

## LATAH COUNTY NEWS PARAGRAPHS

### Clipped From The Columns of Neighboring Papers.

**Deary Press:** If the crops in this section keep growing as they have started and reach maturity without mishap, there will be some great yields to brag about this fall. Reminds us of four years ago, when there was so much rainy weather that the farmers were away late with their seeding and Deary folks were still making garden along in June, and between showers at that. There was an enormous crop that year. The fields fairly bulged. It is starting off the same way this time. If we have the same yields we had that year and the farmers can get a dollar or thereabouts for their wheat, there'll be heaps of good times in the Potlatch country. We shall all forget the past lean years and hair that has turned gray from worry over high costs and low prices during these latter months will speedily resume its natural sorrel or other original hue.

**Troy News:** Troy fishermen met with a brief, bad scare on Wednesday when the Spokesman-Review correspondent in Moscow announced that State Warden Otto Jones was closing the streams in Latah county against fishing. Investigation showed, however, that the portions closed were the tributaries to the Potlatch river above Helmer, and the upper reaches of the Palouse river above Grizzly Camp. Old sportsmen state that there is plenty of open water left so that local fishermen will get their fill of sport with the finny tribe.

**Genesee News:** The work of completing the surfacing and curbing of the streets that have recently been graveled in Genesee is being pushed as rapidly as possible and when completed will give that portion of town a real "city" air. There is yet considerable work to be done but it is expected that many improvements will be made before fall.

### Don't Speed

The town council is providing Walter Housley, the new marshal, with a stop watch and anyone caught speeding on the streets of Kendrick will be fined. The speed limit is 12 miles per hour. New signs are to be placed in conspicuous places at the entrances to town and after they are in place the speed ordinance will be rigidly enforced.

### Lutheran Circuit Meeting

The Spokane Circuit of the Lutheran church held meetings (at the Lutheran church) on Big Bear ridge, May 7th to 9th.

The following ministers were in attendance: O. L. Haavik, H. Farseth and J. B. Rockne of Spokane; B. O. Steffenson, Genesee; N. J. Holm, Clarkston; J. F. Adrianson, Moscow; H. J. Stolee, Sandpoint; P. J. Luvaas, Couer d'Alene; T. H. Himle, LaCrosse, Wash; J. M. Haaland, Wilbur, Wash; J. F. Panschart, Spokane; and P. Hesby of Deary.

The opening sermon was delivered by Rev. H. Farseth of Spokane. Splendid and instructive sermons and talks were given through the three sessions each day.

Special and appropriate music added greatly to the impressiveness of the meetings.

The weather was ideal and people drove here from the various towns and ridges. A very large attendance was had at each session.

### Close Monday Afternoon

All business houses have agreed to close Monday afternoon from 2 o'clock for the rest of the day, in observance of Memorial Day.

### A TRIP TO THE JUNGLE

Carveth Wells, in Picture and Story, Takes Chautauqua Audiences Through Wild Jungles of Malay Peninsula.

For six years Carveth Wells, of London, England, formerly lecturer at Imperial College, London University, lived in the wild jungle lands of the Malay Peninsula. He was official explorer for the British Government and

the experiences which he encountered in that period of time form one of the most thrilling and interesting stories now being told on the American platform. Mr. Wells brought back with him a remarkable collection of views of the animal, reptile and plant life of that strange tropical country and he will present these on the screen at Chautauqua on the fourth night.

### Graduation Exercises

The graduation exercises of the Kendrick high school were held at the Methodist church Wednesday evening. Seven graduates received diplomas for completing the regular four year's high school course.

The opening number of the program was a vocal selection by the glee club, which proved to be a very popular number. This was followed by the invocation by Rev. Howard W. Mort. Artilee Holada and Norla Callison furnished a very pleasing violin duet with Mrs. McCrea at the piano, which was followed by a vocal solo by Mrs. Morrison.

Dr. J. F. Messenger, head of the department of education of the University of Idaho, delivered the address to the class. He brought out a number of very interesting points that will no doubt prove valuable to the members of the class in their life work.

The address was followed by a piano solo by Lena Bibb after which E. W. Lutz, president of the board of trustees, made a very appropriate presentation speech and delivered the diplomas to the class. A song by the glee club ended the program.

The names of those who made up the class of 1921 follow: Kester Dammarell, Lena Bibb, Elmer McGuire, Tula Lehman, Minnie Torgerson, Curtis Bailey, Joyce Hunt and Cecil Chamberlain.

### Celebrate in Kendrick

If you are planning to have a big time July 4th, don't overlook the fact that Kendrick is going to have a big blowout for one day—Monday, the Fourth of July. The reason Kendrick is going to celebrate just the one day is because all efforts will be concentrated to make this day a red letter day in the Potlatch and have it so full of fun and enjoyment that everyone will go home perfectly satisfied.

A good program is being arranged for the day and features will be announced in due time. The main thing now is to definitely decide to celebrate in Kendrick and the rest will be taken care of later.

Invitations have been sent out for the marriage of Miss Bertha Koepf, daughter of Mr. and Mrs. Carl Koepf of Cameron, to Mr. Ernest Heimgartner. The wedding will take place next Wednesday afternoon, June 1, at 2 o'clock at the Cameron Lutheran church.

### "Eulighting The Lambs"

Art Regnstad of Big Bear ridge still contends that wheat is going to reach a high mark. To substantiate his claim he sent in the following clipping which was written by an independent crop statistician. Whether it has merit or not will be demonstrated within the next two months.

"Any farmer who sells the remainder of his grain crop below the cost of production will be a fit candidate for a lunatic asylum. The unbounded generosity of the American farmer has brought us face to face with a wheat famine. 300 million bushels of wheat have already left the country and another 100 million bushels have been sold for exportation. There never was a time when future needs were as recklessly disregarded as now. The visible supply all sold and farm reserves dwindling away. Bakers and grocers without reserve stocks of flour and millers without wheat. Everybody living in blissful ignorance of the dangerous shortage of breadstuff or seemingly bent on ignoring true conditions. The trade holding off in a vain endeavor to cajole the farmer into giving away the remainder of his products after having already sacrificed the bulk of his crop to meet the world's cry for food.

"It needs no prophetic power to foresee the awakening which is shortly coming to the innocent lambs who have sold the crop on April scenery and enabled the cash interests to cover their foreign commitments. They are now holding the bag and when the farmer discontinues his charitable distribution of foodstuffs, where will they get off? He must do so in order to continue farming. His wheat crop cost him \$2.77 a bushel to raise and the corn crop cost him \$1.25 a bushel. No red-blooded American will expect the man who feeds us to make further sacrifices. If the price is too high, let the Government fill the gap, as European governments have done, and not take it all away from the farmer. Americans are not seeking charity. They are ready to pay the cost of production for anything they need and foreign buyers will have to do the same.

"If the foreign buyers succeed in getting the wheat which they have already purchased out of the country the situation will be alarming. They own all the visible supply and have contracted for the best part of the remaining farm reserves. Every bushel of grain in the country will be needed for home consumption before the next crop of wheat is available.

"The first part of the new crop will sell even higher than the old crop. With no carry-over stocks on hand in any part of the world, exporters will be in fierce competition with millers during July and August and the price will be a secondary consideration.

"This analysis of the grain situation is read by Two Million farmers and the members of all Grain Exchanges at home and abroad.

GEORGE MORRIS,  
Independent Crop Statistician."

### Texas Ridge

Mr. and Mrs. Tom LaBolle and daughter, Mrs. Schultz, went to Clarkston, Sunday.

Mrs. Viola Baker and Mrs. Ousterhout visited with Mrs. Osborn last Friday.

Smith Eacker and Mrs. Bogar, were Sunday guests at the Miller home.

Jack Whybark of Bear ridge was a caller on the ridge, Sunday.

Walter Pierce and family of Bovill are spending a few days on the ridge.

Herman Baker made a business trip to Greer, Thursday, returning home, Monday.

Mrs. Miller and Mrs. Bogar attended the 8th grade exercises in Deary, Friday evening.

F. B. Smith went to Spokane Wednesday morning on business.

### Smutting Charges Fixed

The state Public Utilities Commission has tentatively fixed the smutting charges for wheat, upon application having been made by Miles Cannon, Commissioner of the Department of Agriculture. These rates are computed from rates established in Oregon and Washington, and are the same as the Washington rates, and the same as the Oregon rates for bulk grain, but approximately 25 per cent lower than the Oregon rates for sacked grain. The notice issued by the Public Utilities Commission states the rates set forth will be permanent in Idaho for the year 1921 unless sufficient protest is filed with the Commission on or before June 6th.

