KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, SEPTEMBER 9, 1921

NUMBER 36

Over The County

Julietta Record: W. H. Mahon was up from Clarkston a few days ago and announces that the Julietta cannery will open for canning pears between the first and 10th of September, or as soon as the pears are ready. He has purchased the entire crop of the Mix orchard at Moscow and with this and other lots of pears he may be able to get will be sufficient to justify starting up the plant. Mr. Mahon may also decide to can apples and prunes, but has not definitely decided as to this yet.

Deary Press: The Farmers' Warehouse and Elevator company of Deary is in the open market for the purchase of grain, the same as it has always been, and is paying spot cash at the market price. This statement is made in view of the fact that the impression seems to be in some quarters that the elevator is handling nothing but association grain. The elevator has simply arranged to handle the association grain in connection with its regular business.

The Growers' Association having no warehouse of their own at this point, the arrangement to handle its grain was made for the convenience of its members in this vicinity. Farmers who are not members of the pool may haul, store or sell their grain at the elevator the same as at any other independent concern.

Troy News: The amusement committee for the fair is negotiating with a band from Kendrick for music during the fair, and if they can get the boys to come up, Troy will be assured of good music for the three days. Under the tutelage of Walter Thomas, who made a fine reputation as a musician during his time in the navy, the band is reported to be making rapid progress, and Troy folks are anxious to hear them. Those who have been in touch with the work of the newly organized band praise Mr. Thomas very highly as a leader and report that he is rapidly working the musicians into seasoned players. Kendrick has been interested in Troy's fair and they will win the praise of Troy folks if they will come up strong and bring the band with them to keep the crowds on their toes.

Star-Mirror: A big refrigerator car loaded with Julietta grown watermelons was loaded out from that town yesterday by C. H. Hamm of Lewiston, for Great Falls, Montana. The growers were Walter Cochran and B. C. Custer. It is significant that, while seven or eight carloads of watermelons are raised at Julietta each year, and this season was no exception to the rule—yet this is the first load of melons to go by rail this year—the increased freight rates having been prohibitive. The rest of the melons this season went by trucks to the many towns of the Inland Empire including Troy, Moscow, Bovill, Deary, Potlatch, Palouse, Pullman, Garfield and Colfax. "Julietta watermelons" is fast becoming as significant a term as is that older phrase, "California oranges." The Julietta melons are all grown without irrigation, and their fine flavor and high percent of sugar make them most popular. Julietta growers are now beginning to "brand" their melons to protect them from being classed with melons grown in the irrigated districts.

Genesee News: The harvest season is practically over in the Genesee country and only a few more fields of grain remain to be threshed and no doubt the end of this week will see every bit of grain in the warehouses.

Only a few individual average yields were obtained by the News, but all reported good averages, running from 35 to 50 bushels of fall wheat and from 32½ to 42 bushels of spring grain. Practically all fall sown grain is reported as No. 1.

Mrs. Henry Hill went to Palouse last Saturday to visit relatives.

Farm Monotony?

A Kansas scribe gives his version of the popular idea that farm life is monotonous. Well meaning, but densely ignorant, editorial writers ever now and again, bemoan the routine, unexciting, unvaried life the farmer leads and wisely opine that what the rural world needs is more excitement, more hazard, maybe, more varied interest. The wise writers should accomplish a mess of farm chores before breakfast and supper for a few weeks; they would discover that the rural vocations contain all the hazard and excitement that is left in business today. In town the days are about the same; you catch the same car, or crank the same flivver, morning and evening; you dodge just so many taxis and milk trucks, or miss just so many hesitating matrons with baby buggies. But in the country it's different. If you milk a string of 8 cows the farm average, it is a gold letter day in the year that at least 1 bovine monster doesn't swat you in the eyes with her tail, or joggle the pail from between your legs, or bowl you over without warning. When you feed the calves it is another rare day when 1 calf doesn't suddenly buck up and butt you half across the shed, while its brother bunts the pail from your hands, and its half sister steps on your good foot; the other one being out of commission because the axe slipped yesterday. If you curry and feed the horses, or wind up the tractor, and you escape without at least a back fire, or a back kick, or a nip from the mare who always has a grouch until noon, you are again unusually blessed. And thru the long hours until bed time nature offers her various moods, many of them contrary. The sharp shinned hawk swoops down and with a swirl of feathers finishes the last broiler the owls had left. The digger squirrel, the mole, the field mouse and the shrew—omnivorous hog of them all—clean out your sweet corn and excavate your potato patch and mow down your early peas and then sit around and sneer at the castor beans you planted to keep them out of the garden. If you plow you will doubtless discover a wasp's nest, too late. If you spray an apple tree, a protesting bee or 2 twain or 20 will light on you and warm the corner where they are. Hazard, interest, danger, the untimely arrival of the unexpected thrills; do you desire these things in abundance? Then, get you to the farm, any farm, anywhere.—Highland Vidette.

Paid \$40 Fine

Emulus Brown, a resident of Fossil, Oregon, appeared before Justice of the Peace Hull, Wednesday morning, and paid a fine of \$40, which included court costs, for fishing without a non-resident license. Mr. Brown secured a resident's license shortly before going to the North Fork last month on a fishing trip, but as he was a non-resident of Idaho the matter was reported to the authorities and Mr. Brown was advised to appear before the justice of the peace and plead guilty to the offense, which he did.

School Notes

The Kendrick Schools will start Monday, September 12th. Everything is in readiness and a good enrollment is anticipated. Three new subjects are being offered in the High school. This enables the school to offer four very good courses. The commercial and scientific courses being especially strong.

The school library has been materially strengthened through the kindness of Miss Esther Hood. Her donation consists of a 32-volume set of Science books, a 32-volume set of the World's Best Histories and 20 miscellaneous volumes. The school is fortunate indeed in receiving such a gift as the library needed strengthening along these lines.

FOUNDER AND PRESENT PRESIDENT OF THE WORLD'S W. C. T. U.

Thirty-eight years ago, at a meeting held in San Francisco, where the Woman's Christian Temperance Union is holding its national convention, August 18-23, the organization of the World W. C. T. U. was effected. Frances E. Willard, who organized the work in the United States and was the compelling force throughout the years of its development into a great national institution, was the instrument through which the women of the world were brought together for temperance work. Today the world organization includes in its membership women from every civilized nation of the world. The present president, Rosilind, the Countess of Carlisle, lives in England in Castle Howard, the ancestral seat of her family. Miss Anna A. Gordon, president of the W. C. T. U.

ROSILIND CARLISLE

FRANCES E. WILLARD

Council Met Tuesday Night

The city fathers met in regular monthly session last Tuesday night with Mayor Walker, Trustees Raby, Rogers and Long, present. The usual number of bills were allowed and the general business for the month taken care of.

Dr. Kelley, health officer, met with the members of the board and brought to their attention the condition of several old buildings in town. He stated that they were unsanitary and were a fire trap and a menace to other property in the town. The matter was referred to the fire and building committee. If the committee recommends that the buildings be condemned at the next meeting of the council, the board will take action and no doubt order the buildings torn down. The buildings referred to are the old feed barn and house on the Sterling lots, on Main Street and the Linda Hamley house just back of the Methodist church.

