

## THIRD TEST MADE IN SILENT READING

Shows Marked Improvement  
Over Previous Records

On Friday of last week the school children of all grades, except the first, were given their third and final Standardized Silent Reading Test of the year. Early last fall a test was given to determine just how the school stood in regard to silent reading. The test showed the school to be low in several grades. The 7th and 8th grades being the only ones that could be said to be up to the standard. The disclosing of this fact resulted in an early decision on the part of the faculty to, as much as possible, emphasize silent reading and encourage development along this very important line.

The second test was given in February and showed that decided improvement had been made. In this test all grades except the 5th and 6th, which had been very low in the first test, came up to or above standard. Even these grades came very nearly up to the standard. The improvement was very encouraging and served as an incentive to better work.

The third measurement, taken Friday, was to show the net gain for the year and proved to be more than gratifying. Every class came far above standard, except the 5th and 6th. The Fifth grade came slightly above standard and the Sixth grade fell slightly (.08 of a point) below.

A clearer picture of the improvement might be had by taking a few representative grades and follow them thru the year. Let us take a grade from each room, say the 4th grade, 6th grade, 7th grade and the 11th grade for the high school.

The 4th grade in the first test made 67 rate score (the standard is 70) and 12 comprehension score (the standard here is 12.7). In the second test they made 95 for rate (standard 77) and 13 comprehension (13.3 standard). The improvement was good tho not exceptional. In the last test the 4th grade made a rate score of 93 (standard 79) and comprehension score 18 (standard 15.3). This places the 4th grade almost up to the standard of the 5th grade.

The 6th grade according to the first test were about the lowest class in school. Their scores in the first test were, rate 69 (standard 90) and comprehension 12 (standard 18.5). Considerable improvement was shown by the second test which registered for them a rate score of 101 (standard 116) and comprehension score 17 (standard 18.1). Tho still the only class not above standard they made on the last test; rate 133 (standard 124) and comprehension 20 (standard 20.8). We can feel proud of their improvement even tho they are not yet quite as high as they should be.

Unlike the 6th grade the 7th grade was at the beginning of the year the strongest class in silent reading in the school. The first test showed a rate of 113 (standard 100) and comprehension 23 (standard 22.8). In the second test they made; rate 146 (standard 130) and comprehension 30 (standard 26). In the last test they achieved a rate of 162 (standard 132) and comprehension 32 (standard 27.3). While still above the standard the 7th grade is no longer the leading class in school as several others are now quite as good as they.

The improvement in silent reading in the high school was even more marked than in the grade. For example the 11th grade in the first test made 86 rate (standard 90) and comprehension 32 (standard 27.2). However in the second test they got; rate 122 (standard 98) and comprehension 37 (standard 31). In the last test the score stood; rate 151 (standard 94) and comprehension 42 (standard 28.6).

These classes represent very fairly what was accomplished in the other 6 grades taking the tests. The im-

## FARM LABOR SURVEY OF AMERICAN RIDGE

Made by a Kendrick High  
School Student

This survey was made on South American Ridge and includes seventeen farms. It is in co-operation with the economics class of the Kendrick High School and was made to ascertain the condition of the average farm labor.

Of these seventeen farms, I have classed them to the best of my ability. Of the five farms containing three hundred acres or more, three hire one man the year round. This is generally a local worker and they hire about four transient laborers during the summer months. These men are paid about three or four dollars per day and work from ten to thirteen hours. The local worker gets from fifty to seventy-five dollars straight thru and he works about eight hours in winter time.

These three have bunk houses which are well constructed and are lighted by gas or electric lights. On these farms there are electric lights in the barns of two and gas in the others. The other two farms keep two men for four or five summer months. These men sleep in the house, have well lighted barns and many conveniences not found on some farms. They receive from eighty to one hundred dollars per month and work on an average of eleven hours per day.

Nine of these farms have from one hundred and sixty to three hundred acres. Of these nine, seven keep one man during the summer months. He is generally a local worker, sleeps in the house and is treated as one of the family. He receives from seventy-five to ninety dollars for ten to twelve hours of work. They have all of the machinery handy and in good shape, and they also have good horses. The barns are all lighted by kerosene. The men usually are spending their time at home on Sunday.

The three others have from 80 to 160 acres and do not hire men except in haying and harvest time. These men are generally migratory workers and are only kept for about two weeks at a time. They are paid about seventy-five to ninety dollars and work from ten to twelve hours per day. They sleep in the barn as these people are renters and make no preparation for housing their help for so short a time.

All of the farmers interviewed, agree that it is easier to procure and keep help when they have things fixed up pretty well. They all say that the local workers can be depended upon the best but that the migratory workers are more often at home on Sundays to do the chores, because the local workers are more acquainted with the locality and they like to go home on Sundays.

Of the seventeen farmers, fourteen directly boss their farms and three have foreman. On these farms where one man is placed in charge, he must be a good man and his wages are from ninety to one hundred and ten dollars, varying with the season. He gets to drive the car and works from ten to twelve hours in the summer. These farmers say it is harder to hire men when they have a foreman.

These farms with the foreman are all big ranches from 310 to 600 acres and when the foreman runs a ranch for a while he thinks he owns the place. This makes it necessary to change foremen occasionally.—Walter May.

The Juliaetta second team defeated Kendrick's second team on the local diamond last Sunday by a score of 11 to 8.

Improvement was all that we had hoped for. It was not great or indeed exceptional, nevertheless very encouraging and gratifying to those interested in the development of our children.—L. A. D.

## Loren Bates Company to Delight Chautauquans

Three Artists of Sterling Worth Comprise the Loren Bates Trio  
Featuring Original Costumed Selections

"Quaint," "pretty," "fascinating," "charming," "delightful"—these are some of the most common expressions used to describe the program of the Loren Bates Trio, which will be the opening day musical feature at Chautauqua.

The unusual charm of the Bates program lies mainly, of course, in the individual talents of the three sterling artists who compose it. These are Loren Bates, tenor and dramatic impersonator; Letha Shriber, gifted soprano, and Helen Smith, pianist. But there is more than individual artistry underlying their success. There is a splendid program arrangement and a most excellent choice of the selections which these artists use. For instance, Mr. Bates and Miss Shriber sing some quaint old English duets which have probably never before been heard in the West. They are given in special costume and never fail to delight.

### Bear Ridge Meeting

There will be a meeting of the women of Big Bear Ridge held at the Taney School house on Thursday, June 1, at two o'clock. Miss Ada B. Irwin, home demonstration agent of the extension division of the University of Idaho will address the women on "Extension Service for Women", and will tell them what is being done in other parts of Idaho, and what can be done in Big Bear ridge community if the women desire to take up the work. Arrangements will be made at the meeting for any work that the ladies may desire to take up with Miss Erwin. The meeting has been arranged for by Mrs. A. D. Ingle thru the office of County Agent O. S. Fletcher. All ladies of the community are invited and urged to attend.

### Her Weight in Milk

Idaho Violet Posch Ormsby, a registered Holstein in the University of Idaho Holstein herd, produces her weight in milk every fifteen days.

Violet weighs 1502 pounds and is producing more than 100 pounds of milk a day, having recently completed a seven-day official record of 730.7 pounds of milk and 29.332 pounds of butter, thereby breaking the state record for milk production.

### May Festival Very Good

Although the weather was rather unfavorable for the May festival, given by the Kendrick school children, Thursday afternoon, it was a very pretty affair and a large crowd enjoyed it immensely. The children executed their various drills in a most creditable manner and showed that they had received splendid training. The interest that the children took in the drills was also an important factor in the success of the program.

Regardless of the frosty nights that cool the water, the old swimming hole in Kendrick is being visited quite frequently. It will be a popular resort during the next two months.

