

The Changing Road

American Highway Educational Bureau: In the human ant-beds called towns, cities, counties and states, people are swarming over their highways and tugging at their loads in freful humor.

Something has gone wrong. Consumers have been robbed, producers impoverished and foodstuffs wasted, until the people have become exasperated.

An economic coupling pin is missing somewhere. That "pin" is the public highway. How it came to be missing as an effective unit in transportation, matters not so much here as what is being done to place it where it belongs.

It is enough to say that nobody in particular is to blame, that industrially the country has grown like a pup—first one member and then another out of proportion to other members of its body—and that in a perfectly natural way the demand for the more flexible and dependable forms of transportation have out grown existing facilities for satisfying those demands.

Realizing this fact, the people determined to find why their transportation needs had become so acute. One of the first things they discovered was a most glaring economic error.

Here is what they found: By turning over to private enterprise the development of rail transportation as the sole means of conveying the people and their products from one point to another, the demand for dividends on stock, interest on bonds, salaries for an army of toll takers in the guise of railway employees has made the cost of transportation excessive. Both producer and consumer are suffering to the limit of their power to bear. The producer barely receives a return of his cost to produce, and the consumer pays far more than the product should be worth.

Aroused to these evils, one remedy after another was applied by the people. At first they tried "doctoring" their transportation ills with railway commissions to regulate rates. Then followed farm marketing plans and farm credit laws.

Despite all effort the ills remained. Public needs continued to leap ahead of the facilities for economic distribution, and as these increased, parasitic middlemen multiplied in numbers.

Highway improvement was not keeping pace with highway use.

Upon further examination the people found another glaring error. Failure to surface the road and put it in condition for continuous operation of improved vehicles had already caused losses, amounting to millions of dollars annually, through laborious and restricted movement. They found also that by constructing an even and lasting surface on the road the saving thus gained in vehicle operation could be applied to repaying the cost of construction. By this very simple procedure the public road would be changed into a paying instead of a losing property.

With the foregoing facts clear, the next logical step was road improvement. With ruts out of the way, and with miry soil replaced by a rigid surface laid upon a sound subgrade, the problem, it was thought, would soon be solved.

All of this looked very simple. And yet, it was found that the problem itself was more than two million miles long, that practically every foot of the way would have to be reconstructed in one form or another to meet public needs.

So, the Federal Aid Law was passed to provide capital for comprehensive construction. States which had no highway departments quickly set up governmental machinery to meet Federal requirements. Other strengthened their existing departments, and a Nation-wide road movement was launched. In the face of all this planning and activity the bald facts now appear that actual construction is lagging far behind the blue print. Engineers are being hampered in their work by petty political influences

Elections Results

The village election Tuesday, while not entirely devoid of interest, was a quiet, peaceable affair. Several contesting candidates cropped up at the last minute to add a little zest to the election, but as only five could be elected, the five highest were counted winners:

An unusually large number registered, their being 92 names on the registration book. Eighty-eight votes were cast, only five who were registered not voting.

The five men elected are good substantial citizens of the town. They are entering upon the duties of village trustee with no hope of reward and little expectation of receiving appreciation for their efforts. The public can do no less than back them up in their work for the welfare of the town.

Following is a list of candidates elected and the number of votes each received: William Rogers, 80; Hugh Stanton, 75; N. E. Walker, 68; E. T. Long, 51; T. H. Sturdevant, 41. The next two highest candidates were M. O. Raby, 38; Charles Riggie, 30.

N. E. Walker is entering upon his fourth term as councilman, the two past terms having served as mayor. During his administration there has been a great deal of public improvement work done and the public money has been expended wisely and economically. No better man than Mr. Walker could be found to act as chairman of the village board.

Extends Territory

The Lewiston National Farm Loan Association has just been granted an amendment of charter. Its territory before comprised Nez Perce county, but has now been extended to include also that portion of Latah lying south of the township line between townships 38 and 39, north of the Boise base line, state of Idaho. This comprises about five townships, and includes the towns of Kendrick, Juliaetta and Genesee, also the villages of Linden and Crescent. This is a prosperous farming region.—Lewiston Tribune.

Dance Tonight

Tonight (Friday) is the baseball benefit dance and basket social at the Fraternal Temple. The success of the social will depend entirely upon the interest taken on the part of the young ladies of the community in preparing baskets. Last year a like event was given for the baseball boys and the ladies responded enthusiastically. If the same spirit exists tonight the affair will be a great success.

It might be well to keep in mind the fact that any basket that is sold for \$15 or over will make some money for the lady who prepared it. Half of the amount received will be refunded to the lady who brought the basket.

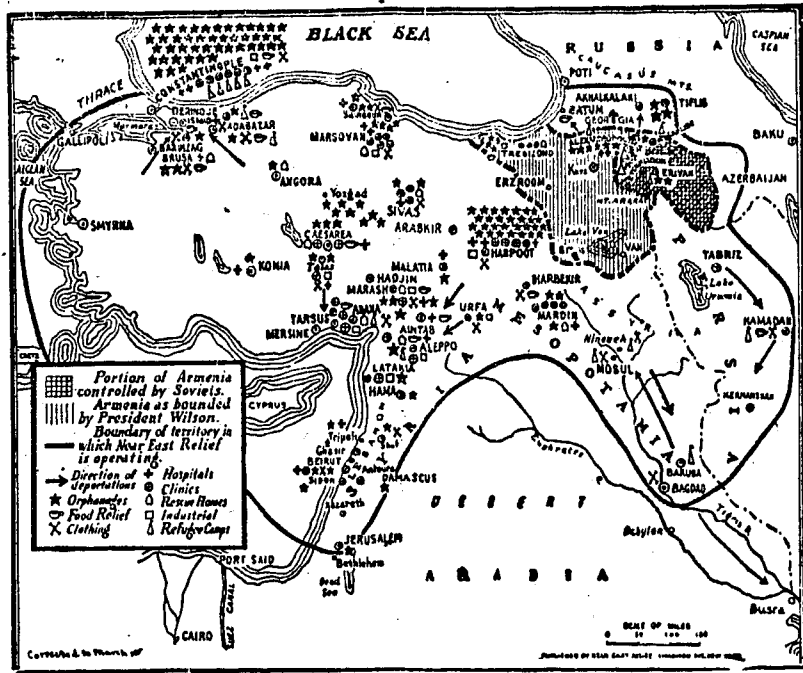

The University of Idaho Jazz Band will play for the dance. Everyone is supposed to be there to help with the festivities.

Wm. Meyer returned from his homestead in Three Bear country, Thursday, and will open his blacksmith shop for the summer. His son, Frank, accompanied him and will help him get the shop in shape for business, after which he will return to the homestead.

and misunderstandings on the part of the people themselves as to the real character and supreme importance of the work undertaken. These misunderstandings have been aggravated by political pettifoggers who are crowding around the job, as usual, with all sorts of advice on how and when to do the work, and where.

As a result of this babble more than one patient and capable engineer is in a mood to throw down his tools and quit. All of which tends toward further confusion and delay, and delay leads direct to continued loss.

The Newest Near East Geography

THE accompanying map aims to show the extent of the operations of Near East Relief and also by contrast how comparatively limited is the Armenian area in the Near East controlled by the Bolsheviks.

Wherever in the Near East there are destitute Armenians, Syrians, Greeks, Jews, Assyrians, or others, needy and oppressed, regardless of race or creed, there Near East Relief follows. From Constantinople to Bagdad; from Port Said to Baku, even into Persia, the protecting arms of Near East Relief have reached until today its work is far more extensive outside the country of Armenia than within.

May Form Highway District

Notice has been published that an election for the purpose of forming a highway district comprising the territory in the Juliaetta and Linville communities, will be held on Saturday, May 7. The proposed district embodies all of the territory left in the south western corner of the county, by the Troy and Kendrick districts. That the new district, if formed, will prove advantageous to Juliaetta is easily seen. It is practically the only way that a good highway down the Potlatch can be built to the county line. If Juliaetta secures this district it will mean that practically the entire county is under the highway district plan.

McCrerys Entertain

Mr. and Mrs. Aaron McCrery entertained the Circle Card Club at their home Tuesday evening. The usual game of progressive "500" was played and a very close contest it proved to be, as Mrs. MacPherson and Mr. Hanson tied for first prize and Mrs. Boyd and Ed Long ran an even race for the consolation prize. By cutting the cards Mrs. MacPherson and Ed Long won.

