

## Over The County

**Deary Press:** Indications are that the next Lyceum number, December 5, can be held in the Legion hall. The boys have practically completed all they intend to do on the building for the present. It has been ceiled inside, with sized boxing out side over which regular siding will be laid later. A chimney is now being built. The stage, which is the genuine article, has been made ready for use, with the aid of some temporary fixtures. The building will be a credit to the community.

**Juliaetta Record:** A fine ripe watermelon grown by Jim Fisher, has been on display in the J. A. Heacox confectionery for the past few days. Mr. Fisher has eight other melons which he has kept in his cellar and they are in fine shape. The one at the Heacox Confectionery when cut open was found to contain the usual fine flavor of the melons during the melon season and looked very tempting while on display in the window.

**Troy News:** The News family was too busy working overtime getting out the Dollar Day edition of last week to get to the Parent-Teachers meeting of last Wednesday evening, but it was reported to have been a very interesting session. The program as advertised was carried out before a large audience. Superintendent McPherron's address was especially appreciated. Excellent refreshments and a social time followed. The next meeting will be held on the third Wednesday evening in December.

**Genesee News:** New political parties seem to be popular. From the state of Nebraska comes the latest, which is a combination of the old populist party; forty-eighters; farmer labor, non-partisan, independent progressive, socialists and the sore-heads of the two major parties. The name of the new party will be determined at a convention to be held December 3.

Judging from the wide variety of political "faith" combined in the new party it ought to be able to draw up a platform that will please everybody, cure all the ills of the world and make other political parties unnecessary.

Members of the new party assail "big business" interests, Wall street and many private organizations "as menaces which the old parties will never correct and which new party must do."

What a blessing it is that Wall street and the "big interests" still exists, they furnish never-failing point of attack for any political party seeking members.

**Star-Mirror:** At an enthusiastic meeting of Moscow sportsmen, held Monday evening, the Latah County Fish and Game Protective association was formed. The meeting was held in the offices of C. B. Green and was presided over by C. J. Hugo.

The Moscow organization will be the central organization. Potlatch has already organized and Troy, Kendrick and Genesee will do so soon. The farmers, as well as the business men, are expected and invited to join so that all may meet together frequently and discuss problems and formulate policies which will bring about the best results. The social features will not be lacking at the meetings. "An organization of this kind has long been needed in Latah county," stated Mr. Hugo to a Star-Mirror representative. "The field for its usefulness and activities is a wide one. This county has practically every kind of game bird known to the lover of outdoor sport, including the beautiful Mongolian or ring-necked pheasant, the lovely blue grouse and the hardy and elusive Hungarian partridge. We have trout streams that would be worth many thousands of dollars to any eastern community. There is some big game here and the adjoining county of Clearwater is one of the finest sections of big game country lying out of doors. Its mountains and forests contain deer, elk and

## Lyceum Male Quartet

The feature number of the Lyceum course, The Bell Ringers, will appear in Kendrick, Tuesday evening December 6. This is being looked forward to as the best number of the course and is an entertainment that will undoubtedly please everybody.

The Bell Ringers have been a distinct hit in the lyceum because their program is different from the average. They are not only musical, but amusing, as their program is varied and highly entertaining.

The Bell Ringers have a quartet repertoire that is an entertainment in itself. Quartets are always popular in this locality so this feature of the program will be a most pleasing one.

The entertainment will be held in the Methodist church and will be started at 8:15. The local lyceum committee has decided to put the price of single admissions at a very low figure, so that everyone may have the opportunity of hearing this splendid concert. Adults 50c and children 25c.

## Federal Aid for Roads

Seventy-five million dollars becomes available as Federal aid for road construction in the various States, the money to be spent under the supervision of the Bureau of Public Roads, Department of Agriculture, under the Federal highway act, signed November 9, by the President. In addition, \$15,000,000 is appropriated for national forest roads. The \$75,000,000 represents the Federal Government's appropriation to the work of building highways in the various States and must be matched, dollar for dollar, by funds from the State treasuries, except in States where more than 5 per cent of the area is unappropriated public land.

## Lecture on Potato Growing

F. Benz, agricultural agent for the Northern Pacific Railway, will deliver a lecture of interest to potato growers, at Kendrick, Saturday, December 10. The meeting will be held at the City Hall at 10 o'clock in the morning. Everybody is cordially invited to attend. Mr. Benz is a most entertaining and instructive speaker and carries a practical message to potato growers and farmers generally, as well as to business men. He has lectured at many points from Minnesota to the coast, and farmers who have heard him state that the information which they received from his lecture was worth many hundreds of dollars to them.

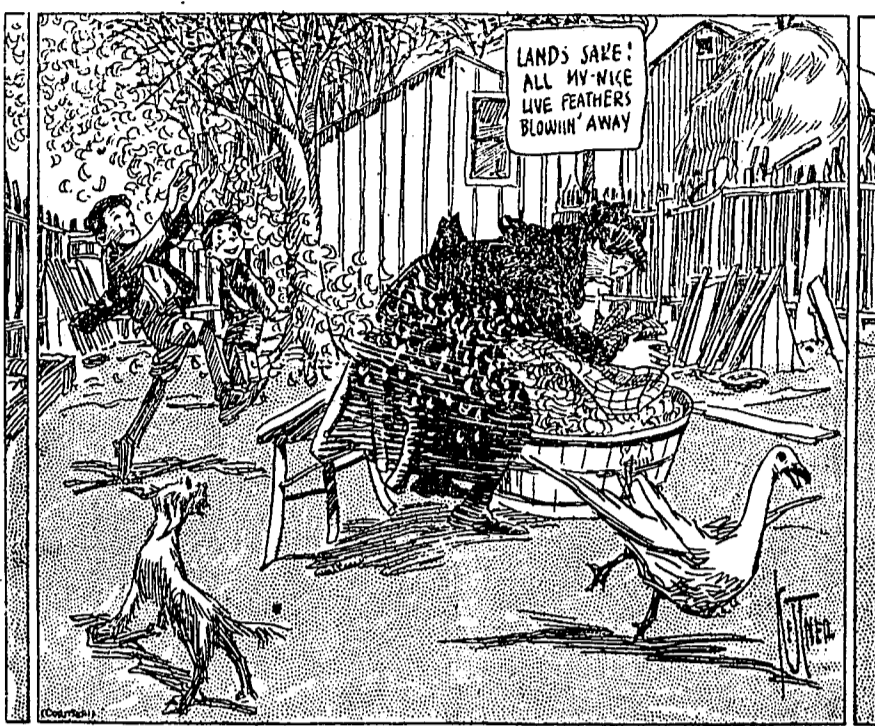

There will be no admission charge. Farmers are invited to bring their wives and adult children.

Moose, as well as small animals, and its beautiful streams abound in gamey trout that would delight the heart of any angler.

"Idaho is one of the finest big game and fishing states in the union and the fish and game conditions present many interesting problems. Propagation, preservation and protection are all necessary. The enactment and observance of suitable laws must be looked after and the creation and fostering of a better public sentiment in favor of the protection of this wonderful asset of the state.

"Every member of the newly created organization pledges himself to use his best efforts to carry out the principles and ideas as expressed in its constitution and by-laws. He aims to make himself a cleaner, better sportsman and to foster the idea in every other sportsman whenever he can, that to be a better friend of the outdoors, to love and know the forest, the hills, the streams and their denizens, makes a man healthier, stronger and more fit for his daily business and to practice fairness in sportsmanship and honor and friendship in his contact with other men, makes the kind of a neighbor and citizen we need."

