

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns
of Neighboring Papers.

Deary Press: It is announced that the big sawmill at Potlatch will resume at full capacity next Monday. The mill starts with upward of ten million feet of logs in the pond and 70 or 80 cars yet to unload, on the tracks. Within a few days after the starting of the mill the company's logger will be put into service to haul in the logs from the various camps. It is not stated at this time how soon cutting in the woods will begin.

During the past week the steel crew has assembled ties and steel at Princeton, where two miles of track is being laid. E. E. Grannis has been made foreman and clerk of the camp at Princeton, leaving here this week to assume his duties.

After completing its work at the camp the steel crew will get out ballast for the Washington, Idaho & Montana railroad, indicating that a great deal of heavy work on this line is to follow the recent months of inactivity. Lumber shipments from Potlatch are increasing as building activity throughout the country shows a greater revival.

It is felt that the resumption of work by the company at this time, the beginning of operations on a gradually increasing scale, and that it is only a question of time until the forest will be resounding with its old time hum of industry. With work in the camps going again the whole country will be benefited.

Troy News: Tuesday seemed to be an unlucky day at the Raymond Harland home. Mr. Harland came to Troy after some things and while here the chicken house was destroyed by fire. On arriving home Mr. Harland got off the wagon to open the gate letting his son drive the team through. He did not notice the two year old girl who started to climb on the wagon. When the team started up the girl fell to the ground and the wheel passed over her arm. Fortunately no bones were broken but the meat of the arm was badly cut and bruised.

Julietta Record: Manager Wm. Fields has now got the Julietta baseball team lineup for the season and secured a schedule of games which will keep them busy. The team is composed of a splendid set of players and it is believed the boys will give a good account of themselves before the season is over. Following is the lineup of the team: C. Clark, catcher; Scott Ross, pitcher; Alquist, first base; Crittenberg, second base; "Shorty Skip," short stop; J. Storassli, third base; Elmer Clark, left field; Ed Carlsson, right field. Position of center field to be filled.

Genesee News: The county commissioners in fixing the salaries for county employes for the coming year, according to a news dispatch from Moscow, have made but few changes. The only increase was in the case of the county engineer, whose salary is increased \$200 per year. By the elimination of one clerk in the auditor's office a saving of \$120 a month is made. The commissioners will meet again on Monday, May 22.

Star-Mirror: According to a long distance call from the Star-Mirror correspondent at Potlatch, Dewey Campbell, 21 years old, an employe of the Potlatch Lumber company, apparently crazed because of the refusal of pretty 17-year-old Gunhild Asplund, to marry him, went to the home of the girl's parents, Mr. and Mrs. Hugo Asplund, near Potlatch, about 10 o'clock Sunday night and after firing through the window at the girl who was sitting at the piano playing the bullet missing her head by a narrow margin he went into a field a short distance from the house and fired a bullet into his own brain death evidently

NEW KENDRICK'S GRAND OPENING

Greeted by Packed House of
Enthusiastic Movie Fans

A packed house greeted the grand opening of the New Kendrick theater last Friday evening. Every seat was taken and many had to wait for the second show. The gratifying feature of the evening was that criticism was entirely lacking, but there was praise in abundance. Everyone was not only satisfied, but in addition was delighted. The pictures were clear and snappy and as good as one could see anywhere—not barring cities of any size. One of the pleasing parts of the evening performance was the orchestra music, which was really delightful. Those who took part were Mrs. McCrea at the piano; Walter Thomas, violin; G. G. Oldfield, cello; Percy Ware, drums; R. D. Newton, clarinet. For the Saturday night show, Harold Thomas was a member of the orchestra and also rendered a beautiful flute solo, which was much appreciated.

There can be little doubt that with such an auspicious beginning, the New Kendrick is going to be one of the most popular places in the Potlatch country. It is a splendid little theater and will get the patronage.

A remark overheard after the first show that was apparently the consensus of opinion of the entire audience was in substance as follows: "Why, I had to pinch myself to wake up to the fact I was in Kendrick. It seemed like a dream". Rather a definite statement, but none the less true. Kendrick will have to grow considerably to get beyond the pace that the New Kendrick has set.

Ericksons Entertain

Mr. and Mrs. F. E. Erickson gave a most enjoyable card party to a number of their friends last Tuesday evening. Four tables were devoted to "500". Small American flags were used for keeping score and a clever arrangement used for deciding the winning table. Mrs. Frank Boyd had high score and Mrs. John Kite received the consolation prize.

Refreshments consisting of fruit salad, sandwiches, pie, coffee and cake were served.

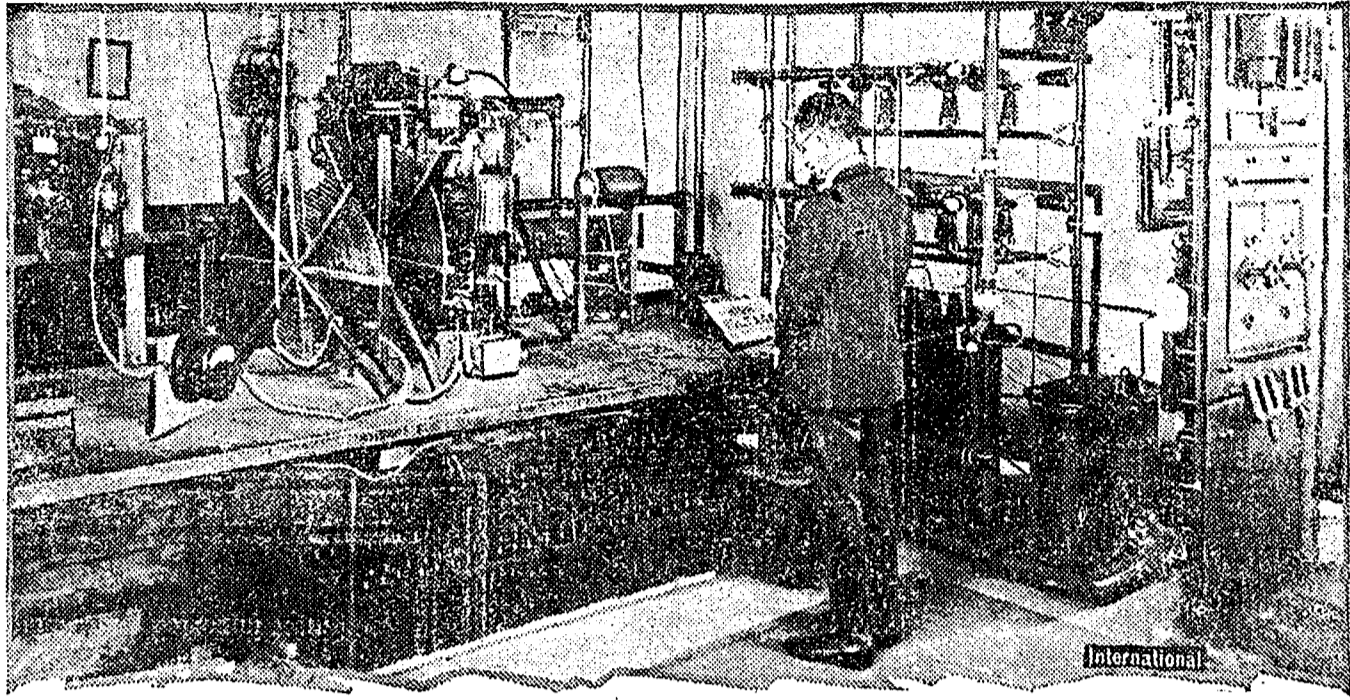

Those present were: Messrs. and Mesdames Ed. Long, Boyd, Leith, Kite, Hanson, MacPherson; Miss McAllister, Harold Hanson, Adolph Wegner and Marvin Long.

being instantaneous.

