

Comes Cropper in Steeplechase

M. Bucknal heavily thrown by his "Bangle" in the point to point steeplechase recently held by the students of Oxford university, England.

An Old Residenter

Billy Meyer, local blacksmith, is the oldest pioneer, from the standpoint of residence, in Kendrick. He came here in August, 1890, before the railroad was built. Everything was hauled from Moscow and Troy. Shortly after his arrival the railroad came and for a good many years afterward the town saw some wild days and wilder nights. There were seven saloons that did a flourishing business and kept the city police force on the jump.

In those days Kendrick was the railroad center and trading point for the Pierce City mining district and much of the Camas Prairie country. It was a live town and did an enormous amount of business, as four horse freight teams were hauling merchandise to the surrounding districts every day.

Shortly after Billy took up his residence here, Dr. Rothwell came. He was a busy man and his territory also extended to Pierce City, where he made numerous professional calls, reaching that remote section by means of a saddle horse. The third oldest resident is H. P. Hull. He went into the general merchandise business, survived several fires and a flood and still lives to tell the tale.

Before the big fire the business buildings of the town were frame structures, in sharp contrast to the modern brick blocks which have since replaced them. Kendrick is a safer, saner, sightlier town than it was in those days and not quite so wet.

Big Bear Ridge

Mrs. W. H. Fairfield has gone to the Leonard Fairfield home near Juliaetta to become acquainted with her new grandson.

Thorvald Nelson spent Wednesday with his sisters, Misses Emma and Neva in Pullman.

Mrs. Horace Comstock and children are visiting relatives near St. Maries.

Preaching services at the Lutheran church, Sunday, April 23rd at 11 a. m.

Mrs. Robert Clemenhagen and daughter, Miss Violet of Deary, spent last week with her parents, Mr. and Mrs. Frank Whitcomb.

Mr. and Mrs. C. Ralston have moved to St. Maries.

Preaching services at the Steele school house, Sunday, April 30th at 11 a. m., and 7:30 p. m. by Rev. Williams.

The Booster Club have decided to hold their picnic, June 14th.

The Easter program given by the Union Sunday school was attended by a large number. The picnic dinner was greatly enjoyed, after which several hours were spent in a social manner.

P. A. Norman of Deary is spending some time on the ridge.

At the annual school election held at Juliaetta Saturday afternoon there were 50 votes cast, but no election resulted. There were three nominees with but one vacancy to be filled. The vote was Edgar Taylor (incumbent), 24; Miles Pierce, 24; Harry Kraemer, 2. The vacancy will probably be filled by appointment by the county superintendent, Miss Scattaboe.

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers.

Genesee News: After some considerable dissension in matters pertaining to the Genesee Highway during the past several months, they have finally been amicably adjusted and road work will again be resumed and necessary work done. Portions of the highway are in a deplorable condition and will be looked after at once.

A meeting of the commissioners—Chas. Odenborg and Chas. Jain—was held on Saturday, April 8, when it was decided that the best interests of the taxpayers of the district could not be served under the state of affairs that existed at that time. After talking the matter over Mr. Odenborg decided to present his resignation as commissioner, but it was necessary to elect a third member. The name of Ernest Peterson having previously been mentioned for the place on the board, he was chosen as a third member by Mr. Odenborg and Mr. Jain and he immediately qualified for the position, after which Mr. Odenborg presented his resignation, which was accepted. This still left only two members of the board. The name of Henry Martinson was presented as a third member and he was chosen by Messrs. Jain and Peterson.

Troy News: Men and teams are at work this week cutting down the hill at the school house and leading down to Main street. When completed this will give a fairly good way to go from Main street straight through without making the necessary detour as at present. The hill may not be cut down sufficiently at present so that heavy loads can be pulled over it but cars and light loads will have no difficulty in going over.

Deary Press: There is a growing sentiment this spring in favor of opening the proposed Moscow-Bovill state highway through the Deary and Troy highway districts. The Bovill district has already built its share of the road, and has it ready for surfacing.

It had been hoped that state and federal aid could be had for this road this spring, but apparently none will be forthcoming. The nearest federal project is the Harvard-Santa road, for which \$10,000 has just been appropriated. But it is argued that the seeming lack of interest on the part of the state and federal departments should not deter the local boards from going ahead with the work. It is felt that the road should be located and opened for travel, so that laterals may be put where they belong.

Labor and material are cheap now, to which may be added the fact that the road is needed as an aid to community development.

Star-Mirror: Boy, page Mr. Ripley! Mr. Ripley, yes sir, did you ever hear of a man eating thirty eggs at one meal? Well,—"Believe it or not."

But such was the gastronomical feat of one J. Arnold Cobby of Vancouver, B. C., an undergraduate at the University of Idaho. The feat was performed at the annual Easter morning breakfast at the Beta Theta Pi fraternity house. Close seconds to Cobby and tied for second and third honors came Arthur S. Guerin of Spokane, and Thomas Bucklin of Idaho Falls. Guerin assimilated 22 eggs and Bucklin ate an equal number. "Believe it or not"—but the trio ate a grand total of 74 eggs. The eggs were soft-boiled, fried and poached. Toast and coffee made up a part of the breakfast.

A custom, now a tradition, was several years back at the Beta Theta Pi house when the house manager announced that on Easter morning the boys could have all the eggs they wanted to eat. Two years ago Abe Goff of Walla Walla, center on the Idaho varsity football team caused, no little admiration and perhaps a little envy by getting away with 18 eggs, one dozen and a half.

RETURN FROM CALIFORNIA TRIP

From Oakland to Kendrick in Seven Days.

After spending six months in sunny (?) California, Mr. and Mrs. A. C. Deeter say that Idaho is good enough for them. They left Kendrick last October in their Dodge car with a complete camp equipment and prepared for most any kind of weather. The first day they camped at Colfax, having started from Kendrick about noon. The next camp was made at Walla Walla the following evening and from there to Grant's Pass and then to Eagle Creek where they ran into a pouring rain which continued several days. At Hood River a visit was made with Mrs. H. B. Emmel and children. They are very nicely situated on a ten acre orchard tract and are doing well. The older boy is a rustler and handles the ranch in a businesslike manner. He is also developing into a very good musician and can play the pipe organ, violin and piano. The next stop from Hood River was made at Portland where camp was made with the intention of waiting until the rain stopped. After two days the camp equipment began to mold on account of the dampness so it was decided to continue the journey in the hope of getting into a dryer climate.