Members of the Club present were: Messrs. and Mesdames Rogers, Kite, Ed Long, Boyd, Leith, MacPherson and McCrery. Guests of the Club were Mr. and Mrs. Theo Hanson and Miss Rita Leith. Refreshments were served consisting of sandwiches, pickles, ice cream, cake and coffee.

Leland Items

Last week we failed to report the latest arrivals in our town. A son was born to Prof. and Mrs. Segsworth and an eleven and one half pound boy to Mr. and Mrs. Harrison Daugherty.

The Ladies Missionary Society will meet Thursday, May 5th with Mrs. J. M. Woodward.

Mrs. Koepf is staying with Mrs. Harrison Daugherty and caring for that new Grandson of hers.

Miss Carrie Lebaron is spending the week end with Mrs. Jesse Hoffman.

The school trustees now have the plans of our new school house which is to be built this summer. If built according to the plans will be one of which any community may be proud.

The school is preparing a program for the close which will be May 13th. There is quite a class to graduate from the eighth grade this year.

Claude Craiz is building a nice big wood house with concrete foundation and floor.

Mrs. Julia Flesman visited Mrs. Joe Piper, Wednesday.

Mrs. Clyde McGhee is visiting her parents, Mr. and Mrs. A. H. Smith, for a few days.

The Missionary ladies have added to the appearance of the parsonage by having the rooms repapered.

Uniontown Citizen Suicides

Nick Kauffman, a pioneer of Uniontown, committed suicide at 12:30 o'clock Wednesday afternoon, by shooting himself through the head with a revolver. Death was instantaneous. The act was committed at the Palm Pool Hall, which was owned by Mr. Kauffman. It is believed that the suicide was due to temporary insanity, caused by worry over business matters. The unfortunate man leaves a wife and four children.

Adolph Wegner Here

Adolph Wegner arrived Wednesday on the night train from Prescott, Arizona, where he has spent nearly two years on account of ill health. His many friends here will be delighted to learn that he is looking fine and that his physician stated he could go back to work whenever he wanted to. However, he is going to play safe and will not try to do very much before next fall. He is now with his parents in Kendrick.

On his way here from Prescott he stopped off at Los Angeles for several weeks.

Southwick News

H. D. Hayward and family took dinner at the Marion Wright home, Sunday.

Miss Carrie Alber spent Sunday with Miss Alice Baker.

Walter Bateman has returned from Spokane hospital and is now under the care of Dr. Horswell.

Surprise parties seems to be very popular this week, Ella and Alma Holmes were visited Tuesday night, Hershey Bangers, Friday night and Ralph Wright's, Monday night. The party at Ralph Wright's being a farewell party as the family are moving to American ridge for the season. At least two more parties are being planned for this week.

George Christensen has moved his family out to the farm to get ready for the spring work.

Those on the sick list this week are: Mrs. M. J. Whiting, Mrs. P. W. Thornton and the small son of Darl Wright.

Mrs. H. D. Hayward gave a very interesting discourse at the M. E. Church after Sunday school. Subject—"The Two Resurrections."

Prof. Jones of Southwick schools took dinner with the family of Chas. Hayward, Saturday.

Dr. and Mrs. Dean Baker entertained Mr. and Mrs. Will Wright at dinner last Sunday.

The Red Cross Pharmacy sold the soda fountain this week to a party in Walla Walla at a good price. Mr. Newton is glad to get rid of it as it required more time than he could afford to devote to it. The sale will leave the soda fountain business entirely to Perryman's confectionery. One fountain in town ought to do a splendid business.

Juliaetta 7, Kendrick 1

The first baseball game of the season for the Kendrick team was played at Juliaetta last Sunday and lost by a score of 7 to 1. It was a good, clean game and the one-sided score was due to errors on the part of the Kendrick team. The local team has had very little practice this season and Sunday was the first time the entire team had been together. A week from Sunday, May 8, a return game will be played with Juliaetta on the local diamond and the score will likely be transposed with the long end in favor of Kendrick.

Five hits were made by both teams, McCall for Kendrick securing a dandy three-bagger and Pickens of Juliaetta also a three base hit.

Juliaetta made but one error and Kendrick had eight. The errors were plainly due to a lack of practice.

McCrery started the game pitching for Kendrick and did good work but was taken out in the last of the second inning and put on second as the change strengthened the infield. Glen Flesman finished the game in the pitcher's box and held Juliaetta down to three hits in the seven innings. Scott Ross pitched a good, steady game for Juliaetta.

Joe Hampton of Juliaetta and Fred Bolon of Kendrick umpired the game and their decisions were very fair and proved satisfactory to the crowd.

Fatten Sheep Economically

That sheep can be most economically fattened on a feeding ration of long hay, silage and barley or long hay and barley, is the result of an extensive feeding experiment just completed at the Caldwell sub-station of the university experiment station, E. J. Iddings, dean of the college of agriculture announced in Wednesday's Star-Mirror. The experiment was conducted under conditions prevailing during the winter of 1920-21.

Seven groups were used, each composed of from 65 to 67 lambs. The various feed combinations used, and the cost of 100 pounds of increased weight for each feed were as follows: Long hay, silage and barley, \$7.25; long hay and barley, \$7.51; cut hay, silage and barley, \$10.23; cut hay and barley, \$10.37; alfalfa meal, syrup and barley, \$16.10. These costs were computed on the following prices; alfalfa hay selling at \$8; alfalfa cut hay, \$10.50; alfalfa meal, \$19.00; alfalfa meal and syrup, \$26.00; silage \$6.00 and barley at \$1.66 per hundred weight.

Lambs used weighed in at the beginning of the experiment at from 68.27 to 71.40 pounds and gained from 22.11 to 30.52 pounds each.

"An outstanding feature of the experiment is that where corn silage was introduced as a feed there was a distinct result in cheaper fattening," said Dean Iddings. "It must be remembered that when alfalfa is selling at a low price, cut hay is relatively more expensive than when hay is high, as the cutting cost remains approximately the same. Further, because of rain part of the time during the experiment, the feeding of cut and ground hay was attended with difficulties where there was not good shelter for feeding."

The experiment was planned by Prof. C. W. Hickman, head of the university department of animal husbandry department E. F. Rinehart, field animal husbandman of the extension division A. W. Johnson, sub-station animal husbandman, conducted the feeding

Committee Meeting Monday

The committee in charge of the Fourth of July celebration will meet Monday night to lay plans for the big time to be held here July 4. The committee is composed of ten and all are expected to be present as it will be an important meeting.

Over The County

Troy News: The First Bank of Troy held their directors meeting, Tuesday, April 19th. Clyde Johnson, president of the Scandinavian-American Bank of Spokane was elected director to fill the vacancy caused by the death of his father O. A. Johnson. O. Larson chairman of the Board of Directors of the above mentioned bank of Spokane also vice-president of the local bank was present at the meeting.

Genesee News: The first baseball game of the season is scheduled for Sunday, May 1, when Pullman meets Genesee on the local diamond. The Genesee boys are trying out and warming up and a good game is promised on the opening date. The committee in charge of baseball affairs are leaving nothing undone that will contribute to a winning team for Genesee this year. The schedule for the season has been almost made up and will be announced soon.

Deary Press: The Bovill baseball team had its first practice last Sunday when they lined up against the Bovill Gophers. A good number of the followers of the national game turned out to see the match, which was won by the regular nine, 12 to 6. Manager Chambers is in touch with James Meisaac, the popular Gonzaga star, and expects to land him when school is out. James played second base for Bovill last year. The first outside game will be played at Kendrick May 1.

Star-Mirror: George M. Crow, who was sentenced to serve four months in the county jail by Judge Nelson, of the probate court, has been pardoned. A telegram announcing his pardon and ordering his immediate release was received by the sheriff's office Saturday evening, and he was released from jail where he had served about two and a half months of his sentence. Crow was charged with threatening the life of his wife, while intoxicated. He is well known in and around Moscow where he had lived for many years. Investigation of his case brought the decision that the sentence was too severe but the only legal way in which he could be released was by action of the governor or board of pardons.

Crescent News

Mr. Bolon and son sheared Mulkey's sheep Monday and will shear several other flocks on the ridge this week.

Mr. and Mrs. Long visited at Clinton Wright's Sunday.

There will be a picnic and ball game at Jim Garner's, Sunday, May 1.