Another matter that was brought up at the meeting was the rather dilapidated condition of the sidewalk along the side of the Fraternal Temple building. The members of the board agreed that this should be brought to the attention of the Fraternal Temple Co. as the board walk would probably be replaced with cement after due consideration on the part of the members of the company.

Repair parts were ordered for several of the fire hydrants which have been leaking for some time.

The board authorized the treasurer, Harry G. Stanton, to pay off another water bond in the sum of \$1,000. This is the second bond that has been paid within the period of a year, only \$3,000 remaining unpaid on the system.

As there was nothing further to bring before the board the meeting adjourned.

Will Return Soldier's Body

Ole Lien of Big Bear ridge received a telegram last Friday from Hoboken stating that the body of his son, Martin, would be sent here some time next week.

Martin Lien was killed in action in France. Plans are now being made for a military funeral to be held under the direction of the American Legion.

Jeweler Located Here

C. B. Kinzer has rented a corner of the Red Cross Pharmacy, formerly used for the soda fountain, and is installing his watch repair shop there. He is now busy catching up with work which has accumulated during the past several weeks.

Mr. Kinzer is a first class jeweler of wide experience. He was located at Julietta several years ago and is well known in this territory. He will no doubt do a flourishing business here.

Born to Mr. and Mrs. R. H. Clemenhagen of Big Bear ridge, Monday morning, a daughter.

Dim Glaring Headlights

Bright headlights are no doubt a big asset to the man driving at night over torn up and rough roads or through dangerous passes. However, to the fellow tourist who desires to pass, the above is a decided liability. He is blinded and helpless, he does not know whether to turn to the right further and possibly go down the embankment or stay where he is and have his fenders torn off. He becomes bewildered.

Practically all cars are equipped with dimmers, and in most states a law is on the statute books compelling the use of them when meeting another car. Severe penalties are inflicted in the larger cities for non-observance of this law.

In one instance a driver coming from Spokane by night tried to induce others to put on their dimmers by doing so himself. Out of twenty-six cars passed that night only one responded.

Auto accidents are all too plentiful in these days of "ship by truck and auto," and if each driver would apply the old time Golden Rule the number of accidents by night would be reduced.

Change Rural Carriers

Changes will occur on both rural routes out of Kendrick as a result of the civil service examination held some time ago. On route No. 1, P. G. Candler will give way to a man from Moscow. Mr. Anderson, a former school teacher, will take over route No. 2, which has been handled by Floyd Stevens.

Plenty of Wood Here

There seems to be an unusually large amount of wood cut in this vicinity, which is a fortunate circumstance, as there will no doubt be more wood burned this winter than usual, owing to the extremely high price of coal. Wood delivered to Kendrick has been retailing for \$3.00 a cord and at that price it is at least on a par with coal from the standpoint of economy. Another reason why we can afford to burn wood is that it is a home product and those who have wood to sell need the ready market for it.

Found Keg of Mash

Walter Housley, town marshal, captured a 25 gallon keg of mash on the Nez Perce county side of Potlatch creek, east of town. The mash was discovered by one of Fred Crocker's boys while he was fishing in the creek. He threw a live "chub" in the mash but the fish contracted alcoholic poisoning and died. Mr. Housley, in thus looking after his official duties, knocked somebody's fond expectations in the head.

Mr. and Mrs. H. H. Stevens, who sold their house here last week, have moved to the A. E. Wilcox ranch above Orofino.

Brooks on The Job

L. E. Brooks, deputy state game warden, has been in this territory a greater part of the week checking up on violators of the game laws. He stated that so far he had found little reason for complaint as the closed season on birds is being generally observed. He has evidence against some of the boys in this vicinity and prosecutions may follow if they persist in breaking the law, but aside from these few cases, Mr. Brooks says, he is well satisfied with the way the game laws are being respected.

He wished to have it brought to the attention of the people of this community that the opening of the bird season, September 15, means that only grouse and native pheasants may be killed. Hungarian pheasants, quail, China pheasants, etc. are still protected by the closed season until a later date. Mr. Brooks said that this fall game bags will be checked and those who take more than the limit, or who kill any birds but grouse and native pheasants, will be fined heavily. The fine is not less than \$50 and costs and includes confiscation of the gun, which will be sold for cash at auction to the highest bidder. The bag limit is four grouse or pheasants or a mixed bag of six birds. Be safe and read the instructions on the back of your license.

Mr. Brooks stated that last year fines which he collected amounted to one-fifth of the fines of the whole state and that this year he had already made a good start. He said that the most disagreeable part of his job was to prosecute those who violate the law, but he believed that it was his duty to see that the game laws of the state were obeyed. Those who are interested in seeing the game in this section protected during the closed season, will endorse Mr. Brooks in his work.

Cashier Peck Bank

Mrs. Bryon F. Smith and children went to Peck Thursday. The Smith family will make their home there as Mr. Smith has been appointed cashier of the new Peck bank. The friends of Mr. and Mrs. Smith will be glad to learn that they are so pleasantly located. They will be greatly missed here, particularly in church circles as they were both active church workers.

Kenneth Brocke, who has been quite ill at a Moscow hospital, returned home last Saturday afternoon. He is still weak but the hospital treatment seemed to help him. Kenneth is a fine boy and one of the best little rustlers in all the country. He has been a great help to his mother.

About forty couples attended the annual Harvest Dance here last Friday night. It was a very pleasant social affair and the music was splendid. The orchestra was composed of Walter Thomas, piano; A. K. Carlson, violin; Harold Thomas, saxophone; Edwards of Lewiston, drums.

Ordered Carload Picric Acid

An order for one carload of 24,000 pounds of picric acid for use by farmers of Latah County in clearing cut-over land of stumps for agricultural purposes was sent to Washington, D. C. on Friday, September 2nd. Orders of individuals and communities were received by County Agent O. S. Fletcher, and these orders and a draft for a carload of picric acid were turned over to Dean E. J. Iddings, of the College of Agriculture at Moscow, who forwarded the order to the authorities at Washington, D. C.

Orders of one hundred farmers made up the total carload ordered, so that the average per farmer was 240 pounds. Orders were received from ten communities, representing all but a very small part of the cut-over sections of Latah County. Communities from which orders for the explosive were received are: Rock Creek, Crane Creek, Kennedy Ford, Deep Creek, Princeton, Harvard, Avon, Deary, Troy and Moscow. Farmers of the Cedar Creek community, east of Kendrick, and of the canyons tributary to Julietta, wanted picric acid but felt that they would have to haul it too far, since the carload will be shipped in on the W. I. & M. railroad.

The picric acid costs the farmers six cents per pound plus the freight from Sparta, Wisconsin. The freight will be between five and six cents per pound. The Potlatch State Bank, of Potlatch, and the Latah County State Bank, of Deary, have guaranteed the payment of the freight on the entire car. This service of the banks makes it possible for the farmers to pay the freight upon receipt of the shipment.

The Latah County order is the second carload to be ordered for farmers of the State of Idaho. A carload was ordered for Bonner County on August 14th and was shipped from Sparta, Wisconsin, on August 27th. It is hoped that the carload of explosive for Latah County will reach here early in October.