The following is the text of the notice issued by the Public Utilities Commission:

	Sacked	Bulk
3 to 3 per cent	\$.50	\$.35
3 1/2 to 7 per cent	.75	.60
7 1/2 to 15 per cent	.90	.75
15 1/2 per cent up	1.00	.85

All persons in interest, shall, on or before the 6th day of June, 1921, file in writing with this Commission, answers in admission, objection or protest, if any they have, to the promulgation of an order by the Public Utilities Commission of the State of Idaho, fixing rates as hereinabove specified for the service mentioned.

### Charles Sattler Leaves

Charles Sattler left yesterday for the Oddfellows' Home at Caldwell, Idaho, where he will probably spend the rest of his days. His departure marks the loss of one of the three oldest pioneers of Kendrick. Over thirty years ago he came here and Dr. Rothwell and Wm. Meyers are the only two left who were in Kendrick at that time.

Over twenty years ago he owned a tannery located close to the Potlatch creek bottom near the lower end of town. He was doing quite a flourishing business as he was an expert tanner and had a wide reputation as a tanner of furs. Hunters from all over the country sent hides to him to be tanned for rugs. In January 1900 the flood washed away his tannery and hundreds of green hides which he had in storage. All he was able to salvage from the disaster was \$6.00 worth of partly spoiled hides which were washed up on the creek banks.

In later years he has made his living from a small flock of chickens. This source of income, however, finally became inadequate and owing to his advanced age he was finding it impossible to make a living. The members of the local I. O. O. F. Lodge finally prevailed upon him to go to the lodge home, an institution which was recently built at Caldwell. After he had made up his mind to go he looked forward with pleasure to the change of environment and felt satisfied that for the rest of his days he would be well cared for.

### Farm Bureau Picnic

The annual picnic of the Latah County farm bureau will be held in the city park at Moscow on Thursday, June 16th. Dr. A. H. Upham, president of the University of Idaho, and W. S. Shearer, president of the Idaho Farm Bureau Federation will be the principal speakers. Arrangements are being made to secure good music for the occasion. There will be a big basket dinner at noon, with coffee and ice cream furnished free to all by the farm bureau.

Over 1200 people attended the picnic last year and indications are that there will be a considerably larger attendance this year. The final event of the day will be an excursion over the experiment station.

Mrs. Rose Sampson of Spokane visited at the home of Mr. and Mrs. O. E. MacPherson, Wednesday and Thursday of this week.

### "WESTERN RILEY" AT CHAUTAUQUA

Richard P. Campbell is Delightful Poet and Reader.

Richard Percy Campbell, author of "Just Common Folks" and "A Daughter of the Rogues," two delightful books of verse, is often called "The Western James Whitcomb Riley." He has written about the folks next door

—the everyday people, just as Riley did, and much of his verse has the same deep heart appeal as that of the Hoosier poet.

He comes to Chautauqua on the second afternoon with readings in character from his own works. An hour spent with him will be an hour long remembered.

### School Notes

The honor roll for the semester examinations is as follows:

Lena Bibb: Home Economics; History II; Geometry; English IV.  
Nellie Dean: Geometry; English IV; Home Economics; Chemistry.  
Beulah Long: English II; Algebra; History I; Home Economics.  
Edith Dammarell: English II; Home Economics; History; Algebra.

Reta Leith: Algebra; Home Economics; History I; English II.  
Minnie Torgerson: U. S. History; English IV; Latin.

Joycie Hunt: English IV; Latin; U. S. History.

Tula Lehman: Chemistry; Latin.  
Kester Dammarell: U. S. History; English I.

Curtis Bailey: U. S. History.  
Elmer McGuire: English IV; Latin.

Cecil Chamberlain: Geometry; English IV; U. S. History.

Cecil Carlisle: History II.

Burford Hogan: English II.

Elsie Bird: Latin; English I; History I.

Audrey Stanton: Biology; English I.

Alice Wegner: Algebra.

Lena Wegner: Algebra.

### Teakean and Cavendish

Mrs. J. Candler has been on the sick list the past week, but she is improving at this writing.

Mr. and Mrs. Helmut Petersen made a business trip to Orofino, Friday.

Mrs. Pete Olsen and daughter, Eva, were visiting at their mother's place, Sunday.

A large crowd of people gathered at the home of Mr. and Mrs. D. Stalnaker to have a picnic. All reported a very enjoyable time.

Those visiting at the J. C. Petersen home Sunday were Ed Choate and family, Helen, Lyle, Vernon and Anita Adams, Mr. and Mrs. A. H. Frazier and Mr. and Mrs. Roy Shoemaker. All reported a very pleasant day.

Miss Myrtle Kelley was visiting at the Asa Choate home, Sunday.

Mr. and Mrs. Lloyd Stanton moved down from Moscow this week. Lloyd has been working in the Hour mill there but a number of men were turned off and as he was one of them he and his wife preferred living here, so shipped their household goods here the first of the week.

## KENDRICK DEFEATED OROFINO TEAM

### Won Game by Close Margin of 5 to 4

The best game of the season was played last Sunday on the local diamond between Kendrick and Orofino. The two teams were very evenly matched as the score would indicate. Until the last of the eighth inning the visiting team was in the lead, but a batting rally on the part of the locals brought in two scores which gave them the lead.

Kendrick had a good lineup Sunday. Every man on the team was a ball player of experience, altho the long string of errors recorded during the game indicates that practice is sadly needed to bring the team up to consistent playing form.

McCrery pitched a great game. In spite of the fact that 11 errors were made by his team he held the visitors to 4 hits and 4 runs. Mac always pitches the best ball when he is in a tight place, which is a valuable asset to a pitcher and to the team.

One of the features of the game was the fact that three times the three Carlson brothers were all on bases. Last playing on the part of the Orofino team was all that saved a goodly number of runs for Kendrick.

Kendrick secured 5 hits, 4 of them being for 2 bases. Orofino got 4 hits. Bulfinch and Bolon each got a 2 bagger and McCall knocked 2 clean two-base hits. Kendrick made 11 errors and Orofino 5. McCrery struck out 11 men and Orofino pitcher 6.

Kendrick's outfield had little to do, most of the batted balls going to the infield.

The return game to be played at Orofino next Sunday promises to be a fast one.

### Low Cost of Advertising

Few advertising men know that advertising space in newspapers is by far the most economical way to reach the consumer. It is a fact and the only reason that advertising was ever created was because wise and shrewd business men learned that they could buy white space in publications at a minimum cost and because of the message they would put into that space they could make a profit on the transaction and make the advertising a real investment in production of sales and good-will. In these days of high cost of white paper and printing the advertiser could not print a full page advertisement and buy the white paper at the small cost that the newspaper charges him for the complete page delivered into the homes by invitation. That is to say, the readers of this newspaper buy a paper because they want to read it and because they know they get more for their money at 2 or 3 cents than anything else they could buy at that price. That is what makes the advertiser so valuable to the advertiser, provided they have the right message, the right illustration and the right merchandising plan back of the advertising. Newspaper advertising is by far the most economical method to reach the consumer.—William H. Rankin, President, Rankin Advertising Agency.

Oscar Raby, while working his team of mules on the Brady gulch grade had a runaway that resulted in nothing more serious than two broken wagons. He was coming down the grade near the Raby ranch when a car passed and scared the mules. They started to run down the grade and when Oscar saw that he could not stop them he jumped off the wagon. Several hundred yards down the grade the mules passed another wagon loaded with dirt, and as they went by, took a wheel off. The empty wagon was badly wrecked and the mules ran up Main Street for several blocks before they could be stopped.

# Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

The Troy News of last week was published by the new editor and owner, G. H. Rice, recently of Malden, Wash. In his "bow to the public" in the editorial columns of the News, Mr. Rice displays a keen sense of humor which in our opinion is one of the first requisites of a country publisher, and which will do more than anything else to carry him over the rough and rugged road of the precarious profession. Troy offers a splendid field for a good newspaper as it has a rich territory surrounding it. Under the new management we believe Troy will have just as good a paper as the business men of the town will help to make it.

