

## LATAH COUNTY NEWS PARAGRAPHS

### Clipped From The Columns of Neighboring Papers.

**Deary Press:** The Press is informed that in the section southwest of Deary the farmers are advocating a road thru the Garrett place to enable the ranchers living south and west of there to haul their grain to Deary. This is one of the finest agricultural sections contiguous to this point and we are informed that the farmers are willing to donate work on the road if the board will secure the right of way. A vast volume of business that now goes elsewhere would be diverted to Deary if this connecting link could be built, it is said.

**Genesee News:** The streets of Genesee received a much-needed dragging Tuesday and are now in fairly good shape—or, at least, as good shape as they can be put in at this time. There are many streets of the town that have had nothing done to them since Mother Nature made them, and in a great many places the street drainage is down the sidewalk instead of the street. However, since the new council will have these matters in charge after the first meeting in May, it is expected they will get busy with their picks and shovels and remedy all these wrongs in short order.

**Juliaetta Record:** Mr. Baker, of Clarkston, this week purchased the Mrs. M. A. Perryman property on the east side of Main street, which has for some time been used by the Juliaetta Trading Co. as a storage room for farm implements, and will occupy it about the first of the month with a stock of new and second hand goods. The sale of the property was made through S. I. Dunlap.

**Star-Mirror:** Monday of this week important conferences were held in Moscow relating to law enforcement in this region. Attorney P. J. O'Brien who is the law enforcement officer of the Forest Service came over from Missoula, Montana to meet Prosecuting Attorney John Nisbet, Sheriff John L. Woody, Probate Judge Adrian Nelson, U. S. Deputy Marshal Mark Howe and U. S. Commissioner H. R. Smith. The purpose of the meeting was to work up a co-operative understanding between the state and federal officers as to the means to employ to punish offenders against the fish and game laws—both state and federal. The forest officers intend to prevent the setting out of fire in dry weather in or near forest lands and to prevent violation of the game laws if possible.

Too much merchantable and growing timber has been destroyed in the past through the carelessness of campers and settlers resulting in great monetary loss to local communities and the campaign now being waged and to be continued through the summer is to prohibit further injury through these sources. The representative of the forest service pointed out that 35 per cent of the national forest receipts in this region, is divided between the counties which invade the National Forests for school and road purposes, proportionate to the government income from federal lands within each county. Consequently if saleable timber be destroyed, or grass or any other income producing commodity on the government domain, there is a corresponding loss to the local community.

Timber privately owned is to receive similar protection insofar as the forest officers can render assistance. The killing of game animals, fish or birds in the closed season or beyond the limit allowed by law in the open season will receive the special attention of all forest officers. Recently all forest officers have been commissioned deputy game wardens in Idaho.

A. K. Carlson went to Moscow, Thursday, on business.

### Children Can't Buy It

Since the new tobacco law in effect it is not advisable to send a minor to the store after tobacco, even if the tobacco is only one of a long list of articles. Every time a store keeper accommodates you by letting a minor buy tobacco for you he is taking chances on sacrificing a \$500 bond and having his \$50 license revoked. If you want tobacco don't send the children to the stores for it.

### BOVILL WON THE BASEBALL GAME

#### Score 10 to 2 in Favor of the Visiting Team

It is a painful process to chronicle a defeat so decisive as was the one administered to the local team by Bovill last Sunday on the Kendrick diamond. Bovill had a strong team and played a consistent game from start to finish. Carey, the visitor's pitcher held the locals to 4 hits, while Bovill secured 10. The long list of errors on the part of the Kendrick team tells the story of the game. Kendrick made 13 errors and Bovill 5.

Densow pitched the first seven innings for Kendrick but had poor support. He was relieved at the end of the seventh by Glen Fleishman.

Manager Wilcox isn't a bit discouraged over the game Sunday. He has found the weak places on the team and will patch them up for the game with Juliaetta this coming Sunday. The infield will be reorganized and the change will no doubt strengthen the team wonderfully. The game between Kendrick and Juliaetta will be a real battle and local fans feel confident of victory.

### Freight Schedule Changed

Star-Mirror: In what is claimed to be an effort to reduce costs of operation, the Northern Pacific announces changes that will effect Moscow seriously. Freight crews that have been "tying up" in Moscow, coal heavers, engine wipers and watchmen, are to be moved from Moscow to Pullman, which is to be made the semi-division point between Spokane and Lewiston, for freight trains. Service is to be reduced 50 per cent. Instead of daily freight train service between Spokane and Lewiston, it will be tri-weekly.

Four freight train crews are affected by the change, in addition to the coal heavers, some of whom own homes in Moscow and have lived here many years, are to be moved to Pullman. This includes Engineer Bell, who has a host of friends in Moscow and was believed to be a "fixture" here and whose removal will cause genuine regret. It is claimed that the freight train which left Spokane in the morning reached Pullman about 4 or 4:30 and that the immense amount of switching and other work there took so much time that it did not reach Moscow until about 10 o'clock at night. Under the new arrangement the crew of the Genesee train will do the switching for this train at Pullman and save about half a day's "overtime" for the freight crew. The same number of crews will be worked as formerly, but their hours will be greatly reduced.

The train that has been running daily between Moscow and Lapwai will run tri-weekly between Pullman and Lewiston under the new schedule. Superintendent DeForce recently went over the line between Spokane and Grangeville and it is said the orders for many changes came as a result of his trip made in an effort to find places where expenses could be cut down. Other radical changes are said to be contemplated, including the taking off of several passenger trains between Spokane and Tacoma and Seattle and the elimination of trains be-

### Arthur Wells Hails From Danville Says Two National Celebrities Came Out of That Illinois Town—"Me and Uncle Joe"

Arthur Wells, the three-hundred-pound member of the Apollo Duo, hails from Danville, Ill., home of Uncle Joe Cannon, and he smilingly says that Danville has produced two national celebrities—"me and Joe." Both are national institutions. Arthur Wells is as widely known in the Chautauqua world as Uncle Joe is in Washington. For seventeen years he headed the famous Apollo Concert Company, known all over the United States. He comes to Chautauqua this year with Mrs. Wells alone. They present two musical programs so varied in character that it might well trouble a company of five or six people to duplicate them.

### Kendrick to Have Oil Station

#### Continental Oil Company Will Install Big Tanks and Build Warehouse to Store Grease and Oils

The Continental Oil Company has purchased property between First and Second Streets, back of Mrs. Stanton's property, and will establish an oil station here. This is the good news reported this week by G. F. Walker, through whose efforts the securing of the station is largely responsible.

Plans now are to begin work the latter part of this month or the first of next month at the latest, to make the concrete forms to hold the tanks and to construct a large warehouse for the storage of all kinds of oils and greases.

Two tanks will be put in here, each holding two carloads of oil. They will be used for storing gasoline, distillate and Kerosene.

The oil station will be a wholesale concern but will sell oil, gasoline, etc., in barrel lots to anyone who wishes to purchase in barrel quantities. The price will be very much lower than charged now, as the carload quantity shipments will reduce the freight in a large measure. It is said that the price will differ very little from that charged in

between Spokane and Coeur d'Alene.

It is estimated the change means the taking of \$2,000 a month in payroll from Moscow to Pullman, and Moscow merchants will resent this. The matter will be taken up before the Chamber of commerce next Wednesday when action looking to retaliatory measures will be discussed. It is pointed out by business men that if the Northern Pacific discriminates against Moscow the merchants have two other roads to which they can throw their patronage. When it became known that this change has been ordered some of the Moscow business interests became very emphatic in declaring a vigorous protest against the change should it be made.

### Big Bear Ridge

Mr. and Mrs. Otto Alber are the proud parents of a fine daughter, who was born at the Gritman hospital in Moscow April 25th.

Mrs. Will Elliott has gone to St. Maries to remain indefinitely.

Miss Tora Halseth spent the week end at her home in Kendrick.

