KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, JUNE 2, 1922

NUMBER 22

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns
of Neighboring Papers.

Troy News: Joseph Dunn of Driscoll ridge, whose farm home was destroyed by fire last week, was in the village Monday and made this office a call. Mr. Dunn thinks he has the finest neighbors in the country. The loss of his home and making arrangement to get relocated have put him behind in his farm work. His neighbors, not to be outdone in good deeds and realizing the hard task to which Mr. Dunn has been put, gathered at his place with horses and farm implements to assist him with the farm work. Eight men and forty-two horses were plowing, harrowing and putting in the bean crop for Mr. Dunn, which help he appreciates.

Juliaetta Record: L. E. Pearson, of Pearson's Electric Bakery at Kendrick was a Juliaetta visitor last Saturday. He states that he has recently added a new bread mixer and made other improvements which has materially improved the quality of his bread and is now putting out a better grade of bread than at any time in the past. He is anxious to please his customers, he says, and will be glad to entertain any suggestions from his patrons which they think might further improve the quality of his bread.

Deary Press: In compiling the financial statement from which the school's tuition is computed by the State, it was found that there was a saving over last year's expenses. The running expenses for the current year was \$19.72 per month per pupil, as against \$23.08 last year. This is a lowering of \$3.36 per month, or \$30.24 per year for each student enrolled. The average attendance for the closing year was twenty-five pupils, giving a total saving of \$750.

Genesee News: The teachers of the Genesee public school during the past year have gone to their various homes for the summer vacation. All teachers have been employed for the coming year with the exception of one. While all former high school faculty has been retained for next year, only two of the grade teachers will return—Misses Rockwell and Winegardner. Two new grade teachers have been employed thus far: Miss Vaughan of Southwick and Miss Russell, who has been employed at Craigmont for the past two years. All the teachers for the coming year are well qualified and it is anticipated and hoped that the year will be as successful as has the one just closed.

Star-Mirror: "Own your own home in Moscow and build it now" was the slogan unanimously adopted by the Moscow chamber of commerce today at their weekly luncheon meetings. The chamber asked that the Star-Mirror publish the slogan. Plans are now being made by the chamber of commerce members to encourage an extensive home building program in Moscow this summer. Dr. A. H. Upham, president of the University of Idaho, reported that conservative estimates place the number of new students expected on the Idaho campus next fall at between 250 and 300.

Kleth-Penlund

Miss Marie Kleth, daughter of Mr. and Mrs. A. Kleth of Bear ridge, was married last Saturday at Moscow to Mr. Dooley Penlund of Juliaetta. After visiting a short time at the home of the bride's parents, the happy couple will make their home in Lewiston.

John Reid stated Wednesday that he had winter wheat on his bench farm that was just ready to head out, as the heads were already beginning to show in spots. He says it is as good as any wheat he has seen this year.

Swanson Awarded Contract

Axel Swanson has been awarded the contract of putting in the fill near the bridge crossing the Potlatch at the mouth of Wandcher gulch. G. F. Walker, highway commissioner, stated yesterday that the rock crusher would be started the latter part of this month and crushed rock put on the road between the Bear creek bridge and the bridge crossing the Potlatch. Considerable permanent work has already been done on this strip of road to get it in shape for surfacing.

CAMERON CHURCH STAGE TWO PLAYS

Now Rehearsing For Productions
June 7 and 13.

Members of the Lutheran church and League of Cameron are making preparations to put on two comedies—one next week and the other the week following.

The Luther League will present "Starbright," a comedy, next Wednesday evening, June 7. On the following Tuesday, June 13, the older members of the church will stage "Deacon Dubbs", a comedy-drama that will prove highly popular. The members of the cast of both productions are rehearsing diligently.

A stage is being erected at the August Meyer place and seating capacity to accommodate large audiences will be furnished. The theater will be lighted by electric lights, power being furnished by August Meyer's lighting plant.

An additional attraction will be music furnished by the Bear Ridge orchestra. A small admission charge will be made for these entertainments and everybody is cordially invited to attend.

Planted Two Crops

Evidently A. E. Janes doesn't believe in half-way methods of farming. He planted a 10 acre piece of bench ground to watermelons a short time ago. Knowing that melons are sometimes hard to get started, he also planted the ground to corn. He got a fine stand of both melons and corn, so when he cultivates his melons patch he will plow out the corn. However, if the melons had failed to come up, he would at least have had a patch of corn.

Methodist Church

The third quarterly conference of this charge will be held at American ridge, Saturday evening, June 3. Supper will be eaten at the church at 7 o'clock, followed by the business session. Members and friends of the church are invited to come and bring their lunch, and fellowship with us.

The Children's Day program this year is to be unusually fine. Watch for the later announcement next week. Plan to have your young people enjoy the pleasure of putting it on.

Dr. Forsyth will speak at American ridge Sunday morning, June 4th. We hope to have an installation service that evening to install the newly elected Epworth League officers.

The church wishes to extend its appreciation to the play cast and coach, Miss McAllister, for the faithful and successful effort in staging "A College Town." Coming as it did at the busiest period of the school year it was an extremely hard thing to do, but they carried the task thru with credit. A like venture later will doubtless draw a packed house.

S. P. Callison returned Wednesday from another flying fishing trip to Chatcolet Lake, which he made with a party of Moscow men. He reports a good catch of bass. His biggest fish, a four-pounder, flopped back into the lake and escaped.

Chamber Music Organization to Be Heard

The Biltmore Orchestra—Five Splendid Musicians Give One Full Concert and a Prelude Fourth Day of Chautauqua

To meet the ever-increasing demand for the better things in music, the Biltmore Orchestra was organized, and its concerts at Chautauqua on the fourth day will be two of the finest musical features of the assembly. The organization, which is really a chamber music group, playing, however, many of the popular numbers as well as the selections from the classical libraries, is headed by Charles Mitchell Mixer, eminent Chicago violinist of real talent. His playing is marked by fine technique and a sympathetic tone of great beauty. He has become widely known in Chicago and throughout the country for his splendid artistry. Mr. Mixer is a former pupil of Herbert Butler and also the celebrated violin master, Leopold Auer.

At the Kendrick Chautauqua which appears here June 20 to 24 inclusive

Passed Eighth Grade Exams

Returns from the state examination for eighth grade listed the following students as passed: Charles Crocker, Pansy Riley, Alberta Walker, Grace Plummer, Dorothy Erickson, Claribel Moore, Claud Jones, and Kermit Wade passed in all subjects on which they wrote. Only one student really failed.

In the 7th grade Lydia Rutt and Mary Chandler passed the examination in geography and physiology. Lorne Lewis and Victor Gentry passed in physiology.

Genesee Wins Tournament

The Genesee team won the baseball tournament at Lewiston by defeating Lewiston by a score of 2 to 0 and then winning from the Idaho county all stars by a score of 15 to 4. Charles Litch, traveling man of Spokane, won the tournament car.

Cavendish Will Celebrate

According to an announcement received this week, Cavendish will put on a big celebration July Fourth on the picnic grounds. Plans are now under way for a big time on that day.

Big Bear Ridge

The recent rain was welcomed by the farmers and the crop conditions are looking more favorable. The present rush is preparing the ground for bean planting.

Mrs. N. E. Ware returned home from Clarkston last week where she was called by the illness of her sister.

Mrs. Leonard Davis of Leland spent last week with her father Chas. Elliott.

John Halseh of Kendrick is spending the week at the Ed Halseh and A. Hooker homes.

Rev. G. A. Morton of Kendrick will hold preaching services at the Steele school house Sunday, June 4 at 11 a. m. Everybody welcome.

Mrs. Robert Clemenhen and daughters of Deary spent Sunday with her sister, Mrs. Fred Gladden.

J. J. Stind attended a Lutheran church convention at LaCrosse, Wash. last week.

A large crowd from here autoed to Bovill to attend the ball game Sunday afternoon.

Mrs. Tom Van Moulken and children are here visiting at the home of her father, W. M. Blenden.

The dance given at the hall Saturday evening was largely attended and everyone reported the usual good time.

Mr. and Mrs. Dooley Penlund were given a charivari at the A. Kleth home, Sunday evening.

