

Over The County

Juliaetta Record: Earl Hampton, brother of Joe Hampton, of this place, died Tuesday at Genesee after an illness of several years. He came from Spokane to Genesee with his father about two weeks ago and was at the home of his brother, Arthur, when he died. Mr. Hampton was summoned to the bedside of his brother by a phone call, stating that he was in a critical condition and could not survive long. He got M. B. Pierce to take him in his car but death came about one hour before Mr. Hampton arrived. Deceased was 35 years old, had been a sufferer from asthma for the past 17 years and about two years ago contracted tuberculosis. The funeral was held Wednesday from the home of Arthur Hampton, at 3:30 p. m. and interment was made in the Genesee cemetery.

Genesee News: The different warehouses of Genesee are bulging with the big wheat crop that is being harvested and shipments are being sent out to make room for more—the Farmers' union having shipped 14 cars. It is estimated that if good weather prevails the harvest will be completed in ten days more. This is one of the earliest harvests known here and will be completed two months earlier than last year, when the continued fall rains caused so many delays.

The Farmers' union estimated that their two big elevators, holding 100,000 bushels each, bulk grain, would be full by Saturday night. The Mark P. Miller elevator with a large bulk grain capacity, it is also estimated will be filled by Saturday night.

There is also storage room in Genesee for many thousands of bushels of sacked grain in the various warehouses, which are rapidly filling.

Troy News: Saturday evening at 6 o'clock folks all over town suddenly dropped everything they had on hand and fell to wondering if the whistle up at the brick plant had got too much jazz water. It was an entirely new noise they heard, and again at eight o'clock the thing broke loose again with shrieks, sobs and wails, that sounded like a greatly accented cross between a dog howling at the moon and the last notes of a bagpipe when it is running down. The crowd discovered on investigation that it was a new siren being tried out, preparatory to installing it for a fire alarm. We'll tell the whole world it will do the business. The new musical instrument is run by electricity and if it is purchased by the council it will be operated from the telephone office.

Star-Mirror: The Moscow Cubs won from Kendrick Reds yesterday, 12 to 5. Levitt pitching for Kendrick came from the men's team of Juliaetta was knocked out of the box in the first inning and replaced by O. Eichner who finished the game. Eichner pitched a good game striking out 6. Harold Paterson of the Cubs dealt out goose eggs to Kendrick in 5 of the 9 innings and struck out 12. Two Kendrick home run hitters failed to score.

Several errors were made by both teams allowing runs to come in but the game was a very good one, both teams making several excellent plays which offset the errors. The two Eichner boys who have been playing on the Cubs team most of the summer were turned over to Kendrick and Cubs had to be used on Cubs team in their places. Ollie Hall of the Cubs played errorless ball, making three hard catches in left field which headed Kendrick out of several scares. Glen Smith Jack Mix and Ellis Anderson led in scores four, three and two respectively. Enough said about championship for boys teams.

Mrs. V. A. Randall traded her ranch below Juliaetta last week to E. Zimmerman for a residence in Lewiston. She has rented the ranch from Mr. Zimmerman and will continue to make it her place of residence.

Geo. Slind Trades For Land

Mr. J. A. Heritage and Mr. George Slind have concluded a deal whereby Mr. Slind gets the Heritage farm near Stites, Idaho, and Mr. Heritage gets property here and in Lewiston, says the Clarkston Republic. He will also assume the position occupied by Mr. Slind in the Geo. L. Ackley real estate company. Mr. Heritage was at one time connected with the Clarkston Commercial Co. and is well known by all residents of 10 and 12 years ago. Church and society circles will welcome Mr. and Mrs. Heritage back as Clarkston residents again. Mr. and Mrs. Slind have a large circle of friends who will regret to see them leave Clarkston, and will wish them all kinds of success in their new home.

Cost of Raising Wheat

To show the actual cost of growing a bushel of wheat, oats, barley or peas, records have been taken on 258 Palouse farms this summer by representatives of Washington State college, the University of Idaho and the United States department of agriculture, co-operating.

Costs of harvesting these crops with a binder and with a combine also are being compiled and compared.

Similar figures on 210 Twin Falls county farms have been collected by investigators for the University of Idaho.

This summer's study is the second in a three-year project. Figures that have been collected are now being tabulated. Last year's figures showed that the cost of producing a bushel of wheat in Latah county, Idaho, and Whitman county, Washington, ranged from 90 cents to \$4. The \$4 man was one whose crop was hailed out, while the 90 cent men were several who produced heavy yields of grain on land that had just grown a crop of peas. "The problem here, of course," said one of the investigators, "is utilization of the peas."

Announcements of conclusions from this year's figures, it is stated probably will be ready in the spring. The first year's study showed that the average cost of raising a bushel of winter wheat in the Palouse district was \$1.63; of spring wheat, \$1.83; and of all wheat, \$1.69.

Average size of 158 farms studied in Latah and Whitman counties last year was 279 acres. The average farm capital was \$45,978. Average receipts were \$8421; average expenses, \$3896; farm income \$4525. After paying the farmer for his labor, this income represented 7.6 on the investment.

Statistics on the Palouse district were collected this summer by Earl D. Strat, representing the federal government; Ralph R. Rowell, a university student, also employed by the government; Byron Hunter, farm management investigator, University of Idaho; Reuben Johnson of Idaho Falls, a University of Idaho graduate; Prof. George Severance of the Washington State college faculty and E. R. Johnson, a student at Washington State college.

Twin Falls statistics were collected by Mr. Hunter; C. C. Taylor, farm management demonstrator of the University of Idaho division; S. B. Nuckols, representative of the United States department of agriculture; and R. R. Rowell and Ralph Bristol, University of Idaho students.

There was a large attendance at the musical recital given by the pupils of Prof. and Mrs. W. W. Gatenby at Juliaetta, Tuesday night. Pupils from Lewiston, Clarkston, Juliaetta and Kendrick took part in the program. It was a most creditable affair and proved very interesting to the large audience. Those from Kendrick who were on the program are as follows: Wilson Rogers, Alberta Walker, Artillee Hollada, Dorothy Erickson, Alvira Atchison, Evelyn Hanson, Dorothy Stanton, Edith Dammarrell and Mrs. Leo Raaberg.