They passed through Redbluff and Corvallis and then to Oakland where they visited Mr. Deeter's daughter, remaining there two months. While registering at the camp grounds the manager noticed they were from Kendrick, Idaho. He said he used to live at Kendrick and gave his name as H. Munsterman. Mr. Munsterman is well known here and his friends will be glad to hear that he has a splendid business. Mr. Deeter stated that the tourist camp grounds owned by Mr. Munsterman were complete with cottages, hot and cold water, gas for cooking and a little store for the convenience of the tourists. They rented a cottage on the grounds.

From Oakland they enjoyed a number of side trips, one of them to Petaluma where they saw the famous White Leghorn chicken ranches. One ranch of 45 acres contained 55,000 hens. The owner gathered his eggs with a truck and hauled them to warehouses as big as the grain warehouses here.

The second of January they went to Fresno and from there to Bakersfield where they visited relatives for 7 weeks. There are immense oil fields there. It is estimated there are over 3,000 wells. The inhabitants depend upon natural gas for heat. It got so cold while Deeters were there that the gas froze and had to be thawed before it was possible to get any warmth. While they were there it was reported there were 30 automobiles stuck in the snowdrifts between Bakersfield and Los Angeles. Food had to be taken to the snowbound tourists with pack mules.

From Bakersfield they went to Hermosa Beach where they remained 3 weeks. It is said to be a beautiful place but the weather was cold. They visited all of the beaches from Santa Monica to the Mexican line. While camping at Oceanside they ran across Mr. and Mrs. Sampson Snyder of Orofino and had a good visit with them.

The return trip took them through the orange groves. A stop was made at Pasadena and a trip taken to the old Mission at San Gabriel, which proved very interesting. A brief visit was made at Riverside from which place journeys were made to tributary towns. Here there were hundreds of acres of orange groves that were being pulled out. The trees had been killed by the frost and were leafless, although loaded with oranges. When the leaves are killed by the frost the tree dies.

From Oakland, a distance of 1600 miles to Kendrick, was made in just three hours less than 7 days.

Ku Klux Klan Decorates Grave

In full regalia members of the Ku Klux Klan recently placed a wreath of flowers, in the shape of fiery cross bearing the inscription, "The Invisible Empire," on the grave of Thomas Johnson in Englewood cemetery, Los Angeles.

Popular Young Folks Wed

Miss Tora Halseth, daughter of Mrs. L. Halseth and Lewis Pearson, son of Mrs. S. P. Callison, were married last Saturday afternoon at the Methodist parsonage, Rev. Perry officiating. Miss Clara Bailey and John Halseth, brother of the bride, accompanied the happy couple to Moscow and were present at the wedding. A delightful wedding dinner was enjoyed by the party at the Moscow Hotel, after which they returned to Kendrick on the night train where a party of friends awaited them and spent a jolly evening at the Halseth home.

Mr. and Mrs. Pearson are popular young people and have a wide circle of friends in the community. They will make their home in property owned by Mrs. Stanton.

More Big Hogs

Earl Langdon of Crescent stopped at the Gazette office the first of the week to tell us about a big hog which he butchered last week. It weighed 467 pounds dressed and he received 12 cents a pound for it at his ranch. Oscar Morey of Bear ridge was in the office when Earl told his story, and he was reminded of a hog which he brought to Kendrick a number of years ago. It weighed 840 pounds. It was probably the biggest hog that was ever brought to this town, at least we have never heard of a bigger one. Earl made a mistake by telling his story first.

"The Vicar of Wakefield"

"The Vicar of Wakefield" will be shown in moving pictures tonight at the high school auditorium. It is a high class production that has proved very popular in Moscow and Pullman, where it was recently shown. A nominal charge of 35 cents will be made for adults. All school children will be admitted free.

Mrs. H. R. Veon and little son returned Monday from a visit at Lewiston.

The Lewiston Conference of the Lutheran church will be held at Cameron, Monday, Tuesday and Wednesday of next week.

Mr. Deeter stated that the nearer he got to Kendrick the more anxious he was to get home.

The roads were good all the way except from Lewiston to Kendrick, which was the worst strip they encountered on the entire trip. No car trouble was experienced and only one puncture. It was not even necessary to use the chairs at any time.

Mr. Deeter said he enjoyed the trip very much and saw much of interest in California, but Idaho looks better to him. He says that nine-tenths of the property there is for sale and the other tenth can be bought if you have the price.

On reaching home the first thing Mr. Deeter did was to build a fire in his wood heater. He said it was the first time he got thoroughly warmed through since he left Idaho last October.

George Franklin Davis

A sad death occurred in the C. G. Davis family when little George Franklin, age three years, passed away at their home Monday after a lingering illness. He was the only boy in the family and his death is a most grievous bereavement to the father and mother and little sister, Lucile.

The funeral was held at the Methodist church, Rev. Pickering having charge of the service. Interment was made in the Kendrick cemetery.

George Franklin Davis was born November 12, 1918, near Kendrick, Idaho. He died at his home near Southwick, April 17, 1922, age 3 years, 5 months and 5 days. He is survived by his mother and father and one sister, two little sisters having preceded him to the world beyond.

"A little one from us has gone,
A voice we loved is stilled;
A place is vacant in our home
Which never can be filled."

Opens Plumbing Shop

Charles McKeever has opened a plumbing and sheet metal work shop in the rear of the Farmers Hardware, his announcement appearing in this issue of the Gazette. Mr. McKeever has had many years experience in his line of work and will, without doubt, do a good business. He has put in a stock of plumbing supplies and sheet metal and is prepared to do all kinds of work along this line.