Commencement Exercises

The high school commencement exercises, held at the New Kendrick theater, Thursday evening of last week, were most interesting. The musical numbers and parts taken by the class were very much enjoyed, and the address given by Prof. Dale caused much favorable comment. He gave everyone who heard him something worth while to reflect upon.

There were five members in the class. The three young ladies, Carrie Bunker, Opal and Agnes Jones will all attend the Lewiston normal next year, while the two young men, Norla Callison and Rex Pickering, will probably enter the University of Idaho.

Big Beaver in Potlatch

There is an enormous beaver in the creek opposite the McCrea place. It is estimated that he will weigh in the neighborhood of 80 pounds. Contrary to the teachings of natural history, he is quite tame and will sit on the opposite bank of the creek and allow spectators to admire him, without apparent uneasiness. In spite of his bulk he slips into the water without making a splash.

Cameron News

The Cameron boys played their first ball game, Decoration Day, against Southwick. The score was 14 to 10 in favor of Cameron. The game was played on the Southwick diamond.

Andrew Entman has been quite sick the past week. His brother, John Entman and daughter of Spokane, arrived Saturday to stay a week or more with him.

Mr. and Mrs. Louis Olday celebrated their golden wedding anniversary the 30th. Those present were: Mr. and Mrs. H. Flomer and sons, Carl, Erwin and Arthur; Mr. and Mrs. A. E. Rosenau and children, Mr. and Mrs. Chas. Mauch and son, Lester; Mr. and Mrs. H. Koster, Mrs. Dave Garrett and son, Leroy and Mr. D. Schanhorst all of Genesee; Mr. and Mrs. Carl Lohman and family and Mr. and Mrs. H. Blum and children. All present were children and grandchildren of Mr. and Mrs. Olday. A fine dinner was served at 12:00 o'clock.

Miss Alma Finke has been visiting Miss Bertha Hartung this week.

Special for Saturday: Economy fruit jars, pints \$1.10, quarts \$1.50, Woller's Store, Cameron. 22-1t.

Gust Fredine arrived last Saturday from Comfrey, Minnesota, to visit his sister, Mrs. Betsy Olson, who has been ill for several months but is now recovering. Mrs. Olson will accompany her brother back to Minnesota next week.

Ford Turned Turtle

Frank Fairfield's Ford car, driven by Miss Agnes Jones, turned over near Deary Sunday afternoon while returning from the ball game at Bovill. Wilma Fairfield suffered a dislocated shoulder and Percy Ware was bruised and cut in several places. Miss Jones was also bruised but not seriously injured, while Mr. Fairfield escaped without a scratch. The car had the top smashed and two fenders ruined as well as the windshield broken.

LOST ONE AND WON ONE, TOO

Kendrick Lost to Juliaetta
And Won From Bovill.

Juliaetta defeated Kendrick last Friday afternoon by a score of 10 to 2. Until the seventh inning the game was close and Kendrick led 2 to 0. It looked like a sure victory as Lewis, Kendrick's pitcher, was going strong. The last of the seventh the scene changes. A combination of errors and hits allowed 6 runs for Juliaetta and in the eighth four runs, made on errors and frequent hits, made the game safe for Juliaetta. In the last of the eighth the bases were full and one man down. McCrery then took the box and struck out the next two men.

Fred Albright umpired the game and his decisions were fair to both teams.

A return game will probably be played at Kendrick during chautauqua week, at which time Kendrick has decided to make it a defeat for the visitors.

The game at Bovill was slightly one-sided with 14 runs for Kendrick and 4 for Bovill. Rocky pitched a dandy game for Kendrick and had the Bovill sluggers at his mercy at all stages of the game. In the ninth inning the score stood 14 to 1 for Kendrick. McCrery went in to finish the slaughter and was hit hard for three runs, including one for 4 bases.

Dr. Veon, umpired the game in a most satisfactory manner.

About Drougts

William Allen White, the Kansas editor, was talking about drougts. "One summer during a terrible drougt," he said, "a tourist was passing through Arizona. He put up one night in a town so dried up that even the trees had yellowed and withered. 'Does it ever rain here?'" the tourist said to the landlord of the hot dusty hole. "Rain?" said the landlord. "Why, stranger, there's five-year-old bullfrogs in this here town wot aint never learned to swim yet."

Deeter's Sold Property

Mr. and Mrs. A. C. Deeter closed a deal Thursday for the sale of their residence property here. William Chamberlain, father of Frank Chamberlain, bought the property and will make it his home next fall. Mr. and Mrs. Deeter will rent the house until fall, when they will move to their ranch in Bear creek canyon.

Runaway Accident

Mrs. Johnson of Texas ridge was thrown from her buggy and suffered a broken wrist and a number of severe bruises Wednesday evening while driving from Kendrick to her home on the ridge. The team met the road tractor a short distance from town and became frightened. They backed the buggy over a bank, upsetting it and throwing Mrs. Johnson on the rocks. She was brought to Kendrick immediately for medical aid and is getting along very well.

T. Y. Ellis visited Spokane last Saturday on a brief business trip.

FLETCHER TELLS OF LATAH COUNTY

Writes Lead Article For The Idaho Farmer.

"The Idaho Farmer," Idaho's weekly farm magazine, carries as its lead story in the issue of May 18, 1922 an article by O. S. Fletcher, Latah county agricultural agent, entitled "Cooperative Extension Service Gets Results." The statement is made that "Latah county farmers cooperate with the county agent and specialists for worth while achievements."

Mr. Fletcher in his able and interesting story tells the history of the remarkable growth of the Latah county farm bureau since 1918. Portions of Mr. Fletcher's article follow:

"County agent work, or cooperative extension service, in Latah county was started in 1918 with the organization of the county farm bureau and, so far as possible has always been carried on through that organization. The Latah county farm bureau was organized to cooperate with the University of Idaho, the state experiment station and the United States department of agriculture in Latah county, and the development of the farm bureau and county agent work have gone forward together.

"When the writer took up his duties as county agent for Latah county in September, 1918, he found a farm bureau with a membership of 242, but with no regularly organized communities and no community programs of work. The county program of work was organized as a temporary one. From that time the work has gradually grown until in 1921 there were 24 communities regularly organized for county agent work. The 24 communities adopted an average of five different lines of work, so that a total of 120 local projects were adopted for the last year. One hundred and nine farmers lead these 120 local projects. Lines of work taken up in each community, the aim being to work on projects that were of the greatest local importance. Farmers of each community decided upon the work for that community and selected their local leaders. The county program of work was a composite of the community programs of work.

"Pest control, grain standardization, weed control, live stock improvement and poultry improvement management are the chief projects of the farm bureau and cooperative extension service in Latah county. The first three of these were part of the temporary program adopted in 1918 and became a part of the regular program as soon as the various communities organized and adopted projects. Land clearing, potato improvement and crop reporting have also been adopted as projects. Much work is done each year that does not fall under any of these projects and is designated as "miscellaneous." A complete review of the work done during the last four years on these projects would take more space than can be devoted to this article, so work reviewed will be mainly that done during 1921.

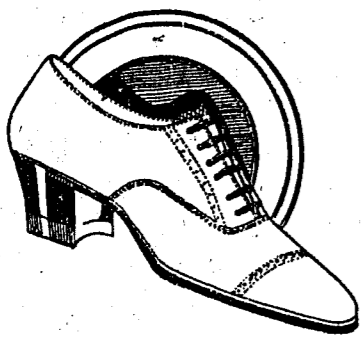

"In the work that has been carried on during the past four years the county agent has been given all possible encouragement by the assistance and encouragement by the progressive farmers of the county, the executive committee of the county farm bureau, the board of county commissioners, and the administrative division and college of agriculture of the University of Idaho. The results that have been obtained could not have been achieved without this cooperation."

According to the Lewiston Tribune, hog cholera has been discovered on the Howard and Stanfield ranch four miles up Lindsay creek in the Lapwai section. A loss of \$2,500 has already been suffered in the last few days.

THE AMERICAN PRESS ASSOCIATION

The Cameron people have issued a cordial invitation to the citizens of Kendrick to attend the two plays to be given there June 7 and June 13. There ought to be a hearty response to the invitation. From reports received from Cameron the plays are going to be well worth the trip to our neighboring town.

Mail order printing, like any mail order merchandise, isn't used by good home town, boosters.