### Over The County

Juliaetta Record: The local chautauqua committee express themselves as highly pleased with the friendly spirit shown by the business men of Kendrick in their liberal patronage of the chautauqua to be held in Juliaetta. Practically every business man in town bought a season ticket.

Star-Mirror: Jack Lieuaillen, local electrician, is of the opinion that the radiophone will soon be a factor of considerable importance in his business. In fact several persons have already made known to him that they are intending to install radiophones and he believes that before next fall there will be a number of radio outfits in Moscow. The people generally are deeply interested and the great trouble just now is to get material.

The first radiophone in Moscow will be installed by R. R. Sherkey. It will have two stages of amplification, and will pick up communications as far away as the Pacific coast, making it possible to enjoy the concerts given by the Seattle Post-Intelligencer and the Portland Oregonian. The cost of the outfit, installed, is about \$200. The University Club, at the corner of Third and Van Buren streets, also expect to install an outfit in a short time.

### Kendrick Defeats Juliaetta

Last Sunday afternoon the Kendrick baseball boys demonstrated in a most emphatic manner that they could play ball, by defeating the crack team from Juliaetta by a score of 3 to 1. It was one of the best games played on the local diamond for years. Both teams were in the game from start to finish and it was a pretty exhibition of baseball. A large and enthusiastic crowd of rooters were in attendance.

The game opened up as a pitchers' battle with Scott Ross in the box for Juliaetta and Rocky for Kendrick. Both men pitched splendid ball. In the sixth inning Juliaetta substituted Harry Ross, who finished the game. Clark caught for Juliaetta and Herres for Kendrick. The baseball fans of Kendrick believe that the "jinx" is now off and that the local team will have a succession of victories for the rest of the season. The present status of the team shows two games lost and two won.

A game is scheduled for this afternoon with Juliaetta, to be played at Juliaetta immediately after their chautauqua program.

## SOME INTERESTING INFORMATION IN REGARD TO THE WORK OF THE KENDRICK SCHOOLS

Good Work Done in the Various Departments, Including  
Domestic Science, Commercial and Manual Training

The Kendrick high school is one of the smallest schools in the state giving commercial work. Owing to the size of the school it has been impossible to give a full commercial course but we are giving very successfully, typewriting, bookkeeping and economics. Next year commercial geography and commercial law will be given in place of economics. Professor Dale of our university has said: "It is a very exceptional course for so small a school."

In our typewriting this year every student has received the 30 word certificate, granted by the typewriting company to all students who can pass a fifteen minute test with an average of 30 or more net words per minute. In addition to this two students have received the 50 word bronze medal given by the same company.

In bookkeeping we have used as a text 20th Century Bookkeeping and Accounting. This text is widely used in business colleges and universities thruout the United States. The class has finished the work outlined for the first year which is a very thorough study of bookkeeping for the single enterprises (first semester), and the partnership (second semester). Next year they will take up corporation bookkeeping.

The economics class have had a profitable and enjoyable semester. During the last six weeks individual projects have been worked out and some original research work accomplished.

### Manual Training

The manual training class took up mechanical drawing for the first time this year. The boys have learned from this how to use an inking pen and how to read blue prints. This work dealt particularly with neatness and accuracy.

Besides this they have learned how to sharpen tools and keep them in good condition. They also have learned the best methods of cutting mortise and tenon joints.

Some of the freshmen have accomplished all the fundamentals necessary to make good furniture and are capable of turning out some very good furniture next year. Some of the boys have made wages by selling furniture which they made during manual training periods.

They have turned out some very valuable furniture and have also made things for the school. They have made three sand table, five typewriting desks for the typewriting department and a swing for the playground.

After they made these they made the following individual projects: three Tennessee cedar chests, one oak library table, two plain library tables, four study tables, one writing desk, one buffet, one chair and a settee.

Besides these they have made many minor articles such as magazine racks, taborets, plant stands, foot stools, handkerchief boxes and numerous other articles.

The boys are very proud of their work and feel like they have really accomplished something during the past year.—Egnaz Flaig.

### Domestic Science

What have we done in cooking in our domestic science department this year? This question is one of vital interest to the people of our community.

We have not only learned the art of cooking and serving delicious dinners, but how to select the proper foods, the best kinds of foods for every one.

Our first lesson was mostly rules regarding the cooking, canning and serving of vegetables. How proud

we were of our first canned food, which was tomatoes. Other seasonable fruits and vegetables were also canned. Jelly, conserve and pickles were made, and the cost of each carefully computed before being set away for future use at the dinners and luncheons.

The domestic science classes have served three dinners and two luncheons, at all times the food and serving have been highly complimented. In this way we have cut down the expense of the first semester.

It is customary for domestic science classes each year to leave something in the department and this year we have added something that has been needed very much. An iron and ironing board. The proceeds from the candy sale, which was given by the girls was used to pay for them.

But not only has the cooking been progressing wonderfully but also sewing. Among the most important things made in sewing are the cooking aprons, night gowns, gingham dresses and undergarments. We are now working on our last garment which is a blouse. We have made samplers of bands and plackets and learned to make the most important stitches such as the button hole stitch, the overcasting and the blanket stitch.

Among the other things of interest we have learned to use good taste in selecting a garment, the kind of material to use, economy in cutting the garments, and the selection of standard materials, which is an essential part in sewing.

You have just had a glimpse of what we really are doing in sewing and cooking, if you can't believe it come and see for yourself, our department is always open for visitors interested in the work.—Dorothy Stanton.

### The Graduating Class

Agnes Jones, president of the Senior Class and her sister Opal, entered high school in Kendrick, September 1917. They enrolled in the general course, and attended here for two years, when with their parents they moved to Montana. In 1920 they enrolled as juniors at Townsend, Montana. Last fall they again enrolled at Kendrick and are now finishing their high school course. Seriousness and reliability have always been characteristic of their high school work and we feel sure that their time in normal school next year will not be wasted.

Carrie Bunker entered school in Southwick in 1918. She attended there for one and one half years coming to Kendrick for the second semester in 1920. She is enrolled in the general course. She has always been a good conscientious student. At no time have her grades been in danger. We hope that Carry will find it possible to continue her school work as we feel that she is the type of a girl that the world needs.

Norla Callison, entered the high school in 1918. He is the only one to graduate of a class of 15 that entered with him. Norla has always been very dependable and is a good student, as well as a good basket ball player. We feel sure that we will hear from Norla at the University next year and our school will be creditably represented by him.

Rex A. Pickering began his high school work at Sandpoint, where he spent one semester, going from there to Brewster, Wash., where he studied for three semesters. After one semester at Moscow he entered K. H. S. and made sufficient credits to finish with the class of '22. It was not learned until yesterday that he would be a member of this year's graduating class, but by taking extra subjects he was able to finish in three years what is considered four years work. His high school record is a good foundation for his future college life.

