KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, MARCH 10, 1922

NUMBER 10

## LATAH COUNTY NEWS PARAGRAPHS

### Clipped From The Columns of Neighboring Papers.

Star-Mirror: Thorough investigation of the killing of three deer on Wednesday in Wauncher gulch, near Kendrick, is being made by L. E. Brooks, deputy state game warden, according to announcement Monday. The case is looked upon as one of the worst in the history of the county, as the deer are not fit for human consumption at this time of the year.

Deputy Game Warden Brooks was called Thursday to investigate the case and found that three deer had been killed. One buck had been killed outright and a large doe had been crippled so badly that Mr. Brooks was forced to kill the animal. The killers had apparently killed another animal and had made away with it.

The big doe, wounded, was found by the roadside and killed by Mr. Brooks, and the buck was also found close to the road, having run a short distance before dropping dead.

"I don't know as yet who the parties were, but every effort is being made to find out and prosecution will follow," said Mr. Brooks. "It is the worst case I have ever known since I have been game warden and I look upon the matter as criminal. The deer are not fit for human consumption at this time of the year and the approach of fawning time makes the offense doubly serious."

Mr. Brooks reported that there were many deer around Wauncher gulch. The winter has driven them in to seek food on the sides of the canyon where the snow has disappeared.

Genesee News: Fred Hampton is the proud owner of what is probably the finest sweater in this section of the country.

There happened to be a very fine black sheep on the Hampton-Driscoll ranch possessed of very fine "black" wool which took Fred's eye. The "black sheep" of the ranch was shorn of its wool, which was turned over to Mrs. A. Kern, who washed, carded and spun it into yarn, after which she knit it into a sweater for Mr. Hampton. A garment like the one made by Mrs. Kern cannot be bought on the market and Mr. Hampton is justly proud of it.

Deary Press: A vacancy having occurred on the highway board on account of the resignation of Commissioner K. L. Karlson, the commissioners have put the matter of choosing his successor up to the voters of the highway district. The election is to be held from 1 o'clock to 5 Saturday afternoon, March 11, at the highway office.

Since no method of nominating candidates has been announced, it is presumed that each voter may vote for whoever he pleases, the high man to be declared elected.

A good man is wanted, of course. It would be a good idea for all who are interested in the welfare of the district to agree upon one candidate, and work for his election.

Juliaetta Record: Mrs. Manford Nutt and daughter, Miss Crystal, went to Lewiston the first of the week, where an X-ray examination was made of the injuries sustained by the latter in a coasting accident about a month ago. It was found that a small bone in the foot was crushed which prevented the injuries from healing and it will probably be some time before the injuries are completely healed.

Lessons Learned From War. In a general way it might be said that the three years which have elapsed since the armistice have served to crystallize the information that medical science gained in the World war, so that many of the things done under the desperate stress of war are just now coming into general use. Facial reconstruction is in this class. Members of the medical profession are particularly interested in the work of Dr. Vilray P. Blair of St. Louis, who was consulting surgeon to the American expeditionary forces in France in charge of reconstruction surgery. He was able to present final statistics, showing that 2,000 American soldiers needed the services of this division. Of this number about 2,000 were treated abroad and 600 sent home for treatment.—Scientific American.

## Linden News

We wish to extend to Mrs. Alexander the sympathy of the entire community in her bereavement.

Mrs. Norsch is again on the ridge, being at the C. H. Fry home.

The attendance at school last week was very light, owing to illness.

C. P. Israel and family are all up again after being sick for some time. Stewart Wilson and family are back on Cedar Creek again. Miss Elsie Zimmerman is staying with them.

Ed Fonberg and Elmer Shingler were in Park, Monday.

A. G. Wilson was on the ridge the first of the week.

Mrs. Shingler spent Monday at the Fay home.

We are glad to hear that those who have been ill are all reported much better.

Robert Gilchrist spent Tuesday night with Stanley and Donald Shingler.

Mrs. Addie Strahl and Mrs. Lily Garner, were visitors at Park, Monday.

Mrs. Hunt and son, Raymie, are visiting at the Gentry home on Texas ridge.

Miss Gertrude Hunt of Kendrick and her sister, Mrs. Jim Holt of Lewiston, were week end visitors with home folks on the ridge.

Clyde Alexander and Mrs. O. Stone returned to their homes, Monday.

Miss Eva Smith is spending a few days with her aunt, Mrs. Alexander.

A. L. Longfellow went to Spokane, Tuesday.

## Big Bear Ridge

Charles Elliott is spending the week with his wife and daughter at the Davis home near Leland.

T. H. Rogstad came up from Clarkston, Sunday, to spend some time at the home of his son, Arthur.

Hiram Galloway returned home from the logging camps near Park, Thursday.

Miss Inez Johnson is spending the week at her home near Deary, the Rimrock school being closed for a week on account of sickness in the district.

Mrs. Kate Galloway and daughter, Miss Mary, were Moscow visitors, Wednesday.

Miss Marie Kieth is spending the week in Kendrick.

Mr. and Mrs. Frank Glaser were Moscow visitors last week.

Mrs. Robert Clemenhausen and daughter, Violet, have moved to Deary.

Anton Nelson and son, Gust, are spending the week with relatives on Little Bear Ridge.

