

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns
of Neighboring Papers.

Juliaetta Record: John Behrens, last Saturday sold his ranch of 54 acres on the creek above town for \$3800 to N. C. Holiday, of Cawsell, Wash., who has taken possession of the property and moved in with his family today (Thursday). Mr. Behrens has moved into the H. O. Dasch residence on upper Main street, but it is understood that he expects to purchase lots later on and erect a nice home on them.

Juliaetta Record: The road from the city limits to the Latah county line below town has been put in excellent condition the past week by a crew of men working under the supervision of the road supervisor. The road has been leveled up and the surface smoothed so that it is in the best of shape. The past few days the crew has been working on the Hamil grade which is being widened to make a 16-foot roadway. This work will probably be finished this week. The work on the Powell hill grade by Bolen and others is said to be progressing nicely and before long we will have a fine road between here and Kendrick. Some work is also being done on the grade to fix ridge above town. Street Commissioner W. F. Taylor is also busy with a force of men fixing up the road below town within the city limits. The work includes making a fill near the culvert below the park and cutting off the point near the intersection of the old road. When this is completed the old road around the hill will probably be abandoned. The road has also been straightened out at the foot of the hill at the entrance to the park.

Genesee News: The affairs of the Genesee Highway district still seem to be in a very bad plight—and there seems no remedy unless some one is willing to "give in" and that, also, seems improbable.

A meeting of the two highway commissioners, Chas. Odenborg and Chas. Jain, together with some 15 or more taxpayers of the district was held Wednesday afternoon and about the only thing accomplished was the trying up of all road work and the funds of the district, notice of which you will find elsewhere in this issue of the News.

It does seem too bad that there should be so much dissension between the two commissioners at this time, especially, when the roads are suffering for work and the taxpayers are suffering even worse for the simple reason that they have no goods roads and they will have to pay that much more when they are put in condition.

The bone of contention seems to be the selection of a third commissioner—and they will come about as near getting along amicably as two Tom cats with their tails tied together and hung over a clothes line. If you don't think the News man is correct, attend one of their meetings some time—if they ever have another.

It is indeed high time something was being done. If you have a solution, bring it in and we'll guarantee it will be as promptly rejected as all the others have been.

Star-Mirror: Suit for divorce was filed late Thursday afternoon in the district court by Annanette Bodenhouse against Charles Bodenhouse. The complaint alleges that the plaintiff has been treated in a cruel and inhuman manner. The couple were married at Spokane on May 12, 1913.

The complaint sets out that "the plaintiff has been required by defendant to do all of her housework, to milk four cows, to chase the cows all over the hills every night in order to get them into the corral, to tend half acre of garden during the summer time, to cook for harvest crews, to take the place of a man in the harvest fields and to husk corn with

NEWS NOTES FROM KENDRICK SCHOOLS

Literary Society to Give a
Picture Show

The High School Literary Society is attempting a real job by bringing in the seven reel picture of Oliver Goldsmith's great classic, "The Vicar of Wakefield." This is a picture of rare quality and will be well worth the society's best efforts, and also well worth the 35 cents that it costs to see it.

The pictures put on by the society last Friday evening were quite successful, and were well attended in spite of the unfavorable weather. Many have expressed a desire to have more just like them. The society netted \$6.10.

The following pupils of the 5th and 6th grades were neither tardy nor absent last month: Orabelle Hollada, Dorothy Holt, Pearl Johnson, Hester Knepper, Ruby May, Margaret McDowell, Thelma Perryman, Murial Onstott, Rush Chamberlain, Hugh McDowell, Mae Freytag.

Every Friday afternoon the 5th and 6th grades contests in geography, history, arithmetic and spelling. Some of these have been very interesting.

There has been but one absence in the third and fourth grades during the week. The attendance of the entire school is better than it has been since last fall. We hope it continues so.

The first and second grades are studying about the various wildflowers which they have gathered and are pressing for a "Wildflower Booklet".

Those of the first and second grades neither absent nor tardy during last month were: Elizabeth Carlson, Nettie Mav McDowell, Mary Johnson and Nettie Crocker.

Sheridan Baker won the Tulip Spelling Contest conducted in the 3rd B grade.

The 2nd B grade have completed their list reading text books and are now reading "America's Story for America's Children".

G. F. Walker was in Moscow on business the first of the week.

the hired man; that in this manner the plaintiff was compelled to work from 4:30 in the morning until 9 and 10 o'clock at night, always beyond her strength."

The complaint also alleges that the defendant has not provided for her minor children as he agreed to at the time of their marriage. The plaintiff seeks the return of her former name, Annanette Terry, a division of the property, and \$150 a month permanent alimony.

HALT SHIP FOR STORK

Told that the stork was about to visit Mrs. Frederick Sandmeier of Bowdle, S. D., Capt. Axel J. Schmidt of the Oscar II halted the ship in a storm. The baby, named Atlanta, is seen here with the ship surgeon and Miss Betty Frostmark, who took a keen interest in Atlanta's arrival.

The Royal Honeymooners

Princess Mary of England and her husband, Viscount Lascelles, enjoying a short walk in the gardens of Weston park, where they spent part of their honeymoon.

"The Vicar of Wakefield"

The Kendrick high school is making arrangements to put on a picture show at the auditorium next Friday night, April 21. The production will be "The Vicar of Wakefield", one of Oliver Goldsmith's classics. It is a seven-reel feature that will prove intensely interesting, particularly to those who have read the book. All school children will be admitted free, as it is held under the auspices of the literary society, but a charge of 35 cents will be made for "grown-ups".

Methodist Church News

Those interested in the Junior League are invited to come to the church basement, Saturday morning, at eleven o'clock, bringing their lunch, and materials for making scrap-books. After lunch an hour will be spent in games and then we will make scrap-books. If there is a good turnout of the Juniors from ten to fourteen we will elect our officers at that time.

A special Easter morning service will be given by the Epworth Leaguers, at 6:30 o'clock Sunday morning, in the basement of the church. All the young folks are invited.

Program for Sunday Evening

Voluntary
Chorus "Hail all Hail the Easter Morn" Glee Club.
Invocation
Recitation, "Easter Time", Ella Sturdevant.
Dialogue
Recitation, "Easter Tidings", Five Girls.
Nona McAllister.
Violin Duet, Artlee Hollada and Nora Callison.
Recitation, "Easter Flowers", Juanita Stanton.
Song, Intermediate girls class.
Dialogue, Six Girls
Recitation, "Awake, Awake", Eleanor Herres.
Sermon subject: "Seeking an alliance with the Omnipotent."
Chorus Glee Club.

Special Easter services will be held at American ridge at eleven o'clock, Sunday.

The study class, under the leadership of Miss Newkirk, will be continued after Sunday school, Sunday the 16th.

The American ridge people are all invited to the service at their church Friday evening. The subject will be "The Cross".

The baseball boys are showing considerable enthusiasm this spring. A goodly number of prospective first team men turnout to practice at regular intervals, whenever it stops snowing or freezing long enough for them to do so.

Peas For Hog Pasture

The results of four years experimental work at the Idaho Experiment Station shows that held pea have a high value as feed for hogs according to Prof. C. W. Hickman, head of the animal husbandry department. In hogging off peas it was found that 347 pounds of peas were required to make 100 pounds of grain with spring pigs. It was also shown, when hogging off peas without any grain supplement, that an acre of peas will produce 454 1/2 pounds of pork, this amount varying under various conditions from 245 to 554 pound. The total amount of pork produced per acre is determined by the yield of peas, size of pigs used and the length of time the pigs are kept on pasture. Under average conditions with pork at ten cents a pound the peas are worth \$2.75 per hundred weight. This amount varied from \$1.90 to \$3.70 per hundred depending upon the condition under which pasturing was carried on. Thus a good price was obtained for the peas without any expense for harrowing and threshing. The best results were obtained by confining the pigs to a small area until it was pastured quite clean.

Archie Waltz Leaves Home

Mrs. D. F. Waltz went to Wallace, yesterday, in search of her son, Archie, who left home last Sunday morning. Archie is sixteen years old. Sunday morning he said he was going to Sunday School. He started earlier than usual and later in the day, as he failed to appear, a search was made for him. His brother found him near Dearv and left him with the horses while he went into a store for a few minutes. When he came out, Archie had disappeared and hasn't been seen since.