## Kendrick Gazette

Ralph B. Knepper, Publisher

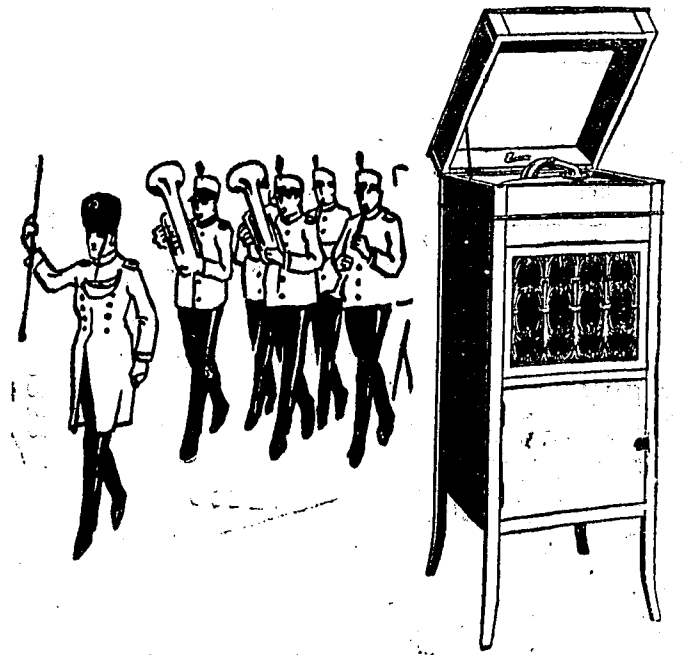

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

A "sucker dam" was installed in Asotin creek by the state game commission for the protection of trout. It is stated that the dam answers the purpose perfectly. A dam across Potlatch creek that would prevent the suckers from coming up in the spring, would make a good trout stream out of what is now an inferior one. Trout will not thrive in a creek that is infested with suckers and squawfish.

She never earned any money—she lives on an Ohio farm but she lives on almost every other farm. She is somebody's mother, maybe your own. She has earned nothing. No, but during her 30 working years she has served 432,938 meals. She has made 3,123 garments, 32,000 loaves of bread, 5,390 cakes, 7,932 pies, 1,500 gallons of lard. She has grown 1,432 bushels of vegetables, and has raised 7,660 chickens, churned 5,430 pounds of butter, put up 3,625 jars of preserves, scrubbed 177,725 articles of laundry, and she has put in 35,839 hours of sweeping and washing and scrubbing. At accepted prices for this work it is worth \$115,480.50. She can't retire on her savings—she has to keep on not earning. Now how do you define the ordinary woman's contribution to the family wealth?—Nebraska Country Weekly.

## BAND MUSIC

coming from the "New Edison" is so perfect that it is impossible to distinguish it from the original playing of the band.

The above pretentious model costs only \$145, and records, which, by the way, are twice as long as ordinary phonograph records, cost but \$1.00 for two selections.

The average home can hardly afford not to possess this wonderful instrument. We invite you to come in for a demonstration.

### Big Bear Ridge

Mr. and Mrs. A. N. Rognstad and children were visiting relatives in Clarkston, Wednesday.

Miss Emma Aas spent last week in Spokane.

Ole Kleth of Potlatch ridge spent the week end with home folks.

A. J. and Ingvold Aas autoed to Lewiston, Wednesday.

The Troy high school drove out in a large truck, Friday, for an outing at Atwater Lake while the Kendrick high school came out on Saturday.

Mrs. Ole Lien underwent an operation at a Spokane hospital Thursday morning and is recovering nicely.

Newt Heath of Texas ridge, spent Sunday with his brother, John.

Miss Marit Vogniid returned home from Coeur d'Alene, Tuesday, where she spent the winter.

Mr. and Mrs. Otto Alber and daughter, Miss Bernadine, were Sunday visitors at the home of Mrs. Kate Galloway.

Mr. and Mrs. Fred Gladden spent Sunday at the Ira Altig home near Deary.

### GOSLINGS READY TO MARKET

Advisable to Avoid Use of Young Stock in Raising Fowls—Old Birds Are Preferred.

Geese are birds of long life, sometimes living fifteen to twenty years, and ganders are at their best at three, four or five years. The use of immature young stock should be avoided, especially for the renewal of breeding geese, but for the production of early goslings for market, it is often the custom among breeders to use eggs from young geese, as these usually begin to lay earlier than older birds. Such a practice is perfectly proper, but for breeding stock, experienced breeders prefer older or well matured geese and ganders.

### BIG IMPORTANCE OF ROOSTER

Impossible to Get Best Results Without Use of Good Male—Is Half the Flock.

The male is half the flock. Without a good male it is impossible to get good results. It is more dangerous, however, to use a poor male than it is a poor female, for the reason that from one male bird a greater number of chicks carrying his blood will be hatched than where a poor female is allowed to remain in the flock.

### MALES FOR BREEDING STOCK

Not Advisable to Wait Until Last Minute to Select Fowls to Head Poultry Flock.

Don't wait until the last minute to buy males for your poultry breeding pens. If you do, the best will be gone and you'll have to take what's left. A breeder sells by process of elimination, disposing of the best first. So, the earlier you buy, the better will be the stock you get.

### Linden News

Mrs. Whistler was a caller at the A. Alexander home Friday.

I. E. Foster and son, Guy, spent the week end at home.

Ben Smith returned from Palouse, Friday. He went to Long Meadow Monday, to work.

Gus Farrington had a break-down in his sawmill Saturday and had to go to Lewiston for repairs, returning Tuesday.

Mr. and Mrs. Clarence Harris and children, Mr. and Mrs. Arthur Bohn, Frank Foster and Harold Gilchrist, went sucker fishing Saturday evening. They reported a good catch and lots of fun.

Mrs. Gilchrist and son, Robert, spent Monday with the Misses Hattie and Pearl Alexander.

Lou Alexander lost a milk cow last week by weed poisoning. John Michael also lost a two-year-old heifer. Everyone is curious to know what kind of a weed it is.

Mr. and Mrs. Frank Farrington went to Lewiston, Thursday, where Mr. Farrington will receive treatment for the cancer on his lip. They have equipped their truck for camping and expect to camp out for most of the summer for the benefit of Mrs. Farrington's health.

Mr. and Mrs. Francis Stevens, Grandma and Gertrude Keeler spent Sunday at Frank Farrington's.

Miss Carrie Allen visited Mrs. Darby, Saturday afternoon.

Mrs. John Carr spent Sunday with Anna Morrison.

Mr. and Mrs. Arthur Bohn spent Sunday at the Fred Smith home at Park.

Mr. and Mrs. Strom and family spent Sunday with Mr. and Mrs. James Ball.

### Cameron News

A surprise birthday party was given in honor of Miss Martha Silflow at the Silflow brothers home, Monday evening. The evening was spent playing games and having a good time. Delicious refreshments were served at midnight.

Mr. and Mrs. Blum and three daughters, Laura, Henrietta and Minnie, motored to Genesee, Tuesday. Henrietta and Minnie remained there for a few weeks' visit with relatives and friends, the rest returning Tuesday evening.

Henry Wendt, Mr. and Mrs. Carl Keopp and son, Walter, and Mrs. Brammar motored to Lewiston, Tuesday.

The new school house is growing rapidly and will be a great improvement to Cameron, as the old building was a disgrace to the entire community.

We all know summer is here, because the dust is beginning to fly.

### Exhaustive.

He (proposing)—"I've saved up enough to live at the rate of \$10,000 a year." She—"For how long?" He—"Oh, six months."—Boston Transcript.

### TURKEYS LAY EARLY IN DAY

Broodiness Can Be Discouraged by Confining Hens in Coop With Slat Bottom.

(Prepared by the United States Department of Agriculture.)

Turkey hens can easily be broken of their broodiness by confining them for two or three days to a coop with a slot bottom. They will mate soon after being let out of the coop and begin laying in about a week. The first two or three eggs of a litter are usually laid at the rate of one every other day, after which the hens ordinarily lay every day until they are broody, although sometimes they skip one day before laying the last egg of a litter.

