

## LATAH COUNTY NEWS PARAGRAPHS

### Clipped From The Columns of Neighboring Papers.

**Juliaetta Record:** W. H. Mahon of the Juliaetta cannery, was in town a few days this week. He states that it is not likely that he will open the cannery here this year as he has no orders booked ahead for canned fruit and unless he gets some orders he will not start the plant. Some of last year's output, he says, remain unsold yet. Mr. Mahon devoted about 16 acres to potatoes this year near Fort Lapwai where he has usually been putting in tomatoes for the cannery here. He has a good crop of potatoes and expect to dig them in a short time.

**Genesee News:** Last Thursday afternoon when returning from work, Charles Benesch, a young surveyor employed in the Genesee Highway district, was the victim of a severe accident, which might have easily proved a great deal more serious than it was.

A steel rod some six feet long, a part of the surveying equipment, was strapped to the side of the automobile, driven by L. D. House, local engineer in charge of the work. The rod became loosed at one end and in making the sharp turn at the foot of Paradise mountain, about seven miles north of Genesee, it slipped from the running board to the ground, veered around and struck Mr. Benesch in the right armpit, passing through the shoulder just below the collarbone.

Mr. Benesch was brought to Genesee where first aid was given by Dr. Rouse and he was taken to a Lewiston hospital for further treatment. He is doing fine and is able to be about the streets.

That the injury was not more serious is almost a miracle as had it pierced any of the large arteries in the shoulder it might have proven fatal.

**Troy News:** On Tuesday Sheriff Woody phoned here to hold Halvor Erickson, who had been around town during the past week, the charge being that he had robbed a farmer named Henderson, who lives near Joel, of \$40. Erickson, who is an inoffensive old man, believed to be mentally unbalanced because of a severe blow on his head received some years ago, drifted up to Joel on Sunday where his victim took him into his home and the robbery was reported to the Sheriff's office on Tuesday. Erickson has been in and about Troy for a long time and has not been known to commit any offense of this kind before. It is believed here that his mental condition is such that he cannot be held responsible for the theft.

### Hotel in New Hands

J. A. McGhie and daughter of Grangeville, Idaho, arrived in Kendrick on Saturday of last week and are now actively engaged in the operation of their hotel and dining room. In addition to the hotel business, he will also engage in the cattle business, buying and shipping stock from this locality.

Mr. and Mrs. Guy will leave about August 1st for Grangeville where they expect to locate permanently if the altitude and climatic conditions agree with Mr. Guy. The Guy family came to Kendrick eight years ago from Enid, Oklahoma, Mr. Guy being interested in the real estate business at that place. Mr. Guy has owned several pieces of property in this section but the transfer of the hotel building to Mr. McGhie severs his connection with Kendrick as a property owner. Friends and acquaintances in this district wish the family success in their future ventures and trust that they will locate in a place conducive to the health of Mr. Guy.

### Back To The Old Home

The following article was taken from the Weedville, Pennsylvania, Daily Press:

Yesterday afternoon the Daily Press office was honored by a visit of a man beyond the allotted "four-score and ten," but who still retains every faculty and has the bearing of a man of half his age. It was Mr. David Kunes, just returned from Linden, Idaho, who thus honored us, and we cannot forbear to say a few words about the gentleman and his remarkable preservation.

Mr. Kunes is a native of Weedville, this County, where he lived until 1878, when he sold out and drifted into Idaho, then on the edge of civilization. There he invested in a ranch and followed farming and lumbering for the past forty-two years.

He is eighty-eight years of age at present, and boasts that he has lived thru twenty-two Presidential administrations.

Despite his age, Mr. Kunes retains a sharp, clear eye, has an extraordinary memory, and is loaded with anecdotes and personal observations which he loves to relate. Especially is this the case with matters relating to the earlier days of Elk County, and to hear him talk is music to the ear of the lover of local history.

The late war claimed one of the grand sons of the venerable man, and he sold his holdings in Idaho to come back to his former home; the call of old Elk became too strong to pass it by unheeded, and this, together with the hope of being at Weedville when the body of his martyred grand son hero should arrive from France, caused him to return.

It was a great pleasure to meet Mr. Kunes, and we wish him many more years of health and life to spend among the scenes of his former happiness.

### Got Bad Fall

John Heffron of Juliaetta received a bad fall last Monday evening while working on the William Cox place on American Ridge. Mr. Heffron was helping with the hay baling and, at the time of his fall, was standing on the derrick table about five feet from the ground. No one actually saw him fall but it is supposed that a forkfull of hay came up on the derrick and that he was either swept off by its movement or lost his balance in side-stepping its thrust. He struck on his side upon a tightly stretched cable and also hit his head upon a wheel of the baling rig.

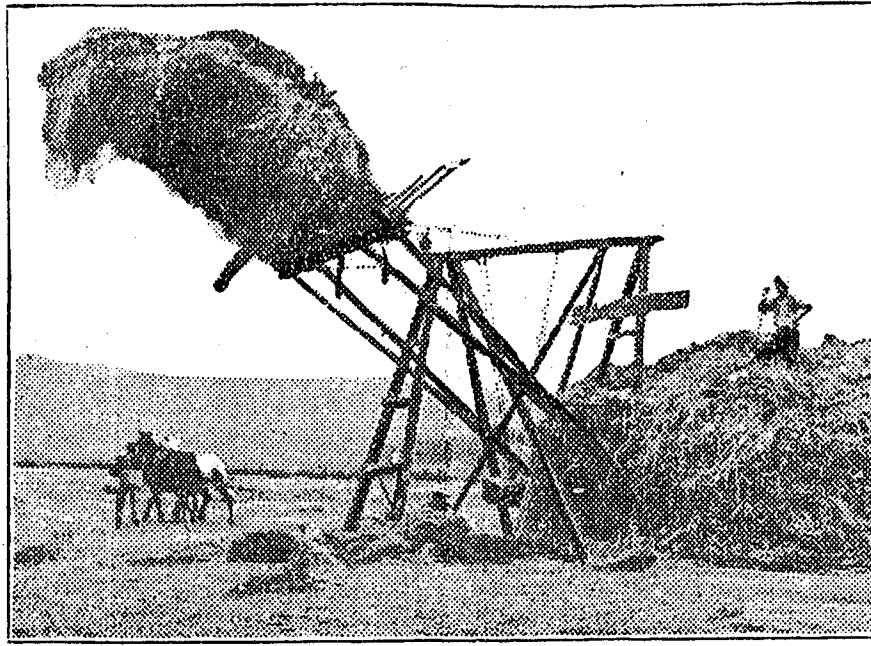

His injuries are not serious but they are severe enough to make him uncomfortable and cause sleepless nights. He is not quite as "kittenish" as he once was and the fall he had, considering the manner in which it was received, was sufficient to temporarily incapacitate a man of half his years. He has many friends in Kendrick who regret his accident and hope that his recovery will be speedy.