## Local Flurries

### Wastes Meat, Fined \$300

Considerable interest has been taken in the case of the Latah county hunters who were arrested some time ago for killing elk in the Lochsa country and only bringing a small part of the meat out with them. Six hunters were involved in the case, Dr. R. C. Faust, L. R. Mallory, W. E. Walker, Geo. R. Lawrence and son, all of Latah county, and I. B. West of Lewiston. Wednesday a jury at Grangeville brought in a verdict of guilty against George R. Lawrence on the charge of breaking the game laws of the state. He was fined \$300 and costs, which he paid.

Charges have been preferred against the other five members of the party for a similar violation of the law but according to a statement by the prosecution, they will not be tried and the cases probably will be dismissed.

In his defense Mr. Lawrence claimed that the animals shot by the party were so badly mangled that it was impossible to preserve any more of the meat than that which they brought out with them.

### Latah Exhibits to Chicago

Latah County is represented at the International Hay and Grain Show held this week in Chicago in connection with the International Livestock Exposition by an exhibit of wheat, barley, peas and beans. The exhibit was gathered and shipped by O. S. Fletcher, county agricultural agent. Mr. Fletcher was assisted in preparing the exhibit by Prof. H. W. Hulbert and Prof. R. K. Bonnett, of the farm crops department of the University of Idaho.

Following is a list of the exhibitors and the produce exhibited:

Jenkins Club Wheat: Bencotter Brothers, Jas. Cain, Robert Cain, and Carrol Cox all of American Ridge, Kendrick.

White Winter Barley: Eric Reiersen, Little Bear Ridge, Troy; and Otto Schuelter, Moscow.

Field Peas: Arthur Snow, Moscow; White Canadians: Frank Gustafson, Moscow; Blue Bells: Frank Washburn & Wilson, Moscow, Early Alaskas.

Lady Washington beans: Eric Reiersen, Troy.

Duplicate lots of each exhibit were sent to the big show. One lot was placed in general competition, while the other was placed in an Idaho educational display. Idaho has an exhibit using twenty-five foot space in charge of C. B. Ahlson, acting State Seed Commissioner, shown to advertise the seed and hay resources of the state. When the International Show is over, the Idaho educational exhibit will be packed by Mr. Ahlson and will be transported to Blackfoot, Idaho, without charge by the Union Pacific Railway system. At Blackfoot all the separate lots making up the educational display will be entered in competition in the Idaho State Seed Show, which will be held at Blackfoot, January 10th to 13th inclusive.

G. F. Walker was in Moscow Tuesday on business.

### Stole Dr. Hoyt's Car

Frank John, a Yakima Indian, was arrested near Arrow Monday afternoon by the Nez Perce deputy sheriff, for stealing a car in Spokane. As the officer started to board the train with his prisoner, the Indian broke away and made his escape, swimming the Clearwater and disappearing over the bluffs on the opposite side. The officer fired five shots at him as he was running, and believed that one shot took effect as the Indian was seen to fall, but recovered and kept on going. Darkness made pursuit impossible.

The car was found to belong to Dr. John E. Hoyt, formerly of this place. It is a five passenger Buick and was stolen in Spokane, November 16. Because of the Washington license tag the authorities believed the car to have been stolen. Investigations followed and it was learned that Frank John drove the car to Arrow, where it stood for a number of days.

### Latah Sheriff Made Raid

Sheriff John L. Woody and Deputy Sheriff Summerfield arrested George Riggan and Will Reece late Sunday night on the charge of having intoxicating liquor in their possession. Separate arrests were made. The following morning the two men were taken to Moscow and on Tuesday were released after each had given \$500 bonds.

### Basket Ball Game Tonight

Orofino Girls' High School basketball team will play the girls team from the Kendrick school tonight at the local gymnasium. There will also be a game between the boys' high school teams of Kendrick and Juliaetta. This double header ought to arouse considerable interest and a good attendance is expected.

### Epworth League Reception

The Epworth League gave a farewell reception Wednesday night to Rev. and Mrs. Howard W. Mort, who have been transferred to the Oakesdale, Wash., church. There were about fifty young people present and it is needless to say that the time was a most enjoyable one. These jolly times for the young folks have been a feature of Rev. Mort's work in the Methodist church here. He and Mrs. Mort have brought the membership of the League to over seventy. It has had a most beneficial influence over the young people and has been the means of furnishing many delightful entertainments for them.

The Freeman-Hammond Company, first number of the lyceum course, appeared at the Methodist church Thanksgiving night. Three very good entertainers put on a varied program that was well received here. The numbers were mostly musical and furnished a pleasant evening's entertainment. The attendance was not large, owing to the fact that many people were spending Thanksgiving day out of town.

## School Notes

A Faculty Luncheon is to be served Friday, December 2, by the domestic science class.

The organization of the Student Body was further completed this week by the election of representatives from each of the classes to the executive committee.

Many students are taking advantage of the opportunity offered to study music in the High School Glee Club. The boys' quartet will be organized soon.

Several more have gained first honors in the Health Crusade, the record is as follows:

Pages	Squires
7th and 8th grades	12 9
5th and 6th grades	17 9
3rd and 4th grades	25 12
2nd and 3rd grades	11 3
1st and 2nd grades	10 4

A Thank-offering of \$7.86 has been collected by the school children to be turned over to the Orphans Home at Lewiston.

The ability to read rapidly and with understanding has probably never been of greater advantage to its possessor than it is today. Our grandfathers gained but little of their knowledge thru the printed page. They were educated in the school of "Hard Knocks." For the most part, what they did not learn by experience they were told by those who had. They did not read much, because they had little to read, each family had a few books, newspapers were scarce and our modern magazines were completely unknown to the vast majority. Now however, when practically every home is provided with several good books, and a local library containing several hundred volumes of the world's best literature is easily available; when every home takes one or more daily papers and several weekly and monthly journals; when it is almost impossible for one to keep posted on the reading of the bigger and more general phases of a vast number of other important fields; at this time, I say, one begins to realize the advantage of being able to read rapidly with comprehension.

Leading educators throughout the United States have for some time realized the importance of rapid reading and very brief studies have demonstrated that reading is most rapid when done silently. Silent reading too, it has been found, can be improved to a much greater extent than oral reading. Since oral reading is practically never used by the average individual, and since silent reading is necessary dozens of times each day, we are beginning in our school curriculum to put more emphasis on silent reading.

Ability in silent reading is easily determined by certain Educational Tests which have been devised for that purpose. The most important of these tests are Monroe's Standard Silent Reading Test (given in the local school during the month) and Curtis's Silent Reading Test. These tests consist of a number of short reading exercises printed on a sheet of paper. These sheets are distributed to the children in a room, each student having one sheet, the instructions are read, and the children are given exactly 5 minutes in which to complete the exercises. Their rate is thus measured by the number of words read in the 5 minutes and their comprehension by the way in which they have answered the questions in the exercises read.

The results of the Silent Reading test recently given show that our school is not far below the standard set by the author of the test, however, we should be above, and an effort is being made to put every student above the standard. The cooperation of the parents is asked for in this and we especially urge the parents to visit the school and see what their children are doing. Several parents have already been interested in seeing the results of the tests and we hope more will come and help us help their children.

—The Superintendent.

## Another Doctor For Kendrick

As a result of meeting with a number of business men last Saturday night, Dr. Otteraaen, recently of Spokane, who has been practicing medicine for the past few months at Troy, has decided to locate permanently in Kendrick. He stated over the phone to Mr. Newton Wednesday evening that he had definitely made up his mind to come. This is good news to the people of this community as it has been impossible for one doctor to handle this territory this fall. A few years ago there were five doctors in the territory which is considered tributary to Kendrick.