There is no particular time of day when a turkey hen lays, but most of the eggs are laid in the morning, say poultry specialists in the United States Department of Agriculture. The following dates of laying and lengths of time remaining on the nest were obtained by watching a turkey hen during the laying season, and are typical:

Date	Time of laying	Time of leaving nest
March 27	3:00 p. m.	4:00 p. m.
March 28	11:00 a. m.	1:00 p. m.
March 31	8:30 a. m.	10:00 a. m.
April 1	11:30 a. m.	1:00 p. m.
April 2	4:00 p. m.	5:00 p. m.
April 3	11:30 a. m.	12:30 p. m.
April 4	8:30 a. m.	9:30 a. m.
April 5	8:00 a. m.	3:00 p. m.
April 6	8:00 a. m.	2:00 p. m.
April 7	8:00 a. m.	3:00 p. m.
April 8	10:30 a. m.	4:00 p. m.
April 9	10:30 a. m.	4:00 p. m.
April 10	10:00 a. m.	6:00 p. m.
April 11	10:00 a. m.	6:00 p. m.
April 12	7:30 a. m.	.....
April 14	.....	.....

### WATCH FOR INFERTILE EGGS

In Hatching Poultryman Has No Set Rule to Follow in Operating His Incubator.

Poultrymen should test their eggs before putting them under a hen or in an incubator and take out all eggs which are unlikely to produce good chicks. It is not inferred, however, that infertile eggs may be selected out for incubation. There is no known method except by incubation of determining whether an egg is fertile or infertile.

### LITTER FOR POULTRY HOUSE

Chaff and Refuse From Hayloft Is Preferred as Seeds Are Most Invigorating.

The best litter for the floor of poultry houses and coops is the chaff and refuse from the hayloft. Hayseeds themselves are small, but invigorating, and much of the benefit derived from them is due to the work induced by the seeds.

### PRESBYTERIAN CHURCH

**Your Dollar's Opportunity**

Your dollar's opportunity is now, today! Set it to work for you. Give it the task of multiplying itself. In doing so it will perform its part in the world affairs.

Every man's money should be making use of this opportunity. Farmers, for instance, can not only feed the world; through businesslike handling of their farms and businesslike handling of their incomes they can help to develop the world.

**Thrift Is Patriotism**

Saving is a form of serving. It is one of the biggest forms of national service—service to your country. Our first president said, "Economy makes happy homes and sound nations."

The way to start right is to start right now! Saving is as much a habit as spending or putting things off. Once formed, it is easy to continue. But unlike other habits, it is a good habit.

To Save Your Money and Make Your Money Safe

**BANK WITH US**

**Daily Thought.**  
I love everything that's old; old friends, old times, old manners, old books, old wine.—Goldsmith.

**GIVE PIGS WORM TREATMENT**  
Young Animals Should Be Looked After as Soon as Weaned—Clean Pasture Favored.

Pigs should always be given worm treatment immediately after weaning. If necessary give them a second dose two weeks after the first. If they are then turned on a good alfalfa, clover or rape pasture and are fed grain in addition so that they remain thrifty there is little danger of further trouble from worms. In other words keeping hogs reasonably free from worms is not a difficult thing to do, if they are looked after at the proper time.

**INCREASING SALES OF MILK**  
Campaigns Have Been Inaugurated in Various Sections to Boost Dairy Products.

(Prepared by the United States Department of Agriculture.)  
Consumption of milk is on the increase as a result of the milk campaign of the United States Department of Agriculture and the state agricultural colleges and local agencies, inaugurated to extend and increase the use of milk and other dairy products—in cities, towns and rural dis-

Cleanliness is Most Essential in Production of Milk.

tricts. The increase in sales of milk as a result of these educational campaigns carried on during the past year in 11 states, 15 cities and 4 counties range from 3.5 to 35 per cent, the average increase being 15 per cent. The health of the children has been improved while undernourishment has been reduced.

Nutrition clinics have been held, and underweight, poorly fed children have improved greatly in health as a consequence of the more general and intelligent use of milk as a daily food. In Kansas City a previous survey showed a condition of 30 per cent undernourishment among the children, while after the milk campaign and regular instruction in health habits, a second investigation showed that malnutrition has been reduced to 15 per cent. Of late milk campaigns have been held in Madison, Wis.; Wheeling,

W. Va.; Seattle, Wash.; Greenville, S. C.; Akron, O.; Warren, O.; Winston-Salem, N. C.; Springfield, Mass.; Oskaloosa, Ia.; Baltimore, Md.; Oakland county, Michigan; Cumberland county, Maryland, and Jacksonville and Duval county, Florida.

Despite disturbed industrial conditions, increases in milk consumption have been effective, and even in places of much unemployment the quantity of milk consumption has been kept up to normal. In nearly all cases the milk consumption subsequent to the milk campaigns has been greater than it ever was before.

**SPACE REQUIRED BY CALVES**  
Individual Pens Are Good When Farmer Can Afford Them—Labor Is Expensive.

Twenty to twenty-five square feet of floor space exclusive of mangers should be provided for calves under six months old. Individual pens are good when one can afford them, but they are more costly on account of the large amount of material necessary for pen walls, space required, and labor in cleaning them than pens holding four or five calves apiece. The latter are entirely satisfactory provided the calves are stanchioned while being fed.

**SUGGESTIONS TO AID HAY GROWER**

Eliminate Loss and Trouble by Having Clear Understanding of All Terms.

**CONFIRM ALL TRANSACTIONS**

Quantity, Quality, Time of Shipment and Routing Should Be Made So That There Will Be No Misunderstanding.

(Prepared by the United States Department of Agriculture.)

Many of the difficulties and losses that shippers of hay encounter would be eliminated if more care were exercised when making sales to see that all terms are clear and practicable and that both seller and buyer have the same understanding of them. This can be accomplished by observing the following suggestions by the bureau of markets and crop estimates, United States Department of Agriculture:

State clearly in all offers or acceptances all necessary factors, including quality and quantity of hay, together with time of shipment, routing, rates, price and terms of payment.

Confirm all sales and purchases by letter, in which is stated all terms as understood by the seller or the buyer, as the case may be.

Upon receipt of confirmation, correct immediately any items that appear to be incorrect.

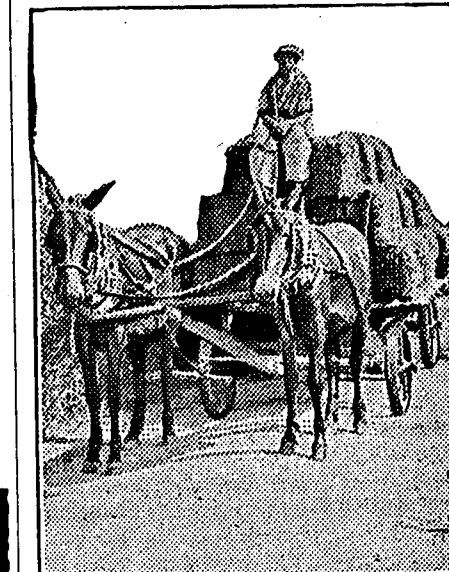

**Make Terms Clear.**  
Too much emphasis cannot be placed upon the matter of care in stating terms when making sales or purchases. A greater part of such trans-

actions are usually by telephone or telegraph which makes brevity necessary. A few more cents spent in telephone or telegraph charges, however, is better than several dollars lost on an unsatisfactory shipment. On the part of the shipper, therefore, when offering hay for sale, whether the offer is by wire or letter, the following should be stated:

(a) Quantity by bales, tons, or carloads. If by bales, the size should always be given, and if by tons or carloads, it is well also to state the size of bales that will be shipped, as there is a decided preference in certain sections for certain types and sizes of bales.

(b) Quality, either in descriptive terms or in the terms of state or commercial grades. When commercial grades are used it must be made certain that both buyer and seller understand what standards are being used. It is sometimes advisable to state what inspection agency is to determine the grade.

(c) The time of shipment should be specified either by naming the exact date on or before which shipment

Hauling Hay to Railroad Station.

will be made, or by using the trade terms of "immediate," "quick," or "prompt," which are given the following interpretation: "immediate" or "rush" is shipment within three calendar days, "quick" five calendar days, and "prompt" ten calendar days, Sundays and holidays excluded in each instance.