### May Locate Here

C. B. Kinzer, who formerly conducted a jewelry business in Juliaetta, returned to this country from Florida this week. He has always had a tender spot in his heart for the Potlatch country and it is understood that he turned down a very good proposition in Florida in order to return to a better locality.

He has not made any definite statement regarding his future plans but it is supposed that he is considering the opening of a watch-repairing and jewelry establishment in Kendrick. On several occasions in the past he has spoken of such a move and awaited only an opportune time for such action. The installation of a combination jewelry and watch business in Kendrick is a sound business proposition and one that would be beneficial to both the owner of the business and the prospective customers in the surrounding territory.

### USE LABOR TO BEST ADVANTAGE

The Stacker is a Modern Implement Utilizing Horse Labor for Putting the Hay on the Stack.

### Work on Water System

Owing to a little trouble affecting the main leading from the Bear ridge spring, the town has been required to do some improving to that end of the water system. An excessive and uncontrolled amount of sprinkling on last Tuesday suddenly bereft the residents of water on schoolhouse hill and this little act of Providence caused loud wailing from that section of town.

These coincident acts on the part of nature in general brought quick action on the part of the council and immediate steps to alleviate the condition were taken. The water commissioner, with his deputy, made the rounds of the town and notified all consumers of municipal water to stop the sprinkling of lawns, gardens and streets until further notice, or until the shortage ceases to exist. The supply for the sprinkler wagon will be obtained from the N. P. as heretofore.

Work on the Bear Ridge spring was done on Wednesday morning and the system is again working smoothly with every spring delivering its best flow.

An enormous amount of water is used by patrons of the water system and, in order to insure an adequate supply for fire protection at all times, it is possible that restrictions regarding the use of irrigation water will be imposed during the summer months. Strict compliance with any such regulations issued by those in authority will expedite the most successful operation of our water system. Because of the unequal geographical position to the tributary ridges, the town is blessed with a water supply of which our neighboring towns and cities may well be envious. Hearty co-operation of the townspeople will maintain the high repute for fine water which the municipality now enjoys.

### Soldier's Body Sent Home

Mr. and Mrs. W. F. Taylor of Juliaetta are in receipt of a telegram from the war department stating that the body of their son, Private Ray B. Taylor, of Company K, 362, of the 91st division will arrive at Hoboken, New Jersey, soon. The body will be shipped to Juliaetta and funeral services will be held there, but the remains will be laid to rest in the Moscow cemetery. Ray was a noble hearted boy, loved by all who knew him. He gave his life for his country in the attack on Gesnes, September 29, 1918. Mr. and Mrs. Taylor had four sons in the service of their country, Ray being the third in age.

### New Section Boss

Charles Clark of Portland, Oregon arrived in Kendrick on Thursday and will assume his duties as section foreman at this place today. Mr. Clark has been employed by the Southern Pacific and the Camas Prairie Railroads for several years.

### Seventy-Seventh Birthday

H. P. Hull entertained a few of Kendrick's old-times at dinner last Monday to celebrate his birthday anniversary. Mr. Hull has good reason to remember the date, July 18, 1844, because it was from this date that history, insofar as he is vitally concerned, is dated. The mature age of seventy-seven does not seem to rest heavily upon him, however, and the old law regarding the three-score and ten years allotted man in general, does not seem to affect his case in particular. His assembled guests were all of the opinion and expressed the wish that he would live enough more years to see his fondest hopes realized.

He speaks with astonishing accuracy concerning "the flood" and it requires the Kendrick old-timer to translate these references so that they will refer to a damp spell experienced by this town a decade or so back and not the general deluge of Noah's time. He has seen the village tried sorely by both fire and flood and been "dead broke" himself three times for reason of these calamities. Mr. Hull came to Kendrick in 1891 and has often said that the idea of locating here for thirty years was far from his line of thought when he arrived.

Among those seated at his birthday dinner were: Dr. W. A. Rothwell, L. J. Herres, E. P. Atchison, Mrs. Andrew Hill and Mr. and Mrs. N. B. Long. Many others called during the day to congratulate him upon his arrival at the seventy-seventh milestone.

### Langdon's Entertain

Mr. and Mrs. Earl Langdon of Crescent were the hosts at a dinner given at their home in honor of a group of World War Veterans of this section. The five young men, who were the guests of honor, happened to be in the same transport when they left the States for France and have many things in common with regard to their war experiences. They spent the day in talking over the interesting happenings of their service together in the army and lived most of their harrowing experiences over again.

Those present were: Clarence Morey and Eddie Galloway of Bear Ridge; George Carr of Deary and Bryan Deabold of American Ridge. Mrs. M. A. Deabold assisted the hostess at the dinner.

### Cameron News

Rev. Rein, the New Lutheran minister of California, will arrive about the middle of the week and will be ordained, Sunday.

August Brammar, Arthur Wegner, Martha Meyer and Wanda Brunstiek, were Lewiston visitors Sunday.

The Mielke-Ehler machine will start threshing the first of the week.

Mrs. Brunstiek, who has been on the sick list, is slowly improving.

### Band Progressing

At the regular rehearsal of the Kendrick band on last Monday evening, a good attendance was present in spite of the sultry condition of the weather and the director was so well pleased with the performance of his proteges that he was moved to congratulate them on several occasions during the practice. Several of the spectators who congregated to hear "brass" music also admitted freely that few of their number could do as well themselves. The rehearsal was, indeed, all that could be expected and a little bit more.

The new instruments arrived from Portland and were used for the first time that evening. The more experienced musicians of the organization say that the horns and drums are about the best they have heard and worth all that was put into them. Others will be added as talent to play them materializes and a thirty piece band will be a permanent organization of the town within the year.

The members of the Kendrick Band, with the instruments they play, are as follows:

Cornets: Walter Thomas, director; R. D. Newton, Dan Jones, John Brocke, Leo Grau; Piccolo: Harold Thomas; Clarinets: Jesse Kolleburn, Elmer Sackett; Altos: Marvin Long, Leo Raaberg, Sylvester Stevens; Trombones: Adolph Wegher, Lester Crocker, Pete Besncoter, O. E. MacPherson; Baritones: A. K. Carlson, F. E. Erickson; Tuba: N. E. Walker, H. W. Mort; Bass drum: A. V. Dunkle; Snare drum: Aaron McCreey, Percy Ware.

