

### Edward Ameling

Edward Ameling died June 10, 1922. He was born at Nebraska City, February 1868. From there he moved with the family to Marshall County, Kansas in 1878 where he spent the remainder of his childhood days. Then, in 1890, when a young man, he came west to visit a sister, and being so favorably impressed with this part of Idaho, he went back to tell the rest of the family of this wonderful northwest. So they all sold out, and the entire family moved to this part of Idaho in 1891. Uncle Ed, as he was commonly called, was a favorite of the family, and a friend of everybody who came in contact with him, on account of his kind and happy disposition.

Since his mother and stepfather passed away in 1897 and 99, he made his home with a sister, Mrs. Jacobus, who was his faithful housekeeper and comforter during those years of ill health. His death was due to chronic stomach and kidney trouble, his last sickness being of only six days duration. The news came as a shock to the family, as he had assured his folks that he would be well again, and talked of his regular vacation to the mountains again this summer.

He was a good business manager and strictly honest in every respect; a great help and counsellor to his three widowed sisters.

He was a firm believer in the bible, and strictly followed the Golden Rule of the Master's teaching.

He leaves to mourn his loss, one brother, Charles A. Ameling, and five sisters, Mrs. Sarah Jacobus, Mrs. Mary A. Deobald, Mrs. Julia Brocke, Mrs. C. W. Jessup, Mrs. C. Eichner, and twenty-two nieces and nephews, besides a host of friends.

The funeral was held at the American Ridge church, Rev. Kein officiating. The text was the I. Thessalonians, 4th chapter, 13th verse.

The floral offerings were beautiful and interment was made in the American Ridge Cemetery where the family now has ten of their loved ones at rest. The following six nephews acted as pallbearers: Harry Ameling, C. E. Watts, Wm. Watts, Edwin Debbald, Bryan Deobald and George Brocke.

Those attending the funeral from a distance were Dr. C. E. Watts and son from Seattle, Wash., Mr. and Mrs. Roy Thompson and son from Nezprce, Idaho, and Miss Lula Eichner of Lewiston.

### Building at Moscow

Star-Mirror: Work will commence in a very short time on the construction of a modern brick building to house the retail department of the Moscow Union Warehouse company. At the stockholders' meeting, held Saturday afternoon, it was voted unanimously to construct a new building, to take the place of the one destroyed by fire two weeks ago. The building will be erected on the site of the former building, the concrete foundation of which is intact.

The new structure will be 50x110 feet, one story, and will have a 50x50 basement. It will be modern in every respect, with heating plant, large plate glass show windows, etc., and will not only afford a convenient and comfortable place in which to carry on the business of the organization, but will add much to the appearance of that part of Main street. The cost of construction will be approximately \$25,000. Bids will be requested as soon as the architect completes the plans.

It was also voted at the Saturday meeting, which was a most enthusiastic session, to build a large brick warehouse and implement room adjoining the store building, the contract not to be let, however, until after the store building has been completed and ready for occupancy which it is thought will be about September 1.

The company will carry on its business in the large tent where it is now doing business until the new storeroom is completed.

### Kendrick 5, Pullman 3

Last Sunday afternoon another good game of baseball was played on the local diamond. The game scheduled with Lapwai was cancelled Saturday, so Manager Wilcox got Pullman on the wire to fill in the date. On account of the short notice and the fact that it was impossible to advertise the game, the crowd was not as large as usual but what it lacked in numbers was made up in enthusiasm.

The locals made frequent errors, eight in number, but they were scattered and the team tightened up at critical places in the game. In the sixth inning the score was tied with three runs each and in the eighth Kendrick led by a margin of two, the lead being held until the end of the game.

Egnaz Flaig got four bases on a single to left field, as the ball was lost in the grass. Boyd played a splendid game and made some spectacular catches in left field.

The battery for Kendrick was Rocky and Herres. For the visitors, Anderson and Starret.

Pullman made 5 hits and 4 errors; Kendrick 3 hits and 8 errors. Starret struck out 3 and walked 5; Rocky fanned 10 and walked 2. Umpire, Dr. Veon.

### Big Bear Ridge

Mr. and Mrs. P. T. Ranniger and children, Mr. and Mrs. J. T. Ranniger and children and Miss Jeanette Slind autoed down from Spokane to spend the week end at the J. J. Slind and Halvor Lien homes.