(d) The routing which can be made by the shipper, or that which is desired by the buyer, should be made in the first bid or offer, as it is an important item and, together with the rates applying, may be the determining factor in the transaction. Instead of stating the rate, the point at which the price applies may be given, such as "f. o. b. shipper's track" or "delivered buyer's station."

(e) The price should be stated clearly and it should also be made clear for what length of time the bid or offer holds good and whether or not the acceptance of either is subject to confirmation by the maker.

**Send Confirmation Promptly.**

When a bid or offer has been accepted and a sale consummated, whether by letter or wire, a confirmation by letter, setting forth in detail all the terms and conditions of the transaction, should be mailed by each party to the other. If, upon receipt of these confirmations, either party notes any item that is contrary to his understanding of the terms he should notify the other immediately by telegraph, so that all errors may be corrected before a shipment is made. If the hay was ready for shipment when the sale was made, however, it may not be possible for the shipper to wait for a written confirmation of the acceptance by the buyer, but he should forward a telegram to the buyer confirming the terms of his original offer and his understanding of the acceptance.

**BIG PROBLEM TO MANAGE LETTUCE**

Plant Must Be Kept Growing Without Check and Needs Heavily Fertilized Soil.

**LEAF IS EARLIEST VARIETY**

Head is Most Popular Commercially, but Cos is Making Determined Bid in Favor of Home Garden—Plant Early.

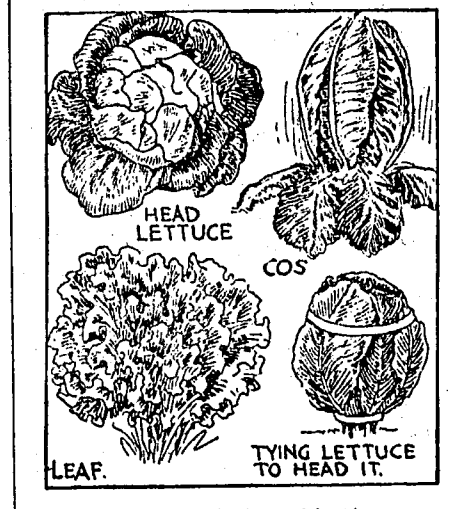

Lettuce growing is becoming a science, since this best-of-all salad vegetables has become a staple article of diet, and is in the market 365 days of the year. Commercially the head lettuce has almost displaced the older leaf varieties, but the home gardener knows that leaf lettuce is the earliest of all and just as finely flavored and tender as the big cabbage varieties. It is also the first lettuce to mature for table use, so a small planting of a good leaf variety is advisable to give a crop before the head varieties are ready to cut.

**Bid for Popularity.**  
Romaine or cos lettuce is making a very successful bid for home-garden popularity. It is much easier to grow than the head lettuces, especially after the weather is warm, and it is fully as delicate.

The leaves, being long and narrow, and growing upright, naturally blanch the heart and this process is easily assisted by tying the tips of the leaves together tightly. It matures quickly.

Sowings of leaf, head and cos lettuce give a good succession.  
The real way to get head lettuce that will really head, and the only way, is to start the plants either indoors or in a hotbed or cold frame, when the weather will not permit planting in the open and have the plants growing along to transplant as soon as the weather permits. Lettuce can be grown in the open ground for the greater part of the winter in many portions of the South and in others, with a cold frame protection, it can be kept going all winter.

**Gives Much Trouble.**  
Head lettuce gives gardeners a great deal of trouble, largely because they drill the seeds into the soil and leave them too thick in the rows until they are so far advanced in growth the thinning does no good. Transplanting is most essential as the check to the growth seems to thicken up the plant and start it on its way to a head. When transplanting, after three or four leaves have been made, cut off half of them, that is, only the tops of the leaves for about half their length.  
Lettuce must have heavily fertilized ground and the highest standard of cultivation. The plants must be kept

**Popular Varieties of Lettuce.**  
cultivated and growing at top speed. Water should be supplied when a dry spell impends. If the ground is rich, well tilled, the plants given a distance of at least six inches apart in the rows after transplanting and kept well cultivated, there is no reason why any gardener shouldn't have reasonably good head lettuce. The great problem in lettuce growing is to keep it growing without a check.

**BEST RESULTS FROM MANURE**

On Heavy Soils Fertilizer Tends to Open Up Compact Land if Plowed Under.

Manure on heavy soils gives better results if plowed under. It can be mixed better with the soil and the decay tends to open up soils having a compact texture. Straw manure, if not plowed under in fall, gives best results when turned under early in spring. Fine manure gives better results for top dressing. On poor land use part of the manure for top dressing clover and grass to get a good stand, rather than apply all of it to corn land.

**HIGHWAYS HAVE BIG BURDEN**

Farmers Must Study Situation and Help Officials Solve Better Road Problem.

High freight rates and the greater convenience of short-distance motor-trucking is diverting more and more heavy freight upon the highways, while the number of pleasure cars, many of them constantly being driven at a high rate of speed, mean that the roads will have an almost insufferable burden to bear. Farmers will indeed have to study the situation carefully and help their road officials solve the problem by every means of co-operation within their power.

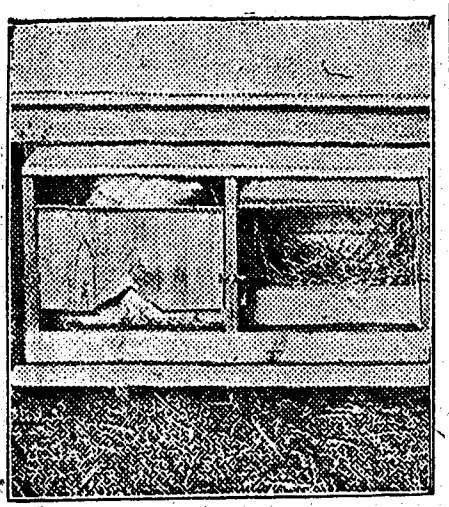

**POULTRY FLOCKS**

**TRAP NESTS HELP BREEDERS**

Enable Poultrymen to Find Profitable Layers by Selecting Late Molting Hens.

(Prepared by the United States Department of Agriculture.)

Trap-nesting hens to find the most profitable layers does not appeal to the average farmer and back-yard poultryman, as being practical. Besides the original cost of making the nests there is the extra labor required of looking after the layers. However, some facts that have been

Profitable Layers Found by Use of Trap Nest.

learned as a result of using the trap nest may be applied in the improvement of the flock, say poultrymen of the United States Department of Agriculture. For instance, the trap nest has shown that the late molter is the most profitable bird in the flock. Now, with the use of the trap nest, a man may select the late molter and be sure that he is picking the cream of the flock. And it seems reasonable to believe that this characteristic breeds on from generation to generation.

**AX IS BEST FOR EGG EATERS**

Habit Spreads From One Fowl to Another and Unless Checked Affects Whole Flock.

(Prepared by the United States Department of Agriculture.)

Egg eating sometimes becomes a serious vice in a flock, the fowls becoming very fond of eggs when they have learned to eat them. The habit spreads from fowl to fowl and unless checked will often spread through the whole flock. Egg eating usually begins through accident by eggs being broken or frozen. See that the nests are properly supplied with straw or other nesting material and have them darkened, so that if an egg is accidentally broken the fowls will not be likely to discover it. Supply plenty of lime in the form of oyster shells, bone or similar substances to insure a firm shell. As soon as it is discovered that a fowl has formed the habit, the fowl should be removed to prevent the spread of the vice. Once formed, it is difficult to eradicate, and the safest remedy is the death penalty, say poultry specialists of the United States Department of Agriculture.

