

## Over The County

**Julietta Record:** Walter Clark, of Fix ridge reports that he had one of the best crops of wheat he has had in 20 years this season. Fifteen acres of it was pure Jenkins club, which threshed out better than 40 bushels to the acre, or to be exact he says off of the 15 acres he got 248 sacks which averaged 132 pounds to the sack making 41 bushels and 44 pounds to the acre. Mr. Clark figures that there are about eight bushels to the acre more gained by sowing pure seed and will seed all his land next year with pure Jenkins Club. All told he had 280 acres of grain both fall and spring sown and threshed 4158 sacks, which tested 59 and a half pounds. He has sold his crop for 90c per bushel and finished hauling it to the warehouse last week.

Wm. Cox, of American ridge, also reports good results from pure Jenkins Club seed. He threshed 755 sacks from 50 acres of spring sown which weighed 132 pounds to the sack. Seventy acres of fall wheat made 45 bushels to the acre. It was the plumpiest and nicest wheat he ever raised he says, and was the third straight crop of wheat on this piece of ground. It lacked only two per cent of testing pure Jenkins Club.

**Troy News:** Anybody who thought the fire siren now being tried out was small "punkins" have a different opinion after the howling, wailing shrieking demonstration it gave during the still hours of night on Monday. Manager Solberg let the date for the demonstration slip over a couple of nights to give folks a chance to forget the notice published in last week's News, and as a result some few did some lively hustling, thinking there was a fire downtown. Some others, who had not seen the notice, were reported to have done some explicit cussing in their own particular way as they tore around, because there was a fire on and nobody going to it. The only two people in town, as far as we know, who say the siren is no good are Charlie Thompson and Doc Peterson. They didn't wake up.

**Deary Press:** Thanks to the fine weather of the past three weeks, the big 1921 crop is now in sack or bin and is being transported to the market. This year's threshing was accomplished with but a small number of smut explosions in the county. There were no mishaps of this nature in this section.

Should rains moisten the ground early, a large acreage of winter wheat will be sown. Standardization of wheat is to be given more attention than heretofore, largely on account of the standardization campaign that is being carried on by the county farm bureau.

**Genesee News:** According to a statement made by J. B. Sanborn, one of the county commissioners of Whitman county, there is no truth in the statement made by Geo. Morscheck and others who had visited the Whitman commissioners in regard to the "missing link" of highway between Genesee and Lewiston and that the statement that they had refused to build the road is not founded on "real facts."

There are those who would like to know just what the Whitman commissioners did mean, then, when they made the statement that they had no money, no rock crusher, and did not know when they would build the link, after making the statement that they could not accept the proposition made by Mr. Morscheck that if they did not have the money to build it, Genesee and Lewiston would either build it or furnish the money with which to build the link, and yet they refused to take any action in the matter.

Is it a fact, then, that Mr. Morscheck made misstatements?

**Star-Mirror:** The following record on marriage licenses issued, and divorce suits filed, prepared by Homer E. Estes, clerk of the district court and recorder, will prove quite interesting and show that Latah

## Prize Cup for Best Wheat

The Latah County farm bureau is offering a handsomely engraved silver cup for the best exhibit of Jenkins Club seed wheat shown at the Troy Fair, which will be held September 28, 29 and 30. Exhibits must be from lots of wheat that have been officially certified as seed by the Idaho pure seed commissioner; must have been grown in 1921; and must contain twenty pounds. The farm bureau is offering this prize to encourage Latah County farmers in growing pure wheat and in improving the standard of grain grown in the county.

County Agent O. S. Fletcher and either Professor R. K. Bonnett or H. W. Hulbert, of the farm crops department of the University of Idaho, have inspected all Latah County fields which the owners thought were pure enough for seed. Sixty-six fields on forty-seven farms were inspected. Forty-eight fields with a total of 1640 acres passed the preliminary inspection and practically all of these passed the final or threshed grain inspection. Of the fields that passed inspection, all but three small lots were of the Jenkins Club variety. Latah County has produced approximately 50,000 bushels of certified Jenkins Club seed wheat this year. Fields planted with certified seed have out yielded fields planted with ordinary seed five to seven bushels per acre.

## School Notes

The Kendrick schools started last Monday with a total enrollment of 168. There are many new faces especially in the high school, where enrollments in some classes has been so large as to overtax the accommodation.

The vocational classes seem to be the most popular, it having been necessary to turn several away from manual training. There are about twice as many enrolled for domestic science as can conveniently be accommodated. The bookkeeping class is also large, having an enrollment of 16. Considering the usual shortage of text books and the unusually large classes very satisfactory progress is being made.

## Land Deal on Potlatch

Jesse Hoffman of Leland closed a deal this week for the purchase of the John Behrens ranch of sixty acres. The consideration is understood to be \$7,000. Only a part of the place is tillable, the balance being pasture land.

## Another Little Potlatcher

A son was born to Mr. and Mrs. W. H. Weyen of Potlatch ridge last Sunday. The young man weighed 9 pounds.

Mrs. Alvin Benson and little daughter arrived the first of the week to visit at the home of Mr. and Mrs. J. F. Brown.

county is proving quite a mecca for unhappy unions of this kind, as the ratio in this county is about one divorce for every three marriages, while the average generally, according to statistics, is about four to one.

The record for this year follows:

	Marriages	Divorces	Suits
January	6	3	
February	10	5	
March	7	3	
April	8	7	
May	8	2	
June	28	4	
July	12	3	
August	10	1	
Total	89	28	

A glance at the table shows the continued preference towards the month of June for weddings, and the "June Bride," while the month of April was the popular month for divorces, and in fact the month was almost an equal race between marriages and divorces.

## Elevators Filling Up

The Rochdale Company's elevator was filled to overflowing this week. Some bins filled with certain varieties of wheat were so full that it was necessary to stop hauling for a time until cars could be secured to ship out the surplus. Both elevators and warehouses have received an immense amount of grain and the difficulty of securing cars has brought about a rather congested condition at times. The bulging warehouses and the continuous stream of grain that is still being hauled in from the various ridges give rather the impression that this is going to be a comfortable year in the Potlatch in spite of the prevalent idea that hard times are upon us.

## Leland Items

Rev. Hall attended annual conference in Portland last week, and has been returned to Leland for another year.

The latest arrivals on the ridge are a girl at the home of Mr. and Mrs. James McVicker and a boy to Mr. and Mrs. Weyen.

Jesse Hoffman has purchased the Behrens' farm and has rented his farm to Leo Grau, who will live on the Behrens' place.

We understand that R. B. Parks has purchased Mr. Robbins' lease on the Grandma Hartinger farm and that Mr. Robbins is going to Southern Idaho, with his daughter, Mrs. Black.

Miss Edyth Locke went to Lewiston Wednesday to have some dental work done.

School will begin Monday with M. E. Muhlitz as principal, Wm. Darrow and Mrs. Dean complete the list. We are looking forward to a good school year. Our teachers come highly recommended, and with the new school house we expect great things.

## Cameron News

Mr. and Mrs. George Ehlers, Mr. and Mrs. Amos Specker and Mrs. Brunsek motored to Lewiston Tuesday in Mr. Ehler's car.

Mrs. August F. Wegner went to Lammany, Saturday, to visit her parents, Mr. and Mrs. Hull.

The Cameron school started Monday with Miss Elsie Wegner as teacher. Thirty-two pupils enrolled.

Don't forget the children's day picnic to be held at the parsonage, Sunday, to be preceded by a program at the Lutheran church. Bring your basket lunch and enjoy a good time.

## Big Bear Ridge

Mrs. A. Hooker entertained the Lutheran Ladies' Aid Monday afternoon.

Rimrock school began Monday with Miss Inez Johnson as teacher.

Gabriel Forest and Ingvald Aas returned home Saturday from an auto trip to Oregon.

Miss Helen Hanson returned to Spokane last week, having visited her cousins, Misses Emma and Neva Nelson.