Miss Doris Olson of Spoltane is the guest of Miss Bertina Forst.

Mr. and Mrs. Ira Altig and Mrs. Emma Gladden of Deary were Sunday visitors at the Fred Gladden home.

Adolph, Edwin and Miss Bertina Forst were Moscow visitors Thursday.

Miss Ollie Morey is home from Spokane to spend her two week's vacation.

Mr. and Mrs. Lewis Aas and daughters, Miss Vera and Edna, and Mrs. P. Hesby and children, of Deary, were week end visitors at the Ed Lien home.

Miss Wilma Fairfield was visiting her sister at Craigmont, last week.

Ingvald Aas of American ridge spent Sunday with relatives here.

Rev. G. A. Morton of Kendrick delivered a splendid sermon here Sunday morning. His topic was "American Homes."

Mr. and Mrs. Hjalmer Dalberg and children of Avon, were Sunday visitors at the Halvor Lien home.

Mrs. Kate Galloway and children, John and Miss Mary, were Moscow visitors Saturday.

Harvey and Frank Fairfield were Lewiston visitors the first of the week.

John Halseth of Kendrick spent last week at the home of his brother, Ed.

Fred Hecht and A. Hooker autoed to Lewiston, Sunday.

Mr. and Mrs. James S. Nelson and children of Clarkston, were Sunday visitors at the D. Stevens home near Deary.

The women and girls who were interested in the extension work offered by the university of Idaho, met at the Taney school house, Thursday afternoon. Mrs. K. Ingle was elected project leader, Mrs. A. N. Rognstad, assistant. Miss Ada B. Irwin, home demonstration agent of the U. of I. will be here at a later date, when the making of dress forms, sewing and millinery will be taken up.

The Lutheran Ladies' Aid realized over thirty three dollars by the selling of ice cream, cake and coffee at Taney, Saturday. They wish to thank the community for their generous patronage.

Miss Claribel Ingle returned to Clarkston last week. Miss Alta Moore accompanied her for a visit and to attend the Rose Carnival held in Lewiston, Friday.

Miss Emma Aas entertained the Girls' Sewing Club, Tuesday afternoon.

A deer was seen crossing the field at the Ed Lien place on Big Bear ridge, Wednesday morning about 8 o'clock. It was headed in the direction of Atwater Lake when last seen.

### Here for a Three Months' Stay

### Cherries

### Juliaetta Won Game

Tuesday afternoon Kendrick again went down to defeat at the hands of the Juliaetta baseball team, by a score of 9 to 5. Juliaetta took the lead in the first inning and maintained it throughout the game, although there were several critical stages that looked promising for the locals but everything seemed to "break" wrong and it was impossible to even up the score.

Roberts playing short for Kendrick was the star of both teams. He got an unusual number of chances and fielded his position well.

Batteries were: Kendrick, Rocky and Herres; for Juliaetta, Trigby and Clark. Hits: Kendrick 8; Juliaetta 11. Errors: Kendrick 7; Juliaetta 7.

Kendrick and Juliaetta will play again at Juliaetta Sunday afternoon.

### Leland Items

There was a very good attendance at the picnic, Thursday. The weather was ideal and a very interesting program was rendered by the Sunday school. Rev. McKee of Walla Walla was present and made a very interesting talk along Sunday school lines. The missionary ladies realized about seventy-five dollars from their stand.

Mr. and Mrs. R. B. Parks drove to Spokane, Saturday, returning Monday.

Mrs. R. M. Smith and Mrs. Lelia Webster were Moscow visitors, Monday.

Claud Craig has improved his little green cottage on Main street by building on a porch.

Quite a number of Lelandites are attending the chautauqua in Kendrick this week.

Mr. Woodward drove a number of nice fat hogs to market, Monday.

Mrs. Cook and sons, visited over Sunday with relatives in Lewiston.

Those who won prizes in the sports on the afternoon on picnic day were: Sack race for boys, Herbert Goudzward; sack race for girls, Zella McVicker; three-legged race, Herbert Goudzward and Virgil McVicker; fifty yard dash for girls, Lelia Webster; fifty yard dash for boys, Homer Parks.