What is to be done with the eggs that will accumulate because of the increased interest in the poultry business. During the past year, and at the present time, poultry farms are on the increase. In addition to the increase in poultry, there is a larger egg production because of the greater knowledge in breeding up high producing stock. A few years ago a hen was expected to lay 100 eggs in order to make her a profitable investment. Now 200 eggs or more is considered a good average. If the hens lay twice as many eggs and the hen population of the country is doubled, what will happen to the egg market? There never has been a serious over production of poultry products, but it might happen.

EMANUEL LUTHERAN CHURCH
Cameron, Idaho.

Rev. E. A. Rein, Pastor.

Regular services Sunday 10:30 a. m.
Sunday school 9:30 a. m.
English services at 7:30 p. m.
Church Council Meeting at the parsonage, Monday 7:30 p. m.
Ladies Aid, Wednesday evening at Luther hall. Mrs. Amos Spekker and Mrs. August Meyer will entertain. A very interesting topic will be discussed. Everybody welcome.
English catechetical instruction Saturday morning.

Midweek Service, Thursday 7:30 p. m.

Fairview Items

Fairview school will give a program and party Thursday evening, June 8th, at 8:00 o'clock. After the program and party, lunch will be served and then music. Come and hear the Fairview orchestra. Everyone welcome, come and bring your lunch and have a good time.

Mr. and Mrs. J. Flesman and Jack Flesman were in Garfield, Wednesday, on business.

Miss Boyd spent Thursday evening, last week, with the Wilken family.

Mrs. Mary McCall had as her guests Sunday: Mr. and Mrs. Harry Hetchner and daughter from Palouse; Mrs. Ed Weyman and son from Culesac and Will Hetchner of Lapwai.

Miss Edna Flesman and Miss Josephine Wilken visited Emma Glenn, Sunday afternoon.

Miss Boyd and John Vincent were dinner guests of Mr. and Mrs. V. Flesman, Sunday.

Bean planting is in full swing at Fairview and other crops look fine.

Mr. and Mrs. Frank Wilken were dinner guests of Mr. and Mrs. Will Wolf, Sunday.

Mrs. Ed Weyman who has been visiting her sister, Mrs. Mary McCall, returned to her home Wednesday, at Culesac.

Mr. and Mrs. John Glenn went to American ridge, Decoration Day.

Jim Helton is helping Virgil Flesman put in his beans, this week.

Miss Elizabeth Hund is visiting her sister, Mrs. Hugo Parks, for a few days.

Why Suffer from Rheumatism?

Do you know that nine out of every ten cases of rheumatism are simply rheumatism of the muscles or chronic rheumatism, neither of which require any internal treatment? The pain may be relieved by applying Chamberlain's Liniment, which makes sleep and rest possible, and that certainly means a great deal to any one afflicted with rheumatism.—Adv.

Soapstone.

Soapstone is a rock composed essentially of the hydro-magnesian mineral talc, but never chemically pure, owing to the presence of varying quantities of other minerals, such as mica, chlorite, amphibole, pyroxene, etc. Soapstone is a massive rock, of bluish-gray-green color, and soft enough to be readily cut with a knife.

EXPERIENCE MOST ESSENTIAL

No Great Difficulties Offered in Operation of Modern, Improved Incubators.

Modern, improved incubators offer no great difficulties in order to achieve success, yet like running almost any other machine, the better they are understood by the operators, the easier they can handle them. This ease and simplicity is only attained after a thorough knowledge of the principles involved and a familiarity formed from a frequent employment of them; in other words, experience.

- Spade up the yard frequently.
- Build a cheap house or shelter.
- Grow some green crop in the yard.
- Neglected colds are the forerunners of roup.
- Keep hens free from lice and the house free from mites.
- There is this to say for the incubator: You need not wait for it to get in the hatching notion.

**TRUCK GROWERS
KEEP FEW COWS**

Small Herds of Animals Being Maintained for Purpose of Obtaining Fertilizer.

SURPLUS MATERIAL UTILIZED

Practice of Keeping Live Stock is to Be Strongly Recommended in Sections Where It Can Be Done Profitably.

(Prepared by the United States Department of Agriculture.)

Truck growers and greenhouse men in the Eastern states are finding it increasingly difficult to secure a supply of stable manure, and some growers have adopted the practice of keeping a small herd of cows or other stock for the purpose of supplying manure, and as a means of utilizing surplus or waste material. The problem of maintaining soil fertility under present conditions was discussed at the recent meeting of the Vegetable Growers' Association of America, at

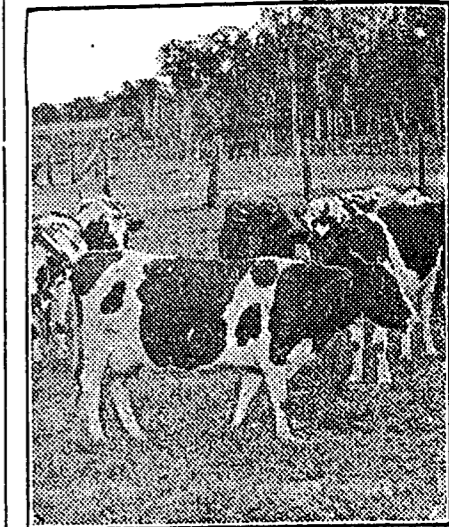

Albany, N. Y., and it was the opinion of the vegetable growers and state federal workers present that the practice of keeping live stock is to be strongly recommended in sections where this can be done profitably.

Scarcity of Plant Food.

The head of the vegetable garden department of the Massachusetts Agricultural college reported that: "A study of the census shows that the decrease in horses in Massachusetts from 1910 to 1920 is such that 13,000 fewer acres can now be furnished with 20 tons of stable manure per acre than in 1910. To offset this loss in plant food, which was formerly obtained from stable manure, will require the expenditure of between \$1,200,000 and \$1,400,000. Even then we lack that all-important effect of the inoculated organic matter contained in manure and for which no equally efficient substitute has been found."

While this disregards the cost of the manure formerly used to supply the plant food, it is probable that it was much less than the cost of the fertilizer now purchased. This problem is not confined to any one state, but with a few local exceptions is being felt throughout the territory in which vegetable crops are grown for the markets.

At the Lexington (Mass.) field station, which is conducted under the direction of the State College of Agriculture as an experiment station, what are termed "manure economy investigations" are being conducted. In these tests the use of stable manure in moderate quantities is being supplemented,

Problem of Keeping Live Stock to Maintain Soil Fertility Is Not Confined to Any One Section.

by commercial fertilizers, soil-building crops, crop rotations and other means of maintaining soil fertility.

Waste Is Utilized.

Growers of canning crops such as peas and sweet corn have for years past followed the practice of utilizing the vines, fodder and other waste in the form of silage for the feeding of sheep, beef cattle, or dairy cows, this practice supplying them with large quantities of manure. Renewed attention is now being directed to this practice, and in sections where the European corn borer has made its appearance many growers have found it desirable to erect silos for the utilization of the surplus material, feeding this to their stock, thereby securing manure for their crops, and also largely controlling the corn borer. The United States Department of Agriculture strongly recommends these practices wherever conditions will warrant the keeping of live stock.

STIMULANT AIDS SOME HENS

When Fowls Are Off Their Feed and Act Dumpy, a Little Pepper Will Brace Them Up.

(Prepared by the United States Department of Agriculture.)

A flock of laying hens in good health has no need for condiments, say poultrymen of the United States Department of Agriculture. A hen whose digestive apparatus is in good working order needs no more stimulation for egg production than is provided by a good, well-balanced ration, proper care and housing. But when hens are off their feed and look dumpy a little Jigger of pepper or something of the sort in the ration may cause her to pick up and run on all cylinders again.

Various snappy and pungent condiments are used for the purpose, but the following mixture has been found as good as any and may be made up by the flock owner at low cost: Mix equal parts of ground red pepper, ground allspice, ground ginger and ground cloves, and one-half part of ground fenugreek seed. Many of the condiments sold to flock owners are largely filler and sell for a high price. In the mixture given there is nothing but the essentials. A tablespoonful of the mixture in 2 quarts of moist mash 2 or 3 times a week or a teaspoonful in 1 quart daily should be

Don't Keep a Rooster—Hens Lay Better Without the Presence of a Male Bird.

fed until the birds are back in good order.