Union Sunday school at Steele every Sunday morning at 10:30.

Benny Price of Spokane was a recent visitor at the O. H. Forest home.

Mr. and Mrs. John Holbeck and children of Glendive, Montana, were visiting at the Ed Halseh home the first of the week.

Thorvald Nelson returned home Tuesday from the coast where he spent several months.

Mr. and Mrs. Jim May and children returned to their home at Ontario, Oregon, last week.

Mayor Wm. Huyette of Clarkston tendered his resignation to the council of that city last week. The members of the council voted unanimously not to accept the resignation but after an explanation by Mr. Huyette, stating his reasons, it was accepted. Mr. Huyette seems to be too progressive for a faction in Clarkston and as this faction opposed him in his work he decided to give up the job. Mr. Huyette was assistant cashier of the Farmers Bank here several years ago.

## Bean Harvest Short

Frank Wittman of Potlatch ridge was in Kendrick on business last Saturday. Mr. Wittman and his brother are very successful threshermen of the Potlatch. They had a successful run this season, although much shorter than usual. Mr. Wittman stated that nearly all of the beans on the ridge were threshed and that a few days this week would finish up bean threshing for this season. He said that the average crop was approximately 3½ sacks to the acre, which is rather a light yield, five or six sacks being considered a good yield.

## Night Show Wedding

Tribune: With the entire bridal party, including the officiating officer, on horseback, Robert M. "Jack" Jory, one of the popular cowboys in the Lewiston round-up, and Mrs. Hazel Winifred May were made man and wife last night in the arena at the corner of Third and C streets, where every evening a big show of western sports is carried on.

According to their companions, the couple wished to marry, felt that the time was ripe, and could think of nothing more appropriate than to go through the ceremony in the midst of their accustomed surroundings of horses, saddles, chaps and steers.

Probate Judge Woelfen performed the ceremony, on horseback. Witnesses were Bob Hall, Scoop Martin, George Weets and Sam Bolon. The bride was presented with an enormous bouquet of sunflowers by Shorty Hall, cowboy clown.

## Linden Items

Miss Gertrude Keeler, who has been ill for some time was taken to Carithers hospital at Moscow, Friday. At this writing she is improving nicely.

Mrs. S. H. Fry, Mrs. C. H. Fry and children spent the week end at Forey Smith's home in Harvard.

Jim Smith left for Portland, Saturday, where he will attend the Adcox Auto and Aviation school.

Mr. and Mrs. A. Alexander motored to Lewiston for peaches, Wednesday, returning Thursday while there they visited Mr. and Mrs. Pete Vandenberg at Clarkston, and Mr. and Mrs. Otis Stone in Lewiston.

Miss Fay Pippingier, who has been visiting her grandmother, Mrs. D. McPhee, returned to her home in Cavendish Saturday evening.

Geo. Garner, who has been with a threshing machine on the Potlatch returned home Saturday evening.

Mrs. Nelson and little daughter of Wa Wawi are visiting the Farrington and Ball families. Mrs. Nelson will be remembered as Miss Berri-man.

James Ball is enjoying a visit from his sister, Miss Mary Ball of Ontario, Canada. It has been twenty-seven years since they have seen each other.

Mrs. Frank Lyons and son, Clem, returned Saturday from a ten days' visit with her sister, Mrs. Dan Lynn at Helix, Oregon.

George Smith went to Spokane Monday where he will attend the Lyon Boarding school for boys this winter. He was accompanied by Miss Leah Smith. She will return to Lewiston Tuesday, where she and Miss Anna will attend the normal.

Mr. and Mrs. Lou Alexander went to Lewiston, Tuesday, to attend the fair.

Mrs. C. P. Israel and children spent Sunday evening with Mrs. Vaughan.

Sam Mitchel of Melba, Idaho, was a visitor at the Smith home Saturday enroute to Helena, Montana.

The McCallister family moved to Kendrick last week for the winter. Miss Viola will teach in the Kendrick school.

Mrs. Jennings and children and Mrs. Granvill Wall spent Friday with Mrs. Vaughan.

E. W. Shingler and family returned to the ridge, Tuesday. He has been harvesting while she and the children have been visiting at her mother's at Sunnyside, Wash.

## Pig Club Boys at Fair

Pig club boys in Nez Perce county carried off \$172 in premiums Wednesday with a total of 18 animals entered, one boy winning sixth place against the regular breeders on his junior sow pig. R. T. Smith, of the animal husbandry division of the Washington State College, placed the ribbons. The boys were highly pleased with the results and are encouraged to greater efforts for the time they will exhibit at the Western Royal Livestock Show at Spokane, the latter part of the month, in agreement with Armour's who furnished the sows that produced the litters represented in the exhibits.

County Agent Skuse who has looked after the boys' general welfare since they have arrived was well impressed with the interest taken by the boys and their parents in sending in the pigs for exhibit in creditable numbers. The boys were required to bring their bedding, brushes, towels, etc., and are furnished a place to sleep at the fair grounds, and their meals are also furnished. The boys furnish feed for their pigs and take care of them. Each boy was well repaid for his efforts by the premium money he received and more money could have been received had there been more entries.

Delbert Hayward of the Southwick pig club took first prize of \$15 on boars.

## Sign News Items

Please remember that when sending news items to the Gazette for publication, they must be signed. We have had to leave out a number of items lately because they came from unknown parties, and while we had every reason to believe they were all right, they were not signed and so were not published. When you sign your name to items that you send in, that does not mean that your name will be published, because it will not unless you request it. All we want to know is that the news comes from a reliable source. Signing "A Reader" to articles sent in isn't of any value as it is still anonymous. We are all ways glad to get news from all parts of the community, so please send it in—loads of it—but don't spoil it all by neglecting to tell us from whom it comes.

## Red Cross Nurse Here

Miss E. M. Djupe of division headquarters of the Seattle Red Cross was here Wednesday to consult with officers of the local Red Cross. She also visited on Bear ridge and talked with Red Cross members of American ridge, giving an outline of future work to be accomplished. While here she got an expression of opinion as to the advisability of securing a county health nurse. She said that everyone to whom she broached the subject was highly in favor of the idea.

In case the county health nurse is adopted in Latah county the Red Cross and the county will divide the expense of maintaining the nurse.

Nez Perce county has had a county nurse for some time and has received much benefit thereby. Better health conditions are observed in the schools under the supervision of the health nurse and the children are taught many useful lessons in the care of their bodies.

## Installing Hot Water

N. B. Long & Sons installed an electric hot water heater in their store last week. The cost of installation will be borne by the Hazelwood Company of Spokane, as the hot water will be used for washing cream cans. Longs are using electricity to freeze water for their cold storage plant and to boil it for their cream station.

## Where's Such a Town

I visited in a town last year where nobody had a good word for anybody.

The people are God-fearing citizens in their own esteem, who pay taxes, raise children and attend dutifully to the other obligations of life.

But good news is an out law in that community; and an enthusiast would be regarded with suspicion as one who was probably trying to "put something over."

A cold, rainy day seems to bring a sort of grim satisfaction, particularly if it follows a period of sunshine. Folks go around dripping and declaring that they knew well enough such good weather couldn't last. "We was due for a spell of rain, and I guess it come, all right."

Merchants positively glow when they tell that they "aint got" what you want. And there is more joy over one sinner who is caught in the act and whose sin can be told about, than over ten righteous persons who need no repentance.

In all the week I was there, I never once heard anyone say a gracious, enthusiastic thing about a fellow-human-being. Where the facts were such that they could not be given a gloomy turn, they were uttered grudgingly, as though no mortal had a right to such good luck and it certainly would not last.

The inevitable result is that the town is dying. Its industries dried up long ago. Occasionally a newcomer will try to start something; but he withers finally under the cold glances of those who are waiting around to see him fail. And when he leaves they tell you that they always told you so.