A church conference will be held at the Lutheran church, May 17th to 19th.

The Christian Endeavor meetings

Lewiston.

The selection of Kendrick as the distributing point for this section is a compliment to the town and will also be a great asset to every business house here and in the surrounding Potlatch country. It means cheaper gas for everyone and will be one more business institution added to the town.

Juliaetta will be supplied from here as will all the smaller Potlatch towns in the immediate vicinity of Kendrick.

Representatives of the Continental Oil Company have been looking over this territory for the past year with a view of putting in the oil station. That they chose Kendrick for the distributing point is a very good indication that they have the utmost confidence in the future of the town and surrounding country. Establishing the station will mean a heavy investment and it is a permanent affair. Everything should be done by the people of this community to encourage the up-building of this splendid new enterprise.

will be discontinued until after the Sunday school picnic, June 14th.

The annual meeting of the Taney Telephone Co. will be held at the Taney school house on Saturday, May 14, at 1 o'clock p. m., for the election of officers and other business. All shareholders are expected to be present.

Allie Moore, Ida Morey, Alice Bean and Dwight Ingle, the eighth grade pupils of Miss Inez Johnson's school at Taney, were successful in passing the eighth grade examinations.

A splendid May Pole program was given by Miss Clara Bailey's school at Bear Creek, Sunday.

Miss Inez Johnson returned to her home near Deary, Saturday.

Farming is being rushed between showers.

A social good time was enjoyed at the close of Taney school, Friday, when a number of the patrons and friends came in about noon. A large table was spread and the children as well as the visitors thoroughly enjoyed the many good things, not forgetting the ice cream, which appealed to all as the best ever.

W. M. Blenden was quite badly injured Monday, when his team became frightened at a tractor, which caused a runaway and a general smash-up.

### Mrs. W. Rich Dead

Mrs. W. Rich, of Southwick, died at White's hospital in Lewiston last Monday, where she had been taking medical treatment for several weeks. Death was due to complications from which she had been suffering for some time. The remains were held at the Vassar undertaking parlors, until word might be received from relatives in the East regarding funeral arrangements.

### DAVE GENTRY HOME DESTROYED BY FIRE

#### Blaze Started in Roof From Defective Flue

Early Sunday morning the home of Mr. and Mrs. Dave Gentry, located on a bench just above Kendrick, burned to the ground. Practically all of the household goods were also consumed. The origin of the fire is not definitely known, although the supposition is that it was caused from a defective flue.

Mr. Gentry was in Bovill at the time of the fire. His brother-in-law Mr. Norris and also Mrs. Norris were visiting at the Gentry home. Mr. Norris started a fire in the morning and then went to the barn to do the chores. When he returned to the house the roof was a mass of flames. A strong breeze was blowing and within a few minutes the building and contents were burned to ashes. The fire made such rapid progress that comparatively nothing in the way of household furnishings or clothing could be saved.

Fortunately for the Gentry family the building and contents were well covered by insurance.

### Senior Class Play

The senior class play, "Billy's Bungalow," will be given at the Grand Theatre on Friday night, May 13. Miss Audrey Stanton and Miss Carlisle will have parts in the play, although they are not members of the senior class. Miss Hood is training the members of the caste. She is very good at this work and the students are making a special effort to put on a play of more than usual interest.

Following is the caste of characters:  
Billy Middleton - Curtis Bailey  
Peggy Middleton - Lena Bibb  
Col. George Varker, Elmer McGuire  
Laura Cauldwell - Joyce Hunt  
Dorothy French - Audrey Stanton  
Kitty Campbell - Minnie Torgerson  
Theodore Thurston,

Cecil Chamberlain  
Gordon Middleton - Cecil Carlisle  
The Honorable Francis Fairweather  
Spaulding - Kester Dammarell.

### The Retail Merchant

He is abused by the public as a profiteer, exploited by slick salesmen, preyed upon by local charities and polite holdups, clubbed into handling more brands of goods than he should by the bludgeon of national advertising, annoyed by canvassers selling inferior goods at robbers prices from house to house, and menaced by catalogue houses and chain stores.

Yet it is the retail merchant who makes our towns and cities.

There are no railroad stations where there are no stores.

It is the retail merchant who makes factories and jobbing houses possible.

He it is who pays the taxes that support the schools and churches.

He makes the local newspapers.

He is the core of the community.

Good comes from most everything. The cold, wet weather we have been having the past month has prevented an epidemic of fishing fever during the closed season. There are only three weeks left and even Sam Callison can probably wait that long.

### THE CITY DADS MET TUESDAY EVENING

#### Newly Elected Trustees Now at the Helm

Last Tuesday evening was a busy session for the Village Board. The unfinished business for the year was disposed of by the retiring board so that the new members might start with a clean slate for their two-year term of office. Four of the old members were present as follows: Trustees Walker, Dunkle, Sturdevant and Hanson. Trustee Waide was absent. After the regular routine work of reading the minutes, allowing bills and hearing the treasurer's report, the election returns were canvassed and found to be approximately correct as reported by the judges of election.

The new members of the board were then sworn in as follows: N. E. Walker, William Rogers, Tom Long and Tom Sturdevant. N. E. Walker, who has served the town so faithfully and well as mayor for the past two terms, was again elected to serve in the same capacity. Hugh Stanton, who was elected a member of the board, handed in his resignation which was accepted. The Board then appointed M. O. Kaby to take his place.

The matter of reducing the salary of the street and water commissioner, after being thoroughly discussed, was laid over to be taken up at the next meeting of the Board.

Harry G. Stanton, former treasurer of the town, was re-appointed and Ralph B. Knepper was also re-appointed as clerk.

The Board then voted that the funds of the village be transferred from the Farmers Bank to the Kendrick State Bank, it being customary to alternate between the local banks every two years. The change will be made as soon as the Kendrick State Bank furnishes the required bond.

The following committees were appointed by the chairman: Street and Alley: Trustees Rogers and Raby; Fire and Building: Trustees Raby and Sturdevant; Water: Trustees Rogers and Sturdevant; Finance: Trustees Sturdevant and Long; Park: Trustees Long and Rogers; Cemetery: Trustees Long and Rogers; Sewer: Trustees Long and Raby.

The Board suggested that the cemetery committee should do considerable improvement work this spring in the cemetery in the way of repairing fences and any other improvements that are needed.

There being nothing further to bring before the Board, on motion the meeting was adjourned to Monday night, May 16, at 8 o'clock.

### Little Disease in Idaho Herds

Idaho ranks very high in health of cattle according to figures recently published by the U. S. Department of Agriculture. In January 189 herds of cattle containing 1,751 head of cattle were tested for tuberculosis with only 27 cows reacting or 1.2 per cent. Considered in comparison with other states, Idaho should feel proud. One large eastern state during the same period 17.5 per cent of the cows tested reacted, which gives some idea of the prevalence of this insidious disease in some sections. In Idaho there are 14 herds accredited by both the state and federal government as being free from tuberculosis, of which the dairy herd at the University is one. Altogether 1,697 herds have been tested once and found free from tuberculosis and upon passing another test will be placed upon the accredited list. Certainly, Idaho is to be congratulated on the low percentage of tuberculosis found in the herds throughout the state according to Professor H. P. Davis, who suggests that Idaho should make every effort to become the first tuberculosis free state as far as cattle are concerned.

### Put Down Eggs For Winter

There is nothing mysterious in the business of egg preserving, and no great labor. Eggs are comparatively cheap this spring, a condition which should encourage thrifty housewives to put down a supply for use next winter when prices will rise again.

Rules for keeping eggs in water glass are given by the United States Department of Agriculture. To be preserved properly eggs should be put in water glass when absolutely fresh. The eggs should be clean, but it is better not to wash them.

Eggs with dirty shells can be used for immediate consumption and the clean eggs be preserved. Cracked eggs, or those with thin or weak shells, should never be used for preservation. The cracked eggs will spoil and ruin the other eggs in the jar also.