Mating Poultry

Pren Moore, Poultry specialist of the extension division of the University of Idaho, will be in Latah County during October or November, to assist breeders of poultry in mating their breeding flocks for the coming season. Special attention will be paid to the selection of proper male birds and farmers will be given advice as to what hens to keep in their breeding pens. This work will be personal service and Mr. Moore will be taken from farm to farm where this work is wanted by County Agent O. S. Fletcher. All farmers desiring to have the assistance of Mr. Moore in this important work in poultry should communicate at once with County Agent Fletcher of Moscow, and request that Mr. Moore be brought to their place to help mate their flocks. Requests must be made at once so that Mr. Moore can make out his schedule.

Rebekahs Choose Delegates

At the regular meeting of the Rebekah lodge here last Tuesday evening, Mrs. Susan Pemberton was elected representative No. 1 to Grand Lodge and Mrs. Pearl Long representative No. 2. Mrs. Anna Brocke was elected district deputy president for the coming year.

The Rebekah anniversary will be observed by holding a canned fruit shower at the fraternal temple, September 20. The shower will be for the benefit of the Odd Fellows' Home. All Rebekahs are requested to attend and are asked to bring as many quart jars of fruit as they wish. Those who are not able to be present may leave fruit at McDowell's store up to the evening of the twentieth as it will be packed that evening for shipment. Refreshments will be served after the packing of the fruit.

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.
Subscription \$1.50 a year.

Foreign Advertising Representative
THE AMERICAN PRESS ASSOCIATION

Miss Esther Hood's generous donation of several sets of books to the school library is an example that might well be followed by interested patrons of the school. There are no doubt many people in the community who have reference books which they seldom, if ever, use. They would be useful to the pupils of the school as they need a wide range of reference books in their work. Donations to the school library are always acceptable.

History tells us many instances in which wild men have attacked and overcome those who had adopted civilized modes of living. The wild men ultimately adopted civilized customs and conveniences. The most lawless bands, if held together long enough, will begin to make laws. Modern houses are more comfortable than tents and even too many laws are better than none.

From the Pathfinder: One day I met an old colored man toting a fine ham under each arm. It was a grey, cold day, windy and threatening snow, but the old fellow had on a ragged seersucker coat and seersucker trousers—you could see his black skin thru the many holes. "Ephraim," I said, "Why did you spend your money for those magnificent hams? You'd have done better to buy an overcoat." Old Eph rolled his eyes at me and said solemnly: "Marse Henry, when Ah axes mah back fo' credit Ah gits it; but when Ah speaks to dis"—and he gave his stomach 3 or 4 whacks with a ham—"it calls fo' de cash."

Last year this country spent millions filling up the empty stomachs of the famine-stricken Chinese. Now comes unfortunate Russia with cries for aid—the dying wails of Bolshevism. In spite of the fact that we have a certain class of people in this country who are prone to calamity howling, who are against the "big insterests" and are down on our present system of government, the United States, the land of plenty, has always been able to stretch forth the helping hand to other nations in distress. It is estimated that twenty million Russians are living on the bark of trees, as grasshoppers and drouth have cleaned up every green thing. America will send shipload after shipload of food to these people and will still have plenty for Americans. It is a wonderful privilege to live in this land of ours.

Last year's tobacco crop weighed about one and one-half billion pounds. Imagine the "smoke screen" if all of this weed had gone up in one big puff.

Every year about this time there is a wheat car shortage. A remedy has been suggested. Raise the freight rates again and the wheat won't be worth shipping. Result, plenty of cars.

The cost of living has dropped 20 per cent. It's the 80 per cent that bothers most of us.

EMANUEL LUTHERAN CHURCH
Cameron, Idaho.

Regular German services Sunday morning at 10:30 a. m. Subject, "The Prayer of the Apostle St. Paul or the Faithful Ones at Ephesus," based on Eph. 3: 13-21.

English Services at 7:30 p. m. Subject, "The Christiaf Church," based on Acts 2: 1-13.

Sunday school at 9:30 a. m. The choir meets Thursday evening at 7:30 p. m.

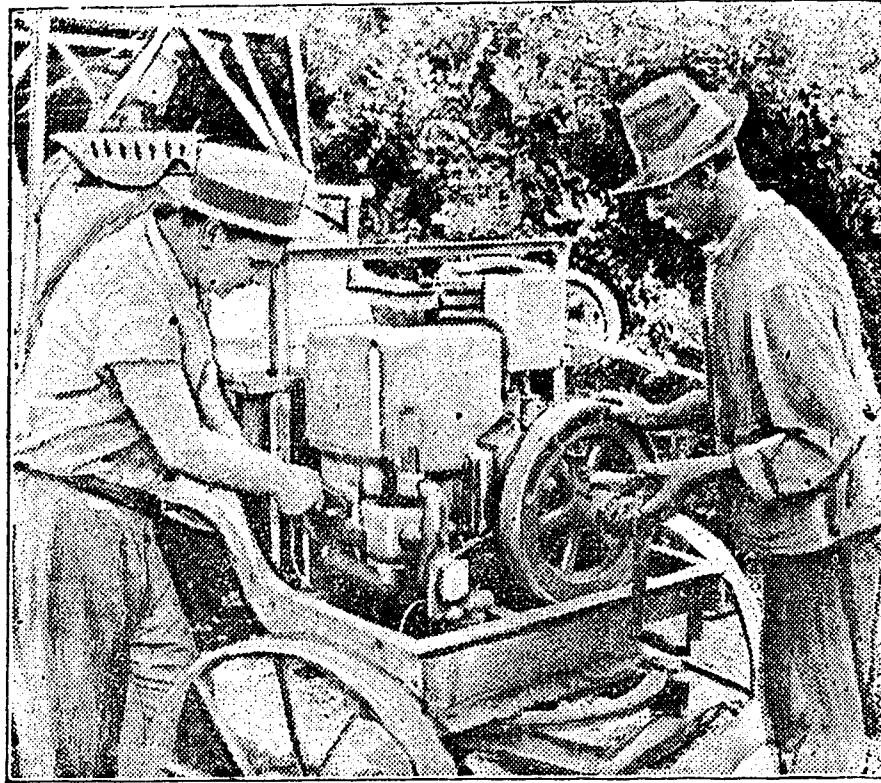

Young people social meeting Wednesday evening at 7:30 p. m. at the parsonage. German school Saturday at 8:30 a. m.

A hearty invitation is extended to all to attend these services and worship with us.

Rev. E. A. Rein, Pastor.

GAS ENGINES REQUIRE PROPER MANAGEMENT TO BE EFFICIENT

A Knowledge of Gasoline Engines Saves Time on Repairs.

(Prepared by the United States Department of Agriculture.)

Thousands of farmers in all parts of the country use gasoline engines as a source of at least part of their power. The number in every branch of farming is increasing rapidly. From the production of crops to their harvest and preparation for sale, and even their transportation to market, the gasoline engine facilitates the business of farming. Tractors, gas engines to run belt machinery and motortrucks are enabling farmers to increase their operations. It is, therefore, good business on the part of the farmer to use them whenever time, labor and costs can be reduced.