The boy took quite a fancy to Jim Mitchell, the tailor, who left here recently for Wallace where he had a job. Archie wanted to go with him and get a job at the same place. Jim told him there was only one job and to satisfy him said if anything turned up there he would let him know. Archie evidently become impatient at the delay and decided to go to Wallace on his own account. His mother stated yesterday that he had no money with him, so she was considerably worried about him.

Mr. and Mrs. A. C. Deeter returned, Wednesday evening, from California, where they spent the winter. They made the round trip in their car. It took seven days from East Oakland to Kendrick. We hope to have an account of their trip for next week's Gazette.

BURGLARIZED STORE MONDAY NIGHT

Stold Merchandise From N.
B. Long & Sons--Captured.

Tuesday morning when N. B. Long & Sons' store was opened for business it was learned that robbers had broken the back door and taken a miscellaneous supply of merchandise, consisting of clothing, canned goods, etc. The sheriff's office at Moscow was notified immediately and shortly afterward Sheriff Woody and his valuable deputy, Charles Summerfield, arrived in a car.

The first clue which they found was evidence that a fire had been built across the bridge spanning the Potlatch at the foot of Sperry grade. Stakes which had been used in the fire had been whittled there and the clubs made from them, found at Long's store. As soon as Summerfield got this evidence he started down the railroad track hot on the scent. Sheriff Woody followed later and picked him up below Juliaetta. A mile from Arrow Junction, along the Clearwater river, they found four men in camp and located the stolen goods, which the men had with them. There were five gunny sacks full. The men were immediately put under arrest and taken to Moscow, where they were placed in the county jail.

The robbers gave their names as Frank Keonig, age 25 years; Fred Carpenter, age 19; Neal McIntyre, 58 years of age; Phillip Reilly, 22 years old. An I. W. W. card was found on McIntyre. He stated that he had belonged to the organization for five years. The four men waived their preliminary hearing and informations were filed against them by the prosecuting attorney, Thursday. They all plead not guilty.

It is stated that on Monday night all four of the men were in Moscow, coming here on the 9:05 passenger train the same night. They caught a freight from Juliaetta to Arrow and then walked up the Clearwater for a mile, where they made camp.

Reilly is from Philadelphia where he has an uncle and Carpenter, the 19 year old member of the quartet, is from Omaha where his mother is living. The other two men have no place of residence but all four came to Moscow from Spokane. One of the four has admitted that plans were made in Moscow to burglarize a store in Kendrick.

Some Hog!

M. G. Carlton of Juliaetta sold a hog on the Kendrick market, Thursday, that weighed 660 pounds. After being docked 70 pounds he brought \$41.30 on a basis of 7 cents a pound.

SUCCEEDS IN POLITICS

Mrs. Jennie Erickson Dodge, superintendent of schools for Pulaski county, Arkansas, who draws a salary of \$4,000 a year, which is \$400 more than the state superintendent of education receives. She is Arkansas' highest salaried woman official. She is classed as one of the ablest politicians in the state.

COUNTY AGENT WORK RENEWED

Services of W. W. Skuse Are
Continued.

Tribune: On the appearance before the county board of commissioner yesterday of J. H. Reardon, assistant state county agent leader, and D. D. Green, representing the biological survey, accompanied by representatives of the Nez Perce county farm bureau, the county board promptly agreed to continue the service of Waldo W. Skuse as county agent for another year. James A. Ferris, representing the community farm bureau in Lewiston Orchards, and H. H. S. Rowell, the secretary of Nez Perce county farm bureau, testified to the faithful, conscientious and efficient service given by Mr. Skuse, who is generally regarded as one of the best county agents in the state.

The commissioners passed a resolution putting into effect the state law for compulsory eradication of squirrels in Nez Perce county. D. D. Green, who has had charge for the past two years of the distribution of free poison for public land in north Idaho, presented the matter, stating the state and U. S. governments were co-operating equally in the providing of funds to meet the expense of poison for public land, with the object in view of ultimately wiping out the squirrels and not impose hardship on the land owners who reside alongside of the public lands, and who were given poison to put on the adjacent public land if they would donate their time and put it out; but that the co-operating agencies did not feel justified in this work or the continuance of it if each farmer did not do his part.

At the series of poison distribution meetings held by Mr. Green, and County Agent Skuse many compliments were made to Mr. Green as to certain few farmers here and there who did not put out poison or made no attempt to poison the squirrels on their pasture land. Mr. Green stated that the man who made an honest attempt had nothing to fear from the enforcement of the law, but it was aimed at the persistent violators who by their inactions forced a continual fight against squirrels by their neighbors. These men will now be given a chance to kill squirrels or pay more taxes to cover the cost of poisoning up to the extent of \$16 a quarter section a year.

The following pest control committeemen were appointed to have authority to serve notice, etc., for their respective communities: J. H. Corn, Peck; J. M. Hanks, Lenore; F. T. Myers, Gifford; J. H. Berry, Mc'reose; E. Chambers, Baker; L. L. Buchanan, Lapwai; J. P. Scully and James Monroe, Culdesa; Harry Emerson, Rimrock; H. M. Miller and Aug. F. Wegner, Leland; Glen Betts, Southwick; W. S. Thornber, Lewiston Orchards.

School Election Tomorrow

The annual school election will be held at the school house tomorrow. A part of the regular routine of business to be disposed of will be the election of one trustee for a period of three years. The names of Floyd Walker and Jody Long have been filed with the Clerk of the board. They are the only candidates who have been filed to date.

Big Sale Opens Today

The Kendrick Store Company is putting on a big sale which opens today under the direction of T. Gallagher, who represents the firm of E. H. McCune Co., of Portland, one of the largest sales companies of the West. Mr. Gallagher is an expert along his line and has arranged the stock in a most attractive manner.

LADIES!

THE AMERICAN PRESS ASSOCIATION

It is unfortunate that the Kendrick band disbanded just at the time when the members were getting to the point where they could entertain themselves and the public with good music. Irregular attendance at the rehearsals was primarily the cause of disorganizing. It isn't too late yet to get the bunch together and begin where they left off at the last rehearsal. The band can get plenty of support from the business men of the town as soon as the boys show they mean business.

It would seem that they ought to at least have given Arbuckle a suspended jail sentence for conducting a booze party.

The burglarizing of Long's store this week makes the third time since last October that robberies have been committed in a similar manner at the store. The sheriff's force deserves much credit for the prompt action taken in this last instance.

Leland Items

Mrs. Seeley is visiting her parents in Oregon.

A baby girl came to the home of Mr. and Mrs. Harry Smith last week.

The Arthur Locke family were dinner guests of Mr. and Mrs. R. C. Smith Sunday.

Mr. Filbert who had lived here for a number of years but had been in a hospital at Lewiston for some time died recently at that place.

Dr. Seeley's son, who has been attending the Washington University at Seattle came home Wednesday to spend the Summer with his parents.

The Vergil Fleshman family visited at the home of Mr. and Mrs. Amel Peters, Sunday after church.

Fairview Items

Mr. and Mrs. Jeff Fleshman went to Lewiston Tuesday afternoon to visit for a few days.

Miss Rachel Whitted returned to her home, Sunday. Her sister Mrs. Jess Walker and little daughter, went along to spend a few days at home.

Miss Melba Walker and a girl friend, Miss Smith from the Normal, were visiting the Walker and Morgan homes last week.

Herman Beyers, who has been attending the Fairview school, left last Saturday for his home on Texas ridge. We sure miss Herman.

The community had quite a fall of snow Monday and Tuesday, yet it all melted as soon as it hit the ground. Spring is coming very slowly.

CARD OF THANKS

We wish to thank our many friends and neighbors for their assistance and floral offerings during the sickness and death of our wife and mother.

Something Doing.

The job is what counts. The world respects the man who works. It has small use or respect for the man who loafs because he feels himself above the job that is offered him. The man who produces something—even though it be nothing more than a day's work at the bottom of a trench, is of more importance to the world than he who loiters for a kid glove situation.—Los Angeles Times.

An Argument for Order.
The importance of being orderly is shown in the trouble that generally results from misplaced confidence.—Boston Transcript.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho.

NOTICE IS HEREBY GIVEN, That the annual school meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 15th day of April, 1922, and the said meeting shall convene at 1:00 o'clock P. M. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of, at the school house in said District; that at said meeting the following business will be transacted:

One trustee to serve for a term of three years will be elected.