Water glass can be bought by the quart from the druggist or poultry-supply men. It is a pale yellow, odorless, sirupy liquid. It should be diluted in the proportion of 1 part of water glass to 9 parts of water which has been boiled and allowed to cool. Earthenware crocks or jars are the best containers, since they have a glazed surface, and are not subject to chemical action from the solution. The crocks or cans should be scalded for perfect cleanliness and allowed to cool before they are used. A 6-gallon container will hold 18 dozen eggs and will require about 22 pints of solution. Too large containers are not desirable, since they increase the liability of breaking some of the eggs.

Half fill the container with the water glass solution, put the eggs in it and add more from day to day as they are obtained, until the container is filled. Be sure the eggs are covered with about 2 inches of water glass solution. Cover the container and place it in a cool place, where it will not have to be moved. Use wax paper under the cover to keep the jar tight. It should be looked at every 2 or 3 months to see that the water has not evaporated so that the eggs are too near the surface. If there seems to be any danger of this, sufficient cool boiled water should be added to keep them covered.

Remove the eggs from the solution as desired for use, and rinse them in clean cold water. Before boiling such eggs prick a tiny hole in the large end of the shell with a needle, to keep them from cracking. As the eggs age the white becomes thinner and is harder to beat. The yolk membrane becomes more delicate, and it is correspondingly difficult to separate the whites from the yolks.

### Fairview Notes

Miss Edith L. Boyd of Walla Walla returned to her home this week after having completed a successful term of school on Potlatch Ridge at Fairview.

Wm. Zeyen returned home from Spokane last week.

Everyone is busy farming between rains.

Quite a number of people were down for the dance in Kendrick, Friday night. Everyone had a good time.

Before the Civil war the old Citizens' bank of New Orleans, having the power to issue paper money, provided quantities of bills, most of dollar denomination, having the French word "Dix" on their backs. This money became popular, according to this theory, Louisiana was referred to as the land of the "Dixies." Eventually the term was broadened to include all of the southern states.

## Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

If you are suspicious that your wife is putting something in your coffee to break you of the tobacco habit, the only thing left for you to do is to quit drinking coffee.

Since the prevailing fashions in dress have so nearly usurped last year's bathing suit styles, one hardly dares venture a thought as to how this season's bathing suits will be built.

It has been wisely said that a person who is entirely wrapped up in himself is a pretty small package.

Do figures lie? 2 boys had 30 apples each. One sold his 30 for 2 for 1c which equals 15c; the other boy sold his 30 for 3 for 1c which equals 10c, or 25c for both sales. Next day they put their apples together—60 apples and sold them 5 for 2c, which is 24c. What happened to the 1c?

There ought to be money in raising seed corn on Potlatch bench farms. The local market quotation on first quality field corn seed is 10 cents a pound. Nearly every year there is a big demand for good seed corn. This year the demand exceeds the supply. It is an easy matter to get a variety of field corn that is adapted to the climate of the Potlatch country, and by selecting the best ears for seed there would be no trouble to dispose of it at good prices.

In spite of the slump in beans there will be quite a large acreage planted this year. The price last year was extremely low, but that does not necessarily mean that the same condition will exist next year. Wheat prices have been cut in two since last fall with no assurance of a better price for this year's crop. The chances are just as good for beans as they are for wheat.

Something over a year ago the general trend of public sentiment was "get ready for hard times, the big smash is coming." Newspapers all over the country harped upon this one idea and they were backed by financial interests everywhere. The big smash came. Now the tendency is toward the slogan "good times just ahead" and everything indicates that a continuation of this optimism will create the good times.

Not many months ago we all received advice to save every dollar possible because money was cheap and would buy more later on. Now we are asked to save because a dollar is worth so much more than it was a short time ago. It's nice to save, but after all a dollar won't buy anything unless you spend it.

There is an increasing demand for certified alfalfa and clover seed in this country. The demand exceeds the supply, so thousands of bushels are shipped to America from France and Italy. The price is good and represents a good margin of profit for growers who are prepared for raising seed and have land such as we have in the Potlatch. Bench farmers in particular, ought to make a good profit raising certified alfalfa seed. The alfalfa has to be planted in rows, cultivated and kept free from weeds, but the pure seed brings a good price. The Potlatch country is wonderfully well adapted to the growing of seeds of all kinds, so there is no apparent reason why certified alfalfa and clover seed would not pay a good profit.

With the addition of \$100,000 state aid and federal aid to the amount of \$100,000, Nez Perce county will have a lump sum of \$600,000 to spend on roads and bridges, aside from the money secured from the regular channels. This amount will be distributed all over the county and particularly in the Clearwater country where a number of bridges are badly needed.

How we Americans do love each other. You get into ordinary conversation. All of us are convinced we are being robbed by somebody else. Our next door neighbor is a good fellow personally. But as a business man we know he is a pirate. The salaried man is suspicious of his employer. He knows his grocer is a conspirator. As for the store downtown where his wife trades, he calls it the daylight robbery. So, too, the dealer in notions looks darkly on the clothier. Both the clothier and the notion man blame the jobber and the farmer. The farmer is convinced he is the victim of the boards of trade. The Wall street broker is certain the country is being held up in the price of eggs and meat. With all this brotherly love so widespread, isn't it a good deal of a miracle that the country is able to rock along and not fly to pieces?—Kansas City Star.

### Methodist Church

Howard W. Mort, Pastor

The Rev. Charles MacCaughy, who was announced to preach at American ridge Sunday morning and at Kendrick Sunday evening, has been compelled to cancel these two dates for the present because of ill health. Rev. MacCaughy caught a bad cold during the bad weather a few weeks ago and instead of getting better it has grown worse so he is forced to take care of himself until his condition improves.

Sunday school at 10 a. m.  
No morning worship.  
Epworth League at 6:45 p. m.  
Evening song service and worship at 7:30 p. m. Mr. F. B. Webb of Lewiston will probably deliver the evening sermon at the church. Mr. Webb is a well known layman of the Methodist church in Lewiston and does a great deal of speaking in the churches in this territory. You will enjoy hearing him.  
No mid-week service next week. They will probably be discontinued thru the coming summer months.

### Southwick News

Mrs. J. F. Smith is nursing, on Fox ridge.

Miss Elvira Henderson taught the primary grades Friday, for Miss Brackett.

Mrs. Thelma Winters is now in Clarkston.

The usual hanging of May baskets was cheerfully observed in Southwick.

The school of District No. 11, Southwick, closed yesterday, May 5th and the pupils celebrated the event with a picnic.

G. V. Carlisle of Kamiah visited at Hayward's the last week end.

The ladies of the M. E. church met with Mrs. T. J. Southwick, Thursday, April 28, at an all day session, with an excellent dinner at noon and business meeting at 2:30.

Mr. and Mrs. Chas. Grossline and children visited at the Dean Baker home, Sunday.

The following were entertained at the Gudahy home, Sunday: L. J. Southwick and wife, D. H. Hayward and wife, Dr. Baker and wife, Will Wright and family.

The Garlinghouse family of Clarkston, spent the week end with relatives in Southwick.

Walter Harris has moved out on the Ralph Wright place.

Miss Zelma Wright is staying with her grandparents, Mr. and Mrs. R. M. Wright while finishing this term of school.

Carl Smith of Juliaetta, made a short visit with relatives in Southwick, Sunday.

Miss Bertha Jones entertained a number of young people at her home Wednesday evening, April 27th. An enjoyable evening was passed in spite of the rain.

There was a party given at the Mustoe home Saturday evening.

Miss Zelma Wirth of Asotin, Wash., spent Monday and Tuesday with her sister, Miss Harriet Wirth, teacher of District No. 11.

### ENRICH SOIL BY TRENCHING

English Gardeners Take Great Pains in Preparing Land—Heavy Yields Are Secured.