Other members of the organization who have signed the constitution and by-laws and have signified the intention of playing with the band are: Fred Hecht, F. B. Smith and R. B. Knepper.

Lester Crocker was appointed by President Mort to act as librarian of the Band and will take charge of the music and other band paraphernalia at once.

Each member is assessed one dollar per month to defray the expenses of the director and to buy additional music as it becomes necessary. The prize money acquired by the boys as winners in the Calthumpian Parade at the Fourth of July celebration swelled the treasury a little and the organization is now on a firm footing from both musical and financial standpoints.

### Trains Change Sunday

Official notice regarding the change in the schedule of trains passing through Kendrick was received by A. E. Wilcox, local N. P. agent yesterday. The morning train from Lewiston will arrive at 9:02 a. m., three minutes earlier than formerly. The afternoon train from Spokane will pass the train from Lewiston in the Kendrick yards at 1:23 p. m., and arrive at Lewiston about forty-five minutes earlier than on the old schedule. The evening train from Spokane will be due in Kendrick at 9:05 p. m. as before. The change in schedule will take effect on Sunday, July 24th.

### Hand Caught in Mower

Hard luck seems to follow closely in the wake of little Quentin Perryman. Last spring he had a nerve wracking experience with the wringer on the family washing-machine and mutilated the fingers of one hand. The little fellow has just about recovered fully from the effects of the first accident of his babyhood and the scars are gradually disappearing.

On Wednesday, while playing in the yard at his home, his right hand was caught in the revolving blades of the lawn mower and the end of the middle finger of the hand cut off. He received immediate medical attention and, aside from the pain necessarily present in such a wound, he is as happy as he ever was.

## PLAN TO IMPROVE JULIAETTA ROAD

### Will Surface Rough Stretch of Road With Clay.

There are few travellers who make use of the highways in this country who do not have a particularly "rotten" stretch of road in mind. Each of course will claim that his pet atrocity is absolutely the worst and, in the matter of needed improvement, supersedes all other stretches brought to attention. We must admit that each person is entitled to his opinion and, also, that there is room for a thousand opinions with regard to our present dirt roads.

One piece of road near our fair city has reached the superlative degree of horrible condition and several have ventured their opinion concerning this particular half mile in terms unprintable. Several of them are of the opinion, at least, that the condition is miserable and, since misery loves companionship, they have banded themselves together for concerted action. Some of them are willing to give up twenty-five dollars of the coin of this realm to see action; other are not quite that enthusiastic but are willing to help.

The half mile of road in question is the boulder-strewn stretch between the Hamil and Powell grades in the Juliaetta road and the plan of action is to cover its beautiful rocky foundation with good clay. If the promoters of the plan are able to complete their work, a modest little purse will be raised and the actual labor begin at once. The highway commissioners estimate that about two hundred dollars will do the entire job in double quick time. It is planned to put the big caterpillar with its three trailers on the work and haul clay from the West end of Powell Grade. Powder will be used to loosen the clay and other efficient methods used in the handling of the material. The clay is of the best to be found and its removal will be one more step toward the completion of the half-finished construction around the grade on the new survey. An immense amount can be hauled by the caterpillar so the work should proceed with smoothness and dispatch.

The men most interested in the improvement realize that we are drawing a continually increasing amount of business from down the canyon and every facility offered to aid in the transportation of these new customers is money spent at home. It each business man of this town will think for one minute about this project, he will see that his own particular business will profit directly from the improvement. Weigh the evidence carefully and be ready to boost the movement along when it reaches you.

### Southwick News

George Baker and family left Tuesday afternoon for Oregon, where they aim to make their home in the near future.

N. L. Smith is building an addition to Mrs. Locke's house, for Ben McCoy. The two families will live together in the future.

The Southwick people are spending a good deal of time in the mountains these days picking huckleberries.

A crowd of Southwick's young people attended the Camp meeting near Teakean, Monday night.

Mrs. Gus Ziemann has been quite sick for the last few days.

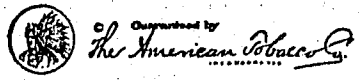

The Sale at George Baker's, Saturday, was well attended.

The Kendrick Warehouse & Milling Company received a carload of sacks this week.

The Rev. Henry T. Greene of Lewiston was a Kendrick visitor Tuesday.

**LUCKY STRIKE CIGARETTE**

Subscription \$1.50 a year.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

The man who is ever suspicious of others and ever ready to say ill of other men can not be happy. The seed that is sown is the seed that will be harvested. You can't have friends if you spend your time making enemies.

**WHEN ADVERTISING STOPS**

Do you remember Pearlline?

Once it was the most popular washing powder in America. In 1907 Pearlline ceased advertising.

Its owner said that advertising was no longer necessary, that Pearlline was a good product and everybody knew it.

In 1914 the Proctor & Gamble company bought Pearlline at their own figure to save it from bankruptcy. They renamed the formula and have sold millions of dollars' worth of it since by advertising.

In seven years the public forgot Pearlline, and it dwindled from millions to nothing.

Pears Soap once tried the same experiment; noting the alarming slump in sales in six months they resumed their advertising and did not bust.

If people did not die, if people did not move, if new generations did not grow up, if customs and habits did not change, if competition did not compete, if people were not open to suggestion and receptive to new ideas, there would be no need of advertising, and when a business was once built up it would stay put. But until then advertising is the surest safeguard for the established product, the most certain hope for the new idea.—Ex.

Jones—"They say that paper can be used effectively in keeping a person warm."

Smith—"That's true. I remember a thirty-day note of mine once kept me in a sweat for a month"—Boston Transcript.

**METHODIST CHURCH.**

Howard W. Mort, Pastor.

Are you keeping cool? It will be your own fault if you don't keep cool this afternoon for the ladies of the Methodist church are serving nice cream in the basement of the church, the coolest place in town. Drop in and get a dish.

Sunday school at 10 a. m.  
Morning Worship at 11 a. m.  
Epworth League at 7:15 p. m.  
Evening song service and worship at 8 p. m.

We invite you to all the services of the church. The fourth Quarterly conference will be held on Wednesday evening, July 27th at the church.

American Ridge—Sunday school at 10 a. m. No morning service.

**Big Bear Ridge**

Miss Adeline Hupp of Little Bear Ridge was visiting at the home of her sister, Mrs. K. L. Ingle, last week.

Mrs. W. A. Pearson, returned to her home in Pomeroy, Wash., Sunday, having visited her daughter, Mrs. A. N. Rognstad.