Campbell and Miss Asplund had been keeping company for some time. Recently the girl had repeatedly made efforts to break their friendly relations as Campbell had become insistent that she should marry him. On several occasions when she had refused to promise him her hand he had threatened that if he could not have her no one else should and that he would kill her and himself. Early Sunday evening he visited the Asplund home and asked for the girl but she refused to see him. It is thought that he went back to Potlatch and got his gun returning to the Asplund home with the intention of killing the girl and then shooting himself. It is supposed that he was not aware that his effort to kill the girl had been ineffective when he killed himself. The bullet fired at Miss Asplund went over her head lodging in the wall just over her head.

Coroner Glen Grice and Sheriff John L. Woody were called Monday morning and after the investigation decided that Campbell's death was a clear case of suicide and that no inquest would be necessary. Coroner Grice succeeded in locating Campbell's father at a small town in western Washington. The body will be held at Potlatch awaiting instructions from him.

Greatest Radio Broadcasting Station

The radio broadcasting room of the General Electric company at Schenectady, N. Y., showing the apparatus which, three times every week, broadcasts music and entertainment to thousands of amateur radio operators.

Kendrick 6, Culdesac 5

The baseball game played last Sunday between Kendrick and Culdesac resulted in a victory for the local team by a margin of one score. Considering the fact that it was the first game of the season, it was a good one. While there were frequent errors on both sides in the first few innings, the latter part of the game was well played.

The battery for Kendrick consisted of Forest, Herres and McCrery; for Culdesac, Boyer and Green. McCrery pitched a good game, allowing four hits and three walks.

Green's pitching was the feature of the Culdesac team.

The "younger generation" of players—Wayne Herres, Cecil Chamberlain and Egnaz Flaig, showed up well and handled their positions in good shape. Herres, who caught several innings at the end of the game, bids fair to become a sensation behind the bat. He handled the ball like a veteran.

The lineup of the locals follows: Forest, c; McCrery, p; Wegner, 1st b; Don McCrea, 2nd b; Walter Thomas, 3rd b; Cecil Chamberlain, ss; Frank Boyd, lf; Egnaz Flaig, cf; Wayne Herres, rf.

Blaze in Dentist's Office

Monday, during the noon hour, smoke was seen issuing from the roof of the drug store building. An alarm of fire was sounded and shortly after a volunteer fire company was soon chopping holes in the roof in search of the origin of the smoke. After several fruitless attempts, the blaze was located in Dr. Veon's office. A garden hose was brought into service and soon extinguished the fire, although a great deal of damage was done to the dental furniture and fixtures of the office.

Dr. Veon is having the office repaired and went to Spokane yesterday to get equipment to replace that which was damaged. Both the building and contents were covered by insurance. The origin of the fire was unknown.

H. Munsterman Writes

"You sure gave me an awful jolt in your Editorial with all those \$ marks. Come to find out that I am nearly a month behind with my subscription, so will not take time to get a money order but will send a check at once. My nerves though settled down a bit when I read about the trip Mr. and Mrs. Deeter had touring in California. Am awfully well pleased that they liked our camp so well and hope if any of your readers should come to Oakland that they will look us up. We have had several from that part of Idaho. —Mr. Snyder of Orofino was here, and Mr. Parrot of Spokane (formerly of Leland, Idaho,) and just last night had a Spokane car here. Hoping to see you all here in the near future. Yours truly, H. Munsterman."

C. C. Catlett went to Pullman, Thursday, on business.

Kendrick High School Play

There is a very keen interest in the coming high school play, "When a Feller Needs a Friend", which will be given at the New Kendrick theater, Saturday evening, May 13. It is a three-act comedy and is said to be one of the most consistent laugh-producers of the day. There is an exceptionally talented cast of characters and they are receiving valuable training under the direction of Miss Dermott and Mr. Carlisle.

Tickets will be on sale next week for this performance. It was decided to charge 50c for adults and 25c for children.

Change Chautauqua Dates

A change in dates for the Kendrick Chautauqua is announced this week by the Ellison-White Company. The change was made necessary by an error in routing. The dates are now definitely fixed for June 20 to 24, inclusive.

Councilmen Met

The town council held its regular meeting Tuesday night and after allowing bills etc. discussed a number of matters concerning the welfare of the town in general.

The matter of purchasing more ground to enlarge the cemetery was brought up and referred to the proper committee. There are very few lots left in the cemetery so it will be necessary to make arrangements to increase the size of it before long.

The Board authorized a committee to meet with the Kendrick Highway commissioners at their regular meeting, which occurs Saturday. The committee will take up the question with the commissioners of making a change in the road at the town limits, near the mouth of Brady gulch. A plan has been suggested to make a concrete viaduct across the creek at the mouth of the gulch and put a fill at each end. This would eliminate the curve in the street around the Charles Riggle property. Main street would be continued straight ahead and would pass behind the old Nelson property on a straight line to the mouth of Brady gulch.

The matter of putting in a street light near the Harry Fowler residence was referred to the street and alley committee for final decision.

There being nothing further to bring before the Board, the meeting adjourned.

Parent's Day

Wednesday, May 10, has been set aside as Parents' Day at the Kendrick schools. On this day patrons of the school are most cordially invited to visit the different grades and see what work has been and is being accomplished by the pupils. Exhibits from the manual training domestic science and other departments will be on display. The hour has been set for 2:30.

To Enforce Rodent Control

Farmers of nineteen communities of Latah County have voted to have the Board of County Commissioners enforce the State rodent control law in those communities and men nominated by farmers of each community were appointed as local inspectors, or supervisors, by the County Commissioners at their recent meeting. This action is a part of the general squirrel control campaign being carried on in the county.

Communities tributary to Kendrick that have voted to have the rodent control law enforced and the supervisors appointed for those communities by the County Commissioners are as follows:

Kendrick: J. L. Sturdevant, A. D. Ozmun, E. E. McDowell, Ira Gentry. American ridge; Frank Benschoter, Chris Maier, Albert Illi Big Bear ridge; Fred Gladder, R. A. Hughes, C. J. Bower, J. W. Emmett. Cedar Creek: A. Alexander, J. O. Carr, R. C. Winegardner.