The community is particularly fortunate in getting a man of Dr. Otteraaen's ability. He is a young man but has had considerable experience in the practice of medicine. He is a graduate of a Chicago medical school, has practiced medicine at Fargo, N. D., and was with Mayo Bros., at Rochester for a year, besides two years hospital experience in Spokane.

As soon as Dr. Otteraaen can make the necessary arrangements for office quarters and a home, he and his wife will move here, probably within a week or ten days.

## Troy News Changes Hands

By a deal closed last week, G. H. Rice, editor and owner of the Troy News, transferred his interest in the plant to Benjamin V. Haas, who is now in charge of the business.

Mr. Haas is an experienced newspaper man, having last conducted a paper in Reeder, North Dakota. He came west with his family by auto last summer and spent some time working on a paper in Independence, Oregon, from there he came to Troy. Mrs. Haas is a niece of Chas. Kelham of the Dry creek district, and of Miss Hester Snead of Moscow. Mrs. Haas' mother, Mrs. A. G. Davisson, will make her home with her daughter at Troy.

In giving up the News, Mr. Rice, expects also to retire from the printing business and return to his former work in the ministry of the Congregational church, locating somewhere in the inland empire, where he has a standing of fifteen years of service. The family will leave Troy late this week.

## Density of Our Population

Those who think it desirable that the American people should be more and more crowded may be pleased to learn from the census figures that we now have 10 more persons per square mile than twenty years ago. In 1900 we had 25.6 persons per square mile; in 1920, 35.5. Another way of putting it is that in 1900 we had 25 acres per inhabitant, now we have 18 acres per inhabitant. Three of our states, Rhode Island, Massachusetts and New Jersey are approaching the crowded condition of England, Belgium and Holland.

Those who deplore this increase will find their comfort in the fact that we still have one state, Nevada, with less than one person per square mile, a density less than any reported country in the world. Thus the census meets all tastes.—Ex.

## Archie Bolon Injured

Last Sunday while Archie Bolon was hunting near Kendrick, the shotgun which he was carrying was accidentally discharged, inflicting a very bad wound in his wrist. The shot tore through the flesh of his wrist close to his hand, severing the ligaments in such a manner that he had no control of his hand. He was given first aid by Dr. Kelley and then taken to Lewiston on the night train for hospital care. The doctors at Lewiston believe they can save his hand but are not sure whether the ligaments will unite in the proper manner to allow the full use of the fingers of the injured hand.

## Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

If everyone were as industrious as Gene Chinaman there would be no hard times. If business along one line slumps with him, he turns to something else. Last week he was selling "Chinese lilies" for about 20 cents apiece. They sold readily and no doubt represented a profit of about 200 per cent. After a successful financial deal of this kind, an American would buy a car. That's where Gene "puts it all over us". He probably turned the profits from the lilies into a pig, which will eventually represent some more profit. While carrying on these lucrative sidelines, he makes a living selling garden truck. He has no one to support except himself and his dog, so his living expenses are somewhat less than that of the average family. Gene is so old he has forgotten when he was born. If he had been a white man he would have retired half a century ago, but being a Chinaman his earning capacity continues apparently indefinitely.

Some people think Gene has a fortune saved up, but he says not, as he has a wife in China whose husband is too lazy to work, so he sends them all he can spare of his surplus cash to keep them from coming to want.

## English As It Sounds

Here is a single incident showing how easy it is to mistranslate an overheard remark:

Said Mrs. A., one of the overhearers: "They must have been to the zoo, because I heard her mention a trained deer."

Said Mrs. B., "No, no. They were talking about going away and she said to him: 'Find out about the train, dear.'"

Said Mrs. C.: "I think you are both wrong. It seemed to me they were discussing music, for she said: 'A trained ear' very distinctly."

A few minutes later the lady herself appeared and they told her of their disagreement.

"Well," she laughed, "that certainly is funny. You are poor guessers, all of you. The fact is, I'd been out to the country overnight and I was asking my husband if it rained here last evening."—Boston Transcript.

## CARD OF THANKS

We wish to express our heartfelt thanks to the many friends and neighbors for the many kindnesses extended to us during our sorrow, and for the beautiful floral offerings.

Mrs. Ida Stoneburner  
Grandpa Hartung  
Miss Emma Hartung.

## CARD OF THANKS

We wish to thank our kind friends and neighbors for the assistance given during our bereavement; also for the beautiful floral offerings presented.

Mr. and Mrs. Claus Eichner and family.

## EXPRESSION OF APPRECIATION

To the members of the Red Cross, Rebekah Lodge and our kind neighbors, we wish to express our sincere thanks and appreciation for the nice dinner presented us Thanksgiving Day, and other kindnesses shown us.

Mr. and Mrs. Ray Garver.

## EMANUEL LUTHERAN CHURCH

Cameron, Idaho.  
Rev. E. A. Rein, Pastor.

Regular German services at 10:30 Sunday morning.  
English service at 7:30 Sunday evening.

Sunday school at 9:30 a. m.  
Ladies Aid meets Wednesday afternoon at Mrs. Carl Keopp's.

Luther League meets Wednesday evening at 7:30 at the school house.  
Church Council meets Monday evening at 7:30.

Choir rehearsal, Thursday at 7:30 p. m.

German school and catechetical instructions, Saturday morning at 8:30 a. m.

You are invited to attend these services and worship with us.

## Linden Items

× Cleve McPhee returned Saturday from a business trip to Moscow.

Mrs. C. H. Fry entertained at a turkey dinner, Thanksgiving. Those present were: Mr. and Mrs. H. O. Hunt and Miss Gertrude; Mrs. Vaughan and Ted.

× Gus Farrington was a week end visitor in Lewiston.

× Mr. and Mrs. A. W. Longfellow entertained at Thanksgiving dinner. Those present were: Mr. and Mrs. Frank Lyons and children; Mr. and Mrs. A. L. Longfellow, Miss Hoffman and Mr. Tish.

× Ed Darby was a Moscow visitor, Tuesday.

Jack Bailey of Texas Ridge spent Saturday night at the Allen home.

Roy Florence of Clarkston spent the week end at the H. O. Hunt home.

× Mrs. C. P. Israel went to Lewiston Saturday to visit relatives and friends and have dental work done. She was accompanied by her brother, Riley, who has been visiting her.

Miss Hammoud spent Thanksgiving with her brother, Fred, at Orofino.

Cecil Darby who has been ill the past week is improving at this writing.

A large crowd attended the dance at the Clarence Harris home, Friday evening. All reported a good time.

Miss Gertrude Hunt, who attends the Kendrick high school spent the week end at home.

Clarence Harris is enjoying a

visit with his brother from Troy.

× Mr. and Mrs. J. P. Alexander entertained at Thanksgiving dinner. Those present were: Mr. and Mrs. Addie Alexander; Mr. and Mrs. Lou Alexander and Miss Carrie Allen.

× Miss Eva Smith returned from a week's visit with her sisters in Lewiston.

Mr. and Mrs. Jennings and family spent Thanksgiving at the Watt home.

If it's good fresh candies you want, go to Woller's. 48-1t

S. Stein, Boise, Idaho.

If it's flour you want, Woller has it. 48-1t

Wedding announcements printed at the Gazette office.

## Use Right Screw-Driver.

Probably the screw-driver and the hammer are the most used tools about the house, but it will surprise many people to know that there are three different kinds of drivers to fit three different sizes of screws. If the correct driver is being used it will just fit the slot of the screw and no pressure will be required to drive the screw. Further, the danger of the driver's slipping is reduced to a minimum, thereby preventing accident.