It is not good practice for poultrymen to feed these things when the flock is in good appetite. When feed attracts hens little more can be done to stimulate the egg organs.

Webster's Work on Dictionary.
Noah Webster began his preparation for his American dictionary of the English language in 1807 and published it in 1828. Previous to 1807 he had published a speller and "A Compendious Dictionary" both of which were probably helpful in the new undertaking. The American dictionary contained 12,000 more words and about 40,000 more definitions than had appeared in any English dictionary published before his.

Wealth That Works

Money saved and deposited in a bank is wealth that works. Wealth that works is capital. Unlike brain and muscle, it does not wear out or deteriorate. It grows and improves.

The only gain from labor is what is saved. Labor, therefore, makes wealth and when wealth works it is capital.

Capital at work pays wages, which, when saved, creates more capital. Labor is the producer when labor saves.

Savings bring independence. A savings bank is a public servant.

**BRILLIANT YOUNG ORATOR
 TO BE HEARD HERE**

Virgil I. Shepherd Will Discuss "The
 House We Live In."

Virgil I. Shepherd will deliver his
 lecture, "The House We Live In," at
 Chautauqua on the fourth afternoon.
 Mr. Shepherd is a deep student and a
 man with eloquent platform talents.
 His lecture is full of deep, profound
 philosophy and reasoning. He makes it
 most clear that the house we live in
 is absolutely our own to make or mar
 according to our own proclivities. The
 great things in life and to live for,
 as taught by Mr. Shepherd, are love,
 thought, consideration for all our fel-
 low men and for all the world.

POULTRY
 TURKEY HEN IS BEST MOTHER

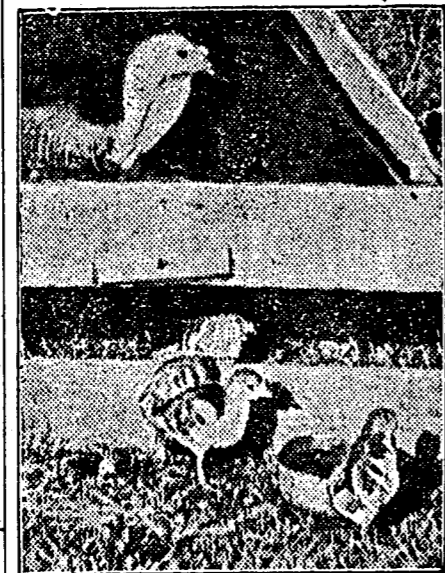

She Knows Wants of Poults and Can
 Talk to Them in Language
 They Soon Learn.

(Prepared by the United States Depart-
 ment of Agriculture.)

For poults the turkey hen is the
 best mother that can be found. She
 knows their needs and can talk to
 them in a language they soon learn
 to understand. At the approach of
 any danger she gives a low, warning
 note that sends them scurrying in
 every direction for a weed or patch
 of green grass where then can lie
 flat on the ground safely hidden from
 view. While on free range, she keeps
 her brood together by talking contin-
 uously in a contented, purring tone, so
 that the poults always know where
 she is.

When her poults become widely sepa-
 rated, or if some become lost, and
 she hears their "peep, peep," she calls
 them with the characteristic yelp
 heard so frequently during the laying
 season. Now and then, while the
 poults are but a few days old, she
 catches a grasshopper or other insect
 and calls the poults to come and get
 it. They soon learn to find their own
 feed, however, and range out ahead
 of the mother hen in search of what-
 ever they can find.

Young turkeys usually remain with
 the mother hen until about October or
 November, when the males ordinarily
 separate from the females and range
 by themselves. When two turkey hens
 with broods of about the same age
 are turned out on free range together
 they will remain in one flock, and as
 this makes it easier to hunt them up

The Turkey Hen Takes Good Care
 of Her Young.

and care for them, it is advisable to
 turn out two or three hens with
 their broods together when they are
 given free range. It is not a good
 plan to have more than this number
 of young poults in one flock, say poul-
 try specialists in the United States
 Department of Agriculture, as they
 may all try to crowd under one or
 two hens to be hovered.

Bat's Physical Limitation.

A bat cannot rise from a perfectly
 level surface. These winged mam-
 mals are remarkably nimble in their
 flight when once on the wing and can
 fly for many hours at a time without
 rest, but if placed on a floor or flat
 ground they are utterly unable to use
 their wings. The only thing a bat can
 do in such a situation is to shuffle
 helplessly and doubtless painfully
 along until it reaches some trifling
 elevation from which it can throw itself
 into the air. Then at once it is off
 like a flash.

EASY WAY TO WATER GARDEN

Line of Perforated Pipes Attached to
 Hose May Be Made Use Of to
 Irrigate Crops.

A special facility for watering the
 garden consists of a line of perforated
 pipe that may be attached to the hose
 and used to irrigate the crops. Where
 the land is nearly level, watering can
 be done very conveniently by dis-
 charging the hose into small furrows
 alongside the rows and irrigating the
 crops by the flooding or furrow sys-
 tem. Wherever the land is steep or
 uneven, the line of perforated pipe
 will distribute the water to better ad-
 vantage. This can be used where a
 water supply is available, but it is
 doubtful if it would pay for the small
 garden where special pumping ar-
 rangements are necessary in order to
 provide the water.—United States De-
 partment of Agriculture.

LITTLE THINGS COUNT MOST

Cause Many Farmers to Prosper Who
 Otherwise Would Be in Debt—
 Don't Overlook Them.

The chickens, the eggs, the butter,
 the fruit, the honey and other so-
 called little things have caused many
 farmers to prosper who would be in
 debt were it not for these little
 things. Nothing is little that enables
 men and women to live well and pro-
 per.

Fruits in Powder.

It would be very convenient to keep
 in the pantry fruit juices in the form
 of dry powders, so that one could mix
 a glass of lemonade or orangeade or
 other beverage offhand. They would
 be useful, also, for cooking. A newly
 patented process for making such pow-
 ders consists in mixing the fruit juice
 with gelatinized starch and reducing
 the solution to a dry product by atom-
 izing it into a current of dry, warm
 air.

INDUCE SHIPPERS TO BOX GOODS PROPERLY

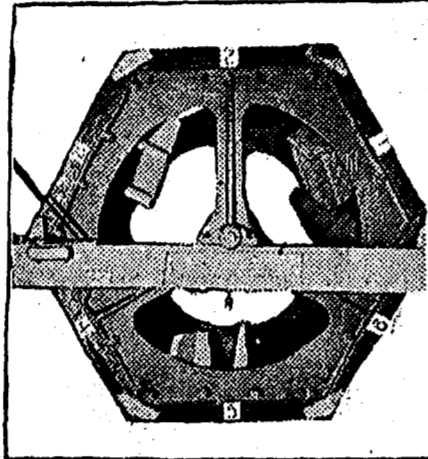

Chief Aim to Decrease Big Drain
on Timber Supply.

Transportation Company Also Endeavoring to Decrease Enormous Waste of Goods Due to Defective Packing.

(Prepared by the United States Department of Agriculture.)

"Perfect package month," a movement recently promoted by the American Railway Express company in an effort to induce shippers to pack goods better, will receive additional impetus from scientific investigations on box and crate construction by the Forest Products Laboratory, Madison, Wis., according to an announcement made by the Forest Service, United States Department of Agriculture.

In making a detailed study of boxes and crates, one of the chief objects was to eliminate waste of wood and thus decrease the drain on the timber supply. That this is highly important can be seen from the fact that nearly one-sixth of our total cut of timber goes into boxes and crates. The sec-

Box Testing Machine.

ond chief object of the study was to diminish the enormous waste of goods in transit due to defective packing.

By the use of special machinery designed at the Forest Products Laboratory, boxes can be artificially subjected to the same kind of shocks and strains they receive in actual transport. From these tests it has been possible to determine the correct amount and quality of material to use, the result of defects in the wood, the adaptability of different species of wood, and the best types of box and crate construction.

The results of these investigations have recently been compiled by the Forest Service and published in book form under a co-operative arrangement with the National Association of Box Manufacturers.