## John P. Alexander

John P. Alexander was born near Bellaire, Ohio, December 1, 1844, and died March 1, 1922, at the age of 77 years and 3 months.

He was married January 9, 1882, to Hattie M. Hart of Flora, Ill. He moved with his family from Illinois to Moscow, Idaho, in 1886, later locating on Cedar Creek Ridge, where he has lived for 36 years, being one of the pioneers of the ridge.

He was a member of the Presbyterian church and was highly respected by all who knew him.

He is survived by his wife, three sons—Clyde of Winchester, Idaho, Addison and Louis of Linden, one daughter, Mertie Stone of Lewiston, one sister, Mrs. Rena Neff of Flora, Ill., one nephew, Clement Israel of Linden, also seven grandchildren. Funeral services were held Saturday at 11 o'clock at the Gold Hill church by Rev. Pressnell.

We desire to express our sincere thanks to our friends and neighbors for their many acts of kindness and sympathy during the sickness and death of our husband and father.

MRS. J. P. ALEXANDER AND FAMILY.

Mrs. Alvira Henderson, aged 70, passed away at a Lewiston hospital early Wednesday morning. The remains were taken to Southwick for burial. She was the mother of J. W. Henderson of Southwick.

## Roma, Huge Army Dirigible Balloon, Is Destroyed

Thirty-four men were killed and others injured when the semi-rigid dirigible Roma, purchased by our army from Italy, fell near Hampton Roads and was destroyed by explosion and fire. The illustration shows the Roma in the air and the mass of wreckage that was all that remained after she fell.

## Big Melon Acreage

Juliaetta.—The unprecedented demand of last year for Juliaetta watermelons has prompted the local growers here to put in the largest acreage this year ever put in in a single season. Some idea may be had of the volume of this industry when it is stated that it will require more than 200 pounds of seed to plant this year's crop here.

Walter Cochran and Creighton Bidson will put in, together 25 acres; J. N. Steensma will put in 15 acres; A. E. Jones, 10 acres, constituting the heaviest growers, but there will be numerous growers on a smaller scale, which will no doubt swell the total acreage to 100 acres.

Reckoning 20 tons to the acre and 100 acres—that would mean 4,000,000 pounds of watermelons from a village of less than 500 population, in a single year.

## Farm Bureau to Meet

The fourth annual meeting of the Latah County Farm Bureau will be held at the Farmers' store in Moscow on Wednesday, March 15th, at 1:30 p. m. Officers and executive committeemen will be elected for the ensuing year and county-wide projects will be decided upon. A committee has been appointed by the executive committee of the farm bureau to report a wage scale for farm labor for the spring season. Other important special business will be considered.

The principal speakers will be E. J. Iddings, dean and director of the Idaho College of Agriculture and Experiment Station, on "An Agricultural Policy for Idaho;" and George Stevers, secretary of the Moscow Farmers' Union, on "The Farm Bureau." Everyone interested in the business of farming, whether farm bureau members or not, is invited and urged to attend the meeting.

## Sent to Penitentiary

Philip Daugherty, who was bound over to the district court by Justice of the Peace I. C. Hattabaugh on Friday, appeared in court yesterday morning and entered a plea of guilty to a charge of perjury. He was sentenced by Judge W. N. Scales to serve from two to fourteen years in the penitentiary. Daugherty swore to a complaint charging his father with a criminal offense on December 17, 1921. At the preliminary hearing he testified that he had falsely charged his father because he wanted to get even with him over some misunderstanding between the two. The father was released and Prosecuting Attorney Leo McCarty caused the arrest of Philip on the perjury charge.

He will probably be taken to the penitentiary at Boise tomorrow to begin serving his sentence.

## Longs Digging a Well

N. B. Long & Sons are having a well dug at the rear of their store, which will be used to supply water for the ice machine. Last summer city water was used for this purpose, but it was found to be too expensive on account of the large quantity of water that it required. The water will be pumped from the well by electric motor.

## News Notes of Interest

For the first time in history, motor cars have been driven across Flathead lake in Montana. At Coeur d'Alene, an enterprising stage owner established a 20 mile service between the city and Harrison across the ice on Lake Coeur d'Alene.

Markets at Spokane receive twelve head of buffalo last week from the Allard herd at Ronan, Montana. The meat was retailed at 25 cents per pound for roasts, 35 cents for steaks and 15 cents for stews. The entire quantity was sold out in one day, customers vying with each other to secure the unusual meat.

Five tons of T. N. T., part of the government's war supply, was exploded in one blast on the Rimrock project recently. It is estimated the charge lifted 5,000 tons of basaltic rock.

An orthopedic hospital to cost \$250,000 will be constructed in 1923 in Spokane by the Shrine.

The question of Sunday movies will be decided at Moscow the 25th of this month by a straw vote of the people. The city council has pledged itself to act in accordance with the result of the election.

Spare hours are commercialized and made to bear fruit by University of Idaho students who are working all or part of their way through college, according to a tabulation prepared by Marshal B. Macey of Boise, a student in sociology and statistics. Average earnings of 139 students were given as \$25.25 a month—or a total of \$3,500 a month for the period covered. This rate, continued through the nine months of a college year, would bring in \$31,500.