Leland Items

Last Sunday morning looked more like a Christmas than an Easter morning with its ten inches of snow, but it went away about as quick as it came and now bids fair to be spring soon.

Dr. Seeley is having the confectionery building overhauled preparatory to putting in a drug store. He expects also to run the confectionery in connection with it. R. M. Smith is doing the carpenter work.

At the declamation contest held in the school here Friday, Claud Hall won first place and Raleigh Smith second.

Miss Boyd spent the week end with Mrs. Winegardner.

Born, Friday, to Mr. and Mrs. Philip Dugherty, a ten pound girl.

Mrs. Hund entertained at dinner Sunday Mr. and Mrs. Frank Bunker and children and Mr. and Mrs. Hugh Parks.

We are expecting to be supplied with early vegetables by Ralph Oylear and R. M. Smith as they are the only ones who have garden made.

The Epworth League will hold its business and social meeting in the school building on Friday evening, April 28, after which there will be a debate, subject: "Resolved, That environment has more to do with forming human character than heredity."

Claude Hall and Raleigh Smith went to Lewiston Friday to compete in the county declamation contest. They were accompanied by Rev. Hall, Mrs. R. M. Smith and Mr. Darrow.

Mr. Koepf is going into the poultry business, having bought Wm. Behren's stock, consisting of one hundred full blood White Leghorn hens.

Kendrick Gazette

Ralph B. Knepper, Publisher.

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

Sermons sent out by wireless every Sunday night are proving quite popular with local radio fans. They are of five minutes duration.

There's a small matter which some of our subscribers have seemingly forgotten. To us it is necessary in our business. We are very modest and do not wish to speak of it, but we know positively that those of our subscribers, of whom you are undoubtedly one who purchase these few lines, will not require over three guesses to know what we in our diffident, hesitating way are so delicately trying to imply.—Ex.

Babson says: "Cut production costs as much as possible, but don't skip your selling appropriation during 1922. Defer expansion of plant until next year, but this year increase your advertising."

The most serious consequence following in the wake of the latest spring in history, is the shortage of feed. Many four-horse loads of baled hay are being hauled from the local warehouses to the farms in the surrounding country. The price is high and the roads have been bad, so it has not been a very pleasant situation to those who have had to buy feed. One farmer who had a large surplus which he sold on a low market last fall, had to buy from the warehouses and haul the feed back to his ranch. He "sold short" and the continued bad weather upset his calculations.

Any old car is a pleasure car for the man who runs a repair shop.

Just as the country is beginning to leave some of its troubles behind the Toledo Blade proposes a "Tell the Truth Week".

It is said that a vein of "natural soap" five miles in length was recently discovered by a Mexican in California. This will be unpleasant news for the boys.

While scientists may not agree, financiers today say that the world is flat.

While this section does not specialize in poultry, nevertheless there were 18 cases of eggs in one shipment from Kendrick the first of the week.

In Chicago an average of 2,500 women a day are getting their hair bobbed. Is bobbed hair coming as a permanent institution? It is only a few generations since all men wore their hair long. No doubt the men who pioneered the short-hair fad were ridiculed. A few years from now the woman without bobbed hair may be a curiosity. Once cut, they generally like it. That is the first requisite for making a fad into an established custom.

At a chamber of commerce meeting at Moscow this week the daylight saving chestnut was brought up. County Agent Fletcher was one of the few who opposed it, on the grounds that it was not satisfactory to the farmers. While daylight saving has many advantages to town folks, if it is inconvenient for the farmers during their rush season, it would hardly be right to adopt it, as this is a strictly agricultural section and the farmers' interests are ours.

Barrels and barrels of paint could be used on most of the residences in Kendrick to a wonderfully good advantage. A "Paint-Up Week" ought to be promoted for the purpose of transforming the appearance of some of the dingy portions of the town's residence districts.

CARD OF THANKS

We wish to thank our friends and neighbors for their many acts of kindness and for their assistance during the illness and burial of our little son and brother. Mr. and Mrs. C. G. Davis and Lucile.

Absolute Auction

OF

Lewiston Orchard Tracts

Saturday, May 6, 11 A. M.

On this date we will close out to the highest bidders, without reserve, the remaining holdings of the West End Orchard & Land Co. in Lewiston Orchards. Every tract will be sold regardless of the price bid.

300 ACRES IN ALL

Most of this is in 5 acre tracts. In several cases tracts are adjoining, so purchaser can secure up to 80 acres in one tract if he desires. Two-thirds is in splendid bearing orchard of standard varieties of apples, and the remaining one-third is open land in fall wheat and barley. In excellent condition for alfalfa and head lettuce.

Similar to Yakima and Wenatchee Lands at \$1,000 Per Acre

While these tracts are similar to Wenatchee and Yakima irrigated lands that bring \$1,000 to \$1200 per acre, yet you will get them at this auction at your price. These tracts have paved highway running through them, good schools and churches, and all city conveniences. They are right in the heart of the famous Lewiston Orchards. All tracts are in the west end of the district.

Very Easy Terms

Terms of payment are very easy, extending over a period of several years. If terms offered are not satisfactory we will be glad to submit to the owners any reasonable set of terms that you may care to offer.

This is positively your last chance to get Lewiston Orchard tracts at such prices. When these are sold all irrigated lands in the district will be disposed of. Write for full information.

POULTRY

INTEREST IN LAMONA BREED

White-Egg-Laying General Purpose Fowl Developed by Department of Agriculture.

(Prepared by the United States Department of Agriculture.)

The Lamona, the new white-egg-laying general-purpose fowl originated and being developed by the United States Department of Agriculture, made its first public appearance at the Madison Square Garden poultry show, held in New York from January 25 to 30, where 15 of the birds were shown in the open classes. In addition to the Lamonas, and other government-bred fowls of standard breeds, the department put on an extensive exhibit consisting of models of poultry houses, a display of feathers of the standard breeds, appliances such as feed hoppers, brood coops, and a fat-

Typical Lamona Hen.

tening battery. A series of panels, made up of photographs, charts, and placards, showed the more important standard breeds, the feeding of hens for egg production, the preparation of birds for exhibition, the advantages of early hatching, the improvement resulting from the use of a high quality sire, capons and caponizing, culling the farm flock, and the pedigree breeding of poultry.