In addition the book includes the standardized specifications for box-making tentatively adopted by the American Society for Testing Materials, and also a key to the identification of the chief wood species used in the construction of boxes and crates. It can be obtained from the Secretary of the National Association of Box Manufacturers, Conway Bldg., Chicago.

The Point.

"My dear," asked Blackstone, fishing for a compliment, "what would you do if I should leave you?" "How much?" asked Mrs. Blackstone, absent-mindedly. — American Legals Weekly.

ERADICATION OF BARBERRY PLANT

Campaign Begun as Control
Measure Against Loss of
Grain by Black-Stem Rust.

BUSHES THRIVE EVERYWHERE

Plants Spread to Woodland, Pastures
Stream Banks and Fence Rows
by Distribution of Seeds by
Different Birds.

(Prepared by the United States Department of Agriculture.)

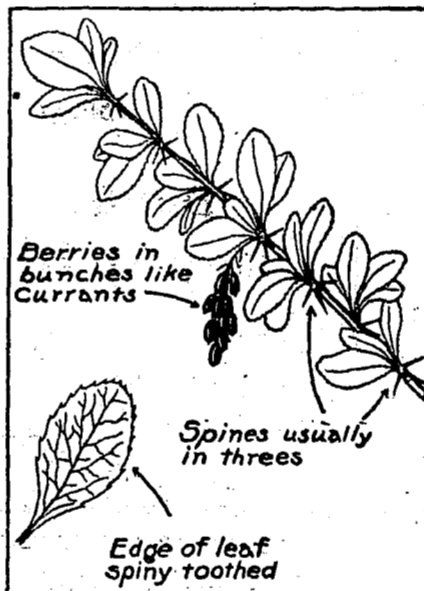

The job of eradicating the common barberry has proved to be a much more extensive one than was anticipated by the United States Department of Agriculture at the outset of the campaign in April, 1918. This campaign was begun as a control measure against the enormous losses of grain from black-stem rust. In years of moderate rust epidemics, the reduction in the yield of wheat alone has amounted to 50,000,000 bushels, while in 1916, the year of a very severe epidemic, there was a reduction in yield of 180,000,000 bushels in the United States alone.

Bushes Grow Everywhere.

In the grain-growing districts of the upper Mississippi valley, where the campaign has been carried on, it was supposed that barberry bushes existed chiefly as ornamental plants in the towns and cities. This was disproved during the first year of the campaign by the finding of 178,480 bushes on 1,166 rural properties. About 75,000 of these were scattered widely over 127 properties, showing that all country bushes are not confined to the farmsteads, but had been spread to woodland, pastures, stream banks, and fence rows by the distribution of seeds by birds.

With these facts in mind, the campaign was more vigorously pushed in 1919. As soon as the survey of most cities and villages was completed, a farm-to-farm survey of certain definite areas was begun. The results in 1919 were as follows: 338,000 bushes were found on 14,100 city properties, while 1,760,000 bushes were found on 4,800 farms. Of these last, 1,680,000 bushes were ones that had escaped from cultivation on 1,200 properties.

During the calendar year 1920 efforts were concentrated upon the farm-to-farm survey. A resurvey of cities and villages in the counties surveyed was carried on at the same time. In Ohio seven counties along the western

Berries in bunches like currants

Spines usually in threes

Edge of leaf spiny toothed

Common Barberry.

border were completed; in Indiana 19 counties; in Michigan five counties; in Illinois three counties; in Wisconsin four; in Iowa 17, in the northwest portion of the state; in Minnesota the equivalent of 15 counties in the southwest portion of the state; in Nebraska the equivalent of 16 in the eastern part of the state; in South Dakota nine along the eastern border; in North Dakota ten in the eastern portion of the state.

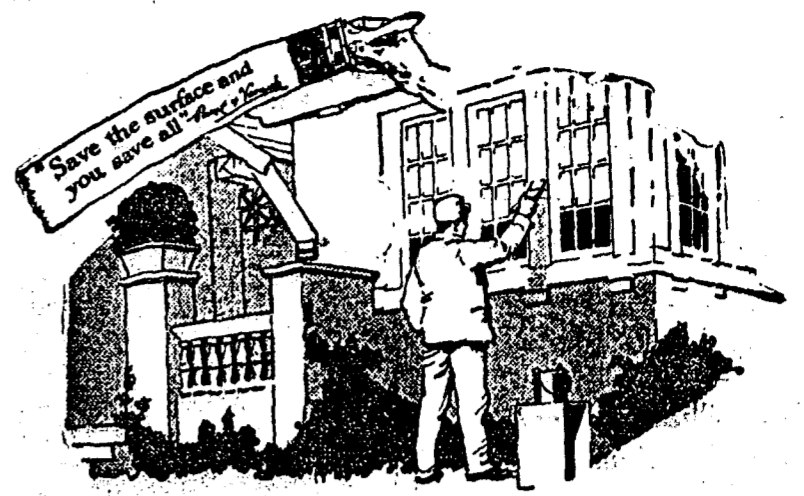

Many Bushes Removed.

In the entire campaign of three field seasons a total of 5,444,000 bushes have been found and 4,230,000 removed. Included with these, in so far as estimates were furnished, are hundreds of thousands of bushes removed from commercial nurseries during the early part of the campaign. The larger numbers were about 600,000 for Minnesota, 500,000 for Iowa, 200,000 for Wisconsin, and 75,000 for Ohio. Of the 1,214,000 remaining bushes about 1,000,000 are seedling bushes less than 18 inches in height in a single area in southern Wisconsin. The work for the field season of 1921 is to continue the farm-to-farm survey in as many counties as possible adjacent to those already completed.

LIMITED SUPPLY OF MANURE

Behooves City Gardener to Secure Fertilizer Needed for Soil in His Garden Plot.

The supply of manure in cities is now quite limited, and it behooves the city gardener to secure enough somewhere to fertilize his garden plot, especially if his soil is heavy, and lacking in organic matter. Where manure cannot be obtained, a number of crops, such as Irish potatoes, beans, peas, and tomatoes, can be grown fairly well by the aid of commercial fertilizers. Street sweepings are unsafe to use if they contain much oil or tar—United States Department of Agriculture.

You Save Big Repair Costs by painting now

YOU can't escape. Either you paint your home when it needs it or you spend from five to ten times as much rebuilding what has rotted away for lack of paint protection.

Painting costs so little compared to the service of saving it renders, that failure to paint is utter extravagance.

Painting is economy, and an additional economy is found in using the best paint. It spreads easily—saves labor cost. It covers more area per gallon than "cheap" paint.

But most important, the best paint serves five or more years longer than "cheap" paint. It assures better results at a lower cost in the long run.

We have been making the best

paints for 73 years—to meet the weather conditions in the West.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc, and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.

Free Advice on Painting

Ask our agent for advice, color cards, etc.

Ask the Fuller Specification Department about the most desirable color schemes, color harmony and any other details.

Put Your Eggs Down For Winter

Strictly fresh eggs are at their cheapest NOW. As the season advances, they are bound to increase in price. It is a simple matter to have plenty of fresh eggs at spring prices next winter.

A Quart of Water Glass at 40c

will take care of about 10 dozen eggs, thus only increasing the price about 2c a dozen.

Directions

Boil a kettle of water for 15 minutes, counting from the time the boiling commences. This kills the germ life. Set aside to cool. Empty a quart of Water Glass into an earthen jar or wooden bucket. Add 9 quarts of boiled, cooled water. Stir. That's all there is to it.

Put your fresh eggs into this solution and see that all are under water. Cover to prevent evaporation.

The Red Cross Pharmacy

FOR SALE

One 3½ ton Garford truck with platform for grain hauling.
Five "Reo" Speed Wagons, chassis only.
One "Dodge" light truck, chassis only.
One "Buick" light truck, chassis only.

The Reo Speed Wagon is recognized as the best light truck built, capacity 1½ to 2½ tons. These light trucks came into our possession by failure of bakery in Seattle, and have been run on city streets only. Suitable for stage lines, general utility farm truck, or build your house on one and tour the country—prices on light trucks \$500.00 to \$800.00.