"Bring the whoop and bring the ball, Come with happy faces all. Let us make a merry ring. Let us talk and laugh and sing. Quickly, quickly come away if it is a pleasant day."

There will be a dance at Bud Harris' Friday, April 29th.

Sunday, Gold Hill and Cedar Ridge organized a ball team and played Southwick's second team. Southwick won by a score of 11 to 9. Our team will play Southwick on the Southwick diamond, Sunday, May 8th.

Teakean and Cavendish

The dance at Freemont Creek was well attended, and an enjoyable time was had by everyone.

Mr. and Mrs. J. C. Petersen and family, Miss Myrtle Kelley and Miss Cecile Garrison were visiting at the B. S. Adams home, Sunday.

Claud Hoffman made a business trip to Orofino, Saturday.

The school election was held at the Teakean school house the 18th of this month. Two directors were elected in place of Ray Garrison and C. Clannan. The two directors being elected were J. C. Petersen and A. H. Frazier.

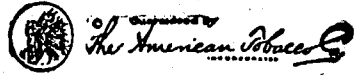

Mr. A. R. Counter from Oregon was out here visiting the last few days.

E. W. Lutz was in Lewiston Tuesday on business.

Cigarette

No cigarette has the same delicious flavor as Lucky Strike. Because Lucky Strike is the toasted cigarette.

Proper Place for Keeping Apples or Potatoes is Often Lacking on Farms.

The grower of either apples or potatoes who has no storage is frequently at the mercy of the speculator. An efficient storage house would make these men independent of the buyer and beyond the danger of losing their crops through a car shortage or by frost in the fall.

ENTITLED TO WEAR KILTS.

Scores of American visitors to Scotland have wondered by whom and on what occasions the picturesque native dress of Scotland, kilts, are worn nowadays.

Upon inquiry it is learned that apart from actual Highland gatherings, where every one is expected to "dress the part," there are only four classes of kilted folk accepted without comment in Scotland.

In the north the head of the clans and sept, the "gentry"—which includes Englishmen, Welshmen and anyone who owns land or uses land as a playground; in the south, the public piper; and all over Scotland, the soldier. As an evening dress it also has a degree of general popularity.

TALLEST INDIAN TOWER.

A cliff dwelling called Square Tower house having a high tower situated midway, in its length, has been discovered in the Mesa Verde National park, Colorado. This tower is 40 feet high, and is the highest building constructed of masonry by Indians north of Mexico, before the coming of the whites. It also furnishes the best-known example of pre-historic masonry shown in the construction of the roofs of two circular rooms. The original rafters are still in place, showing the marks of stone implements used by the builders. The whole ruin measures 136 feet in length.

PULPWOOD IN MONTANA.

Unlimited quantities of timber suitable for wood pulp used in the making of paper are available in Montana and would furnish material for a huge industry, according to J. C. Van Hook, state forester. The big drawback is transportation, and this factor has been largely responsible for the failure to develop the paper industry in the state.

WOULD NEVER DO.

Why can't you wear that hat now? It is trimmed with cherries, Hubby. Well? And cherries are out of season.

IN STYLE.

"Some of the most fashionable people are wearing their last year's clothes," said Mrs. Cumrox.

"Yes," replied her husband. "I told my tailor to be careful to put a patch in my new trousers where it would show."

LOST SCENARIO TALENT.

"Do you prefer Thackeray to Dickens?"

"I don't think either of them had half a chance, owing to the fact that the moving picture had not been invented in their time."

NOT IN THE LEAST.

"The great trouble with Dobb is that he doesn't know anything." "Oh, you're mistaken, that doesn't trouble him at all."

Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

The issue in the city election at Moscow Tuesday, was for or against Sunday movies. The citizen's ticket, which advocates Sunday picture shows, won.

One of the oft' repeated headlines these days is "Wheat Again Declines."

New York printers were assessed 10 per cent on earnings by the New York Typographical Union to help defray the expense of the fight for reduction of working hours. The union printers all over the country are after a 44 hour week. Their demands are beyond the bounds of reason and will probably be the means of turning the tide of public favor toward the open shop.

That Kendrick is built upon a solid foundation has never been more clearly indicated than during the stringent times which the country in general has been experiencing. There is not a vacant business building in town and every available residence is occupied and there is a demand at this time for several more houses to rent. While business conditions are quiet here at this time, as they are every where, the town, all things considered, has never been better off than it is today.

Road work is being greatly delayed this spring on account of the extremely unfavorable weather conditions. Some of the work that was done several weeks ago under the supposition that the heavy spring rains were over, will have to be partially done over again. Weather such as we have been having for several weeks is a new experience to most of the people of the community. Many farmers who had their farming operations well advanced last fall will be badly rushed again on account of the serious weather handicap. In the Palouse country there has been practically no spring work done. There is a large amount of plowing and seeding to be done in the Potlatch.

Moscow, the angel city, claims the highest percentage of church members of any town of its population in the northwest. There are twelve active churches there with the total of 1700 resident members, making approximately 50 per cent of the entire population church members.

Money is supposed to be tight these days but the way people handed out the cash at the Carlson Hardware auction sale last week would lead one to believe there is plenty of it in the country.

Presbyterian Church

Robert M. Hood, Minister.

"SELLING OUT BELOW COST"—this is the subject of the sermon for Sunday evening at 7:30. All are cordially invited.

The morning sermon will be preached at the Steele school house on Big Bear Ridge.

Don't forget S. S. at 10 o'clock and the Junior C. E. at 3 o'clock.

Methodist Church

Howard W. Mort, Pastor

Tonight at 7:45 will be a meeting of the Sunday School Board and any others interested in the Sunday school. The Rev. M. J. Perdue, the conference Sunday school superintendent from Spokane will be present to assist in any plan of advance and to advise.

Sunday school at 10 a. m. Morning worship at 11 a. m. Epworth League at 6:45 p. m. Evening Song Service and Worship at 7:30 p. m.

You are invited to all the services of the church.

American ridge—Sunday school at 10 a. m. No morning service.

Big Bear Ridge

Mrs. Snell arrived here Friday from Iowa, for an extended visit with her daughter, Mrs. Rufus May.

Milo and Helen Shind spent the week end with their sister in Deary.

Preaching services at the Lutheran church, Sunday, May 1st, at 3:30 p. m., by Rev. P. Hesby of

Deary.

Mr. and Mrs. Rufus May were Moscow visitors, Friday.

A large number from here attended the Carlson Hardware sale last week.

Rev. R. M. Hood of Kendrick will preach at the Steele school house, Sunday, May 1st, at 11 a. m.

The school directors elected at the various districts were as follows: Steele, Mrs. W. W. Reed; Taney, K. D. Ingle; Rimrock, Wallace Emmett.

Miss Inez Johnson finishes a successful eight months term of school at Taney, Friday.

Wheat Always Preferred Food.

While more people are living in the world today dependent upon rice than upon wheat for subsistence and a greater number of the human family live upon millet than any other cereal food, wheat is the preferred food among the higher civilized peoples. The more progressive peoples of the earth have ever been wheat eaters. Grains of wheat have been discovered in Egyptian tombs of the first dynasty, dating back 4,000 B. C., while bread of wheat has been excavated from the ruins of the prehistoric lake dwellers of Wagner and Robenhausen in Switzerland.

PREPAREDNESS.

Green—What on earth do you want with that sheet of postage stamps? Why, you've got a hundred there!

Grey—Well, you see, I've just completed a poem, and I may—er—send it to more than one editor.—Houston Post.

FREQUENTLY THE CASE.

"You must make a speech at the club tonight."

"Aw, I can't make a speech."

"Yes, you can. The man who introduces you will gab so long that you'll only have to say a few words."

—Philadelphia Bulletin.

His Mind in the Clouds.

Rev. George Harvest was to have been married to the daughter of Bishop Compton of London, but on the morning fixed for the ceremony forgot all about it and went off fishing. Much indignation was felt by the bride and her friends, and the engagement was broken off. But the reverend gentleman's second engagement was equally unsuccessful. Once more he forgot to come up to the church and lost his expectant bride in consequence.

Now is the time to list your Property

G. F. WALKER

Horseless Farms

Horseless Farms are becoming more numerous every year. Schaal & Schaal operate a ten thousand acre wheat farm twenty-five miles southwest of Winnipeg, Canada, with Fordson tractors. It would require more than four hundred horses to operate this farm. These successful farmers have tried both horses and Tractors, and say the Fordson does the work for less than one-half the cost with horses. These men have not had a horse on this farm of ten thousand acres for four years and they are very successful.