Mrs. S. L. Mayer and Mrs. James Ashton arrived from Seattle this week to visit their parents, Mr. and Mrs. Julius Patrick.

A colored man was in court for having attacked a white man. "Why did you beat up this man this morning?" the judge asked. "Because he called me a rhinoceros three years ago," replied Rastus. "Why did you wait three years before becoming indignant about it?" the judge inquired. "Well, sah, your honor, I never saw a rhinoceros until this morning," replied Rastus.

## Interest in Dairy Stock

A meeting of farmers interested in purchasing good dairy stock was held at the Farmers' store in Moscow on Wednesday, March 1st. This was the third meeting of this nature held during the past six weeks. County Agent Fletcher was elected temporary chairman of the meeting and asked to carry on correspondence for the farmers. The meeting was addressed by Mr. Gabby, dairy herdsman for the University of Idaho, and Mr. Fletcher.

Farmers present at the meeting wanted a total of more than one carload of dairy cows, but it was the consensus of opinion that if dairy cattle are to be shipped in from other states the farmers should find out how many cattle are wanted in the county as a whole and then arrange to send representatives to purchase the cattle. The overhead expense per animal will decrease as the number of cattle purchased increases. The meeting elected a committeeman in each community to bring the proposed purchase of dairy cattle to the attention of the farmers of the community and get information in regard to cattle wanted.

Committeemen listing dairy cattle wanted in the territory tributary to Kendrick are: Kendrick, G. A. Wayland; American Ridge, Wm. Cox; Little Bear Ridge, Marcus Anderson; Big Bear Ridge, A. N. Rogstad, and Cedar Creek, Everett Whisler.

Those present at the meeting believed that Latah county farmers would be apt to get the best grade of dairy stock by purchasing good two year-old heifers, bred to calf late in the spring or during the summer. Judging by the experience of farmers of southern Idaho who have shipped in cattle during the past winter, such animals should cost \$90 to \$95 laid down in Moscow, with all overhead charges figured in. It appears that farmers needing financial assistance to purchase cattle will be able to borrow all necessary funds from their local banks, so no steps have been taken to form any central loan association.

There will be another meeting at the Farmers' store in Moscow on Thursday, March 16th, at 1:30 p. m. All desiring stock should attend that meeting as definite arrangements for the shipment of cattle will be completed at that meeting.

## Given Jail Sentence

John Linderman and Hjelmer Osterberg, both of Troy, pleaded guilty in district court Saturday and were given jail sentences of 30 days each and fines of \$100 by Judge E. C. Steele. The men pleaded guilty to charges of possession of intoxicating liquor. They were arrested on the Linderman place by a special deputy of the sheriff's office and a half gallon of moonshine liquor was taken as evidence.

## NOW POISON THE GROUND SQUIRREL

### Campaign on in Nez Perce County

The squirrel campaign which is being carried on in Nez Perce county will be conducted in the Southwick and Leland communities March 16. At Southwick at 9 a. m. and Leland at 2 p. m.

Through the efforts of County Agent Skuse the biological survey funds for the extermination of squirrels on public lands have again been secured for such lands in this county and it has been arranged that Mr. D. D. Green of the biological survey will go with Mr. Skuse to the community meetings, where he will distribute the free poison for the public land to farmers whose holdings are adjacent to such land.

The extension division of the university purchases the chemicals for the whole state, after calling for bids, and each county in turn has the privilege of buying from them. It is necessary, however, to have the funds there before poison can be shipped out, so it is necessary for those desiring to get poison to deposit with their community chairman on the pest control project at the rate of \$1.25 for each ounce of strychnine alkaloid that they desire to secure. One ounce is sufficient to treat eight quarts of oats and this amount of poison is ordinarily figured as sufficient for 80 acres of land, with the average amount of squirrels on it. With each ounce of the strychnine will be the one-eighth ounce of saccharin and directions for mixing and distributing. At the end of the season the funds on hand will be returned prorata to those securing poison, as it is handled at cost and the deposit required is made large enough to cover the expense of handling. The alkaloid costs \$1.05 and the saccharin 15 cents f. o. b. Boise.

Deposits should be made to get amount of poison needed for entire year, as it is doubtful about getting it later in the season. Deposits can also be made at the county agent's office in the postoffice building at Lewiston and all deposits should be made at once, as the funds must be in the hands of the county agent by March 3.

## Flu on the Increase

Reports indicate that the peak of the disease has not been reached as yet, there being an increase in the number of cases reported in the last two days. The Department of Public Welfare has decided that the following rules will be in force:

1. No person showing evidence of the beginning of the disease, such as cold, sneezing, coughing, watery eyes, etc., to be allowed in any public gathering, such as schools, churches, theatres, crowded stores or other gatherings of people.

2. Persons in charge of such public gatherings will be requested to ask such persons to leave the place.

School teachers are requested to send any child home that shows any of the above symptoms and to notify the school nurse, who will investigate the case.

People are notified that there will be no further placarding of homes from which the disease is reported.

Parents are urged to keep their child at home and in bed if it shows signs of becoming ill. It is much better to take the disease in time and break it up than to allow the child to run loose until the disease is well developed, as this frequently results in complications.