Price on large truck \$2000.00—cost price new was \$4800.00. Truck is in first class condition, just been over-hauled. For further information apply to our local agent, or call and see the trucks here in Lewiston.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctors prescribed local remedies, and by constantly failing to cure with local treatment, pronounced it incurable. Catarrh is a local disease, greatly influenced by constitutional conditions and therefore requires constitutional treatment. Hall's Catarrh Medicine, manufactured by F. J. Cheney & Co., Toledo, Ohio, is a constitutional remedy, it taken internally and acts thru the Blood on the Mucous Surfaces of the System. One Hundred Dollars reward is offered for any case that Hall's Catarrh Medicine fails to cure. Send for circulars and testimonials.
F. J. CHENEY & CO., Toledo, Ohio.
Sold by Drugists, 75c.
Hall's Family Pills for constipation.

Whooping Cough
This is a very dangerous disease, particularly to children under five years of age, but when no paregoric, codeine or other opiate is given, is easily cured by giving Chamberlain's Cough Remedy. Most people believe that it must run its course, not knowing that the time is very much shortened, and that there is little danger from the disease when this remedy is given. It has been used in many epidemics of whooping cough, with pronounced success. It is safe and pleasant to take.—Adv.

Softening Hard Putty.
Putty that has become hardened by exposure, as around window glass, may be softened and removed by the use of the following mixture: Shake 3 pounds quicklime in water and add one pound pearlash, making the whole about the consistency of paint. Apply to the putty on both sides of the glass and let it remain for about 12 hours. It should then be possible to lift the glass out without trouble.

Leland Items

Mr. and Mrs. Jesse Hoffman drove to Cheney, Saturday, to visit Mrs. Hoffman's parents. They returned Tuesday accompanied by Mrs. Spears, mother of Mrs. Hoffman, and sister, Miss Ruth.
Ralph Smith, Roy Blankenship and Chas. Hoffman started Wednesday for the North Fork on a fishing trip.
Rev. and Mrs. Hall visited friends in Southwick, Wednesday.
Mr. and Mrs. Locke entertained Dr. and Mrs. Seeley and son, Paul, at dinner, Sunday.
Mr. and Mrs. DeWinter took their little son, Adrian, to Lewiston Sunday to have his broken arm dressed.
Mr. and Mrs. Lloyd Kuykendahl went to Lewiston, Sunday, to visit Mrs. Koepf who is in the hospital. They report her improving nicely. We hope to soon see her home again.
The Epworth League held their business and social meeting at the school house, Friday evening. There were fifty-six present. After the business session games were played, after which refreshments were served.
Either this scribe or the editor made a mistake last week in the date of the picnic. It will be Thursday, June 15, instead of the 16th as stated last week.
Miss Dora Vincent is up from Lewiston visiting relatives this week.
Mr. and Mrs. Art Webster and three children from Palouse, visited over Sunday with Mr. Webster's sisters, Mrs. Smith and Mrs. Oylear.
Mrs. Phillip Dougherty left Friday for Boise where she expects to remain.
Mr. and Mrs. Harry Smith visited the latter's parents in Southwick, Sunday.
Claud Craig is improving his home property by erecting a new granary and an engine house, each with cement foundations.

Miss Leafy Simpson, the assembly president of Rebekahs met with the lodge here Friday evening. The members enjoyed a social evening. Ice cream and cake was served for refreshments. Miss Simpson was entertained overnight by Mrs. Seeley.

Mrs. Ed Johnson had what came near being a fatal accident, Tuesday. The little Johnson boys were hauling a load of hay and she was riding on top of the load when the wagon tipped over, pinning her underneath the load, where she remained until the boys took forks and removed the hay so she could get out. Her arm is bruised also her side where the pole struck her, but nothing serious, so Dr. Seeley reports.

Mr. Albert Thornton found one of his best horses dead in the pasture last week.

Kenneth Hund spent the week end with Claude Cook.

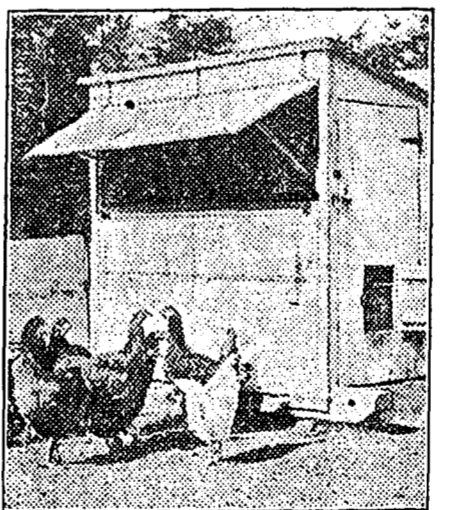

**FARM
POULTRY**

CRESOL GOOD DISINFECTANT

Added to Water It Makes Excellent Solution for Spraying Houses or Premises.

(Prepared by the United States Department of Agriculture.)

The kerosene emulsion which is frequently used to destroy mites may readily be converted into a disinfectant, according to the United States Department of Agriculture. The emulsion is made by shaving one-half pound hard laundry soap into one-half gallon soft water. Boil the mixture until soap is dissolved and then, after

Poultry House That Can Easily Be Disinfected.

removing it to a safe distance from the fire, stir into it while hot 2 gallons of kerosene. This makes the stock mixture. When it is to be used as a louse killer, 1 quart of the emulsion is mixed with 10 quarts of water. When it is to be used as a disinfectant, stir well and add 2 pints of crude carbolic acid or crude cresol. The compound solution of cresol is one of the best disinfectants that can be purchased ready to use. It contains 50 per cent of cresol and a pint of it in 10 quarts of water makes the right solution to apply to houses or spray over the ground. A 5 per cent solution of carbolic acid (1 pint carbolic acid, 10 quarts water) is about equally efficacious.

**TEMPERATURE OF
MILK IMPORTANT**

Results of Experiments Obtained by Dairy Experts Explain Why Product Sours.

SURFACE COOLER IS FAVORED

Coldest Water Obtainable Should Be Used and Cans Set in Well Insulated Tank—Protection Needed in Shipping.

(Prepared by the United States Department of Agriculture.)

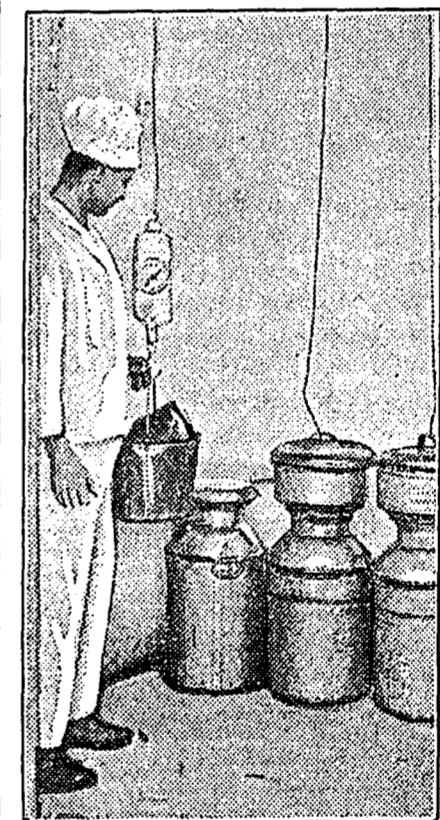

Milk of ordinary quality held at 75 degrees Fahrenheit, a temperature not uncommon in the summer, soured in 36 hours, while the same quality of milk held at 55 degrees kept sweet for 80 hours, and at 40 degrees for 180 hours. These results were obtained in an experiment carried on by the dairy division, United States Department of Agriculture, to determine the effect of temperature on the milk; and the results explain in a large measure why milk which has not been cooled on the farm—and kept cold—often is sour when it arrives at its destination.

The best and quickest way to cool milk to 50 degrees Fahrenheit is over a surface cooler. Use the coldest water available, and then set the cans of milk in a well-insulated tank filled with water below 40 degrees Fahrenheit. A 10-gallon can of milk precooled with water at 55 degrees Fahrenheit and set in a tank of ice water at 37 degrees Fahrenheit was cooled at 50 degrees in 20 minutes.

The use of a surface cooler is especially necessary when the time between milking and shipping is short. If warm milk is run over a surface cooler, and then set in a tank of water cooled with ice to 40 degrees Fahrenheit or below, it should not be difficult to cool milk to 50 degrees within an hour after it leaves the cow. Because precooled with a surface cooler is not practiced and ice is not put into the cooling tank before the milk, much milk reaches the shipping station in summer at so high a temperature that it sours on the way to the city.