It is less than three weeks until the first day of the Kendrick chautauqua. Ticket sellers will soon start the campaign of selling 340 season tickets at \$2.50 each. It is a big undertaking and its success depends entirely upon the people of the community. It is a community enterprise and if the people respond by purchasing season tickets the chautauqua can be put over successfully. It might be well to bear in mind that but a small part of the money received from general admission goes to the local chautauqua fund, so if you really want to help make up the necessary financial budget to pay the \$850 guarantee—buy a season ticket.

Some of the farmers in this section are not putting in summer fallow crops this year, a method which has not been followed for many years. On account of the present low price of beans they would rather let the ground lie idle a year than to take a chance on this ordinarily profitable crop.

Peddling hot air and boosting can hardly be called synonymous terms.

The new tobacco law doesn't seem to have the desired effect. It was passed for the purpose of preventing minors from getting cigarettes and tobacco. It isn't an uncommon occurrence to see minors smoking cigarettes on the street.

Kendrick school closes this week. Today is the last day and it has been devoted to giving out the grades to the pupils. It has been a very successful school year and a satisfactory one. Judging from the standpoint of an outsider the discipline as been unusually good and with this condition existing the progress of the pupils in their school work is more or less assured. The school is on the accredited list of high schools of the state, which is a splendid showing for a town of this size.

A boy on the farm who has the choice between following a "foot burner" or going to school, seldom plays hockey.

## Methodist Church

Howard W. Mort, Pastor

Sunday school at 10 a. m. Morning worship at 11 a. m. We especially invite you to this service as the sermon will be one commemorating Memorial Day, which comes this year on the following day, Monday. Remember Epworth League at 7:15 p. m. The Young People's meeting for the young people. Evening song service and worship at 8 p. m. The service will not be longer than an hour and we invite your presence with us. Epworth League business meeting at the parsonage, Tuesday evening. Both business and fun so don't miss it.

## Leland Items

A crew of men are at work excavating for the new school building. They are finding more rock than dirt which requires a lot of blasting. There was quite an excitement in town last week when a blast went off and rock fell all over town, one

piece falling on the awning at DeWinter & Goudward's store, tearing through and hitting the sidewalk and bounced up and shattered a big plate glass window.

The latest contagious disease to infect our village is Measles and the unfortunate victims are Jeraldine and Ruby Daugherty and Kathryn Hund.

Mrs. DeWinter and Mrs. Hall visited Mrs. Jesse Hoffman Tuesday.

Mr. and Mrs. A. H. Smith, Mr. and Mrs. Hall and son, Claude, were dinner guests at the home of Mr. and Mrs. Harry Smith, Sunday.

Mrs. Lucy Hoffman is down from Crescent visiting her children.

Mrs. Fietzler who taught in the schools here two years ago, and who was much in favor with both parents and children, visited at R. M. Smith's a few days this week.

The Southwick "Kid Team" played the Leland kids a lively game, Saturday, on the latter's diamond. The score stood 15 to 6 in favor of Leland.

Prof. Segsworth occupied the pulpit Sunday morning, preaching an excellent sermon.

Rev. Hall will preach next Sunday morning 11 a. m., and in the evening Rev. Carlton will preach.

The Epworth League topic for Sunday evening is "Missionary work in South America" Leader for the evening will be Miss Gertrude DeWinter.

The Ladies Missionary Society will meet June 2nd for their monthly business meeting with Mrs. Vergil Fleshman.

## Linden Items

Mrs. Vaughan spent Tuesday with Mrs. Granville Wall.

Tuesday visitors at the Allen home were Mrs. Shingler and children, Mrs. A. Alexander and Miss Eva Smith.

Clarence Harris enjoyed a short visit with his brother from Troy, the first of the week.

Harry Langdon, formerly of this place but now of American ridge, was on the ridge Tuesday looking for his horses.

There are four trucks hauling lumber to Kendrick from the Crocker-Wright sawmill.

Sunday visitors at the Gilchrist home were Mrs. Vaughan and Teddie, Mrs. McPhee and Celia.

Stuart Wilson and wife and the Shingler family spent Sunday at Mr. Whislers.

Frank Lyons and family, Eva and George Smith were Sunday visitors at A. W. Longfellow's.

George Garner and family spent Sunday at John Carr's.

Mr. and Mrs. Ed Darby are the proud parents of a new daughter which arrived Saturday.

Mr. Gilchrist and son, Walter, were in Moscow the first of the week.

Master George Smith arrived from Lewiston, Saturday, where he has been attending the Webster school, and will spend the summer at home.

Mrs. Grace Patterson arrived Sunday to spend her summer vacation at home.

Mrs. George Garner and Miss Celia McPhee spent Tuesday with Mrs. Jim Kyle of Crescent.

## Big Bear Ridge

Mr. and Mrs. Chas. Elliott received a telegram last week, of the death of Mr. and Mrs. Jim May's four-months-old daughter, at Ontario, Oregon. Mrs. May is well known here as Miss Charlotte Elliott.

Mrs. Elmer Mathes and son, Homer, spent last week with her parents on American ridge.

Mrs. H. Dahlburg and children of Deary spent last week with her parents, Mr. and Mrs. J. J. Shind.

Mr. and Mrs. T. H. Rogstad came up from Clarkston to attend the Lutheran Circuit meeting, and to visit at the home of their son and with friends here.

Miss Emma Aas is spending the week in Deary at the home of her brother, Lewis.

Mr. and Mrs. J. C. Carlson, former residents of the ridge, came here from LaCrosse, Wash., to attend the Lutheran meeting.

Mrs. A. W. Ahl of Kendrick was visiting friends here last week.

Mr. and Mrs. Erick Rierson, Mrs. Nels Nelson, Mr. and Mrs. R. J. Johnson of Little Bear ridge attended the Lutheran convention here last week.

Preaching services at the Steele school house, Sunday, May 29th at 11 a. m., by Rev. R. M. Hood of Kendrick.

Will Whybark made a business trip to Lewiston last week.

Thorvald Nelson departed Tues-

day for the coast to remain indefinitely.

The Memorial Day Program and dinner will not be given as previously announced on account of a smallpox epidemic.

Miss Neva Nelson departed Tuesday for a visit with friends in Spokane.

## Presbyterian Church

Robert M. Hood, Minister.

Patriotic services of a memorial nature will be held at 8 o'clock Sunday evening.

Sunday school at 10 a. m. Junior C. E. at 3 p. m. No morning preaching.

Pearson's Graham Bread is good—try it. 19-1t.

## ROOT AND SALAD CROPS IN FAVOR

Can Be Cultivated With Hand Tools and Take Up Comparatively Small Space.

## FRESH THINGS ALL SUMMER

Specialists Suggest That Plantings Be Made a Week or So Apart to Obtain Succession of Various Kinds of Vegetables.

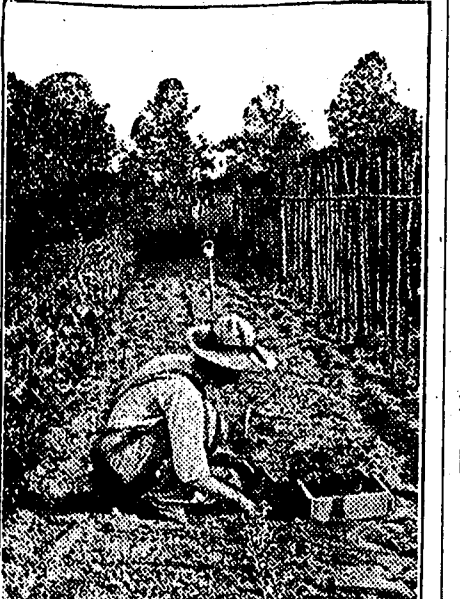

(Prepared by the United States Department of Agriculture)

Where garden space is limited plant root and salad crops. No garden, large or small, is complete without them, but they are particularly adapted to small back-yard gardens. Among the root crops are radishes, beets, carrots, parsnips, salsify or vegetable oyster, and turnips. Salad crops include lettuce, common or wild cress, dandelion, Cos lettuce or romaine, Chinese cabbage, and others. They require little space, because they can be planted in rows from 10 to 18 inches apart, and cultivated with hand tools. Many gardeners make only one planting of these crops, but the garden specialists of the United States Department of Agriculture suggest that several plantings of them be made a week or so apart, in order to have a succession of those vegetables.

Radishes are one of the first and best vegetables that come from the garden in spring. They should be planted as early as possible, whether for market or home use. For the home supply small amounts should be planted, and at least two or three plantings made with varieties that mature at different times.