There has been recently a considerable criticism of the Pollyanna philosophy of life. That philosophy can, of course, be carried to extremes. There is something the matter with a man who whistles while his leg is being cut off or fails to grumble when the coffee is cold.

But between Pollyanna and the average citizen of the community which I visited, and to which I shall never return, give me Pollyanna every time. As a matter of cold dollars and cents, to use no higher standard, the Pollyanna stuff pays.

Napoleon was called a one hundred thousand man by his enemies, because they feared the effect of his enthusiasm on the battlefield more than an extra hundred thousand men. What have ever have achieved results in life enjoyed poor health?

"Men are nothing," Montaigne said, "until they get excited." And it is such men—excited by their visions of great achievement, by their faith in their fellows, or in a cause or an ideal, who have founded cities and built railroads and won battles and transformed the world.

The book of Genesis would tell a very different story if the writer of it had lived in the town to which I have referred. "The thirty-first verse of the first chapter now reads: "And God saw every thing that He had made, and behold it was very good."

A citizen of this complaining community might have written: "And God saw every thing that He had made, and sighed and said: 'It ain't what you'd call good, and in my opinion, it'll be a whole lot worse before it gets any better.'"

—Bruce Barton in the Red Book.

## Mrs. W. M. Evans

Mrs. W. M. Evans, a resident of the Fairview community on Potlatch ridge for many years, passed away at her home Wednesday evening at 7:30 after a long illness. Funeral services will be held this morning at Lewiston, where the body will be buried.

The deceased is survived by her husband, one daughter, Mrs. Steensma of Julianna; two sons Alfred and H. S. Evans; three brothers, two sisters and her mother.

# Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

Maintaining a county health nurse is a matter that most of us consider from the standpoint of dollars and cents. Usually there is a discussion as to whether the county can afford to pay the salary and expense involved. It is generally conceded that an immense amount of good can be accomplished by a county nurse. If the general health of the children of the county can be materially improved by examinations and advice given by the health nurse, the question of money shouldn't enter into the decision. If the Red Cross is willing to bear a part of the expense of maintaining the nurse there is surely little excuse for Latah county to be without one, even if the matter is decided from a monetary standpoint alone.

It is claimed that three billions of dollars are hidden around houses and carried in pockets by the people of the United States. All this is subject to almost instant destruction by many causes. If this was deposited in banks, thus releasing it for useful purposes, it would go a long way toward financing necessary business today, besides affording the depositor a source of protection and income.

An unusually large number of children from the country are attending Kendrick school this year. Being on the state accredited list is of very great value to the school as graduates from the high school can enter the University of Idaho with the regular four years' high school standing. This ought to prove attractive to those who intend to continue their studies from the high school through college.

A Northwestern University professor has, after 3 years of experiment, produced red, white, and blue corn by crossing red and white ears to make blue ears, then grafting the three varieties. The professor believes he can perfect corn so that the rows of kernels will show solid bars of red, white and blue.

Potatoes are a good price here this fall, retailing for 2 cents a pound. The price doesn't affect the growers to any extent as few have any spuds to sell.

Reports come from Kansas that the hog crop will "root the farmers out of distress" in that state.

The new tariff bill contains about 10,000 items. All that keeps us from hearing how it will boom and likewise ruin all industry is the fact that this is not a political year.

A young lady who lives in Missouri is so thin that she doesn't dare eat pink ice cream because it makes her look like a thermometer.

We are still hearing that bunk about farmers in the corn belt burning corn this winter instead of coal, because of the high price of coal. At the present price of pork the farmer who would burn his corn instead of feeding it to hogs, would be a fit subject for the asylum.

Dempsey, who got \$300,000 as his share of the purse in his recent match with Carpentier, has gone up on his prices. He will demand \$1 million for his next fight which may be with Carpentier in London. This is \$50,000 more than this country pays its president for 6 years work.

### CARD OF THANKS

We desire to thank the Masonic and Oddfellow orders for their care and attention during the recent illness and death of Mr. J. W. Roush, also the friends for their kindness and floral offerings.

Mrs. Mary F. Roush  
Mr. and Mrs. H. A. Tyler  
Mr. J. E. Tyler

But One Way.  
There is but one way to heaven for the learned and the unlearned.—Jeremy Taylor.

### METHODIST CHURCH.

Howard W. Mort, Pastor.

You are writing a gospel,  
A Chapter each day,  
By deeds that you do,  
By words that you say,  
Men read what you write  
Whether faithless or true,  
Say, what is the Gospel according to You?—Anon.

Services both morning and evening next Sunday.  
Sunday school at 10 a. m. Start the winter right in a Sunday school class. "There's a reason."  
Morning worship at 11 a. m. Subject, "Three Great Words of the Book of Life."

Epworth League 6:45 p. m. All the young people are most cordially invited to this service for and by them.

Evening song service and worship 7:30 p. m. Subject, "Why Criticise Peter?" Note the change in the time of the evening service to 7:30 p. m.

You are invited to all the services of the church. Let's be one big family working toward one great end thru these coming winter months.

American Ridge—Sunday school at 10 a. m. No morning service.

### EMANUEL LUTHERAN CHURCH

Cameron, Idaho.

17th Sunday after Trinity. The Children's day festival will take place Sunday morning at 10:30 a. m., in the church. Following the program a picnic lunch will be served at the parsonage.

Sunday school at 9:30 a. m.

English Services at 7:30 p. m. Subject, "The Royal Road to Ruin."

The choir meets Thursday evening at 7:30 p. m. in the church.

German School and catechetical instructions Saturday at 8:30 a. m. You are heartily invited to come and bring your lunch for the picnic dinner.

Rev. E. A. Rein, Pastor.

### GROW PURPLE VETCH FOR VALUABLE SEED

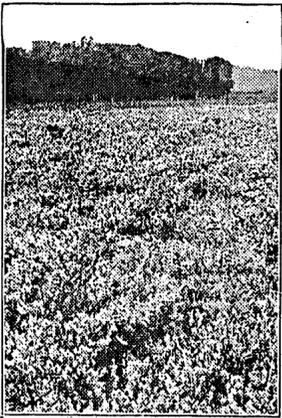

Advantages of Crop Have Been Known for Years.

It is Not as Popular in Northern States as Common Variety, Which is Hardier and Has Become Established as Forage.

(Prepared by the United States Department of Agriculture.)

Due largely to the intermediary efforts of the United States Department of Agriculture, 2,400 acres of purple vetch is reported as being grown this year for seed in northwestern California for use in the orchards of the southern part of the state, where it has proven a superior green-manure crop. The superiority of purple vetch in California for green manure lies in the fact that it makes more growth during the winter months and can be turned under earlier than other legume crops.

Purple vetch was first brought to this country from Italy in 1899 and its advantages have been appreciated for

A Field of Purple Vetch.

a number of years, but it was not possible to introduce it extensively because of scarcity of seed. In the region where it was most valuable it has not been feasible to raise purple vetch in large quantities because of climatic conditions. In the North, on the other hand, the seed can be grown successfully, but there the purple vetch is not in as great favor for forage as common vetch, which is hardier and has become established in popularity.

To make a bridge between the two geographically distant localities has been the work of a number of years on the part of the department experts. It was first necessary to demonstrate the value of purple vetch in the South, and afterwards to induce northern farmers to substitute it to some extent for their customary crops. This latter was difficult, because purple vetch was not quoted in the market, and also because, where a sale was effected, farmers were tempted to sell their entire stock, reserving no seed to maintain or extend the acreage.

The assistance of a large California fruit growers' association was enlisted, and last year 500 acres were grown under guarantee, a large portion of the yield being kept for seed. This year northwestern California and Oregon farmers will receive 14 1/2 cents a pound for purple vetch seed, which should give them from \$150 to \$200

per acre in addition to the straw. From now on it is expected sufficient seed will be available for all needs.