Though the gas engine, whether the stationary type, tractor, truck or automobile, is a great labor saver when operated efficiently, it is also at times the cause of a great labor waste. Often large crews hired to help with threshing, hay baling, cutting ensilage, etc., draw full wages for hours spent in idleness owing to inefficient handling of the engine. A man will sometimes spend much more time and energy in starting a gas engine to pump water for stock, run a milking machine or for some other similar purpose, than would be required to do the work by hand. Such lost time is to a great extent preventable. Gas engines are not difficult to operate, and delays from engine trouble are usually due to the operator's lack of knowledge of some of the details essential to proficient operation, say specialists of the United States Department of Agriculture.

Keep Engines in Repair.
The first essential in gasoline engine operation is to keep it in good repair, say the specialists. All catalogues and directions furnished by the manufacturer should be studied carefully. Most manufacturers publish instructions on the care and operation of the engines they manufacture, and in order to get the most satisfactory results from an engine the owner should study and put into practice these instructions.

Every one who operates a gas engine should learn first to stop and reason as to the probable cause of any trouble which develops. In tracing trouble a definite system should be followed. When an engine refuses to start the trouble will, with a very few exceptions, be due to some interruption of the supply or the proper mixture of gas and air, or to the failure of the electrical system which furnishes the spark to fire the compressed mixture. Every system to locate trouble should take these two points into consideration.

Testing the Ignition System.
With all engines using spark plugs it is comparatively easy to ascertain whether electrical or ignition system is working properly. Remove the plug and by taking it apart see if the porcelain is not broken. See that the points are properly spaced and remove the deposit of carbon. A space of about one thirty-second of an inch—the thickness of a worn dime—is the proper distance between the points.

To test the spark connect the wire with the plug and place the latter so that the metal base touches the engine casting, then crank the engine and note whether a spark jumps the space between the points. This spark should be a heavy blue, a bluish-white, or a "fat" yellow one looking like a small flame. But if it is thin and greenish, or showing red, the chances are it is too weak to fire the charge of gasoline. In such case, or if there is no spark, trouble may be in the wire connections, or the magneto, or if dry cells are used, they may be too weak. See that all the wire is properly insulated and not soaked with oil, and that all connections are tight and clean. If there is no trouble in the wiring and dry cells are used, the latter may be tested by attaching the wires direct to the points of the cells. Though magnetos seldom give trouble, if there is every reason to believe that it is not functioning properly, it should be taken to an expert for repairs.

See That Fuel is Supplied.
When an examination shows that a good spark is being obtained at the right time, the next step is to see whether the engine is receiving the proper mixture of fuel and air. Examine the carburetor and make sure that the gasoline reaches it properly. Sometimes water gets into the carburetor and gives considerable trouble. For this reason the carburetor and

gasoline line—the pipe connection from the gasoline tank—should be drained to remove not only any water which may be present but particles of dirt. It sometimes happens that the needle valve in the carburetor is closed or stopped with dirt and the gasoline cannot pass. If the engine has a petcock leading into the combustion chamber, by opening this and cranking the engine a few times one can tell by smelling the escaping air whether gasoline is entering the chamber. If it is not, open the needle valve, first being careful to note the original position so that it will be possible to adjust it. It is sometimes necessary to remove this valve in order to clean it properly. When the engine is running the valve may be opened or closed slightly in order to get the proper mixture of fuel and air with which the engine runs best.

CHINESE TO STUDY TANNERY

University of Peking to Have Modern Machinery for Working Leather.

Peking.—The Peking university is about to introduce into its curriculum a course in tannery. Students taking up "leather" will be required to spend twelve hours a week in the practice laboratory, which is being equipped with modern leather working machinery from the United States and stocked with the latest chemicals and dyes and the most improved tanning compounds.

Dr. H. S. Vincent and John Wang will be in charge.

Loses Wooden Leg, But Swims Ashore.

Gilbert, Minn.—While Harry Woodward, a good swimmer, was drowning, Roy Rhodda, minus his two wooden legs, which became loosened when a boat occupied by five men overturned, swam 300 yards to shore. Rhodda told friends that two of his companions utilized the wooden legs to aid them to reach shore.

\$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages and that is catarrh. Catarrh being greatly influenced by constitutional conditions requires constitutional treatment. Hall's Catarrh Medicine is taken internally and acts thru the Blood on the Mucous Surfaces of the System thereby destroying the foundation of the disease, giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in the curative power of Hall's Catarrh Medicine that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, Ohio. Sold by all Druggists, 75c.

Shoes at Low Prices

Bring the children to this store for the school shoes.

The home of good sturdy dependable shoes at low prices.

Boy's Army Shoes at \$3.90

Boy's soft tan army shoes with soft tip, made for hard wear, size 2½ to 6. Same shoe as above in smaller sizes at \$3.25 and \$3.50.

Boy's School Shoes at \$3.90

Gun metal bluchers made with good strong sole, sizes 2½ to 6.

Boy's Dark Brown Blucher at \$3.90

This shoe is our very best and will last the average boy six months. This shoe is made of solid leather, double sole, leather counters and full vamp. Buy this shoe for service.

Misses Shoes at \$2.90

Misses black school shoes, gun metal leather, broad toe, good serviceable soles, sizes 2½ to 6.

Children's shoes, \$2.25 to \$3.25. Good strong school shoes either in brown or black.

We recommend and sell Black Bear Hosiery for boy and girl.

HEAVY FEED RESULTS IN BIG MILK YIELDS

Test Made With Purebreds on Government Farm.

Rations Made Decidedly More Liberal Than Those Called for by Any of Feeding Standards, Especially Grain Mixture.

(Prepared by the United States Department of Agriculture.)
 During the last two years a number of the purebred Holsteins at the government farm at Beltsville, Md., have been run on official test. In order to increase their milk yield their rations were made decidedly more liberal than those called for by any of the feeding standards. During the milking period they received daily about 12 pounds of alfalfa hay, 20 pounds of corn silage, and as much grain as they could clean up without getting sick; they usually ate eighteen to twenty pounds a day of grain mixture F. They were fed heavily also before their calves were

One of Holstein Herd on the Government Experiment Farm.

born; for 60 days or more before calving they usually received about 15 pounds of grain mixture F, 12 pounds of alfalfa hay and 25 pounds of corn silage, a ration containing approximately four times as much protein and two and one-half times as much total nutriment as the routine ration fed to the dry cows of the general herd.
 The cows on test gave from 15,000 to 20,000 pounds of milk in the year; that is, three to four times as much as most of the cows in the general herd. A part of this larger yield is due to the fact that the test cows were better bred, but a part also is due to the larger quantity of feed they consumed, say specialists of the United States Department of Agriculture in charge of the tests. How much of the increased milk yield to attribute to each of these factors is a question of great practical interest.

NEED OF BUSINESS PRACTICE

Many Co-operative Associations Have Failed Because of Lack of Financial System.

Lack of proper financial systems has been the cause of failures in many co-operative associations, say specialists of the bureau of markets, United States Department of Agriculture, who feel that now is an opportune time for emphasizing the need of good business practice among farmers.

The bureau of markets has much information on systems of accounts and business practice for co-operative associations, and either directly or through extension workers it is prepared to give assistance in installing good accounting systems for co-operative grain companies, cotton warehouses, country creameries, fruit shipping associations, egg circles, co-operative cheese manufacturing and marketing associations, and co-operative grain elevators.