Mrs. D. White of Juliaetta is spending the week with her parents, Mr. and Mrs. John Mathes.

Mr. and Mrs. Fred Black and son, Master Clifford, of Moscow, were week end visitors at the Rognstad and Hooker homes.

Mr. and Mrs. George Slind and son and Miss Claribel Ingle, autoed up from Clarkston, to spend the week end with relatives here.

Mrs. H. Larson and two sons arrived here Wednesday from Grand Forks, N. D., for a visit with her father, A. J. Aas and other relatives here.

The Lutheran Ladies wish to express their thanks and appreciation to everyone, who helped to make their sale and ice cream social a decided success. The proceeds of the sale was \$61.30, while \$26.75 was realized from the cream and cake sale. This ridge is second to none when it comes to generosity, or in helping in various good causes.

Ingvald Aas of Culesaq spent Saturday and Sunday here.

Mr. and Mrs. James S. Nelson and children of Clarkston, Wash., are visiting at the home of Mrs. Nelson's sister, Mrs. D. Stevens and with friends here.

Mr. and Mrs. Fred Buff and children of Moscow were recent visitors at the home of their cousins, K. D. and Leon Ingle.

A general farmers meeting was held at the Taney school house, Monday evening, for the purpose of adopting a wage scale for the coming harvest. A large number were present.

Mr. and Mrs. Byron Tupper and children spend Sunday with Mrs. Tupper's sister, Mrs. N. E. Ware.

Mrs. Ed Halseth and children returned home Sunday from a two weeks' visit at the Pete Halseth home near Deary.

Mrs. Horace Comstock and children arrived here from Troy last week to remain during the summer.

Mr. and Mrs. Perry Carter of Moscow spent Sunday with Mrs. Carter's aunt, Mrs. Ida Comstock.

A. Hooker is spending the week in Spokane.

Haying is now almost over, and the cutting of winter wheat began the first of the week.

Preaching services at the Lutheran church, Sunday, July 4th, at 3:30 p. m.

Mr. and Mrs. Frank Ware and children of Spokane are spending the week at the N. E. Ware home.

**ST. MARK'S CHURCH**

Rev. H. H. Mitchell, rector of St. Mark's Church of Moscow will be in Kendrick on Sunday, July 24, and will hold service at 8 p. m. in the Presbyterian church.

While the government of the church differs in some ways from that of other bodies, yet the message which the church has to give is the Gospel message. Everyone is invited to come and will be welcomed.

**INCREASED AVERAGE OF PUREBRED SIRES**

Progress in "Better Sires—Better Stock" Campaign.

Altogether 431,139 Head of Domestic Animals and Fowls Have Been Enrolled by Owners—Greatest Activity in Ohio.

(Prepared by the United States Department of Agriculture.)

A noticeable increase in the number of purebred animals listed in the "Better Sires—Better Stock" campaign is the principal development during the first three months of 1921. The result has been to raise the general average of purebreds for the whole campaign 1 1/2 per cent. Altogether 431-

139 head of domestic animals and fowls have been enrolled by their owners.

Of that number 22,605 are purebred sires and the remainder are females of various breeding, but all were bred

The Use of Scrub Animals on Any Farm Is an Expensive Practice.

to purebred males, according to the owners' pledges. Although the number of purebreds, as noted, increased noticeably, more scrubs also were listed than in any previous quarterly period, thus helping to accomplish one of the main objects of the campaign, which is to grade up inferior animals by the use of good purebred sires.

The greatest activity during the current year, so far as enrollments are concerned, has occurred in Ohio, with Nebraska second. In justice to other states it may be added that several, from which only a few pledges to use only purebred sires were received, have been active in other branches of the work, particularly in the procurement and distribution of purebred sires of good quality. Kentucky and numerous other states, including West Virginia, Minnesota, Wisconsin and Virginia, are launching aggressive drives against inferior sires, particularly scrub bulls.

A feature of interest during the first quarterly period of 1921 was the dispatch of five emblems of recognition to far-off Guam, our island outpost in the Pacific, thousands of miles beyond Hawaii.

**PRESERVING SOIL MOISTURE**

Pernicious Practice of Permitting Water to Escape From Soil Should Be Discouraged.

The practice that prevails in some irrigation localities of letting the natural moisture escape from the soil, with the idea that more water can be applied when it is needed, is most pernicious and should be discouraged, say specialists of the United States Department of Agriculture. If the moisture that gets into the ground in the form of precipitation or as irrigation water is retained by the soil it will enable the soil organisms to act upon the plant foods, rendering them available for plant growth. There is a feeling of safety in having an unlimited supply of water for irrigation purposes, but it should be remembered that irrigation costs money and labor; precipitation is nature's gift.

**PERSONAL VISIT TO MARKET**

Grower Enabled to Acquaint Himself With Distributors and Improve Marketing Practices.

Many times a personal visit to the market will more than repay the shipper for the cost of the trip, says the United States Department of Agriculture. Points that seem trivial to the producer often are very important to the dealer. Such a visit enables the grower to acquaint himself personally with the distributors, to select trustworthy representatives, to learn the difficulties of the "man at the other end," and to improve his marketing practices.

Out of Order. "That motion is out of order," said the chairman of a political meeting as he saw a rowdy raising his arm to throw an egg.—Pearson's Weekly.

**Chamberlain's Colic and Diarrhoea**

This remedy is certain to be needed in many homes before the summer is over. Buy it now and be prepared. It is recognized as a most reliable remedy for bowel complaints and may be obtained at any drug store.

**Announcement**

We have recently purchased the Kendrick Furniture Company's stock of Crockery, and can now fill your orders for most all sizes of stone jars.

We have in stock at present, the following sizes of stone jars, 1/2's, 2's, 3's, 4's and 20 gallon jars, also jugs and 1/2 and 1 gallon crocks.

We are showing a splendid assortment of glass ware consisting of Water and Berry Sets, Cream and Sugar, Vinegar jugs and Pickle trays, also a complete line of plain white dishes.

Set of six heavy water glasses. **50c.**

Mrs. Linda Harrod Endorses Chamberlain's Tablets.

"I suffered for years with stomach trouble and tried everything I heard of but the only relief I got was temporary until last spring I saw Chamberlain's Tablets advertised and procured a bottle of them from our druggist. I got immediate relief from that dreadful heaviness and pain in the stomach after eating. Since taking two bottles I can eat anything I want without distress," writes Mrs. Linda Harrod, Ft. Wayne, Ind.

**Catarrhal Deafness Cannot Be Cured** by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrhal deafness, and that is by a constitutional remedy. Catarrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrh Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarrhal Deafness that cannot be cured by Hall's Catarrh Medicine. Circulars free. All Druggists. 75c.