### VALUE OF UNDRAWN POULTRY

Experiments Conducted by Department of Agriculture Show Birds Spoil Less Quickly.

Poultrymen still discuss the relative merits of drawn and undrawn poultry. Practice varies in different communities. Opening the body undoubtedly exposes the internal surface to the air which always contains micro-organisms, and thus may hasten decomposition; but it should be remembered also that the viscera decompose more rapidly than other parts of the body, and if left they may taint or infect the rest of the bird.

In elaborate experiments with drawn, partly drawn, and undrawn poultry, conducted by the United States Department of Agriculture, it was found that undrawn birds spoil least quickly, and partly drawn ones less quickly than the fully drawn ones from which, not only the viscera, but also the heads and feet, have been removed.

### BUILDS WEEVIL-PROOF CRIB

Southern Farmer Demonstrates How Log Building Can Be Made Secure Against Insects.

The county agent of Taylor county, Fla., reports that one farmer in his community has worked out a way by which a log corn crib can be made practically air-tight to guard the corn against weevils. This farmer put three or four inches of dirt on the floor and covered it with another floor. The walls were covered with rough lumber, and the cracks outside were filled with clay. The door facings were padded with cloth and the door made of two layers of cypress lumber, with a piece of paper roofing between. This arrangement cost about \$10, in addition to the farmer's labor. Others in this neighborhood are building cribs in the same way.

### LIVE STOCK FLY REPELLENT

Care Should Be Exercised to Prevent Getting Mixture Too Strong, Causing Hair Shedding.

When mixing a repellent to put on the live stock to keep the flies away, care should be taken to prevent getting too strong a mixture. It may cause shedding of the hair. The following mixture has been found by the United States Department of Agriculture to give good results for a short time where applied lightly but thoroughly: One gallon of fish oil, two ounces of oil of pine tar, two ounces of oil of pennyroyal and one-half pint of kerosene. The horses and milk cows will appreciate some preparation.

### RAISING FOWLS ON INSECTS

Good Plan for Farmers in Grasshopper Infested Regions to Use Turkeys and Guineas.

Turkeys and guinea fowl are voracious insect eaters. Would it not be a good plan for farmers in the grasshopper infested areas of the West to buy, rent or import all the birds of these breeds they possibly can, instead of poisoning the bugs?

### SECURE BEST HARVEST HELP

Rovers are Usually Efficient but They Are Liable to Leave Before Crops Are All In.

Getting help for the harvest rush is a problem which is best faced weeks in advance. Grain, and orchard harvest seasons bring to many sections large numbers of traveling help who start with a crop in the South and work north with the season to the

# You Will Make No Mistake

When you leave that order for table supplies with us, for it must satisfy you before we consider the deal closed.

Our grocery and meat departments are full of good, fresh merchandise, and the price is always in line with the quality.

## Coffee, Fresh and Fine

We have a varied line of vacuum packed coffee for you to select from. A large trade in this commodity enables us to carry many brands and at the same time to keep a fresh stock at all times.

And in this connection don't forget that 25c bulk coffee that is giving such excellent satisfaction.

## Our Cream Station

The Hazelwood Company's cream receipts have been so satisfactory from this station that they voluntarily installed an electric hot water heater in our station this week. This will enable us to give cream shippers much better service from now on; as we can get all of the butter fat from the can and return it nice and clean. Bring your cream to this station and save further trouble.

# N. B. Long & Sons

The Home of Good Things to Eat and Wear  
Kendrick, Idaho

Canadian border. These workers are usually efficient through long experience, but they are likely to feel the urge of the road and leave before the farmer gets his crop all harvested, obliging him to pay a much higher rate to secure the remainder of the crop before it spoils. Wherever efficient local help can be obtained, it is to be preferred to the rovers.

### SELECT HARNESS WITH CARE

Be Especially Careful That Reins, Breaching and Various Straps Are Heavy and Strong.

Select harness with care. See that it is well made. Make sure, especially, that the reins, breaching, holdback straps, tugs or traces, belly bands and yoke straps are sufficiently heavy and strong for the work required. A runaway team cannot be controlled with weak reins, nor will weak tugs and straps stand heavy work.

## Are You "Enjoying" Poor Health?

Do you realize that your teeth may be the cause of all your ills? A few dollars expended now on your teeth may save you worlds of suffering and add years to your life.

You cannot afford to neglect your teeth. Now is the time to have any infected or defective-tooth restored to its normal, healthy usefulness. To delay is dangerous.

Chronic Catarrh

Our manner of living makes us  
very susceptible to colds and a suc-  
cession of colds causes chronic ca-  
tarrh a loathsome disease with  
which it is estimated that ninety-five  
per cent of our adult population are  
afflicted. If you would avoid  
chronic catarrh you must avoid  
colds or having contracted a cold  
get rid of it as quickly as possible.  
Chamberlain's Cough Remedy is  
highly recommended as a cure for  
colds and can be depended upon.—

## IMPORTANT NEED FOR MORE TREES

Three-Fifths of Primeval Forests  
Have Been Cut Away, Says  
Forester Greeley.

### SUPPLY OF WOOD NECESSARY

Despite Fact That Many Substitutes  
Have Been Devised Demand for  
Timber Continues to Grow—  
Much Land Is Idle.

(Prepared by the United States Depart-  
ment of Agriculture.)

Timber depletion has now reached a  
point in this country where three-  
fifths of the primeval forests are gone  
and where 61 per cent of the timber  
that is left is west of the Great Plains,  
Col. W. B. Greeley, chief forester, forest  
service of the Department of Agri-  
culture of the United States, recently  
told the members of the Chicago As-  
sociation of Commerce.

Liberal use of American forests was  
a necessary part of the commercial  
growth of this nation, Colonel Greeley  
believes, but reforestation should have  
been practiced, if not from the start,  
at least in late years. There is an  
abundant area of forest land in this  
country to support all industries, and  
a liberal supply of wood is most nec-  
essary to the people of this country.  
It was thought that, like the European  
countries, we would use, when our civ-  
lization was older, but one-third or  
one-half as much wood per capita as  
we did in the early days. But this  
rule does not affect the American peo-  
ple. The older the states and com-  
munities in this country grow the  
more timber they seem to require in  
one form or another.

Demand Continues to Grow.  
Many substitutes have been devised  
for wood, and yet the great demand  
of the country for timber continues to  
grow. More wood is used in construc-  
tion today than before the discovery  
of concrete, and more wood is used in  
building railway cars than before the  
steel or part-steel car was developed.  
This is apparently true in nearly every  
industry.

Abundant and widely distributed  
forests have meant to the United  
States homes for the masses of the  
people beyond the standards of any  
other nation. They have placed news-  
papers and magazines on the average  
family table. They have contributed  
largely to social and industrial con-  
ditions which promote democracy and  
constructive energy rather than dis-  
content and destructive social forces  
bred by hard and comfortless condi-  
tions of life.

The idleness of 81,000,000 acres of  
forest land, an area increased by 8,  
000,000 to 10,000,000 acres annually,  
destructive logging, and still more de-  
structive forest fires are the factors at  
work to increase the timber shortage.  
Land Enough if Kept Growing Trees.  
The exhaustion of American timber

Hill Land Orchard Near Lynch-  
burg, Va.

has not come about because the for-  
ests have been used so freely but be-  
cause of the failure to use forest-  
growing land. In a nutshell, the prob-  
lem is that the United States is cut-  
ting wood out of its forests three or  
four times as fast as it is being grown.  
Much of the land on which timber  
stands or has been cut off will always  
be forest land. It is ample to grow  
all the wood needed for the use of the  
people of this country and for export  
trade in lumber and products man-  
ufactured from lumber, if the land can  
be kept at work growing trees. Timber  
for the future is simply a matter of  
putting idle land to work.