## How to Be Healthy

## ONLY MEASLES

By GEORGE W. GOLER, M. D.,  
Health Officer, Rochester, N. Y.

MEASLES, a Sanskrit word meaning a little spot, is the commonest eruptive disease of children. While this disease has been known for many centuries, it was but 1400 years ago that Rhazes, an Arabian physician, separated it from smallpox with which it was confounded in the severe epidemics of both diseases which then raged. Only 250 years ago Sydenham, an English physician, separated measles from scarlet fever, with which it was until then confused. It is known in every country, savage and civilized, cold and hot. It goes round and round the world in epidemics which are usually more severe every other year.

There are many peculiar things about measles. It is an ever-present disease, breaking out in more severe epidemic form in the winter and early spring and declining in summer. It is a germ disease, the poison of the disease occurring in the blood and in the mucus from the nose and throat. The germs of the disease have not been isolated, but the disease may be produced in monkeys by rubbing the inside of the nose of these animals with nasal or throat mucus from a patient suffering with the disease.

Measles is very contagious or "catching." It is nearly always taken by contact with another person having the disease. Rarely do handkerchiefs, eating utensils, etc., convey the disease. It is usually infectious before the disease comes out on the skin, and one is in danger of catching it only a few days, about five, after the disease comes out. Like all other eruptive diseases, it is always in, that is, on the mucus membranes of the throat, lungs, digestive tract, etc., before it comes out. And like other eruptive diseases, it never, no never, strikes in.

Before the eruption appears on the skin it may be seen on the inside of the cheeks, back of the throat and on the gums as little red spots known as "Koplik's spots," after Dr. Henry C. Koplik, who first described them. From the fact that the disease is in before it comes out, it is almost always spread by coughing and sneezing in other people's (children's) faces, and discharges from the ear make the disease catching for a long time, because the matter from the ear contains the poison of the disease.

When a child develops fever, rapid pulse, short, barking cough, and there is found first, an eruption on the inside of the cheeks and the mouth, as described, and second on the outside of the body behind the ears, spreading over the body as purple spots, it is measles.

A great deal of damage is done to the body by measles; just how much, we don't know. It is like scarlet fever, one of those diseases, which rarely kills in itself, but kills later on by the complications it may cause. Measles, like other diseases in children, interferes with the growth of the body; helps to cause decay of the teeth by interfering with their development. It is very likely to affect the ears, causing catarrh of the ears and rupture of the ear drums. It is believed from the changes it makes in the hearing apparatus to cause 1/10 of the deafness in later life.

But it does even more than this. As it is largely a disease of the upper air passages, it often extends to the lungs, causing bronchitis and bronchopneumonia. This broncho-pneumonia and other complicating diseases make a good foundation for future tuberculosis.

While we cannot prevent measles by vaccination and we have no specific treatment for measles, it is well to keep children from having the disease until they are out of the formative period, until the teeth are well erupted. Although very young babies frequently have measles in a mild form and children over two years of age have it more severely, children should be kept from having this disease as long as possible and thus avoid one way in which they may be made good subjects for tuberculosis.

## GOOD ROOSTS FOR CHICKENS

Points to Be Considered Are Ease of Cleaning and to Prevent Lurking Places for Mites.

Good roosts are to the chickens what a good bed is to humans. About half the fowl's time is spent on the roosts. The points to be considered in putting in the roosts are ease of cleaning, spacing from the back wall and from the floor and smoothness of lumber to prevent lurking places for mites.

## WAY OF RAISING MULE COLTS

Best Plan is to Put Them on Feed After Weaning and Never Retard Best Growth.

The older way of raising mules was to turn them out at weaning time and practically let them rough it until three years old, then get them up, wild as deer, for a shearing and then either span them out to break or put them in the pen for fattening as unbroken stuff. Nowadays the mule colt is put on feed almost before weaning and is never allowed to stop his growing until he is ready for the harness,

which time is reached a year sooner by the new method than by the old. The mule at two is a good work animal, but care must be taken not to overdo him at that age, and it is best not to put a two-year-old in as a "regular" until he is well accustomed to the work, better still, don't crowd the youngster until he is three, when he will have attained quite a bit of that strength and grit that makes him the marvel of the working world.

## EWES DISOWN THEIR LAMBS

Trouble Sometimes Overcome by Penning Mother Up With Her Young—Other Plans.

Ewes that will not own their lambs may sometimes be induced to do so by penning ewes up and forcing them to permit the lamb to suck, a few lessons of this sort usually being sufficient. Some shepherds moisten the lamb's head and neck with the ewe's milk, claiming that this will make the ewe own the lamb. Shutting the ewe and her lamb by themselves for a few days should prove effective, though a vicious ewe will sometimes kill her own lamb if shut up alone with it.

## Notice

Believing it to be the best thing for my customers as well as myself, the Kendrick Harness Shop is going on a cash basis until the first of March 1922, as I wish to clean up my books. Kendrick Harness Shop, by N. E. Walker. 40-1t

## A Timely Suggestion

This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug.—Adv.

## NOTICE

From this date a reward of \$25.00 (Twenty-five Dollars) will be given for the arrest and conviction of any person obtaining money for Optical services or supplies under the false pretense of being a representative of the Jones' Optical Company of Spokane, Wash.

Dr. A. E. Jones President and only authorized representative of the Jones Optical Co. will be in your city soon. Buy direct and save 50 per cent on Deep Tonic Lenses and Frames.

Fish's line of hand rolled chocolates is the best. We have exclusive agency for them in this territory. Try these delightful confections once and you will be one of our regular customers. Red Cross Pharmacy. 46-4t

If it's a barrel of flour you want go to Woller's. 48-1t

Order cut flowers at McDowell's Confectionery. Agents for Stillings & Embry, Lewiston. 42-4t

If it's coal oil you want, Woller has it. 48-1t

## Good Health

If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle.—Adv.

## NOTICE FOR PUBLICATION OF TIME APPOINTED FOR PROVING WILL

In the Probate Court of the County of Latah, State of Idaho.

In the matter of the estate of Sarah C. Darby, deceased.

Pursuant to an order of said Probate Court, made on the 28th day of November, 1921, notice is hereby given that Saturday the 17th day of December, 1921, at 11 o'clock A. M., of said day at the court room of said Court, at the Court House in the County of Latah, has been appointed as the time and place for proving the Will of said Sarah C. Darby, deceased, and for hearing the application of Edward Darby for the issuance to him of Letters Testamentary, when and where any person interested may appear and contest the same.

Dated this 28th day of November, 1921.

Adrian Nelson, Probate Judge. 48-3t

TEMPORARY SHEEP PASTURES

Results of Experiment Made by Department of Agriculture on 30-Acre Field in Maryland.

(Prepared by the United States Department of Agriculture.)  
On a 30-acre field in Maryland, used by the United States Department of Agriculture to test the carrying capacity of temporary pastures for sheep, sufficient pasturage was produced to furnish an average of 505 days' grazing on each acre for a mature ewe. This is equivalent to about two sheep an acre for a season of 250 days, or two and one-half sheep for a 200-day period.

This pasturage is much more than could be obtained from perennial grass grown on land of the character and value of that used in the experiment, the department sheep specialists say, but not more than can be obtained from the best blue-grass pastures. Good land used for such a succession of temporary pastures should produce from 50 to 100 per cent more pasturage than was obtained in this instance.

Lambs on Pasture in Maryland.