Short courses of study in market accounting have been prepared and are used in a number of colleges throughout the country, and are also given at field points where marketing associations are numerous. Systems of accounts are furnished upon request, and advice and assistance relative to their installation is given through correspondence and by means of bulletins especially prepared for this purpose.

See Manford Nutt at Juliaetta if you want tomatoes, water melon or cantaloupes.

IMPROVING SOIL BY COVER CROPS

They Add Humus, Accumulate Nitrogen, Prevent Erosion and Loss of Plant Food.

RYE LARGELY USED IN FALL

Problem Varies Largely With Locality, but It Is Best to Get Good Growth Before Freezing Weather—Methods Also Vary.

(Prepared by the United States Department of Agriculture.)
 Planting cover or green manure crops is a matter which requires attention in August or September in most parts of the United States, say experts of the United States Department of Agriculture.

Clover, vetch and other legumes serve the triple purpose of adding humus to the soil, accumulating nitrogen and preventing soil erosion. With some tender berry and fruit crops they also serve to protect the roots from severe winter weather. Outside of the nitrogen-forming plants, rye is largely used as a cover crop sown in the fall and plowed under in the spring to add organic matter to the soil. The cover-crop problem varies largely with locality, but for over-winter purposes there is one rule which is universal, and that is to get the crop in the ground in time to secure good growth before frost.

A Practice of Long Standing.
 The use of clover or some other legume to enrich the soil is generally considered a cardinal agricultural practice in the humid sections of the United States. It antedates by three-quarters of a century the monumental discovery that legumes store up nitrogen from the air. The belief that clover was a valuable improver rested first on experience, and later experience was substantiated by the discovery of the relation between the legumes and the nodule bacteria.

Other legumes, as the cow pea, the Japan clover and bur clover in the South and crimson clover on the Atlantic coast, have come into use in the

The Cover Crop Should Make a Fair Amount of Growth Before It is Turned Under.

territory not well adapted to red clover. The various vetches are held in widespread favor, different varieties being employed according to climate and crop conditions.

When to Sow Cover Crop.
 The time of planting and the best crop to use is a matter which local conditions must dictate. Along the north Atlantic coast it is considered best to get these crops in from the first to the middle of August, while in the extreme South the planting may be deferred to early October. In the extreme North hairy vetch is favored as a legume, cover or green manure crop, but rye is also largely planted. From middle Pennsylvania to the north Alabama line crimson clover gives good results. In the extreme South bur clover, vetch and crimson clover are used, as well as velvet beans and cow peas.

Wherever clean cultivation is practiced the soil is likely to be in shape for broadcasting the seed. If convenient, it can be harrowed in. In orchards a light harrowing or disking may be employed if the ground is free from soil. Care must, of course, be taken not to injure the roots. The crop is usually plowed under in the spring, but this is not always done with orchards. Data collected in all parts of the United States shows a general benefit from this form of agriculture.

Cover crops are of especial value to small gardeners and truckers, who often find it both difficult and expensive to obtain stable manure. They add the humus which is so necessary to maintain a good physical condition of the soil. Wherever there is a vacant place in the garden a few seeds of rye, vetch, clover, etc., may be sown and raked in. If a suitable rotation of crops is followed, all parts of the garden may be covered with a green manure crop once every two or three years.

QUARANTINE ALL NEWCOMERS

Safest Plan to Separate Strange Stock for Week or Two to Determine Condition.

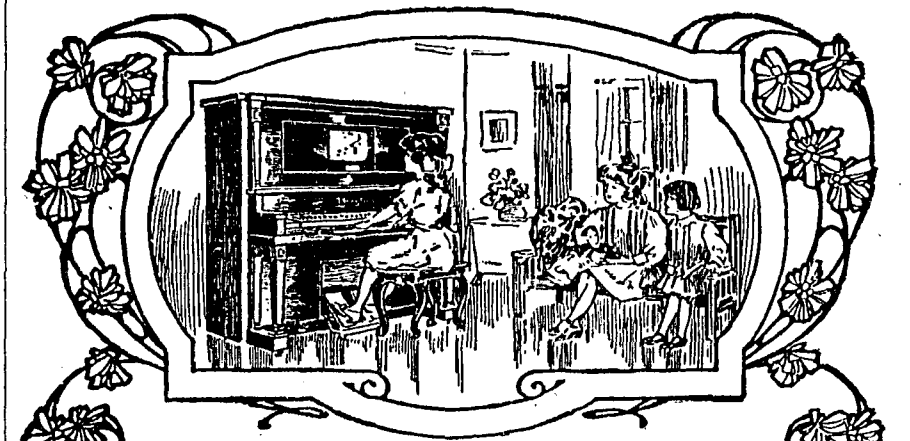

It is safest to quarantine the newcomer. Careful breeders never place strange stock in their pens until they have been kept separate for a week or two, so that they may know if they are in a healthy condition.

Keep Well and Be Happy
 If you would be happy you must keep your bowels regular. One or two of Chamberlain's Tablets taken immediately after supper will cause a gentle movement of the bowels on the following morning. Try it.—Adv.

CLEAN POTATO STORAGE BINS

Farmer Who Has Been Troubled With
Dry Rot is Warned to Disinfect
Thoroughly.

Every grower who experienced trouble with dry rot in his potato storage house or cellar the past season—and there was trouble of this kind because of the comparatively warm winter—is warned by A. G. Tolaas of University Farm, St. Paul, chief inspector of the potato seed certification department, to disinfect thoroughly all bins before using them again. Either a solution of formaldehyde, consisting of one pint of commercial formaldehyde in ten gallons of water, or a solution of bluestone (copper sulphate) consisting of one pound of the bluestone dissolved in ten gallons of water, should be used for this purpose.

BEST PRICES FOR BROILERS

Easiest Way to Have Fowls of Uni-
form Size and Quality is to
Stick to One Breed.

Broilers bring the best prices when they are uniform in size and quality. The easiest way to do this is to have them all of one breed, as a crate of mixed breeds will vary in size and shape even if they are all of the same age.

LIQUID MANURE IS HELPFUL

Of Particular Value in Garden When
Vegetables Do Not Make
Proper Growth.

American farmers, generally, are not familiar with the great value of liquid manure, and the way to apply it. It is exceptionally helpful in the garden and especially when any particular vegetable is not showing the proper growth. When any plants seem weak and standing still, an application of liquid manure once a week for a few weeks will work changes that will seem almost miraculous. Liquid manure is a reviver of dying plants, for it supplies nutrition in an easily assimilated form. It may be easily provided, and should be provided for every garden.

METHOD OF APPLYING LIME

Some Farmers Obtain Good Results
by Using Manure Spreader With
Beater, Reversed.

Lime may be applied either in the fall or spring. The proper method of application is important from an economical standpoint. Scattering with a shovel is wasteful and the distribution cannot be uniform. The method used by some farmers with very good results is to reverse the beater of the manure spreader by crossing the drive chains. Then the apron may be covered with canvas to prevent the loss of the fine stone. With this method it is easy to get a uniform distribution.