Mrs. Denzie Kuykendall is staying with her mother this week, helping with the work.

### The Chautauqua

Good sized crowds have been attending the first three days of chautauqua here. Wednesday night nearly all seats were taken in the big tent. While the season ticket sale was not large, the general admissions have been fairly good. The ideal weather conditions prevailing have been a great boon to chautauqua.

This afternoon the Biltmore Orchestra will give a concert prelude, which will be followed by a lecture by V. I. Shepherd. His subject will be "The House We Live In". The evening program will be a concert by the Biltmore Orchestra.

Saturday afternoon the Garner Jubilee singers will be heard in concert. The Junior Pageant will follow, under the direction of Miss Dunbar, Junior Supervisor. The evening will be a grand closing concert by the Garner Jubilee Singers, featuring plantation lullabies, folk songs of the South, operatic and concert numbers.

### D. V. B. S?

The churches of Kendrick are very much interested in the D. V. B. S. they are intending to hold in the churches for a period of two weeks beginning July 10. They have secured several instructors and hope to have a strong teaching staff. They could use a few more very easily thereby lightening the load for all.

Rev. J. W. Hoyt, Sunday School Missionary of Walla Walla, Wash., will be here Sunday, June 25, to instruct the leaders and give a demonstration school Sunday afternoon. All children between the ages of four and fifteen are urged and welcome to enroll. Parents are invited to come and see for themselves what the Daily Vacation Bible School attempts to do for the children. Watch the paper next week for information about it.

The Ladies' Aid of the Presbyterian church elected officers last Friday afternoon at the home of Mrs. H. P. Hull. Following is the list of names: Mrs. Leo Raaberg, president; Mrs. M. B. McConnell, vice president; Mrs. Edgar Long, secretary; Mrs. A. V. Dunkie, treasurer.

### For Non-Partizan Judiciary

Star-Mirror: The Latah county democratic committee is in favor of a non-partisan judiciary, and will not put a candidate in the field in opposition to Judge Edgar Steele for judge of the district court, according to the sentiment expressed at the central committee meeting held Tuesday afternoon in the chamber of commerce rooms. The meeting was given over largely to a discussion of organization for the coming campaign, and to consider candidates for the various county offices. While no definite action could be taken regarding candidates, as it is an open field, and any one who wishes may file for office, the central committee discussed candidates and the various committees will carry the sentiment from the committee meeting to the party workers in their various precincts, for further consideration.

The sentiment at the meeting Tuesday was in favor of a full county and legislative ticket and while up to the present time the records at the county auditor's office fail to show the filing of any democratic candidates, it is understood that before the close of the week there will be a number of filings.

### Texas Ridge

Albert Pierce and Herman Baker were transacting business in Troy one day last week.

Mr. and Mrs. James Pierce visited with Mrs. Tout last Wednesday.

Mrs. Chas. Dahlgren and children visited with Mrs. E. C. Babcock, Thursday.

James Miller lost a valuable cow last week. She was dead when found. It looked as tho she had fallen and got her feet wedged under a log.

Mr. and Mrs. Albert Pierce were at Bovill, Friday.

Little Geraldine Bogar has been on the sick list.

Mr. and Mrs. Ogden and Mrs. James Miller were Sunday guests at the L. K. Dahlgren home.

Mr. and Mrs. Ray Bogar spent Tuesday at the W. H. Head home.

Mr. and Mrs. Lewis and Jack Bailey took in the ball game at Deary, Sunday.

There was preaching at the U. B. church, Monday night. Preaching again in two weeks.

Mr. and Mrs. Birchmier and children visited with relatives in Moscow, Sunday.

Carl Drury and family and Josephine Drury, were Sunday dinner guests at the Babcock home.

Mr. and Mrs. Orville Miller are spending a few weeks in Lewiston.

Fred Hecht and Harvey Fairfield of Bear ridge were callers at the Carl Drury home, Tuesday.

Mrs. Charles Dahlgren visited with her sister, Mrs. Ray Bogar, Sunday.

Rodney Drury and sister, Georgia, were in Kendrick, Tuesday.

Fred Bailey of Bear ridge, visited with his parents, Mr. and Mrs. J. Bailey, Tuesday.