The Idaho rodent control law provides that the County Commissioners, or men appointed by them, may go upon any land to ascertain conditions there. If it is found that rodents are being neglected the inspector may serve a notice on the owner notifying him to poison, kill, and exterminate the rodents on the land within ten days from receipt of the notice. If this is not done, the Commissioners, or their appointee, may go upon the land and poison the squirrels at the expense of the owner. The expenses are charged against the land as taxes and collected with the taxes. It provides, however, that the expense against any quarter section may not exceed \$16.00.

County Agent O. S. Fletcher reports that twenty-four special squirrel control meetings have been held in Latah County this spring with a total attendance of 401 farmers. Twelve hundred and sixty-six ounces of strychnine have been distributed thru the county agent's office to date. Farmers in all parts of the country are fighting the squirrel in an organized way and are getting results.

Kendrick vs Bovill Sunday

Kendrick and Bovill will cross bats Sunday afternoon on the local diamond. This promises to be a dandy game. There have been several changes in Kendrick's line-up, which is now considered a strong one. The game should be well patronized.

The three members of the local school board started their new official year in a most proper manner by visiting school all afternoon, Wednesday. They even go so far as to say they are going to do it again. This is a most encouraging symptom and will no doubt prove beneficial to the school in more ways than one.

Mrs. John Johnson of American ridge was a passenger to Lewiston on the afternoon train yesterday.

NEWS NOTES FROM KENDRICK SCHOOLS

Preparations Being Made for
High School Play

The following were neither tardy nor absent in the first and second grades during the month: Glen Jones, William Holt, May Sturdevant, Nettie May McDowell Elizabeth Carlson.

Dorothy Candler was the winner in the first grade spelling contest. Gladys Reece won the second grade contest.

Those who were neither tardy nor absent in the second and third B grades during the month were: Wayne Lewis, Ethel Cummings, Viola and Helena Schneider.

Jack Plummer won the "Poppy Spelling Contest" which was conducted in the second grade.

The second grade has just finished another reading book. This makes seven books they have completed this term.

Those of the third and fourth grade who have been neither tardy nor absent last month were: Helen Clem, Iva Johnson, Billy Wilmot and Max Oldfield.

Those of the fifth and sixth grades neither tardy nor absent were: George Atchison, Shirley Clem, Orabelle Hollada, Pearl Johnson, Hester Knepper, Hugh McDowell, Margaret McDowell, Thelma Perryman, Alma Swanson, Mae Freytag.

Pearl Johnson and Alpha Swanson met with a rather painful accident last Tuesday noon when a swing, in which they were both swinging broke and let them fall. In the fall Pearl was thrown almost twenty feet from the swing, sustaining a compound fracture of the left collar bone. Alpha did not fall so far but none the less hard. Her injuries consisted of a fractured nasal bone and several bruises and scratches about the left cheek and eye. Both girls received immediate medical care and are reported to be doing nicely.

The seating capacity of the New Kendrick Theater is 250. Every body wants to see the high school play, "When a Feller Needs a Friend." Get your ticket early as only 250 tickets will be sold.

Wednesday, May 10th, is Parents Day at school. Special effort will be made on the part of the school to acquaint the parents with the work that has been done during the school year. There will be exhibits from the different departments of the high school including manual training and domestic science, and the girls of the domestic science department will serve tea to the guests in the domestic science room.

Conductor Died on Local

"Jack" W. Kutzner, age 62, for 20 years in the employ of the Northern Pacific Railway, died at 12:30 Wednesday in the caboose of the local freight at Howell siding, 3 miles east of Troy. He had been off his run for six weeks because of an attack of influenza followed by pleurisy. He was apparently fully recovered when he started on his first run since his illness.

Mr. Kutzner was married and lived in Lewiston. His wife was visiting relatives in Minnesota when his death occurred. There are no children.

Republican Convention

According to the decision of the state committee, which was in session at Boise last Saturday, the republican state convention will be held at Wallace, August 22. The choice lay between Wallace, Moscow and Weiser, the former town finally winning when a vote was taken.

Herman Wilken came up from Lewiston, Saturday, to spend the week end with relatives at Cameron.

THE AMERICAN PRESS ASSOCIATION

The Parents' Day at the school house next Wednesday afternoon offers an opportunity for the patrons of the school to learn of the work that has been accomplished during the school year. A large attendance will demonstrate the fact that there is interest in the progress of the school.

It is said that in the past 19 years only two banks have failed in Wisconsin. The reason given for this record is that it is a dairy state. Butterfat makes a fat bank roll.

It is said that a rich bachelor who married his cook now has a fireless cooker.

Now father chews his big cigar,
While mother "rolls her own."
Dear sis is getting tailormades,
And likes to smoke alone.
Aunt Tabby likes a long cherooot,
And Willie shoots the snipe;
Big brother swipes his pills from sis,
And grandma hits the pipe—Ex.

Big Bear Ridge

Miss Rilla May will attend Taney school the remaining two weeks of the term.

Will Elliott is building a new barn on his farm here.

Mr. and Mrs. K. D. Ingle and children were visiting at the Mrs. Hupp home on Little Bear Ridge, Sunday.

Otis Gentry of Kendrick is working for Chas. Elliott during the spring work.

Everyone is rushing the spring work, so news is a scarce article these days.

"The Tiger's Coat," which comes to the New Kendrick Theater next Tuesday, May 9, tells a vitally interesting story of a young pure-blooded white girl. How she goes to the States and makes her home with the life-long friend of the girl's father, how he talks desperately in love with her but renounces her when he learns that she has deceived him and why, and how they are ultimately brought together again, forms one of the most highly entertaining screen stories of the day.—Adv.

WILL WED COLLINS

Miss Kitty Klernan of Granard, County Longford, Ireland, who is soon to marry Michael Collins, the Irish leader. Their romance is attracting as much attention in Ireland as did the romance of Princess Mary and Viscount Lascelles.

Get the Right Viewpoint.

A man is like a bit of Labrador spar, which has no luster as you turn it in your hand until you come to a particular angle, then it shows deep and beautiful colors.—Ralph Waldo Emerson.

ILLINOIS LEADS IN BUILDING

State Constructed 341 Miles of Permanent Hard Roads in 1920, Setting New Record.

One of the most interesting developments of the last ten or fifteen years has been the complete rehabilitation of the road, in its age-long role as one of the chief means of communication. The years that intervened between the coming of the railway and the coming of the motorcar saw a great silence and a great quiet settle down over vast numbers of the world's highways, says Christian Science Monitor. The motorcar, however, has changed all that, and today states and countries are vying with one another in the matter of road building, as to both quantity and quality. All honor, therefore to the state of Illinois with its 341 miles of new permanent hard roads, last year, "a record for such construction in any state in the Union prior to 1920."