AMERICAN CLASS OF
FOWLS IS POPULAR

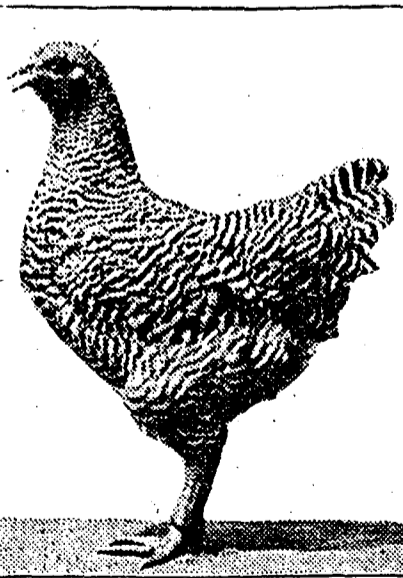

Good Egg Producers and Meat
Well Suited for Table.

In Size They Are Intermediate Be-
tween Small and Large Breeds
and Are Fairly Good Foragers—
They Make Good Mothers.

(Prepared by the United States Department of Agriculture.)

In the American class of poultry are found the Plymouth Rock, Wyandotte, Java, Dominique, Rhode Island Red and Buckeye.

The fowls of these breeds are commonly called general-purpose fowls, because they are not only good egg producers, but their carcasses are also well suited for the table. They are therefore the best breeds for the general farm flocks of chickens, say poultry specialists of the United States

Splendid Barred Plymouth Rock Pullet.

Department of Agriculture. They are in good favor, too, with the poultry packers on account of their table qualities.

All the American breeds lay brown-shelled eggs. They all have yellow skins, and shanks free from feathers, which are desirable qualities for table fowl in this country. In size they are intermediate between the smaller egg breeds, such as the Leghorns, and the larger meat breeds, such as the Brahms. In temperament they are also intermediate, being less active than the egg breeds, but more so than the

Your Paint Dollar

—How Big in 5 Years?

THE best paint will be good five or more years hence, if properly applied. Cheap paint, on the average, starts cracking in twelve months.

It's what paint covers that you want to save—not merely a few cents per gallon in first cost.

Cheap paint does not spread as easily or as far as good paint. So when you figure labor and square yards covered, cheap paint on the house costs as much as good paint.

Cheap paint in practically every instance, is the most expensive you can buy.

Don't allow surfaces to rot. It costs less to paint them.

The paints specified by Fuller are the result of 72 years experience in the making of all kinds of paints, varnishes, etc., for western use.

We use the best materials, PURE PIONEER WHITE LEAD, pure linseed oil, zinc and color as others do, but we combine them with a 72 years' knowledge and long-time skill.

Our white-lead base is finely ground pure white. It must pass through a silk screen with 40,000 meshes to the square inch. We use special machines for mixing the materials in scientifically exact proportions.

So Fuller colors are exceptionally clear-toned and Fuller House Paints are noted for covering capacity, ease of spread and great durability.

If you want from five or more years' protection for your property investment, get Fuller's western paint for western weather conditions—a paint you know.

MRS. ELLA A. BOOLE

MISS ANNA A. GORDON

MRS. SARA H. HOGE

MRS. ELIZABETH PRESTON ANDERSON

MRS. FRANCES P. PARKS

MRS. MARGARET C. MINTON

The Women's Christian Temperance Union will meet in national convention in San Francisco, August 18 to 23, inclusive, the sessions to be held in the great convention hall in the civic center of the coast city. Miss Anna A. Gordon, national president of the organization, will preside at the meetings. The other general officers, all of whom will be in attendance throughout the convention, are: Mrs. Ella A. Boole of Brooklyn, New York, vice

president at large; Mrs. Margaret C. Munn of Evanston, Ill., treasurer; Mrs. Frances P. Parks, also of Evanston, corresponding secretary; Mrs. Elizabeth Preston Anderson of Fargo, N. D., recording secretary and Mrs. Sara Haines Hoge of Lincoln, Va., assistant recording secretary.

This is the forty-eighth national meeting of the organization and the first to be held since the Eighteenth amendment became effective. The time will be given chiefly to the develop-

ment of the working program for the ensuing year, with special speakers to talk on subjects related to the work of the organization. Particular stress will be paid to the outlining of a program to make perfect the enforcement of the prohibitory law and to render yet more effective the activities of the several departments of organization endeavor. Americanization, Child Welfare, Scientific Temperance Instruction, Social Morality, Women in Industry and Christian Citizenship.

TO REMOVE TIRE FROM SPLIT RIM

Easy Matter to Construct Contracting Tool That Will Do the Work Easily.

PREVENTS BRUISED FINGERS

So Great Is Leverage of Twisting Post That Little Actual Strength Is Required to Contract Rim—Graphite Helps.

Any one who pulls and tugs on a split rim in an endeavor to remove the tire is as foolish as the fellow who tries to blow up a tire with his mouth and lungs. It is an easy matter for any one to make a split-rim contracting tool that will do the work without wasting one's strength.

The essential parts are three chains, three hooks, and a twisting post. The latter may be made from a piece of two-inch iron pipe, about six inches in length. Each of the three chains is fitted with a hook which is bent to fit over the edge of the rim. The other ends of the chains

The Pipe Revolving Upon the Chains and Clamps Easily Pulls Out the Split Rim Far Enough for It to Be Removed.

are fastened to the pipe and spaced 120 degrees apart, as shown in the sketch.

Two holes are drilled in the two-inch pipe at opposite sides to admit a one-quarter-inch bar for twisting. To use the device the chain hooks are put into place on the rim and the pipe given a twist. This action winds the chains around the pipe, yet so great is the leverage obtainable that

SUMMONS

In the Justice Court, Kendrick Precinct, Latah County, Idaho, H. P. Hull, Justice of the Peace, N. B. Long & Sons, Plaintiffs,

vs.
E. C. Young, defendant.

The State of Idaho sends greetings, to E. C. Young, the above named defendant.

You are hereby notified that a complaint has been filed against you in the Justice Court, Kendrick Precinct, Latah County, Idaho, by the above named plaintiffs, of the nature and in general terms as follows:

To collect on a bill of goods, wares and merchandise sold and delivered to defendant between November 1st, 1920 and December 1st, 1920, to the amount of Fifty-seven dollars and thirty-eight cents (\$57.38), together with interest and costs of this action.

And you are hereby directed to appear and answer said complaint within twenty days of the service of this summons, if served within the county of Latah, State of Idaho, and within forty days if served elsewhere, and you are further notified that unless you so appear and answer said complaint within the time herein specified the plaintiffs will take judgement against you as prayed in said complaint.

Witness my hand this 12th day of August, A. D. 1921
H. P. Hull, Justice of the Peace,
Kendrick Precinct, Latah County,
Idaho.

DRAINAGE MAKES WET LANDS GOOD

Too Much Moisture in Soil Retards Cultivation and Reduces Yield of Crops.

PLANTING ALSO IS DELAYED

Drains May Be Either Open Ditches or Tile or a Combination of Both—First Make Careful Survey and Examination.