On many farms the water used for cooling milk comes from the general storage tank or from a spring. The temperature of such water when it reaches the cooling tank is much higher than when it leaves the well or spring. Well or spring water that has a temperature of from 50 degrees to 55 degrees Fahrenheit frequently is warmed up to 70 degrees or 75 degrees

Fahrenheit before it reaches the cooling tank. Even under the best conditions, milk transported during hot weather usually is several degrees warmer by the time it reaches the railroad station. To show the importance of protecting milk in transit during hot weather, four ten-gallon cans of milk cooled to 44 degrees Fahrenheit were hauled 13 miles from a farm to the railroad station. Can No. 1 was an insulated type; No. 2 was an ordinary can covered with a one-inch felt jacket; No. 3 was covered with a half-inch felt jacket, and No. 4 was an ordinary, unprotected can. During the trip, with the air temperature at 80 degrees Fahrenheit, the milk in the insulated can rose one degree in temperature, the milk in the cans protected with jackets rose six degrees, and the milk in the unprotected can rose 20 degrees. The cans were then shipped by rail in an ordinary baggage car for more than 1,000 miles at an average air temperature of about 80 degrees Fahrenheit, to study the effect on the milk. In the unprotected can the milk had reached a temperature of 60 degrees Fahrenheit in two hours, or after it had traveled about ten miles from the farm (before reaching the railroad); the milk in the can covered with the half-inch jacket reached 60 degrees Fahrenheit only after 11 1/2 hours, or about 268 miles of travel; the can covered with the one-inch jacket traveled for 13 hours, or about 332 miles, before reaching 60 degrees Fahrenheit, and the milk in the insulated can did not reach 60 degrees Fahrenheit until after 25 hours, or 650 miles of travel.

Milk Should Be Cooled Immediately After It Is Drawn.

PHOTOGRAPHER COMING

G. V. Barker, the photographer from Grangeville will be taking pictures in Kendrick, Sunday, Monday and Tuesday, June 4, 5, and 6, and Juilaetta, June 1, 2, and 3. Leave order at drug store. 21-2t.

Starch in Human Foods.
Starch is the only food that is changed in any chemical way in the mouth. Starch is gradually changed into sugar in the alimentary canal, the first process taking place in the mouth. Other foods are merely ground up and softened, in preparation for action by other juices.

Easy to Tap Vein of Humor.
John Kendrick Bangs, the humorist, long enjoyed the reputation of being one of the most consistent quality producers of jokes in the trade. "I've trained myself so that I can get up from the dinner table, lock myself in my room, and write 25 jokes any evening," he once told a friend.

Chamberlain's Colic and Diarrhoea Remedy

Every family should keep this preparation at hand during the hot of the summer months. It is almost sure to be needed, and when that time comes, is worth many times its cost. Buy it now.—Adv.

**"Over The Hill"
Tonight and Saturday**

There has been so much said in magazines and newspapers all over the country about the sensational run of "OVER THE HILL" in New York for a full year, prior to its general release, that it seems almost superfluous to dwell at length on its merits. Suffice it is to say that the superb film drama was made by Wm. Fox, and has for its theme the divine love of a Mother. Mr. Oldfield feels he has accomplished for the people of Kendrick and vicinity an achievement not enjoyed by a great many exhibitors outside of the larger cities by getting "OVER THE HILL" for Kendrick. While the story is one calculated to reach, by its strength of sentiment, the heart of the most callused playgoer, it has nevertheless many lighter moments when the risibilities are tickled by some of the most delightful comedy ever flashed upon the screen. At the New Kendrick theater, Friday and Saturday, June 2 and 3.—Ad.

GLEANINGS

Ross Hoffman of Kooskia was in Kendrick on business last week. Mr. Hoffman carries the mail from Kooskia to Lowell.

Prof. and Mr. L. A. Daniel and children went to LaCrosse, Monday, to spend a week at the home of Mr. Daniel's mother.

Miss Dyrks and Miss Steward left Monday afternoon for their homes at Lewiston.

Mrs. Pearson and son, Kenneth, of Spokane, and Miss Pearson of Seattle, arrived last Friday afternoon for a visit at the home of Mrs. Pearson's daughter, Mrs. G. G. Oldfield. Mr. and Mrs. Oldfield and son, Max, returned to Spokane with them Sunday and drove back in their car Tuesday evening.

Miss Florence Hollada came down from Moscow Sunday with a party of friends for a brief visit with her mother and sisters.

Luther Hampton of Lewiston was transacting business in Kendrick, Tuesday morning.

George Davidson of American ridge was a Moscow visitor the first of the week.

Little Miss Vivian Wegner returned home from the hospital at Moscow, Wednesday afternoon. It is thought that her condition is much more favorable and that she will soon recover from her illness.

The chautauqua at Juliaetta, which ended Monday night, is said to have been a decided success. Juliaetta people signed up with the same company for next year.

Mr. and Mrs. Carl Wegner returned last Saturday from a week's visit with their son at Fairfield, Wash.

Prof. Carlisle left Saturday for his home at Oakesdale, Wash. He will teach at Cashmere, Wash., next year.

Carroll Cox of American ridge made a business trip to Moscow, Tuesday.

Oscar Torgerson left the first of the week for Elk River where he has employment.

Miss Edna Janes underwent an operation for appendicitis at a Moscow hospital Thursday of last week. She is recovering rapidly.

J. H. Phillips of Clarkston was transacting business in Kendrick the first of the week.

There were fifteen automobiles from Kendrick and Big Bear ridge at the ball game at Bovill last Sunday. Kendrick rooters almost equalled Bovill fans in number.

Charles Cummings and wife of American ridge were Sunday guests of Mr. and Mrs. Ben Cummings.

Mr. and Mrs. William Rogers were in Moscow Sunday to visit their little niece, Vivian Wegner, at the hospital.

Mr. and Mrs. Bob Cain of American ridge returned Tuesday afternoon from a business trip to Spokane.

Ernest Bolon left the first of the week for Helena, Montana, where he has a job shearing sheep. He expects to be gone about a month.

N. B. Long was in Moscow on business Tuesday morning.

Mrs. E. E. Erickson and children went to Reubens, Monday, where they will spend a week visiting friends and relatives.

Mrs. E. V. Melony, better known here as Margaret Terry, arrived from Minneapolis last Saturday to visit friends and relatives here.

Mr. and Mrs. Theo Hanson and family drove to Lewiston Tuesday where they spent the day.

All business houses in Kendrick closed Tuesday afternoon in observance of Memorial Day.

Mr. and Mrs. A. W. Perryman and family spent Tuesday afternoon in Juliaetta with relatives.

There is one thing we have never been able to figure out. Why does the fishing season always open on our busy day?

Juliaetta defeated the Lapwai Indians last Saturday by a score of 5 to 4. The game was played on the Juliaetta diamond.

Members of the Okoke Klouthman Club will entertain at a theater party at the New Kendrick tonight. A section has been reserved in the theater for the club.

Miss Virginia Dermott left Wednesday afternoon for her home in Moscow.

Clelland Sullivan, of Rupert, Idaho, who is attending the University of Idaho, spent the week end at the home of Mr. and Mrs. Theo Hanson.

Mr. and Mrs. E. C. Babcock of Texas ridge were shopping in Kendrick, Wednesday.

Brian Deobald bought an interest in the Kendrick Garage Co. this week. There are now three members in the firm—Deobald brothers and Herman Schnupper.

H. H. Sparber of Anatone, Wash., is visiting his brother in Kendrick this week.

The Epworth League of the Methodist church had a picnic and weinier roast Tuesday afternoon.

Mrs. Charles Riggie went to Spokane Saturday to visit her children. From there she went to Amber, Wash., where she has a sister. Her eldest son, C. T. Riggie, also lives at Amber.

Miss Mable McKeever arrived home the first of the week to visit her parents.

Joe Gardner, local water commissioner, has been doing some good work developing springs that supply water for the Kendrick system. He now has a four inch overflow at the reservoir. He stated this week that under ordinary conditions there will be plenty of water through the dry months this summer.

Charles Riggie reported ripe strawberries in his patch Wednesday of this week. He has the Ever-Bearing variety.