SCENE OF NATIONAL W. C. T. U. CONVENTION, HOSTESS PRESIDENT AND SPEAKER

EXPOSITION AUDITORIUM, SAN FRANCISCO

The great civic auditorium of San Francisco, built in the beautiful civic center for the housing of conventions, will be the scene of the forty-eighth annual meeting of the Woman's Christian Temperance Union, August 18 to 23. Mrs. Sara J. Dorr, president of the W. C. T. U. of Northern California, is the hostess president and is in general charge of arrangements for the convention. Mrs. Dorr lives in San

Francisco, where she is prominent in all welfare work. Mrs. Mary Harris Arner, whom Georgia claims, has won a nation-wide reputation as an orator. She enjoys the distinction of having been the first woman to be given an honorary degree by the first college that opened its doors to women, Wesleyan College, in Macon, Ga. Mrs. Arner is known among W. C. T. U. women as the "Evangel of the New Crusade." She is constantly busy

spreading the gospel of Prohibition and is one of the national lecturers of the organization. She was born in Georgia, educated in Georgia, and is referred to by Georgians as a "Georgia Product." But her great influence for good throughout the United States has entitled her to a wider citizenship than that of one state, and she carries the title of national lecturer in more than a literal sense. She is a national woman.

Fire on Texas Ridge

The barn on the Dr. Moser farm on Texas ridge was completely destroyed by fire Tuesday afternoon between 4 and 5 o'clock. The origin of the fire is unknown.

Eatman Bros., who farm the place, had all of their farm machinery, including a Fordson tractor, stored in a wing of the barn. They also had about 500 sacks of grain, mostly barley in the barn. The machinery was a total loss and the grain so badly damaged that only a part of it can even be used for feed.

Both of the Eatman families were away from home when the fire started. They were visiting at the home of a neighbor. They are at a loss to know how the fire could possibly have started. Neither one of the boys smoke, so there was no chance that the fire started from a cigarette stub or from a match stub carelessly thrown aside.

Fortunately the contents of the barn were fully covered by insurance.

Trip to South Idaho

Mrs. Mary Vaughan returned the first of the week from an auto trip to South Idaho with her son, Lyman, and his wife. The party spent two weeks on the trip and report a most enjoyable time. They had very little car trouble and nothing unpleasant to mar the pleasure of the trip. The journey was made by way of Pendleton, over the Blue Mountains and the roads, except for a short distance over the mountains, were excellent.

Mrs. Vaughan stopped at Midvale, Idaho, where she visited her daughter-in-law, Mrs. Claud Vaughan. Mr. Vaughan is harvesting on Nez Perce prairie.

On the return trip Mr. and Mrs. Lyman Vaughan stopped at Milton, Oregon, where they purchased a residence and 2½ acres of ground. They will leave Moscow this week and move to their new home to spend the winter.

Attending Conference

Rev. Howard W. Mort went to Spokane Monday afternoon to attend a meeting of the Methodist conference. He will not return until some time next week. It is generally understood that he will have charge of the Kendrick church during the ensuing church year. His many friends here are glad that he is to be retained as his work has been very successful. He has a wonderfully good influence with the young people who like and admire him for his genuine interest in their welfare.

During the past year Rev. and Mrs. Mort have organized an Epworth League that now numbers 40 members. It is a splendid organization and has been the means of providing many pleasant entertainments for the young people as well as the older members of the church. It has also been of material help in assisting with the finances of the church.

A circulating library is another popular addition to the church and is due to the efforts of Rev. Mort. It has been open all summer and has afforded much pleasure to the members.

Even during the "hard times" of the past year the finances of the church have been well taken care of, so that the affairs of the church generally are in a flourishing condition.

Death of John Roush

John Roush, one of the pioneer residents of the Potlatch, passed away at a Moscow hospital Wednesday, after a lingering illness. He had been in the hospital for the past two months with no hope for recovery. He was only partially conscious a greater part of this time.

Mr. Roush followed the carpenter's trade in this community for many years. About a year ago, owing to failing health, he had to give up his work.

John Roush was born at Warrens, Indiana, in the year 1842. He is survived by his wife, who lives in Spokane, and four children, Mrs. Florence E. Dahlgren and Geo. W. Roush, both of Seattle; Mrs. John Kress of Chicago and Mrs. Lura Smith of Fairbanks, Alaska.

The funeral will be held this morning (Friday) at the Kendrick cemetery, at 10 o'clock. The Masonic lodge will have charge of the service, as the deceased was a member of both the Masonic and Oddfellow fraternities.

New Rural School House

The pupils of school district No. 11 of Nez Perce county will have a fine new school house in which to begin their work this fall. The new building is located 2 miles southeast of Southwick. It is a frame structure and has room enough to seat 40 pupils comfortably. The cost of the building is approximately \$4,000. It will be fitted with modern desks and seats and will be heated by a pipeless furnace. The patrons of district No. 11 may well feel proud of their new structure.

The old building will be remodelled and used for classes in manual training and as a gymnasium.

School will start September 12th under the direction of T. O. Daugherty.

Harvest Dance Tonight

The Harvest Dance, to be given by the American Legion, will take place tonight at the Fraternal Temple. It is the first dance of the season and will be one of the best. Orchestra music and a lunch at midnight are on the program for the evening.

Miss Nettie May Jacobus was a Moscow visitor the first of the week.

"Hogging Down" Corn

30 or 40 years ago some shrewd farmers fell into the habit of letting their hogs run in the cornfield in September and October and allowing them to eat ears and stalks until all that remained could be plowed under. Some also turned hogs into the rye in the spring and let them range on the tender and succulent stalks until they became too woody to be palatable. This process was termed "hogging down." Then came a crusade for "clean farming"—typified by harvesting and shocking the corn stalks, husking the yellow ears and piling them into the cribs later to be fed to the same hogs. "Hogging down" was decreed to be shiftless evasion of honest toil. The "hogging down" farmers fell into disfavor and dropped the practice to a large extent. Meantime the labor market was tightening and a days work came to be regarded not so much as something to be gotten out of the farmer or his sons or a hired man, but as a period to be paid for in money that could be used for other purposes.

The United States Department of Agriculture and some of the experiment stations in corn states have of late years given careful attention to the possibilities of feeding stock on the cafeteria plan. Today it is in use on hundreds of corn belt farms and in many other localities in all parts of the country where corn is grown. Hogging down corn saves labor, while causing no more waste than when the corn is harvested and hand fed. Properly managed, it keeps the hogs in better condition and adds weight more rapidly. It distributes manure uniformly. It leaves the ground in fair condition for the next crop.