Now that prices are on the decline, the greatest economy must be used everywhere. The Fordson furnishes the most economical power in the world today.

Bovill at Kendrick, Sunday, May 1
Juliaetta at Kendrick, Sunday, May 8
Kendrick at Lewiston, Sunday, May 15

CO-OPERATION SERVICE

A bank to a large extent is a partner of its clients. Its success depends upon their success. It must develop their business in order to develop its own.

With this in mind we are constantly looking for new service features.

We have just installed an exchange board in the lobby of our bank. If you want to buy, sell or exchange any stock, feed, seed or implements, just call or write and we will be glad to give your wants publicity.

We have but our service—the best we can give.

The Farmers Bank

"The Bank that helps you Prosper."

"Here's Real Tobacco" says the Good Judge

That gives a man more genuine chewing satisfaction than he ever got out of the ordinary kind!

Smaller chew, lasts longer—so it costs less to chew this class of tobacco.

And the good, rich tobacco taste gives a world of satisfaction.

Any man who uses the Real Tobacco Chew will tell you that.

Put up in two styles

W-B CUT is a long fine-cut tobacco
RIGHT CUT is a short-cut tobacco

Wholesale Tobacco Company, 107 Broadway, New York, Cty.

10 Billions of Savings

That is the amount on deposit in the savings banks of the United States.

This is the fund which shelters, clothes and feeds us, pays wages, builds cities, extends railroads, equips industries and maintains government.

Ten billions is not all the country's capital but it is the capital from which drafts are made for new developments.

Progress depends on the accumulation of money for investment.

The owner of a savings account is a capitalist.

Notice to Creditors

Estate of J. M. Brookings, Deceased. Notice is hereby given by the undersigned, executors of the estate of J. M. Brookings, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within four months after the first publication of this notice, to the said executors at the home of H. J. Starr, Linden, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

H. J. Starr,
Frank Lyons,
Executors of the Estate of J. M. Brookings, Deceased.
Dated at Moscow, Idaho, April 16, 1921. 16-5t

Summons

In the District Court, Second Judicial of the State Idaho, in and for the County of Latah.
Edgar L. Latta, Plaintiff.

vs.
Lillian Mae Latta, Defendant.
The State of Idaho Sends Greeting To Lillian Mae Latta, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To procure a decree of divorce from the said defendant on the grounds of cruel and inhuman treatment.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 19th day of April, A. D. 1921. (Seal) Homer E. Estes, Clerk.
By Adrian Nelson, Deputy.
A. H. Oversmith, Residence Moscow, Idaho, Attorney for Plaintiff. 16-6t

BEGIN WITH POPULAR BREED

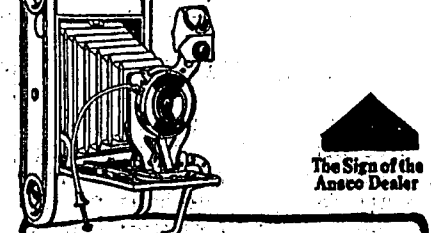

Not Wise for Beginner to Experiment With So-Called New or Untried Kind of Fowls.

Unless imbued with the true fowler spirit, beginners in poultry culture had better not enter their novitate with a so-called "new" or non-popular breed. As a general rule sales of stock in this class are always limited, hence to build up a trade is at best a slow process. There will also be lacking a fellowship between neighbors breeding the kind of poultry, as there will be less interest manifested. Better begin with a popular breed for which there is an established demand, and one that possesses commercial importance, either for eggs or meat, or both.

For a Severe Cold

"Chamberlain's Cough Remedy cured my daughter Anna of a severe cold and cough a few years ago and ever since then I have never missed an opportunity to recommend this medicine to anyone suffering from throat or lung troubles. I cannot speak too highly in praise of it," writes Mrs. D. J. Shelley, Earlville, N. Y. Chamberlain's Cough Remedy contains no narcotic and may be given to children with perfect confidence. It is a pleasant syrup so they do not object to taking it.

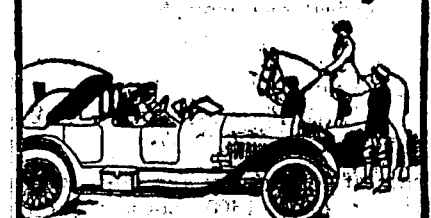

ANSCO CAMERAS

A GOOD camera for beginners is the AnSCO Junior—made in three sizes, 2 1/2 x 4 1/2, 2 1/2 x 4 1/2 and 3 1/2 x 5 1/2. An unusually helpful feature is a simple device which tells when the camera is held perfectly level.

The AnSCO Junior may be had in several different high-grade lens and shutter equipments at prices from \$10 to \$20. Other AnSCO Cameras, \$2 up.
Call on us for Speedex Film, Cyko Paper and Supplies.

Red Cross Pharmacy

WE OFFER YOU 5 to 20 Percent For Your Cash

This is more than your bank will pay you; more than Government bonds will pay you and more than you can get on farm mortgages for your money. Our idea is a new and radical step in merchandising. The big question is, can it be done? It's up to the public to get behind the idea and try it out. No one can lose but us.

Here is the Proposition

An all-cash business can be done for less profit than an all-credit business of equal volume. But an all-cash business will fail for lack of volume and an all-credit business must fail for lack of cash to carry on. Our business heretofore has been more cash than credit. Some of our most desirable customers have carried charge accounts with us as a matter of convenience. We prize this charge business highly and while we are not seeking new credit business we do want to retain the business we now have.

Credit business under present conditions is outgrowing the cash business and it is necessary that we do something to reverse this condition, and with this end in view we are going to inaugurate a system of offering special inducements for cash business. These inducements to attain the results desired must be startling and are not to be taken as an indication that our regular prices are too high. Our prices always have been and will continue to be consistently low prices based on a low overhead expense. REMEMBER, the object of the large discounts offered is to get ready cash and they will not apply when goods are charged for one day, one week or any other length of time.

Cash Must Accompany the Order

This Rule is Inflexible

Note these Prices	Reg. Price	Less per cent	Cash Price
Fine cane sugar per sack	\$11.00	10	\$9.90
Idaho Best flour per bbl.	8.40	5	7.80
Hills Bros. Red Can coffee per lb.	.50	10	.45
Buckeye extracts, 2 oz. bottle	.35	16	.30
Soda, 1 lb., 2 pkgs.	.25	20	.20
Soda crackers No. 3 pkgs.	.40	11	.35
Cottolene shortening 8 lb. pail	1.75	20	\$1.40
White Borax Naptha soap, 100 bars	6.00	15	\$5.10

These items merely illustrate the principle. Every article in the store except bread, tobacco, Crescent Baking Powder and Farm Products is subject to a cash discount of from 5 to 20 per cent. The discounts also apply to men's furnishings, hosiery and shoes. This is not a special sale but a manner of merchandising that is new to this section.

KENDRICK, IDAHO

INEXPENSIVE SHELTER SUITABLE FOR BACK YARD POULTRY FLOCK

Plan of a Simple Backyard Poultry House.

(Prepared by the United States Department of Agriculture.)

Plans and packing boxes can be successfully converted into adequate backyard poultry houses, but many owners of small flocks prefer a building erected especially for the purpose, because it usually presents a better appearance in the back yard. For such, poultry specialists of the United States Department of Agriculture suggest plans for a poultry house of the shed or slope-roof type that will make a small flock comfortable and be neat in appearance.

This building is 8 by 8 feet square, and is 6 feet high in front and 4 feet high in the rear. The house may be made higher with little extra cost and would be more convenient to work in. The ventilator in the rear is not needed in the northern part of the country. The roof is covered with roofing paper. The same material may be used on the sides or if desired the cracks may be covered with wooden strips three inches wide. Such a house is large enough for a flock of 20 hens.

Dry Floor a Necessity.

If the soil is well drained and remains dry no floor need be used in the house. Often a slight dampness can be corrected by filling up the floor several inches above the outside ground with sand, gravel, or dry dirt. Three or four inches of the surface of the floor should be removed and replaced with fresh earth once or twice a year. The run should be spaded up at least once a year. If the ground is so wet or damp that this condition cannot be corrected by filling, it is best to provide a board floor, as this will help to keep the house dry, will allow easier cleaning, and will promote the general health and welfare of the hens. A house with a board floor should be set on posts or blocks, so that it is 5 to 12 inches above the ground. When this space is left the floor will not rot so quickly and rats will not be so likely to take refuge under the house.

