MAKING A PHILIPPINE ART

This Filipina is making a Philippine hat, which is becoming quite popular with both men and women in the United States, and is usually a source of great pride to the wearer.

FILIPINO INDEPENDENCE, BUT NO GUARANTY

(Chicago Tribune.) We do not blame the Filipino people for wanting their complete freedom. It is the natural aspiration of mankind.

CARELESS HANDLING CAUSE OF BIG LOSS

Easy for Potatoes to Develop Serious Diseases.

Important That Utmost Care Be Given Tubers While in Storage to Prevent Rot—Good Ventilation Will Assist.

Careless handling of potatoes during and after digging, says A. G. Tolaas, chief inspector for the Minnesota state seed potato certification board, is often responsible for serious loss from rot. Every bruise or infection on a potato makes it easy for various storage rots to develop. These dis-

eases have their origin in the soil or in unclean bins. It is important, therefore, that great care be taken while digging and also while handling the potatoes after placing them in storage.

Potatoes badly bruised when dug should not be placed in storage with sound potatoes, since they are certain to rot and spread infection throughout the bins. A field that has contained blackleg, and which has not been rogued, is very likely to yield a considerable number of potatoes slightly infested, at least, with blackleg rot. If these are placed in storage with sound tubers they may be responsible for large amounts of storage rot, especially if the potatoes are damaged when being dug, or after being placed in storage.

Mr. Tolaas finds that a large amount of storage rots can be prevented by placing the potatoes as soon as dug in crates, which, when filled, can be hauled to the storage cellar and carefully dumped wherever wanted. If it is necessary to drop the potatoes several feet much damage can be avoided by providing a chute for lowering them into the cellar.

Storage cellars, especially those which contained a lot of rotted potatoes the previous year, should be thoroughly disinfected with a strong solution of bluestone—one pound being dissolved in ten gallons of water; or formaldehyde, one pint in ten gallons of water, before the potatoes are put away. Good ventilation with temperature of from 35 to 40 degrees Fahrenheit will aid materially in keeping down the loss from storage rots.

MANY SCIONS ON ONE TREE

Novel Example of Tree Grafting Is Found in Orchards of Ohio Experiment Station.

A novel example of tree grafting is found in the orchards of the Ohio experiment station where an original Ben Davis tree contains 400 scions. Each scion is a representative of seedling or variety of apple trees found in many parts of Ohio. The grafts are made to secure a short-cut way of testing many of the seedling apples found in Ohio. The fruit from each graft is gathered and is tested out for appearance, quality, marketing and culinary qualities.

And get more genuine chewing satisfaction, when you use (this class of tobacco).

This is because the full, rich, real tobacco taste lasts so long, you don't need a fresh chew nearly as often.

And a small chew gives more real satisfaction than a big chew of the ordinary kind ever did.

Any man who uses the Real Tobacco Chew will tell you that.