A system that is widely used calls for fencing the farm into 5 parts—6 if you wish to retain a permanent pasture. Corn is planted in the 1st section and as soon as the kernels have become hard the hogs are turned in. As they have been on other feed, it will take a week or ten days feeding to get them entirely on a corn diet. In the corn belt latitude they may be expected to live entirely in the corn field from about September 10 until the crop is consumed. It is generally found best not to permit the hogs range of the entire field, but to erect temporary fences. These can easily be built of 25-inch wide wire mesh, fastened to anchor posts at the ends and tied to corn stalks instead of line posts.

If a supplemental crop such as rape, cowpeas, soy beans, or even pumpkins, has been sowed among the corn, it will provide protein feed which the corn lacks. Pigs easily learn to pull down the corn stalks for the ears and waste less time than when fed in the yard. The following spring the stalks and trash that remain on the surface of the field are cut over with a sharp disk and the ground prepared for a 2nd crop of corn, which is harvested by hand, while the corn for "hogging down" is planted in the 2nd tract. Rye is sown on this field in the fall, either with 1-horse drill between the rows, or after the corn is harvested. The rye may be used to get a stand of clover and timothy, the timothy being sown with the rye and the clover the next spring. The rye is used for hog pasture from early spring until the stalks become too hard. It will be found valuable pasture for brood sows with young pigs. After the pigs cease to consume the rye they are taken out and not returned until after the grain becomes ripe when they are allowed to consume the entire crop and graze on the young clover until time to turn them into the corn in September. The clover and timothy come on the next year and are used for hog pasture and the best parts kept for hay for other stock. The fifth year the timothy and clover crop is cut for hay and the sod turned under late in the fall prepare the ground for the next years, "hogging down" crop of corn.

The distinguishing feature of a road hog is that he gives both sides of the road but keeps the center for himself.

The corn shucks are heavy this year so lay in a big supply of fuel and look for a hard winter.

Dirt roads all over the country are rough and badly cut up. It is more apparent every day that dirt roads will not stand up under heavy truck and automobile traffic.

A Kansas woman has to look after a sporting son, a gambling husband, a painted daughter, and for that reason the neighbors refer to her as "The Director of Sports."

Wm. Allen White: Collective neighborliness marks the country town for its own. Death, poverty, grief, tragedy visits the city, few friends hurry in to heal the wounds. In some organized way the towns good will touches every family. The belief that if you are good to somebody, somebody will be good to you, distinguishes Americans from the rest of mankind. It is not the product of our great cities, not primarily a farm product. It is made in our country towns.

Chicago insists that the meanest man prize be kept within her corporate limits. Her latest candidate for this "honor" has just been sentenced to the penitentiary for 5 years after he had pleaded guilty to robbing the mails of disabled service men's compensation checks. In passing sentence Judge Landis said: "It takes a man without any heart to rob a disabled war hero."

A Paris report says that not less than 129 million bushels of wheat will be needed this year to save Russia from famine. Thousands of Russians already are reported dying daily from starvation. The great drought which has burned up Europe is the cause. Europe is going to need this year all the wheat North and South America can ship, but whether Europe can pay for it is another question.

Mrs. Wm. Blackinton returned to her home in Lewiston, Wednesday, after a stay of several weeks with her daughter, Mrs. Locke.

A. H. Smith is spending the week in Lewiston and Clarkston visiting old friends and taking medical treatment.

This is the week when all who can are going to Lewiston for their peaches.

James Winegardner and sisters, Edyth and Alice, will go to Genesee Saturday, where they take up their school work. James as teacher in the high school, Miss Edyth will teach in the grades and Alice a student in high school. Success to each of them.

The missionary ladies will serve ice cream, cake, sandwiches, coffee and lemonade in the I. O. O. F. hall, Saturday afternoon and evening, September 3. A cordial invitation is extended to everybody, come, have a good time and help a good cause.

WHEN DID MAN DIE?

Stops Breathing, but Heart Beats on for Eight Hours.

Extraordinary Case in London Has Aroused Considerable Interest in Medical Profession.

London.—Much interest has been aroused in medical circles here by the extraordinary case of a man whose heart continued to beat for nearly eight hours after breathing had ceased. The question arises: When did death occur?

The man in question, a dustman, apparently had been in good health until Whitsun, when he became drowsy and often would have fallen asleep but for a severe pain in his head. He was admitted to a hospital suffering from drowsiness, stiffness of the neck muscles and headache, but there were no other prominent symptoms.

It was decided to test the spinal fluid, and accordingly at 11:20 o'clock in the morning the man's heart was sounded and tested, after which chloroform and ether were administered. The operation took only half a minute, but on being turned over on his back again he ceased to breathe, although the heart was beating well. Artificial respiration was tried, and

at 5:30 o'clock a tracing of the beats was taken. At 7:30 the heart ceased to beat.

At the post-mortem examination it was found that death was caused by a tumor on the right side of the brain and that this would have nothing to do with respiration ceasing while the heart remained beating.

An eminent specialist has given as his opinion that so long as his heart beats a man is not dead, and says that in sleeping sickness (from which the dustman was suffering), as in all brain disturbances, breathing may cease, though the heart continues to beat, a different nerve center being involved. But no explanation of how it could continue to beat for more than seven and a half hours after respiration had ceased is forthcoming.

Building Crashes, Cop Saves Lives.

New York.—The foresight of Patrolman Richard Faye, a new policeman, prevented disaster in Brooklyn yesterday when he roped off two streets near a Borough hall less than an hour before a corner three-story brick building he considered dangerous crashed with a roar.

Caught a Shark.

Lewes, Del.—When fishing in the Delaware bay, off Lewes Breckwater, Frank Wallen caught a shark weighing 150 pounds. Wallen heads a party of New Jersey fishermen who say there is better luck this side of the bay. "They had had large catches the last two weeks."

Cured of Stomach Trouble and Constipation

Rachel Cribpley of Beaver Dam, Ohio, was sick for two years with stomach trouble and constipation taking one medicine after another with only temporary relief. "My neighbor spoke so enthusiastically of Chamberlain's Tablets" she says "that I procured a bottle of them at our drug store to try. A few days treatment convinced me that they were just what I needed. I continued their use for several weeks and they cured me."—Adv.

LEADERS IN SOCIAL REFORM IN NATIONAL W. C. T. U.