Horace Comstock of Bear ridge was helping his brother, Claire Babcock, a few days.

Strawberries are ripening. Now for the strawberries and cream and the good old short cakes like "Mother used to make."

### Lamb Had Long Ears

An old sailor approached a farmer for a meal one day, saying he was willing to work.

"I will give you a meal," said the farmer, "if you will round up those sheep on the common there and drive them into this fold."

In three hours' time the sailor came back, looking hot but happy.

Glancing over the gate into the field, the farmer saw the sheep safely in the fold. "There's a jack-rabbit sitting up among 'em," he exclaimed.

"Do you mean that little fellow there?" asked the sailor. "Why that's the little beggar who gave me all the trouble. I thought it was a lamb!"

### Cameron Play a Success

The home talent play given at Cameron last Saturday was a huge success from every standpoint. The attendance was very large, probably a hundred people being unable to get into the large tent. Seats were arranged at the front of the tent to make room for the overflow.

The play itself had a number of difficult situations that required clever acting to carry them through. Rev. Kein as "Deacon Dubbs" was simply immense. His make-up was perfect and his acting in the professional class. Other members of the cast carried out their parts in a most pleasing manner. A. Schultz took the part of Amos Coleman, nephew of the Deacon. He was the hero of the play and did very well. A. Spekker, as Rawdon Crawley, was the villain. His part was a difficult one, but he handled it nicely. Geo. Ehlers was good as Major McNutt, the auctioneer. His acting was natural and he pulled off a number of difficult situations in good shape.

A. F. Wegner had a comedy part as Deuteronomy Jones, a country product. He showed real ability and brought a laugh every time he appeared on the stage. His wife, as Yennie Jensen, was one of the star performers and brought down the house at frequent intervals. Rose Raleigh, the school ma'am, was a heavy part but Mrs. A. O. Wegner was equal to it and pleased the audience by her natural rendition of the character. Mrs. C. L. Wegner as Philippa Popover, had eyes on the Deacon. A number of situations during the play in which Philippa and the Deacon were involved, brought down the house. Emily Dale, the richest girl in town, characterized by Mrs. A. Spekker, was a good part and well handled by her. Mrs. F. Silflow represented Trixie Coleman, full of mischief, in a very pleasing manner.

The big tent on the Herman Meyer place was an ideal setting for the play. It was well lighted by electric lights and had seating capacity for a large crowd. Everyone who attended the play enjoyed it very much and those who helped make it a success deserve much credit for their efforts.

A very pleasing feature of the entertainment was the music furnished by the Bear ridge orchestra.

Cast of Characters:  
Deacon Dubbs, from Sorghum Center, Rev. Rein

Amos Coleman, his nephew, A. Schultz

Rawdon Crawley, wolf in sheep's clothing, A. Spekker

Major McNutt, the auctioneer, Geo. Ehlers

Deuteronomy Jones, a country product, A. F. Wegner

Rose Raleigh, the school ma'am, Mrs. A. O. Wegner

Miss Philippa Popover, with eyes on the Deacon, Mrs. C. L. Wegner

Emily Dale, richest girl in town, Mrs. A. Spekker

Trixie Coleman, full of mischief, Mrs. F. Silflow

Yennie Jensen, the hired girl from Sweden, Mrs. A. F. Wegner

Extend Pine Creek Road

Deary Press: About half of the grading on the southern extension of the Pine Creek road has been done, according to Ira Altig, who drives the district's big cat. The present extension is to intersect the county road at the old Loomis mill-site and will give a water grade from the whole southern country into Deary. There will be three cattle passes and several bridges on the extension. This district now has probably a greater mileage of improved roads than any other district in the county, though all the ground has not yet been covered. But in the numerous sections where improvements have been made the work has been good. Elimination of hills and lowering of grades make heavy teaming no longer a dreaded task. Motorists especially enjoy driving through the district, the roads for the most part being smooth.

# The Rainbow Sale

## Is Going Big

### Saturday Last Day

Of this big selling event. If you have not gotten your share of the many values we are offering, hundreds have. Don't overlook this last opportunity.

### Be Sure to be Here Saturday

These are just a few of the many bargains that have made this sale a big success.