The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.

That at the said annual meeting in said District there will be determined the amount to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.

That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot.

Dated this 24th day of March, 1922.

M. B. McConnell,
Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3t

How to Be Healthy

The Crusade of the Double Barred Cross
Practical Talks on Disease Prevention

Prepared by the
IDAHO ANTI-TUBERCULOSIS ASS'N

PUBLIC HEALTH IS NATIONAL WEALTH

By DR. LOUIS I. DUBLIN,
Statistician, Metropolitan Life Insurance Co.

THE movement to conserve human life is dictated even by the crudest economic motives. An increase in the average span of life adds to the potential wealth of the country; whatever curtails the life span destroys the national wealth. The public health work of the last fifty years, by cutting the death rate from such diseases as malaria, typhoid fever, smallpox, cholera, yellow fever, and tuberculosis, and also from accidents, is, in large measure, responsible for the addition of over ten years to the average lifetime of man. In 1855, the expectation of life of a person in Massachusetts was about 40 years; according to the most recent figures, it is well over 50 years. It is estimated most conservatively, that we produce more than we consume each year to the small amount of \$100 per capita. The addition of only one year of life per person is, therefore, equivalent to the addition of more than ten billion dollars to the national wealth of our country.

This is not all. A man or woman is worth more to his or her country when well than when sick. Illness is an important source of inefficiency and non-production. We lose on the average about seven days each year from sickness, or, about 2 per cent of our working time. In terms of money lost from wages, the figure amounts to not less than \$700,000,000 annually. At present high wages, the total will reach one billion dollars especially if the cost of medical care, drugs, appliances, etc., is included. A very large part of all this money could be saved by applying more intensively the public health measures which we know control disease.

The well-directed expenditure of money for the conservation of the public health will bring larger returns in dollars and cents than many another investment, the wisdom of which communities never question. If, for example, tuberculosis could be entirely eliminated as a cause of sickness and death, an average of two and one-half years could be added to the lifetime of every man and woman in the United States. We have amply demonstrated our ability to suppress typhoid fever. Yet, there are still over thirteen thousand deaths each year, most of which could readily be avoided and, further, we would, at the same time, stop the double mortality which occurs for three years among those who survive an attack of typhoid fever. Diseases such as measles, scarlet fever, diphtheria and the other infections of children leave defective ears, hearts and kidneys, which impair efficiency and shorten life. The money value of all these losses is staggering when we stop to realize that human life is our greatest economic asset.

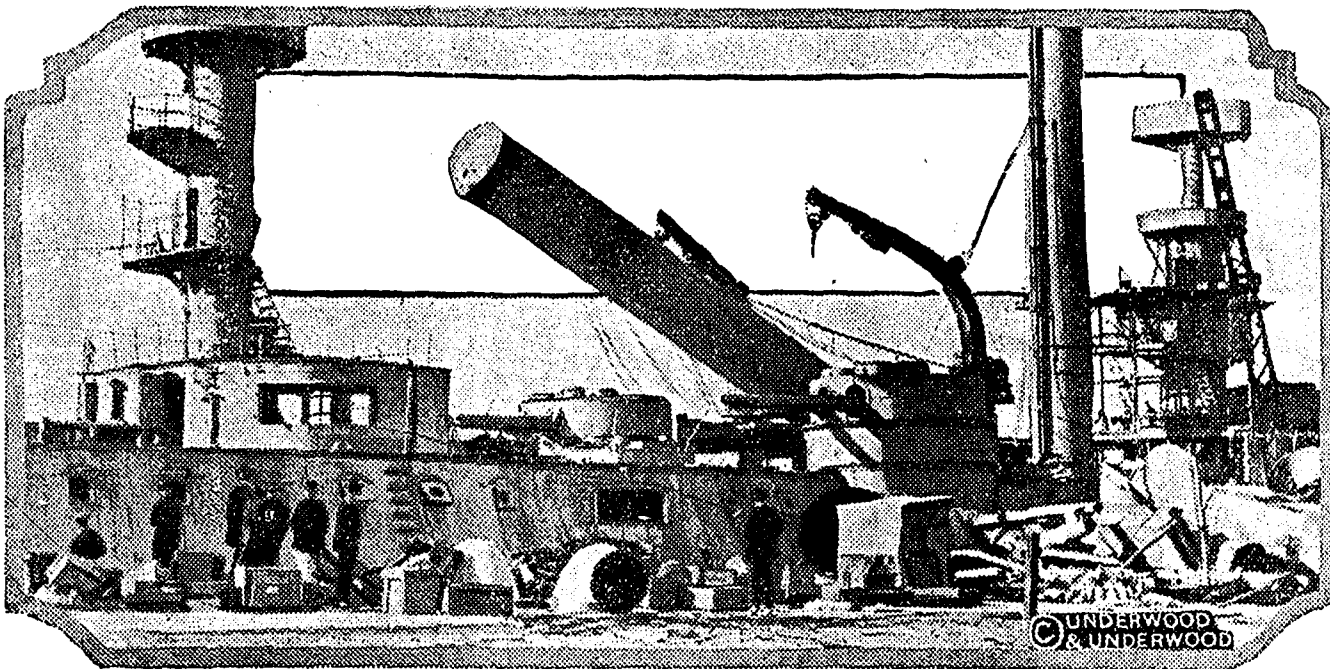

Our program for the next ten years should be to add one year of life to the present average life span of every man and woman in the United States.

Celebrate Anniversary of Lutheranism

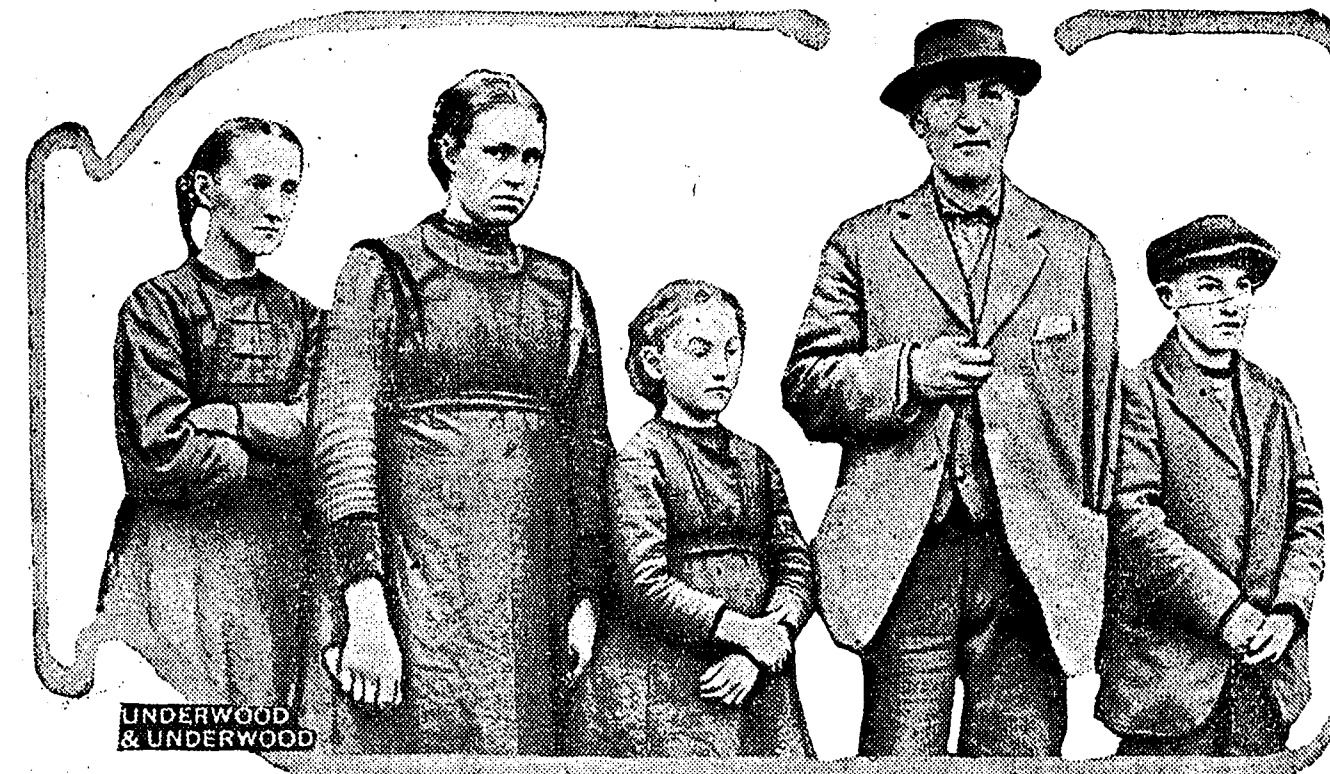

The five deacons of the University Halle, Wittenberg, Germany, on their march to the church during the recent celebration of the four hundredth anniversary of Lutheranism.