MRS. L. MILLER
Photo by Harris & Ewing

MRS. DEBORAH KNOX LIVINGSTON
Photo by Bachrach

DR. VALERIA H. PARKER

Dr. Valeria H. Parker of Washington, D. C., is identified with a number of organizations for which she directs the program of social hygiene. She is National Director of the Department of Social Morality of the W. C. T. U. and will be present at the approaching convention to present the plans which she has developed for the activities of that organization in her field of work. Dr. Parker has recently been appointed executive secretary of the United States Interdepartmental Social Hygiene Board, the first woman to be put in charge of such an office.

Mrs. Deborah Knox Livingston is an orator of international reputation. She has spoken in every state in the Union. She has helped in campaigns in Canada, Scotland, England and on the continent of Europe, in the interest of prohibition and the better citizenship of women. She is the National Superintendent of the Department of Christian Citizenship of the W. C. T. U. and is bending all the energies of her department to the arousing of a greater sense of civic responsibility in the women of America. Mrs. Laura Parks Miller, Director of the Department of Women in Industry of the National Woman's

Christian Temperance Union, has already secured the attention of the public for her work in this branch of social reform. Her ambition is to bring into the membership of the Woman's Christian Temperance Union at least 25 per cent of the women of the community engaged in gainful occupations. Thus she hopes to bring about a better understanding between women who work outside the home and those whose activities and interests center about the hearth. Mrs. Miller is doing valuable research work and compiling figures which are of considerable importance and significance to workers in every branch of welfare work.

Harvest Time is Here

With a bounteous crop which you are endeavoring to save. You will want wagons to haul the products of the field to market. We have a few specials to offer you while they last.

3 inch Bain wagon, half truck, 3 inch tire	\$135.00
3 inch Studebaker wagon, half truck, 3 inch tire	135.00
Also the Peter Schuttler wagon.	
4 tine bundle fork with snake shank for	\$ 1.10
No. 8 Scoop shovels at	1.90
50 foot rubber cotton covered garden hose	7.00
50 foot Non-kinkable moulded rubber garden hose,	10.00

Our repair bins still have a number of parts you will need. A full line of threshermen's supplies from oil to sack needle.

RAP RED TAPE IN U. S. SCHOOLS

National Survey Makes Charge
That Politicians Hamper Efficiency of Education.

FINANCES ARE ANALYZED

Teachers' Salaries Aggregate 64 Per Cent of Total Current Expenses of Schools—377 Cities Covered by Survey.

New York.—Two prime causes of an alleged "deplorable" condition of American public schools are red tape and the handicapping of boards of education by politicians, according to a survey of public school boards and their receipts and expenditures, by the national committee for chamber of commerce co-operation with the public schools and the American city bureau.

The survey, which covered 377 cities, said that in 47 per cent of cases where boards of education were "independent" or free from political manipulation the most efficient administrative and educational results are obtained. City Officials Hamper Schools. "The best interests of the public schools," says the report, "cannot be served in a city where the budget of the board of education may be reduced and remodeled by city officials."

The survey shows that the school receipts in the 377 cities for the last fiscal year were \$359,280,000 and that the expenditures of these same cities dur-

ing that period were about \$2,000,000 less than income.

The funds are from five sources and are supplied in the following proportions: From the states, 11.6 per cent; the federal government, 1.3 per cent; the county, 5.7 per cent; local taxes, 65.4 per cent; nonrevenue or miscellaneous sources, including income from sale of bonds or short-time loans, 17 per cent. The survey shows that of all cities reporting 70 per cent do not receive a dollar from the federal government. Teachers' salaries aggregated \$180,000,000, or 64 per cent of the total of the current expenses of the school.

85 Per Cent for Buildings.

The relation of capital outlay, aggregating \$51,727,554, to the total expenditures showed that nearly 85 per cent was utilized on sites and new buildings. A total of \$1,341,000 was expended for medical inspection and dental and nurse service in the 377 cities named. The part of the total expenditure spent for the alteration and equipment of old buildings was only 1.3 per cent. Commenting on this, the committee said:

"The smallness of this amount is of particular interest in connection with the findings of this committee in their report on school housing conditions in American cities. This report shows that a large percentage of the children in the public schools are continually menaced by the unsanitary conditions and fire hazards in many old school buildings now in use. In Eastern cities the conditions are particularly bad."

The basis for the committee's survey was an inquiry sent to the superintendents of schools in cities with populations in excess of 8,000.

MARKETING LOSS CAN BE AVOIDED

Ruinous Conditions Can Be Averted
in a Measure by More
Careful Distribution.

TELEGRAPHIC REPORTS HELP

Effective Work Accomplished by Imperial Valley Melon Growers and Shippers in Co-operation With Bureau of Markets.

(Prepared by the United States Department of Agriculture.)

Market gluts are one of the principal causes of loss in marketing farm products, especially those of a highly perishable nature, such as soft fruits and vegetables, which cannot be held until conditions of supply and demand adjust themselves. Avoidance of these ruinous conditions is possible in large measure by more careful and widespread distribution, but all products are not marketed most advantageously by the same system, and the marketing plan varies somewhat in different areas from season to season.

Know Daily Distribution.

With respect to fruits and vegetables, and more especially those of high perishability, perhaps no more effective work in broadening distribution has been accomplished than that of the Imperial valley melon growers and shippers in co-operation with the bureau of markets, United States Department of Agriculture. The department opens a temporary office at Brawley, Cal., at the beginning of the shipping season. By means of a large chart in the temporary office of the department shippers are able to know the daily distribution of each day's shipments and diversions.

Shipper Has Information.

This information, in conjunction with the telegraphic report compiled by the department's representatives in the East and telegraphed to its Brawley office, showing receipts, prices, and conditions in from 20 to 25 of the major markets of the country, enables the shipper to have before him each day a complete picture of the market situation with respect to melons, and

Typical Farmers' Curb Market.

to distribute his shipments accordingly. There is no discrimination—every shipper has full knowledge of the en-

ire situation. The only has passed when one shipper has advantage over another by reason of more complete information.

Widespread and accurate distribution cannot be accomplished without dependable information as to conditions of supply and demand.