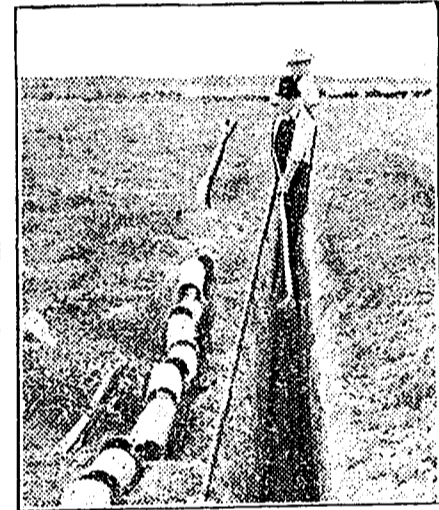

(Prepared by the United States Department of Agriculture.)

The effect of too much moisture is readily apparent in farming a wet area, although persons not acquainted with drainage do not always recognize the presence of too much water in soils that are not saturated, say specialists of United States Department of Agriculture. The low part of the field is not ready for plowing and planting as early in the spring as the higher parts; hence, unless the spot is to be abandoned, the farmer either must finish the task another day or leave the whole until such time as the wet place can be worked. Planting on all or part of the field is then delayed frequently seven to ten days later than on land better drained.

Undrained Land Slow to Warm Up.

The wet ground is cold, too, and the seed in it sprouts more slowly. The difference between the two parts or the two fields continues to grow as the season advances; the undrained land frequently cannot be cultivated until several days after heavy rains, and again coldness retards crop growth, as in the spring. The difference in temperature may be six to ten degrees between the drained and undrained soil. The effect of later planting and slower growth must be apparent in the harvest, especially where the growing season is cut short by frost. On a field not uniformly well drained the crop will mature unevenly, and not only will the yield be impaired in amount, but if uneven in quality the crop will be rated for market at a low value.

Farm drains may be either open ditches, or tile, or a combination of

Digging the Ditch Preparatory to Laying the Tile.

the two. The "blind ditches" of stones or poles covered with earth have been practically abandoned because they are not permanent, usually becoming clogged with earth in a few years. Open ditches are usually less costly to construct, especially when large capacity is required, and water on the ground surface will flow into them more readily, but for the smaller drains tile has a number of advantages.

Open ditches interfere with cultivation, especially where large machinery

Days in the Week

Stanton Bros.

Kendrick, Idaho

Official Merchants for
International Made-to-Measure Clothes

is used, but tile are buried deep enough to be out of the way of farming operations. The whole field may be cultivated when underdrains are used, but a system of open ditches necessarily takes up much tillable ground.

Before any expenditures are made there should be a careful survey and examination to determine the source of the water to be removed and its amount, the most economical arrangement of the drains, the grades obtainable, the proper sizes of drains and the amounts of tile and of labor.

Sometimes only a few drains are needed in the lowest part of the field; sometimes a uniform system is required with parallel lines underlying the whole area. In the latter instance experienced judgment is needed to decide what will be the proper depth and spacing for each kind of soil.

Free Flow From Outlet.

Of prime importance is the outlet, which not only must be the lowest point of the drainage system, but so located and arranged that it will discharge water at the time when drainage is needed and not be useless because of high water in the outlet ditch or creek. The construction work should be carefully done, under the supervision of someone at least qualified to see that the tile are laid properly. It is advisable to have a competent surveyor or engineer to aid in at least the leveling.

Wheat Always Preferred Food.

While more people are living in the world today dependent upon rice than upon wheat for subsistence and a greater number of the human family live upon millet than any other cereal food, wheat is the preferred food among the higher civilized peoples. The more progressive peoples of the earth have ever been wheat eaters. Grains of wheat have been discovered in Egyptian tombs of the first dynas-

ty, dating back 4,500 B. C., while bread of wheat has been excavated from the ruins of the prehistoric lake dwellers of Wagner and Robenhausen in Switzerland.

SPINACH FURNISHES DELECTABLE GREENS

(Prepared by the United States Department of Agriculture.)

Spinach is one of the most important crops for a home garden and in many sections will furnish delectable greens a good part of the year. In addition to the spring crop sown from the middle of February to the first of May, according to locality, it permits fall sowing at dates varying from August 1 in northern New England states to September 10 or 15 in the vicinity of Washington.

Three or four ounces of seed planted in the autumn, after a summer crop has been harvested from the land, will produce an abundance of greens for the average family during the late autumn and early spring. Sow the seeds of spinach in drills 1 foot apart at the rate of one ounce to 100 feet of row. To produce good spinach, a rich loam, which will give the plants a quick growth, is required. As ordinarily grown, spinach occupies the land during the autumn and winter only and does not interfere with summer cultivation.

To carry the plants over winter it is advisable to cover the bed with a thin mulch of straw or leaves. In gathering spinach the entire plant is usually removed and not the leaves. The larger plants are selected first, and the smaller or later ones are thus given room to develop. No thinning is required if this plan of harvesting is practiced. The Bloomsdale Savoy is the variety most commonly grown.

W. C. T. U. WOMEN WHO WORK WITH YOUNG PEOPLE AND CHILDREN

MRS. ELIZABETH O. MIDDLETON MRS. CULIA J. VAYHUYER MRS. MAUDE B. PERKINS MRS. MARY B. ERVIN MRS. ELIZABETH A. PERKINS

Mrs. Maude B. Perkins of Syracuse, New York, is general secretary of the Young People's Branch of the National Woman's Christian Temperance Union. The organization, under the charge of Mrs. Perkins, is composed of both young men and young women and is designed to unite the whole group of young people in the community in the development of the essentials of proper citizenship. Miss Mary B. Ervin of Cedarville, Ohio, is the general secretary of the Loyal Temperance Legion, the children's organization, under the general direction of the Woman's Christian Temperance Union. It was this branch of W. C. T. U. organization that aroused both amusement and anxiety by their can-

tagon song, "Tremble King Alcohol, We Shall Grow Up." It is the generation of grown-up L. T. L. children that has provided the votes which made the Eighteenth amendment an accomplished fact in the United States. Mrs. Elizabeth A. Perkins of Ann Arbor, Mich., is the national director of the department of Child Welfare of the W. C. T. U. The purpose of her department is to bring to the children of the nation, and particularly the children of the poor, the best possible chance for soundness in their physical and moral development. Mrs. Perkins has instituted many valuable policies in the program of work of her department. Mrs. Culia J. Vayhuyer, Director of the Department of Americanization of the W. C. T.

U., embraces in her activities the children, as well as the women of the foreign born in the communities in which the organization has established centers. Great industrial centers are the choice field of work for this department, ten of which have been provided with Americanization centers and others are about to be added. Mrs. Elizabeth Owens Middleton is the Director of the Department of Scientific Temperance Instruction of the W. C. T. U. Under her charge is the teaching of the children in the public schools the effects of alcohol and narcotics upon human tissue, a field whose importance is considered very high in the organization because of the belief in education as the real cure for Intemperance.