In such a system as the one under trial there is not much choice of crops to be used in different months. It is chiefly necessary to make sure of having one crop ready when the preceding one is finished. All the crops used in 1919, the third year of the experiment, stimulated a good flow of milk in the ewes, produced good growth in the lambs, and, after weaning, put the ewes in good condition for fall breeding.

The ewes and lambs were all purebred Southdowns. Some of the ewes raising lambs received a half-pound of grain each daily until May 10, and 22 head of ewes in a fall-breeding experiment received a light feed of grain during September and October. All the lambs were kept for breeding purposes and were fed some grain throughout the summer. In calculating how far the feed actually produced would go for grown sheep it was considered that a lamb ate one-fourth as much as a sheep until July 1, and after that one-half as much. A total of 520 hours' work for a man and a team was required for plowing and seeding the 30 acres used in 1919.

Under the conditions of this experiment fall-sown wheat and spring seedings of oats and peas sown together at the rate of 1½ bushels per acre have been most satisfactory for grazing in spring and early summer. Soy beans are ready for grazing about the middle of July and furnish most of the feed until October. In November fall-sown wheat and rye have been used most, though late seedings of corn and velvet beans were used in 1919 for the first time on 1½ acres that had received an extra top dressing of manure.

The number of days of grazing from one acre of each crop in 1919 was as follows, calculated on its pasture value for one mature ewe:

Crop	Days	Crop	Days
Rape	392	Cowpeas	210
Soy beans	315	Alfalfa	82
Oats and peas	319	Barley	27
Wheat	309	Rye	180

TYPES OF BABY BEEF COWS

Three Important Factors Should Be Kept in Mind in Making Selection of Breeders.

In selecting cows from which baby beef is to be produced, three very important factors should be kept in mind:

1. The cows should have at least a fair amount of beef blood. Purebreds are not necessary, but two or three crosses of such breeding is essential. Cows with a preponderance of dairy blood will not do for the production of baby beef.

2. Cows best suited for this type of breeding usually weigh 900 pounds or over in thrifty breeding condition. So long as early maturity is not sacrificed, the heavier cows are the most suitable for baby-beef production. Size of frame rather than weight should govern in selecting cows which are to be used for this purpose.

3. The cows used to produce baby heaves should produce enough milk to keep the calves fat and growing without much additional feed up to weaning time.

In addition to these three factors, such things as constitution, uniformity of breeding, color, size and early maturity should be considered.

COWPEAS SUCCEED ON ALL TYPES OF SOILS

Crop Is Adapted to About Same Conditions as Corn.

Withstands Considerable Degree of Drought, but Leaves Are Injured by Least Touch of Frost—Valuable in Orchards.

(Prepared by the United States Department of Agriculture.)

The cowpea is a warm-weather crop; therefore it has the greatest value in the southern states, gradually lessening northward. It is grown successfully, however, in the southern parts of Ohio, Illinois, Indiana, and New Jersey, and in parts of Michigan. In general, the cowpea is adapted to about the same climatic conditions as corn, but it requires somewhat more heat. It will withstand a considerable degree of drought, but under very dry conditions will produce only a moderate quantity of hay and

Field of Cowpeas.

a very small number of seeds, if any. Both in spring and in fall the leaves are injured by the least touch of frost, and a heavy frost is always fatal. The cowpea withstands moderate shade sufficiently well to be valuable in orchards. In heavy shade the plants are usually much attacked by mildew.

The cowpea succeeds on practically all types of soil. It does apparently quite as well on sandy soils as on heavy clays, but will do better than clover or alfalfa on thin soils or soils that are poor in lime. No other legume can be grown so successfully and on such a variety of soils under adverse conditions as the cowpea. A very rich soil is not conducive to the best results with this crop. On such a soil an abundant vine growth is produced, while the yield of grain is small. Poor soils will produce little growth of vine, but will generally yield a good proportion of seed. Clay soils will not produce a heavy yield the first year, but the crop will succeed much better the second season. It may be said that the cowpea will do best on good corn land, but will thrive on all types of soil that are well drained, properly inoculated, and moderately rich.

SEALING OF SILO IMPORTANT

Satisfactory Plan Is to Husk Ears From Last Few Loads, Tramp and Moisture Well.

Proper sealing of the silo is essential in reducing the amount of waste silage. An easy and satisfactory method is to husk the ears from the last three or four loads of corn that are to go into the silo, and run only the stalks and leaves through the cutter. When these last loads are tramped and soaked with 20 to 30 barrels of water, the top will be well sealed and there will be only a thin layer of waste. Moreover, there will be no ear corn in this waste, because it was husked out and made available for other purposes.

LIME SPREADER IS FAVORED

Machine Is More Efficacious in Securing Even Distribution of Material on Soil.

Lime should always be applied to the surface of the soil and harrowed in. This may be done in the fall, winter or spring, although many recommend that it be applied in the fall. When it is put on the land, however, is not so important as how it is done. It should never be plowed under because it is carried downward in the soil very rapidly, much of it is wasted and it is, therefore, less effective in neutralizing the acidity. Even distribution is, of course, desirable and for this reason a lime spreader should be used instead of attempting to distribute it by hand.

SELECT BEST SEED POTATOES

Worth While to Secure Biggest and Finest Looking Specimens at Time of Digging.

In these days much thought is given to the selection of corn for next year's crop. And great improvement has been made in corn the past twenty years just because of this close selection. But the potato has been overlooked to a large extent. A selection of the biggest and finest looking potatoes at the time of digging, just the same as seed corn is selected at corn harvest, is worth while.

MORE AMERICAN FLAX IS URGENTLY NEEDED

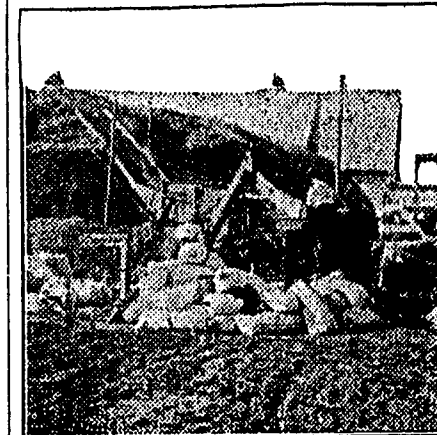

Supply From Russia Has Been Greatly Curtailed.

Demand for Material for Manufacture of Linens Continues as Strong as Ever—New Methods and Machines Investigated.

(Prepared by the United States Department of Agriculture.)

The upside-down condition of things in Russia has produced many unlooked-for results, but none more unexpected to the casual mind than its effect upon the supply of flax fiber. Before the World War Russia produced about 80 per cent of the flax fiber used in making linens. This supply was cut off, while the demand for linens continues as strong as ever.

In the United States the normal consumption of flax fiber by the spinning mills, before the war, was about 10,000 tons a year, most of which was imported. To produce this amount of fiber about 60,000 acres is required. To help in meeting the situation the United States Department of Agriculture, through the office of fiber investigations, is encouraging the production of flax fiber by experimenting

Threshing Flax at the Northern Great Plains Station, Mandan, N. D.

with it in new localities, investigating new methods and machines, and developing improved strains of the fiber flax which are taller, yield more and better fiber, and some of which are resistant to disease and lodging. It has been shown that better flax

is produced from seed of selected strains than from imported seed, such as has been used in the past. Efforts are being made, too, to increase the seed of these selections for distribution generally.

A special survey is being made this season to determine the extent of disease injury to which flax is subject, and to procure definite information needed in devising methods for combating such diseases.

About 6,000 acres of fiber flax was grown in the United States in 1920, but the relatively low price for fiber has resulted in a greatly reduced acreage in 1921, estimated at 3,000 acres.