The home gardeners of England take great pains in preparing their soil, even going to the extent of throwing the surface soil to one side and then spading manure into the subsoil to a depth of 14 to 16 inches. After the subsoil is so treated the surface soil is replaced and great quantities of rotted manure mixed with it. This process is known as "trenching." It results in heavy yields of vegetables and enables the crops to withstand a drought period much better than where the soil is not broken so deeply. Details of the preparation of garden soils are discussed in bulletins of the United States Department of Agriculture, which are free on request.

### A. H. OVERSMITH

Attorney-at-Law

Urquhart Building Third Street  
Moscow, Idaho.

They Speak Well of It

"I frequently hear Chamberlain's Cough Remedy praised by friends and acquaintances which only tends to strengthen my good opinion of it" writes Mrs. Fred Arter, Zanesville, Ohio. Try it when you have a cough or cold and see for yourself what an excellent medicine it is.

FOR SALE: 252 Cords of 16 inch wood about 55 cords of cord wood. Can deliver any place on the Potlatch ridge by truck or will sell on ground. Prices reasonable. Good road to wood, one mile southeast of Southwick. Write your order to L. M. Benjamin or Phone to Wm. F. McClelland, Southwick. 17-3t Kendrick, Idaho, Moscow, Idaho

## More Price Reductions by Harvester Company

### Entire Line of Implements Now at LOWER PRICES

In view of the recent reduction in the price of steel, we now announce lower prices for our entire line of farm machines and implements not covered by reductions previously announced.

### All lower prices take effect at once

The reduction in the price of steel comes after all the material for the machines and implements we will sell this year has been provided, and will therefore have no bearing on the manufacturing costs of such machines. However, it does enable the Company to buy materials at lower prices for future manufacture, and in accordance with our announced policy we now quote those prices, the Company taking the loss on machines already finished and materials on hand.

Full information regarding our lower prices on binders, mowers, and all other harvesting, haying and corn machines, tillage implements, tractors, engines, and all other I-H-C farm machines can be obtained from any International Dealer.

## Schools Are Making Filipinos An English Speaking Race

This is the type of schoolroom that is rapidly making an English speaking nation out of the 10,500,000 inhabitants of the Philippines.

If a teacher in a public school in the Philippines desires to punish a child, she doesn't have to apply the ruler. She simply sentences the offending pupil to remain away from school a few days!

This is the most severe punishment she can inflict, for Filipino children take an almost abnormal pleasure in going to school and acquiring an education. The all-Filipino legislature, in response to the popular demand for "schools, and still more schools," is constantly increasing its appropriations for education, but the schools can scarcely be constructed fast enough to care for the ever-increasing enrollment. The school enrollment is now 892,000 without any compulsory attendance laws. When Dewey sailed into Manila Bay there were 2,100 private schools in the islands. Today there are 6,500 schools and colleges, with 17,000 Filipino teachers and about 1,000 other teachers, 341 of whom are Americans.

The University of the Philippines is the center of learning of the entire Orient, and is the pride of the Filipino people. It has an enrollment of 3,500 students. Santo Tomas university of Manila, older than Harvard, is another famous seat of learning.

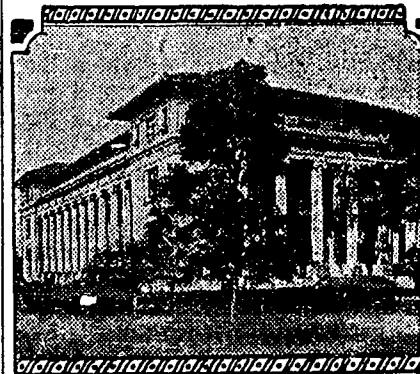

The school system includes normal schools, agricultural colleges, twenty-seven farm schools, a nautical school and a school for the deaf and blind.

The Filipino pupil, in addition to learning English and in addition to his regular studies, learns basket making, embroidery and hat weaving, the trades peculiar to the islands, as well as the domestic sciences and pedagogy. There are more positions than can be filled by the trade school and commercial college graduates. The trade and agricultural schools produced \$1,176,850 worth of goods in 1919.

There is nothing that the Filipino people take more pride in and that

they are more grateful to the United States for, than their school system, which has been declared by many competent critics to be one of the finest in the world. While the system was implanted in the islands by Americans, every cent of the cost has been cheerfully borne by the Filipino people. The schools are making an English speaking race of the Filipino nation. English is the official language, and is declared will continue to be when independence is granted.

"The Filipino boys and girls are well balanced, docile and industrious

University of the Philippines which has an Enrollment of 3,500 Students.

pupils," says Junius B. Wood, who was sent to the islands by the Chicago Daily News to investigate conditions there. "To attend school is a privilege to a Filipino child or young man, not an unwelcome duty. In the cities those who work days go to school at night.

"Today there is hardly a barrio where youngsters cannot be found who speak English. One-third of the house of representatives and eighteen of the twenty-four senators speak English. In the next election, in 1922, the young men of the new schools will be stepping into control, and the first great goal of the public school system will have been reached."

### ASKS INDEPENDENCE WITH OR WITHOUT PROTECTION

Manila, P. I. — The people of the Philippines want independence in whatever form they can get it. Manuel Quezon, president of the Philippine senate, declared in an address before that body.

"Let the Americans in the Philippines and those in the United States know that the people of the Philippines covet their freedom, liberty and political emancipation so much that they will not hesitate to receive from the Congress of the United States complete and absolute independence without protection," Quezon said.

"If the United States, dictated by its own interests, decides to extend protection to the Philippines, well and good. We would accept that as a solution of our problems. If not, let us have absolute independence in whatever form we can get it."

President Quezon declared that if the question were put before the Filipinos for a vote, 98 per cent would favor absolute independence.

Manuel L. Quezon, President Philippine Senate

### FEEDING BARLEY TO HORSES

Results Obtained in Experiments With Eight Percheron Mares on Government Farm.

A test to compare the relative value of light and heavy weight barley as feeds for farmwork horses was made last year by the United States Department of Agriculture, at the experimental farm, Beltsville, Md.

Eight Percheron mares were used in the test, two receiving lightweight barley, two heavyweight barley, and four receiving oats as a check. The test was continued 22 weeks. The mares were used in all the routine work of the farm, which included the heavy field work of plowing, etc., during the spring months. The barley used was the commercial grade of heavy barley (rolled) and light barley (rolled), the heavy barley weighing 47.8 and the light 40.7 pounds to the bushel, according to the tested

### A TEST OF FAITH

(Chattanooga News.)

We have frequent occasion to protest against the efforts of Japan to impose her dominion upon unwilling peoples, yet we have thus far failed to exemplify the ideals which we recommend to Japan. If we should withdraw our sovereignty from the Philippines, in accordance with our repeated promises, we could the more consistently ask Japan to follow a similar course toward Shantung, Manchuria and Siberia. Our plea would have a great deal more force if we could make it with clean hands. To say that the Philippines are not ready for independence is merely to express an arbitrary, gratuitous opinion. It is perfectly easy to create conditions—in one's own mind—that no people ever could comply with. Our delay about respecting our own pledge is a reflection on our national good faith and a constant invitation to international complications in the far east.

### INDEPENDENCE OF PHILIPPINES

(Atascadero (Cal.) News.)

The Philippines should be given absolute independence, which is their natural right, even if we are well aware that they have not yet reached the full stature of Americanism. We ourselves have not reached it so long as we insist upon governing other peoples against their will.

### "French Leave"

This expression arose in the early part of the eighteenth century, through certain guests, in the salons of France, not aware of the higher acts of courtesy, leaving without saying good-by to the host or hostess. The practice spread to society in this country. Therefore, if a man left without saying good-by to his host, it was said he took "French leave."

## The Big Idea

Not style, not fabric, not color, or pattern, or tailoring, or fit or cost. The combination of all of them, with none slighted, is The Big Idea; many-sided exactness such as no one tailor can possibly assure, but which our organization and our method make certain.