The dropping boards and roosts should be placed against the back wall. Here they are out of the way and also are least likely to be reached by drafts. The dropping boards should be about 20 to 30 inches from the floor, depending on the height of the building. This gives space enough under them so that the hens have room to exercise and is not too high for the heavier hens to fly up to. The roosts should be 3 or 4 inches above the dropping boards. If more than a single roost is used, they should be on the same level; otherwise all the hens will try to crowd upon the highest roost. A piece of 2 by 4 or 2 by

3, laid on edge and with the upper corners rounded off, makes a good roost. A pole, or even a piece of board 2 or 3 inches wide, may be used. If the roost is of light material and fairly long, it should be supported in the center, as well as at the ends, to prevent it from sagging badly. An allowance of 7 to 10 inches of roost space per fowl, according to the size of the birds, should be made. If more than one roost is used, they should be placed about 15 inches apart.

Provide Simple Nests.

Nests must be provided and may be very simple. Any box about 1 foot square and 5 or 6 inches deep is suitable. An ordinary orange box with the partition in the middle serves very well, each box forming two nests. The top is removed, the box laid on its side, and a strip 3 to 4 inches wide nailed across the lower front. Nests can be fastened against the walls of the house or set on the floor. It is preferable to fasten them against the walls, as they take too much floor space if set on the floor. One nest should be provided for each four or five hens.

MARKETING APPLES

Information secured from apple-market investigations by the United States Department of Agriculture indicate that relatively low prices in large crop years in the beginning of the season make for quick movement and rapid consumption, with the natural result of better season averages; that marketing of inferior grades along with good fruit in large crop years is not profitable; that the effective operation of grade and package laws may be counted upon to aid in stabilizing apple markets.

IMPORTANCE OF APPEARANCE

Potatoes Suitable for Baking Wrapped in Paper and Graded Bring Bigger Profit.

The package in which a product is sold has much to do with its sale. A New York farmer found it profitable to grade and wrap in paper potatoes suitable for baking purposes. He got a better price for them and also some advertisement which sold other products.

ly sound and practical. Work of Organization. The most successful co-operative organizations confine their efforts to the shipping and marketing of certain specialized products, such as citrus fruits, apples, peaches, potatoes, melons, poultry and eggs, dairy products, live stock, tobacco and grains. The substantial growth of co-operative marketing activities in this country is perhaps best illustrated by the fact that the aggregate volume of business done in a single year through co-operative associations and exchanges runs up into the hundreds of millions of dollars.

The handling of farm crops by groups of farmers through central associations and exchanges offers many advantages, such as the improvement and standardization of grading and packing; the obtaining and use of reliable crop and market information; the intelligent development of permanent markets; the effecting of savings

through the collective sale of farm products and purchase of farm supplies; the proper financing of all activities, including the building of warehouses, the preparation of crops for market, and their movement to the markets; and the employment of trained and efficient business and sales management.

An organization founded on dire need with a well-defined purpose has the best chances of success. Farmers who are satisfied with the results obtained without an organization do not feel a need for an association. Necessity for an organization may arise from the lack of marketing facilities, or from dissatisfaction with existing agencies. When a co-operative marketing association is under consideration it is advisable to have a preliminary survey made by competent local people or by experienced co-operative organization specialists from the United States Department of Agriculture, whose advice and services are available upon request. In making such a survey care should be taken to ascertain the need for an organization, the attitude of the farmers toward such an undertaking, and the approximate development of business available.

Manager Is Keystone.

The manager is the keystone of the organization. His selection is of the utmost importance. He should be experienced in marketing the line of products entrusted to his care; he should possess tact and good judgment, and be honest and above suspicion. The success of the organization depends upon his ability to meet the members and the trade with which the organization deals, and to retain their confidence. He should possess the proper qualifications for the position; he should be given broad powers and the hearty support of the members in his work, together with a salary that will attract ability and be commensurate with the services expected of him.

CONDITIONING BIRDS FOR POULTRY SHOWS

Stand Better Chances for Winning if Well Trained.

Poultry Specialists of United States Department of Agriculture Give Suggestions for Preparation of Fowls.

Although the larger poultry shows are usually held in the fall, smaller exhibitions are staged throughout the winter months. The following advice in training and conditioning birds previous to a show, given by poultry specialists of the United States Department of Agriculture, is good the whole year round. The bird that has been properly trained and prepared will stand a better chance every time of winning a prize than another bird equally good, but wild or easily frightened, or whose plumage is soiled or dirty.

After the birds are selected, remove them from the rest of the flock and place each bird in an exhibition coop for at least a part of each day. Fowls so confined will become accustomed to the coop. Handling them—that is, removing them from the coop each day—will have the effect of making them tame. In handling the birds and removing and returning them to and from the coops, move quietly and handle the birds gently so as not to frighten them.

Examine the plumage so that the fowl will become accustomed to such movements when being handled by the judge. Likewise, attempt to compose the bird by smoothing and stroking the wattles gently; this seems to have a soothing effect on the fowls, and when done frequently and properly they come to look for it when one approaches the coop.

Birds to be exhibited should not be confined to the exhibition coops for too great a period, as long, continuous cooping may cause them to get out of condition and therefore unfit for show. A satisfactory plan is to confine the birds for a part of each day or every other day alternately up to a few days before sending them to the show, when they should be confined until ready to ship.

Eggs For Hatching

Single Comb White Leghorns. I will be prepared to furnish eggs after February 15th from select three and four year old hens, at the following prices: 1 setting \$1.50, 3 settings \$4.00, 5 settings \$6.00, 100 eggs \$7.00. Postage and packing extra. J. C. Hamil, phone 3425. Juliaetta, Idaho. 5-tt \$20 per cent discount on these prices after May 1.

Notice to Contractors

Sealed bids will be received for the construction, heating and plumbing of a frame school building to be erected at Leland, Idaho, until 10:30 a. m. May 2, 1921.

The building is to be completed on or before August 1, 1921. Plans and specifications may be obtained from R. S. Loring, architect, Lewiston, Idaho, or of the Board of Trustees at Leland, Idaho. R. B. Parks, Clerk. 16-2t

WILLING TO CALL IT A DAY
But Any Mother Will Tell Daddy He Had a Comparatively Easy Twelve Hours.

A Spartanburg man's wife had influenza and he stayed at home one day to help with the housework and the care of the children. That night, after the children had been put to bed, he undertook to make a record of his day's work, and this was the result:

Opened door for children, 108 times; closed it after them, 108 times; tied children's shoes, 16 times; number of stories read to them, 21; stopped children playing piano, 19 times; smoke rings blown to amuse them, 498; arbitrated children's quarrel, 77 times; put doll carriage out, 28 times; brought doll carriage in, 28 times; mended kiddie car, 5 times; cautioned children about crossing street, 66 times; children crossed street, 66 times; peddlers rang door bell, 7 times, toy balloons bought for children, 6 times; average life of balloon, 3 minutes; dried children's tears, 14 times, assisted children to blow noses, 14 times; telephone calls answered, 8; percentage of wrong phone numbers, 100 per cent; crackers issued to children, 37; slices of bread and butter served, 12; drinks of water served, 9; refused to buy candy, 87 times; questions about Santa Claus dodged, 1,501.

The gentleman is now advertising for two nurses and governess.—Exchange.

SILVER MODELING MADE EASY.

Recent Discovery Will Be a Boon to Sculptors and Workers in the Metal.

A preparation of silver which may be made in a plastic form like wax or clay, and also thinned down to the consistency of paint has been discovered by a member of the staff of a large American research laboratory. Copper, copper alloys and bronzes may be worked in the same manner. By simple technology, the preparation may be reduced to the pure metal shape. A sculptor may work it in without any change in its form or the round or in relief,

just as he does his usual materials, or in dilution it may be applied to a metallic surface with a brush. It greatly simplifies the problem for artistic work of a high order, although, of course, it is more expensive than stamped ware. Medallions and figures may thus be presented in the original without the need of casting, and such articles as silver sets may be made of which every member is original and unique. It provides a new medium for artists. The invention is patented and ready for introduction.