COW WILL INCREASE INCOME

Animal is Most Efficient Money Maker on Farm and is Entitled to Good Treatment.

E. A. Hanson, dairy extension specialist at University farm, renews the inquiry, "Are you keeping cows or are they keeping you," in a collection of feeding suggestions recently issued by him.

"Put the cow to work," he says, "and she is the most efficient money maker on the farm today. A cow producing 25 pounds of 4 per cent milk daily makes one pound of butterfat a day, worth about 50 cents. This cow needs rations and hay and silage which should not cost more than 15 cents daily, leaving 35 cents daily above the cost of her feed. Where can you invest your time and efforts to better advantage? Give your cows a chance. They are all capable of doing better when properly fed."

Progressive Banking that keeps pace with Your Requirements

WITH constantly growing facilities, this institution is adequately prepared to serve you in every banking matter that may arise in connection with your business or personal affairs.

WE offer you every convenience of modern banking methods, coupled with a cordial spirit of co-operation—the earnest desire of our organization to help you transact business pleasantly and satisfactorily.

WHETHER your requirements are large or small, it will be worth while to investigate the advantages of a banking connection here. We shall be glad to talk with you at your convenience. There is no obligation involved.

Mrs. Elmer Keeler and family.

CARD OF THANKS

We wish to express our sincere thanks to the friends who assisted us during the illness and death of our son.
Mr. and Mrs. C. C. Catlett.

Find Highest Capability.

Try thyself unwearyedly till thou findest the highest thing thou art capable of doing, faculties and outward circumstances being duly considered, and then do it.—John Stuart Mill.

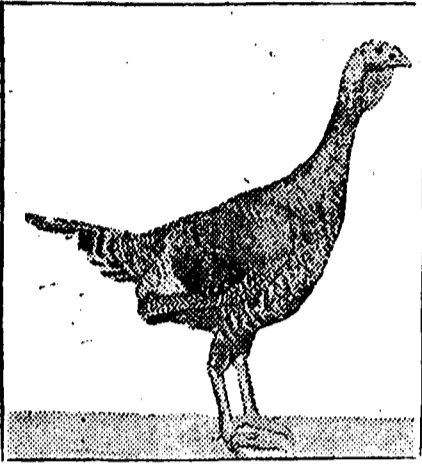

POULTRY

TURKEYS LAY THREE LITTERS

Poulters Hatched Later Than June Do Not Develop for Thanksgiving Markets.

(Prepared by the United States Department of Agriculture.)

Soon after mating turkey hens begin to look for nesting places and usually commence laying in from a week to 10 days after the first mating. One mating is sufficient to fertilize all the eggs of one litter, but the hens ordinarily mate three or four times before beginning to lay. All turkey hens, of course, do not begin laying at the same time, and in a flock of about 15 it may be six weeks or more from the time the first hen begins to lay until the last begins. Pulletts usually commence laying a little earlier than yearlings or older hens, say poultry

Bronze Turkey Hen.

specialists in the United States Department of Agriculture.

The average number of eggs in the first litter is about 18, although in individual hens it may vary from 12 to 30. Hens that do not have to be set can be broken up on becoming broody and made to lay a second or a third litter. The number of eggs laid in the second litter averages about 12, and in the third about 10, although there is considerable variation in the egg production of different hens.

Some turkey hens can be made to lay four or five litters, but this is not usually advisable, as poulters hatched later than June do not have a chance to develop for the Thanksgiving and Christmas markets and are not sufficiently mature by the following spring to be used as breeders. A hen that begins laying in the middle of March will usually finish laying her first litter early in April, her second litter about the third week in May, depending upon the number of eggs she lays and the promptness with which she is broken up on becoming broody.

Hens that are allowed to hatch and raise a brood of poulters after laying their first litter often begin laying again in the fall, but poulters hatched at that time are of little value except for broilers, as they require too much care and attention to carry them through the winter. Fall-hatched pullets begin laying late the following spring, but they are immature at that time and poulters hatched from their eggs do not develop into large, strong birds as do poulters from mature stock.

BEST FLOORS IN HEN HOUSE

Disagreeable Condition for Fowls is Caused by Moisture Coming to Surface.

The floor in any poultry house offers many problems. A large percentage of the moisture in a poultry house comes about through the floor. The moisture rises to the surface of the ground and evaporates, in many instances causing a disagreeable condition for the birds. The best floor in a poultry house is built with first a layer of gravel or cinders, in fact any open material that has large air spaces, then a layer of hollow block tile, next a very thin layer of cement. A good practical floor can be constructed as follows: Six to eight inches crushed rock, then a layer of tar paper and follow that with about three inches of cement.

POULTRY NOTES

Disinfectants are cheaper than disease.

Keep pure, fresh water always within reach.

Never feed your fowls musty grain of any kind.

Fowls, in confinement, to do well, need a variety of food.

Crowding induces disease and lowers the vitality of fowls.

The early hatched pullet is the one that begins to lay early in the fall, when eggs are high in price.

With proper care and food come plenty of eggs. Remember that "anything worth doing at all is worth doing well."

If cats or rats bothered you last year, plan to outfit them this season. Use plenty of inch-mesh wire netting. It does not take many lost chicks to pay for quite a piece of netting.

SOME FERTILIZER IS REQUIRED BY ONIONS

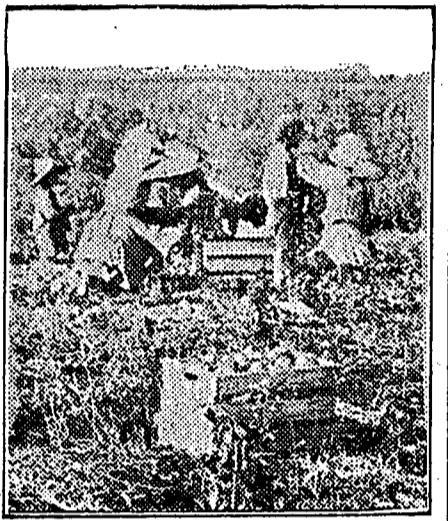

Spading Fork Should Be Used in Preparing Soil.

Poultry and Sheep Manure Are Both Good for Crop, but Should Be Used Sparingly—Steel Rake is Splendid Tool.

(Prepared by the United States Department of Agriculture.)

Onions require a mellow, rich soil; in fact, very few gardens are rich enough to grow good onions without some fertilizing. In preparing the soil break it up with a spading fork, working into the top three or four inches plenty of well-rotted manure, suggest garden specialists of the United States Department of Agriculture. Ten pounds of high-grade commercial fertilizer should also be spread over each square rod of ground and well raked into the soil a few days before planting the onion "sets." Poultry and sheep manure are both good fertilizers for onions, but must be used sparingly and well mixed with the soil to prevent burning the onion roots.