## INCREASE YIELD OF GARDEN SOIL

Only Well-Rotted Manure Should Be Applied as Top Dressing in the Spring.

### ADD SOME NITRATE OF SODA

Several of Salad Crops Require Plenty of Nitrogen for Leaf Growth—Application of Lime Has Decided Advantage.

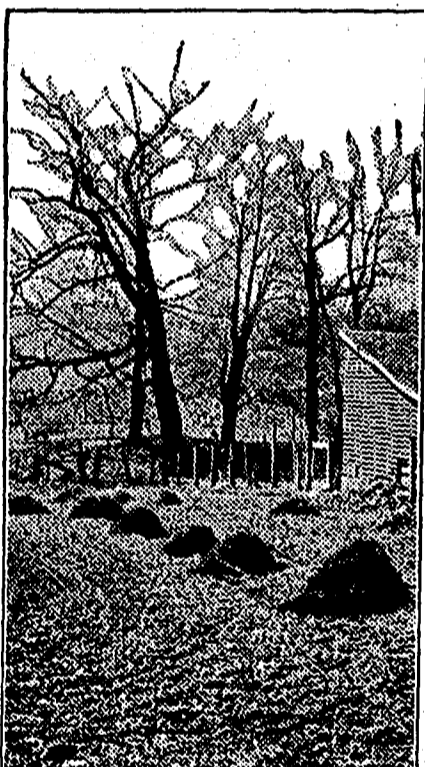

(Prepared by the United States Department of Agriculture.)

Nothing equals plenty of stable or yard manure to make a garden plot produce the best crops. Garden specialists of the United States Department of Agriculture mean by this not merely a meager scattering over the surface, but an application about two inches thick. It should be applied in the fall to form a protecting cover during the winter. If this is done, the manure should be turned under as early in the spring as possible, but any material too rough to turn under should be piled in a compost heap to rot. Only well-rotted manure should be applied in the spring as a top dressing. After the land has been plowed, scatter the rotted manure over the surface and work it in with the harrow. If the garden is spaded the manure should be worked in with a spading fork or rake.

Elements Sometimes Deficient. Large quantities of manure should be used. On a tenth-acre garden, that is, one measuring about 43 1/2 feet by 100 feet, apply from one to two tons—two loads—in the fall. If a truck is used for hauling one load generally will be sufficient. If a corresponding amount is piled up in the autumn with a little sod or soil mixed with it, and worked over once or twice during the winter, it will give a good supply of compost for use as a spring top dressing.

Where this amount of manure is used very little chemical fertilizer is needed. However, manure very often does not have a sufficient quantity of nitrogen, phosphoric acid and potash in it, and it may be desirable to add commercial fertilizers containing 2 or 3 per cent nitrogen, 8 or 10 per cent phosphoric acid and 3 to 6 per cent potash, at the rate of 100 pounds on a tenth-acre garden. This also can be spread broadcast and worked into the soil when the land is being pulverized ready for planting.

Several crops require special fertilizers. For instance, lettuce, cabbage, spinach, kale, and in fact all of the salad crops, and those which are grown

Heavily Manured Garden Means Increased Production.

for greens, need plenty of nitrogen to make leaf growth. These crops might well be stimulated during their growing period by a little nitrate of soda, not exceeding ten pounds on a tenth of an acre at any one application. The applications should be at least three weeks apart. It should not be applied within six inches of the plants or in too large quantities, or burning will follow and injure the plants. Fruits and crops like beans, peas and corn, that are grown for their seeds, need plenty of phosphoric acid. Root crops, as potatoes, carrots and beets, require plenty of potash.

Many gardens are improved by applications of lime. However, it may injure Irish potatoes, for lime promotes scab, a disease to which they are susceptible. Except on land to be planted in potatoes, lime applied once every three years at the rate of 200 to 300 pounds on a tenth-acre garden will be a decided advantage. It helps to sweeten the soil, thus making it more suitable to crop production, and it makes heavy clay soils lighter and easy to cultivate.

"Green-Manure" Crops. Another way to improve garden soil is the use of "green-manure" crops, such as clovers, rye, alfalfa, barley, and, in fact, almost anything which will grow upon the land during the fall and winter. The clovers, and the other closely related plants known as legumes, which have the power of gathering the free nitrogen from the air and storing it up in the soil are the most desirable. Green-manure crops should be turned under in early spring.

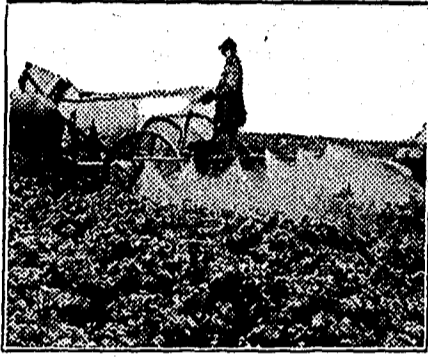

## PLAN TO ERADICATE DISEASE OF POTATO

Intensive Warfare Being Made to Stamp Out Wart.

Illment Usually Destroys Entire Crop When Tubers Susceptible to It Are Planted in Badly Infested Ground.

(Prepared by the United States Department of Agriculture.)

Although their efforts to eradicate the potato wart from the 100 acres or less in which it has found lodgment in the United States are as yet inconclusive, pathological experts of the United States Department of Agriculture are continuing an intensive scientific warfare to stamp out the disease. The infection, which has been found in only 17 mining villages in Pennsylvania, West Virginia and Maryland, is one of the most stubborn with which the department has ever had to cope. Potato wart was introduced by importations of foreign potatoes prior to the establishment in 1912 of the federal quarantine prohibiting the importation

A Potato Sprayer That Covers Four Rows.

of potatoes from countries where the disease was known to occur. The disease usually completely destroys the crop when potatoes susceptible to it are planted in badly infested soil.

Soil sterilization tests by means of steam and chemicals were carried out in infested gardens in Pennsylvania and West Virginia in 1919 and 1920. The methods tested were: Live steam under an inverted iron pan; a solution of formaldehyde applied to the soil, both alone and in combination with steam and the use of chemical solutions, including bordeaux mixture, mercuric chloride, and sulphuric acid. The worth of each method was tested by planting a susceptible variety of potatoes on the treated plots. None of the chemical treatments resulted in complete eradication of the disease, and steam sterilization, while it appeared to be successful in the small trial plots, involved such great expense and difficulty as to leave the practicability of eradication still in doubt.

Additional experiments will have to be carried on before specific recommendations can be made. Specialists hope, however, that some method of treating the soil by heat or chemicals can be devised which will make it possible completely to eradicate potato wart from this country. The work will be actively carried forward until it is determined whether a satisfactory method can be found.

### RAISE EGG STANDARDS

If all farmers and poultrymen would adhere strictly to the following rules in handling their poultry and eggs the quality of the eggs marketed would be much improved. Poultry specialists in the United States Department of Agriculture provide the rules:

1. Keep the nests clean; provide one nest for every four hens.
2. Gather the eggs twice daily.
3. Keep the eggs in a cool, dry room or cellar.
4. Market the eggs at least twice a week.
5. Sell, kill or confine all male birds as soon as the hatching season is over.

### GRAIN ALLOWANCE FOR HENS

If Scattered in Litter Fowls Are Compelled to Take Necessary Exercise to Find It.

The backyard flock should have in addition to the table scraps a light feed of grain every morning. Four or five handfuls of grain—about one-half pint—scattered in the litter will be sufficient for a flock of 20 to 25 hens. By handful is meant as much as can be grasped in the hand. By scattering it in the litter the hens will be compelled to scratch in order to find the grain and in this way to take exercise, which is decidedly beneficial to them.

In case not enough good, sound, substantial table scraps are available to furnish full feeds, both at noon and at night, another feed of the grain mixture should be thrown into the litter at the night feeding and should consist of as much as the hens will eat up clean, poultry specialists in the United States Department of Agriculture say. In summer or during suitable weather the grain can be fed by scattering it on the ground outside the house. A good grain mixture for this purpose is composed of equal parts by weight of wheat, cracked corn, and oats. Another suitable grain mixture is composed of two parts by weight of cracked corn and one part of oats.