Good gingham, per yard	16c	Khaki pants, a pair	\$1.49

### STATE INSPECTS HATCHERIES

Poultry Industry in Wisconsin Under State Regulation—Certificates Are Given.

The Wisconsin poultry hatcheries are the only ones in the United States which are under state regulation and inspection, according to information collected by the United States Department of Agriculture. Because of the menace to the poultry industry through the sale of young chicks of inferior quality and breeding, the state department of markets and the poultry department of the University of Wisconsin have established regulations and requirements for hatchery flocks and for hatcheries, and those that fill the requirements and live up to the regulations will be known as "Wisconsin inspected and accredited hatcheries and hatchery flocks." A list of the accredited hatcheries and flocks has been prepared and published. Chicks purchased from hatcheries on the list bear the mark of the department of markets, which gives assurance that they are standard bred and from reasonably good egg-producing strains. Inspectors issue certificates to owners of hatcheries and flocks that fill the requirements.

### PLANT ONLY BEST CORN SEED

Possible to Secure Results of Another Man's Life Work in Breeding and Selecting.

Perhaps in no other farm crop is there as little excuse for planting poor seed as in corn. It takes only about a peck to the acre, and the best of seed can be planted with little expense. When one can secure the results of another man's life efforts in breeding and selecting, the small cost comes back many times the very first year.

The Doctor's Prerogative.  
Doctor (as agonized patient rushes in)—"Good Lord, man! Don't yell like that—at least wait until I tell you where you are suffering."—La Rire (Paris).

### Whooping Cough

This is a very dangerous disease, particularly to children under five years of age, but when no paregoric, codeine or other opiate is given, is easily cured by giving Chamberlain's Cough Remedy. Most people believe that it must run its course, not knowing that the time is very much shortened, and that there is little danger from the disease when this remedy is given. It has been used in many epidemics of whooping cough, with pronounced success. It is safe and pleasant to take.—Adv.

### Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879. Subscription \$1.50 a year.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

A writer in the Manufacturer and Industrial News Bureau, says: "We want ease. We don't want to work. Let us read Walt Mason's meaningless 'rippling rhymes' and enact a few thousand new laws. Our children go through school and college to learn to live by their wits and shun labor. In the meantime, the printers and binders' trust has forced the price of a 50-cent volume of fiction up to \$2.50. Only the rich can buy the books any more. A carnation costs more than a head of cabbage used to. If our public schools taught gardening, men and women would grow up who would raise half their living on the back lot and quit making multimillionaires of food purveyors. But no, we are a democracy that travels the broad and easy road that leads to destruction."

Genesee News: Genesee being on the main highway between Lewiston and the north, it is claiming the attention of many tourists and sightseers. During the past week several autos of tourists have gone out of their road to make Genesee, some of them stopping over to take in the Chautauqua which is in full bloom here at this time. Green fields are not always further on. Genesee can show the prettiest and most prolific fields in the world and strangers learn of it long before they get here.

### CARD OF THANKS

We wish to sincerely thank our neighbors and friends for their kind assistance during the sickness and death of our beloved brother and uncle, also for the many beautiful floral offerings. We also wish to extend our thanks to the choir and organist.

### Cameron News

Everybody up on the hill seems to be making hay.

Rev. Rein, left Sunday afternoon for the conference to be held at Salem, Oregon. While there he will visit his folks at Castle Rock.

The Luther League was well attended last Sunday. After the business meeting the crowd joined in playing games, after which a delightful lunch was served by Miss Bertha Hartung, August Hartung and Leonard Wolf.

Miss Roreig of North Dakota is visiting her aunt, Mrs. Albert Schultz, Sr.

The play "Deacon Dubbs", was well attended last Saturday. In fact a larger crowd has never been had at any other time. The proceeds were \$41.00. The crowd also enjoyed the music given by the Bear Ridge orchestra.

We are all glad to hear that Andrew Entman is recovering. He is in a Moscow hospital.

Miss Wanda Brunsiek visited her grandmother, Mrs. Bleck, at Kendrick, last Friday and Saturday.

A number of the young people spent Sunday evening with Mrs. Rein. The evening was spent in making candy.

Quite a number of farmers are busy cultivating corn and beans.