A number of department representatives took part in the program of the show and gave information to the visitors concerning the educational exhibit. They reported an extraordinary interest on the part of the public and various poultry breeders in the Lamona breed, many persons desiring to obtain breeding birds. The department believes it necessary to perfect them still more as regards certain characteristics, and it is not likely that any will be for sale during the coming year.

GRADING EGGS IS ESSENTIAL

Ungraded, Unstandardized Product is More or Less of an Uncertain Quantity.

When pullets begin laying, their eggs are not up to standard weight. Therefore, grading eggs is essential, not only from the producers' standpoint but from the buyers', for an ungraded, unstandardized egg is more or less of an uncertain quantity. The marketing of such a product is never advised since it puts an unnecessary handicap on the buyer who never knows what quality he will receive. The buyer in order to protect himself against loss must pay a correspondingly low price. Fresh eggs should be graded by size to meet the requirements of the market. The first grade of eggs ordinar-

ly consists of clean, fresh, reasonably full, strong, sweet eggs with an average weight of 46 pounds net per standard 30 dozen case or over 24 ounces to the dozen. The second grade must weigh 44 pounds or more net, per 30 dozen case. The third grade must weigh 41 pounds or more net per 30 dozen case. They also make a grade of pullets' eggs which weigh 34 pounds or more net for 30 dozen or 16 ounces per dozen.

POULTRY NOTES

Apoplexy and egg-bound are almost always the result of excessive fattness among the hens.

The young chick drinks a great deal of water and plenty of it is necessary for its health and development.

The first food the chick should receive after being removed from the nest or incubator is clean, fresh water with the chill removed.

Don't feed any more mash at one time than the fowls will eat up perfectly clean. To allow more is not only wasteful but promotes unsanitary conditions.

Variety in rations is one of the most important things connected with good feeding. Sometimes even a faulty ration will give fair results because of the variety that enters into it.

Don't expect the fowls to find grit for themselves. No matter how much range they may have it is best to keep grit, charcoal, oyster shells, etc., constantly before them.

Accumulated moisture in the poultry house and an overcrowded condition are directly responsible for the colds and roup which weaken the vitality of the birds, causing them to easily succumb to other diseases.

INOCULATION OF SOY BEANS

When Sown on Land Not Previously Planted to Crop It is Advisable to Use Culture.

Natural inoculation now occurs quite generally throughout much of the area where soy beans are grown extensively. When sown on land which has not been previously planted to this crop, however, it is advisable to inoculate with the proper culture. Inoculation may be obtained, either through the use of a pure culture, a limited quantity of which can be procured from the United States Department of Agriculture free of charge, or by the use of inoculated soil from a field where soy-bean plants have previously developed nodules. The inoculated soil may be drilled in at the time of seeding, using the fertilizer box, or by thoroughly mixing a gallon of the soil to a bushel of seed.

Longest Conclave in History.
 There is no limit for the duration of a conclave of the sacred college at Rome. In the Middle ages one conclave which met at Viterbo, about fifty miles from Rome, lasted over two years and a half. It ended only because the people of the town, impatient at the state of anarchy in which the pontifical states were thrown for the want of a ruler, climbed on the top of the palace where the cardinals were gathered and unroofed the building.

PREPARING PORK TO USE OR SELL

Selling Hogs and Buying Pork is Not a Profitable Practice for Farmers.

DIFFERENT WAYS OF CURING

Young Animals From 8 to 12 Months Old Are Best for Furnishing Home Meat Supply—Avoid Danger of Disease.

(Prepared by the United States Department of Agriculture.)

Every farmer can well produce the pork and pork products which are consumed on his farm, for selling hogs and buying pork involves profits, but not to the farmer engaged in the practice. This point is brought out in Farmers' Bulletin 1180, published by the United States Department of Agriculture, which tells how hogs should be killed and describes different methods of curing and canning pork on the farm. Highly nutritious and palatable pork products for home use are easily made, says the bulletin. Pork can be cured and canned in a number of ways and the variety of products affords a supplement to the daily meals.

Young Hogs Yield Best Meat.
 A hog of medium condition, gaining rapidly in weight, yields the best quality of meat. A reasonable amount of fat gives juiciness and flavor to the meat, but large amounts of fat are objectionable. Smooth, even, and deeply-fleshed hogs yield nicely-marbled meats. The meat of old hogs will be improved if they are properly fattened before slaughter, but young hogs from eight to twelve months old are best for furnishing the home meat supply.

The bulletin emphasizes especially the importance of selecting only healthy hogs for slaughter and of thoroughly cooking all pork products used for food.

Even if the hog has been properly fed and carries a prime finish, the

Proper Equipment for Rapid and Skillful Work at Killing Time is Important.

best quality of meat cannot be obtained if the animal is not healthy. There is always some danger that diseases may be transmitted to the person who eats the meat, particularly if it is not thoroughly cooked.

Hogs Before Killing.
 Hogs intended for slaughter should not be kept on full feed up to the time of killing. It is better to hold them entirely without feed for 18 to 24 hours prior to that time, but they should have all the fresh drinking water they want. It is essential to have the proper equipment for rapid and skillful work at killing time. Such equipment includes a straight sticking knife, a cutting knife, a 14-inch steel to keep the knives sharp, a hog hook for holding the animals, a bell-shaped stick scraper, a gambrel for holding the hog to facilitate cleaning and cutting the meat, and a meat saw. If the hog is not too large, a barrel is a convenient receptacle for scalding. Complete directions for killing and cleaning a hog, properly cutting the portions of meat, rendering lard, making sausage, smoking cured meat, and home canning of pork and pork products are described in the bulletin, copies of which can be obtained free on application to the Department of Agriculture.

RIGHT TIME TO PLANT CORN

In Central Corn Belt Seed Planted in April is Slow in Coming Up and is Not Hardy.