CLEAN UP BARNYARD MANURE

Material Should Be Scattered on Fields to Permit Sun to Destroy All Insects.

Keep barnyard manure, especially if containing straw, cleaned up and scattered on the fields to permit the sun and drying to kill the maggots. Stack the straw; don't blow it out in an irregular loose pile. Build vertical sides. Keep middle well fitted and tramp well. Clean up around the base of the stacks and scatter remnants. If it is certain that the straw will not be used for feed, spread it at once to be plowed under, or if that cannot be done, burn the stacks immediately.

GETTING POULTRY TO MARKET

Speed Was Once Considered Only Consideration—Handling and Refrigeration Added.

Speed was once the only consideration in getting poultry to market, but now to this has been added good handling and refrigeration, from start to finish. The time the produce would keep was so short that the whole course of marketing had to be rushed. Now it's a matter of maintaining even refrigeration.

Portable Grinder.

A portable electric grinder for the machine shop, designed to be moved over the work, has the power of one-eighth to one-half horsepower placed above the work out of the operator's way. The spindle is bored with a five-sixteenth-inch hole to receive an adjustable shaft for interior grinding and the use of interchangeable grinding wheels adapts the little machine to a wide range of work.

WEBSTER  
—MAN'S MAN  
by  
Peter B. Kyne  
Author of "Cappy Ricks," "The Valley of the Giants," etc.  
Copyright by Peter B. Kyne

CHAPTER VI.—Webster, on his way to Sobrante, is taken ill on the train, and is in a hospital at New Orleans two weeks. Geary bungles his mission. Dolores easily seeing through his story. She greets Mother Jenks as her friend and benefactor. Geary falls desperately in love with the girl.

CHAPTER VII.—At New Orleans, while waiting for the steamer to Buenaventura, Webster saves the life of a young man who is attacked by two assassins. The youth leaves Webster without disclosing his identity.

(Chapter VII Continued)

"It does appear to me, my friend," he said presently, "that I detect something strangely familiar about your pajamas."

"I wouldn't be the least bit surprised Mr. Webster. I found them in your suitcase."

Fell a silence of perhaps half a minute. Then:

"I dislike to appear inquisitive," Webster began, "but the fact is, neighbor, I'm curious to know where you got that book. I observe you are reading Samuel Butler's 'Way of All Flesh,' and that the book is slightly damaged. Recently I purchased such a book in—"

"Pray do not take the trouble to explain," the other answered airily. "I discovered this excellent book in your suitcase also. In fact, for me, that suitcase has proved to be a repository of treasures."

John Stuart Webster's neck came out of his collar with the suddenness of a turtle snapping at a fly; he drew himself up beside the top berth until his face was on a level with his unbidden guest's, upon whom he bent a look of mingled emotions.

"Who the devil are you?" he demanded.

"I regret I have no card, but even if I had it would be no kindness to inflict upon an American gentleman the cognomen my parents honored me with, for it is long and many-jointed, like a peanut, and embodies the names of all the saints in the calendar. Moreover, just at present I am traveling under an alias. I am known as Mr. Andrew Bowers."

"And your occupation?" Webster managed to articulate.

"Valet de chambre to that prince of gentlemen, Mr. John S. Webster," the other replied with a mischievous gleam in his dark eyes.

Mr. Webster sat down limply on the settee. He was undecided whether to roar with laughter or shriek with rage; while he struggled for a decision Andrew Bowers blew smoke rings at the ceiling.

"Haven't I seen you before?" Webster queried presently.

"I wouldn't be surprised. I drove you down to the steamer in a taxi half an hour ago. You will recall that the taxi driver carried your luggage aboard."

Webster gazed around the stateroom. "Where have you hidden your livery?" he demanded.

"I wrapped it in a newspaper; then, seeking a moment when the deck outside was deserted, I stepped forth in my—I beg your pardon, your—pajamas and tossed it overboard."

"But apparently you did not bring aboard with you a suit of clothes to take the place of your livery?"

"Quite true—lamentably so, Mr. Webster. Perhaps you will accept my desperate need as an excuse for borrowing your pajamas. I notice you have another suit of them. Fortunate man!"

Andrew Bowers was a man of perhaps thirty years, five feet ten inches tall, and apparently in excellent health. He might have weighed a hundred and seventy pounds and he was undeniably handsome.

While Webster was wondering whether his companion was merely a high-class tramp or an absconding bank cashier, a knock sounded on the stateroom door. He opened it and the pursuer stood in the entrance.

"Ticket, please?" he announced.

Webster surrendered both tickets, receiving in turn two seat checks for the dining saloon, and the pursuer passed on to the next cabin.

Andrew Bowers smiled a small, precocious smile, but said nothing, and presently John Stuart Webster broke the silence. "Well," he ordered, "sing the song or tell the story."

"I noticed you surrendered my ticket to the pursuer," the young man answered irrelevantly, "and I am glad of that. I take it as prima facie evidence that you have made up your mind to accept my company."

"You're too infernally cool and cocksure, my friend," Webster warned him testily. "I pride myself on a sense of humor and I dearly love a joke until it's carried too far, but be advised in time, young man, and don't try to play horse with me. My acceptance or non-acceptance of you is a subject for future discussion, since at present we have some fiduciary matters before us. You owe me fifty dollars for your ticket, Andrew Bowers, and in view of the fact that I never saw you before today, suppose we start the voyage by

squaring the account."

Andrew Bowers sat up in the berth and let his legs drape over the side. "Mr. Webster," he began seriously, "if, prior to the arrival of the pursuer to collect the tickets, you had handed my ticket to me, saying: 'Here is your ticket, Mr. Bowers. Be kind enough to reimburse me to the extent of fifty dollars,' I should have been compelled to admit then, as I do now, that I haven't fifty dollars. Fortunately for me, however, you surrendered the ticket to the pursuer before acquainting yourself with the state of my fortunes; the voyage has commenced and whether you like it or not, my dear sir, I am your guest from now until we reach San Buenaventura. Rather an interesting situation, don't you think?"

John Stuart Webster was of Scotch ancestry. He had a hereditary regard for baubees. He was a business man. Prodigal spender though he was and generous to a fault, the fact remained that he always made it a point to get value received, and he was prodigal with his own money; he preferred that the privilege of prodigality with the Websterian funds should remain an inalienable prerogative of the sole surviving member of the Webster family.

"I think you're too cool, young man," Webster retorted. "Just a trifle too cocksure. Up to the present moment you have proffered no evidence why you should not be adjudged a cad, and I do not like cads and must decline to permit one to occupy the same stateroom at my expense. You are clever and amusing and I laughed at you, but at the same time my sense of humor is not so great as to cause me to overlook your impudence and laugh with you. Now, if you have anything to say, say it quickly, because you're going to go away from here—in a hurry."

"I plead guilty to the indictment, Mr. Webster, and submit as an excuse the fact that desperate circumstances require desperate measures. I am not begging my way, neither am I beating it, for the reason that both forms of travel are repugnant to me. I am merely taking advantage of certain fortuitous circumstances to force you, an entire stranger, to extend to me a credit of fifty dollars until we reach San Buenaventura, when you will be promptly reimbursed."

"It is not my habit," Webster retorted stiffly, "to extend credit to strangers who demand it."

"I do not demand it, sir. I beg it of you, and because I cannot afford to be refused I took care to arrange matters so that you would not be likely to refuse my request. Really, I do not mean to be cocksure and impudent, but before you throw me out I'd like to let you in on a secret about yourself."

"Well?"

"You're not going to throw me out."

"Why not?"

"Because you can't."