Members of the Circle Card Club and a few guests enjoyed a "weiner roast" in the grove below the Onstott place. The picnic was given by Mr. and Mrs. John Kite and Mr. and Mrs. A. McCrery.

Mrs. N. E. Ware was called to Orohno Tuesday afternoon, on account of the illness of her daughter, Mrs. Stewart Compton.

Dr. S. A. Roe and son, Richard, of Lewiston, were Kendrick visitors Tuesday afternoon.

The Lapwai Indians will play Kendrick here Sunday afternoon. The Indians have a fast team and have been playing good ball all season. A big crowd is expected at this game.

Bob Spencer made a business trip to Spokane, Wednesday afternoon.

Dr. J. T. Moser arrived Thursday from Lewiston to look after his farming interests in this locality.

Milton Benjamin secured the contract of furnishing wood for the Kendrick school this summer. His bid was \$5.85 for 42 inch wood, which is considered a very reasonable figure.

Mrs. C. J. Allenbach and two children arrived last week from St. Paul for a visit at the Petrick home. Her sister, Mrs. S. I. Mayer of Seattle arrived Tuesday afternoon and will spend a month here.

Donald and Walter McCrea, Jr., left this morning for the homestead in the Three Bear country. They expect to spend the summer there.

Herman Schnupper left Thursday morning on a business trip to Orofino and Weippe.

Linden News

Mrs. Rube Garner spent Friday afternoon with Celia McPhee.

Mr. and Mrs. Granvill Wall spent Sunday at Elmer Hudson's.

Mr. and Mrs. Quick spent Sunday with Mr. and Mrs. John Carr.

Mr. and Mrs. Jennings and children spent Sunday at Ed Fonburg's.

Mrs. Frank Lyons and children spent Sunday afternoon with Mr. and Mrs. Arthur Bohn.

There has been a large amount of alfalfa sowed this spring. Most every farmer seeded some.

Mrs. Bud Harris and children spent Tuesday at Gus Farrington's.

The Winegardner family of Leland spent Sunday at the Dick Winegardner home.

Most of the people of the ridge observed Decoration Day by going to the cemetery Tuesday afternoon.

Mr. Winegardner and children called at the Eva Smith home, Wednesday.

Mrs. I. E. Foster and children and Mrs. Earl Langdon went to Southwick Tuesday for Memorial services.

Mrs. Hattie Alexander spent the week end at the Lou Alexander home.

A. R. Garlinghouse of the Lewiston Marble and Granite Works erected a monument for the Smith girls, Monday.

Most of the farmers will finish seeding this week.

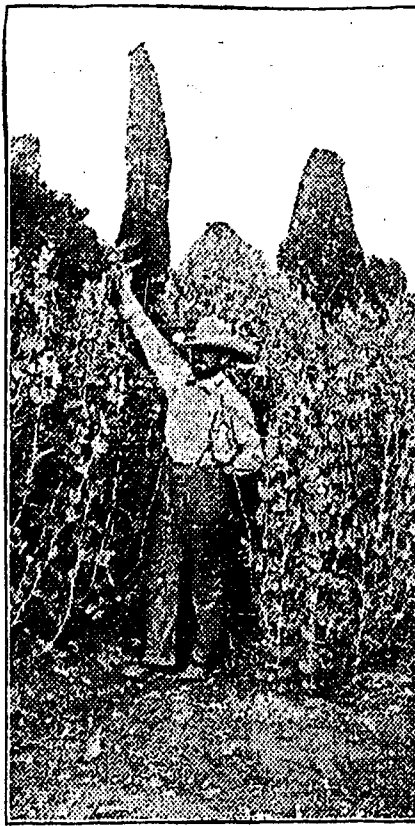

CONTINUOUS SUPPLY OF PEAS DESIRABLE

Should Be Planted as Soon as Soil Can Be Got Ready.

First Plantings Should Be of Small-Growing Varieties—Sow Some Seed in Late Summer or Autumn for Fall Garden.

(Prepared by the United States Department of Agriculture.)

Garden peas, sometimes called English peas, are not injured by light frosts, so should be planted as soon as the soil can be put in order in the spring. The first plantings should be of small-growing, quick-maturing varieties, such as the Alaska, First and Best, and Gradus, which do not re-

Tall-Growing Peas Supported by Brush Stuck in Ground.

quire supports. These varieties should be followed by the large wrinkled type of peas, such as the Champion of England, Telephone, and Prize Taker. The large-growing varieties should be supported on brush, or strings attached to stakes driven in the ground, or on wire netting. In order to have a continuous supply of peas, plantings should be made every ten days or two weeks until warm weather. Peas should be planted in late summer and autumn for the fall garden, for which the early varieties are more desirable than the late ones.

Peas should be planted about 10 seeds to the foot, two to three inches deep, in rows three to four feet apart. Some gardeners, however, follow the practice of planting in double rows six inches apart, with the ordinary space of three to four feet between these pairs of rows. This is a good practice with varieties requiring support, as the supports can be placed in the narrow space between the rows.

MANNER OF HANDLING TREES

Much Loss Caused by Lack of Experience and Skill in Caring for Nursery Stock.

Many persons inexperienced in handling trees lose a number of trees in setting an orchard because of their lack of skill or acquaintance with handling such plants. It must be remembered that from the time the trees leave the soil of the nursery until they are firmly planted in the orchard, the roots should be exposed to the air as little as possible, and especially to air that is moving rapidly, or which is dry. Trees should not be left with their roots exposed to the sun or wind any longer than can possibly be avoided. When waiting to be planted they should be heeled in, that is, have their roots covered with moist soil, and should be taken out only as actually needed for immediate planting.

LEGS ARE QUITE IMPORTANT

Not Only Necessary as Means of Locomotion, but They Help Appearance of Fowls.

The legs of fowls are important not only as a means of locomotion, but also in regard to the appearance of the fowls. Therefore, the legs deserve proper care and attention from every poultry raiser.

Sulphurous Language No Good. The furnace is patient and long suffering. No matter how much the householder may swear at it, the furnace never gets hot just for that.—Boston Transcript.

Patricia Trio at Chautauqua

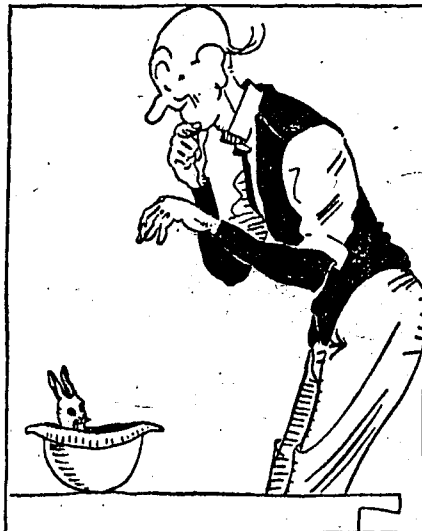

Personnel of Unusually Gifted Artists

Miss Patricia Hale, soprano with the Patricia Trio, is a product of two of the largest conservatories of this country and completed her vocal education by studying under some of the best masters in New York City. She has a beautiful soprano voice, particularly well adapted to operatic arias, as well as lighter songs and ballads. Beulah Margolis, dramatic reader, is a pupil of Isabel Garghill Beacher, well known in Lyceum and Chautauqua circles. She is a very capable reader and dramatic impersonator. The third member of this unusual company is A. W. Callam, baritone, of Montreal, Canada, who has successfully concertized in the United States for the past two years. Many of the numbers are given with Irish harp accompaniment, played by Miss Beulah Margolis. The Irish harp is one of the most desirable of accompanying instruments.

Buy your Season Ticket Now for the Big Chautauqua June 20th to 24th Inclusive.

UNCLE HANK

There's a lot of young fellows who seem to think that a marriage certificate is a secret of how to pull a live rabbit out of an empty hat.

Recommends Chamberlain's Tablets

"Chamberlain's Tablets have been used by my husband and myself off and on for the past five years. When my husband goes away from home he always takes a bottle of them along with him. Whenever I have that heavy feeling after eating, or feel dull and played out, I take one or two of Chamberlain's Tablets and they fix me up fine," writes Mrs. Newton Vreeland, Minoa, N. Y. Take these tablets when troubled with constipation or indigestion and they will do you good.—Adv.