## Food Value of Beets.

Beets are one of the most important crops for the home garden. Seed can be planted just as soon as the soil is in condition to work. When the plants crowd one another in the row, thin them out when they are young, and cook them as greens. Later, when

Salad Plants Can Often Be Grown in a Small Space Where Some Other Crop Has Been Gathered.

they are about an inch in diameter, both leaf stems and young beets can be cooked together. When the beets are larger the leaf-stems become tough and woody. As a rule two plantings should be made, one extremely early and another in about four weeks.

Carrots should be planted just a little later than beets, and as soon as the plants are up they should be thinned. A second thinning will leave the plants one and one-half to two inches apart in the row and give a supply of small carrots, known as baby carrots, for use on the table. The tops of the carrots cannot be used for greens.

Parsnips and salsify are more in the nature of winter crops; that is, they are grown during the summer and kept for winter use. A section of row 20 to 30 feet long generally will produce all the parsnips or salsify that the average family will want.

While it is true that too much lettuce often is planted at one time, not enough attention is given to keeping a continuous supply. Lettuce plants grown in the hotbed or cold frame, or in a box in the house, can be planted in the open ground just as soon as the danger of the last frost is past.

## Fresh Things All Year.

By making a study of the different kinds of salad crops offered in seed catalogues one can easily have a con-

# Money Saving Specials

Every Day is Money Saving Day at Our Store

Here are a few notable examples that we take pleasure in submitting to you at this time.

Back lace at \$1.50, \$1.75, \$2.25 and \$2.50. Let us show you our line before you make your next purchase.

# N. B. Long & Sons

The Home of Good Things to Eat and Wear  
Kendrick, Idaho

tinuous supply from the earliest springtime until the late autumn, and even into the winter. Water cress, for instance, is grown commercially in ponds or spring-fed streams in sections where the water naturally contains large amounts of lime. By starting water cress from seeds sown in a box in the house or by getting a bunch of cress in the market and using the stems for plants, it is easy to grow a bed of water cress without the aid of a stream or pond. Chickory, or endive, is one of the finest of the winter salads. The roots are grown during the summer, and then dug in the fall and packed in the cellar in boxes of moist sand, the roots being placed rather close together in the box with the crowns or tops near the surface. A covering of straw is placed over the box, and the soil around the roots kept moderately watered. Fresh, young leaves will be formed beneath the straw, and as they are grown in comparative darkness, these are white, crisp and tender.

## FEEDING VALUE OF POTATOES

Rank Below Good Corn Silage on Account of Higher Percentage of Moisture in Former.

From the standpoint of feeding value for dairy cows, it may be said that potatoes rank below good corn silage. The latter contains about 26 per cent dry matter and the former, about 21 per cent. The chemical composition of raw potatoes and corn silage is very similar. Both contain about 1 per cent of digestible protein and between 16 and 17 per cent of digestible carbohydrates and fats, but potatoes contain somewhat more moisture than well-cured corn silage. Potatoes at 36 cents a bushel would cost \$12 a ton, whereas silage is worth less than one-half that price under present conditions.

## PROVIDING SALT FOR COWS

Best Plan is to Give Animals Constant Supply—Ounce Each Day is About Right.

The best way to provide salt for the cows is to give them a constant supply so they have easy access to it. The average cow will use about half a pound a week. If salt is provided daily an ounce each day will be about right, giving more or less according to the demands of the individual animals. Cows giving milk require more than those not in lactation.

## "Potter's Field"

The term, which is applied to a place where the penitents and unknown are buried, had its origin in Matthew 27:7, when the chief priests "took counsel and bought with them (the thirty pieces of silver for which Judas betrayed the Master) the potter's field to bury strangers in." The name has clung to such plots ever since.

## Treatment of Common Colds

"If all who catch cold could be persuaded to remain in bed for the first twenty-four hours of such an attack" says a well known physician, "there would be fewer cases dragging on with distressing symptoms for weeks and often ending in some more serious disease." To make sure of a prompt recovery you should also take Chamberlain's Cough Remedy. Whether sick or well the bowels should move each day.

# FOR WASHING

LET us make your washday less tiring by supplying you with efficient equipment. The work you can save yourself week after week easily justifies the small investment necessary in the right kind of washing equipment.

We are particularly able to show you some very good labor-saving machines—machines you can easily buy. Come in and ask about them.

Washing Machines  
Washboards  
Tubs, Boilers  
Wringers  
Pails  
Flat Irons  
(Electric and Stove Heated)

If you buy it from us, it's worth the price

The Farmers Hardware Company

"Perhaps You Don't Know" says the Good Judge

How long a little of the Real Tobacco Chew will last. Nor how much genuine chewing satisfaction the full, rich real tobacco taste will give. Ask any man who uses the Real Tobacco Chew. He will tell you that this class of tobacco will give more satisfaction—and at less cost—than the ordinary kind.

Put up in two styles

W-B CUT is a long fine-cut tobacco

RIGHT CUT is a short-cut tobacco

## Hail Insurance

You cannot prevent the damage to your crops by hail, but you can prevent loss to yourself by insuring with us.

Hailstorms are becoming more frequent in all sections of the country and your crops are not safe anywhere.

We represent good reliable companies.

## STANDARDIZATION OF WOOL GOING FORWARD

Resume of Work Shows Much Progress in Past Year.

Tentative Grades as Promulgated Are Based on Studies of More Than Two Years' Duration—Not Much Change Expected.

(Prepared by the United States Department of Agriculture.)

A resume of the wool standardization work of the bureau of markets, United States Department of Agriculture, shows that much progress has been made since the tentative establishment of definite wool grades just a year ago. Following the preparation of a few sets for its field agents and the subsequent press announcement that tentative wool grades had been developed, requests for the sets have been distributed among the bureau's field agents, agricultural colleges, wool-growers' associations, wool dealers and manufacturers, textile authorities, and others interested.

The tentative wool grades as promulgated are based on studies of more than two years' duration. In the course of this study thousands of samples of wool submitted by dealers and manufacturers as their interpretations of the market grades were