News Items of Local Interest

- If that unpaid subscription to the Gazette is hurting your conscience, relieve your mind by sending in a dollar and a half. Pay in advance and you are in the clear.
- The Peck News of this week states that the Bank of Peck under the direction of F. B. Smith will open its doors for business this week.
- Kester Dammarell and Cecil Chamberlain will enter the University of Idaho this fall. The term opens September 19.
- Mrs. A. Killian returned Thursday afternoon from a visit with her mother at Lewiston.
- Walter Thomas went to Spokane Thursday on a business trip.
- Lock switches are being installed in the Kendrick school rooms to prevent the children from turning on electric lights.
- John Kite was in the Cavendish country the first of the week on business. Edgar Long took charge of the lumber yard in his absence.
- Charles LeMarinel of Spokane was transacting business in Kendrick over the week end.
- Mrs. W. A. Perryman spent the week end in Juliaetta with relatives.
- Mr. and Mrs. Joe Fruchtl of Lenore were transacting business in Kendrick Monday.
- A census bureau report shows how motor vehicles reduced the number of horses in cities. There are less than 3 as many as in 1910. In spite of the automobiles, tractors used on farms, the number of horses on farms now is greater than in 1910. The total is 21,109,000, valued at nearly 2 billion dollars.
- Mr. and Mrs. Otto Schupfer, Miss Olga Wolff and Herman Schupfer drove to Spokane the first of the week to attend the fair.
- Mrs. W. C. Brooks of Lewiston visited at the home of her daughter, Mrs. E. W. Lutz, Sunday.
- Miss Nettie May Jacobus was a passenger on the Monday morning train to Spokane.
- Mr. and Mrs. M. B. McConnell and daughter, Jane, attended the fair at Spokane the first of the week.
- Mrs. A. E. Wilcox returned Monday after an extended visit in Denver.
- Mrs. Katherine Kelley left for Summit, Idaho, last Sunday to begin her school work. She taught very successfully there last year and was re-elected with an advance in salary.
- Halvor Nelson of Farmington, Wash., spent the week end here visiting friends and looking after his business interests.
- T. H. Sturdevant has been putting in some fixtures for the Kendrick Hardware Co. this week.
- Sidney Dicks returned last Saturday from Moscow, where he took medical treatment. He contracted blood poisoning from an injured hand but is feeling much better since his stay at the hospital.
- L. J. Bosworth of Lewiston spent the week end with Lester Crocker. Mr. Bosworth is employed at the First National Bank of Lewiston.
- George and Oscar Torgerson are moving this week from the John Roberts ranch, which George has rented for the past two years. They will farm the two Nolan places at Park, formerly owned by Ole Torgerson, and will also rent Mrs. Ole Torgerson's place and the Trgeoson hay ranch, both located in the vicinity of Park. They expect to go into the stock business.
- A. Wilmot was a passenger on the morning train Wednesday, bound for Spokane.
- Jim Fonburg is having his Kendrick property improved. He owns the house occupied by the Ira Boion family. It is being wired for electric lights and considerable repairing is being done.
- Mrs. Mary Hood left the first of the week to visit her son, who preaches on the Indian reservation near Spokane. After a short stay there she expects to go east for the winter.
- Geo. E. Knepper, Grand Secretary of the Masonic Lodge of Idaho, arrived Wednesday to visit his son a few days before going to grand lodge which meets at St. Maries next week.
- Miss Helen Mielke of Cameron left Wednesday morning for Spokane where she attended the fair. From there she will go to Kennewick where she expects to remain until about the first of the year.
- C. Hoff of Clarkston, principal of the Leland schools several years ago, was in Kendrick last Friday visiting friends. He will teach at Asotin this year.
- John Kite purchased the H. H. Stevens bungalow last week. The Kite family took immediate possession and are now living in their new home. It is a very good piece of property.
- Charles Mukey of Cedar Creek is having bills printed for a public sale to be held at his place near Linden. He expects to quit farming and will move to Juliaetta after his sale, to spend the winter. Dick Worsley will come here this fall from Arcadia, Kansas, to take charge of the ranch, which belongs to him. Mr. Worsley lived on Cedar Creek for a number of years before going to Kansas, and has many old friends in that neighborhood.
- Ed Wegner went to Moscow the first of the week on business.
- A. Wilmot and son, Billy, took in the circus at Lewiston last Saturday.
- Mr. and Mrs. McCallister and family of Crescent have rented the residence belonging to Miss Betsy Olson and will spend the winter in Kendrick.
- Mrs. Alice Gibson of Oroville, California, is visiting her brother, Frank Chamberlain.

Quite a number of Cameron people attended the circus at Lewiston, Saturday.

Mr. and Mrs. Schmidt and daughter of Leland attended the English service at the Lutheran church, Sunday evening.

Ford Again Reduces Prices

Ford again reduces prices, this making the third reduction since the war. Ford prices have always been based on quantity production and the past three months they have turned out more cars than in any like period in their history. The exact number of Ford cars and trucks built in the past three months is 317,587. This is more than has been built by all other automobile factories in the United States. It is this enormous production that enables the reduction in price of Ford cars and trucks. When you buy a Ford car or truck, you get more value for your money than you do in any other car or truck in the world and the best after service in the world.

All Ford cars are equipped with electric starter and lights 30x34 inch casings all around on demountable rims, an extra rim and rim carrier, all necessary tools, and filled with gasoline and lubricating oil. Freight and war tax are all figured in the following prices:
Touring car \$590 Sedan \$810
Roadster, \$560 Coupe \$740
One ton truck Chassis, without starter \$580
At these low prices, no one should walk. Buy now.

A Grateful Letter

It is in trying conditions like that related below by Mrs. Geo. L. North of Naples, N. Y. that proves the worth of Chamberlain's Colic and Diarrhoea Remedy. "Two years ago last summer" she says "our little boy had dysentery. At that time we were living in the country eight miles from a doctor. Our son was taken ill suddenly and was about the sickest child I ever saw. He was in terrible pain all the time and passed from one convulsion into another. I sent my husband for the doctor and after he was gone I thought of a bottle of Chamberlain's Colic and Diarrhoea Remedy in the cupboard. I gave him some of it and he began to improve at once. By the time the doctor arrived he was out of danger."—Adv.

Located at east end of Bear Creek bridge. H. M. Hill, owner. 36-3t

MR. FARMER!

The sale season is now on. Who are you going to have to cry that sale? I have been on the block here in Latah county for 20 years. A salesman can make or lose you hundreds of dollars.

I urgently solicit that sale. First, because I claim to know values. Second, I am capable of getting the money. Last, but not least, in all of my 20 years experience in this county I have never called an unsuccessful sale. For dates call 295, Troy, or Kendrick Gazette office. All phone calls at my expense. N. R. Shepherd, Troy, Idaho.

Good house for Sale, small payment down, balance easy terms. G. F. Walker, Real Estate. 36-1t.

School Books and Supplies

Waterman and Moore Fountain Pens \$2.50 to \$5.00

Eversharp and Signet Pencils
Tablets, School Bags, Ink, Rulers
Pen Holders and Pen Points
Composition Books and Note Book Fillers

Special Notice

Under no circumstance will school books be charged.

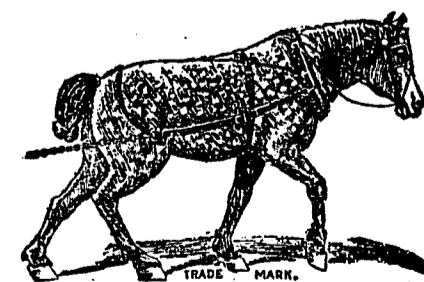

This Means CASH

Books will be sent C. O. D. unless money accompanies order.

Owing to the extremely small margin of profit and the high cost of freight, this is the only way we can successfully handle the school books this year.

THANK YOU

The Red Cross Pharmacy