There is a right time to plant corn, and usually the better farmers whether they figure by the calendar, by the size of oak leaves, or by the phases of the moon. In every neighborhood know when that right time comes. It is suggested, however, that more corn is planted too early than too late. Corn is a hot weather plant. In the central corn belt the seed that is planted in April is usually slow in coming up and less hardy than the seed planted about the middle of May. The distribution of rainfall affects the yield, and this varies from season to season, but the corn experts say, and this theory is verified by common experience, that the best yields and most rapid growth may be expected from the medium planting dates.

Lazy Dollars

Dollars merely safe are not performing their natural function. They are not working. They are not doing the owner or the world any good.

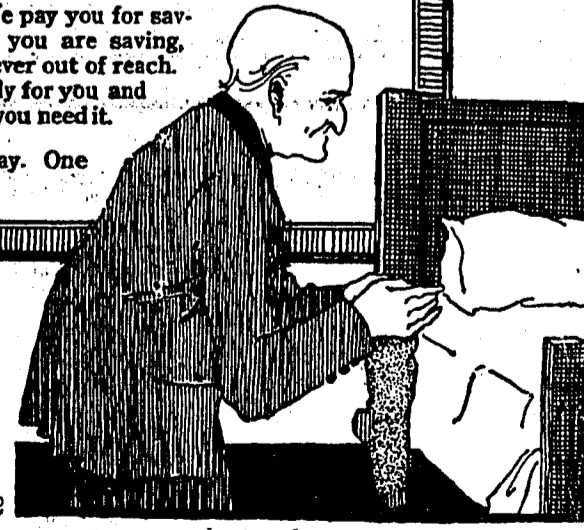

Moreover, most hiding places thought to be safe are decidedly unsafe. Not only thieves, but fire or other unforeseen happenings may rob you of your wealth.

Saving Is Using

Dollars saved are safer! And they are constantly working to earn more for you. They are constantly working for the good of the whole community.

Consider this. We pay you for saving. And while you are saving, your money is never out of reach. It is always ready for you and easy to get when you need it.

Start with us today. One dollar will do it.

HASTY CONCLUSIONS SHOULD BE AVOIDED

All Angles of Farm Enterprise Should Be Considered.

If Cows Were Sold There Would Be No Way of Using Roughage—Labor Also Would Be Lost, Adding Another Burden.

(Prepared by the United States Department of Agriculture.)

Hasty conclusions should be avoided in making use of the results of the year's cost account for improving the organization of the farm, warns the United States Department of Agriculture. All good farmers know that sometimes a positive decrease in profits may ensue if an enterprise be dropped because, taken alone, it has failed to pay. Cows, for instance, may not show a net profit, but if all the cows were sold there might be no other way of using the roughage, which would become a dead loss. Labor devoted night and morning to

Keeping of Cows May Be Responsible for Making Hogs So Profitable.

milking and feeding cows, and charged to them, would be entirely lost if the cows were sold and nothing supplied to fill in the time. Thus an added burden for the maintenance of labor would have to be borne by the other enterprises.

The fact that the hogs or the corn crop bring the most net money during the season is no reason for assuming that all the activities of the farm in the future should be devoted solely to hogs or corn. It may be that the keeping of cows is partly responsible for making hogs so profitable, or that the growing of wheat, clover, or other crops in rotation with corn makes the latter crop much more profitable than it would have been if grown alone.

Similar conditions will be met with on all farms and, therefore, no sudden changes should be made on the basis of what a single year's accounts may indicate. All angles of the enterprise should be taken into consideration.

POTASH IN WOOL RECOVERED

Small Washer Has Been Designed and Is Being Tried by the Bureau of Chemistry.

A small wool washer made for recovering potash from fleeces in a solution of sufficient concentration to make the recovery of the potash profitable has been designed and is being tried out by the bureau of chemistry of the United States Department of Agriculture. It is said that the average fleece contains about 4 per cent of potash by weight, but in the ordinary method of washing wool it comes out in such dilute solution that it does not pay to recover the salt.

About 600,000,000 pounds of wool are secured in the United States each year, and if only 3 per cent of potash is recovered it would amount to 18,000,000 pounds of actual potash that would be available for use in fertilizers. Some nitrogen is also recovered from wool along with the potash.

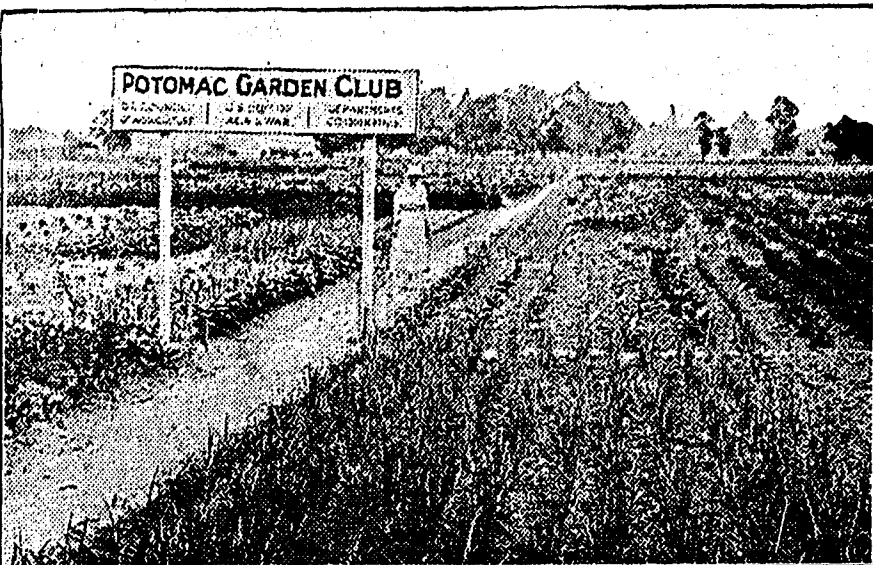

GIVE SOY BEANS ATTENTION

Crop Should Not Be Overlooked by Progressive Farmer in Adjusting Corn Acreage.