Onions grow very quickly and require frequent shallow stirring of the surface soil. The usual method is to plant the "sets" in rows about 15 inches apart and 3 to 5 inches apart in the rows, covering them just so the

Working in a Big Onion Field.

tops will be below the surface. A narrow steel rake is a good tool for working between the rows at first, but later as the onions attain some size a wheel hoe can be used. For the very first workings and for getting between the individual plants in the rows there is nothing better than a short piece of lath with three wire brads driven through it at one end, making what is known as a "scratcher." By and by the onion tops will get so large that they almost fill the spaces between the rows and hand weeding may have to be resorted to in order to keep the crop free from weeds.

About the time the onions begin to enlarge at the base, or to "bottom," as the growers say, it is a good plan to scatter a very little nitrate of soda, not more than two pounds to the square rod, over the soil between the rows and work it in with a hoe or rake. This will stimulate the growth just at the time that the plants most need a little extra food and will usually increase the yield.

BIG NEED OF BETTER ROADS

Engineers at Sea Regarding Highways Which Will Stand Up Under Modern Traffic.

A. R. Hirst, Wisconsin highway engineer, has declared that the best engineers today are at sea regarding the kind of roads which will stand up under modern traffic, or the traffic which will develop in a few years. Travel by air, to any considerable extent, is still a long way off, and for a good many years to come there will be urgent need for better and better highways.

Keep Coal Dry.

If coal is kept in a dry, airy place it will burn much better than if placed in a close, poorly ventilated cellar. Coal that is excluded from the air soon gets rid of its gas and the absence of this renders it more wasteful when burned.

How to Be Healthy

CARE OF THE SKIN

By L. DUNCAN BULKLEY, A. M., M. D.

THE skin is the largest and one of the most important excreting organs of the body. While it serves admirably as a covering of the frame, and gives symmetry and beauty and protection to the tissues beneath, it is continually performing a great service in regulating the body temperature, and with the kidneys and lungs serves to remove water and excretory substances from the system.

The total number of the sweat glands has been estimated at over 2,000,000, with a total length, when uncoiled of about 2½ miles. The average person in health gives off through the skin about two pints of fluid daily. That such perspiration is necessary is proved by the fact that when animals have been covered with varnish, death takes place. The story is told of a child covered with gold leaf to represent an angel at the coronation of Pope Leo X, who died in a few hours. The checking of this insensible perspiration by cold invites serious disease.

The skin is composed of two layers, the corium, derma or true skin, which makes the leather of commerce, and the epi-dermis, or outer scaly layer, which is continually shed and replaced from below. The derma contains the sweat and oil glands, also blood vessels and nerves, which latter give the sense of touch. The epidermis protects the soft tissues below, and when whole prevents injury from pus organisms and poisons. In vaccination this epidermis is scratched to allow the virus to be absorbed.

The hair and nails are similar epidermal structures which grow from their roots as they are cut or pulled out. In health the hairs are so firmly attached that the scalp has been torn off accidentally by them, but in disease they may fall by a touch. On the face they cannot be destroyed by the advertised depilatories, but may be made to cease by electrolysis, destroying the deep-seated hair papilla, at the hands of a skillful operator.

The hygiene of the skin is important, but harm can often be done by injudicious manipulation. The Turkish and Russian baths act like a cathartic to the skin, but their value in purifying the system is greatly overestimated by the public. They are being advised less and less by educated and thinking physicians.

Ordinary bathing is also very frequently overdone. Proper cleanliness is certainly desirable, but those who have been in the extreme arctic regions report that for seven months they have not taken a bath, or hardly removed their clothing, and yet have been in perfect health. Baths cannot cure skin diseases, and often aggravate them greatly. The cold bath suits some people, and, in health, if there is a good reaction with friction, seems to act as a tonic, but there are many who believe that they cause congestion of internal organs and are not really desirable.

Nor is it thought that warm baths should be taken too frequently, and except under certain conditions the daily hot bath tends to weaken rather than strengthen the system. The old-fashioned weekly bath served our forefathers well.

Soaps are not curative of skin diseases, and often their excessive and injudicious use does harm. Medicated soaps are a delusion.

Cosmetics, as a rule, do not do the harm commonly charged. Actors continually use them and do not seem to be injured, as they seldom apply for treatment.

Clothing is an important item in connection with the hygiene of the skin. Experience seems to show that wool next to the healthy skin allows of its best action, although with many some of the modern mesh garments seem to serve very well. It is questionable if silk is the best substance for underclothes. Care should be taken, both as to the weight and quality of under and outer garments, with change of seasons and weather, to prevent chilling and checking of "insensible perspiration," in order to keep in perfect health.

Undoubtedly very much disease of the kidneys and other organs is incited by carelessness along these lines.

It Costs You More to rot buildings than it does to let paint save them

CHECK the costs. Compare the prices of lumber and paint. They will show you how extravagant it is to allow buildings to depreciate for lack of paint.

And buildings do depreciate rapidly unless they are painted when they need to be. Paint saves the lumber. It protects your investment.

To enjoy the biggest saving in painting, use the best paint. It spreads more easily—saves labor cost. It covers more surface per gallon than "cheap" paint.

It serves five or more years longer than "cheap" paint.

The best paint is most economical because it is scientific in formula and preparation. We have been making best paints for 73 years.

They contain the finest materials. Our white lead, for instance, is PIONEER WHITE LEAD. It is super-purified and ground so fine that it will pass through a silk screen with 30,000 meshes to the square inch.

So with the other materials—pure linseed oil, pure zinc and pure colors—all of the finest quality, combined in Fuller's Paint in scientifically exact proportions with long-time skill.

Free Advice on Painting

Ask our agent for advice, color cards, etc. Ask the Fuller Specification Department about the most desirable color schemes, color harmony and any other details. Makers of Rubber Cement Floor Paint, All-Purpose Varnishes, Silkenwhite Enamel, Fitters for Floors, Varnish, Washable Wall Finish, Auto Enamel, Barn and Roof Paint, Porch and Step Paint, and PIONEER WHITE LEAD.

CREAM WANTED

THE PURITY CREAMERY Co. of Moscow, Idaho, now incorporated with a paid up capital of \$25,000.00. The owners and officers of this new but already well organized and established industry are N. Williamson, President; former owner of Williamson's department store. R. G. Wood, Vice President and superintendent; a confectioner of widely recognized ability; and R. J. Safford, former teller of the Moscow State Bank, Secretary-Treasurer.

The Purity Creamery Company is out to buy all the cream within a radius of 75 miles, guaranteeing you at all times highest prevailing Spokane prices, absolute correct tests and prompt payments. Moscow express and freight rates are lower—in other words freight and express rates are lower—in other words freight and express rates to Moscow are from 10 to 25 per cent lower than they are from say Moscow, Kendrick, Juliaetta, etc., to Spokane. You can save that difference and get at all times the highest prevailing Spokane price.