People are also urged to take better care of their health in general; to see that their homes are properly heated and ventilated and otherwise to do everything possible to avoid the lowering of their vitality. In the average case, the course of the disease seems to run for a period of two and a half to three or four days. Cases with a high temperature are urged to take a longer time in convalescing before assuming their duties.

Physicians are requested to report each day to the County Health Officer, and also to the Department of Public Welfare, the number of new cases. It is advisable to isolate the person ill at home from the rest of the family as much as possible, and thus avoid any unnecessary exposure. This is an excellent time to commence the practice of good health laws.

## Fuller's SPECIFICATION "Home Service" Paints

Varnishes - Enamels  
Mfd. by W. P. Fuller & Co.

WHERE TO BUY: Important that you get the right material so be sure to go to the right store for Fuller products. Cut out the coupon below as a memo to direct you. Don't allow surfaces to rot. It costs less to paint them.

Write us now—a postcard—for booklet of Fuller's Specification "Home Service" Paint Products which tells just what to buy for the work you have in mind. Send full description of and get our free advice on any kind of painting job you want to do.

For all exterior jobs of painting it is advisable to obtain the services of a Master Painter

**SAVE THIS—CUT THIS OUT AND PUT IT IN YOUR POCKETBOOK OR HANDBAG AS A MEMO**

Fuller's "Home Service" Paints are sold by the following in your city:

**Farmers Hardware Co., Kendrick, Idaho**

## Made His Side Car Into a Boat

Phillip Johnson of Los Angeles, Cal., during a recent expedition to photograph wild birds making their homes on the islands of that strange body of water, the Salton sea, in the midst of the desert near the south central portion of California, was unable to find any boat to reach the islands from the mainland. Nothing daunted, he caulked up the side body of his motorcycle and turned it into a seaworthy boat in which he traveled many miles, even going out of sight of land. The photograph shows Mr. Johnson navigating his unique canoe.

### A Judicious Inquiry

A well known traveling man who visits the drug trade, says he has often heard druggists ask a customer, who wished to buy a cough medicine, whether it was for a child or an adult and if for a child, they almost invariably recommended Chamberlain's Cough Remedy. The reason for this is that they know there is no danger from it and that it always cures. There is not the least danger in giving it and for colds, croup and whooping cough it is unsurpassed.—Adv.

**FOR SALE:** good phonograph with 20 splendid records and record albums will sell for \$20. Inquire Gazette. 6-1t.

### Perilous "Sport."

What is the world's most dangerous sport? Mountain climbing takes many victims, but descending into the craters of volcanoes beats it. The present activity of Vesuvius calls attention to it. The descent must be made in fireproof clothes and gas mask. The air is full of stinging fumes and there is always the sporting chance that the volcano may start erupting. The floor of an active volcano is usually semi-liquid. Parts are solid enough to stand upon, others are liquidified rock.

## DAIRY FACTS

### AID BETTER BULL CAMPAIGN

Kansas City Chamber of Commerce Offers \$2,000 in Prizes for Replacing Scrub Sires.

(Prepared by the United States Department of Agriculture.)

An illustration of the earnestness with which various states and local organizations have taken up live stock improvement work, especially in connection with purebred sires, is shown by the work in Missouri. The extension service of the Missouri College of Agriculture started a better-bull campaign in January, 1920, and so successful were the results of the work during the year that the Kansas City chamber of commerce appropriated \$2,000 to be used in cash prizes this year.

The prizes are to be awarded to the four counties which replace the greatest number of scrubs with purebred bulls, \$1,000 being the first prize, \$500

The Purebred Dairy Sire When Introduced into a Scrub or Grade Herd Soon Brings About a Phenomenal Change.

the second, \$300 the third, and \$200 the fourth. To obtain a prize, however, a county must replace at least 25 scrub bulls.

In an announcement of the contest received by the United States Department of Agriculture, state officials directing the work say they have concentrated on better bulls because they think the greatest good will result from efforts along this line. The announcement states that any county in the state is eligible for entrance in the contest. Awards will be made on the basis of the number of scrub bulls of breeding age replaced by registered bulls. A scrub is defined as one that is not registered or eligible for registry.

Any county which at any time during the year completes its work with 100 per cent purebred registered bulls will be entitled to first prize; but should more than one county show 100 per cent registered bulls the various counties will be entitled to first, second, third, and fourth prizes, respectively, in the order in which they complete the work. The counties competing in the contest are to form organizations, under the leadership of the county agent, to promote the work. All questions arising in the contest will be referred to a better-bull committee of the Missouri College of Agriculture for settlement, and the decision of this committee will be final.

A monthly report showing the name and address of the owner of the scrub bull replaced and breed of the registered bull in which an interest has been purchased will be forwarded on the first day of each month to the state project leader. At the end of the year a final report, certified by the county agent, will be sent in, giving the names and addresses of owners of scrub bulls which have been replaced, together with the breed, name, and registry number of each registered bull in which the contestants purchased an interest.

### CHURN NUMBERS ARE USEFUL

Makes It Simple Matter to Separate Different Churnings and Sell According to Score.

The use of churn numbers, so that the receivers of butter can more readily sort out separate churnings, is urged upon creamery men by food-products inspectors of the bureau of markets, United States Department of Agriculture. In a lot of butter recently examined by these inspectors the score varied from 88 to 92. As no churn numbers were shown, the only way the receiver could separate the butter was by examining every tub. If the churn numbers had been shown, it would have been a simple matter to separate the various churnings and sell them according to score.