Notice To Parents And Guardians
You will please take notice that section 993-997, Article XVII, and section 1017-1019 1020 and 75 1-2 of the 1921 School Laws provide as follows:

Children to Attend School
Section 753. In all districts of this State all parents, guardians, and other persons having care of children shall instruct them or cause them to be instructed in reading, writing, spelling, English grammar, geography and arithmetic. In such districts every parent, guardian, or other person having charge of any child between the ages of eight (8) and eighteen (18) years, shall send such child to a public, private or parochial school for the entire school year during which the public schools are in session in such district: Provided, however, That this chapter shall not apply to children over fifteen (15) years of age where such child shall have completed the eighth (8) grade or may be eligible to enter any high school in such district, or where its help is necessary for its own use or its parents' support or where for good cause shown it would be for the best interest of such child to be relieved from the provisions of this chapter. Provided further, That if a reputable physician within the district shall certify in writing that the child's bodily or mental condition does not permit its attendance at school, such child shall be exempt during such period of disability from the requirements of this chapter. It shall be the duty of the superintendent of the school district, if there be such superintendent, and if not, then the county superintendent of schools to hear and determine all applications of children desiring, for any of the causes mentioned here, to be exempted from the provisions of this chapter, and if upon such application such superintendent hearing the same shall be of the opinion that such child for any reason is entitled to be exempted as aforesaid, then such superintendent shall issue a written permit to such child, stating therein his reason for such exemption. An appeal may be taken from the decision of such superintendent so passing upon such application to the probate court of the county in which such district lies, upon such child making such application and filing the same with the clerk or judge of said court, within ten days after its refusal by such superintendent, for which no fee to exceed the sum of One Dollar (\$1.00) shall be charged and the decision of the probate court shall be final. An application for release from the provisions of this chapter shall not be renewed oftener than once in three months.

Juvenile Disorderly Person Defined
Section 1019. Every child within the provisions of this chapter who does not attend school, as provided in the preceding section, or who is in attendance at any public, private or parochial school, and is vicious, incorrigible or immoral in conduct or who is an habitual truant from school or who habitually wanders about the street and public places, during school hours without lawful occupation or employment, or who habitually wanders about the streets in the night time, having no employment or lawful occupation, shall be deemed a juvenile disorderly person, and be subject to the provisions of this chapter.

Same: Complaint: Hearing and Commitment
Section 1020. When a child shall be a juvenile disorderly person within the meaning of this chapter, the truant officer, or any school teacher; or other reputable person may make complaint in the Probate Court of the county in which such child resides. The Probate Court shall hear and determine such complaint and if it is determined that such child is a juvenile disorderly person within the meaning of this chapter, he or she shall be committed to a children's home, if eligible, or to the Idaho Industrial Training School, or to some other training school, taking into account the years of the child with reference to the institution selected. Any child committed to a children's home, on its being shown to the judge of said Court that it is incorrigible and vicious, may be transferred to the Industrial School or other proper institution. No child committed to any reformatory shall be detained beyond his majority, and may be discharged sooner or paroled by the trustees or board of control under rules and restrictions applicable to other inmates. Any order of commitment may be suspended by the judge of the Probate court during such time as the child may regularly attend school and properly conduct itself. The expense of the transportation of the child to the juvenile reformatory shall be paid

by the county from which the child is committed.
Encouraging Delinquency a Misdemeanor
Section 1017. In all cases where any child shall be a delinquent child, a juvenile delinquent person, or a juvenile disorderly person, as defined by this act, the parent or parents, legal guardian, or person having custody of such child, or any person responsible for, or by an act encouraging, causing or contributing to the delinquency of such child shall be guilty of misdemeanor, and upon trial and conviction thereof shall be fined in a sum not to exceed three hundred dollars (\$300) or imprisonment in the county jail for a period of not exceeding six months or shall suffer both fine and imprisonment the court may impose conditions upon any person found guilty under this act, and so long as such person shall comply therewith to the satisfaction of the court, the sentence imposed may be suspended.

School Trustees to Report Delinquents
Section 1022. It shall be the duty of the board of trustees of each school district to report to the county superintendent all cases of truancy, delinquency, and incorrigibility which arises within their respective districts, and such county school superintendent shall immediately report such cases to the judge of the Probate Court.

Census List
Section 993. It shall be the duty of the clerk of the board of school trustees of each district, on or before the third Monday in September, to furnish or cause to be furnished to the head teacher of the schools in his district a list of all the children in the school district between the ages of eight (8) and eighteen (18) years, said list to be taken from the report of the school's census marshal for the current year.

Duty of Teachers
Section 994. It shall be the duty of the head teacher of each district to check or cause to be checked the enrollment of the school against the report furnished by the clerk as aforesaid and to report to the county superintendent all pupils not in attendance who are within the ages of eight (8) and sixteen (16) and who have no release from school.
Absentees to be Reported
Sec. 995. At the beginning of each month thereafter it shall be the duty of such head teacher to report to the county superintendent, the names of all children between eight (8) and sixteen (16) not bearing releases who have failed to attend school during the preceding month. It shall be the duty of the county superintendent to refuse to countersign the teachers' warrants until such reports are made as herein provided: Provided, That districts having a superintendent of schools shall not report to the county superintendent but shall proceed through their district superintendent in the same manner as herein provided for county superintendents.
Duty of County Superintendent
Section 996. Upon the receipt of such report the County Superintendent shall promptly give to the probation officer the names of all pupils who do not bear releases from school issued by proper authority.
Duty of Probation Officers
Section 997. The Probation officer shall serve due notice upon the parents and guardians to place such children in school. If said children are not placed within school within a reasonable time and are not entitled to bear a release, then the child and the parents or guardian shall be proceeded against as provided in the laws for the correction of delinquent children. It shall be the duty of the probation officer to prefer such complaints. 32-4t

"PROF." WEDS BY CONTRACT
Seattle Teacher and Brooklyn Girl Join in Unusual Marriage Ceremony.
New York.—The marriage by contract of Dr. Leslie Spier, professor of anthropology at Seattle university, now teaching at Columbia, to Miss Erna Gunther of Brooklyn was announced today. The acknowledgment of their signatures to a marriage contract before Justice McCook constituted the ceremony. Such marriages are legal under a New York statute, but infrequent.

Chamberlain's Colic and Diarrhoea Remedy.
This is unquestionably one of the most successful medicines in use for bowel complaints. A few doses of it will cure an ordinary attack of diarrhoea. It has been used in nine epidemics of dysentery with perfect success. It can always be depended upon to give prompt relief in cases of colic and cholera morbus. When reduced with water and sweetened it is pleasant to take. Every family should keep this remedy at hand. —Adv.