The Purity Creamery Co. of Moscow owns its own building, 3 floors 50x120 and a wing 50x50, has now installed the latest improved machinery throughout, with a butter-making capacity of over a ton every 8 hours. Ice cream machines, capacity 800 gallons every 9 hours. Eskimo pie factory of 5,000 pies daily. We manufacture our own ice and turn out 5 tons daily and are now installing a cold storage room for eggs with a capacity of 5000 cases. We are solely a home or Palouse country institution, asking no favors except what the right of good business warrants you to give us, spending every dollar we make back again to the farmers and producers of milk and cream.

Our products are the best that modern, sanitary, best machinery and equipment can produce. Backed by fully qualified makers of butter and ice cream.

Ship us your cream, buy a pound of Purity butter, a brick of ice cream or an Eskimo pie and prove for yourself that our products are better. Write us for shipping tags. We'll do the rest.

**MOSAIC DISEASE
HARMS POTATOES**

Adequate Measures for Elimina-
tion of Ailment Must Be
Taken Immediately.

TROUBLE SPREAD BY INSECTS

Situation May Be Somewhat Improved
by Partial Weeding Out of Worst
Cases—Yield Is Reduced
About 30 Per Cent.

(Prepared by the United States Department
of Agriculture.)

A survey of the Western states con-
ducted during the past summer by pu-
blichologists of the United States De-
partment of Agriculture shows that
unless adequate measures for the
elimination of the mosaic disease of
potatoes are taken immediately the
work of potato seed improvement in
the West will soon become extremely
difficult, if at all possible. Being of an
infectious nature, the disease is spread
in the field throughout the summer by
means of insects which carry it from
diseased to healthy plants, and it is
also transmitted with the seed tubers
from one generation to another.

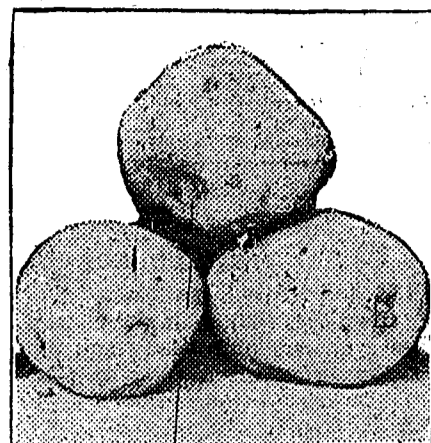

There is no evidence that a plant
once infected can recover and produce
a healthy progeny at any time. On the
contrary, the infected plants ordinarily
under certain environmental condi-
tions practically cease to produce tu-
bers in the third or fourth generation.
If only a partial weeding out of the
worst cases is practiced, the situation
may be somewhat improved, though
not in all cases and by no means per-
manently. The mild and the medium
stages of the disease left in the stock
serve as perpetual sources of infection,
and eventually the entire strain be-
comes diseased and is apt to "run out"
completely.

Reduces Yield 30 Per Cent.

It has been repeatedly demonstrated
in the East that the average reduction
of yield due to mosaic is about 30 per
cent. Precisely the same effect of this
disease was noted in the case of all the
varieties grown in different Western
states. Some remarkable instances
were observed during the last two
years of field observations carried on
by the department in which the reduc-
tion of yield in individual hills was in
direct proportion to the severity of the
infection.

The potato acreage in certain irri-
gated sections of the West has been
increased this year by one-third as
compared with that of the last year,
yet the yield in these districts is only
two-thirds of normal. Many growers
complain that where 300 sacks or more
were raised to the acre in former
years, only 100 to 150 sacks are obtain-
able now. This is in fields under good
cultural conditions, showing good

stands and a high freedom from
fungus and bacterial diseases. The
low yielding quality of the strains in
question no doubt is principally a
manifestation of mosaic. The need of
good seed in the West is well recog-

Healthy Irish Cobbler Potatoes.

nized and is growing every year, yet
only a meager quantity of even rel-
atively good seed is obtainable.

There is very little, if any, hope of
improving badly infected strains of po-
tatoes, the department specialists
think, therefore, prompt efforts should
be made to locate the most healthy
strains of the various important com-
mercial varieties. Since there is no
means at present of detecting mosaic
on the tuber the search should be con-
fined exclusively to the fields during
the growing season. When the best
strains are found they should further
be improved by the annual elimination
of all the diseased individuals.

Specialists Must Be Sought.
It is necessary to place this work in
charge of highly trained specialists,
since the identification of certain
minute and peculiar characters of the
disease requires a considerable experi-
ence and a great deal of pathological
knowledge. Furthermore, manifesta-
tions of mosaic under the varied cul-
tural and climatic conditions of the
West are often very obscure and not
yet fully understood.

POULTRY

FEED YOUNG GUINEA CHICKS
Fowls Are Natural Rangers and Do
Not Require as Much as
Ordinary Chickens.

(Prepared by the United States Department
of Agriculture.)

Guinea chicks are fed in much the
same way as chickens, but they re-
quire less feed as they are natural
rangers and can be trusted to find
enough seeds of weeds and grasses,
bugs, insects and green vegetation in
the fields to supply much of their liv-
ing. For the first 36 hours after hatch-
ing no feed is required, as the sus-
tenance from the egg is sufficient to
nourish them for this period. The first
meal may consist of a little hard-boiled
egg mixed with bread crumbs, or bread
may be soaked in milk, squeezed par-
tly dry, and fed in small bits. Clab-
bered milk also is very good.

Three times a day is as often as
they need to be fed, one feed consist-
ing of clabbered milk or the bread and
egg or bread and milk mixture, and
the other two of chick feed. If the
coop is placed in a field or pasture
where green feed is available, the
guinea chicks can secure this for them-
selves; otherwise, sprouted oats, dan-
dellion leaves, lettuce, or onion tops cut
fine should be furnished, say poultry
specialists of United States Depart-
ment of Agriculture. Water, grit and
fine oyster shell should be before them
always.

By the end of the first week the
young guineas will be finding enough

Guineas Pick Up Much of Their Food
in the Shape of Bugs and Weeds.

worms and insects to take the place of
the egg or milk feed, so this may be
eliminated and chick feed given morn-
ing and night. If clabbered milk is
available, however, it can be continued
with excellent success, since guineas
are very fond of variety in their ration
and it is conducive to quick growth.
As the birds grow older, whole wheat,
oats and cracked corn can be sub-
stituted gradually for the chick feed.

CARING FOR BREEDING FLOCK

If Fowls Are Overrun With Lice or
Mites, Fertility Will Be Ser-
iously Affected.

The breeding flock should be
watched to see that the fowls keep
in condition. If they are overrun with
lice or mites the fertility will be af-
fected seriously or destroyed. Care
is to be used, too, to see that the male

doesn't get his comb or wattles frost-
ed. If the rooster's comb or wattles
are frozen to any extent, his ability
as a breeder will be impaired, and
may not be recovered for several
weeks. When the weather is very
cold the males intended for breeding
should be placed at night in a box
or crate partly covered with a bag or
cloth. It is a good idea, too, to ex-
amine his majesty occasionally at
night to see that his crop is full, and
that he is not going thin—if he runs
at large. Roosters sometimes are so
gallant that they allow the hens to
eat all the food, with the result that
they get out of condition. If this hap-
pens the rooster should be caught at
least once a day and fed separately
from the hens.