Soy beans should not be overlooked by the progressive farmer in the readjustment of his corn acreage. They require careful attention like corn, but they will make his decreased acreage of corn worth more money. It is a high protein, high oil crop in one.

The Key.
The key to every man is his thought.
—Emerson.

PLAN OUTLINED FOR ORGANIZING CLUBS TO PROMOTE GARDEN WORK

Potomac Park Gardens Near Washington on June 30, 1920, on Land Where Clearing Began March 22.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture and the state colleges of agriculture are frequently asked for the best method of organizing for garden work. Among the most successful city, town and village organizations, those that are organized on a co-operative basis, including all branches of the local government, the citizens' associations, the merchants' and other business men's associations, also schools and churches, have proven most effective. In order, however, to centralize the direction of the work the United States Department of Agriculture advises that a special garden committee or governing board be appointed. Under the direction of this committee, or board, all matters pertaining to securing the use of land, the purchase of seeds, fertilizers, plants and other materials are handled and the general supervision of the garden work maintained.

Formation of Club.

Where the work has not already been started, the formation of the organization should be perfected before the garden season begins, and all arrangements for the use of land and the purchase of materials consummated before they will be wanted. Someone, usually a public-spirited citizen, who can spare time for the work, should be appointed as director or chairman of the board. A membership fee of 50 cents to \$1 is frequently paid by those who plant gardens and who receive benefit from the organization.

In some cases a special trained garden leader has been hired to give information and help to those who need it. Very often this supervisor has been employed for a few months only, but this type of supervision pays, provided the person employed understands his business. In most cases prizes have been offered by the merchants and business interests, first, for the best individual gardens, both in back yards and on vacant land, and, second, for the various products of the gardens. Usually an exhibit is held at some convenient time during the latter part of the garden season, and a contest between the gardeners is staged. These exhibits and contests have been of wonderful value in promoting a spirit of rivalry to produce the best. As a rule, however, the gardeners have considered the garden products as they came upon their home tables the greatest reward for their efforts.

RECORD INVALUABLE IN ARRANGING WORK

It Is Often Means of Saving Labor Costs.

Farmer Enabled to Determine Number of Days Necessary to Produce an Acre of Any Crop, or for Care of Animals.

(Prepared by the United States Department of Agriculture.)

Keeping a record of farm labor does not require much time, yet it is often the means of saving labor costs. The United States Department of Agriculture has found such records of great value in the cases of many farmers whose experience has come to its notice. The labor records should show just how much man labor and team work is required on each crop and the season when it is used. They should show what proportion of the labor is devoted to work that directly produces income, and the amount that is consumed by odd jobs or indirectly productive tasks.

This will enable the farmer to determine the number of days of man labor and horse labor necessary to produce an acre of any crop, or for the care of any class of animals for a year. Thus he may be able to rearrange his system of management so that he can get along with less labor and, at the same time, maintain production.

A year's labor records show, also, just how much man power and horse power is necessary to run the entire farm at different seasons, and point out, accurately just what are the requirements of the rush seasons. With such records before him, the farmer knows in advance approximately what his labor requirements will be when the peak load comes. Thus he is able to increase or decrease the different farm enterprises and fit them together until he has outlined a complete year's work with a fairly even load of labor for the entire season.

Where a group of gardens is located on one piece of land it is often necessary to provide special means for financing the clearing, plowing and fitting the soil and later for policing the gardens to prevent losses, either from stray live stock or from theft. The fees collected from each gardener to cover these costs have varied in different instances from \$1 to \$5 per garden, but rarely more than \$3. Any funds that are left in the treasury at the end of the season can be used for promoting the garden movement the following year or returned to the gardeners.

Success in organizing city, town or village garden work depends upon leadership, and the harmonious working together of all concerned. One of the most successful garden clubs of which there is record is governed by a board of nine directors who are elected annually by ballot. The directors elect a chairman, secretary and treasurer, who constitute the officers of the club. This club has been in existence for several years and has grown stronger in its organization each year.

The formation of clubs consisting of those who plant gardens in their back yards is a little more difficult and must include provision for rendering a distinct service to its members. This service may consist of the purchase of manure or fertilizers, plowing the back yards, and supplying early plants or seeds. The gardeners must be made to feel that they are getting something in return for their participation in the club and the payment of dues, otherwise little interest will be taken in the organization.

Co-Operative Spraying.

In a few instances the spraying of crops to control insects and diseases has been handled in a co-operative way, using power sprayers which go over the gardens at such stated intervals as may be necessary for good results. These power sprayers are simply driven into the alleys, and lines of hose discharging the spray mixture carried into the gardens. In this way effective spraying can be secured at a less cost than if the gardeners provided spray equipment to do the work themselves. There are numerous other ways in which back yard gardeners can secure benefits from organized efforts. The greatest opening, however, for active organization in the home garden line is among those who plan gardens on a community basis.

WAR EXPLOSIVES FOR ROADS

Trinitrotoluol Has Become One of Most Desirable Agencies for Construction Work.

Trinitrotoluol, one of the most efficient of war-time explosives, has become, by adaptation, one of the most desirable agencies for the peace-time task of road construction, according to reports received from many states by the bureau of public roads of the United States Department of Agriculture. The use of this powerful explosive is becoming general, throughout the Union wherever highways are under construction. Out of the surplus war materials turned over by the War Department to the Department of Agriculture and distributed by the bureau of public roads among the various states, approximately 20,000,000 pounds of T. N. T. has found its way to the road builders' supply houses. This is more than four times as much as the total of powder of all grades distributed by the department among the states.

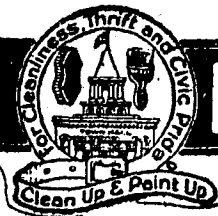

The quantity of T. N. T. distributed up to September 15, among the states, was 19,613,295 pounds. In addition there has been distributed 1,798,988 pounds of blasting powder and 2,731,813 pounds of hand-grenade powder. Among other materials of this nature distributed among the states were 6,560 pounds of dynamite, 267,600 pounds picric acid, 638,409 detonators, 131,874 exploders, 75,689 electric blasting caps, 27,840 feet of fuse, 7,340 yards of detonating cord, and 198 tampers.