"That's fighting talk. Now, just to prove to you the depth of error in which you flounder, young man, I am about to throw you out." And he grasped Andrew Bowers in the grip of a grizzly bear and whisked him out of the top berth.

"Wait one second," his helpless victim cried. "I have something to say before you go any further."

"Say it," Webster ordered. "Your tongue is the only part of you that I cannot control."

"When you throw me out on deck," Andrew Bowers queried, "do your pajamas go with me? Does the hair go with the hide?"

"They cost me sixteen dollars in Salt Lake City, but—good lord, yes, I can't throw you out mother naked; d—n it, I can't throw you out at all."

"Didn't I tell you so? Be a good fellow and turn me loose."

"Certainly—for the time being. You'll stay locked in this stateroom while I have a talk with the captain. He'll probably dig up a shirt, a pair of dungarees and some old shoes for you and set you ashore before we get out of the river. If he doesn't do that he'll keep you aboard and you'll shovel coal for your passage."

"But I'm Andrew Bowers and the pursuer has collected my first-class ticket!"

"What of it? I shall declare—and with truth—that you are not Andrew Bowers, that you are not my valet, and that I did not buy the ticket for you. I dare you to face the captain in my pajamas and prove you aren't a stowaway."

"You would win on that point," the baffling guest admitted, "but it is a point you will not raise. Why? Because I have another trump up my sleeve." He climbed back into the upper berth and from that vantage point gazed down benevolently upon John Stuart Webster. "I'm disappointed in you," he continued sadly. "I thought you'd show a little normal human curiosity about me—and you haven't. You do not ask questions or I could explain, while I cannot volunteer infor-

mation without seeming to seek your pity, and that of course would be repugnant to me. I am hoping you will accept my word of honor that you shall be reimbursed two hours after you land in San Buenaventura."

"New music to your song, my friend, but the same old words," Webster retorted, and stepped to the stateroom door. "You're doomed to shovel coal or go ashore."

"Listen. If I go ashore, your responsibility for my life ceases, Mr. Webster, but if the chief engineer happens to be short one coal-passer, and the captain sends me down to the stoke-hole, your responsibility for my death begins, for I'll be put ashore publicly at San Buenaventura and two hours later I'll be facing a firing squad in the cemetery at the Cathedral de la Vera Cruz."

"Gosh," John Stuart Webster murmured dazedly. "I'm afraid I can't take a chance like that for fifty dollars. I'm whipped to a frazzle. My time I'm sitting in back of a royal flush and the other fellow bluffs me out of the pot. I always buy the wine. When it arrives we shall drink to our better acquaintance. Pending its arrival, please be advised that you are welcome to my pajamas, my cigarettes, my book and my stateroom. You are my guest and you owe me nothing, except, perhaps, your confidence, although I do not insist upon that point. Where I come from every man kills his own snakes."

And he held up his hand for Andrew Bowers to shake.

"Mr. Webster," the latter declared feelingly, "I am not a lord of language, so I cannot find words to thank you. I agree with you that you are entitled to my confidence. My name is—"

"Tut, tut, my boy. Your name is Andrew Bowers, and that identifies you sufficiently for the time being. When I suggested that I was entitled to a measure of your confidence, I meant on a few minor points only—points on which my curiosity has been abnormally aroused."

"Very well, my friend. Fire away."

"Are you an American citizen?"

"No, I am a citizen of Sobrante."

"You had no money to pay for your passage to San Buenaventura so you schemed to make me pay your way. Hence I take it that your presence in the capital of your native country is a matter of extreme importance and that the clerk in the ticket office of the Caribbean Mail line is a friend of yours."

"Quite true. He knew my need."

"You were under surveillance and could not leave New Orleans for San Buenaventura unless you left secretly. When I purchased both berths in this stateroom and the ticket clerk knew I held a first-class ticket for a valet that was not, he decided to saw off on me a valet that was. Disguised in the livery of a chauffeur and carrying hand baggage you hoped to get aboard without being detected by your enemies who watched the gangplank."

Andrew Bowers nodded.

"Do you think you succeeded?" Webster continued.

"I do not know, Mr. Webster. I hope so. If I did not—well, the instant this steamer drops anchor in the roadstead at San Buenaventura, she will be boarded and searched by the military police, I will be discovered and—" He shrugged.

"Lawn party in the cemetery, eh?" Webster suggested.

Andrew Bowers reached under his pillow and produced two heavy automatic pistols and a leather box containing five clips of cartridges. These he exhibited in silence and then thrust them back under the pillow.

"I see, Andrew. In case you're cornered, eh? Well, I think I would prefer to die fighting myself."

"I'm not worried, Mr. Webster. Somehow, I think I ran the gambler safely."

"But why did you throw your livery overboard?"

"It was of no further use to me."

"But you'll have to have some clothes in which to go ashore, you amazing man."

"Not at all. The steamer will arrive in the harbor of San Buenaventura late in the afternoon—too late to be given pratique that day. After dark I shall drop overboard and endeavor to swim ashore, and in view of that plain clothes would only prove an embarrassment. I shall land in my own country naked and penniless, but once ashore I shall quickly find shelter. I'll have to risk the sharks, of course."

"Man-eaters?"

"The bay is swarming with them."

"You're breaking my heart," Webster declared sympathetically. "I suppose you're going to feign illness throughout the voyage."

"Not the kind of illness that will interfere with my appetite. I have prescribed for myself a mild attack of inflammatory rheumatism, as an excuse for remaining in bed and having my meals brought to me. This service, of course, will necessitate some slight expense in the way of tips, but I am hoping you will see your way clear to taking care of that for your guest."

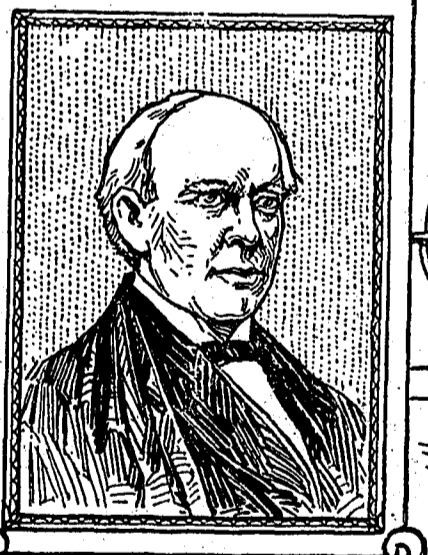

Silently Webster handed Andrew Bowers ten dollars in silver. "That ought to hold you," he declared. "For the rest, you're up to some political skullduggery in Sobrante, and what it is and what's your real name are two subjects in which I am not interested. Let it be understood that you are my valet, Andrew Bowers. That's all I know about you and that's all I care to know about you. In fact, the less I know about you the less will I have to explain in the event of your sudden demise."

"Fair enough," quoth Andrew Bowers. "You're a man after my own heart. I thank you."

**Catarrh Cannot Be Cured**

with LOCAL APPLICATIONS, as they cannot reach the seat of the disease. Catarrh is a local disease, greatly influenced by constitutional conditions, and in order to cure it you must take an internal remedy. Hall's Catarrh Medicine is taken internally and acts thru the blood on the mucous surfaces of the system. Hall's Catarrh Medicine was prescribed by one of the best physicians in this country for years. It is composed of some of the best tonics known, combined with some of the best blood purifiers. The perfect combination of the ingredients in Hall's Catarrh Medicine is what produces such wonderful results in catarrhal conditions. Send for testimonials free.

Hall's Family Pills for constipation.