Every reasonable encouragement  
should be given to the landowner to  
grow timber on his own account in  
the ways best suited to his own pur-  
poses, but by some means or other the  
public must see to it that forest lands  
not needed for agriculture do not lie  
idle. The regulations imposed must  
be reasonable and equitable. Obvi-  
ously the owner of the land cannot do  
it all. The public must aid him in  
overcoming the hazard of forest fires  
and must recognize that the present  
methods of taxing forests in many  
regions are equivalent to taxing a  
farm crop twice a week during the  
growing season.

## DIFFERENT WAYS FOR GIRL TO MAKE MONEY

Poultry, Dairy or Garden Are  
Good Suggestions.

Parents Should Encourage Young  
Woman to Establish Herself as  
Semi-Independent Member of  
the Farm Family.

(Prepared by the United States Depart-  
ment of Agriculture.)

When a city girl feels the need of  
money—her own money, to pay for the  
things girls imagine they must have  
these days—she goes to work in an of-  
fice, a store, or a factory, according to  
her education and opportunity. In  
the country a girl, with much the same  
longings for nice things and "good  
times," looks to the poultry yard, the  
milk house, or the garden for her  
spending money. If her parents are  
the right kind, if they are intelligent

Preparing Vegetables for City Market.

enough to help her and encourage her  
in her work, she will soon establish  
herself as a semi-independent mem-  
ber of the family. If, as often hap-  
pens, the parents are not disposed to  
have such goings-on, and there is no

home-demonstration agent, no girls'  
club, no extension work of any kind  
in the community, the country girl  
goes to the city and the farming re-  
gions have lost one more potential  
home and family.

No doubt exists in the minds of men  
and women of large experience in the  
extension work carried on by the  
United States Department of Agricul-  
ture in co-operation with state agri-  
cultural colleges that the economic ap-  
peal is the entering influence needed  
in getting their clubs or bureaus start-  
ed in rural regions. Once the young  
people have learned a way to earn  
money the desire for the things it will  
buy asserts itself, and home better-  
ments and improved living conditions  
follow naturally.

Down in Arkansas a girls' canning  
club started a contest to determine  
which of the members could produce  
the most tomatoes at the least ex-  
pense, and with the lowest percentage  
of waste. Annet Sargo, on the Mount  
Valley route, near Hot Springs, grew  
3,140 pounds of tomatoes on one-  
tenth of an acre, at a cost of \$31.40  
and net returns of \$109. With the  
same expense her sister, Fannie, grew  
3,020 pounds and had a net return of  
\$107.89. Ada Rosamond grew 2,803  
pounds, costing \$27.42, with a net re-  
turn of \$76.66, and Ruby Waddell, at  
Boulevard, had 3,070 pounds, cost-  
ing \$29.91, with net returns of \$98.

### STANDARDS FOR CONTAINERS

Hamper, Round-Stave Basket and  
Market or Splint Basket Lack  
in Uniformity.

Three important shipping containers  
in need of standardization at the pre-  
sent time are the hamper, the round-  
stave basket, and the market or splint  
basket, say specialists of the bureau  
of markets, United States Department  
of Agriculture. Investigations in all  
parts of the United States where these  
packages are used have shown a ser-  
ious lack of uniformity in capacity,  
shape and strength which could be cor-  
rected by the adoption of standards  
which have been prepared by the bu-  
reau of markets.

These standards have been written  
into a bill, H. R. 4900 now before con-

gress. Its adoption should go a long  
way toward eliminating the 15 styles  
and sizes of round-stave baskets, 25  
styles and sizes of splint baskets as  
well as the 50 styles and sizes of  
hampers. The bill provides for five sizes  
of splint baskets, 4, 8, 12, 16 and 24  
quarts; five sizes of round-stave bas-  
kets 1/2-bushel, 5/8-bushel, 1-bushel, 1 1/2-  
bushel and 2-bushel, and six sizes of  
hampers, 8, 16, 20, 32 and two styles  
for 48 quarts.

### BEST TO GROW NECESSITIES

Specialized Farming Has Created Peculiar Conditions — Poultry is Quickest Meat Supply to Produce on Farm.

(Prepared by the United States Department of Agriculture.)

"The American farmer is not going to be able this year to pay freight on water," said a department official. "Water makes up a large part of fresh fruits and vegetables. The answer is that he must grow his own table food. He must also study the possibilities of substitution. This applies to vegetables, fruits, poultry, eggs and dairy products which must be transferred from commercial channels to home consumption if they are to come within the reach of the average farmer's family.

**Peculiar Condition Created.**  
 "Specialized farming has created conditions of which comparatively few persons are aware. The grain farmer in many instances buys even his potatoes and green vegetables; the fruit farmer buys his dairy products; and even the man who raises milk for creamery, condensary or cheese factory is likely to send his cream or milk away, feed the skim milk or whey to the calves, and not make his own butter. This year, just as far as possible for him to alter his system in a single season, the department officials advise that he get back to the old plan which was aptly described as 'living at home.' This means not so much remaining on the farm as it does deriving every practicable product for consumption from the farm.

"The average American farmer knows how to raise other crops than those on which he specializes, but it has seemed good business, or at least expedient, to devote his energies to very few or even a single cash crop and buy his necessities, just as is done in other specialized industries. The grain farmer is perfectly capable of raising his own potatoes, his green garden stuff, and melons, tomatoes and other garden fruits, to take the place of orchard fruits which in many parts of the country have been killed by the late freezes. If the farmer has a piece of really good garden ground he can add materially to the variety and wholesomeness of the farm food supply with scarcely any expenditure except for seeds, and seeds, fortunately, are lower this spring than for several years.

**Poultry Most Important Meat Supply.**  
 "The same may be said of poultry. With the increased freight rates this year, the general farmer's principal

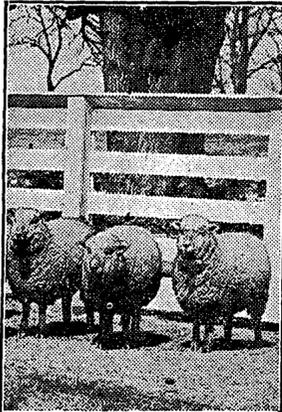

### TEMPORARY PASTURES ARE BEST FOR SHEEP

From 10 to 14 Days Is Long Enough on Same Ground.

Basis of 1 Acre to 25 Animals Is More Satisfactory Than Seeding Larger Areas—Smaller Lots Are Convenient.

(Prepared by the United States Department of Agriculture.)

For health and for economical use of the pasturage it is undesirable to keep sheep on the same ground more than from ten to fourteen days, say specialists of the United States Department of Agriculture, in discussing the question of raising sheep on temporary pastures. The most generally

Sheep Are Valuable Weed Destroyers and Will Keep Fence Rows, Roadways and Waste Places Clean.

useful size of lot is one acre to 25 sheep. This area, on an average, furnished in experiments 14 days' feed.

Arranging the size of lots on the basis of one acre to 25 sheep is more satisfactory than seeding larger areas and using hurdles to permit advance to fresh feed each day. Less labor is necessary, and by going to entirely new ground after ten or twelve days the danger of picking up parasite larvae on ground grazed over earlier is prevented. With a one-acre lot for 25 ewes, or correspondingly larger ones for larger flocks, it is an added advantage if their length is two or three times the breadth.

With a heavy crop of forage that would last longer than was considered safe to hold the flock on the same ground, a short piece of cross fence can readily be put down to divide the pasture into two parts. The smaller lots are also convenient with purebred flocks to provide for the separate pasturing of smaller lots of ram and ewe lambs.