Once Pride of Navy Being Scrapped

The U. S. S. Brooklyn is being scrapped. This cruiser was once the pride of the navy and was Admiral Schley's flagship at the battle of Santiago, Cuba, July 3, 1898, in which the ship played a leading part in the destruction of the Spanish fleet. War veterans, out of work, are wrecking the ship which cost \$5,000,000 and has been sold to a junk dealer for \$40,000.

20,000 Mennonites in Exodus to Mexico

Recently the Canadian government and the Mennonites, a religious sect, came to legal blows. The high priests of the Mennonites ordered their followers to sell their thousands of acres of the richest farming land in Manitoba and take up homesteads in Chihuahua, Mexico. The migration follows the refusal of the Mennonites to take up arms during the World war. Moving in special trains, carrying people, live stock, farm and household effects, the first of the 20,000 are now on their way. The picture shows Abraham Wolf, leader of the caravan, and his family.

PIGMIES OF POULTRY WORLD

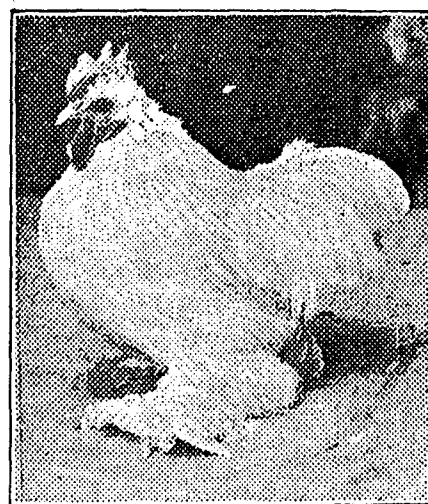

Bantam Breeds Have Distinct Utility Value for Egg Production for Family Use.

(Prepared by the United States Department of Agriculture.)

The Bantam breeds gained their popularity as ornamental fowl and as playthings for children and grown-ups, but, says the United States Department of Agriculture, they have also a distinct utility value for egg production for family use. There is also a good demand for eggs for hatching and for breeding stock of good quality. Because of their small size these pigmy breeds often have the advantage over larger fowls where only a very small space is available for the flock. They are easy for children to handle, and the ownership of a few Bantams often is the beginning of a real interest in poultry raising.

The various breeds of Bantams, their characteristics, and methods of management are discussed in Farmers' Bulletin 1261, The Bantam Breeds and Varieties, the fifth of a series on Standard Varieties of Chickens. The various breeds, says the bulletin, have not been raised with the idea of egg production and, as a result, the average is not very high, probably around 175 eggs in a year. The eggs vary in size, as do the different Bantam breeds, ranging from 12 ounces a dozen to 18 to 20 ounces. The color of the eggs runs from white to dark brown. Some of the breeds have a tendency to lay for a fairly long period, but the Brahmas, Cochins and

Siskies are apt to be broody. Since many of these kinds have been de-

White Cochins Bantam.

veloped from the larger standard breeds they have many of the same characteristics.

Reports collected from Bantam breeders show that the average hen will eat from 25 to 35 pounds of feed in a year, which is about one-half as much as a hen of the Mediterranean breeds or one-third as much as a hen of the larger breeds would eat.

A copy of the bulletin may be obtained free by addressing the Department of Agriculture at Washington, D. C.

FIND HIDDEN TURKEY NESTS

When Confined in Pen Until Late in Day, Laying Hen Will Go Straight to Her Eggs.

A quick and easy way to find stolen nests of turkeys is to confine the birds from early morning to late afternoon. The laying hens will then go straight to their nests to lay the eggs which they are holding, say poultry specialists of the United States Department of Agriculture. When turkey hens have free range they nest usually in obscure places and often

wander a half mile or more from home before they find a nesting place that suits them.

If attractive nesting places are prepared about the barnyard, the turkeys sometimes lay in them. Such nests are easily made from boxes or barrels, or by scooping out a little earth in the shape of a shallow bowl, piling brush round it to satisfy the hen's desire for seclusion. The nest most preferred by turkeys consists of a barrel laid on its side, in which straw or hay is placed. When confined in a breeding pen several turkey hens may lay in the same nest, but on free range each bird usually makes her own nest. Turkeys do not range far during cold weather. In the north, where the laying season often begins when there is still snow on the ground, the hens are more likely to select their nests near home.

LEAKY POULTRY HOUSE ROOF

More Annoyance From Damp Quarters in Spring Than in Winter on Account of Rain.

There is usually more annoyance from leaky poultry house roofs in the spring than in the winter, because more rain occurs. Also, in winter, ice and snow may remain for weeks on a roof without melting, and really assist to protect against the winds; but in spring any leaky places will be openings for heating rains. Roofs should be repaired at once, if there are any cracks or leaks at all or the result will be damp quarters and the flock will probably be ravaged by colds and roup.

Right Idea of "Drudgery."

The secret of success still lies in the same old word, "drudgery." For drudgery is the doing of one thing, one thing, one thing, long after it ceases to be amusing; and it is this "one thing" I do that gathers me together from my chaos, that concentrates me from possibilities to powers.—W. C. Gannett.

GOOD EMERGENCY FEED CROP

Sudan Grass is Rapidly Replacing Millet in Many States—Useful Summer Pasture.

Sudan grass is admirably adapted for use as an emergency hay crop, and is rapidly supplanting millet in many states. It is being used successfully by thousands of farmers as a summer pasture. For this purpose there are few crops that give better returns and serve so well to supplement the permanent pastures and the feed lot.

FEED CROPS ARE CONVENIENT

May Not Bring in Much Money, But They Take Care of Animals Which Can Be Sold.

Feed crops may not bring much cash but they are very convenient to take care of the animals. The animals may be converted into cash or the products from animals such as milk, cream, etc. It is not an easy matter to produce too much feed. It is hoped that the money generally paid out for feed will be kept at home this year.

Arkwright's Spinning Jack. The Science museum, South Kensington, London, has acquired the only known specimen of the original Arkwright spinning jack, which has been in the Swan family for 150 years. It has 48 spindles, and is worked by hand with a five-foot wooden flywheel. Arkwright, after attempting perpetual motion, completed in 1768 a machine for spinning cotton thread.

Don't Forget

April 14th

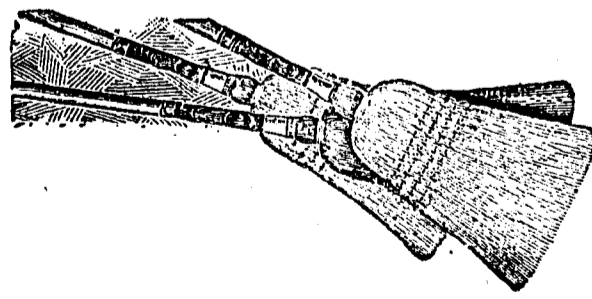

9 a. m.

This extraordinary announcement comes as the result of a backward season and of unfavorable conditions in the country at large. While our business last year surpassed all previous years, we bought heavy, anticipating an immense business, and we provided accordingly with unusually heavy stocks, then came the most backward season that Idaho has ever encountered. **THE NATURAL CONSEQUENCES**; stocks became congested! So after due consideration we decided to place our mammoth stocks of Dry Goods, Clothing, Furnishing Goods, Hats, Caps, Shoes, Dress Goods, Silks, Hosiery, Blankets, Comforters, Bags, Suit Cases, Dishes, Groceries etc., on sale and turn it into cash regardless of loss incurred. We were first to lead the movement to lower prices and now set a new example of

SUCCESSFUL TOMATO GROWING DESCRIBED

Bulletin Gives Different Methods Used in Industry.

Much Depends on Good Farm Practices, Seeds, Plants, Fertilizer, Planting, Cultivation and Thorough Spraying.