PUSHING ROAD CONSTRUCTION

Marked Improvement in Economic
Conditions for Highway Build-
ing in United States.

Economic conditions for highway
building in all parts of the United
States have shown marked improve-
ment. Railroad facilities for han-
dling road-building material are much
improved. Labor conditions have
been such as to aid road building.
The increasing number of unem-
ployed men and the depression gen-
erally causing more men to be thrown
out of employment, have been favor-
able to contractors in pushing road
construction.

Kind Intervention.
A Pittsburgh man broke his leg chas-
ing a skunk. Providence sometimes em-
ploys harsh methods to protect humans
from the result of their folly.—Boston

Canadian Scenic Parks.

The scenic parks of Canada are: Rocky mountains, Jasper and Western lakes, in Alberta; Yoho, Glacier, Mount Revelstoke and Kootenay, in British Columbia; St. Lawrence Islands and Point Pelee, in Ontario. The animal parks are: Buffalo, Elk Island parks and Furmost Antelope reserve, in Alberta.

Leland Items

The Leland garage has recently changed hands, John Evans, who has run it for more than two years, has gone to Myrtle, where he expects to work in a blacksmith shop. Two of the Dawson brothers will have charge of the garage here.

Rev. DeYoung of Zilla, Wash., visited the DeWinter and Goudzward families and preached at the church Monday evening.

A. H. Smith is tearing down the Grandma Hartinger house and will build a nice little bungalow which will add much to the appearance of the place.

Mr. and Mrs. Mushletz spent the week end on American ridge.

Mr. B. Ward of Lewiston visited over Sunday with Mr. and Mrs. A. H. Smith.

Mr. Corkill preached a very good sermon at the church Sunday morning.

Mrs. Ed Flesman led the League in the evening.

The Claude Craig family visited Mrs. Craig's sister, Mrs. Fox, in Juliaetta, Sunday.

Mr. and Mrs. Woodward and children were dinner guests of Mr. and Mrs. Parks, Sunday.

Mrs. Stonebuner visited with Mrs. Ralph Oylear, Wednesday.

The Vester Evans family moved to Myrtle this week.

Mrs. Parks and Mrs. Koepf have been quite ill this week but we are glad to report them both convalescing.

Mr. and Mrs. Mathews, Mr. and Mrs. Hicks, all from Lewiston, have moved into Mrs. Hicks property here for the summer. Mrs. Hick is an old timer here and will be remembered as Mrs. Wm. Blackinton, but has recently changed her name.

The Epworth League social and debate Friday evening was well attended and all report an enjoyable evening.

George and Ed Flesman received this week, a shipment of four hundred full blood white Leghorn baby chicks.

Mrs. Hund entertained at dinner Sunday, Dr. and Mrs. Seeley and son, Paul.

Lloyd Kuykendall has built a new chicken house and has ordered one thousand baby chicks, which he expects to receive this week.

Our school closes Friday, May 12. They are preparing a school program to be given on the evening of May 12 at the I. O. O. F. hall.

Betty: "Oh kid! Isn't the New KENDRICK swell?"

Jane: "It's sure dandy, and I'm going next Tuesday and see if I get one of those beautiful vanity cases". 181-t

Cameron News

Miss Martha Meyer, returned to her home, here at Cameron after spending six months in Spokane.

Mr. Hedges of Everett, Wash., is visiting Rev. and Mrs. Rein. Mr. Hedges is agent for the Buick car.

The play that the school gave was well attended last Thursday. The

proceeds were over \$13.00.

Miss Laura Blum and little Miss Marjorie Newton of Kendrick visited at the Blum home, Saturday and Sunday.

Work was started on the new school house this week.

Albert Schultz, Sr., has been planning to start his new bungalow.

Mr. and Mrs. Carl Gerke visited friends on Bear Ridge, for the past week.

Quite a few people attended the shows at Kendrick, Friday and Saturday.

Miss Bertha Hartung took dinner with Minnie Blum, Sunday.

Miss Alma Finke of Southwick visited friends in Cameron, Thursday and Friday, of last week.

Carl and George Finke of Southwick, are visiting in Cameron this week.

All the farmers are busy putting in their crops, as it was a very late spring.

Glen Frederick, little son of Mr. and Mrs. Fred Newman was christened last Sunday at the Lutheran church.

Miss Etta Blum is assisting Miss Wolter.

Mr. and Mrs. Blum and daughters, Etta and Minnie, and Otto Sillow spent Tuesday evening at the Rein home.

The school will close Friday with a picnic and program.

Thriller Makes You Gasp

A photoplay of tremendous moments, big thought and tender romance is "The Money-Changers," Benjamin B. Hampton's masterpiece, showing for the first time at the New Kendrick Theater, Friday, May 12.

Gripping, thrilling, fascinating, heart-tugging from start to finish, the story takes the spectator, with its assemblage of wonderful characters, through a breathless sequence of adventure in New York—from the atmosphere of extravagance in which move the money kings, to the mysterious, rich, luxurious setting of the hidden underworld of Chinatown.

There is such a wealth of plot, and richness of moments of exquisite and tender love, delicate pathos and humor, contrasted with moments packed full of suspense, surprise and terror that "The Money-Changers" defies description. —Adv.

Bagpipe's Music.

The music of a bagpipe proceeds from three or four pipes. One of these, the chanter, is a primitive oboe with eight holes; the others called drones, sound each one low continuous tone.

Our Oyster Beds.

There are oyster beds along the Atlantic all the way from Cape Cod to Mexico, but the bivalves are not found in the open sea. The oysters would have been exterminated if it had not been for the practice of planting the beds.

GLEANINGS

G. S. Porter of Culesac was in Kendrick Sunday to attend the ball game. While here he looked over the new theater and was very much impressed with it. He said: "It is a little jewel and the people of Kendrick and the surrounding country ought to be proud of it."

John Halseth was a Moscow visitor last Saturday. He has been out of the store for several weeks on account of illness.

E. W. Lutz received delivery on a new Studebaker car last week. It is a beauty.

Mr. and Mrs. Byard Davidson and family of Colton, Wash., spent the week end on American ridge with relatives.

Mr. and Mrs. Wm. Rogers drove to Spokane in their car, Sunday, for a visit with friends.

Rev. Mitchell, Episcopal minister of Moscow, preached at the Presbyterian church here Sunday evening.

R. C. Floch and family of Port Orchard, Wash., spent the week end with Prof. and Mrs. Daniel. They made the trip in their car, coming over the Columbia highway. Mr. Floch is a brother of Mrs. Daniel.

Mrs. M. B. McConnell and daughter, Jane, returned, Sunday, from a visit with the G. S. Porter family at Culesac and the Moser family at Lewiston.