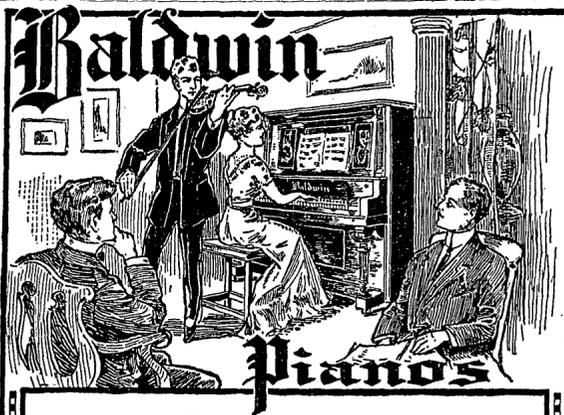

Movable fencing is not likely to be satisfactory for the outside-lot fences unless the whole area to be used lies in a long strip with side fences, when only two end pieces need to be in place at one time for the ground being grazed.

### HENS IN GOOSEBERRY PATCH

Fowls Will Do Much Toward Clearing Out Fruit-Worm From Under Trash in Garden.

One gooseberry insect we have with us that isn't easy to control is the fruit worm. It doesn't often become a serious pest but occasionally it has been known to take a whole crop. The worm eats into the partly grown berry and feeds on the pulp. Hand-picking is still the method used to hold this worm in check. Poultry ought to be turned into the gooseberry patch after the fruit is picked, as the hens will do a lot toward clearing the worms from under the trash. Poultry and fruit are a good combination when run right.

**Not True.**  
 The photograph of a boy never looks like him because no one ever saw a boy look as clean as he is in a photograph.—Pearson's Weekly.

**Baldwin Pianos**  
 AMONG people who love good music, who have a cultivated knowledge of it, the BALDWIN PIANO is recognized everywhere as the best. In such an atmosphere it is happily at home and with every day endears itself more and more to its owners.

The same is true of the

### "Baldwin Manualo"

the successful unification of the most artistic piano with the most scientific player action made in the world. There is absolutely nothing better, nothing more perfect on the market, neither as a piano nor as a player piano.

Contemplating the purchase of either a piano or a player piano, you should not fail to examine these instruments. Prices and terms will suit you.

Kendrick Furniture Co.

# WEBSTER-MAN'S MAN

by Peter B. Kyne

Does your ear answer to the drumbeat of adventure?

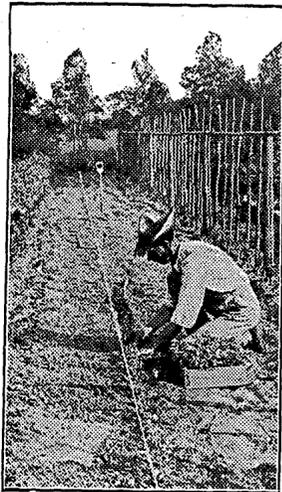

Do you enjoy a good romance?

Does your pulse respond to a good, story of out-door life?

If the answer is "yes," then "Webster-Man's Man" was written for you. Not since

"Soldiers of Fortune," by Richard Harding Davis, has there been anything like it—or anything of the kind so good.

Will Be Printed Soon as a Serial in This Paper!

The Garden is a Good Source of Home-Grown Food.

meat supply will come out of his poultry yard, either in eggs or in table chickens and other fowls. Poultry is the quickest meat supply to produce, and the farmer will do well to build up a small flock as rapidly as possible. The increased freight rates on butter and eggs, together with the farm money shortage due to the disappointing returns from last year's crops, will make it advisable for many farmers' wives to return to the butter-making arts which they learned as girls from their mothers and which have been largely discontinued as farmers became specialists.

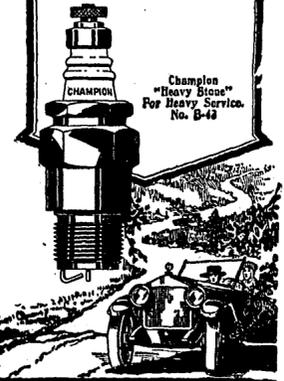

"Fruit is likely to be scarce in large and important farming regions, but its place can largely be taken by vegetable products. Two things are clear. In the first place, the average farmer, as it stands now, cannot afford to pay freight on the water which makes up the larger part of both fresh and canned vegetables and fruits. In the second place, under existing conditions he can raise those things cheaper himself than he can buy them, and he can make many substitutes out of the garden and poultry yard if he sets out to do it. He has the material for the crops, while he is short of money. It is not good business to run in debt except for essentials of production."

The Department of Agriculture will be glad to give information and advice to those who wish to diversify their home-grown food supply.

### MANURE PRODUCED ON FARM

Dairy Cows Lead All Other Animals Yielding 8.5 Tons Yearly—Goats Give Least.

Under farm conditions it is estimated that the following amounts of manure may be saved each year from mature animals: Horse, five tons; dairy cows, 8.5 tons; other cattle, four tons; sheep and goats, 0.4 ton, and hogs, 0.6 ton.

## PREPARE WAR ON INSECT ENEMIES

If Left Undisturbed Bugs of Various Kinds Will Destroy Best Part of Garden.

### PESTS HAVE BIG APPETITES

Tobacco Extract Is Recommended for Plant Lice and Other Sucking Parasites—Main Point is to Start Fight Early.

(Prepared by the United States Department of Agriculture.)  
Gardeners are warned by specialists of the United States Department of Agriculture to prepare to combat the "little enemies of the garden." In-

sects of various kinds are making their appearance in vast numbers in gardens in all parts of the country, and if left undisturbed will defeat the gardener's best efforts and lay waste the vegetable crops. This is the open season for insects and there are no laws which limit the number which may be killed. The department specialists urge the use of the spray pump and dusting bag for the frequent application of poisons in order to destroy the pests before they destroy the garden. Early efforts in fighting insects are most effective.

**Little Bugs With Big Appetites.**  
In most localities the Colorado or "hard-shell" potato beetles are industriously depositing clusters of small yellowish eggs on the underside of the potato leaves. In a few days these hatch into little red, soft-shelled slugs or "soft-shells," as they are often called, that have most wonderful appetites, and unless poisons are applied they will soon strip the potato plants of their leaves.

Perhaps there is no class of garden insects the method of attack of which

is so insidious as that of the plant lice or aphids.

At first a very few lice may be found hidden on the under side of the leaves of melons, peas, cabbage, and other vegetables. A little later the leaves begin to curl up and to lose their color, and an examination will show that the "lice" which the ants carried out have become grandmothers, and the under side of the leaves will be literally alive with them, feasting on the juices of the plants. At this stage something must be done quickly, for within a few days there will be another generation or brood at work. Arsenate of lead and paris green have no effect upon this army of plant blood suckers, and it is necessary to use contact poisons. A preparation must be used that will not injure the

Insects Do Not Thrive in This Garden, but the Crops Do.

plants but which will kill the "lice." The most common of these contact poisons is nicotine sulphate—a tobacco extract—made of tobacco refuse from factories. This is a poison and, to be effective in killing the "lice" without injuring the plants, must be used exactly according to the directions given on the container. United States Department of Agriculture Farmers' Bulletin 550, on the control of garden diseases and insects, has the following to say regarding the use of nicotine sulphate:

"For small garden plots one teaspoonful of nicotine sulphate should be used to one gallon of water, to which a one-inch cube of hard soap should be added and thoroughly mixed. If a larger quantity is desired, use one fluid ounce to eight gallons of water, with the addition of one-half pound of soap. Full directions are given on the covers of packages, and instructions accompany them.

**Effective Application of Spray.**  
"In the use of nicotine sulphate the effective application of the spray is of the utmost importance, since it is primarily upon this that the success or failure of the treatment depends. If the liquid has stood for any length of time it should be agitated thoroughly before use. The insects themselves must receive a thorough coat of the spray or they will not be killed, and immediate inspection after spraying should show the foliage occupied by the insects to be completely wet.

"Spraying should be done as early as possible, always on the first appearance of the insect, not only because it is good practice to keep the plants free from pests but because more thorough work can be done on small plants." The main point is to start the fight in time and kill the advance scouts and head off the main army of insect pests.