SUGAR-GROWING IN IRELAND.

In 1790 sugar growing was established in Ireland, the Irish climate being remarkably adapted for the growth of bulbous roots of a superior quality, whether for the manufacture of sugar or for feeding purposes. In those days the people of the Irish nation were the greatest sugar consumers in the world. With the present great scarcity of sugar in the United States and other parts of the universe Ireland is seizing the opportunity for the re-establishment of the industry and for making the Irish nation once again the greatest sugar-growing country.

Consider Probable End.

Better it is, toward the right conduct of life, to consider what will be the end of a thing, than what is the beginning of it; for what promises fair at first may prove ill, and what seems at first a disadvantage may prove very advantageous.—Wells.

Jewish Sabbath.

The Jewish Sabbath starts at sunset on Friday, because the Jews, like the ancient Greeks, began their day at sunset and not at sunrise, or immediately after midnight, as we do, who follow the ancient Romans.

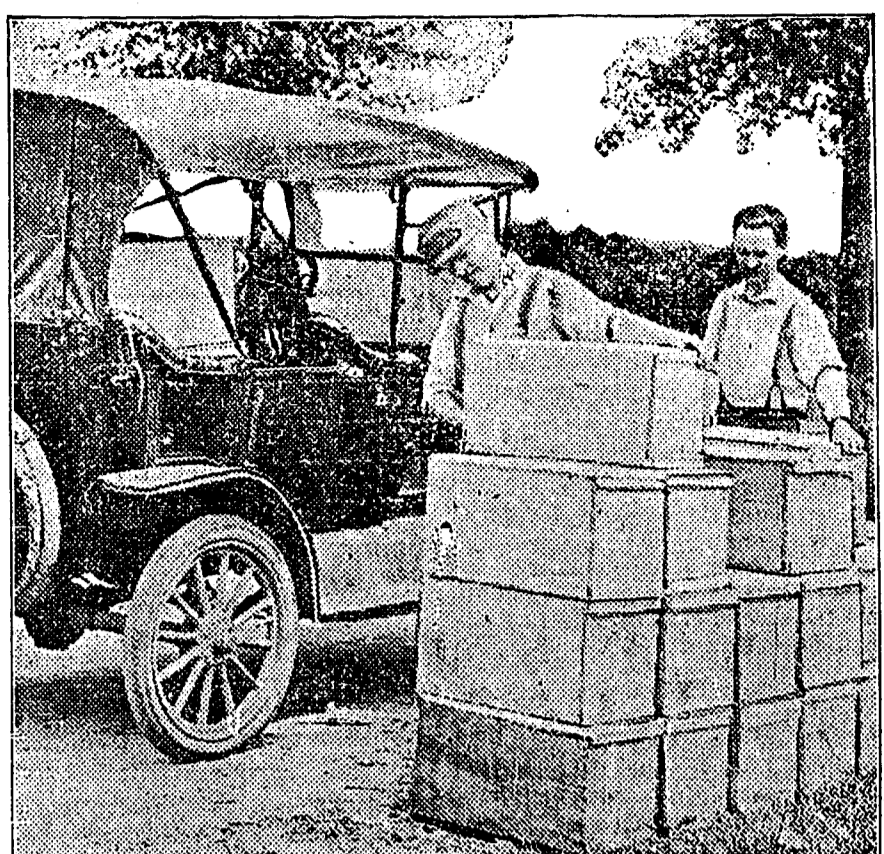

"Good Stickers."

There are some practical "make-shifts" for mauling. The white of an egg will be found quite as good for sealing letters. Another substitute is a cold boiled potato rubbed over the paper.

His View.

A somewhat cynical acquaintance tells us that the secret of happiness is not to let your troubles bother you any more than they bother your friends.—Boston Transcript.

OPPORTUNITY FOR SELLING FARM PRODUCTS DIRECT TO CONSUMER.

The Automobile Brings City Customers to the Door.

There are approximately 7,500,000 automobiles in the United States and there are almost that many farmers. In this year, when the most expensive crop ever raised by the American farmer seems likely to pile up on his hands for lack of a profitable market, a way is suggested to reduce surplus by attracting automobile trade direct to the farms.

Most city automobile owners drive into the country once a week or more, and every farm located on an automobile road has dozens or hundreds of possible customers for its fruits, vegetables, poultry and eggs passing its gate every day. The war made the market basket poplar, and the ordinary automobile owner who keeps house would be perfectly willing to take home a bushel or more of produce if by so doing he could lessen his living expenses.

Stands Along Many Roadways.

Roadside stands for the sale of fruits and vegetables are seen along many highways and frequently have proved profitable. But observation shows that they have not been developed to the full measure of success. One of the principal difficulties is that the autoist does not see the stand until he is abreast of it, after which he must make up his mind and check his machine. Then, in nine cases out of ten, he concludes that there will be another stand farther along and that it is not worth while to turn around and go back. One farmer in Pennsylvania solved this difficulty by placing a series of signs along the entire half-mile front of his farm. These greeted the motorist.

- "Fresh Fruit One-Fourth Mile."
- "Sweet Cider 60 Rods."
- "Fresh Comb Honey 50 Rods."
- "Fresh Vegetables 40 Rods."
- "Fresh Eggs 20 Rods."

The motorist's eye thus was attracted and he had time to make up his mind, and in a large number of instances stopped and made a purchase. The signs were inexpensive and yielded a large profit.

There are many motorists who travel

over the same route time after time. The farmer learns to recognize them. Children especially nowadays learn to know makes of automobiles at sight and can pick out those which frequently pass. One effective way of catching the motor trade is to note the license numbers, look them up at the city hall or police station on some trip to town, and then drop them postal cards calling attention to the advantage of carrying home a bushel of this and that product on their next trip. This form of appeal is more effective if the farm has a distinctive name, as a constantly increasing number of farms have. One thing essential to building up even a transient trade in farm products is that the prices shall be reasonable, preferably a shade below city market prices, and that the goods shall be of honest quality. Too much emphasis cannot be placed on the latter feature. There is, of course, a temptation to reason that the same customer will not come back again, but this is likely not to be so, and even if it is, there is a broad freemasonry among motorists, and the word quickly spreads that one of the number has been cheated, whether it be by a garage, repair man, hotel or dealer, city or country.

Fair Dealing Pays Best.

The farmer has to market his produce somewhere. If he takes it to the city, it will be carefully inspected for quality and the price will be regulated by supply and demand. If he will place his product in such position as to attract and arrest the passing motorist and then make the price and quality such that the motorist wants to come that way again or tells his friends to stop, he is on his way to a business that may be made season long and highly profitable. If the farmer keeps on hand a supply of suitable bugs or packages in which to handle his products, it will mean many a sale which otherwise would be lost because the autoist would often not be prepared to handle the things he would like to buy. This idea is capable of adaptations that will suggest themselves.

OYSTER RAISING IN HOLLAND

Highly Scientific Methods Employed in That Country Have Been Remarkably Successful.

In the industry represented by oyster cultivation, Holland is the most systematic in its operations and employs more elaborate methods than any other country in the world. The numerous sounds that indent the coast of Holland, particularly in the region of the River Scheldt, afford excellent facilities for the propagation of the oyster and enable the country to conduct the most successful oyster industry in Europe. Public dredging is not permitted, as the result of that system was the threatened exhaustion of the fisheries, and the beds have been carefully surveyed and specific tracts are leased to individuals and companies, who are thus enabled to conduct the propagation of the oyster in a systematic manner that insures the best results from the territory available. Many growers lease several tracts in different localities, and adapted to different purposes, which facilitates the various operations, as the oysters can be shifted from one place to another, according to the season and the stage of development. A few of the oystermen plant shells on the banks, as is done in many places in this country, but the largest and most successful propagators are equipped with their own tanks and ponds, located in convenient shallow bays, in which they carry on the culture.

MEASURE HEAT OF STARS

Scientific Instrument Used at Washington is Sensitive to an Almost Miraculous Degree.