Fowls sometimes pluck feathers from themselves and from each other. This is often caused by too close confinement, by the presence of insect pests, or by improper feeding. When some of the fowls of a flock have formed the habit slightly, a wide range with a change of diet, including a plentiful supply of animal feed, and freedom from insect pests, will usually correct the evil. Above all, see that the fowls have plenty of inducement to exercise. If the habit becomes well formed it is very troublesome and may necessitate the killing of some of the fowls in order to stop it.

**YEARLY EGG LAYING PERIOD**

Increase Made at Massachusetts Experiment Station by Selection of Pullets.

Dr. H. D. Goodale, research biologist in poultry at the Massachusetts Experimental station, stated that the yearly egg-laying period of a flock of hens at that place had been increased by an average of 58 days by egg-selection from early-laying pullets. This, he said, had resulted in an increase in the number of winter eggs, raising the annual egg average from 121 to 185. Poultry breeders should aim to eliminate broody hens from breeding stock; also the birds idle longest in the winter months.

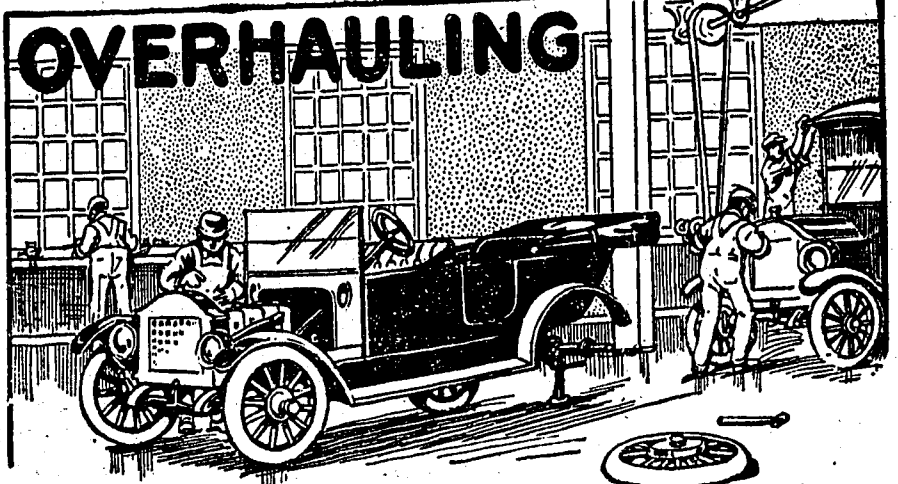

**POULTRY NOTES**

- Keep house and yard clean.
- Provide roosts and dropping boards.
- Provide a nest for each four or five hens.
- Save the manure. It is worth money if treated properly.
- The early hatched chick becomes the early laying pullet next fall.
- Make the house dry and free from drafts, but allow for ventilation.
- Kill and eat the poorest hens in the fall when they begin to molt and cease to lay.

**Married Men Trustworthy.**  
Statistics indicate that married men are more trustworthy than single men in the ratio of 6 to 1, probably because of their increased sense of responsibility.

**Or He Thinks She Does.**  
The thing a man enjoys about a love affair is that he has found someone at last who believes everything he says.—Boston Transcript.

**Unduly Proportioned.**  
Billy had gone with his mother on a visit to his uncle, who owned a farm. When they arrived they were met by Billy's uncle. As they seated themselves in the machine Billy noticed a dachshund sitting beside his uncle in the front seat. Having never before seen such a dog he suddenly exclaimed: "Oo, look, murver, look at that thing that's two dogs long 'n' half a dog high."

**OVERHAULING**

**Honest Work at Honest Prices**

There are two highly important points for a man to consider before having his car overhauled.

The first point is to assure himself that the men who are going to work on his car are mechanics expert enough to locate and properly repair all the parts that need attention.

The second point is to convince himself that he can trust the shop to give him an honest accounting of the amount of work that was actually done on the car.

We gladly welcome an investigation on both of these points. We have the facilities, the workmen and the business methods that will more than satisfy all who investigate.

## PLANT CORN FOR LARGEST YIELDS

Nothing Gained by Seeding Before Conditions of Soil and Atmosphere Are Right.

### NEITHER EXTREME DESIRABLE

Greatest Total Growth of Stalk Made From Planting in May or June—Experiments of State Stations Corroborated.

(Prepared by the United States Department of Agriculture.)

No gain is made in yield or maturity by planting corn before conditions of soil and atmosphere are right, in the opinion of the United States Department of Agriculture. Corn growers in localities with a long season have observed that early and late plantings of the same variety usually show wide differences in growth and number of days required to reach maturity. In general, corn which is seeded early requires a longer time to come up than that which is planted later. The plants also grow more slowly, are shorter, and bear their ears lower. These are commonly observed effects of the date of planting.

**Best Yields From Early Seeding.**  
Studies recently have been made by the United States Department of Agriculture at the Arlington experimental farm near Washington, D. C., in order to obtain data which would supplement that obtained earlier at the various state experiment stations. Numerous experiments have been conducted by the state agricultural experiment stations to determine the influence of the different dates of planting on corn yields. The state experiments reviewed indicate that the best yields of grain may be expected from the early seedings and the most rapid development and greatest growth from the later seedings. Neither the extremely early nor the very late plantings are desirable.

The department investigations were directed more to a study of the effects upon growth and development than to determining the most desirable date of planting from the standpoint of yield. The results of these studies, which extended over a five-year period, are presented in Department Bulletin No. 1014, Effect of Date of Seeding on Germination, Growth, and Development of Corn, by E. B. Brown and H. S. Garrison, which may be had upon application to the department.

The varieties of corn used in the experiments cover a wide range in the length of the growing season required. The data tabulated are limited to the characters that seem to have been consistently affected, although the points studied included the rapidity of germination, the number of days from emergence to ripening, the height of stalks, the number of ears per plant, the average weight of ears, the average yield per plant, and the number of suckers.

In all the experiments the germination of corn increased in rapidity as the date of seeding occurred later. When sown early the short-season northern varieties came up sooner than the varieties from the central and southern states. When sown later the differences in this respect were not usually apparent.

**May or June Favored.**  
The total growth of stalk was greatest from the seedings in June and

Plant Corn in May or June for Best Growth and Yield.

May. The total growth was least and rate of growth slowest from the April seedings. Development was more rapid in the later than in the earlier seedings.

The number of ears per stalk, the size of the ear, and the amount of suckering bore no consistent relation to the date of seeding. The pollen-shedding period was longer in plants from the early seedings than in those from the later seedings. Seedings earlier than normal resulted in slight gains in the date of silking.

These experiments corroborate the conclusions of the state experiment stations, that corn may be planted in the vicinity of Washington and other localities with a similar season, any time after May 1, without danger of the seed rotting. The best conditions of soil and atmosphere usually come between May 10 and May 20.

**Start Vegetables Early.**  
Hotbeds and cold frames give a chance to start vegetables earlier and gain on the weather and insects.

### Fairview Items

Mr. and Mrs. Jim Helton, John Vincent and Miss Edith Boyd were dinner guests Sunday of Mr. and Mrs. Frank Wilken.

Mr. and Mrs. Jeff Fleschman, Miss Edna and Jack Fleschman, drove to Lewiston Saturday afternoon and came back Sunday. Mr. and Mrs. Glenn Fleschman and Miss Roberts came back with them, and stayed until Monday evening.

Mr. and Mrs. Virgil Fleschman and family visited at the Yenni home Sunday.

The Wilken and Helton families took in the dance at Cameron, Friday evening and reported a very fine time.

Little Jessie Helton visited school Tuesday.

Miss Boyd visited the John Carlton home Tuesday evening.

Leslie Helton visited school Wednesday.

### Leland Items

Mrs. Koepf was taken to the St. Josephs hospital last Friday and was operated on Monday. Last reports were that she was doing nicely.