MULES DRIVE OUT CAPTAIN
Officer Resigns From Ohio National Guard After 33 Years of Military Service.
Defiance, O.—After 33 years of military service, Capt. A. B. De Kay has resigned as commanding officer of the local National Guard company because he doesn't like mules.
Captain De Kay has always been an infantryman. Recently the guard here was converted from company A, Second infantry regiment, to a howitzer unit, and was issued a half-dozen mules to draw the light artillery.
"When they began giving us howitzers and pistols and mules," said Captain De Kay, "I knew I was through. I'm a rifle and bayonet fighter."

SURGEON'S FEE LIMIT, \$1,000
Johns Hopkins Hospital Trustees at Baltimore Set Maximum for Operation.
Baltimore, Md.—The trustees of Johns Hopkins hospital issued the following dictum:
"The maximum fee that any surgeon ought to charge for an operation, no matter how wealthy the patient may be, is \$1,000. The maximum charge that any physician ought to make for attending patients in a hospital is \$35 a week."
The dictum takes on the force of an order to physicians and surgeons practicing in the hospital, limiting fees to be charged.

Prehistoric Cave Yields Deposits of Phosphate
Mixnix, Austria.—One of the most comprehensive of the many finds of relics, of prehistoric man in Austria has been discovered in a cave near this place.
The cavern known as the "Dragon's Den" is being excavated for its enormous deposits of phosphate in the shape of bird lime. In a side cave some 1,000 yards from the opening the evidences of human occupation in ancient times were uncovered. Great quantities of quartz implements and other utensils and human bones have been taken out.

TIMBER GOING FAST
Being Cut Five Times Faster Than It Is Grown.
Annual Cut and Destruction of Timber Amounts to 26,000,000,000 Cubic Feet—Growth is 6,000,000,000 Feet.

The original forests of the United States have been estimated as containing 822,000,000 acres, which has been reduced by cutting, cultivating and burning to 137,000,000 acres; or, to put it another way, our virgin stands have been reduced to one-sixth of their original area. Sixty per cent of the original timber stand is gone, leaving us a balance of approximately 2,214,000,000,000 feet of merchantable timber, says Norman W. Scherer, assistant professor of forestry, Ohio State university.

Now that we know what our balance amounts to, we may logically ask the question: "What is our annual consumption?" It includes an average annual cut of 40,000,000,000 feet of lumber, somewhere between 100,000,000 and 125,000,000 railroad ties, 4,500,000 cords of pulpwood, and about 110,000,000 cords of fuel. Under normal conditions, our per capita consumption of timber amounted to between 500 and 525 board feet, but with the pressure of war this was brought down to approximately 300 board feet, and we are still suffering from the economic curtailment. The average consumption for Europe amounts to 60 board feet per capita, while for all other countries it is about four board feet. The average for the world population of 1,600,000,000 as saw material is 40 board feet.

Our tremendous consumption of lumber has been a most potent factor in elevating our standard of living, and it would not be a happy solution of the problem to curtail our consumption. Rather let us increase our production.
The annual cut and destruction of timber amounts to 26,000,000,000 cubic feet, while the annual growth amounts to only 6,000,000,000 cubic feet. We are consuming timber, then, about five times as fast as we are producing it.

BURBANK, PLANT WIZARD

Although seventy-four years old, Luther Burbank is as hale and hearty as a youngster of forty. The wizard of the plant world finds no day complete without spending some time among the plants he has created and knows so well. He once said that some day he would evolve a spineless cactus. The world laughed. He just chuckled and said, "Wait and see." Here is the result of his experiment with the cactus. A real spineless cactus at last. See him rub-his face on it.

DANUBE IS NOW FREE RIVER
Great Water Highway Internationalized According to Treaty Provisions.

Paris.—Internationalization of the Danube river finally became a reality when representatives of the interested allied powers held their final meeting here and signed a convention to that effect.
The International Danube commission immediately was notified that hereafter it would be in complete control of all matters pertaining to the river, as provided in the treaty of Versailles.

Burglar Eats, Drinks, Naps.
St. Louis.—After drinking a quart of whisky and eating seven cans of salmon he found in the residence of C. E. Dodson, East St. Louis, a burglar carried a mattress, bed clothing and an alarm clock into the cool basement for a nap, according to the East side police.

The Dodsons are away for the summer. Neighbors saw that a hole had been sawed through the cellar door of the Dodson home and they notified the police.

FRENCH GET PRIZES
Rewarded for Efforts to Restore Farms to Prewar State.

Fifty Farmers Are Now Owners of Agricultural Implements Donated by Two American Women.

Paris.—Fifty farmers from the cantons of Anizy and Coucy in the devastated area of the Aisne (northern France) are today the owners of agricultural implements given them as prizes by Miss Anne Morgan and Mrs. A. Murray Dike of the American committee for devastated France in recognition of efforts they have made to restore their farms to their prewar state.
The prize-winners were selected by a jury of French agriculturists from 110 entries in two agricultural competitions.

The first prize, a seed planter from Louisville, Ky., was won by Albert Delan and his wife, sixty-eight and fifty-eight years old, respectively, peasants from Allemont (Aisne) who, although their fields were classed as "irreclaimable" by the government, returned to their farm, lived in a dug-out and after two years of hard labor succeeded in putting their entire farm under cultivation.

Cash prizes totaling 4,000 francs were also given by Miss Morgan and Mrs. Dike to the 30 farm hands in the cantons of Anizy and Coucy, who were most meritorious. The first prize of 300 francs was won by an aged couple named Thuillet, who served for 40 years on the same farm and who after the war, worked a year without wages because their mistress could not afford to pay them.
Through the co-operation of the American committee with the farmers of the Aisne, 25,000 acres of land ravaged by the war have been reclaimed and are at present under cultivation.

TELLS OF TERROR IN RUSSIA

Wladimir Chessin and Wife at Copenhagen Describe Perilous Flight From Reds.

Copenhagen.—Wladimir Chessin, formerly consulting lawyer to the Danish and Swedish legations in Petrograd, with his wife, an ex-singer of the Imperial opera in Petrograd, recently arrived here after a perilous flight from Russia. Their last memory about Russia is a rifle shot sent after them while crossing the frontier.
Chessin, in the course of an interview, said, "Lenin's regime is a rule of terror. This is proved by my own case. Since 1918 I have spent practically all my time in prison in a filthy cell, and but for my wife smuggling food into prison I would have starved to death. One hundred of my 125 fellow prisoners died from starvation. Russia today is a hell; that's the truth about Lenin's Russia. The population of the towns are dying out, and houses are demolished by the thousands, in order to obtain house timber as fuel."