Passenger train No. 311, due to arrive in Kendrick at 1:20, Monday afternoon went off the tract near Palouse, the engine and three coaches being derailed. The train didn't arrive until after midnight. No serious damage was done, except track torn up.

L. G. Peterson arrived, Tuesday afternoon, from Moscow to transact business here.

Rev. W. H. Forsythe, district superintendent of the Methodist church, purchased a \$4,000 residence in Moscow last week.

A story going the rounds: "I suppose that girl in short dress is your daughter, that young man in riding breeches is your son, the woman in the tea gown is your charming wife." "Nope, your're wrong. The girl in the short dress is my grandmother, the young fellow in the riding breeches is my wife, the woman in the tea gown is my 12-year-old daughter, who likes to dress up in her great grandmothers dresses."

Pearl Johnson fell from a swing on the school grounds Tuesday, during the noon hour, and suffered a fractured collar bone. She was taken to Lewiston on the afternoon train where the fracture was reduced. Miss Agnes Jones accompanied her.

Mr. and Mrs. Paul Lind and children of Lenore returned home Tuesday after visiting at the home of Mrs. Lind's parents, Mr. and Mrs. M. O. Ruby.

The Kendrick highway district machinery has been doing good work on the roads of the district with Captain Forest in charge of the caterpillar and Admiral Raby at the wheel on the grader.

John F. Waide came over from Deary Saturday to spend the week end with his family.

Dr. A. Otteraaen went to Lewiston Tuesday evening in his car on professional business.

Invitations are out for a big birthday party in honor of Mrs. Herman Keopp at her home near Leland. The affair will be held tonight. Parties at the Keopp home are always most enjoyable occasions.

I went to a fountain with Mary, and met with an awful mishap; for I awkwardly emptied a bottle of soda all over her lap. But Mary was gentle and gracious for none is so tactful as she, and smiling with perfect composure, said sweetly "The drinks are on me".

The domestic science class of the Kendrick high school, under the direction of Miss Dirks, held a very successful candy sale last week. The gross receipts were about \$30. The class made the candy and furnished part of the sugar, etc.

John Dammarell underwent an operation for appendicitis at a Moscow hospital, Wednesday. The operation was entirely successful and he is getting along very nicely.

Luther Hampton of Lewiston was transacting business in Kendrick Wednesday.

A. N. Rognstad of Bear ridge received a shipment of two grade heifer calves the first of the week from Tillamook, Oregon.

E. G. Dirks of Lewiston was in Kendrick Wednesday to visit the local W. O. W. lodge.

John Halseth, on the advice of physicians, has decided to give up his work at the Kendrick Store and will spend the summer on the ranch on Bear ridge. He expects to leave this week.

The Epworth League girls will give a dinner at the club h. Fri. evening, May 5th., at 6:00 o'clock,

price 40 cents with pie extra. People from out of town who expect to be in that evening please take notice.

Bill Reece is transacting business in the Clearwater country.

A representative of the Continental Oil Company was in Kendrick Wednesday to make arrangements for the shipment of a big oil tank from Lewiston. The tank is expected to arrive next week and will be installed on the property recently purchased by the company. The company plans to have the oil station in operation by June 1. There has been considerable delay as the titles to the lots had to be cleared. This has all been passed upon by the courts and the company now gives assurance that they will soon be in a position to give service to this territory, out of Kendrick.

James Ashton arrived the first of the week to visit his wife and little daughter.

The members of the Okoke Klouthman Club met at the home of Mrs. E. E. Bechtol, Wednesday evening. Cards served to pass the time very pleasantly.

Dr. and Mrs. Veon and little son, went to Spokane yesterday afternoon on business.

John: "Have you attended the New KENDRICK?"
Frank: "Sure thing, and I got one of their Safety razors Tuesday night." 18-1t

Linden News

Billy Meyer of Kendrick was at the C. H. Fry home several days last week erecting a blacksmith forge.

Mr. Weyen delivered a load of porkers to the Moscow market Friday in his truck, Lou Alexander accompanied him.

Delbert Mulkey of Long Meadow, spent several days visiting friends on the ridge. Herman Long accompanied him home Saturday.

Mrs. O. H. Hunt spent Friday afternoon with Mrs. Fry.

Frank and Arthur Foster spent Sunday afternoon with Ted Vaughan.

Mrs. Joe Perry and children of Juliaetta are visiting at the home of her parents, Mr. and Mrs. James Garner.

Mrs. Keeler is visiting her daughter, Mrs. Gus Farrington, this week.

Mrs. Foster and daughter, Allie, spent Sunday afternoon with Mrs. Clarence Harris.

W. M. Benner spent Sunday at the McPhee home.

James Ball returned Saturday from a trip to Lewiston and Moscow where he received medical treatment.

Miss Elsie Darby returned Friday evening from Spokane, where she attended the wedding of her brother, John, Wednesday the 26. She also visited her sister, Mrs. Hastings in Coeur d'Alene.

A goodly number of people from Gold Hill, Cedar ridge and Crescent communities met at the Darby home at Crescent, Monday evening to charivari Mr. and Mrs. John Darby. The evening was spent socially and everyone enjoyed the good treats. The crowd made their departure about eleven o'clock, wishing the happy couple a long and happy wedded life.

We wish to correct a little mistake made in last week's paper regarding the funeral of Mr. Keeler, which was held in the church instead of the hall.

Baseball tournament at Lewiston, Idaho, May 28, 29, 30. Chandler car given away. Tickets on sale at Perryman's Confectionery. 18-1p.

George: "Hey Skinny! what did you get with your box of 'Frozen Sweets' Tuesday night at the New KENDRICK?"
Skinny: "Oh boy! It was a peach of a gold handle pocket knife. I'm sure going again next Tuesday." 18-1t

Zane Grey's Powerful Story

"The Mysterious Rider"

Being a Zane Grey story is comment enough to assure everyone an excellent evenings entertainment.

Tuesday, May 9

"The Tigers Coat"

will give you many a thrill,—many a moment of suspense—and a very great deal to think about after its all over.

also 2nd Chapter of the

'Winners of the West'

entitled

"The Flaming Arrow"

Friday, May 12

One Night Only

"Money Changers"

Who are the Money Changers? They milk the human soul of all it's kindness— They bleed the hearts of weak men and women— They market human flesh to the highest bidders— How they work in marble halls or Chinese dens— Using human beings as pawns in their crafty game, will thrill, amaze and inflame you.

Its a drama to haunt you. It will clutch your heart. It gleams with varied life, thrilling with action, throbbing with romance.

—Comedy—

Wore His Antagonist Out.
Roosters have different tactics when fighting and often display considerable brainwork. Recently, in a Cuban rooster fight, where a little rooster was pitted against a big fellow, the little bird looked at his antagonist and started to run around and around, with the big rooster after him. Then, when the big bird was out of breath, the little one turned on him and whipped him in short order.

Butterwrappers printed at the Gazette Office.