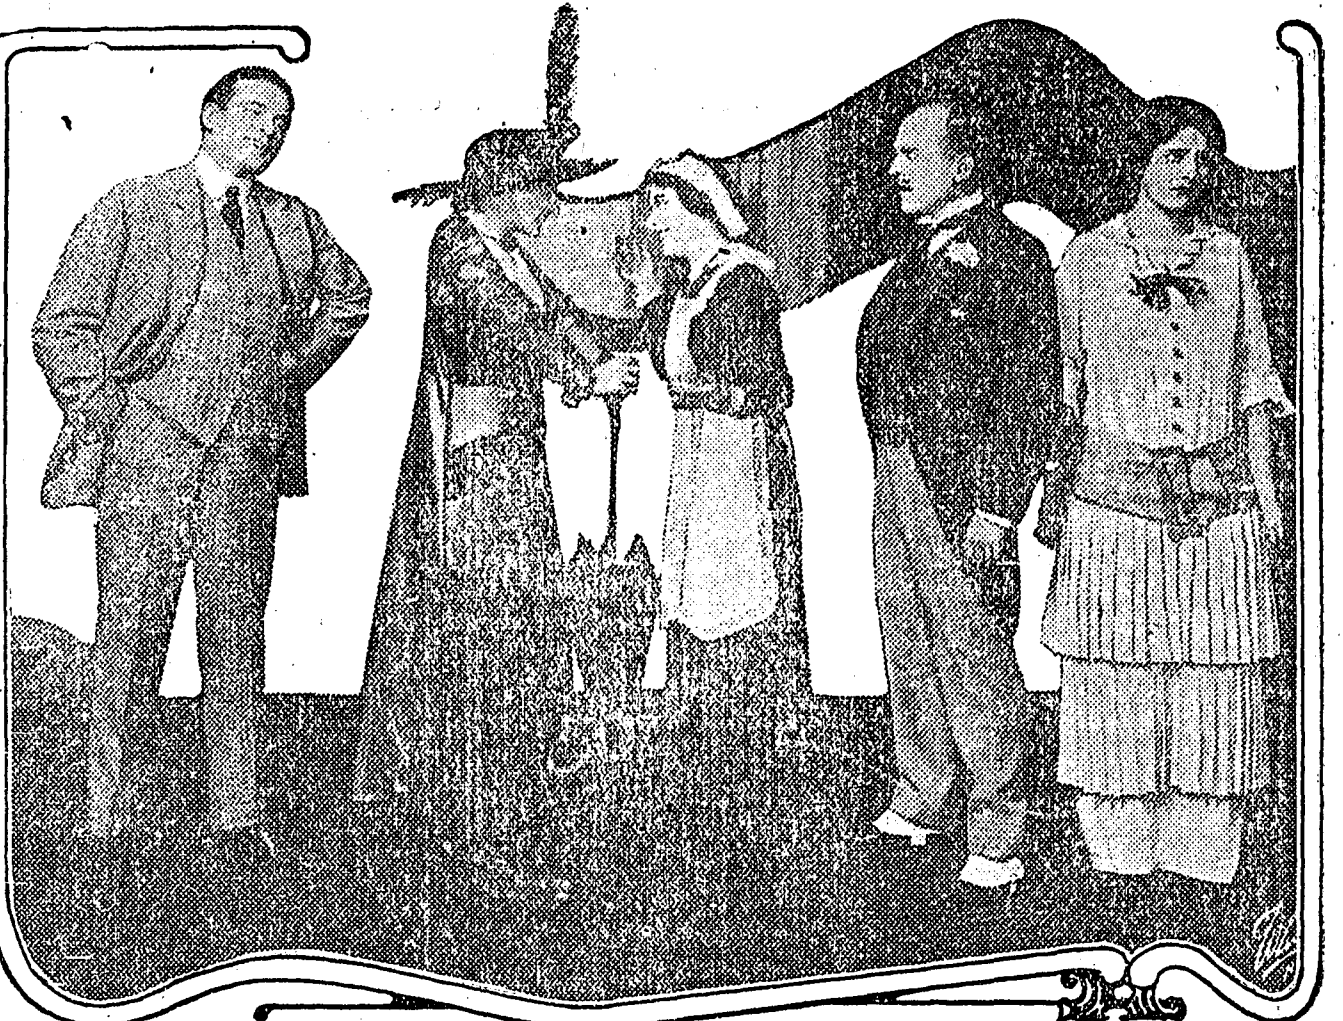

Grading Wool for a Co-operative Shipment.

examined. As the tentative grades, before being put in final form, were submitted to some of the leading wool authorities in the country for suggestions and criticisms, it is believed that little, if any, change will have to be made when official standards are established.

During the past year investigation and demonstrational work to test the commercial utility of the grades was conducted in 16 states. Before meetings of woolgrowers and others, demonstrations were given to show the preparation of the fleeces and the proper care and handling of the wool before its shipment to market. In the states of Maine, New Hampshire, Virginia, Kentucky, Missouri and Arkansas the several expert wool graders engaged by the bureau graded approximately 1,800,000 pounds of wool in accordance with the tentative wool grades. This work has been looked upon so favorably by wool producers that requests have been received for a resumption of these activities during the coming season.

## "It Pays to Advertise" Coming Soon

Great American Comedy to Be Presented at Chautauqua on the Third Night by the Keighley New York Players With an All Professional Cast

"It Pays to Advertise," rated as the greatest comedy success in the past decade is to be presented at Chautauqua on the third night by The Keighley New York Players with an all-professional cast. The production of the play is a radical departure from the regular line of Chautauqua feature attractions and will undoubtedly be welcomed by all Chautauqua patrons. The play itself is clean and wholesome through and through and packed full of fun. It has had sensational runs in the past few years in all the great cities of the land.

### KILL OUT DODDER SEED

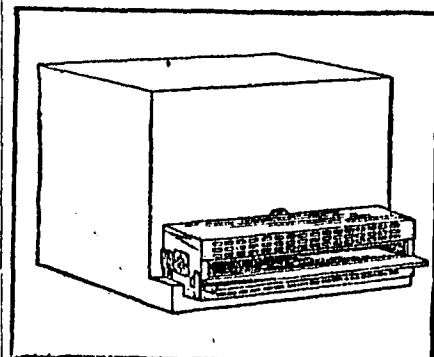

During the first season of infestation in clover or alfalfa, dodder usually occurs in small scattered areas. Such infested areas should be either mowed and removed before the dodder matures seed or else burned in the field. If seed has formed, burning is the only remedy, since it kills not only the plants but also the seeds of dodder which may be lying on the soil surface.

### AUTOMATIC TRAP ON BEEHIVE

Primary Object of Invention is to Prevent Bees From Leaving in Large Numbers.

The Scientific American in describing an automatic beehive trap, the invention of D. S. Rowe of Marseilles, Ill., says:

"The invention relates more particularly to an automatic bee trap. The primary object is to provide means whereby the entrance and exit openings of a beehive may be automatically closed by the weight of the occupants to prevent the bees from leaving

A Perspective View of a Hive, With Invention Attached.

ing the hive in large numbers, which is commonly known as "swarming." It is a further object to provide a means by which the ordinary passage of the bees in their performance of gathering honey is unobstructed.

### WHITE ANTS INJURE TIMBERS

Insects Enter Wood Wherever It Comes in Contact With Damp Earth and Eat Into Beams.

Winged white ants are often observed flying about houses in spring, and are sometimes supposed to have come in from outside. The bureau of entomology of the United States Department of Agriculture explains that

these winged insects really are hatched inside the buildings, and usually are to be taken as indicating nests of wingless white ants working destruction in the timbers.

These insects, which really are not properly ants, enter the wood wherever it comes in contact with damp earth, and often eat into the center of an upright beam without manifesting their presence on the outside until the wood is entirely ruined, and possibly a settling and cracking of the building has resulted.

The department urges that buildings be constructed with such foundations that no wood touches the ground, or if it is necessary to use wood, that it be impregnated with tar creosote. Concrete floors should be laid on a gravel base to prevent dampness and cracking, and where cracks occur they should be promptly filled.

Wild Horses Roam No More. Sometimes in the isolated mountain canyons of the West horses are fond of running loose, but while these might be termed wild, they usually belong to some rancher who has let them run loose. Wild burros are frequent to various parts of Arizona and occasionally are found in Utah. But the old wild horse herds of the mountain plateau regions have gone, probably forever.

## POULTRY FLOCKS

### FEEDS FOR GROWING CHICKS

In Addition to Furnishing Right Amount of Feed, Fresh Water and Shade Are Necessary.

(Prepared by the United States Department of Agriculture.)

In addition to furnishing a sufficient quantity and the right kind of feed to make flesh, muscle and bone, and supply energy for the growing chicks, clean dry quarters, green feed, fresh water and shade should be provided. The coop should be kept clean, which can be facilitated by keeping sand on the floor and raking of the droppings at least twice a week, and oftener if possible. The roof should be tight so

Sprouted Oats Help Materially in Furnishing Fowls With Needed Green Feed.

that the house will always be dry. Green feed is very essential for the growing chickens, the ideal condition being to allow them free range on good grass land. Alfalfa makes an ideal range. Where the chickens have to be confined to small yards it is very essential to supply green feed daily. Freshly cut lawn clippings and short pieces of any growing grain crop, such as oats, wheat or any quick-growing crop, such as rape, make splendid green feed. Where these growing feeds are not available, sprouted oats may be used and will help materially. Where a hen is kept with a brood of chickens and the chickens confined to a small covered pen, move this coop and pen every two or three days to fresh grass and never let the grass be killed or eaten down where the run is placed. Provide fresh, clean water daily and see that the receptacles are thoroughly cleaned and the chickens never without water. The water should be kept in the shade in as cool a place as possible. Using a stone crock for watering fountains will help to keep the water cool. Where the chickens are confined to yards or have free range, shade should be provided. Trees and low shrubs make ideal shade, but if not available a corn patch or rows of sunflowers will help materially. Where no growing crop or trees of any kind are available it will pay to put up an artificial shade, making a framework two or three feet high and covering this with the branches of trees, weeds, straw or any waste material that will furnish shade.

### BUILD UP PROFITABLE FLOCK

Possible Only by Continuous Selection for Health and Vigor to Get Egg Producers.

Only by continuous selection for health and vigor is it possible to build up a flock which will produce fertile eggs, strong chicks capable of making quick growth, and pullets with sufficient stamina to withstand the strain of heavy egg production. The appearance of a bird is not always a sure indication of its vigor, but appearance and action taken together are a fairly reliable guide for picking out vigorous birds.

### CAPONIZED TURKEY IS QUIET

Of Considerable Advantage in Getting Them in Excellent Condition for Marketing.