DANUBE IS NOW FREE RIVER

REFUSES TO SPEAK TO WIFE

Lawyer Has Maintained Silence Before Her Ever Since a Mysterious Trip Last August.

Philadelphia.—Michael D. Hayes, a Philadelphia lawyer, has been on a silence strike for a year. Although he lives with his wife she asserts that he has not spoken to her since last summer. They eat at the same table, but not a word does he speak to her.

"The silence strike" was revealed in the petition which Mrs. Hayes, twenty-five years old, filed in a suit for maintenance. The whole trouble dates back to a mysterious trip which the lawyer took last August. The question Mrs. Hayes tried to have answered was what happened to her husband the two weeks he was away.

New Musical Instrument.

New in the musical instrument line is a whistle with two tubes that is played like a slide trombone.

SUMMONS

In the Justice Court, Kendrick Precinct, Latah County, Idaho, H. P. Hull, Justice of the Peace.

N. E. Long & Sons, Plaintiffs, vs. E. C. Young, defendant.

The State of Idaho sends greetings, to E. C. Young, the above named defendant. You are hereby notified that a complaint has been filed against you in the Justice Court, Kendrick, Precinct, Latah County, Idaho, by the above named plaintiffs, of the nature and in general terms as follows:

To collect on a bill of goods, wares and merchandise sold and delivered to defendant between November 1st, 1920 and December 1st, 1920, to the amount of Fifty-seven dollars and thirty-eight cents (\$57.38), together with interest and costs of this action.

And you are hereby directed to appear and answer said complaint within twenty days of the service of this summons, if served within the county of Latah, State of Idaho, and within forty days if served elsewhere, and you are further notified that unless you so appear and answer said complaint within the time herein specified the plaintiffs will take judgement against you as prayed in said complaint.

Witness my hand this 12th day of August, A. D. 1921

H. P. Hull, Justice of the Peace, Kendrick Precinct, Latah County, Idaho. 33-5t

NATIONAL W. C. T. U. PRESIDENT RETURNS FROM SOUTH AMERICA

Five republics of South America were included in the tour of Miss Anna Adams Gordon and Miss Julia Freeman Deane, made in the interest of the cause of world prohibition. Miss Gordon, national president of the Woman's Christian Temperance Union

Miss Anna A. Gordon.

of the United States, and vice president of the world W. C. T. U., with Miss Deane, editor-in-chief of the official publication of the organization in the United States, The Union Signal, were commissioned by the national body to make a survey of Europe and

the South American countries at the convention in St. Louis in 1919. They visited all the countries open to strangers in Europe in the spring and summer of 1920. This year they have made a tour of the Latin-American countries, including Peru, Chile, Uruguay, Argentine and Brazil. They will bring to the convention that meets in San Francisco, August 18 to 23, a prophecy from representatives of the government in Chile, Argentine and Uruguay that prohibition will be established there within five years. South America is watching closely the effect of the prohibitory law in the United States, both in its social and its economic aspects. Nothing but complete failure here could prevent the enactment of similar legislation there, and there is no thought of failure, either in the minds of the South American temperance workers, or here.

Indicative of public opinion towards prohibition is the attitude of the governments and of educators of the highest rank towards the cause. Because of this sympathy the teaching of scientific temperance is included in the curriculum of the schools, for which teachers are trained in the normal schools. To meet the question of economic loss the government of Chile has already instituted a program of propaganda to teach the value of grape culture for other purposes than the making of alcoholic beverages and is advocating legislation to provide financial aid for those who undertake the conversion of their plants to other purposes than wine making.

Chilean Students In U. S. Colleges

Six young people of Chile, three young men and three young women, are being sent by the Chilean government to the United States to spend four years in American colleges. Their mission is to study the educational system of the United States, particularly as it concerns higher education, and to investigate the effects, economic and physical, of the prohibition of the manufacture and sale of alcoholic beverages.

Chile is very near the enactment of a law similar to the Eighteenth amendment to the United States constitution, waiting only for a little further observation of the result of the prohibitory law here, and to develop a little more assurance in the minds of those engaged in the wine industry that grapes may be grown with profit without the liquor industry. Both government officials and educators are lined up strongly for prohibition, and the prophecy is that another five years will see Chile dry.

The young students who are being financed here by their government are being placed in different parts of the country, under different environments, and it is expected that their observations will be useful in helping Chile to come to a clear understanding of the effects of prohibition on the industrial and social life of the people and upon the public health. The three young women have been placed in the special charge of Miss Anna A. Gordon, president of the W. C. T. U. in the United States.

WAR PRICES DIED HARD IN TAMPICO

Money Came Easily in Mexico's Oil Metropolis and Was Spent With Lavish Hand.

EVERYTHING WENT SKY HIGH

Prosperity Continued After Most Other Communities Were Experiencing Setback—City Is Now Undergoing Readjustment.

Washington.—"Americans who saw prices skyrocket at home and who saw themselves and their neighbors nearly lose their sense of money values, would have felt thoroughly at home in Tampico, the great Mexican oil town, during the last few years," says a bulletin issued from the Washington headquarters of the National Geographic society.

This was the port to which United States gunboats were sent recently when the closing down of American oil wells and refineries because of heavy Mexican taxes threw thousands of men out of work, and disorders were feared.

Floated to Prosperity on Oil. "Tampico, long a port of no great importance, has had a mushroom

growth in the last fifteen years," continues the bulletin, "its population increasing from less than 17,000 in 1906 to well over 100,000 today. And the explanation for this great stride forward can be given in one word—oil. The biggest 'gusher' the world has ever known was drilled near Tampico in 1905, and scores of other huge streams of oil have been opened up in the same vicinity since. Hundreds of millions of gallons of oil have passed through Tampico, and the town has been the financial and business headquarters for fields many miles away.

"Money flowed easily into the pockets of a large number of American managers and technical workers who were brought in, and into the hands of Mexican landowners, merchants and day laborers. The World war raised the demand for liquid fuel to unheard of heights and it seemed that everyone in Tampico was becoming wealthy. Conditions closely paralleled those in the oil towns of the United States. Silk shirts were not the vogue that they were among the loungers along every American Main street, but in their way Tampicoans became equally as proficient spenders. There was little inclination to 'count the change.' The cost of all articles of food and apparel rose tremendously. Rents soared until ordinary accommodations for Americans could not be obtained for much under \$200 to \$300 per month.