A baby boy arrived at the home of Mr. and Mrs. Cole, last Thursday evening.

Mrs. McVicker is caring for Mrs. Cole.

Mr. Dawson got rather discouraged with his garage work here, gave it up and went back to Oakesdale. Consequently we have no garage here at present.

Mr. and Mrs. Clyde McGhee of Gifford are visiting the latter's parents here this week.

Grandma Hartinger visited at Mr. Parks' over the week end.

Little Adrian DeWinter fell from a tree, Monday, and broke a bone in his arm. At first it was thought no bones were broken but it soon swelled and was very painful. Mr. and Mrs. DeWinter took him to Lewiston, Wednesday, where the x-ray was used to locate the fracture.

Mrs. Ed Fleschman is enjoying a visit with her sister from Juliaetta, who, with her children, is visiting her this week.

The date for the picnic has been changed from the 21st to the 16th, on account of chautauqua at Kendrick. The Sunday school field secretary will be here at that time and we are hoping for a good representation from the surrounding Sunday schools.

A torrent of water roared through the mine and engulfed the slender girl who had gone into the depths—to forget. How the man she loved saved her is just one of the big dramatic thrills of "COLORADO", which will be shown at the New Kendrick theater, Tuesday, May 30.—Ad.

**High Price for Manuscript.**  
The largest amount given for a modern manuscript was paid in New York for Thackeray's "The Rose and the Ring." The author wrote and illustrated it himself for a child friend; and when it was last put up at auction it realized \$28,000.

**Thought.**  
Thinking leads man to knowledge; he may, see and hear, and read and learn, as much as he please, he will never know any of it, except that which he has thought over, that which by thinking he has made the property of his mind. Take away thought from man's life, and what remains?—Pestalozzi.

**PHOTOGRAPHER COMING**  
G. V. Barker, the photographer from Grangeville will be taking pictures in Kendrick, Sunday, Monday and Tuesday, June 4, 5, and 6, and Juliaetta, June 1, 2, and 3. Leave order at drug store. 21-2t.

**LEGION DANCE TONIGHT**  
There will be a dance at the Fraternal Temple tonight, given by the American Legion. A four piece orchestra will furnish music for the occasion.

### "Over The Hill" IS COMING TO KENDRICK

There has been so much said in magazines and newspapers all over the country about the sensational run of "OVER THE HILL" in New York for a full year, prior to its general release, that it seems almost superfluous to dwell at length on its merits. Suffice it is to say that the superb film drama was made by Wm. Fox, and has for its theme the divine love of a Mother. Mr. Oldfield feels he has accomplished for the people of Kendrick and vicinity an achievement not enjoyed by a great many exhibitors outside of the larger cities by getting "OVER THE HILL" for Kendrick. While the story is one calculated to reach, by its strength of sentiment, the heart of the most callused playgoer, it has nevertheless many lighter moments when the risibilities are tickled by some of the most delightful comedy ever flashed upon the screen. At the New Kendrick theater, Friday and Saturday, June 2 and 3.—Ad.

**MILK 8c QUART**  
I have decided to start a dairy and can supply customers in Kendrick with milk at 8c a quart in any quantity. Phone E. E. McDowell, Kendrick. 20-2t

**A. H. OVERSMITH**  
Attorney-at-Law  
Urquhart Building Third Street  
**Moscow, Idaho.**

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, is taken internally and acts thru the blood on the mucous surfaces of the system. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.  
F. J. CHENEY & CO., Toledo, Ohio.  
Sold by Druggists, 75c.  
Hall's Family Pills for constipation.

**Whooping Cough**  
This is a very dangerous disease, particularly to children under five years of age, but when no paregoric, codeine or other opiate is given, is easily cured by giving Chamberlain's Cough Remedy. Most people believe that it must run its course, not knowing that the time is very much shortened, and that there is little danger from the disease when this remedy is given. It has been used in many epidemics of whooping-cough, with pronounced success. It is safe and pleasant to take.—Adv.

**Softening Hard Putty.**  
Putty that has become hardened by exposure, as around window glass, may be softened and removed by the use of the following mixture: Shake 8 pounds quicklime in water and add one pound pearlsh, making the whole about the consistency of paint. Apply to the putty on both sides of the glass and let it remain for about 12 hours. It should then be possible to lift the glass out without trouble.

## GLEANINGS

S. P. Callison and several fishing fanatics from Moscow caught 30 bass at Chatolet lake last week. They expect to go back and try it again when the signs are right. They drove from Moscow to Spokane in C. B. Green's car and in order to get to a bait shop before closing time, where they wanted to buy some live minnows, they had to exceed the speed limit by a margin of 25 or 30 miles an hour. A speed cop picked them up in Spokane but when he learned the urgency of the occasion he let them off without a fine. They got the minnows.

There are 87 members in the University of Idaho senior class this year.

George Davidson of American ridge was a Moscow visitor last Saturday.

The Kendrick ball team will play Julianna on the Julianna diamond this afternoon (Friday). The game will be started immediately after the chautauqua program.

According to an article in the Deary Press, the St. Mark's fly did considerable damage to the winter wheat in the vicinity of Deary.

Mrs. W. M. McCrea and her sister, Mrs. Shaffer, went to Spokane last Friday for a brief visit. From there Mrs. Shaffer will go to her home at Everett, Wash.

Jim Kean of Moscow, former sheriff Latah county, was in Kendrick Monday on business.

Mrs. M. V. Thomas went to Lewiston Monday to be present at the commencement exercises of the Lewiston high school. Her son Harold is a member of the class of '22.

A flock of 2300 sheep passed thru Kendrick the first of the week, bound for summer pastures in the mountains.

Mr. and Mrs. N. E. Walker drove to Peck, Sunday, to spend the day with relatives.

Elizabeth and Mary Thompson of Moscow spent the week end with Hester Knepfer.

Charles Riggan arrived last week from Spokane to visit his brothers, George and Bill.

Spiker & Jeffries sold their Ford agency and building at Lewiston to three Genesee men who will incorporate under the name of the Universal Sales Co.

"How much do I owe you?" the bridegroom said to the preacher after the marriage ceremony. "What do you think is right?" asked the minister. "Well how much do you usually receive?" persisted the bridegroom. "The law allows me \$2.50," explained the minister. "Then here's 50c; that'll make it \$3," said the bridegroom as he beat it.

An old saying: "The harder you fall, the higher you bounce." So take courage.

Jesse Hoffman and Herman Koepf of Leland attended the meeting of stock breeders, held at Lewiston last Saturday.

The Kendrick baseball team will play Lapwai at Kendrick a week from Sunday, June 4.

Four carloads of dairy cattle were shipped through here on their way to Orofino and Peck, last Saturday. The cattle were bought by the Orofino and Peck banks and will be sold to the farmers in that region at what they cost in the east, plus freight. F. Byron Smith, former assistant cashier of the Farmers Bank of this place, is one of the leaders in the movement.

Dean Wright of Agatha was transacting business in Kendrick, Tuesday.

Pearl Johnson, who suffered a broken collar bone several weeks ago, returned to her school work the first of the week.

Adam Wagner is moving to Farmington this week, where he will engage in farming.

An old one: She wrote him a note which read, "Dear John: Meet me at the trysting place at 6:00 this evening, without fail." And John answered: "In the bright lexicon of youth which fate has reserved for noble manhood there is no such word as fate."

Mrs. M. A. French made a business trip to Spokane Thursday afternoon leaving Miss Dorothy Stanton in charge of the Millinery store.

Mrs. Edwin Smith of Spokane returned home last Saturday after visiting at the home of Mr. and Mrs. H. P. Hull.