### GOOD INCUBATION HINTS

Follow the manufacturer's directions in setting up and operating an incubator.

See that the incubator runs steadily at the desired temperature before filling it with eggs. Do not add fresh eggs to a tray containing those which are undergoing incubation.

Turn the eggs twice daily after the second and until the nineteenth day. Turn them before caring for the lamps. Cool them once daily, according to the weather, during this period. Attend to the machine carefully at regular hours.

Keep the lamp and wick clean. Test the eggs on the seventh and fourteenth days. Do not open the machine after the eighteenth day until the chickens are hatched.

### APPLYING WATER TO GARDEN

Of Much Importance That Work Should Be Done Without Injury to Any of Various Plants.

In applying water to garden crops it is important that the work should be done thoroughly without injury to the plants. An occasional thorough watering, with at least one good cultivation after each watering, will give better results than more frequent sprinkling of the surface. Home gardeners have in many instances fitted up simple systems for irrigating their gardens that have proved a great help in carrying the crops over dry periods.

For information on watering and caring for home gardens, write to the United States Department of Agriculture for bulletins on the subject. They are free.

### IMPORTANCE OF FARM DIARY

Among Other Things It Will Prevent Paying Same Bill Twice if Record Is Made.

A farm diary may save paying the same bill twice, since it may be used as a record of all credit business done by the farm. Specialists of the United States Department of Agriculture suggest that blank pages in the back of the diary be used for such accounts.

### Summons

In the District Court, Second Judicial of the State Idaho, in and for the County of Latah.  
Edgar L. Latta, Plaintiff.

vs.

Lillian Mae Latta, Defendant.  
The State of Idaho Sends Greeting To Lillian Mae Latta, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To procure a decree of divorce from the said defendant on the grounds of cruel and inhuman treatment.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 19th day of April, A. D. 1921. (Seal) Homer E. Estes, Clerk.

**Cameron News**

Quite a number of the young people gathered at the Herman Ehlers home, Sunday evening. The evening was spent in dancing.

The many friends of Mrs. George Ehlers will be glad to hear that she is improving slowly.

Mrs. August O. Wegner and little son were Lewiston visitors last week.

Mr. Fred Silflow, Sr., and son, Walter, Mr. Fred Mielke and son, Herbert, were visitors in Lewiston.

Mr. and Mrs. Tom Daugherty of Agatha, were callers at the Herman Blum home Sunday. Mrs. Daugherty, formerly Miss Blanche Rapp, taught school here several years ago.

The Cameron school closed last Tuesday.

Miss Carrie Buckles and the school children gave a picnic the last day of school. Those present besides the teacher and school children were: Mrs. John Schwartz, Mrs. Fred Newman, the Misses Emma Hartung, Hannah Hartung, Martha Finke and Helen Mielke. Everybody reported a good time and also plenty to eat.

Mr. and Mrs. Russel Rodgers and children were visitors at the Brun-siek home Wednesday of last week.

Gustav and Bill Wegner of Bear Ridge are visiting relatives around Cameron.

There will be confirmation at the Lutheran church, May 8th. Those getting confirmed are Wilbert Brun-siek, Walter Silflow, Herbert Mielke and Walter Hartung.

Mr. and Mrs. Carl L. Wegner motored to Lewiston, Saturday and returned Sunday.

Mr. and Mrs. Jake Berriman are the proud parents of a baby girl, born May 2nd.

A number of the little folks helped Edwin Mielke celebrate his birthday, Sunday. They all had a good time.

**Leland Items**

Mrs. Johnson, who is critically ill, we are very sorry to have to report, was taken to Moscow to the hospital, Wednesday.

Mrs. Thomas Daugherty, who has been in the hospital for the last four weeks, was brought to Kendrick, Sunday, but was unable to come home. We hope to see her home

soon.

Messrs. R. M. Smith, R. B. Parks and E. Harrison were looking after school affairs in Lewiston Monday. The bids for our new school building were opened Monday. Mr. Penland of Juliaetta got the contract.

James Winegardner spent a few days last week with his parents. James has secured the position of superintendent of the public schools at Genesee for the coming year.

Born to Mr. and Mrs. Garoutte, Sunday, May 1, an eleven pound boy.

Little Ernest Keupp had the misfortune of getting his arm broken one day last week, by falling out of the ice house.

Mr. and Mrs. Heffle visited at the parsonage, Wednesday.

Mother's Day will be observed Sunday with a program appropriate for the occasion. Come to church Sunday morning and bring your mother. If you can't bring your mother, bring some other good mother.

Sunday will also be Cradle Roll day. Mrs. Jesse Hoffman, the Cradle Roll Superintendent, is preparing the children for a short program. She has between 30 and 35 new names to add to the cradle roll. Every mother whose baby goes on this roll or who has one on the roll is especially invited to be at church Sunday morning with her little ones. Program will begin at 10:30.

**Teakean and Cavendish**

Earl Harlachar has purchased the J. P. Johnson place and will soon move on it.

Phil and Adolph Halverson were up from Lewiston to spend Sunday with friends.

Misses Theresa and Josephine Baken, Mrs. J. C. Petersen and family, Phil and Adolph Halverson and Cecile Garrison were visitors at the E. Kelly home Sunday.

A birthday party was held at the Joe Kruchtl home, Sunday, in honor of his son, John. Those present were: Myrtle, Mildred and Harold Kelley, Holly and Fred Kight, Marguerite, Carrie, Ed and Jim Petersen and Raymond Frazier. All had a very enjoyable time.

Ray Garrison made a business trip to Orofino, Friday.

Miss Mary Rugg and Ella, Dolly and Nellie Herring will leave for Canada this coming Tuesday.

**SUREST WAY TO  
HATCH TURKEYS**

Hen Is Faithful if She Is Given Proper Management and Kept Free From Vermin.

**CLEANLINESS IS ESSENTIAL**

Nests Hollowed Out on Ground, Covered With Straw and Carefully Protected Are Ideal—Exercise Is Imperative.

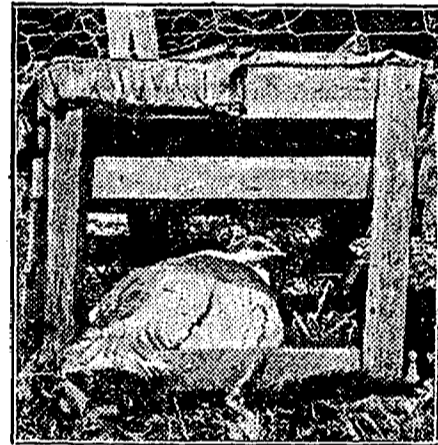

(Prepared by the United States Department of Agriculture.)

Chicken hens and incubators can be and often are used successfully for hatching turkey eggs, but the surest means, United States Department of Agriculture poultry specialists say, is to use the turkey hen and give her proper management. Turkey hens are close sitters and will cover, so there will be no danger of chilling, from 15 to 18 eggs, depending on the size of the hen.

Nests for setting turkey and chicken hens are best made on the ground by hollowing out a little earth, so that the center is deep enough to keep the eggs from rolling out of the nest. A thin covering of clean straw or hay can then be used to prevent the eggs from being directly on the ground, and a large, roomy coop should be placed over the nest to keep the hen from being disturbed. When a number of hens are to be set, a long row of nests can easily be made on the ground, separating them with board partitions. If this is done care must be taken to see that when the hens come off the nests each returns to the right one instead of crowding into a nest with another hen and leaving some of the eggs to become chilled. With only a few hens it is better to set them some distance apart, as they will then require less attention.

When a Hen's in Earnest.