"Because the after-the-war industries of the world required petroleum no less than did the navies of the fighting nations during the war, Tampico's prosperity continued after most other communities whose business was quickened by the war were experiencing a setback. Now, belatedly, the city is undergoing the readjustment that came to the rest of the world.

Has More Freight Than Vera Cruz. "Although Tampico owes its prosperity predominantly to oil, it has other factors that contribute to its importance. Thanks to a railroad from Monterey, connecting with the mining region of north-central Mexico, and to excellent harbor improvements, the town is an important port of entry and export. It has surpassed Vera Cruz in the bulk of commodities handled, though the latter city probably is the port of entry for products of greater aggregate value.

"The city of Tampico is not directly on the seacoast, but is situated a few miles up the Panuco river, which is broad and deep and affords anchorage for a large number of ocean-going ships. At the mouth of the stream of La Barra is a supplemental harbor. Near the latter place is one of the finest sea beaches to be found.

"Until Tampico found its buried treasure and shook off its lethargy it

was an exceedingly unhealthy place, often being subject to epidemics of yellow fever. Drainage and the application of other modern methods of sanitation have greatly improved the health conditions. The families of numerous American and English employees of the big oil companies have moved in, and a thriving English-speaking colony exists in the higher western part of the city."

PREVENT DISEASE OF CALF

Improper Feeding or Insanitary Conditions or Both Are Cause of Many Ailments.

(Prepared by the United States Department of Agriculture.)

Most calf ailments are due to improper feeding or insanitary conditions, or both. Keep the calf out of cold rains in winter as much as possible and provide a dry, well-bedded stall at night.

Provide Nature's tonics—exercise, sunshine, pure air, abundance of fresh water and a variety of feeds—and

It Is Easier to Prevent Calf Disorders Than to Cure Them.

there will be little need for medical attention. It is better to prevent the occurrence of disease than to be under the necessity of curing it afterward.

Observe the calf at all times. If it should appear drowsy, feverish, stiff, or sluggish, act quickly. Reduce feed at once, and the disorder may be in large measure prevented. Keep snit before the calf at all times. An abundant supply of fresh water should be available always.

Some of the commoner ailments can be treated by following instructions which are contained in various bulletins and publications of the United States Department of Agriculture. In case of serious illness, consult a competent veterinarian at once. Do not delay.

BIG RAT TERRORIZES HOME

Makes Desperate Attack on New York and Cats Flee at the Sight of It.

New York.—While ministering to his five-year-old daughter, Leonore, who had accidentally swallowed a quantity of rat poison, John Bolte was attacked by a gigantic rat.

Shouting for help he fought the rat, which tried to reach his throat, for five minutes when neighbors arrived and killed it. The child will recover.

The rat, which was as large as a cat, appeared in the bathroom of the Bolte home about a week ago. Cats which Bolte borrowed fled at the sight of the rodent. One of the cats jumped through the bathroom window.

DECRIES EAGLE SLAUGHTER

T. Gilbert Pearson, Head of Audubon Societies, Would Repeal Alaskan Bounty.

New York.—Protest against the wholesale slaughter in Alaska of the bald eagle, symbol of American independence, was voiced here by T. Gilbert Pearson, president of the National

Kendrick Store Company

BARGAIN LIST

Here is Where You Buy Our Goods at Tremendous SAVINGS IN PRICES

We want money or its equivalent in good, interest-bearing notes, and to get it, we will take some big losses on goods we now have on hand.

A word as to price situation. We believe that market prices quoted today on staple merchandise represent the bottom price for some time to come. A good many manufacturers have gone broke trying to produce merchandise at present prices and others are barely keeping their factories running on short production. Considering the high cost of freight (the total freight investment in an 8 foot binder from raw material to delivery at Kendrick is nearly \$150.00) and add to this high labor costs and it is not reasonable to suppose that prices can go lower.

In fact financial experts in the East are telling us that on the revival of business next spring, prices will materially advance.

We quote you both market prices and our bargain price:

6 Deere 14 inch walking plows	\$ 32.00	\$ 20.50
1 Syracuse hillside 15 inch steel plow	34.00	26.00
1 6 ft. Deere disc harrow, rear attachment and truck	160.00	100.00
1 7 foot same as above (used)	173.00	90.00
12 foot Western land rollers	176.00	100.00
2 Deere steel bulk grain elevators	176.00	110.00
2 bulk grain wagon boxes, 100 bushel capacity	110.00	50.00
1 Army wagon 3 1/4 inch, 3 inch tires	185.00	125.00
3 8 inch Deere iron clad wagons, 3 inch tires	192.50	148.50
1 leather top for a hack	47.00	20.00
1 8 foot Deere grain binder	315.00	250.00
1 12 H. P. Associated gas engine, mounted on heavy trucks, magnetto, warranted to develop 15 H. P. under belt	820.00	500.00
1 8 H. P. Associated engine	142.00	110.00

Bargains in John Deere Corn Binders

1 Deere corn binder (weathered)	\$815.00	\$260.00
1 Deere corn binder (weathered)	315.00	275.00
1 Deere corn binder, new	315.00	290.00
1 bundle elevator to put bundles direct from binder to wagon	90.00	45.00

All these corn binders are equipped with Deere power bundle carrier which puts the bundles out of the way where the horses will not walk on them.

See Us for Van Brunt Grain Drills, Deere Gang Plows

These prices good for September only and then only on goods on hand.

CARLSON HARDWARE CO.

Associations of Audubon Societies. He said that according to the last authentic information he had from Alaska, the territory had paid bounties on over 15,000 eagles.

"When I first discovered this law," said Mr. Pearson, "I at once began a campaign to try to get the bounty law repealed. It is my contention that the killing of these birds should be stopped until the eagle can have its day in court. The late Governor Riggs, I am informed, expressed himself as feeling that the time had perhaps come when the bounty might be taken off the eagle, but so far as I am aware nothing has as yet been done."

Spread of Pellagra in South Alarming. Washington.—A new outbreak of pellagra in the South is alarming the public health service. In one state alone the number of cases has doubled since last year. The public health service considers the situation very serious and is making preparation to cope with it.

Cured of Bowel Trouble

A child of Floyd Osborn, Notary Public of Dungannon, Va. was taken with bowel trouble. Mr. Osborn gave it Chamberlain's Colic and Diarrhoea, Remedy and it quickly recovered. In speaking of this remedy he says, "It is the best ever used."—Adv.