It is not possible to take time to examine every tub, so the butter is sold according to the samples taken and at a discount if the samples vary widely. If there should be just one poor tub in the shipment and the sampler happens upon it, the whole shipment would suffer, while if churn numbers are used only the tubs in that churning would receive the lower score.

**KENDRICK HARDWARE COMPANY**

**Webster  
—Man's  
Man**

By **PETER B. KYNE**

Author of  
"Cappy Ricks," "The Valley  
of the Giants," etc.

(Copyright, by Peter B. Kyne)

CHAPTER XII.—Webster, after looking it over, decides to put his whole fortune into the mine. He sends Billy Geary to the United States to purchase the necessary equipment, advising him to marry Dolores in Buenaventura before he leaves. Knowing that unless Rucy can overthrow Sarros his mine will be confiscated, Webster agrees to finance the venture. Returning to Buenaventura, he is astonished to find Dolores still there and Geary on his way to the United States.

CHAPTER XIII.—Dolores tells Webster that Billy Geary had asked her to marry him and that she had refused. Amazed, but entirely misunderstanding the situation, he accepts the explanation. He explains to Dolores how her brother has laid his plans for the overthrow of Sarros. Webster and Ricardo have a final understanding.

The man who had challenged him—a lank, swarthy individual from the Mexican border—looked him over with twinkling eyes. "You'll do, Caferty, old timer," he drawled, "and if you don't, you'll wish you had. There's a man for every rifle just now, but I wouldn't be surprised if there'd be a right smart more rifles than men before a great while. Help yourself to the gun o' the first man that goes down; in the meantime, hop into that there truck and keep the cartridge belt for the machine guns full up. You're just in time."

Without further ado Don Juan climbed into the truck. A little citadel of sheet steel had been built around the driver's seat, with a narrow slit in front through which the latter peered out. The body of the truck had been boxed in with the same material and housed two machine guns, and a crew of half a dozen men crouched on the floor engaged in loading the belts. Four motor bicycles, with sturdy, specially-built side cars attached, and a machine gun in each side car, were waiting near by, together with a half-dozen country carts loaded with ammunition cases and drawn by horses.

"How soon do we start?" Don Juan demanded anxiously, as he crowded in beside one of his new-found comrades.

"I believe," this individual replied in the unmistakable accents of an Oxford man, "that the plan is to wait until five o'clock; by that time all the government troops that can be spared from the arsenal and palace will have been dispatched to the fighting now taking place west of the city. Naturally, the government forces aren't anticipating an attack from the rear, and so they will, in all probability, weaken their base. I believe that eases our task; certainly it will save us many men."

Don Juan nodded his entire approval to this shrewd plan of campaign and fell to stuffing cartridges in the web belt, while he whistled softly, unmusically, and with puffing, hissing sounds between his snaggle teeth, until a Sobrantean gentleman (it was Doctor Pacheco) came out of the warehouse and gave the order to proceed.

They marched along the water front for four blocks and then turned up a side street, which happened to be the Calle de Concordia, thus enabling Mother Jenks, who was peering from the doorway of El Buen Amigo, to see

them coming. "Hah!" she muttered. "Enery they're comin'. The worm is turnin'."

"Enery, They're Comin'."

"Enery; 15 years you've wyted for vengeance, my love, but tody you'll get it."

She waddled out into the street and held up her hand in a gesture as authoritative and imperious as that of a traffic officer. "Batter-ry 'ait!" she croaked. She had heard the late Enery give that command often enough to have acquired the exact inflection necessary to make an impression upon men accustomed to obeying such a command, whenever given. Instinctively the column slowed up; some of the Foreign Legion, old const artillerymen, no doubt, came to a halt with promptness and precision; all stared at Mother Jenks.

"Ow about 'arf a dozen cases o' good brandy for the wounded?" Mother Jenks suggested. "An' 'ow about a bally old woman for a Red Cross nurse?"

"You're on, ma'am," the foreign leader replied promptly, and translated the old lady's suggestion to Dr. Pacheco, who accepted gracefully and thanked Mother Jenks in purest Castilian. So a detail of six men was told off to carry the six cases of brandy out of El Buen Amigo and load them on the ammunition carts; then Mother Jenks crawled up into the armored truck with the machine gun crew, and the column once more took up its line of rapid march.

The objective of this unsuspected force within the city was, as Ricardo Rucy shrewdly suspected it might be, poorly garrisoned. Usually a force of fully 500 men was stationed at the national arsenal, but the sharp, savage attack from the west, so sudden and unexpected, had thrown Sarros into a panic and left him no time to plan his defense carefully. His first thought had been to send all his available forces to support the troops bearing the brunt of the rebel attack, and it was tremendously important that this should be done very promptly, in view of the lack of information concerning the numerical force of the enemy; consequently he had reduced the arsenal force to 100 men and retained only his favorite troops of the guards and one company of the Fifteenth infantry to protect the palace.