(Prepared by the United States Department of Agriculture.)

About 2½ quarts of canned tomatoes is the yearly per capita consumption in the United States, according to figures of the United States Department of Agriculture. How the tomato is grown, put up, and shipped, together with practices followed in communities where its cultivation is highly specialized, are given in Farmers' Bulletin No. 1233, recently issued, copies of which may be obtained free of charge upon application to the Department of Agriculture at Washington.

Hardy Tomato Plant Started in Pot.

ton, D. C. The bulletin also contains valuable suggestions to growers as to methods which are profitably followed where the crop is most successful.

The story of the tomato is that of a delicacy which has lived down a bad name and come into its own after years of effort. Of American origin, it attracted unfavorable attention first about 1800, and for a long time was branded as poisonous and consequently avoided. Later, designated as the love apple, it found favor with a few lovers of delicacies and with growers. By 1887 the total pack of canned tomatoes in the United States was about 3,000,000 cases of 24 one-quart cans each. Now the commercial pack, exclusive of soups, purees, ketchup, and pulp exceeds 10,000,000 cases of 24 No. 3 cans. These figures do not include the millions of cans put up by housewives for home consumption or the fresh tomatoes which grace American tables during the growing season.

Chief among the states where tomatoes are raised for canning are, in order named: Maryland, Indiana, Missouri, Delaware, New Jersey, New York, Utah, Illinois, Kentucky, Ohio, Pennsylvania, Tennessee, Virginia, and West Virginia. The acreage planted in tomatoes for canning purposes only in 1920 was 244,745. The yield from that acreage was 1,003,358 tons.

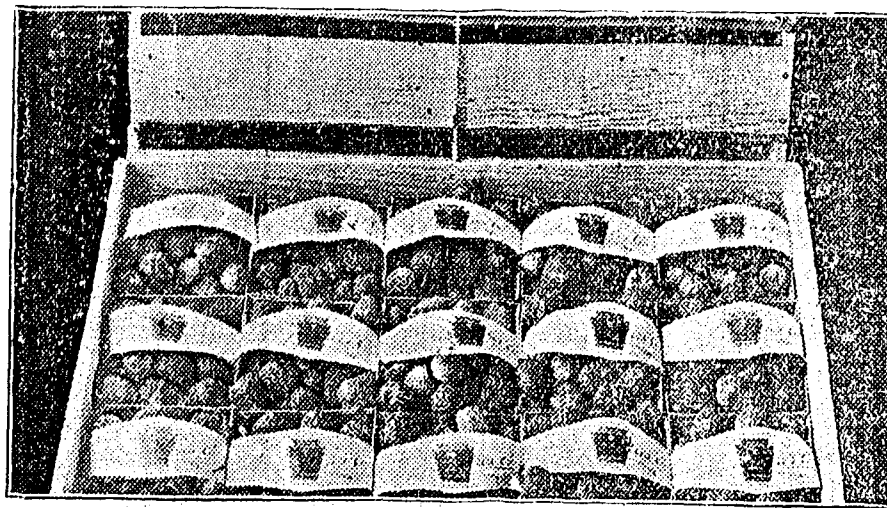

The bulletin follows the methods used from the seed to the can, describes methods of planting, soils best adapted for the vegetable's growth, tells how the crop may best be harvested, and sums up the chief requirements for good results as follows:

"Successful tomato growing depends on good farm practices, good seed, good plants, proper fertilizer, careful planting, clean cultivation, and disease control through spraying and through the use of disease-resistant varieties. Growers who pay attention to these factors produce crops which give them satisfactory returns."

How Noiseless Is the Growth.

Much has been accomplished; more than people are aware, so gradual has been the advance. How noiseless is the growth of corn! Watch it night and day for a week, and you will never see it growing; but return after two months, and you will find it all whitening for the harvest; such, and so imperceptible in the stages of their motion, are the victories of the press. —De Quincy.

GROWTH OF STRAWBERRY INDUSTRY DUE TO INTELLIGENT MARKETING

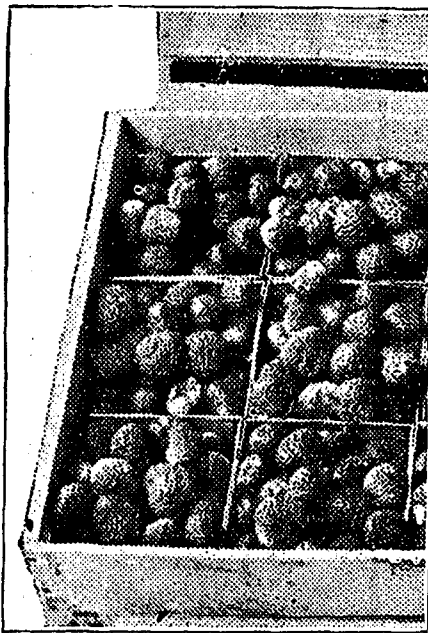

Paper Labels for Special Shipments.

(Prepared by the United States Department of Agriculture.)

Within six years Louisiana has taken first place among the states as regards value of strawberry production. The 1921 season was the best ever known in the industry, 1,400 carloads of Louisiana berries being marketed in 74 cities in the United States and Canada. In Chicago the 24-pint crates brought as much as \$6.50 each, and during practically the entire marketing season Louisiana strawberries sold at a higher price than any other berries on the market, due to the high quality of the product.

With such a record of achievement, much interest centers in the opening of the 1922 marketing season. As heretofore a field station of the United States Department of Agriculture will be maintained in the Hammond district during the season to keep producers and shippers informed daily of strawberry marketing conditions in the principal consuming markets, prevailing prices, carlot shipments from competing areas, and other marketing data essential in the scientific marketing of agricultural products, and granted favorable conditions the 1922 season should surpass even the 1921 record.

Nation-Wide Distribution.
The Louisiana strawberry industry is of national importance. The crop has nationwide distribution, the carlot shipments spreading out like a fan from the Atlantic coast to the Rocky mountains. Last year 29 car-

Tray Used for Shipping Berries.

loads also went to four cities in Canada. Chicago is the principal market for the fruit, Detroit, Boston, Pittsburgh and New York ranking next in the order given. Heat, cold and distance—marketing obstacles that seemed insurmountable a few years ago—have been overcome by the growers and shippers, and with continued careful selection, grading, packing and shipping, marketing experts say that the industry will enjoy increasing prosperity.

During the early years of the strawberry industry in Louisiana several varieties of berries were grown, and Chicago was the main market outlet. Today the Klondike variety is grown exclusively, and Louisiana strawberries have a wider distribution than the strawberries from any other section of the country. The quality of the fruit is dependable, and there is everywhere a demand for the berries. When picked the berries are carried to packing sheds, where practically each one is handled separately. Both the 24-pint Hallowell crate and the 24-pint ventilated crate have been used in packing the fruit, although during the past few seasons there has been a considerable decrease in the use of Hallowell's crates, which are known locally as "coffin" crates. Practically all growers are now using ventilated crates, as berries shipped in such containers arrive at market in sound condition and usually command a premium over the price paid for berries in non-ventilated crates.

Trains of Strawberries.

Fully 90 per cent of the marketed crop is shipped by express, the railroad company providing two or three express fruit trains daily. These trains run on a schedule of 40 miles an hour, which puts the fruit on the Chicago market before daylight the second morning. Less than carload shipments are cared for by the express company, which operates local feed cars to pick up small shipments. The growers have good transportation facilities, deliveries are prompt, and few instances are known where cars have not arrived at destination on time. Strawberry buyers from the large consuming markets establish headquarters at Hammond during the marketing season, sales being made on a cash f. o. b. shipping point basis. The fruit is inspected at shipping point and acceptance taken before the cars move. At Ponchaoula all cars are sold at public auction.

Several strawberry preserving plants

in the district utilize overripe and soft stock in the preparation of fruit for the ice cream and soda fountain trade in northern cities.

Perhaps the principal reason for the prosperity enjoyed by Louisiana's berry growers is that they keep themselves closely informed upon day-to-day market conditions. The producers appreciate that "knowing the markets" enables them to meet the consumers' desires as regards quality and quantity, and that to overstock one market when another market is undersupplied is unsound from both an economic and financial viewpoint. Every day during the marketing season a daily report of conditions and prices at the principal marketing centers throughout the country is issued by the local representative of the United States Department of Agriculture. This information is obtained by trained market reporters at consuming points.