### GUINEAS UTILIZE ALL WASTE

Fowls Pick Up Material That Escape Chickens and Turkeys—Are Prolific Egg Layers.

Guinea fowls utilize waste that would escape both hens and turkeys, say poultry specialists of the United States Department of Agriculture. Taking a wider range than chickens, and yet not so wide as turkeys, keep-

ing largely to thickets and weed patches, and committing fewer depredations against field and garden than either chickens or turkeys, requiring little feed at any time, being prolific layers during their season of eggs, that are thought by many to have a richer and finer flavor even than hens' eggs, the guinea fowl is well worth considering on any farm where a serious effort is made to convert all waste into meat and eggs.

### AIR CONSERVES BOARD FLOOR

Free Circulation Underneath Prolongs Life of Lumber—Close Openings During Winter.

Board floors usually are short-lived unless air is allowed to circulate under them. This may be provided for by means of openings in the foundation walls, which should be closed during the winter. A board floor covered with one-quarter inch of fine sand, with scratching material on this makes a good floor. The litter and sand can be removed readily when desired, and fresh materials provided. If the wooden floors are constructed within two or three inches of the ground it is essential that the foundation walls be constructed in such a way that rats cannot gain access beneath the floor.

### FOWLS REQUIRE GREEN FEED

More Important During Summer Months Than in Winter—Give Them Clover and Weeds.

Remember that yarded fowls need greens and vegetable food during the summer months even more than in winter. If their yards are bare, add cut clover to the daily mash, and throw to the birds all the weeds that you pull in the garden as well as lawn clippings, etc.

## AIM TO ANALYZE MARKET REPORTS

"Bulk of Sales" Quotations Are Likely to Prove Confusing to Many Farmers.

### FIGURES WILL VARY WIDELY

On Day When Low-Grade Hogs Are Neglected Higher Grade Animals Are Finding Ready Sale at Attractive Prices.

(Prepared by the United States Department of Agriculture.)  
"Bulk of sales" quotations appearing in live-stock market reports are likely to prove confusing to the farmer who attempts to keep himself informed on selling conditions, yet a present-day market report would not be complete without such quotations. If the farmer confines his attention only to "bulk" and "top" sales, and ignores the factors of quality and weight in the market receipts, he is almost sure to form a wrong opinion of the actual market conditions, say market specialists of the United States Department of Agriculture.

**May Vary From Day to Day.**  
Bulk of sales figures should always be studied in conjunction with the quotations on grades which are based on weight and quality. The bulk of sales figures may vary widely from day to day without indicating that the market is unstable. This situation frequently arises from a limited trade in low-grade hogs on the same day that high-grade animals are finding ready sale. The bulk of sales quotation for such a day will reach a relatively high figure. On the following day a larger number of low-grade animals may be included in the sales and the higher grades neglected, with the

result that the bulk of sales quotations will be far below that of the preceding report. On sessions when the average quality of the animals offered is low the bulk of sales report will reflect this condition, and the farmer who has animals ready for shipment may be misled as to the actual state of affairs, unless he takes into account the other factors which have an important bearing. Because the bulk of sales report from one market is much lower than that from another city he may decide to ship his product to the market which appears to offer the highest price. As a matter of fact, for the grade that he has to offer, the market quoting the lower bulk figures may offer the higher price to him. It is undoubtedly true that country buyers often take advantage of low bulk of sales reports to depress purchasing prices in their localities.

The Wise Farmer Learns to Analyze His Daily Market Report.

This can be done if the farmer is in the dark as to the quality of the stock comprising the bulk transactions.

Shows Quality and Grades.

To be of practical use to the farmer, the bulk of sales quotations must be considered with the knowledge of what is being offered for hogs of various grades and qualities. Studied in this way the bulk of sales reports are of material value, for they show the quality and grades that make up the principal supply at any market for any period. Bulk quotations also give a more lucid idea of general trade conditions on those sessions of the market when the values from the opening to the closing vary widely.

The clarification and standardization of market reports and classifications throughout the whole country is one of the big tasks on which the bureau of markets, United States Department of Agriculture, is working. When this has been accomplished and the live-stock trade begins to grade its receipts with reasonable uniformity the need for bulk of sales quotations will not be nearly so great as at present.

### NECESSITY GOOD FOUNDATION

Farmers Interested in Co-operative Organization When Facilities Are Lacking.

Necessity is a good foundation for a co-operative organization. If the farmers in your community feel a need for an organization they will be interested in it, unite with it, support it. This need may show itself in a lack of marketing facilities or unsatisfactory marketing conditions.

### GRASS SEASON QUITE SHORT

Seldom Profitable to Pasture Stock Before May 1 and Pastures Are Dry by September.

Few of us realize how short the grass season really is north of the Mason and Dixon line. It is customary to consider it as six months. But this is stretching it pretty far. It is

seldom if ever profitable to turn stock on pasture much before May 1, and almost always pastures are about dried up in September. So, actually, there are only about four months that pastures can be depended upon. This is worth keeping in mind when planning the size of the silo or silage field—figure on eight months of feeding. The man whose stock goes through the winter best is the one that doesn't allow them to become thin before frost.

### KILL GREEN CABBAGE WORMS

Arsenate of Lead Spray Will Prove Satisfactory to Destroy Various Insects.

The green cabbage worm can be killed with an arsenate of lead spray in which laundry soap has been mixed to make it adhere to the leaves. This treatment will also kill the cabbage looper and other cabbage worms. Nicotine sulphate or kerosene emulsion and soap should be used against the harlequin cabbage bug and plant lice or "aphids."

**Analysis of the Kiss.**  
In analyzing the psychophysiology of the kiss, Professor Malespine says: "The kiss is the first animal manifestation of love. The passionate look is nothing but desire. The handshake is full of reserve, of constraint, or full of hope. The kiss is sharply another and more exalted manifestation of the sense of touch than the handshake. And it is from the sense of touch that all other senses are derived."

### SUMMONS

In the Justice Court, Kendrick Precinct, Latah County, Idaho, H. P. Hull, Justice of the Peace.

N. B. Long & Sons, Plaintiffs,

vs.

E. C. Young, defendant.

The State of Idaho sends greetings, to E. C. Young, the above named defendant.

You are hereby notified that a complaint has been filed against you in the Justice Court, Kendrick Precinct, Latah County, Idaho, by the above named plaintiffs, of the nature and in general terms as follows:

To collect on a bill of goods, wares and merchandise sold and delivered to defendant between November 1st, 1920 and December 1st, 1920, to the amount of Fifty-seven dollars and thirty-eight cents (\$57.38), together with interest and costs of this action.

And you are hereby directed to appear and answer said complaint within twenty days of the service of this summons, if served within the county of Latah, State of Idaho, and within forty days if served elsewhere, and you are further notified that unless you so appear and answer said complaint within the time herein specified the plaintiffs will take judgement against you as prayed in said complaint.

Witness my hand this 12th day of August, A. D. 1921

H. P. Hull, Justice of the Peace, Kendrick Precinct, Latah County, Idaho. 33-5t

## News Items of Local Interest

Eric Oller a Troy farmer received a prize at the Spokane fair for his exhibit of Jenkins Club wheat. It was certified grain.

Mrs. Harry Grinolds was called to Colfax Tuesday morning on account of the illness of her daughter.

Harry Stanton transacted business in Moscow Tuesday.

If you want service, try a "for sale" ad in the Gazette.

M. O. Raby left for St. Maries Monday morning where he will represent the local Masonic Lodge at the meeting of the Idaho Grand Lodge which took place Tuesday, Wednesday and Thursday of this week.

Joe Hampton and Amos Nigh of Juliaetta were transacting business in Kendrick, Tuesday afternoon.

Frank Chamberlain accompanied his sister, Mrs. Alice Gibson, to Spokane, Tuesday. Mrs. Gibson will go from there to her home in California.

Frank Benscoter of American ridge went to Clarkston the first of the week to visit relatives.