Acting under hastily given telephonic orders, the commanding officer at the cantonment barracks had detailed a few hundred men to fight a rear-guard action while the main army fell back in good order behind a railway embankment which swept in a wide arc around the city and offered an excellent substitute for breast-works. This position had scarcely been attained before the furious advance of the rebels drove in the rear guard, and pending the capture of the arsenal, Ricardo realized his operations were at an impasse. Promptly he dug himself in, and the battle developed into a brisk affair of give and take, involving meager losses to both factions, but an appalling wastage of ammunition.

The arsenal, a large, modern concrete building with tremendously thick walls reinforced by steel, would have offered fairly good resistance to the average field battery. Surrounding it on all four sides was a reinforced concrete wall 30 feet high, with machine gun bastions at each corner and a platform along the wall, inside and 25 feet from the ground, which afforded foot room for infantry which could use the top five feet of the wall for protection while firing over it. There was but one entrance, a heavy, barred steel gate which was always kept locked when it was not necessary to have it opened for ingress or egress. Given warning of an attack and with sufficient time to prepare for it, 100 of the right sort of fighting men could withstand an indefinite siege by a force not provided with artillery heavier than an ordinary field gun. With a full realization of this, therefore, Ricardo and his confreres had designed to accomplish by strategy that which could not be done by the limited forces at their command.

As the column approached the neighborhood of the arsenal, three detachments broke away from the main body and disappeared down side streets, to turn at right angles later and march parallel with the main command. Each of these detachments was accompanied by one unit of the

motor-cycle mounted machine gun battery with its white crew; two blocks beyond the arsenal square each detachment leader so disposed his men as to offer spirited resistance to any sortie that might be made by the troops from the palace in the hope of driving off the attackers of the arsenal.

Having thus provided for protection during its operations, the main body nominally under Dr. Pacheco but in reality commanded by the chief of the machine gun company, proceeded to operate. With the utmost assurance in the world the armored truck rolled down the street to the arsenal entrance, swung in and pointed its impudent nose straight at the iron bark while the hidden chauffeur called loudly and profanely in Spanish upon the sentry to open the gate and let him in—that there was necessity for great hurry, since he had been sent down from the palace by the president himself, for machine guns to equip this armored motorcar. The sentry immediately called the officer of the guard, who peered out, observed nothing but the motortruck, which seemed far from dangerous, and without further ado inserted a huge key in the lock and turned the bolt. The sentry swung the double gates ajar, and with a prolonged and raucous toot of its horn the big car loafed in. The sentry closed the gate again, while the officer stepped up to turn the key in the lock. Instead, he died with half a dozen pistol bullets through his body, and the sentry sprawled beside him.

The prolonged toot of the motorhorn had been the signal agreed upon to the detachment waiting in a secluded back street that the truck was inside the arsenal wall. With a yell they swept out of the side street and down on the gate, through which they poured into the arsenal grounds. At sound of the first shot at the gate, the commandante of the garrison

which had been drawn up in a double rank for revellie roll call, realized he was attacked, and that swift measures were necessary. Fortunately for him, his men were standing at attention at the time, preparatory to receiving from him one of those ante-battle exhortations so dear to the Latin soul.

A sharp command, and the little garrison had fixed bayonets; another command, and they were in line of squads; before the autotruck could be swung sideways to permit a machine gun to play on the Sobranteans in close formation, the latter had thrown out a skirmish line and were charging; while from the guardhouse window, just inside the gate, a volley, poured into the unprotected rear of the truck following its passage through the gate, did deadly execution. The driver, a bullet through his back, sagged forward into his steel-clad citadel; both machine gun operators were wounded, and the truck was stalled. The situation was desperate.

"I'm a gone goose," mourned Don Juan Cafetero, and he leaped from the shambles to the ground, with some hazy notion of making his escape through the gate. He was too late. Two men, riding tandem on a motor-cycle with a machine gun in the specially constructed side-car, appeared in the entrance and leaped off; almost before Don Juan had time to dodge behind the motortruck to escape possible wild bullets, the machine gun was sweeping the oncoming skirmish line. Don Juan cheered as man after man of the garrison pitched on his face, for the odds were rapidly being evened now, greatly to the pleasure of the men charging through the gate to support the machine gun. Out into the arsenal yard they swept, forcing the machine gun crew to cease firing because of the danger of killing their own men; with a shock bayonet met bayonet in the center of the yard, and the issue was up for prompt and final decision.

Don Juan's Hibernian blood thrilled; he cast about for a weapon in this emergency, and his glance rested on the body of the dead officer beside the gate. To possess himself of the latter's heavy "cut-and-thrust" sword was the work of seconds, and with a royal good will Don Juan lunched himself into the heart of the scrim-

Launched Himself Into the Heart of the Scrimmage.

mage. He had a busy impression that he was striking and stabbing, that others were striking and stabbing at him, that men crowded and breathed and

pressed and swore and grunted around him, that the fighting-room was no better than it might have been, but was rapidly improving. Then the gory fog lifted, and Doctor Pacheco had Don Juan by the hand; they stood together in the arsenal entrance, and the little Doctor was explaining to the war-mad Don Juan that all was over in so far as the arsenal was concerned—the survivors of the garrison having surrendered—that now, having the opportunity, he, Doctor Pacheco, desired to thank Don Juan Cafetero for his life. Don Juan looked at him amazedly, for he hadn't the slightest idea what the Doctor was talking about. He spat, gazed around at the litter of corpses on the arsenal lawn, and nodded his red head approvingly.