Very little has ever been done in the way of caponizing turkeys, but when it has been tried the capons were found to be much quieter in disposition and less likely to range over a wide area than the toms, and this character should be of considerable advantage in getting them in condition for the market.

### SUPERIOR GRAIN FOR CHICKS

Kaffir Corn Is Smaller Than Wheat and Is Excellent for Young as Well as Old Fowls.

The grain of kaffir corn is smaller than wheat and it is good for the little chicks as well as the full-grown ones. The brood will begin to eat it before they are a week old and those who have tried it say that it makes fine feed.

## COWPEA USEFUL TO HELP SOILS

Crop Increases Productiveness and Also Improves General Physical Condition.

### GREATLY BENEFITS ORCHARDS

About 85 Per Cent of Fertilizing Value of Crop Is Contained in Hay and 15 Per Cent in the Roots and Stubble.

(Prepared by the United States Department of Agriculture.)

The ease with which cowpeas are grown and their marked effect on succeeding crops have made them one of the most popular crops grown for soil improvement. Besides increasing the productiveness of the soil, the bulletin says, the cowpea also improves its general physical condition making heavy clay soils more open and sandy soils more compact. The cowpea has the distinct advantage of making a good growth on soils which will not produce profitable yields of other legumes or cereals: It is an excellent green-manure crop for vineyards and orchards.

#### Plow Under Stubble.

Except on the poorer soils, results indicate that it is decidedly more profitable to utilize the cowpea as hay or pasture and then plow under the stubble than it is to plow under the entire crop. About 85 per cent of the fertilizing and soil-improving value of the cowpea is contained in the hay and about 15 per cent in the roots and stubble. Feeding experiments indicate that much of the fertilizing value of feeds is recovered in the manure. It is possible, therefore, to obtain the feeding value of the cowpea as hay or pasture, and, in returning the manure to the soil, to save

Cowpeas and Johnson Grass Seeded Together.

a large part of the fertilizing value, provided the manure is well handled. When the entire crop is plowed under, a more beneficial and lasting effect is obtained, but this advantage is not sufficiently great to equal the feeding value of the cowpea.

#### Plow Under Entire Crop.

Light or sandy soils that have been cropped for a long time and need humus receive greater benefit from plowing under the whole crop. When, therefore, the improvement of the land is the sole object, the entire crop should be plowed under to obtain the greatest value. In utilizing the entire crop for soil improvement, it is best to plow it under when green, before being killed by frost. The green plants decay more readily and are superior to dry plants in their fertilizing effect.

The results of analyses made by the North Carolina agricultural experiment station show that one ton of cowpea hay contains 47 pounds of nitrogen, 10 pounds of phosphoric acid and 29 pounds of potash.

### BETTER CONTAINERS NEEDED

Millions of Dollars Worth of Perishable Products Destroyed Annually in Transit.

Perishable products worth millions of dollars are destroyed annually on account of breakage in transit of the containers in which they are packed. More than one railroad has appealed to the United States Bureau of Markets to help to remedy this situation, a high official of a southern railroad stating recently that, in his opinion, shippers should be compelled to use containers of adequate strength, and that proper car-loading methods should be exercised.

It is vastly to the interests of the shipper to use containers of a strength that will carry perishable products safely to market, and the bureau of markets has made many investigations and experiments to determine just what strength retainers should be to accomplish that result. These investigations are still in progress, but the information already collected is sufficiently complete to enable the bureau to advise shippers with regard to the best containers to use in shipping specified fruits and vegetables.

## Troubador of Willowmoor Won Ribbon at Chicago Show.

Morgan Stallion McMahon Was Made Champion at Vermont 1920 Fair—Excellent Records Made by Other Animals.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture's stud of Morgan horses at Middlebury, Vt., contains excellent specimens of the Morgan breed. This fact was demonstrated when Troubador of Willowmoor, the premier stallion at the farm, won the Morgan stallion class at the 1919 International show at Chicago. At the 1920 Vermont state fair the Morgan stallion McMahon was made champion. McMahon is sired by Scotland, a stallion bred by the late Joseph Battell and for the past several years owned by the Department of Agriculture. Scotland and McMahon's dam, Beauty, are both sired by General Gates, for many years at the head of the government farm stud. McMahon is a full

One of the Stallions in the United States Department of Agriculture's Stud.

brother of Heather, winner of the mare championship at the Vermont state fair in 1916. The Reserve champion at the last Vermont state fair was sired by Bennington, who was bred and has since remained the property of the government. Bennington is also sired by General Gates and out of a mare purchased in Kentucky.

Castor, a gelding bred by the United States Morgan horse farm, is sired by General Gates, and out of Babe, by Bob Morgan. Castor finished both the 1919 and 1920 endurance rides of 300 miles, and is still a sound, useful horse at farm work, under saddle, or in light harness.

Dolly, a registered Morgan mare that finished sixth in the 1920 endurance contest was bred on the remount plan under the supervision of the Department of Agriculture, and received her preparation at the United States Morgan horse farm. Dolly is sired by Devey, also a Morgan horse farm product, being a full brother to Bennington.

### START GARDEN EARLY

An early beginning in preparing the land and planting gardens is of much importance. Regardless of the seasons it is well to get an early start. That "planting over" may sometimes be necessary cannot be denied. But little is lost when garden land must be planted over, for the labor necessary to prepare the land is always well employed. Much is lost if early maturing vegetables are planted too late. Get your garden land ready and plant on time.

### Summons

In the District Court, Second Judicial of the State Idaho, in and for the County of Latah.

Edgar L. Latta, Plaintiff.

vs.

Lillian Mae Latta, Defendant.

The State of Idaho Sends Greeting To Lillian Mae Latta, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To procure a decree of divorce from the said defendant on the grounds of cruel and inhuman treatment.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 19th day of April, A. D. 1921.

(Seal) Homer E. Estes, Clerk.

By Adrian Nelson, Deputy.

A. H. Oversmith, Residence Moscow, Idaho, Attorney for Plaintiff.

Lines to Be Remembered. To be as good as our fathers, we must be better. Imitation is not discipleship. When someone sent a cracked plate to China to have a set made, every piece in the new set had a crack in it.—Wendell Phillips.

**Periodic Bilious Attacks**  
 Persons subject to bilious attacks at regular intervals know about when to expect an attack. They find that they have no desire for food when an attack is due but usually eat because it is meal time. Skip one meal and take three of Chamberlain's Tablets and you may be able to avoid the attack. Persons subject to periodic bilious attacks should not drink tea or coffee at any time.

**Facts About Rheumatism**

More than nine out of ten cases of rheumatism are either chronic or muscular rheumatism, and neither require any internal treatment. All that is required is to massage the affected parts freely with Chamberlain's Liniment. You will be surprised at the relief which it affords.

**Southwick News**

Wm. Wright has returned from Lewiston, where he went for an operation due to injuries received at the sawmill. He is getting along nicely.

Last Friday finished our term of school and the parting of teachers and scholars was affecting. We all feel that we have had a very profitable term and that we were parting with friends when the teachers left us.

Lee Kirk appears on the street with an automobile, while most of us walk.

Last Saturday afternoon the men running the rock crusher, formed a ball team and played the kid team of Southwick. The rock crusher team carried off the honors.

The Community Club held a social Thursday evening, in honor of the teachers. A very pleasant time was spent. Refreshments were served after which a crowd of young people went to Mrs. Bungler's home to surprise Miss Carrie, as it was her birthday.

The Christian Endeavor society gave an ice cream social at the home of Mr. and Mrs. Julius Hoppe, Friday evening. A splendid time was reported.

The Southwick kid team played the Juliaetta Kids last Sunday on the Juliaetta diamond, after the Juliaetta-Moscow game. Several cars went from Southwick and all had a jolly time in spite of the fact that the Southwick kids were defeated. Lee Kirk ran out of gas on the way home and had to ditch his car, so Claud Kimes got to bring all the girls home.

**Cameron News**

Mrs. Emma Brunseik and son, Herbert, visited her parents, Mr. and Mrs. M. Bleck of Kendrick.

Ernest Heimgartner of California is visiting at the Carl Keopp home.

Quite a number of the Cameron people attended the circus at Lewiston last Wednesday.

Miss Dora Hilton of Southwick is the guest of Mr. and Mrs. Dave Schoeffler.

Miss Martha Schoeffler of Lewiston is visiting her brother, Dave.

Mrs. Jake Slatter and children of Leland, were visiting at the Blum home, Tuesday.