When a hen becomes broody and shows that she is earnest by remaining on her nest for two or three nights, she may safely be trusted with the eggs, provided she is allowed to sit in that nest. If she is to be set in another nest, as is usually the case, then she should be removed to the new nest, preferably after dark, given a few nest eggs, and shut in to prevent her from returning to the old one. If she sits quietly on the nest eggs she should be taken off on the evening of the following day, and the eggs to be incubated placed in the nest. On being freed, she probably will return to her old nest; if so, she should be carried back and set quiet

Large Roomy Coop Should Be Used Over Turkey Hen While She Is Sitting.

ly on the eggs. She should be handled in this manner until on being let off, she returns to the new nest rather than to the old one. It sometimes takes only two or three days, and seldom more than a week, to break a hen from returning to her old nest. Turkey hens do not ordinarily come off for feed and water more than once every two or three days, but when confined they should have a chance to come off every day. Occasionally a turkey hen does not come off at all, and in such case she should be taken off once a day, as otherwise she will die on the nest.

On coming off her nest the first thing a turkey hen does is to stretch her wings, step gingerly for a few steps, and then she often takes a running start and flies for a short distance. Exercise of this sort helps greatly to keep a sitting hen in good condition, and for this reason it is not well to confine her to a small space. A dust bath is greatly enjoyed by sitting hens, and helps to keep them free from vermin. Whole corn is a good feed, and fresh water and grit should always be accessible.

Lice are a great annoyance to sitting hens, and are one of the worst enemies of young poults. To prevent their getting a start, the hen should be dusted thoroughly, with sodium fluoride or some good lice powder before she is placed on the nest. The nesting material should be kept clean, and if the eggs become dirty they should be washed with a soft cloth dipped in lukewarm water. Just before the poults are to hatch, the old nesting material should be replaced with clean straw.

Incubation Period.

The incubation period of turkey eggs is 28 days. The first egg is usually piped during the first part of the twenty-seventh day, the first poult hatched by the middle of that day, and the hatch completed at the end of 28 days, although in extreme cases all the poults are not hatched before the end of 30 days. Turkey eggs are tested for fertility and for dead germs, as a rule, on the tenth and twentieth days.

Mrs. Taylor Z. Marshall has convincingly demonstrated that woman is not out of her sphere on the lecture platform. For many years Mrs. Marshall has been before the public constantly and in the Chautauqua vote of

popularity has always won a place near the top. Her message, "Lovers of the Moving Picture," is a helpful inspirational lecture that leaves an

impression for good in every community in which she appears. DeKalb, Illinois, Independent says, "The audience listened spellbound to the finest oratory ever heard here from the lips of a woman."

**WOULD NEVER DO.**

Why can't you wear that hat now?  
It is trimmed with cherries, Hubby?  
Well?  
And cherries are out of season.

**IN STYLE.**

"Some of the most fashionable people are wearing their last year's clothes," said Mrs. Cumrox.

"Yes," replied her husband. "I told my tailor to be careful to put a patch in my new trousers where it would show."

**LOST SCENARIO TALENT.**

"Do you prefer Thackeray to Dickens?"

"I don't think either of them had half a chance, owing to the fact that the moving picture had not been invented in their time."

## News Items of Local Interest

Seven stores in Kendrick are handling tobacco. Under the new law passed by the legislature these stores will pay license fees totaling \$350 a year. Unless a larger margin of profit is added to the price of tobacco there will be little money for the local firms handling it.

Mrs. F. B. Smith and two children went to Reardon, Wash., Tuesday, to visit relatives.

Mrs. William Freytag went to Lewiston, Wednesday, where she and Mr. Freytag expect to spend the summer. They have a tract of land in the Lewiston Orchards district and will make that their home for the summer. They may return here in the fall.

Will Stump of Southwick went to Lewiston the first of the week to transact business.

Quite a large delegation of Woodmen went to Lewiston, to attend a convention of lodge members. Some went from here by auto and others by train. They report a very successful convention and a large attendance.

County Commissioner Leroy Southwick went to Lewiston, Tuesday, on business.

John Waide came over from Deary to spend the week end with his family.

Mr. and Mrs. William Rogers drove to Lewiston, Monday, to spend the day.

Mrs. M. W. Hoar of Troy spent the week end at the home of Mr. and Mrs. C. G. Compton.

There were 329 building permits issued in Spokane last month. This is the largest monthly average since 1910.

Manager Wilcox has a right to feel provoked over the small collection received at the ball game last Sunday afternoon. The attendance was very large and at 10c each a conservative estimate would be a total collection of fifty or sixty dollars. Only twenty-eight dollars was realized. The team must have better support than that. We would suggest to the manager that those who take up the collections at the games ought to be supplied with horns. Whenever anyone refused to drop a coin in the hat the collector should blow a blast on the horn so that the crowd might know those who refuse to pay their way. If this method had been followed last Sunday the collecting would have sounded like a jazz band.

A big Methodist camp meeting will be held at Asotin in the park, July 1 to 10.

Sears, Roebuck & Company's sales showed a decrease of 27 percent for the month of March this year as compared to same month last year. Montgomery-Ward for the same period showed a decrease of 38 percent. This is authoritative as the information is given by the Commercial Digest.

A. E. Clark, of Lewiston, president of the Vollmer Clearwater Company, was in Kendrick on business, Tuesday.

Prof. and Mrs. Morrison were in Orofino over the week end visiting relatives.

R. D. Newton and Ed Long left for Walla Walla, Wash., Tuesday morning. They took the soda fountain and fixtures which Mr. Newton sold to a Walla Walla firm. The trip was made with Ed's big truck.

Mrs. Metcalf and daughter, Mrs. Bateman of Lewiston visited a short time in Kendrick, Tuesday. Mrs. Metcalf lived on the place now owned by A. E. Jones, a number of years ago. Her daughter will be remembered here as Miss Ida Burns.

Josephine Brewer was granted a divorce from Sylvester Brewer in the district court by Judge Steele, last Friday, on the grounds of desertion. The couple were married at Colfax, January 7, 1918.

The guarantors of the Kendrick chautauqua will meet at the city hall Saturday night, May 7, at 7 o'clock. Plans for the coming chautauqua will be laid and a chautauqua organization formed. There are approximately 50 guarantors on the contract this year.

The members of the manual training class of the Kendrick school are making stage scenery for the senior class play to be given at the Grand Theatre, May 13. The scenery will be the property of the school and may be used for other plays put on by the school next year.

Maud Eichner and Jay McKinnon came up from Lewiston Sunday morning to spend the day on American ridge at the home of Miss Eichner's parents, Mr. and Mrs. Claus Eichner.

The baseball benefit dance and basket social held at the Fraternal Temple last Friday evening, was well attended but the young ladies failed to bring as many baskets as expected, consequently the receipts for the evening netted but \$40. Most of the young men had to get along without a lunch basket, but everyone had a good time.

Rev. Robert M. Hood went to Spokane, Wednesday, on business.

Rev. Howard W. Mort was a Moscow visitor Tuesday.

George P. Barnum has secured a very desirable position as superintendent of camp maintenance and construction in the air service and is now stationed at Chanute Field, Rantoul, Ill., which is only thirty miles from Leroy, where his mother lives. The position carries with it a very substantial salary.

Japan, proper, with nearly 56,000,000 people, is smaller than California with less than 3 1/2 million. This would not be so bad if the mass of Japanese people were not mainly agricultural in a mountainous country. It is small wonder that they learn to live on what an American would regard as starvation rations and that when they come to this country maintain such a low standard of living that our workers cannot and will not compete with them.

G. F. Walker was in Moscow yesterday afternoon looking after business matters.

Wesley Thomas came up from Clarkston, Thursday afternoon, to visit his brother, Martin.

The members of the Okoke Klootchman Club were entertained at the home of Mrs. Leo Raaberg, Wednesday evening.

Three Salvation Army people held a special meeting at the Grand Theatre, Wednesday night. The meeting was held in the interest of relief work. There was a fair attendance.