**ANY DETERIORATION IS LOSS**

Sooner or Later It Must Be Replaced  
Whether Inside or Out—Wear Starts at Surface.

Any deterioration is a loss, which sooner or later must be replaced; whether of buildings inside or out, of iron or wooden structures, furniture, carriages, wagons, tractors, implements—everything. Anything with a surface needs protection. All wear and tear starts first at the surface.

**CONSERVING MANURE  
HELPS CROP YIELDS**

Efficient Method Used By Pennsylvania Farmers.

Walled Enclosures Adjacent to Stables, Often Paved With Flagstones, Save Valuable Elements Needed by Soil.

(Prepared by the United States Department of Agriculture.)

Farmers in some parts of eastern Pennsylvania, notably in Chester county, have been saving barnyard manure in walled enclosures adjacent to the stables, often paved with flagstones, for more than a century. The value of this efficiency has been shown

Filling Manure in This Manner Permits the Rain to Wash Out Its Fertilizing Elements.

In an investigation embracing the standards of management on ten farms selected by specialists of the United States Department of Agriculture in the region mentioned, and the results are embodied in Farmers' Bulletin 978, which may be had free upon application to the division of publications.

The bulletin shows that the average yield of corn for the state is 42.50 bushels an acre, while on the ten selected farms it is 85.50 bushels; the average wheat yield for the state is 18 bushels and for the ten farms 29.75; hay average for the state is 1.43 tons an acre and for the ten farms 2.65 tons; while the three farms that grew oats produced an average of 45 bushels an acre as compared with the state average of 33.10 bushels.

A survey of 378 farms in Chester county on which exceptionally high standards of management are maintained, including close attention to handling of barnyard manure, showed an average corn yield of 65.3 bushels; wheat 24.8, and oats 41.6. The comparatively high yields in Chester county, the specialists say, cannot be credited entirely to the way in which manure is handled, because the soil in that county is much better than the state's average soil, but special attention to manure and its conservation has been an outstanding feature of that county's farming.

**COST OF PRODUCTION VARIES**

Specialists Point Out Fallacy of Considering Average as Basis for Figuring.

The fact that there is a wide variation on individual farms in the cost of producing any product has been substantiated by recent cost surveys conducted by specialists of the United States Department of Agriculture. Because of this variation, the specialists point out, it is a fallacy to consider the average as representing the cost of production. For example, the average cost of wheat per bushel on the 481 farms studied by the specialists last year was \$2.51, but more than 50 percent of the farmers concerned produced wheat at a cost above this figure, ranging up to an extreme of \$8.20 per bushel. Similarly the average cost of cotton for the 842 farms studied was approximately 23 cents per pound, yet almost 60 per cent of the growers had costs above this average.

The department now gives the results of cost studies in the form of frequency tables in order to show the proportion of a product that is produced at or below a given cost and to call attention to the importance of a bulk-line cost rather than average cost in relation to price.

**DISINFECTION OF HENHOUSE**

Woodwork and Roosts Should Be Gone Over Occasionally With Some Good Lice Killer.

The roosts and nearby woodwork of the poultry house should be painted occasionally with some good liquid lice killer (which can be bought from poultry supply dealers) or with kerosene, to kill the little mites which live there during the day and at night torment the fowls.

**MAKING PROFIT WITH GEESE**

Cheap Shed Is All Shelter Necessary and Feed Need Not Be of Expensive Variety.

Almost any farmer might raise a flock of geese with profit. A cheap shed is all the shelter needed by the breeders. Even in winter they are not costly to feed, as they do well on ensilage, clover and chopped vegetables with some grain.

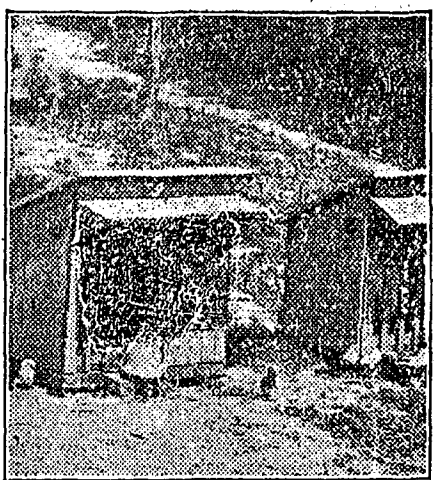

**REDUCE CHICK LOSS  
BY CONFINING HENS**

Close Coops at Night to Keep Out Rats, Cats, Etc.

When Mother Is Given Range Young Birds Are Chilled by Wet Grass and Die—They Must Be Kept Growing Constantly.

(Prepared by the United States Department of Agriculture.)

Chicks hatched during the winter should be brooded in a poultry house or shed while the outside weather conditions are unfavorable; after the weather becomes settled they should be reared in brood coops out of doors. It is best to make brood coops so that

Coops Used on Government Farm at Beltsville, Md.

they can be closed at night, to keep out cats, rats, and other animals, and enough ventilation should be allowed so that the hen and chicks will have plenty of fresh air.

The hen should be confined in the coop until the chicks are weaned, while the chicks are allowed free range after they are a few days old. Where hens are allowed free range and have to forage for feed for themselves and chicks, they often take the latter through wet grass, where they may become chilled and die. Most of the feed the chicks get by foraging goes to keep up the heat of the body, whereas feed eaten by those that are with the hen that is confined produces more rapid growth, as the chicks do not have so much exercise.

In most broods there are one or two chicks that are weaker than the others, and if the hen is allowed free range the weaker ones often get behind and out of hearing of the mother's cluck and call. In most cases this results in the loss and death of these chicks, due to becoming chilled. If the hen is confined, the weaklings can always find shelter and heat under her, and after a few days may develop into strong, healthy chicks.

The loss in young chicks due to allowing the hen free range is undoubtedly large, say poultry specialists in the United States Department of Agriculture. Chicks frequently have to be caught and put into their coops during sudden storms, as they are apt to huddle in some hole or corner where they get chilled or drowned. They must be kept growing constantly if the best results are to be obtained, as they never entirely recover from checks in their growth, even for a short period. Hens are usually left with their chicks as long as they will brood them, although some hens commence to lay before the chicks are weaned.

Help for Budding Songsters.  
A device that records the vibrations of the voice on a phonographic film has been invented by a Frenchman to aid students of singing.

## DEHORND STEER IS EASILY CONTROLLED

Insures Animal More Equal Chance at Feed Trough.

Renders Animal Less Dangerous to Attendants and Prevents Trouble in Shipping—Treat Calves When Very Young.