TRY NEW GARDEN VARIETIES

Excellent Plan to Test Out Recently Introduced Plants in Addition to Old Ones.

Most gardens are large enough to enable the gardener to try a few new varieties each spring. This is a good idea. It is hardly safe, nor is it true generally, that the old, tried varieties are the best that can be had. There are many new varieties being introduced every year and why not test out a few in addition to the old favorites?

"Go And Get It"

Marshall Neilan in his latest photoplay "Go And Get It," a First National attraction, which comes to the New Kendrick theatre, on Friday and Saturday, April 28 and 29, has chosen a probable development as the force in back of the dramatic story which the picture shows. A surgeon has arranged for the body of a murderer which is to be hanged. He transfers the brain of the murderer to the skull of a living ape. The combination of the enormous strength of the ape and the brain of the murderer causes a reaction that provides one of the most baffling mysteries ever conceived by an author, and the unraveling of which gives opportunity for a dramatic love story filled with thrills and surprises.

In the opinion of surgeons the idea is not beyond the bounds of what may be expected. Means have already been discovered for treating and operating on the brain. Injections into the base of the brain are daily improving the status of imbecilic children and even grown people. Removal of foreign matters from the brain are so common now as to excite no comment. More and more is being learned of the brain every day and the operation upon which the story of "Go And Get It" is based, may be a matter for accepted science within a few years.—Ad.

SPROUTED OATS IN SUMMER

Succulent Properties Do Much to Maintain Egg Production During Whole Year.

It will pay to continue the feeding of sprouted oats to the laying hens throughout most of the summer. There is only a short time in the spring when full advantage can be taken of natural green feed. It soon loses its succulent properties, however, and it will be an advantage to return to sprouted oats. It will do as much to maintain the egg production during the summer as silage does to maintain milk flow in the fall and winter.

INCREASED PROFIT ON EGGS

Where Graded Properly and Quality Maintained Higher Price is Always Obtained.

If market eggs were graded and quality maintained on the way to market, the value would be increased at least five cents a dozen. This would put a large additional sum in the pockets of producers, while greatly increasing the reputation of shippers in the markets of the nation.

Cameron News

"The Hoodooed Coon," a three act farce, to be given by the Cameron school, April 27th at 8:00 p. m. Characters are as follows:
Misery Moon - Elsie Wegner
A Hoodooed Coon - Herbert Mielke
Gideon Blair - Wilbert Brunstiek
A Millionaire - Slick as a Whistle
Tom Rissle - Fred Wegner
Hiram Tutt - An Awful Nut
Patrick Keller - August Hartung
A Ticket Seller - Minnie Blum
Samatha Slade - A Poor Old Maid
Rosebud Reece - Martha Abitz
Her Charming Neice - Minnie Blum
Paula Maleek - A Bolshevik
Tulu Pearl - Bertha Hartung
A Jazz Time Girl
Admission 10c and 20c.

Elsie Wegner, Ida Silflow, Henry Wendt, Gus and Carl Kruger and Herman Meyer, were the Sunday dinner guests of Miss Martha Silflow.

A double surprise party was given at the Silflow Bros. home last Sunday afternoon, the occasion being Otto Silflow's and George Larson's birthday. At 5 o'clock a delicious lunch was served consisting of potato salad, deviled eggs, sandwiches, cake and coffee. All present enjoyed a very pleasant afternoon.

Mr. and Mrs. Carl Geike of Colorado, are visiting Mr. Geike's aunt and uncle, Mr. and Mrs. Carl Hartung.

Mr. and Mrs. A. H. Blum, Etta and Minnie Blum, Martha Abitz and Herman Silflow, spent Monday evening at the Rev. Rein home.

Miss Laura Blum returned to Kendrick, Monday, after spending several weeks with her parents.

The Easter service was well attended last Sunday.

Mr. and Mrs. Ed Wegner of Big Bear ridge spent Easter with relatives here.

Friday, April 14th being the seventh anniversary of the wedding of Mr. and Mrs. August O. Wegner and Rev. and Mrs. E. A. Rein, the two families commemorated the day by having dinner together at the home of the latter. A few callers dropped in during the afternoon and wished the couples many happy returns of the day. We hope they will spend many more anniversaries together.

Miss Helen Mielke is assisting Miss Woller with store work.

The school election was held here last Saturday and as William Hartung's term had expired, Aug. O. Wegner was elected as trustee.

It almost looked like we had made a mistake in the months, last week. Instead of seeing the sunshine in April it snowed.

Mrs. M. Bleck of Kendrick, is visiting her daughter, Mrs. Brunstiek.

NOTICE

If the parties who took the double-trees, clevises, log chains, etc., where the road work is being done on Powell hill, will return same, no questions will be asked. 161-t

EGGS FOR HATCHING: R. C. Reds \$1.50 for 15; also White Leghorns, \$1.00 for 15. Mrs. Frank Roberts, Kendrick, Phone 4916. 16-4p

Snowflakes All Hexagonal. One of the odd facts in connection with snow crystals is that practically all of the hundreds of different varieties are hexagonal in form.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah.
James Albert Craig, Plaintiff,

vs.
All Unknown owners of and all Unknown Claimants to any right or title to, or interest in, or lien or claim upon the East half (E½) of

the Southeast Quarter (SE¼) of Section Four (4), and the Northeast Quarter (NE¼) of the North-east Quarter (NE¼) of Section Nine (9), all in Township Forty-one (41) North of Range Five (5) West of the Boise Meridian, containing 120 acres more or less, excepting therefrom six acres occupied by the right of way of the Washington, Idaho & Montana Railway Company, running in an easterly and westerly direction across said land, Defendants.