Monday evening the young folks gathered at the Sillow home to celebrate Miss Martha's birthday. Refreshments were served consist-

ing of sandwiches, cake and ice cream. Everybody enjoyed a good time.

**NICOTINE SULPHATE IS LESS EXPENSIVE**

Dusting Found Effective in Controlling Pests.

Insects Hard to Reach With Ordinary Sprays Caught by Floating Dust Settling on Under Side of the Leaves.

(Prepared by the United States Department of Agriculture)

To the sorrow of some of the insect pests which feed on the under side of plant leaves and so escape the effect of poison sprays, the bureau of entomology, United States Department of Agriculture, has been conducting experiments with nicotine sulphate applied in dust form. Mixed with kaolin to give the poison bulk, 40 per cent strength nicotine sulphate did remarkable work in controlling melon, cabbage and pea aphids, onion thrips and western cucumber beetles. All these

Hand Dust-Guns Are Effective on Small Areas.

Insect pests are hard to reach with ordinary sprays, but the floating dust settles upon the under side of the leaves as well as on the surface. The experiments show that much larger areas can be treated in less time than is required by spraying. Moreover, the equipment necessary to apply the dust is much less expensive than a spray outfit and its cost of application is less than by the older method. It weighs less than spray and is more conveniently handled. It can be mixed with arsenate of lead or sulphur for use against insects and fungous diseases.

**WART DISEASE HITS ROOTS OF TOMATOES**

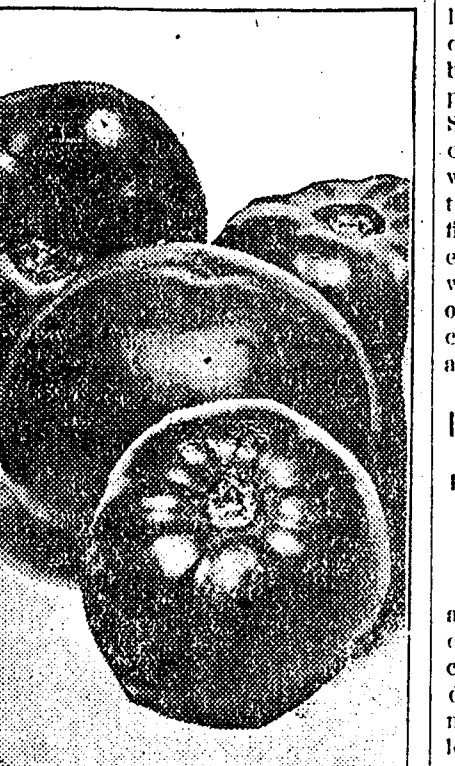

Injury Probably Does Not Reduce Yield of Fruit.

Affected Plants Serve to Carry Ailment Over From Year to Year in Absence of Potatoes—Other Plants Suspected.

(Prepared by the United States Department of Agriculture.)

Recent investigations made by the United States Department of Agriculture on the control of the potato wart disease, a European trouble found in this country in 1918, disclosed the fact that this disease also attacks tomatoes. Out of 28 varieties of tomatoes planted in wart-infested gardens in eastern Pennsylvania in 1920, 26 were found to be susceptible to the disease.

Wart is a very serious disease of potatoes, causing practically a total loss in badly infested soil. It attacks the tubers, causing warty outgrowths, which may practically cover or consume the potatoes. Its present known occurrence in the United States is con-

There is Much Satisfaction in Producing Tomatoes of the Finest Quality.

lined to gardens in a few mining villages in Pennsylvania, West Virginia and Maryland, from which its spread is restricted by state quarantine laws. The disease attacks only the stems and roots of the tomato plant, causing small warts; it probably does not reduce the yield of fruit.

The importance of the discovery of the susceptibility of tomatoes to pota-

to wart lies in the fact that affected tomato plants will serve to carry the disease over from year to year in the absence of potatoes, and to introduce it into new localities through the transplanting of tomato seedlings grown in infested soil. It is not yet known definitely whether all varieties of tomatoes are susceptible to the wart disease, but it is feared that such may be the case. Other plants belonging to the potato family are suspected of being susceptible to wart, and some of these have been tested, but with inconclusive results. These tests will be repeated.

**PREPARE BROOD COOP FOR HENS**

Illustration Shows Type Approved by Department of Agriculture Poultry Experts.

**IT IS EASY TO KEEP CLEAN**

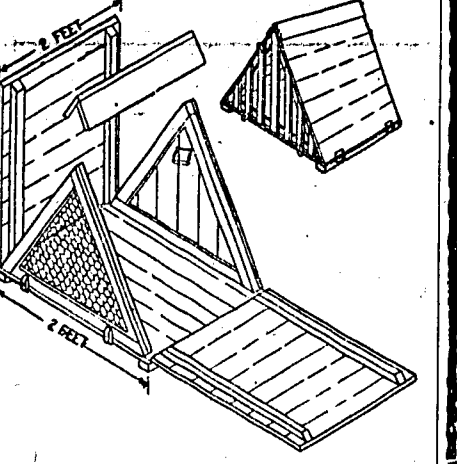

Rats and Other Enemies Are Prevented From Destroying Young Chicks—It Is Easily Stored as It Is Collapsible.

(Prepared by the United States Department of Agriculture.)

All kinds of makeshift brood coops are used by poultry keepers, but he who takes as much pride in the appearance of his chicken yards as he does in the appearance of the rest of the farmstead likes neat brood coops. The coop shown in the illustration is one of the types which has the approval of the United States Department of Agriculture poultry office. It is easy to keep clean and is convenient for inspection, as the sides are hinged to the bottom and are kept in place by the ridge piece, which is separate from the rest of the building. It also has the advantage of being easily stored when not wanted as it is collapsible. To anyone at all handy with tools, it should present no difficulties. The base of the triangle which forms the bottom of the coop is two feet wide and two feet deep. It can be made easily from dry-goods boxes or other available material.

**Screen Front of Coop.**

If it is desired to make it stationary it may be made so very easily by simply nailing fast the top, back, and slats in front and placing it on a removable bottom. A wire-screen door (one-inch mesh or smaller) of some sort should be provided to place over the front at night. This will prevent rats and other enemies from entering the coop and killing the chickens, and

"A" Shaped Brood Coop for Hen and Chicks.

will also keep the little chicks confined early in the morning, when the grass is wet. Put a hook or clasp on the door to hold it firmly in place.

The mother hen should be confined to the brood coop until the chicks are weaned. This gives the little chicks a better start in life and prevents loss from storms and hawks.

**Clean Brood Coop Weekly.**

Clean the brood coop at least once a week, and keep it free from mites. If mites are found in the coop, it should be thoroughly cleaned and sprayed with kerosene oil or crude petroleum. Spread from one to two inches of sand or dry dirt or a thin layer of straw or fine hay on the floor of the coop for a covering and move brood coops weekly to fresh ground, preferably where there is new grass. Shade is very essential in rearing chickens, especially during warm weather; therefore, place the coops in the shade whenever possible. A cornfield makes fine range for young chickens, as they catch many bugs and worms, and have fresh ground to run on most of the time because of the cultivation of the ground, and have abundant shade at the same time.

**INCREASING YIELD OF COWS**

Foreign Competition Can Be Eliminated by Better Breeding, Right Feed and Care.

Better breeding, the right kind and amount of feed and good care are the only ways the production of our dairy cows can be increased. When this is done, foreign countries flooding our markets with their butter will have to look elsewhere for customers.

**Number of Eggs to Set.**

Fifteen eggs are enough for any hen to cover, and during very cold weather or with very small hens, better results will often be secured if no more than 11 or 13 eggs are allowed to each one.

**The Barn.**

The dairy barn with a lot of expensive fixtures is not absolute necessary.

## News Items of Local Interest

Five Kendrick sports took in the prize fight at Lewiston last Monday night. George Carlson furnished the transportation. The fight went for twelve rounds, Bronson getting the decision. Those who attended from here are: A. E. Wilcox, R. D. Newton, Tom Long, Louie Pearson and George Carlson.

The rock crusher for the Kendrick highway district arrived Wednesday and was unloaded from the car in the afternoon. The commissioners expect to begin using it next month.

A. Wilcox left for Spokane Wednesday afternoon to attend the Elk's convention.

Miss Gladys McCrea and a girl friend, who are attending the University at Moscow, spent the week end at the Highlands, the guest of Mr. and Mrs. W. M. McCrea. Miss Gladys is Mr. McCrea's niece.