In an incredibly short space of time the news that the arsenal had been captured and that Sarros was besieged in the palace spread through the city. The sight of the red banner of revolution floating over the arsenal for the first time in fifteen years brought hundreds of willing recruits to the rebel ranks, as Ricardo Rucy had anticipated; these were quickly supplied with arms and ammunition; by ten o'clock a battalion had been formed and sent off, together with the machine gun company, to connect with the San Bruno contingent advancing from the south to turn the flank of the government troops, while the equipping of an additional battalion proceeded within the arsenal. As fast as the new levies were armed, they were hurried off to re-enforce the handful of white men who had, after clearing the arsenal, advanced on the palace and now, with machine guns from the arsenal commanding all avenues of escape from the trap wherein Sarros found himself, were calmly awaiting developments, merely keeping an eye open for snipers.

Thus the forenoon passed away. By one o'clock Don Juan Cafetero—who in the absence of close-range fighting had elected himself ordnance sergeant—passed out the last rifle and ammunition. He was red with slaughter, slippery with gun-grease, dripping with perspiration, and filthy with dust and dirt. "Bagorra," he declared, "a coward bottle av beer would go fine now." Then, recalling his limitations, he sighed and put the thought from him. It revived in him, however, for the first time since he had left the steamer, a memory of John Stuart Webster, and his promise to the latter to report on the progress of the war. So Don Juan sought Doctor Pacheco in his headquarters and learned that a signal-man, heliographing from the roof of the arsenal, had been in communication with General Rucy, who reported the situation well in hand, with no doubt of an overwhelming victory before the day should be over. This and sundry other bits of information Don Juan gleaned and then deserted the Sobrantean revolutionary army quite as casually as he had joined it, to make his precarious way down the Calle San Rosario to the bay.

**CHAPTER XV.**

Throughout the forenoon Webster and Dolores, from the deck of the steamer, watched the city. By ten o'clock the sounds of battle had swelled to a deeper, steeper roar, and refugees arriving brought various and fragmentary stories of the fighting. From this hodge-podge of misinformation, however, Webster decided that Ricardo's troops were forcing the issue with vim and determination, and since the most furious fighting was now well in toward the heart of the city, it seemed reasonable to presume the struggle was for possession of the arsenal and palace.

At noon the deep diapason of conflict began to slacken; by one o'clock it had dwindled considerably, and at two o'clock Webster, gazing anxiously cityward, observed Leber's launch coming rapidly out from shore. At the wheel stood Don Juan Cafetero; as the launch shot in under the vessel's side he looked up, searching for Webster's face among the curious throng that lined the rail.

"Who has won?" a voice called, and another, evidently a humorist and a shrewd judge of human nature, replied: "Why ask foolish questions? The rebels, of course. That fellow's Irish and the Irish are born rebels. Look at the scoundrel. He's black with gun grease and burned powder where he isn't red with blood. The butcher!"

"Fugh-a-ballagh!" he shrieked. "We've got the devils cornered now. 'Twill be over two hours hence."

Don Juan tied up the launch at the gangway and leaped up the ladder, three steps at a time. "Glory be to God," he panted and hurled himself into Webster's arms. "I was in it! I was. I got back in time to catch up wif' the lads at the warehouse an' they were the fine, fightin' devils, I'll gamble you. Oeh, 'twas a grand bit av a fight—whilst it lasted. They put me in the motor-thruck, loadin' the belts wif' cartridges as fast as the gunners emptied them, but faith they couldn't keep me there. I got into the heart av the scrimmage in the yard av the arsenal an' faith 'twas well for that little Doctor Pacheco I did. 'Twas wurk to me likin'. I'd a machete—"

"You bloodthirsty scoundrel!" Webster shook the war-mad son of Erin. "I told you not to mix in it, but to hang around on the fringe of the fight, and bring us early news. Suppose you'd been killed? Who would have come for us then? Didn't I tell you we had a dinner engagement in the palace?"

## GLEANINGS

Mrs. Elbert Kuykendal has been very ill at her home the last week. She was taken to the hospital at Lewiston, Wednesday.

Mrs. Emma Hecht returned Wednesday from a visit at Lewiston.

Mrs. Seltz and daughter arrived from Minneapolis, Tuesday, to visit at the home of Mr. and Mrs. A. K. Carlson.

Mrs. N. C. Thomas went to Orofino the first of the week to visit her daughter, Mrs. Ernest Randall.

This week is the first time for six years that the Gazette has failed to be published on Friday. It's the first time, too, that the editor-in-chief, business manager, society editor, sporting editor, foreman, printer and the devil all had the flu at the same time.

Clarence Dunkle of Kellogg, Idaho, arrived Tuesday evening for a brief visit with his brother, A. V. Dunkle.

C. B. Kinzer returned to his work last Saturday, after an absence of three weeks, due to an attack on smallpox.

A shoat, weight about 110 pounds, for . . . \$10.00

A 3/4-blood Poland-China and Chester White gilt, bred, about 150 pounds . . . \$15.00

WM. F. McCLELLAND,  
Southwick, Idaho.

## POULTRY FLOCKS

### POULTRY PROFIT IS FEEDING

Mash of Bran, Middlings, Meat Scrap and Cornmeal is Best, Experts Have Proven.