The growers are also informed as to daily carlot shipments everywhere in the United States. Thus the producers not only know the prices being paid for berries at the various consuming markets, but exactly what competition may be expected from other sections shipping strawberries at about the same time. The department also furnishes daily information regarding temperature and weather conditions, so that the necessary icing and refrigeration can be provided for the shipments.

Information for Growers.

The department's station at Hammond was opened in 1915, and was the first field station established anywhere by the United States Department of Agriculture for the issuance of market news reports. Here, in the heart of Louisiana's strawberry producing district, arrangements were first made to study methods of packing, shipping, and distributing strawberries in the United States; to keep growers informed of strawberry movements from other regions, and to inform them daily of prices and conditions in the leading consuming markets. Hammond was selected as the location for the department's first field station because of the large proportions that the Louisiana strawberry industry had attained. Louisiana then ranked fourth in commercial strawberry importance. Today the state ranks second in carlot shipments.

ROUND POSTS MOST DURABLE

One Kind of Timber Will Last as Long as Others if Amount of Heartwood Is the Same.

Is a split fence post as durable as a round fence post? This is a question frequently asked of the United States Department of Agriculture. The fact is, says the forest products laboratory, one kind of post will last about as long as the other if the amount of heartwood is the same in both. But if the percentage of sapwood is increased by splitting, the split post will be less durable and if the percentage of heartwood is increased, it will be more durable than a round one. Posts of spruce, hemlock, or any of the true firs are exceptions to this rule, because their heartwood and sapwood are about equally durable.

When posts are to be treated with creosote or other preservative, a round post is preferable to a split post, because of the comparative ease with which the sapwood can be treated. The heart faces on split posts do not, as a rule, absorb preservative well. Split red-oak posts will take treatment, because the wood is very porous, but the heart faces of split posts of many other species, notably white oak, red gum, and Douglas fir, resist the penetration of preservative, even under heavy pressures.

TOO MUCH MANURE INJURIOUS

Fertilizer May Burn Crop if Season Is Very Dry—No Fear of Harm if Worked In.

The claim that too much manure will burn up the crop is only partly true. It may if it is a very dry season and the manure is not worked well into the soil. But there is little likelihood of injury from a heavy application, if worked in right. Far more corn has been lost through too little than through too much manure.

PLANT ENGLISH PEAS EARLY

Seed Should Be Put Into Ground as Soon as Soil Will Permit—Some Good Varieties.

English peas should be planted just as soon as the soil will permit. Thomas Laxton, Alaska, Horsford's Market Garden, and Telephone are excellent varieties, and the Telephone late. The seed should be sown thickly in the drill in rows 3 feet wide and covered 5 to 6 inches deep.

Summons

In the District Court, Second Judicial District of the State of Idaho, in and for the County of Latah.

John L. Bechtol, Plaintiff,

vs.

Ethel E. Bechtol, defendant.

The State of Idaho Sends Greeting To Ethel E. Bechtol, the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above nam-

ed plaintiff, of the nature in general terms as follows:

To obtain a decree of divorce on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 11th day of March, A. D. 1922.

INSECT ENEMIES OF HOME GARDEN

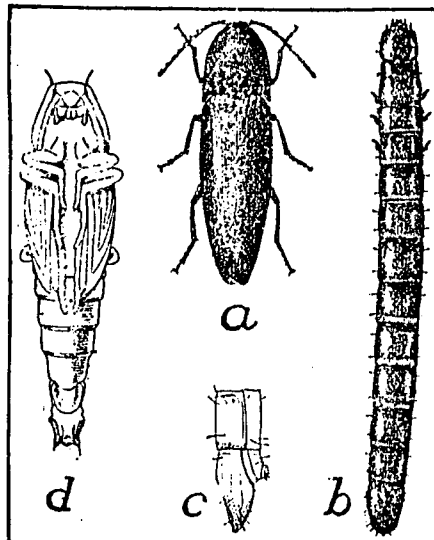

Some of Pests Devour Nearly Every Form of Vegetation and Do Immense Damage.

CUTWORMS INJURE TOMATOES

Arsenic and Paris Green are Deadly Poisons and Must Be Handled With Great Care—Rotation of Crops Is Advisable.

(Prepared by the United States Department of Agriculture.)

From the standpoint of their food plants, injurious insects may be grouped roughly into two classes: First, those which are choice feeders and ordinarily attack only a single crop, or crops of a single class, although when they are extremely abundant they may resort to other crops or weeds. Examples are the asparagus beetles and asparagus miner and the large tomato worms, which confine their feeding to plants of a single family. Second, those known as general feeders—insects which are not particular as to their food plants. Some of these devour nearly every form of vegetable that grows in the garden. These include cutworms and other caterpillars,

The Common Wireworm—A, Adult; B, Larva; C, Last Segments of Same; D, Pupa—All Enlarged.

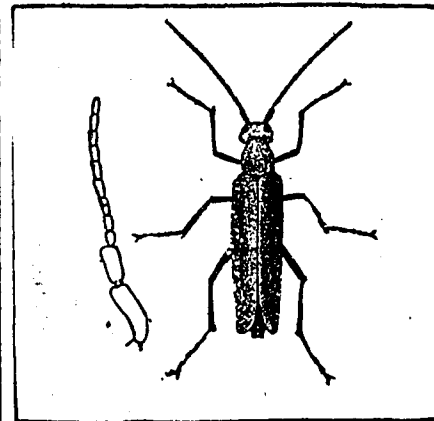

several forms of leaf-beetles and flea-beetles, plant-lice, thrips, blister beetles, and others. When abundant, some of these pests do great damage, sweeping over large areas and ruining entire crops before they can be stopped:

Cutworms.

Tomatoes, sweet potatoes, and other truck plants, particularly when started under glass, are likely to be injured by cutworms when transplanted. These appear in great numbers in the spring and early summer, and the injury is often complete before the gardener notices it. The chief injury is due to the severing of the stems of young plants at about the surface of the ground. One cutworm can destroy many plants in a single night by cutting off more than it can devour.

Control.—The best remedy is what is called "poisoned bait." For use in a small garden take 1 peck of dry bran, add 4 ounces of white arsenic or Paris green, and mix thoroughly with 2 gallons of water in which has been stirred half a gallon of sorghum or other cheap molasses.

For a large garden, use 1 bushel of bran to 1 pound of the arsenical mixed

The Ash-Gray Blister Beetle.

with 8 gallons of water containing half a gallon of molasses. This is enough for treating 4 or 5 acres of cultivated crops.

After the mash has stood for several hours, scatter it in lumps the size of a marble over the garden where the injury is beginning to appear and about the bases of the plants set out. Apply late in the day so as to place the poison about the plants before night, which is the time when cutworms are active. Apply a second or third time if necessary.

It is advisable to keep young children, live stock, and chickens away from this bait.

Clean cultural methods and crop rotation are advisable, as are also deep fall plowing and disking, to prevent recurrences of cutworm attacks. Experienced growers become expert in detecting cutworms and remove them by hand. This often can be done with profit on small patches.

White Grubs.

When new land is used for planting vegetables, especially land that has been in sod or grown up with weeds, white grubs are almost certain to make their appearance, sometimes in large numbers, doing great damage to plants from the time they attain any growth until the fruit is

ready for harvest. They feed chiefly on roots and attack especially potatoes, corn, and strawberries, but they are general feeders. White grubs, or "grub worms," are the larvae of young of the brown May or June beetles, with which most persons are familiar. The beetles occur in the North as late as August, while in the South they appear in April or earlier.

Control.—Deep plowing is the most effective remedy for white grubs. Cross plowing and deep disking are sometimes necessary, and the ground should be disturbed often and kept clean of weeds so that the grubs can be eliminated.

Rotation of crops, avoiding the planting of potatoes, beets, sweet corn, and other crops on land which has been for some time in the same crops or in strawberries, grasses, or weeds is advisable. Fertilizers, especially kainit, as a heavy top-dressing are of benefit. Gas line is valuable. Hogs, if allowed the run of the newly plowed garden, or when the crop is off, will eat large numbers of grubs. Domestic fowls will pick up grubs on newly plowed land. See Farmers' Bulletin 543, "Common White Grubs."

Wireworms.

Wireworms, like white grubs, are common pests in the garden and are also general feeders. They are the offspring of snapping beetles, or "snap-bugs," and are of long oval form.