A meeting of the county commissioners is being held at Moscow this week for the purpose of forming the budget for the ensuing year.

Troy is making great preparations for the fair to be held September 28-29-30. From all indications it will be the most successful ever held there.

John Phillips of Clarkston was in Kendrick last Saturday on business. Mr. Phillips is in the garage business in Clarkston.

A. V. Dunkel and Geo. E. Knepper started for St. Maries, Sunday, where they attended a meeting of the Masonic Grand Lodge of Idaho this week.

The Amos Moore family of Bear ridge have rented the Kleth home near the school house in Kendrick and will make their home here this winter, so that the children may have the advantage of the local school facilities.

Mrs. A. V. Dunkel and little son returned from Moscow on the afternoon train, Wednesday.

Mr. and Mrs. E. W. Lutz and two children went to Spokane Sunday on a brief business trip.

John and Kester Dammarell drove to Clarkston, Tuesday, in search of peaches. They report them very scarce and not very good quality. They visited the John Florance orchard on Clarkston Heights. He will have a crop of several thousand boxes of apples and the price is very satisfactory at this time owing to the apple crop failure in the middle states.

Congressman Burton L. French arrived in Moscow Monday night to spend several weeks at his home during a recess of Congress.

Emulus Brown is substituting on rural route No. 2 this week, as the regularly appointed carrier from Moscow failed to show up.

An error was made in last week's issue regarding the bag limit. Instead of four grouse or pheasants it should have read six, or a mixed bag of six. The bag limit on China pheasants is four.

Mr. and Mrs. Jesse Hoffman and family of Leland drove to Lewiston in their car Thursday to attend the fair.

Marvin Long went to Milton, Oregon, Tuesday, to act as best man at the wedding of one of his former classmates.

Mr. and Mrs. James Kayler of Peck spent Friday evening of last week at the home of Mr. and Mrs. L. J. Herres.

E. H. Dammarell, chairman of the local Red Cross auxiliary, has called a meeting to be held in the basement of the Methodist church. All Red Cross members are urgently requested to be present as important matters will be brought up.

Mr. and Mrs. James Kayler, Jr., of Peck and Roy Kayler of Craigmont visited the first of the week at the home of Mr. and Mrs. Frank Benscoter on American ridge.

Mrs. A. W. Jones and daughters arrived from Toston, Montana, this week. They drove through in their car, while Mr. Jones is driving across country with a team. They report a poor crop around Toston this year. The Jones family will make their home in Kendrick this winter so that the girls can go to school here. Mr. Jones owns a farm on Bear ridge.

County Agent Fletcher made a brief visit in Kendrick yesterday while on his way to the Cedar Creek country.

Herman Lohman arrived Thursday morning from Clarkston.

No definite information has as yet been received regarding the date of arrival of Martin Lien's body. It is thought, however, that it will be shipped here in the very near future, as notice was received

from Hoboken of its arrival from France, last week.

Mr. and Mrs. C. L. Guy arrived Saturday from Grangeville, where Mr. Guy owns a general merchandise store which is under the management of Jack Odem and Dan Guy. Mr. and Mrs. Guy have leased the former Guy Hotel from the present owner, J. H. McGhie. They took over the management of the hotel Thursday morning, Mr. McGhie leaving for Seattle.

Miss Florence Hollada went to Moscow the first of the week to accept a position in the First National Bank of that place. Mrs. Hollada accompanied her to Moscow, returning on the night train.

On Friday evening, September 23, at the Community Hall, the Sunshine Club will hold a reception in honor of the teachers of the Kendrick school.

All interested in the school and school work are invited to be present and give the teachers a hearty welcome.

Three cases of infantile paralysis were reported in the Princeton neighborhood. The cases were all in one family, one child having died Tuesday. The name of the family is Vassar. One case of infantile paralysis has been reported in Moscow. A quantity of serum for use in Latah county has been shipped from Boise to be used to check the disease.

Mr. and Mrs. Wm. Hecht, Dan Jones and Miss Fairfield went to Lewiston Tuesday to attend the fair.

Wallace McKeever returned from Spokane last week where he underwent an operation on his throat some time ago. He was in the hospital for three weeks and has not fully recovered from the operation. He had planned to go to Portland the first of October to resume his studies at the dental college but unless his health is much better he may not be able to follow his plans. His throat trouble is the result of a very severe attack of the flu while he was in training camp at Seattle during the war.

Mrs. Joe Gardner came over from Lenore Thursday morning for a brief visit. Mr. Gardner has charge of the Vollmer Clearwater warehouse there, but expects to return here in the fall.

The University of Idaho show herd won 7 first prizes out of 14 entries at the Spokane Fair last week. Idaho also won a number of first on sheep.

Mrs. R. F. Whetstone and Mrs. R. F. Bigham went to Lewiston Wednesday afternoon to attend the fair.

Fred Braden went to Lewiston Wednesday to consult Dr. Roe. He has had considerable trouble with his throat, the effects of having been gassed.

August Rucks and family arrived Tuesday from Minnesota, where they have spent several months visiting relatives. They drove to Idaho in a Ford car and report a fine trip. They carried their camp equipment with them, stopping at the tourist parks along the way. After visiting friends in the Cameron community they expect to go to Oregon City to make their home.

Mrs. Albert Schultz left for Minnesota Wednesday morning, to visit her old home. She will also visit friends in North Dakota.

Several from here attended the tax sale at Moscow Tuesday afternoon. A quarter section of land on Moscow Mountain sold for \$15, plus \$40 accrued taxes, making the entire cost of the land but \$55.

M. Bleck has been seriously ill this week. The first of the week his condition was alarming, but Thursday he was able to sit up in bed for a short time and was feeling some better.

### TWO QUARTS IS GOOD YIELD FOR MILK DOE

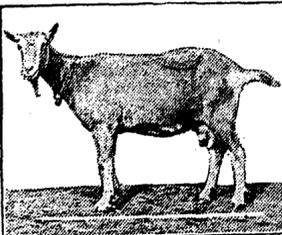

Many Goats Produce Ten Times Their Weight Annually.

Milk Can Be Utilized for Same Purposes as That From Cow, but Less Satisfactory for Making Butter—Best for Infants.

(Prepared by the United States Department of Agriculture.)

About the first question that most people ask concerning milk goats is, "How much milk will they produce?" This is, of course, a very important consideration, as the value of a doe is estimated largely by her milk production. Even if a doe is purebred, she is of little value from the utility standpoint unless she is capable of giving a good quantity of milk. Many persons in purchasing purebred or even grade goats have been disappointed to find that the milk could be measured in pints and not quarts or gallons as expected.

A doe that produces three pints a day is considered only a fair milker,

Swiss Toggenburg Hornless Milk Goat.

while the production of two quarts is good, and the production of three quarts is considered excellent, provided the lactation is maintained for from seven to ten months, say specialists of the United States Department of Agriculture. There is probably no better way to treat this matter than to state that good does should produce from eight to fifteen times their weight in milk in a lactation period. It is stated by German writers that many goats yield ten times their body weight of milk annually, and exceptional animals as much as eighteen times their weight.

Goats' milk can be utilized for the same purposes as cows' milk, although for some it is not nearly so well suited. For general use, such as for drinking, cooking, and in tea or coffee, the milk has proved very satisfactory. The milk of one of the largest herds in the country is evaporated and sold in that form. Goats' milk is less satisfactory than cows' milk for making butter, but large quantities of goats-milk cheese are manufactured, especially in Europe. Practically all publications dealing with milk goats attribute considerable importance to the use of the milk for infants and invalids.

See Manford Nutt at Juliaetta if you want tomatoes, water melon or cantaloupes. 34-ft

### "Is This Yours" \$1500 in Prizes

A fine home in Troy is going to be given away the last day of the Troy Fair, September 30. Doesn't matter where you are from, the prize is yours if you hold the lucky coupon.