One of the experts employed by the government bureau of standards in Washington has perfected an instrument which measures the heat of a star so far away that it can't be seen with the unaided eye. This same instrument is sensitive enough to be affected by the heat of a candle 100 miles away. "What is the practical value of such labor?" asks Thomas H. Uzzell in *Everybody's*. "Well, for one thing, these experiments by Doc

tor Coblenz have made a substantial contribution to the theory and technology of measuring high temperatures which will melt any known substance. Making use of this new knowledge, other bureau men have greatly improved the high-temperature thermometers which are used in the steel industry to measure the temperature of molten steel. One of the biggest improvements in the production of steel in recent years is the result. "Formerly many millions of dollars' worth of steel products depended upon the trained eye of the foreman in estimating the temperature of steel from its color. But these new thermometers don't drink; they don't fall; and their accuracy means vast savings in money, better steel, a decided step forward in America's industrial sovereignty."

On Toads.

"Many stories are extant tending to show that toads have been found alive in rocks or in soil deep in the earth; yet so far as investigated by the writer in no case has the evidence been at all conclusive," says A. H. Kirkland in an article on "The Garden Toad" in *Boys' Life*. "On the other hand, experiments have shown that toads may be kept alive at least 18 months sealed up in plaster or limestone. There is little doubt that the toad may live to be 20 years old, or more.

"Though it lives alone in summer, toads often hibernate in colonies of half a dozen or more. In feeding, usually by night, the toad patrols a fairly well-defined beat; garden and flower beds are frequented, and particularly the ground under arc lights, where numerous insects fall fluttering from the lamps above. When food is abundant, as shown by experiments on toads in cages, the animal eats an equivalent of four square meals daily, consisting of caterpillars, cut-worms, beetles, ants, etc."

First Clocks Simple Affairs.

The first clocks were simple affairs which showed the hour alone; then followed the addition of the minute hand, and later came clocks which recorded the day of the month, the phases of the moon, and many other pieces of information, generally of a

more or less astronomical character. During the sixteenth century, the Italian and German clockmakers, notably those of Nuremberg and Augsburg, made great progress in their art. There are those who claim that one Richard Harris, an Englishman, invented and set up the earliest pendulum clock some time during the first four decades of the seventeenth century; but this story does not appear to be well authenticated, and the honor of introducing the pendulum seems to belong to the Dutchman, Huygeus.

Men of Probity.

Good literature proceeds from men of natural probity, and since one ought rather to praise the inception than the result, you should give greater praise to a man of probity unskilled in letters than one skilled in letters but devoid of probity.—Leonardo da Vinci (translated by Edward McCurdy).

Spirit Meant for All.

That spirit which suffices quiet hearts, which seems to come forth to such from every dry knoll of sere grass, from every pine stump, and half-imbudded stone on which the dull March sun shines, comes forth to the poor and hungry, and to such as are of simple taste.—Emerson.

The Kendrick Hardware Co.

GLEANINGS

W. A. Perryman has rented the C. F. Byrne property and will move there this week.

Tom Daugherty received a letter from his wife, who is in a Moscow hospital recovering from an operation, stating that although she was getting better slowly, it would be some time before she would be able to leave the hospital.

The U. S. Civil Service Commission has announced an examination for the County of Latah, to be held at Moscow and Deary on May 28, to fill the position of rural carrier at Kendrick.

Miss Edith Comton, who is attending the Lewiston Normal, spent the week end here with home folks.

Ben Shay came here last Saturday from Spokane to buy back the local shoe shop. He sold the shop here to Spokane parties some time ago and opened a shop in Spokane. After buying back his old shop he went to Spokane to make arrangements to sell his property there. He says that Kendrick is the best yet and he is glad to get back.

Frank Fox, who owns a fruit ranch on the Columbia River, was visiting friends here over the week end.

William Zeyen of Leland went to Spokane last week where he had an operation on his foot. While in France he was wounded in the ankle by a machine gun bullet. While the ankle will never be as strong as it was before he received the wound it is believed the operation will prove beneficial.

Mr. and Mrs. A. C. Deeter arrived last week from Moscow. They shipped their household goods here, Friday, and are now at home in their bungalow in the lower end of town. They expect to start building their new home very soon.

A member of the Anti-Saloon League was in Kendrick last week making arrangements to send a speaker here some time in June.

Wednesday of last week the local bakery turned out 75 dozen doughnuts to supply a part of the lunch for the Carlson Hardware sale for that day.

A. E. Wilcox visited his ranch above Orofino last week. He is having a big barn built on the ranch. Charlie Walker has the place rented.

George Holbrook has been averaging a carload of stock a week shipped out of Kendrick.

The Kansas City Journal, one of the big papers of the middle west went bankrupt and was sold at public auction by receiver April 18.

The sale of the Kendrick Furniture Company was a great success. The stock was almost completely sold out. The firm is now engaged in making up a large amount of furniture in the cabinet shop in the rear of the store, which will soon take the place of the depleted supply.

Curtis Bailey won the \$10 prize at the Carlson Hardware sale last Friday and Ed Long won \$10 Saturday. Ed bet a cigar that he could guess within two kernels the number of grains of corn the rooster would eat. He won the cigar and \$10 prize.

Mr. and Mrs. Leo Raaberg and little daughter spent the week end in Clarkston with relatives.

Miss Mable McKeever came up from Lewiston, Tuesday, to visit her parents.

One of Frank Wilken's cows presented him with a freak calf last week. It was a perfectly good calf in every way except it was minus one leg. As the Potlatch country isn't very well adapted to quadrupeds with only three legs, the calf died at the age of a few hours.

Rev. Henry T. Green, Methodist minister of Lewiston, arrived Tuesday to visit Rev. and Mrs. Howard W. Mort.

M. V. Thomas was in Lewiston on business the first of the week.

The Bovill baseball team will be here Sunday to cross bats with the locals. Kendrick boys have been practicing consistently since their defeat last Sunday and are in shape to put up a good game against Bovill. The local team needs the loyal support of the community and a good turnout is expected for this game.

At the village election in Juliaetta Tuesday the following ticket was elected to serve as a board of trustees for the ensuing two years: E. W. Porter, Wm. Fields, M. F. Morgan, J. H. Millard and L. W. Houck.

Clay Albright who lives below Juliaetta, underwent an operation Tuesday morning at a Moscow hospital.

Mrs. W. C. Brooks of Lewiston arrived Wednesday morning to visit her daughter, Mrs. E. W. Lutz.

Miss Laura Pemberton returned to Lewiston yesterday after visiting a short time here with her mother.

John Florance, who was visiting friends here yesterday, stated that

the fruit in Clarkston has not been damaged to any extent by frost this spring. There is an unusually heavy crop of apples on his place and he said it would require a large amount of thinning to get the excess fruit from the trees.

A conference of county school superintendents will be held in Moscow next week at the University of Idaho. The session will begin Monday and continue until Thursday. Superintendents are expected from all over the state.

Born to Mr. and Mrs. Charles Keeler, Sunday, a young gentleman, weighing 9 pounds.

A. D. Ozmun says he has 20 acres of alfalfa as fine as anyone could wish to see. He expects to get a heavy crop of hay from it this summer. The excessive moisture in the soil this season will no doubt make the second crop of alfalfa well worth considering.

William Rogers received all but one of the votes counted at the election last Tuesday. He said he appreciated very much the hearty support given him, but that it wasn't so much a question of being elected village trustee with honor as it was of finishing the 2-year term of office with public approval.

Born to Mr. and Mrs. Ben Weatherby of Fix ridge, Tuesday, a 9 pound boy. This boy was born in honor of Dr. Rothwell's 53rd birthday.

Harve Roberts of American ridge was a Lewiston visitor Wednesday afternoon.

John Florance and daughter, Mrs. Harry McKeever, arrived Thursday from Clarkston to visit friends here.

George Carlson was a Lewiston visitor Wednesday.

County Agent Fletcher arrived Thursday morning and went from here to Cedar Creek where he held a squirrel poisoning demonstration meeting.

Due to the health crusade in the Leland school a report was sent to the county superintendent's office to the effect that every one of the pupils had earned a gold button by living up to all of the requirements. The pupils all sleep with their windows open every night, regardless of weather conditions.

Mrs. Joday Long has been quite ill for the past week or more. Both Mr. and Mrs. Long have been ill a greater part of the time since returning from Spokane several weeks ago. Mr. Long was down town a short time the middle of the week but is still feeling anything but well.

J. H. Bolon and sons, Fred, Ernest and Sam, left for the Whitebird country, Thursday, where they will shear sheep. They went there several weeks ago but owing to the fact that there was snow to the depth of several feet, the sheep-shearing season had to be postponed.

William Freytag came up from Lewiston, Thursday afternoon, to transact business.