(Prepared by the United States Department of Agriculture.)  
Dehorning cattle makes it easier to handle the animals and insures that each one will have a more equal chance at the feed trough. It renders the animals less dangerous to attendants and prevents them from goring one another in the feed lot or in transit to market. The practice of dehorning is almost universal so far as high grade beef steers are concerned.

Animal in Dehorning Crate Ready for Operation.

It is often desirable to dehorn the heifers as well as the steers, especially when they are to be fed in troughs for a part of the year.

Calves may be dehorned when a few days old by treating the undeveloped horns with caustic soda or caustic potash, taking care that it does not wash into the eyes.

If the horns are allowed to develop, it becomes necessary to cut them off. Clippers made for the purpose may be used on the younger animals. With older cattle a saw is best, as it prevents crushing, and the friction of the blade causes the blood vessels to clot and heal quickly. The work should not be done in warm weather, as the wound may become infested with screw worms. Where there is danger of flies, a fly-repellent should be applied.

## PORK DAY IS ANNUAL EVENT

Hog Producer Witnesses Sale of His Animals and Learns Reason for Different Prices.

Pork day is one of the big annual events of Kings county, California. It comes in October usually. In this contest the farm bureau center is the unit, and every farm bureau in the contest advances one carload of hogs to be exhibited and rated by an expert judge. Every farm bureau center must have at least six consignors to the load, thus preventing any big concern from exhibiting a carload. In the contest last fall six farm bureau centers as well as a boys' pig club took part in the contest. Ten carloads were auctioned in addition to seven cars that had been in the contest.

The county agent leader says in his annual report to the United States Department of Agriculture: "There seems to be no more convincing argument to a hog producer than to see the actual sales of his animals take place and to know the difference in price paid for a superior quality animal."

Farm bureau sales of this kind were started in California in 1916 on the initiative of the county agent of Kern county. They are now becoming common in all pork-producing counties of the state. There were 175 such sales in 1920, with sales aggregating \$1,400,000.

## LOSS OF VIRGIN FERTILITY

Sufficient Quantities of Plant Food Necessary in Soils to Maintain Productiveness.

To maintain the productiveness of a soil it is necessary to preserve within the soil sufficient quantities of available plant food at least to prevent the yield from falling off after a period of cropping. Hundreds of field experiments have demonstrated that the best soils will gradually lose their virgin fertility unless more than ordinary care is given to the cropping system and the return of plant foods.

## POULTRY MANURE IS RICHEST

On Ordinary Farm Not Much Attention Is Paid to It on Account of Small Amount Made.

Poultry manure is the richest manure made on the farm, but on the ordinary farm not much attention is given it, simply because of the small amount usually made. Poultry manure is valuable chiefly for its large amounts of nitrogen and phosphoric acid, as it contains about three times as much nitrogen and five or six times as much phosphoric acid as ordinary farm manure.

## POPULAR GRAINS FOR FARM FLOCK

Corn Heads Long List Because of Abundance and Is Most Relished by Fowls.

## WHEAT REGARDED AS SAFEST

Most Satisfactory Results Obtained When Meat, Bone, Bran and Other Nitrogenous Feeds Are Also Supplied.

(Prepared by the United States Department of Agriculture.)

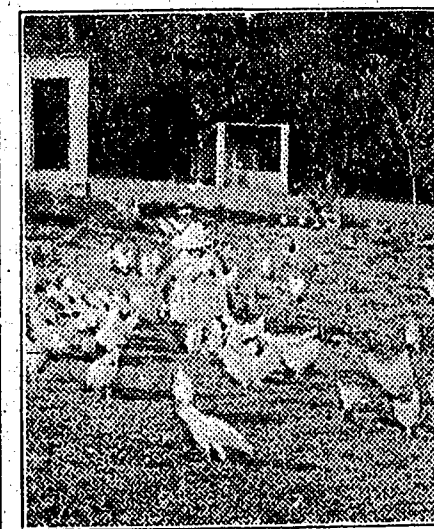

Of all grain feeds usually supplied to farm poultry, corn has been, and still is, the most popular. This probably is due to its abundance and relative cheapness, and because it is the most relished of all the grains. Corn is heating and fattening, and when fed to fowls as the only feed, fat rather than eggs is the usual result. It should be balanced with meat, bone, bran, and such feeds as are rich in nitrogenous matter, in which corn is deficient. When corn is fed to laying hens that have opportunity to take plenty of exercise and to obtain insects and green feed, more satisfactory results are likely to be obtained. It may be fed more freely during the winter than during the summer, say poultry specialists of United States Department of Agriculture.

### Wheat Is Safest.

Wheat is generally regarded as the safest grain to be fed alone. It is not quite so fattening as corn, but is too fattening when fed alone. Wheat should be supplemented by the same feeds as advised to use with corn to increase the proportion of protein. Wheat contains a little more protein than corn, about the same amount of carbohydrates, but less fat, and on the whole is considered not so valuable for fattening, but slightly better for growth. Good grades of wheat are relatively too high in price to be used freely in feeds at the present time. Wheat screenings of a good grade can frequently be purchased and fed to advantage. Of course, there is always the danger of introducing weed seeds on the farm. "Burnt wheat" seldom can be fed advantageously, the difference in price between this and good wheat being usually too slight to warrant its use.

### Oats Needed for Variety.

Oats, while not as good as corn or wheat, are necessary for variety. They contain more indigestible fiber than the other grains. Hulled oats are relished by poultry and are excel-

Hens on Free Range Are Able to Pick Up Insects and Green Feed.

lent for producing eggs, but are usually too expensive. When they can be obtained at a reasonable price in comparison with other grains they may be fed quite freely.

Barley does not seem to be relished by hens, but may be used to give variety to the grain ration. It has a little more protein than corn and a little less than oats.

Buckwheat is quite liked by fowls, but is not widely fed. It may be used to vary the ration, but is usually too high in price to be economical. Buckwheat middlings are rich in protein and make a good mixture with cornmeal.

Rye is not fed largely, and does not seem to be much relished by poultry. It is supposed to cause bowel trouble when fed freely.

## ARRANGE PLAN OF ROTATION

As Many Fields Should Be Established as There Are Years for Fairly Constant Supply.

In adopting a plan of rotation as many fields should be established as there are years in the rotation, for this gives a fairly constant supply of each crop. When a crop fails a similar crop should be substituted, as for example, oats for wheat, soy beans or cowpeas for clover. There is no other way to maintain a systematic rotation.

## RIGHT DEPTH FOR PLANTING

No General Rule Can Be Recommended as Vegetables and Soils Differ Greatly.