Stuart Compton will leave today for Lewiston where he will make arrangements to take over the management of a grocery and hardware store at Peck. The position has been pending for some time and arrangements were delayed somewhat by a fire in one of the stores concerned, at Peck the first of the week.

Mrs. Albert Nicholson and daughter, Virginia, from Spokane are spending the week with the Ahl and Halseh families.

Mrs. Newton and Mrs. Knepper entertained the Presbyterian ladies and at a silver tea at the Knepper home, Wednesday afternoon. An interesting feature of the afternoon was a report of the Presbyterian missionary meeting at Lapwai, given by Mrs. Robert M. Hood. The meeting was held last week and Mrs. Hood and her mother-in-law, Mrs. Mary Hood attended.

According to the Peck News the loss to depositors in the Peck bank will be approximately sixty percent unless a new bank can be organized to take over the business of the old institution.

The Sunshine Club will meet at the home of Mrs. Theo Hanson, Tuesday, May 10. Everyone is cordially invited to attend the meeting.

The streets were dragged last Saturday by the Kendrick Highway District tractor and grader. These implements do exceptionally fine work with no loss of time. The town pays the highway district \$25 a day for the use of the machines and two men.

The high school students plan to have a picnic Friday if the weather is fair. If not, a party will be held in the high school building in the evening.

W. D. Pemberton has been visiting here and in Lewiston during the past week. Mr. Pemberton is well known here as he lived in Kendrick for a number of years. He came here from California last week on account of the serious illness of his daughter, Laura. Mr. Pemberton is in the quartermaster's department of the National Soldiers' Home in California. He was transferred there recently from Virginia where he had a like position in the Soldiers' Home, which is near Fort Monroe. He is a Civil War veteran, having been in the Service four years. After visiting here for a time he expects to return to California as his leave of absence is limited.

Mr. and Mrs. L. A. Grinolds have left Odessa, Wash., and expect to locate somewhere in California. The last heard of them was at Santa Rosa.

Mr. and Mrs. R. E. Densow of Lewiston, accompanied by Mr. Densow's father and mother, and Mrs. Densow's mother, spent Sunday in Kendrick.

### Texas Ridge

John Gustafson of Clarkston spent a few days last week on the ridge.

Mr. and Mrs. Head visited with their daughter, Mrs. Chas. Dahlgren, the first of the week.

Clarence Baker is home for a few days.

Albert Dahlgren went to Moscow

to visit a few days with his brother, August.

Mr. Frantzich was a business visitor at Kendrick, Tuesday.

Mr. Knudson spent the week end in Deary.

Mr. Miller and family, Albert Pierce and wife and Mrs. George Eacker, were callers at the Gentry home Sunday afternoon.

Smith Eacker was a caller at Mrs. Bogar's, Sunday.

Clair Gentry spent the week end on Cedar Creek visiting his grandparents, Mr. and Mrs. Hunt.

Mr. James Pierce is visiting in Clarkston and Mrs. Pierce has gone to Touchet, Wash. to visit with their son, Elmer and family.

Mrs. Jack Bailey and son Curtis spent the week end on Dry Creek.

Mrs. Viola Baker's sister from St. Maries, visited with her over the week end.

Mrs. Harry Baker called on Mrs. Frantzich, Saturday.

A party was held at the Frank Bailey home last Thursday evening in honor of Frank's birthday. Dancing was the chief amusement. All report a jolly good time.

The snow and rain have delayed the spring work. Lots of plowing and seeding yet to be done.

### Crescent News

Mr. Hunt visited Sunday with Earl Langdon.

Mr. and Mrs. Stewart Wilson spent Sunday at the Zimmerman home.

Mrs. Hoffman spent the week end with Winegardner's.

Mrs. Winegardner and children returned from Moscow and Leland where they spent last week with friends and relatives.

Cedar ridge school will be out May 14th.

Don't forget the ball game at Southwick Sunday.

### BEST TIME TO CUT COWPEAS

Most Desirable Quality of Hay Produced if Cut When Pods Are Full-Grown and Matured.

As a rule cowpeas should not be cut for hay before the pods begin to turn yellow. The best quality is produced and the hay cures most readily if the vines are cut when most of the pods are full grown and a considerable number of them are mature. At that stage of growth none of the best hay varieties will have dropped their leaves and the plants will have practically attained their full growth.

Team of good mares for sale, age 6 years, weight 1400 pounds each. George W. Fleshman, Leland. 11tf.

FOR SALE or TRADE: a good young work horse. P. G. Candler, Kendrick. 15-2p

### COMING TO Palouse

#### United Doctors Specialists

#### Do Not Use Surgery

Will be at Palouse Hotel

Monday, May 6

Office hours 9 a. m. to 3 p. m.

ONE DAY ONLY

No Charge for Examination.

The doctor in charge is a graduate in medicine and surgery, and is licensed by the state of Washington. He visits professionally the more important towns and the cities and offers to all who call on this trip, consultation and examination free, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit many wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

If you have been ailing for any length of time and do not get better do not fail to call, as improper measures rather than disease are often the cause of your long-standing trouble.

Remember above date, that examination on this trip will be free and, that his treatment is different.

Address: 336 Boston Block, Minneapolis, Minn.

"Everything to Eat and Wear"

## Which Paint Costs Less?

NOTE how the best paint spreads easier and covers more square yards than cheap paint does.

Figure in the extra gallons of cheap paint that you must buy and the extra cost of application.

It means that cheap paint costs just as much as good paint on the house.

The best paint then gives five or more years' protection to your property investment. Cheap paint on the average, starts cracking in twelve months. Which paint costs less?

72 Years' Experience The house paints we specify for your home are the result of 72 years' experience in making paints and varnishes for every

purpose. Made to stand the peculiarities of western weather.

The best material—PIONEER WHITE LEAD, pure linseed oil, zinc and color—are combined with long-time skill, in scientifically exact proportions.

Our white lead base must pass through a silk screen with 40,000 meshes to the square inch. A patented purifier makes it "whiter," so Fuller paints are exceptionally clear-toned. The paint when finished and applied on the house is a beautiful, elastic, tough, protective coating.

Such paint costs but a trifle more to buy per gallon and is five to ten times more economical in service.

Don't allow surfaces to rot. It costs less to paint them.

## Fuller's SPECIFICATION House Paints

Phoenix Pure Paint Pure Prepared Paint

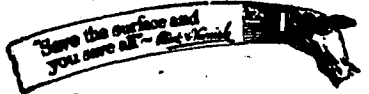

Manufactured by W. P. Fuller & Co.

"Pure Prepared" and "Phoenix" are Fuller's Specifications for house painting. Get either and you have the best that anyone can make—long-service paints. WHERE TO BUY

THEM. These paints are important to you, so it's important to go to the right store to get them. Agents' names and addresses are printed in the memo, coupon to the right. Cut it out and put it in your pocket now.

For All Exterior Jobs of Painting, It is Advisable to Secure the Services of a Master Painter

## Free Advice on Painting

ASK our agent for our free advice. He will show you a color card which shows 32 shades of this desirable paint.

We have a Fuller Specification Department which will tell you all about the most desirable color schemes, color harmony and those other details you want to know.

Take advantage of Fuller House Paints. Take steps to paint now. Don't let weather depreciate your investment.

W. P. FULLER & CO. Dept. 4, San Francisco Pioneer Manufacturer of Paints, Varnishes, Enamels, Stains, and PIONEER WHITE LEAD for 72 Years

Farmes Hardware Company Kendrick, Idaho

### For a Severe Cold

"Chamberlain's Cough Remedy cured my daughter Anna of a severe cold and cough a few years ago and ever since then I have never missed an opportunity to recommend this medicine to anyone suffering from throat or lung troubles. I cannot speak too highly in praise of it," writes Mrs. D. J. Shelley, Earlville, N. Y. Chamberlain's Cough Remedy contains no narcotic and may be given to children with perfect confidence. It is a pleasant syrup so they do not object to taking it.