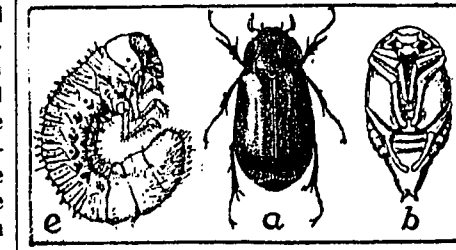

Their tastes are similar to those of the white grubs. They attack and often do great injury to potatoes and other plants bearing tubers, as well as to carrots, beets, sweet potatoes, and onions.

Control.—The remedies advised for white grubs apply also to wireworms, with due care in selecting land for planting and in fall plowing and crop rotation. Wireworms, however, are much more difficult to control than white grubs.

Blister Beetles.

Blister beetles are common farm pests and are very destructive to vegetables, especially beans, peas, potatoes, and beets. They travel in the same manner as army worms and are sometimes called "army beetles" for this reason. They are hungry feeders and travel frequently in lines, eating everything in their path, chewing up apparently more than they need for food. They are slender in form, somewhat soft bodied, and colored variously. Some species are perfectly black, others are of the same color with several light stripes, some are gray, and others are gray spotted with black. Blister beetles are particularly abundant in the Southwest, but occur practically everywhere. Different species appear at different times, usually after the plants have made about one-third growth, and they continue until late in the season.

Control.—Lead arsenate applied at the very outset of attack is the best

A White Grub or May Beetle—E, Larva or Grub; A, Beetle; B, Pupa.

remedy. In some portions of the Southwest lines of men and boys go through fields driving beetles before them until they reach windrows of hay, straw, or other dry vegetable matter previously prepared along the leeward side of the field. The windrow is then fired and the beetles burned.

Plant-Lice.

Practically all vegetables, especially cucumbers, cabbages, and peas, suffer considerable damage from attack by small, soft-bodied insects commonly called "lice" or "aphis," but better known as plant-lice. These work for the most part on the lower sides of the leaves, which become curled or otherwise destroyed by loss of their vital juices. They give off a sweet mixture called honeydew, which attracts ants, flies, and other insects. Plant-lice increase with great rapidity by the female giving birth to living young. The different kinds vary in color from light to dark green or nearly black, grayish, brown, yellow, and red. They have comparatively long legs and have feelers attached to the head. Some forms have two pairs of transparent or clear wings. They feed by sucking juices of the plants through a beak. Familiar examples are the melon aphis, pea aphis, and cabbage plant-lice.

Control.—If the plants are grown under glass, plant-lice may be killed by fumigation with a nicotine preparation. The form suitable for this work is paper soaked in nicotine which when lighted causes a smudge. Sprinkling plants with fine tobacco dust is of some value, especially if applied early in the morning when the dew is on.

SOY BEAN IN CROP ROTATION

Cash Value of Seed Is Sufficient to Warrant Growing Beans as One of Main Crops.

The soy bean may be combined advantageously in many systems of crop rotation. The United States Department of Agriculture says it is especially adapted to short rotations, taking either an entire season or part of a season following some grain crop. The cash value of the seed is sufficient to encourage growing the beans as one of the main crops. When the whole season is thus devoted to soy beans, they take any place in a rotation system where corn can be used.

STRAWBERRIES ALL SUMMER

Popular Varieties Are Progressive and Superb—Resistant to Leaf-Spot Diseases.

Strawberry plants which will continue to produce strawberries until hard frosts occur may be grown in all of the northern, United States and in the mid-western states. The two leading varieties of this type of strawberry, the progressive and the superb, are notable because they are exceptionally resistant to leaf-spot diseases. Another remarkable characteristic of these varieties is that if their blooms are killed by frost they soon flower again. Therefore, in sections subject to late spring frosts, which often destroy the crop, these varieties are particularly valuable.—United States Department of Agriculture.

\$525 IN PRIZES FOR THE BEST RHYMES

A new contest is just being started which will interest every woman and girl who reads this paper. Any woman or girl can enter this Contest—anyone can win! All it is necessary to do is to write a 4-line rhyme on Dr. Price's Phosphate Baking Powder, using only the words which appear either on the label of the Dr. Price can (front and back) or on the printed slip which is found in each Dr. Price can.

Isn't that easy? Everyone likes to make rhymes and here is a chance to spend a fascinating hour or two writing rhymes on this popular Baking Powder and perhaps winning a substantial prize for your efforts.

59 CASH PRIZES

For the rhyme selected as best a prize of \$100 will be given; for the second, third and fourth best rhymes prizes of \$75, \$50, and \$25, respectively will be given. And besides these prizes there will be 55 prizes of \$5 each for the next 55 best rhymes. With such a long list of prizes as these, it would be a pity not to try your hand at it!

Here is a 4-line rhyme as an example:

*Two teaspoons of this powder make
Biscuits, muffins, pie or cake,
The Price's Co., guarantee
No alum in the cans to bake.*

As Dr. Price's Phosphate Baking Powder sells for only 25 cents a 12 oz. can at grocery stores, some rhymes could play up the remarkable economy of this pure and wholesome baking powder which contains no alum.

All rhymes must be received by May 1, 1922. Only words appearing either on the label of the Dr. Price can (front and back) or on the printed slip contained inside the can may be used. These words may be used as often as desired, but no other words will be allowed. If you haven't a can of Dr. Price's, a copy of the label and the printed slip will be sent to you free upon request.

Any woman or girl may enter the Contest, but only one rhyme from each person will be considered. In case of ties, the full amount of the prize will be given to each tying contestant. Write plainly on only one side of a sheet of paper and be sure to give your name and address.

Send your rhyme before May 1st to
Price Baking Powder Factory
1007 Independence Blvd., Chicago, Ill.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Rural School District No. 38, Latah County, Idaho.

NOTICE IS HEREBY GIVEN. That the annual school meeting of Rural School District No. 38, County of Latah, State of Idaho, will be held on Saturday the 15th day of April, 1922, and the said meeting shall convene at 1:00 o'clock p. m. on said day and continue uninterruptedly until 5:00 o'clock p. m., at the schoolhouse in said District; that at said meeting the following business will be transacted:

One trustee to serve for a term of three years will be elected.

The length of time school will be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.

That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of tax-

able property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.

That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot. Dated this 24th day of March, 1922.

K. D. INGLE,
Clerk of Rural School District No. 38, of Latah County, Idaho. 13-3t

CALL FOR BIDS

Sealed bids for the building of a

schoolhouse in District No. 10, Nez Perce County, will be received by the clerk of the board at Cameron up to April 14th.

To be built according to State Plan No. 6. Contractor must furnish all labor and material as prescribed by State Board of Education.

Blue print may be examined at the home of the clerk.

Bid must be accompanied by a certified check of 2 per cent of the proposed bid, as a guarantee that the successful bidder will enter in contract.

Board reserves the right to reject any or all bids.

Dated March 1, 1922.
Aug. F. Wegner, Clerk, 9-6t
Cameron, Idaho.

Daily Thought.

The world is a comedy to those that think, a tragedy to those that feel.—Walpole.

GLEANINGS

Mrs. S. P. Callison went to Moscow last week where she underwent an operation for the removal of a number of glands in her neck. She is recovering nicely from the effects of the operation and will probably be home the last of this week.

A. W. Jones, road supervisor on Big Bear ridge, has been busy replacing culverts which washed out during the spring thaw. He has dragged the roads on the ridge and reports them to be in good condition.

The members of the Okoko Klotchman Club met at the home of Mrs. M. B. McConnell, Wednesday night.

Mrs. Charles McKeever returned Wednesday from a visit at Clarkston with her son, Harry.

James DeFord went to Spokane, Thursday afternoon, where he expects to visit friends for a few days.

During these quiet times the only way we can fill up the news columns of the Gazette is by shaking the chestnut tree. If you know any items it will be greatly appreciated if you will send them in.

A kick is being registered by local wireless stations. Sunday evening a poor wretch somewhere in the Catalina Islands was making love by wireless. His inane remarks were heard in no less than seven different states.

Orphie Hupp writes from Valleyford, Wash., that he is starting in the poultry business there. Last week he purchased 600 baby chicks as a start for his flock.

Halvor Nelson of Farmington, Wash., was looking after business interests here the first of the week.