The State of Idaho Sends Greeting to each and all of the above named Defendants:

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To quiet title to the East Half (E½) of the Southeast Quarter (SE¼) of Section Four (4) and the Northeast Quarter (NE¼) of Section Nine (9), all in Township Forty-one (41) North of Range Five (5) West of the Boise Meridian, containing 120 acres more or less, excepting therefrom six acres occupied by the right of way of the Washington, Idaho & Montana Railway Company, running in an easterly and westerly direction across said land.

And you are hereby directed to appear and answer said complaint within 20 days of the service of this summons, if served within said Judicial District, and within 40 days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Leo Raaberg spent the week end in Clarkston with home folks.

Joe Piper of Potlatch ridge went to Lewiston Thursday afternoon on business.

Mr. and Mrs. Frank Wilken, Mr. and Mrs. Will Wolf were dinner guests last Sunday at the home of Mr. and Mrs. Herman Wolf of the Fairview community.

Mrs. Dave Waltz and son, Archie, returned home, Saturday, after an absence of several days.

C. H. Martin of Clarkston, representing the Spokesman-Review, was in Kendrick on business the first of the week.

An interesting event took place in Moscow last Friday when the Business Women's Pep Club put on a fashion show at one of the Moscow movie theaters. Miss Florence Holada, under the fictitious name of Florence Adams, had an important part. The Star-Mirror commented as follows: "Miss Florence Adams, impersonating Alice Blue Gown in song and costume, was deemed one of the best liked numbers by all present.

A traveling salesman says there is a vast difference in the games men play in the various towns in his territory. In Moscow they play poker. At Troy horseshoes is the popular pastime while Juliaetta at certain seasons of the year they are perfectly dippy over croquet and Finch. Kendrick is full of pinochle sharks and the Cameron folks play "500". Leland has some checker fiends and Southwick plays just cards. At Spokane they don't gamble at all—just hold you up.

The case between Jim Fonburg and Earl Langdon, mentioned in last week's paper, was compromised and settlement was made to Mr. Fonburg for half of his claim, which amounted to approximately \$65.

T. P. Fisher of Crescent returned last Saturday from a trip to California and South Idaho points. He spent a greater part of the winter in California, stopping in South Idaho on his way home, to visit friends.

Mr. and Mrs. Carl Wegner went to Cameron last Friday to visit at the home of their son, August.

C. C. Catlett, who returned recently from American Falls, Idaho, said it is not very difficult to purchase land in that country. All that is required for the first payment is to pay up the back taxes and long terms on the balance. They have had too many successive crop failures there.

Sylvester Kazda of Southwick spent the week end with relatives in Lewiston.

County Assessor Gemmill of Moscow was transacting business in Kendrick last Saturday.

T. Y. Ellis, who operates the water pumps for the N. P. at Kendrick and Troy, is taking a vacation from his arduous duties. He left, Monday, for Walla Walla, Dayton and other inland points. T. Y. said he didn't want anyone with him on this trip as he was going out for a real time.

Mrs. R. D. Newton and daughters returned last Saturday from Moscow.

Julius Giese of Fix ridge was in Kendrick, Monday, on business. He said he had lived in the Potlatch for half a century, more or less, and this spring is the latest in history.

A daughter was born to Mr. and Mrs. E. A. Denbald, Saturday, April 15. She has been named Margarette Arlene.

E. E. Bechtol was transacting business in Moscow the first of the week.

G. S. Porter was elected a member of the board of trustees of the Culesac schools last week.

Mrs. A. G. Wilson went to Lewiston, Tuesday, to visit her mother, Mrs. Metcalf, for a few days.

Mrs. M. V. Thomas returned, Tuesday afternoon, from a visit at Lewiston.

Mr. Starr and Frank Lyons of Linden were Moscow visitors the

first of the week.

A report came from Kansas the first of the week that swatting flies was the popular pastime there. Snow shovels were still in vogue here.

The many friends of Mrs. Jody Long will be glad to learn that she is slowly improving in health. She has been quite ill for the past month, following an attack of influenza.

At the Easter service at the Methodist church last Sunday evening every seat in the house was taken and many had to stand during the program.

State Inspector Wilson looked over the new Kendrick theater Thursday and approved of it in every way. He said the people of Kendrick ought to be proud to have such an up-to-date, well equipped show house. He said it would pass fire inspection in every way and was thoroughly sanitary.

Mr. and Mrs. Ernest Bolon went to Lewiston last week to visit Mrs. Bolon's folks. Ernest returned, Thursday morning, but his wife will remain there for some time.

There will be music and special musical numbers at the moving picture production at the high school tonight.

Federal court will open at Moscow, May 8th and continue until May 12th.

A four-piece orchestra, consisting of piano, violin, flute and cello, is rehearsing for the opening of the new Kendrick theater, April 28. All four musicians are artists and the combination of the four instruments is a most beautiful one. Mrs. McCrea will be at the piano, Walter Thomas, violin; Harold Thomas, flute and G. G. Olafield, chello.

One of the most daring aerial stunts ever registered by the motion picture camera occurs in Marshall Neilan's latest big photoplay of newspaper life, "Go and Get it." This amazing picture will be the first National attraction at the "New Kendrick" Friday and Saturday, April 28 and 29.—Adv.

Cameron,

Idaho

The Cost of Rotting Buildings now running into millions

A ROTTING building is also a lute waste, because a small investment in paint will save it. A building that is not protected by paint must either be rebuilt or repaired in a few years at a costly figure.

Check the costs. Compare the prices of paint and lumber. Can you afford to bear the expense of rebuilding or repairing your home, when to save it costs so little?

When you paint, make an additional saving by using the best paint. It spreads easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

But more important, the best paint serves five or more years longer than "cheap" paint.

The best paints are scientific in formula and preparation. We've been making them for 73 years.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.

Free Advice on Painting

Ask our agent for advice, color cards, etc. Ask the Fuller Specification Department about the most desirable color schemes, color harmony and any other details.

Makers of Rubber Cement Floor Paint, All-Purpose Varnishes, Silken-white Enamel, Fifteen-for-Floors Varnish, Washable Wall Finish, Auto Enamel, Barn and Roof Paint, Porch and Step Paint, and PIONEER WHITE LEAD.