G. Hogrege of Leland went to Moscow, Tuesday, to bring his wife home from the hospital. Mrs. Hogrege underwent an operation about two weeks ago and her friends will be pleased to learn that she is recovering nicely.

Manager Wilcox has secured a game of baseball with a Lewiston team, to be played on the local diamond Memorial day.

The only way to clear your conscience is to pay that subscription to the Gazette in a-d-v-a-n-c-e.

Mrs. William Cox, accompanied by her son, Ed Kent returned from Tacoma the first of the week where she has been visiting at the Kent home. The trip was made in Mr. Kent's car. Mrs. Cox said that she wouldn't give as much of American ridge as she could see from her own door step, for all of the country she passed through on her trip.

Seven teams were working on the Wandcheer gulch grade last week hauling gravel from the new rock crusher to put on the upper end of the grade. J. M. Woodward, secretary of the Potlatch highway district said that the new crusher turned out a load of gravel every nine minutes and that the seven teams were not able to handle the output of the machine. The district expects to spend \$1500 on the upper end of the grade which, it is believed, will surface a mile or more of road.

Miss Betty Brachett and Hazel Longteig, former teachers of Southwick, went through Kendrick, enroute to Lewiston last Friday after closing a successful term of school there. Last Saturday morning, Hazel Longteig left Lewiston for Pomeroy, Wash., where she will visit relatives. Betty Brachett departed from Lewiston Saturday noon for Seattle where she will spend most of her summer vacation visiting friends there.

Mr. and Mrs. Harry Hupp and little daughter returned Monday to their home on Little Bear ridge after visiting Mrs. Hupp's parents at Sandpoint.

Because of unfavorable weather conditions last Sunday the Kendrick Kids did not go to Troy as scheduled. The game was postponed.

It is said that the raising of mushrooms in beer vats is becoming such an important industry that growers are calling for tariff protection.

Gilbert Riley and Carl Stanton, who pleaded guilty to the charge of malicious mischief at Moscow, last week, were sentenced Friday by Probate Judge Nelson to 15 days in the county jail and to pay a fine of \$25.00.

Lester Crocker purchased Will Behren's Chevrolet car last week. Lester is going to convert it into a fishing smack. It will no doubt see hard service as soon as the fishing season is open.

The near-cloudburst here Saturday evening did considerable damage to the Brady gulch grade. N. Brocke, road overseer, had just finished working the grade and it was in better shape than it has ever been. The heavy rain washed the grade badly in a number of places and damaged it to such an extent that it had to be closed the first of the week while repairs were made. The highway district is having an unusually heavy expense this year on account of high water and so much rainfall.

Mr. and Mrs. George Leith and daughter, Clarice, Mr. and Mrs. MacPherson and son, Donald, and Miss Lowery drove to Lewiston, Sunday, to spend the afternoon.

The Kendrick baseball team will go to Orofino next Sunday to play a return game. A number of Kendrick rooters have signified their intention of accompanying the team. Orofino sent a goodly delegation here last Sunday, considering the unfavorable state of the weather.

Rev. Mitchell of Moscow will preach in Kendrick at the Grand Theatre, Sunday, June 5.

Old bookkeeper to the youngster just starting in: "Now, Willie, there are three things you mustn't do in this bank—no matter what else you may get into, you'll be safe

as long as you watch those three things. Never send an overdraft notice to the wife of the president; always say 'sir' to the assistant cashier and don't try to flirt with the vice-president's stenographer."

Will Stump of Southwick, agent for the Equitable Life Insurance Co., was transacting business in Kendrick the first of the week.

M. B. McConnell was in Lewiston last Saturday on business.

Mrs. Kate Kelly, who has been teaching at Summit, Idaho, returned Saturday, having finished her school term. She will spend the summer with her brother, John Reid.

Sampson Snyder of Orofino drove over Sunday to see the ball game and to visit his daughter, Mrs. I. R. Morrison.

Dan Guy returned from a business trip to Grangeville, Sunday. He was there Saturday when the town was flooded and has several pictures showing the effect of the cloudburst which happened Saturday afternoon.

Frank Bencoter returned Monday afternoon from a visit at Clarkston.

Walter Housley was sworn in Monday as town marshal. Charles Chandler will assist him with the work until he "gets on to the ropes."

Ed. Riggan is busy this week putting a concrete reservoir in the cemetery. It will be used for irrigation purposes. The cemetery has been fenced this spring, Charles Kiggle having charge of the work.

Martin Thomas killed a rattlesnake up Potlatch creek Tuesday of this week. He said it was the largest one he ever saw in this part of the country. It had seven rattles and was as large around as a man's arm.

A Chicago judge recently sentenced two alleged pickpockets to attend church regularly for six consecutive months. Hard hearted judge.

Walter Dagget of Lewiston was transacting business on the Potlatch this week.

Dean Wright of Agatha was transacting business in Kendrick Thursday.

The boys and girls who read the Kendrick Hardware Company's ad in this issue of the paper won't get much sleep until after the fishing season opens next week. It's bad enough for them to wait for a chance to fish without offering special incentives to fish.

Mr. Erickson of the Hotel Kendrick, returned Thursday morning from a business trip to Reubens.

Eyes tested, glasses fitted at Guy Hotel, Kendrick, May 30. Dr. E. A. Schilling. 21-1t

Coming—Dr. Schilling, one day, Monday, May 30, Guy Hotel. 21-1t

Find out what is the matter with you. Correct eye service. Dr. E. A. Schilling. 21-1t

Fred Braden and S. P. Callison drove to Moscow, Wednesday, on business.

Miss Manila Hanson, who has been teaching the past year at Rupert, Idaho, returned home Wednesday. She was accompanied by Miss Ruby Sullivan who was also a teacher in the Rupert schools.

Mrs. Lathrope of Clarkston spent Thursday in Kendrick with her son, Leo Raaberg.

Miss Zelma Dahlgren of Cheney and Mr. Orval W. Miller of Cheney, Wash., were married at Lewiston, Wednesday of this week.

Ed Long went to Moscow the first of the week with his big truck and brought back Mr. and Mrs. Lloyd Stanton's household goods.

Ernest Randall of Orofino was in town a short time, Thursday morning on his way to the Teakean country where he has charge of a sawmill which is being operated under the direction of the bank of Orofino.

Charles Riggall reports ripe strawberries in his patch in the lower end of town. He set out the plants this spring and says that he counted 72 berries and blossoms on one plant the first of the week.

Moscow won the ball game at Juliaetta last Sunday by a score of 3 to 1. Those who saw the game said it was a good one.

### About Digestion

It is claimed that only half as much food is required when it is thoroughly masticated. Digestion begins in the mouth and thorough mastication of the food is of the greatest importance. When needed take Chamberlain's Tablets to strengthen the digestion and insure a regular movement of the bowels.

### Dog Loyalty

That loyalty, burning bright and true to the last spark of life, that unfailing welcome on which a man can count more surely than on any human love—indeed, there is no secret to a man's love for a dog, however we may wonder at the dog's love for the man.—R. P. Utter in the Century Magazine.

### TO PRODUCE BETTER BUTTER

First-Class Article Can Never Be Manufactured From Poor Material—Cream Must Improve.

The time is rapidly approaching when producers of cream will have to get this product to market in better condition. First-class butter never has and never will be produced from poor raw material. Such products are a burden to the industry.

### Roughage Alone Not Enough.

The cow cannot give a large milk flow on roughage alone. Get a good grain mixture to balance the roughage and feed it according to the milk the cow produces.

## LOOK OUT!

Only 5 days until open season for fishing. The high water we have had makes us safe in predicting the best fishing in years.

To show you we are in earnest—we will give, absolutely free, to the boy or girl under 12 years of age who catches and brings to our store the largest trout, a No. 340 nickle plated fishing reel.

We will also give to the person over 12 years of age who catches and brings to our store the largest trout, a Patent Fly Book with two pockets and four parchment leaves with spring attachment, that will hold four dozen fly hooks.

All persons desiring to enter this contest must have their fish at our store by 4:30 p. m., June 1, 1921, as the prizes will be awarded to the winners promptly at 5 p. m., June 1, 1921. This is open to men and women. G-o-t-o-i-t.

No streams-closed to fishing in this vicinity.

### Pennsylvania Vacuum Cup Tires

Built to satisfy you they do stand up. Sold at a lower price than ever and an inner tube free with each casing, making you the best investment for your money we know of.