There is no general rule regarding the depth of planting, as different kinds of vegetables and different soils necessitate different practices. The smaller the seeds the shallower the covering should be as a rule. In heavy soils the covering should be lighter than in light soils.

## Announcement The Commercial Hotel

Formerly the Hotel Guy.

Is now taken over by J. A. McGhie and will be run on the European Plan with Dining Room in connection.

Nothing but the best will go into our kitchen and cooked liked you would have it in your own home.

Our beds are "A No. 1" and reduced to \$1.25, \$1.00, 75c and 50c.

Try us once and always after.

Farmers are especially welcome. Use our lobby for the women folks while in town.

Regular Meals 40c. Special order extra.

Leland Items

The all-day services at the church,  
Sunday, were well attended. The  
pastor preached at 11 a. m. and at  
1 p. m. a fine lunch was spread on  
the parsonage lawn, consisting of  
everything good to eat, including  
ice cream. At 3:30 p. m. Rev. Mc-  
Causland preached after which the  
4th quarterly conference was held.

Howard Whitesel of Clarkston  
was calling on friends on the ridge  
Sunday.

Last week we reported Ralph  
Smith visiting his parents, which  
was a mistake. Ralph has a good  
position in California where he ex-  
pects to work until the school opens  
again.

Little Mildred Fleshman is hav-  
ing quite a siege of tonsillitis.

Mr. and Mrs. Burt Black and sons  
arrived in Leland last week where  
they will remain for some time.  
We understand Mr. Black is to be  
separator tender on the Craig ma-  
chine.

R. M. Smith and family, Mr. and  
Mrs. R. B. Parks drove to Spokane,  
Wednesday. The above gentlemen  
are members of the school board  
here and are in Spokane to purchase  
furniture for the new school build-  
ing now being erected.

Little Wilbur Corkill was quite  
painfully hurt, Sunday, while slid-  
ing down on an upright piece of  
timber he ran a sliver in his leg  
above the knee. The doctor here  
being away he was taken to Kend-  
rick to Dr. Rothwell and had to be  
given an anaesthetic before it could  
be removed. He is getting along  
nicely now.

Mr. and Mrs. R. M. Smith enter-  
tained at lunch Sunday evening,  
Mr. and Mrs. Jesse Hoffman, Rev.  
and Mrs. Hall, Rev. C. L. McCaus-  
land and Mr. N. B. Long.

Clyde Daugherty is in Portland  
taking treatment from a specialist  
and writes that he is improving,  
which we hope will be permanent.

About forty relatives and friends  
of Thos. Daugherty gave him a sur-  
prise, Tuesday evening, it being his  
birthday. Ice cream and cake were  
served. The older people visited  
while the young people played  
games on the lawn.

Bees Cut Bark of Trees.

Some species of bees in South  
America cut the bark of the rubber  
trees in order to cause a flow of the  
sap. The gum is employed by the  
bees as a ready-made wax for their  
nests.

ONION GROWERS HAVE  
ADOPTED NEW GRADES

Standardization of Bermuda  
Industry Is Completed.

Commercial Crop of Coachella Valley,  
Cal., Is to Be Marketed on Basis  
Recommended by Department  
of Agriculture.

(Prepared by the United States Depart-  
ment of Agriculture.)

The 1921 commercial crop of Bermu-  
da onions in the Coachella valley, Cal.,  
is to be marketed on the basis of Uni-  
ted States-Bermuda onion grades, ac-  
cording to an announcement of the bu-  
reau of markets, United States Depart-  
ment of Agriculture. This completes

Working in Big Onion Field.

the standardization of practically the  
entire Bermuda onion industry in the  
United States.

United States grades for Bermuda  
onions were recommended by the De-  
partment of Agriculture in the spring  
of 1918. The same year the state of  
Texas legislated the compulsory grad-  
ing of Bermuda onions according to the  
grades promulgated by the department  
and adopted by the Texas state depart-  
ment of agriculture.

When the onion shippers in the Co-  
achella valley requested inspection ser-  
vice from the California state depart-  
ment of agriculture in 1921, the depart-  
ment indicated that it would be im-  
practicable to render such service un-  
less suitable grades were agreed upon  
as a basis for inspection. Accordingly,  
the shippers made a comprehensive  
study of onion grades and decided  
finally to use the grades recommended  
by the Department of Agriculture. Per-  
haps the most important consideration

leading to this decision was the fact  
that since the adoption of the depart-  
ment's grades in Texas there has been  
a considerable decrease in the number  
of rejected Texas onion shipments.

BETTER QUALITY OF POULTRY

Platte County (Nebr.) Farmer Lists  
Chickens, Geese and Ducks, All  
Purebred.

A noticeable feature of the "Better  
Sires" campaign conducted by the vari-  
ous states and the United States De-  
partment of Agriculture is the excel-  
lent quality of poultry kept on general  
farms. Typical of this condition is a  
statement recently received from a  
farm in Platte county, Nebraska. The  
principal live stock kept were Short-  
horn cattle and Poland China swine.  
In addition the owner listed the fol-  
lowing poultry, all of which was  
standard bred: Seventy-five Banded  
Plymouth Rocks, 75 Black Langshans,  
100 Brown Leghorns, 100 Rhode Island  
Reds, three White China geese and  
three Pekin ducks. It was noteworthy  
that, whereas the poultry was all of  
pure breeding, the swine herd includ-  
ed a number of grade females. The  
sires kept for all classes of stock were  
of pure breeding—a requirement for  
enrollment in the "Better Sires—Better  
Stock" campaign.

NEW DEVICE CLEANS GRAINS

Recently Invented Contrivance Re-  
moves Smut, Dust, Etc., at the  
Time of Threshing.

A new device known as an aspirator  
has been designed by specialists of the  
bureau of markets, United States De-  
partment of Agriculture, for cleaning  
wheat and other small grains by re-  
moving smut, dust, and dockage at the  
time of threshing. This device is at-  
tached to the grain delivery spout, and  
tests indicate that it removes approxi-  
mately one-third of what ordinarily is  
classed as dockage. The use of this  
device will enable farmers to keep for  
feed a part of the seeds and other for-  
eign material ordinarily hauled to the  
elevator and lost to the producer; it  
also improves the quality of grain by  
removing from it a large part of the  
smut, dust and objectionable foreign  
material. A reclaimer, for attachment  
to the deck of threshing machines, al-  
so designed, gives promise of being ef-  
ficient, it is said.

Care of Eyeglasses.