There is some talk of getting up a baseball team in Kendrick to play the first team. When the weather warms up and baseball enthusiasm has reached fever heat, don't be surprised if the following aggregation of players, has been, would bees and never wagers issue a challenge for a game to the finish: George Carlson, catcher; I. R. Morrison, pitcher; R. B. Knepper, first base; Wayne Herras, second base; Frank Boyd, third base; Perryman, short stop; A. V. Dunkle, Joe Gardner and Fred Flaig in the field.

Mrs. K. F. Bigham was a Troy visitor the first of the week.

A permit has been granted to put in a bathing beach at Lewiston along the banks of the Snake River. Plans are under way to put in a resort there requiring the expenditure of \$30,000. If the plans are carried out there will be a dancing pavilion, bathing beach and many other attractions.

Charlie Mulkey of Linden was in Moscow, Tuesday, transacting business.

Mr. and Mrs. Dave Senter have moved into the little brick house owned by Jesse Collin, and located near the A. K. Carlson residence.

Linden Items

Mrs. Jim Garner was a caller at the McPhee home, Wednesday.

Mr. and Mrs. Elmer Hudson spent the day, Sunday, at the Isreal home.

Mr. and Mrs. Rube Garner and Arthur Bohn went to Bovill, Saturday to see their father, who is ill in the hospital. Mrs. Garner remaining with her father.

Mrs. Vaughan and Ted spent the day at Granvill Wall's, Monday.

Mrs. Pippenger spent Sunday with her prents, Mr. and Mrs. McPhee.

Miss Bertha McAllister was a visitor at the McPhee home Sunday.

Mrs. Clarence Fry and children, Mrs. Vaughan and Teddie, took supper at the road camp Saturday.

People attending the moving picture show at Crescent, Friday,

reported it fine.

Mr. Foster's family are moving to their other place this week.

Mr. and Mrs. Frank Lyons spent the day at McAllisters last Sunday.

Mr. Alexander returned home Saturday from a visit in Lewiston.

Aunt Carrie Allen spent the day with Eva Smith, Saturday.

HOG WALLOW IS OF IMPORTANCE

Sanitary Type Advocated by the United States Department of Agriculture.

ANIMALS SUFFER IN SUMMER

Provision Should Be Made for Intake and Outlet So That It Can Be Filled and Drained Often to Keep Clean and Fresh.

(Prepared by the United States Department of Agriculture.)

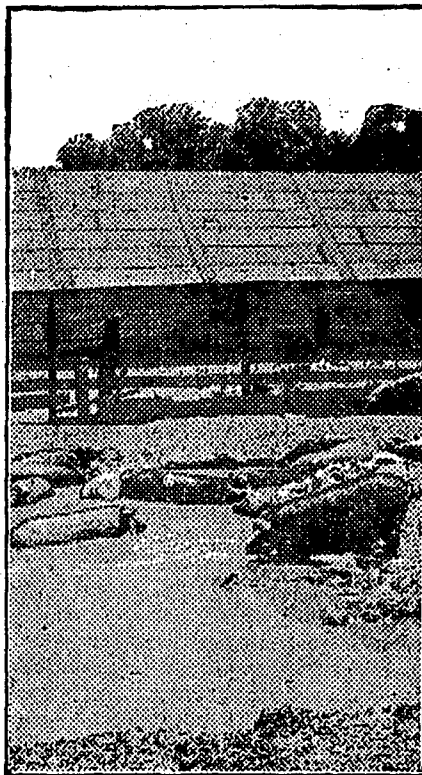

It is as natural for the hog to want to wallow as it is for the small boy to scurry to the old swimming hole with the first breath of spring. Hot weather is hard on fat animals, the portly porker included. That is why a well-made, sanitary hog wallow is like a Coney island bathing beach for the hogs. A popular and serviceable type of wallow advocated by the United States department of agriculture should be made of concrete about 12 inches in depth and large enough to accommodate the herd of hogs. The wallow should be supplied with a satisfactory intake and outlet so that it can be filled about two-thirds full of water and drained every few days, or as often as is necessary to keep the pool fresh and cleanly.

Face Two Extremes.

The hog grower in many of the leading pork producing states faces two temperature extremes during the year. During the winter, unless he provides comfortable houses and warm quarters, his hogs are likely to suffer from the cold, while in the summer season he must handle the animals under conditions of extreme heat. Any animal as fat as the average hog which is to be marketed in the late summer or early fall suffers greatly during hot weather, and unfortunately many hog farmers neglect to provide shelter and protection for their hogs from the extreme heat. During hot weather hogs need plenty of shade—natural shade such as is furnished by trees and bushes being the best.

Temporary Shelter.

Where natural shade and shelter are not available, the hog owner should put up a temporary shelter by building a framework about four feet

Hog Cholera Thrives Under Such Conditions.

high and thoroughly covering the top with brush, straw, grass or hay. This inexpensive sunshade should be of sufficient size to protect a herd of hogs in comfort as they lie under it. As a rule, the ordinary hog house should not be used for shade purposes during the summer. Each year hog mortality is comparatively heavy due to "porker sunstroke" induced by maintaining the hogs in the open without sufficient protection from the ruddy glow of Old Sol's furnace.

GROWING SOY BEANS IN CORN

Farmers Pleased With Results Obtained by Using Crops for Silage and Hogging Down.

The Iowa agricultural experiment station says that Iowa farmers who have been growing soy beans in corn for silage or hogging down, furnish almost conclusive proof of the value of the combination.

Some 800 farmers throughout the state co-operated with the experiment station in the growing of these crops. Over 700 of these men were well pleased with the results and said that they would use the combination of soy beans and corn more extensively in the future. More than half of the number of co-operators reported that the yield of corn was increased rather than decreased.

Gingham Dresses

A new shipment, up-to-the-minute in style and quality just arrived. Prettily made in pink and white, blue and white, green and white plaids, trimmed with white collars and cuffs, also trimmed in plain colors to match. Wide sash tie bow in back. All sizes

Golden Rod Borax Naptha Soap powder, per package 25c
Heinz White Malt Vinegar, quart bottle 30c
Morton's Table Salt in packages, 2 for 25c

Kendrick Store Co.

"Everything to Eat and Wear"

Statements such as "Didn't decrease corn yield," "Coming crop to mix with corn silage," "Very good crop," "Expect to plant beans with every hill of corn next year," were included in the farmers' reports to the experiment station. Soy beans are high in protein content, and therefore the mixed silage is richer than corn silage. The corn yield is not decreased on soil of good fertility, and a yield of a little less than one-half a ton of soy beans per acre is received. These facts should make soy beans a popular crop.

BILLY'S RIDE IN AIRPLANE

Merely an Imaginary Trip, but Six-Year-Old's Fancy Made It Seem Very Real to Him.

Little Bill is much interested in airplanes. He is only six years old. When he hears the hum of a motor overhead he rushes out of the house to watch the plane. Little Bill is also addicted to all the fanciful dreams which are a part of childhood.

Grandpa Bill came home from work the other day and young Bill started to recount the day's doings. "Buddy and me took a ride in a airplane today," he said gravely.

The conversation ensuing was something as follows:

"Is that so? How did it happen?"

"Well, Buddy and me were sitting on the fence and a airplane came along and we climbed in."

"Well, well. And where did you go?"

"Oh, we went all over town, up to Anderson and back."

"How did you get out? I would think it would be hard to land an airplane in the back yard."

"Oh, no! The man just sailed by kinda low and slow and when we got over our back yard he just lifted us out and we hung onto his hands, a minute and then dropped off, and he flew on away."—Indianapolis News

Kangaroo Tendons Best Sutures.

The kangaroo, which propels its body over the ground in a series of long leaps or bounds, has a very powerful tail which is of great assistance to the legs in enabling it to leap. A great muscle or group of muscles, each little bundle of them with its own tendons extending to the extremity of the tail, gives power to this important organ. Dr. Henry O. Marcy of Boston discovered that these tendons were the ideal thing to use in sewing up muscles after a surgical operation, as they are not elastic and they do not soften until their work is done, and then they are absorbed by the tissues.

"The Confession"

This wonderful play thrills, it enralls, makes you happy, makes you downcast, buoys you up and sends you away satisfied to the very core. A story of human desires, the intensity of which you've never before seen portrayed. It's the play you'll never forget. Many interesting scenes which will hold you spellbound from start to finish.