T. H. Daugherty of Leland returned last Saturday from Spokane where he spent several weeks in the hospital.

Dudley Loomis Post, American Legion, of Moscow, is planning to put on a big celebration July Fourth. The Pullman chamber of commerce adopted resolutions pledging its assistance in conducting the celebration.

M. O. Raby and Gabriel Forest started the highway tractor and grader on the streets Thursday morning. This is the first work that could be done this spring, delay being caused by the wet weather.

Mr. and Mrs. H. P. Hull are expected home from Spokane today, where they have spent the past two weeks.

Rev. W. H. Forsythe, district superintendent of the Methodist church, was in Kendrick last Saturday on business.

Dr. Otteraaen returned last Friday from a visit with his brother at Boise.

A. K. Carlson was a Lewiston visitor the first of the week.

Mr. and Mrs. J. B. Helpman arrived Saturday from Northport, Wash., to visit their daughter, Mrs. Frank Boyd.

George Holbrook is shipping a carload of fat hogs to the Spokane market, today. He fattened them here for the market.

Mrs. Gregory Eaves of Lewiston arrived Tuesday morning to visit her parents, Mr. and Mrs. J. B. Helpman.

Mrs. J. E. Nessly returned to her home in Boise after visiting her sister, Mrs. Ralph Knepper.

Mr. and Mrs. George Leith entertained the members of the Circle Card Club at their home Tuesday evening. A very pleasant time was spent playing five hundred. Dainty refreshments were served.

In renewing her subscription to the Gazette, Mrs. G. M. Lewis writes from Coeur d'Alene as follows: "The Lewis family could not get along without the Gazette. We all look for it every Saturday morning." Mr. Lewis is still operating a wholesale and retail electric supply business at Coeur d'Alene.

M. V. Thomas stated Tuesday that the Kendrick State Bank passed its tenth anniversary Tuesday of this week. The bank was re-organized 10 years ago with Mr. Thomas as president.

Harry Stanton went to Moscow, Wednesday, on business.

Mrs. Joe Gardner and little daughter went to Clarkston, Tuesday afternoon, to visit at the home of Mrs. Gardner's parents, Mr. and Mrs. J. C. Bibb.

Pete Stump of Southwick was in Lewiston on business the first of the week.

Adolph Wegner went to Moscow, Tuesday, to take charge of the Owl Drug Store for a few days.

Claud Craig of Leland returned, Wednesday, from a business trip to Lewiston.

N. B. Lonn was a Moscow visitor, Wednesday afternoon.

Mr. and Mrs. A. Onstott and family spent the week end in Clarkston

where they celebrated the Golden wedding of Mrs. Onstott's mother, at her home.

Hank Bleck of Southwick was in Lewiston the first of the week on business.

Dun McCrea was up from Lewiston to spend Sunday with his parents.

M. B. McConnell went to Lewiston on business, Wednesday.

A. N. Rognstad of Big Bear ridge was in town the first of the week with a model for a combination bean cutter and buncher which he invented. He has used one of the machines on his place for the past three years and gets good results. It is a time saver as the bunching has heretofore been done principally with side-delivery rakes and by hand. Mr. Rognstad's machine cuts the beans, rakes them and bunches them all in one operation. He expects to have it patented.

Ben Callison of American ridge was a Moscow visitor the first of the week.

Jake Grinolds was in Kendrick the first of the week visiting his parents. He drove up with his truck. Jake has 1,000 White Leghorn chicks which he is nursing through the cold spring weather. He has the nursery heated with a stove and keeps the fire going day and night. As a side issue he is raising several acres of head lettuce.

Work on the "New Kendrick" theatre is progressing rapidly. The operating booth is being wired, and will soon be ready for the installation of the picture machine. The wood floor, which was laid on top of the concrete, is finished and now being stained. All of the equipment is inside the building and ready for installation. The theater will be ready for the grand opening to be staged Friday and Saturday, April 28-29.

Wm. J. Zeyen, formerly of Leland, who has been taking a vocational course in journalism at W. S. C., has been transferred to Lewiston to get practical work along that line.

At a meeting of the Nez Perce county commissioners at Lewiston, Wednesday, a deal was made for the purchase by the county of a one-half interest in the bridge spanning the Clearwater river at Peck. The Northfork highway district purchased the other half. The price paid was \$25,000. The bridge has heretofore been a toll bridge.

Suit Filed Tuesday

Suit was filed Tuesday in the Latah county probate court by J. M. Fonburg against Earl A. Langdon, says the Star-Mirror. The plaintiff seeks the recovery of \$120 and costs for work, labor and services as a farm laborer, alleged to have been performed for the defendant. J. H. Felton of Troy, a 1921 graduate of the University of Idaho college of law, is attorney for the plaintiff.

Troy Bond Issue Carried

Tuesday evening of last week the voters of Troy school district carried a \$20,000 bond election by a vote of 175 to 28. An addition will be built on the present school building to make more room for the high school and also a large room for gymnasium. It is expected that work will be started the latter part of this month.

The Vicar says: "Seeming calamities may be real blessings." 15-1t

Southwick News

Mr. Howland accompanied Flora Smith and Willie Harris to Lapwai, Friday where they took part in the speaking contest.

Mrs. George Jones and son, Richard, went to Moscow, Friday.

A surprise shower was given Mr. and Mrs. Williams, Thursday evening.

Hiram Alber left for his ranch near Spokane last week. He expects to move his family as soon as school is closed.

A joint hard times party was held at the Kauble home, Monday night, in honor of Margie Kauble and Dean Baker, a prize was given for the "tackiest" looking girl and boy, Alonzo Douglas and Margie Kauble winning the prizes. All reported a fine time.

A shower was given Mrs. Alora Wetmore, Thursday, at the home of Mrs. Nellie Baker. The afternoon was spent in making Easter baskets, after which refreshments were served.

An oyster supper was held at the Homer Hayward home, Saturday evening. A large crowd attended and all reported a good time.

Mrs. James Smith is reported quite ill again.

Big Bear Ridge

Mrs. Snell departed for her home

in Iowa, Monday, having spent the past year with her daughter, Mrs. Rufus May. Mrs. May accompanied her as far as Spokane.

Mrs. Ralph Griffith returned to her home at Ontario, Oregon, Tuesday.

A. N. Rognstad attended a business meeting of the Farm Bureau at Moscow, Saturday.

Rhineheart Hecht has returned from Spokane, where he spent several months.

Mrs. Halvor Lien entertained the Lutheran Ladies' Aid Monday afternoon.

Miss Mary Galloway is spending the week with her brother here.

Miss Mabel Smith completed a seven months term of school at Fern Hill, Friday. She went to Lewiston, Monday, where she will enter the Normal.

Rilla May, Betsy Kleth and Joseph Forest of the Rimrock school were taking the eighth grade examinations in Kendrick last week.

The union Sunday school will give an Eatser program and dinner at the Steele school house, April 16th.

Otto Gladden has returned home from Coeur d'Alene, where he has spent the winter.

The Vicar says: "The temper of a woman is generally formed from the turn of her feathers." 15-1t

FOR SALE: Several good work horses team or single, weight 1100 to 1300. Inquire August Meyer, Southwick. 15-3a

NOTICE

Marshall Neilan's greatest production! The most talked about picture of the Season.

"FOOT-FITTER"

Seven Points of Supremacy

1. The sole leather used in "FOOT-FITTERS" is of the best quality obtainable. Even the insoles are cut from standard outside leather.
2. "FOOT-FITTERS" are the only shoes in the world having full length vamps and sole leather box toes. This feature prevents ripping at the tip and makes a smooth outer and inner surface.
3. The insoles are shoulder channelled so that they fit tightly against the outsole. There is no need or room for a cork filler. A small piece of duck is used to prevent squeaking.
4. The Calfskin inside counter pocket is of great value, for it saves the wear on the socks. There is no rough surface to rub against.
5. "FOOT-FITTER" heels are 3/4-inch longer than generally used. They give additional support to the arch and increase the comfort and wear of the shoe.
6. The vamp is reinforced with 8-oz. duck. This absorbs the moisture from the foot, this keeps the vamp from cracking and holds the shoe in shape.
7. Edmonds' "FOOT-FITTER" shoes are called "FOOT-FITTERS" because they fit the foot snugly. Built on combination lasts they support the foot like a doctor's bandage. "FOOT-FITTERS" give Comfort, Service and Appearance.