Hobbrook, Emmett & Reece shipped a mixed car of hogs and sheep last Tuesday. They will drive three carloads of cattle to market from here today.

Mr. and Mrs. George Leith and daughter, Clarice were Moscow visitors Monday.

The fishing season opens Thursday of next week. There will be some good fishing in the Potlatch and its tributaries for a few days after the open season, but it won't take the boys long to deplete the available supply of trout.

B. C. Johnson has taken over the Neosha Falls Post, published at Neosha Falls, Kansas, according to an announcement in last week's issue of that paper. The retiring publisher heads his editorial column with the following brief paragraph: "Finis. Glad of it."

Miss Manila Hanson returned home from her school work at Rupert, Idaho, Wednesday afternoon. She was accompanied by her friend, Miss Irene Henderson of Michigan, who also taught at Rupert this year.

Gus Farrington of Cedar Creek received delivery of a new Samson truck this week through the local agency, the Kendrick Garage Co.

Since purchasing their ranch north of Kendrick, Mr. and Mrs. A. C. Deeter have decided to sell their Kendrick property. They are going to make extensive improvements on the ranch. Their plans include the building of a new house and barn and other small buildings and the installation of a gravity water system.

Mrs. Wm. Rogers took her little niece, Vivian Wegner, to Moscow the first of the week for hospital treatment.

Maud and Mahle Eichner returned home, Tuesday, from their school work at Lewiston.

Mr. and Mrs. Lafayette Keene of Moscow and Mrs. Wade Keene of Spokane, former American ridge residents, left Tuesday for a visit in the East.

A marriage license was issued Wednesday at Moscow to Miss Muriel Westendahl, daughter of Mr. and Mrs. Chas. Westendahl of this place, and Mr. Jesse Oylear of Genesee.

Wilbur, Ruby and Harriet Boyd drove up from Clarkston, Saturday, to spend the week end at the home of Mr. and Mrs. Frank Boyd.

Mrs. Nickleson and daughter arrived Tuesday afternoon for a visit at the home of Mr. and Mrs. Ahl.

Frank May and daughter of American ridge returned Wednesday from a trip to South Idaho. They have property interests in the vicinity of Cambridge and report crop conditions there good, although money is scarce. Farmers there are paying 12 per cent interest on crop mortgages.

Pearson's Electric Bakery has ordered a bread wrapping and sealing machine which will be installed soon. Mr. Pearson is adding new equipment as fast as the increase in business justifies. He has added some new outside territory recently which is increasing the volume of his business.

Joe Gardner finished mowing and cleaning up the town park Wednesday afternoon, in preparation for the school exercises. The park presents a very pleasing appearance.

Harry McKeever of Clarkston was a Kendrick visitor Thursday. His wife, who was seriously ill last week with pneumonia, is reported to be recovering and her condition very much improved.

Born to Mr. and Mrs. R. C. Heimgartner, of Potlatch ridge, May 20, a boy.

There has been considerable complaint because of the fact that cars have been driven across the baseball diamond rather freely. There is only one way to keep the field in good shape and that is to keep off of it with cars or any other vehicles.

### League Play a Success

The play given by the Epworth League last Wednesday evening at the New Kendrick theater, was a marked success from every standpoint. There was a good attendance and those who witnessed it felt well repaid. Miss McAllister directed the play and is deserving of much credit for the splendid manner in which it was given.

### Lodge Officer Visits

Miss Leafy Smith, state assembly president of the Rebekah Lodge, visited the local order last night at a special meeting. There was a good attendance and much interest in the remarks made by the grand lodge officer. After the lodge session a nice lunch was served by the members of the Odd Fellow lodge.

"COLORADO" was a great stage play and it's even bigger as a picture. A vigorous, virile drama of the big out-doors, with a tremendous mine scene and a crackler of an ending that are going to give you thrills such as you've seldom had at a picture. Played by two-listed Frank Mayo with a dash and a whirl that have won him that true title—"aero of romance." At the New Kendrick, Tuesday, May 30th.—Adv.

Is a Limitation.  
"I like freedom of speech," said Uncle Eben, "but I can't see no sense in any man expectin' de rest of de world to be his audience all de time."

## CLAIMS VALUABLE LAND

Mrs. Elizabeth Clark of Atlantic City has started suit for the restoration of 15,000 acres of land which, she says, was granted to antecedents of her family by Queen Anne of England. The land she claims includes all of Brighton Beach, part of Atlantic City, Long Island, and a section of northern New Jersey. Mrs. Clark has formed a corporation of all descendants of the 13 original owners of New Jersey to bring the case into the courts.

## KEEP RECORDS OF PLANTING

Enables Gardener to Recall Earliest and Latest Varieties in Planting Season.

Gardeners should keep records of planting dates and maturity of certain varieties of vegetables so that they may recall the earliest, the latest and the mid-season varieties when planting time comes. This information will save trouble and enable one to plant so the table may be supplied during the growing season.

### CORRECTING A FALSE RUMOR

Our attention has been called to a rumor circulating throughout the surrounding country that we are out of the binder twine business. This is absolutely untrue, as we have a large stock of twine on hand and more to come if needed. We are in the twine game as usual at prices that will bear inspection. When in doubt call us up. Our No. is 312. We are here to serve you. Kendrick Roendale Co. By Theo Hanson, Mgr. 202t

### Evils of Constipation

Perhaps the most serious of the diseases caused by constipation is appendicitis. If you would avoid this dangerous disease, keep your bowels regular. For this purpose Chamberlain's Tablets are excellent, easy to take and mild and gentle in effect.—Adv.

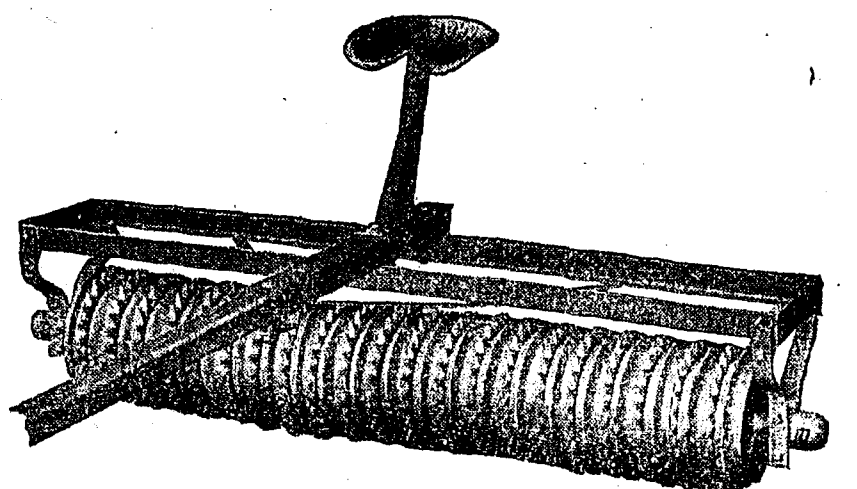

## LAND ROLLERS

Western Pulverizer, Packer and Mulcher. "Three Machines in one"

Buy a Western land roller, break up your crusty fields and increase your yields. The Western land roller leaves a fresh mulch on top and saves the moisture in the ground for your late growing crops. Using a Western roller may make the difference between a failure and a good crop.

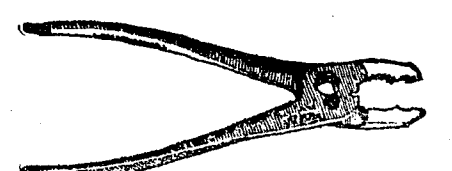

12 foot Roller 3-section

\$135.00

8 inch mill 25c  
10 inch mill 30c  
12 inch mill 40c

26 inch Hand \$2.75  
28 inch Rip \$3.00

Good strong dependable pliers from 50 cents up.