To prevent the annoyance caused  
by the accumulation of moisture upon  
eyeglasses when going from a cold  
into a warm atmosphere, moisten the  
tips of the fingers and rub them over  
a cake of soap, then rub lens and pol-  
ish as usual. One application daily is  
all that is necessary.

Brunswick  
PHONOGRAPHS AND RECORDS

Critical music lovers  
prefer  
The Brunswick

IT is always a certain friend, an en-  
thusiastic one, we find, who hears  
The Brunswick and then compares it.

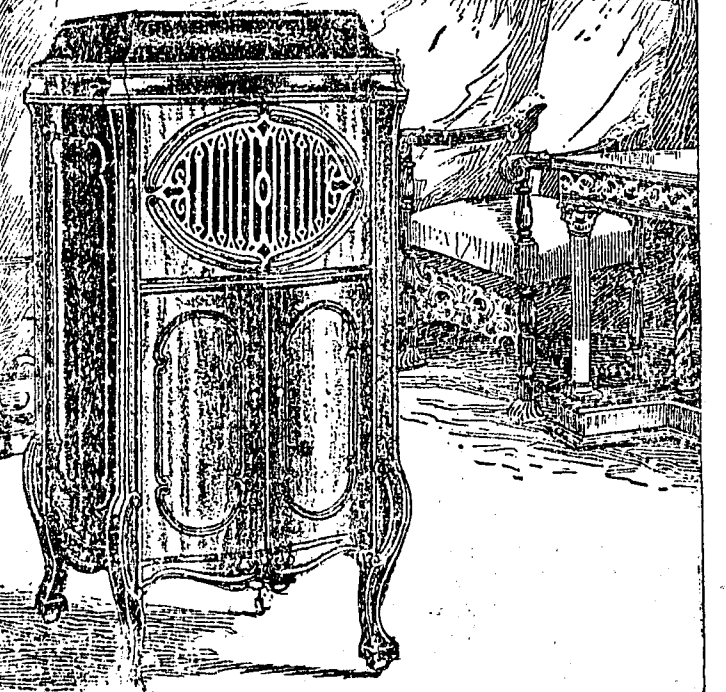

The ear is quick to appreciate its  
superior tone. The eye is quick to note  
its finer cabinet work. And the mind is  
quick to reason out why Brunswick is  
a final-type instrument in every way.

The Brunswick Method of Reproduc-  
tion has brought new standards in the  
phonographic art—better tone, truer  
tone. Tones hitherto lost are now ever-  
present.

Every hearer is convinced. That is the  
reason for the great popularity—that  
accounts for The Brunswick winning  
such headway in a field where limits  
were supposed to have been reached.

Since The Brunswick came, they all  
say "Plays all records." But just you  
find out how they do it and then inves-  
tigate the Brunswick way.

dollar up.

The Farmers Bank

"The Bank that helps you Prosper."

New Prices  
on Titan and  
International Tractors  
Now Lowest Ever Quoted

EFFECTIVE immediately, we make another big  
reduction in the prices of Titan and Interna-  
tional tractors. These reductions wipe out all former  
advances and place *Titan and International*  
tractors at the lowest prices at which they have  
ever been sold.

International 8-16  
\$900

This price is about one-fourth less  
than the price at which the 8-16 sold  
prior to March of this year. The new  
figure is the lowest at which it was ever  
sold. The new price includes all the neces-  
sary equipment—platform, fenders,  
governor, belt pulley—features which  
must be paid for extra on some tractors.

Titan 10-20  
\$900

This is the lowest price ever quoted  
on the Titan, considering the equip-  
ment now included (formerly sold  
extra). Up to March of this year the  
price was \$1,200—today it is \$900.  
At this figure the Titan 3-plow  
tractor is the best value in the farm  
power field.

The International 15-30 has been reduced to \$1,750—lower than it has  
ever been before. The man who needs a 4-plow tractor cannot find a better  
investment than the 15-30 at this price. (All prices f. o. b. Chicago.)

Considering quality, power, equipment, and the service which follows every  
machine, *Titan and International tractors at these new low prices are*  
*unquestionably the best buy in the tractor market.*

As these prices have been made regardless of manufacturing costs, we do  
not guarantee to maintain them.

These prices certainly justify the immediate purchase of a tractor. Put it at  
the horse-killing work of hot weather plowing, and your fall and winter belt work.

See our tractor dealer for full information on deliveries and terms.

Miss May Seals of La Grande, Oregon, arrived Saturday to spend a week at the home of Mr. and Mrs. Joday Long.

Mr. and Mrs. Louie Herres and children, Wayne and Eleanor, left Wednesday afternoon by auto, on a two weeks' trip to the coast. They expect to visit at Portland, Yakima, Prosser and other points, and will also camp at several of the scenic spots along the Columbia Highway.

Postoffice Inspector Fullenwider was in Kendrick Wednesday on business.

C. G. Compton and son, Chauncey, and Harry Grinolds returned Wednesday from a fishing trip to Big Island. They report a good time and plenty of fish.

Mr. and Mrs. Chas. Thornton and son, left for Genesee Wednesday morning, where they will make their home. Charlie has work on the Genesee Highway.

Mr. and Mrs. O. E. MacPherson and son, Donald, Miss Delia Bunger and Silvia Cook left late Saturday evening, in Mr. Cook's car, for the woods near Bovill in search of huckleberries, returning Sunday evening. They found that the berries were pretty well cleaned out in that section of the country, however, they succeeded in getting several gallons. Mr. and Mrs. N. E. Ware and family, Mr. and Mrs. Byron Tupper and two daughters of Clarkston and Mr. and Mrs. Frank Ware of Spokane were also in the party.

Rev. Howard W. Mort returned to Lewiston with Mr. Greene Tuesday afternoon on business returning Thursday noon.

Deputy Game Warden Brooks was in Kendrick on business Tuesday.

Mr. and Mrs. John Kite, Miss Edith Compton and George Carlson motored to Big Island on the North Fork Friday afternoon on a fishing trip, returning Sunday evening. They report a very pleasant time and good fishing.

Mrs. Howard Fenton and children are visiting with friends and relatives in Kendrick. Mrs. Fenton is employed in the payroll department of the Portland Woolen Mills at St. Johns, Oregon.

### Long Shoe Points.

At one time—in the fourteenth or fifteenth century—people wore the points of their shoes so long that they were in danger of tumbling over them when they walked. To overcome this inconvenience it became fashionable for both men and women to tie their shoe points to their knees by laces or chains.

### Linden Items

Mrs. I. T. Buckmaster, Miss Alta and C. E. Fonburg spent the week end at the Albert Fonburg home in Gulesac.