**How Not to Take-Cold**

Some persons are subject to frequent colds, while others seldom, if ever, have a cold. You will find that the latter take good care of themselves. They take a shower or cold sponge bath every day in a warm room, avoid over heated rooms, sleep with a window open or partly open, avoid excesses, over eating, becoming over heated and then chilled and getting the feet wet. Then, when they feel the first indication of a cold, they take Chamberlain's Cough Remedy without delay and it is soon over.

Men's Chambray work shirts, regular \$1.25 value, special 98c, at Woller's, Cameron. 48-1t

**Leland Items**

The twelve inches of snow we had for Thanksgiving is almost gone and grass and grains are looking green.

Mrs. Parks, who has been visiting at the home of her son, R. B. Parks, for the last month, left Saturday to visit her daughter in Clarkston, before returning home.

Mr. and Mrs. Lloyd Kuykendall were Lewiston passengers, Tuesday.

N. B. Long was on the ridge Tuesday buying cattle for the market.

Judging from the number of dinners given in and around Leland Thanksgiving, there must have been many lives lost. (turkeys geese and chickens).

This humble scribe was an invited guest at a dinner given by Mr. and Mrs. Harry Smith. Roast turkey and everything that goes to make a complete Thanksgiving dinner was served and immensely enjoyed by everyone present. Those present were Messrs and Mesdames A. H. Smith, R. M. Smith, R. W. Smith, Harry Smith, J. A. Hall, Arthur Locke, Mrs. J. M. Woodward and children; Miss Edyth Locke, Lelia Webster, Alma Mouton, Harry Chandler, Howard Smith, Claude Hall and Raleigh Smith. There were, including the children thirty-one present.

James McVicker and Bill Thornton returned from a hunting trip last week each bringing home a deer.

Mrs. DeWinter, who had the misfortune to break her arm about a month ago, went to Lewiston Tuesday to have it treated.

Miss Louise Johnson, who is attending the Lewiston normal, spent Thanksgiving at home.

Miss Carrier, who is teaching the Welker school, spent Thanksgiving with her parents at Asotin.

J. M. Woodward and Herman Keopp are serving on the jury at Lewiston. They came home Saturday, returning Monday.

Mrs. Chas. Garrison is on the sick list this week.

Rev. and Mrs. Hall were visitors at the Corkill home Monday.

Ralph Smith, who is attending school at Leland Stanford University is home for a short visit with his parents.

Rev. Carlson and family visited at the Corkill home, Sunday.

A number of the men who planned to take advantage of the last day of the hunting season had their plans somewhat frustrated by the rainy day. Despite the rain some did go and brought back their full allowance of birds.

Dr. Schilling is coming to Kendrick and will be at the Guy Hotel, December 9. Glasses fitted. Dietrys advised. Find out what is the matter with you or your children. 48-1t

The Ladies' Aid of the Methodist church will give bazaar and supper Saturday, December 10.

**African Salt**

A report made to the French Society of Biology shows that 25,000,000 human beings in the Congo region commonly employ salt of potassium instead of salt of sodium for seasoning their food. They obtain this salt from the ashes of certain plants. Since the opening up of the country ordinary salt has been largely imported, but the negroes regard it as insipid, and abandon with regret the use of their familiar ashes. They take the imported salt only because it is cheap.

**News Items of Local Interest**

Mrs. John Duthie of Pullman spent the week end at the home of Mr. and Mrs. R. D. Newton.

Born to Mr. and Mrs. J. J. Lettenmaier of Southwick, Thursday morning, a 9 1/2 pound girl.

Arthur Holland, who until recently was clerk at the N. P. depot, went to Seattle the first of the week where he has employment. Robert Spencer of Spokane took his place at the local depot last week.

**Be an Early Bird**

You know the saying about the early bird and the worm. Why not be an early bird?

You are going to buy certain Xmas gifts; you know just about whom you will favor in that way. Why not buy what you want early and get just what you want?

It costs you no more to select a ring or a pin or a chain or a watch now than to wait until Dec. 24, when you probably will not be able to get just the thing you want.

If you make a selection now, you do not need to take it away until you are ready for it. We will lay it away for you.

Why not be an early bird and get just exactly the things you want?

**IMPURITIES IN CLOVER SEED**

In Recent Purchase North Carolina Farmer Finds Weed Seeds of Various Kinds.

A farmer in Rowan county, N. C., was about to purchase some clover seed last spring from one of his neighbors, preparatory to seeding down his wheat acreage. He noticed that the seed was somewhat impure, and was reminded of the warnings so frequently given by the county agent in respect to pure seed. He asked to have a small sample tested for purity by the state seed laboratory at Raleigh. The sample was reported on merely as "No. 9." Each pound was found to contain approximately 65,000 buckhorn seeds, 2,282 dodder, 2,822 wild carrot, 2,208 black-seeded plantain, 414 curled dock, 276 Venus looking-glass, 138 each of crag grass and green foxtail—a total of 83,140 weed seeds in each pound. This would, no doubt, be sufficient to seed the man's land to these pests for the next decade. Although this sample was the worst of any tested through the county agent's office, on casual inspection it indicated only ordinary impurity. A laboratory test is a safe check even on the purest farm seeds.

**RETAIN ALL GOOD PRODUCERS**

Relatively Few Hens Will Prove Profitable After Their Second Laying Season.

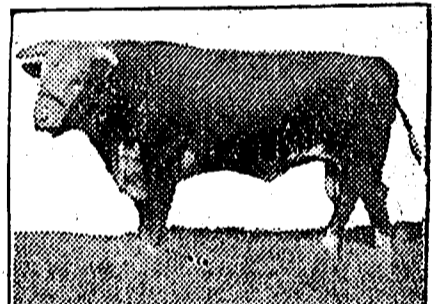

Hens showing indication of having been good producers throughout the year should be retained for the next year regardless of their age, but relatively few hens will prove to be profitable producers beyond their second laying year if of the heavier breeds, such as the Plymouth Rock, Rhode Island Red, Wyandotte or Orpington, or beyond their third laying year if of the lighter breeds such as the Leg-horn.

**LIVE STOCK NEWS**

**DISTRIBUTE 130 PURE BULLS**

Animals Intended for Breeding Purposes in Different Communities in Kentucky.

Prepared by the United States Department of Agriculture. The first of the "better-sires" sales held in Kentucky this year resulted in the sale of 130 purebred bulls. These animals are being distributed through the state and will be used for breeding purposes. In describing the sale, Wayland Rhoads of the extension

Type of Bull Used to Build Up Herds in Kentucky.

division, University of Kentucky, states in a letter to the United States Department of Agriculture that "much improvement will come from it."

Notwithstanding the present excellence of much of the live stock in the state, Kentucky farmers are welcoming the opportunity to obtain, at reasonable prices, purebred sires of superior type. Additional sales are to be held.

**VERY FEW REAL RUNTS BORN**

Undersized and Unthrifty Animals Are Generally Result of Inadequate Feed and Care.

Emphasizing that runty live stock are generally the result of inadequate feed, housing and care, the editor of a farm paper in the Central West adds to the experiences which nearly 1,000 farmers have already reported to the United States Department of Agriculture on the subject of runt prevention. "There are very few real runts born," he declares. "They may be a little undersized, perhaps a trifle weaker and sometimes of inferior constitution, brought on by improper breeding systems. But poor housing, limited range, getting rooted away and cheated by the larger and huskier of the litter—these are the agencies by which most so-called runts are formed. Given proper care and feed until they get a start, the runts will prove money-makers."

These comments agree closely with the opinions of others who contributed their experiences in the matter to the department. Particular care needs to be given live stock at weaning time, since this is the time when the dams fail to give the nourishment required by the growing animal and when the young stock is learning to eat other feed.