(Prepared by the United States Department of Agriculture.)

Valuable results of interest to poultrymen have been obtained by the United States Department of Agriculture in the experimental tests at the government poultry farm, Beltsville, Md., where different rations have been fed to various groups of laying hens for a period of eight years. At this time, more than 1,000 hens and pullets are used in feeding trials of this kind.

The pens range in size from 30 to 50 hens, all the fowls being trap-nested during the period under test. During the last three years, the mash which has given the most uniform and best production has consisted of a mixture of 4 per cent bran, 4 per cent middlings, 26 per cent meat scrap, and 66 per cent cornmeal. This mash was the result of experiments where the hens were allowed to select their own mash ingredients. When given free choice of these various ingredients, the fowls consumed the various ingredients in the above proportions. Several pens, both of Leghorns and Rhode Island Reds, of 30 hens each have averaged from 140 to 155 eggs apiece where this mash has been fed. The feeding mixture seems to be especially adapted for Leghorns, although it has also given good results with the Reds. The Wyandottes and Plymouth Rocks are inclined to accumulate too much fat when fed this mash, and one somewhat lower in meat scrap content gives better results when fed to these two breeds.

The Wyandottes and Plymouth Rocks maintained on the Beltsville farm are large, standard-size fowls, and the tendency to take on fat on this mash probably did not occur in the case of smaller types of Plymouth Rocks, such as commonly are found on commercial poultry farms. Experiments conducted during the current year in which this mash was modified by the addition of 15 per cent ground oats and the reduction of the meat

Give Pullets Liberal Ration of Scratch Grain in the Fall.

scrap by 3 per cent and the cornmeal by 12 per cent have not shown any advantage. The evidences are that ground oats added to the ration produces no beneficial results. It pays to vary the proportion of grains in the scratch mixture, from an economical standpoint, according to the market price of these farm crops. At present, a scratch mixture of three parts cracked corn, two parts oats, and one part wheat, by weight, is used with this mash.

In previous years fish meal has not proved a more profitable and practical source of protein in the mash than

meat scrap, but during the present year the production has been very good where the fish refuse has been used, and as the price of this material has decreased, larger net incomes result from its use. Sixty per cent protein fish scrap now can be obtained for from \$1 to \$2 per hundred pounds cheaper than 55 per cent protein meat scrap. Innumerable varieties of fish scrap have been fed and no harmful effects have resulted from feeding even fish scrap of varied compositions, some being unusually rich in oil content. Tests in which only 15 per cent of meat scrap was fed in the mash have not resulted in as high production with pullets as where 20 or 25 per cent of meat scrap was used, but with yearling hens the 16 per cent meat scrap has given practically as good production as the higher. With the heavier breeds, it is advisable to decrease the amount of meat scrap during the second year, as such feeding tends to keep the fowls in better breeding condition.

### MAKING BUST OF CARUSO

Joseph Anthony Atchison at work on the bust of Caruso, which is to be presented to the city of Washington by the Caruso Memorial committee.

### Box Car Made Exciting Run.

An exciting incident occurred on the railway line at Grauff-Reinet, South Africa. A heavy freight train left Grauff-Reinet for the north, and pulled up the steep and long gradient to the top of Zemmelspoort, when a large box car broke loose. The runaway soon gathered momentum and dashed through the native location at full speed, rattled over the Sundays river bridge, and having negotiated the incline and curves, ran clean through Grauff-Reinet station yard and took the main line for Port Elizabeth. After again crossing the Sundays river at the second bridge, however, its pace slackened at the Adendorp gradient, and eventually it was brought to a stop in Adendorp station. Fortunately the line was clear and no damage was done during the five or six mile dash.

### Refinishing Nickel Plating.

A new nickel-plating solution said to yield beautiful results is prepared by mixing the liquid obtained by evaporating a solution of one-half ounce nickel in aqua regia to a pasty mass and dissolving it in one pound of aqua ammonia, with that obtained by treating the same quantity of nickel with a solution of two ounces cyanide of potassium in one pound of water. More cyanide renders the deposit whiter and more ammonia renders it grayer.

### Millinery Opening

The French Shop opened Saturday, March 11, in the Kendrick State Bank Building, with new and most up-to-date spring millinery.

Braids, Straws and satin hats are all good.

Bring in your old hat to be re-trimmed, or any sewing to be done.

### NOTICE FOR PUBLICATION

Department of the Interior,  
U. S. Land Office at Lewiston,  
Idaho, February 23, 1922.

Notice is hereby given that James M. Kyle, of Crescent, Idaho, who, on April 21, 1917, made Homestead Entry No. 07046, for NE 1/4 SW 1/4, Section 2, Township 38 North, Range 1 West, Boise Meridian, has filed notice of intention to make three year Proof, to establish claim to the land above described, before the Register and Receiver of the U. S. Land Office, at Lewiston, Idaho, on the 6th day of April, 1922.

Claimant names as witnesses:  
Clarence Lee Trail, Sr., of Southwick, Idaho.  
Isaac Talvert Kimbley, of Southwick, Idaho.

Andrew Dorendorf of Crescent, Idaho.  
William Zimmerman of Crescent, Idaho.