The new school house is nearly completed and it sure adds to the appearance of Cameron.

Mr. Schultz is busy hauling lumber for his new house.

FARM FOR SALE: 320 acres; 110 under cultivation; 35 more tillable, 5 acres of orchard, balance splendid pasture and timber land. New 6 room house, barn 50x50, and numerous other buildings. All fenced. Close to school and church. Reasonable price and good terms. Inquire Kendrick Gazette. 25-11

## BIG SAVING MADE BY CULLING OUT SCRUBS

Nonproducing Fowls Eliminated From Many Flocks.

Extension Agents Explain Method of Weeding Out So Thoroughly That Poultry Raisers Soon Become Efficient.

(Prepared by the United States Department of Agriculture.)

Approximately \$40,000 was saved to poultry men in Texas last year through the work of extension workers employed co-operatively by the United States Department of Agriculture and the state agricultural college. In 14 counties of Maine the saving was about \$1,894.40. These sums represent the money value of culling, estimated on the feed cost of one cent a day a hen.

In Maine 15,964 hens were examined in culling demonstrations and 4,648 culls removed. In Texas about 15,

Extension Agent Explaining Method of Culling.

000 hens were culled. That this culling was successful is shown by the following figures: 19 birds were culled from a flock of 54, and in the next seven days the culls laid only 20 eggs; 290 birds were culled from flocks totaling 846 and in the next seven days laid 26 eggs. Of the entire number of hens culled in Maine, the percentage of egg production for the entire flock was 32.3, for the hens left after culling 40.7 per cent, and for the culls 4.5 per cent.

The number of poultry owners instructed in Maine was 3,043 and in Texas 8,000, many of whom afterward culled their own flocks. The estimated savings represent only a part of the total value of this work. As a result of the demonstrations in one section in Maine, 79 persons eliminated 1,420 birds as culls, while in Texas the culling that resulted from all demonstrations was valued at \$125,000.

The extension agents not only demonstrated that the non-producing hen could be eliminated but explained the method of culling so thoroughly that those present could go home and put it into practice nearly as effectively as the demonstrators themselves.

## PLAN TO AVOID GAPE WORMS

Pests Can Be Guarded Against by Putting Little Turpentine in Drinking Water.

Now that warm weather is coming on, gape worms will soon put in an appearance in certain localities. They can often be prevented by putting a few drops of turpentine in each quart of water—and scattering air slaked lime about the coops and runs.

## BEST SEED PEAS ARE PROFITABLE

Introduction of Undesirable Product Might Ruin Entire Output of Factory.

## ALASKA VARIETY VERY RISKY

All Plants Must Ripen Uniformly and All Pods Must Be in Usable Condition at One Time—Other Canning Crops.

(Prepared by the United States Department of Agriculture.)

Mixed or impure stock, under modern methods of harvesting and handling the pea crop for canning may result in the introduction of undesirable seed which may ruin the entire output of a canning factory, says the United States Department of Agriculture. The canner should buy direct from the seed-growing seedsmen rather than from a jobber. Particularly in the case of smooth Alaska peas, which furnish 55 per cent of the canned peas on the market, there is risk taken if a canner buys seed the history of which cannot be traced. The canner is in a much safer position if he buys only from seed growers who control their own stocks.

### Must Be Productive.

To be a good canning pea, a variety must, first of all, be productive; all plants must ripen uniformly; all pods on individual plants must be in usable condition at one time—that is, none must be too ripe or too immature; the peas must remain green after processing. The introduction of the viner, which eliminates hand-picking of the pods, has had a decided influence on the varieties of peas used for canning.

The return on a planting of peas for seed is far less than that on either corn or tomatoes, two other important canning crops, and the utmost care is necessary throughout the growth of the seed crop to discover and weed out undesirable types of volunteer plants or those due to warehouse mixture, so as to keep the stock uniform. The seedsmen sows about three bushels of peas per acre, getting a return of 15 bushels. Three of these

View of Pea Field in Blossom.

must be kept for stock seed, leaving 12 bushels to sell. The eastern grower for the cannery plants four or five bushels to the acre, so that the average seedsmen's acre of peas supplies about three acres for the cannery.

An acre of corn yielding 40 bushels would provide seed for 100 acres of canning crops, and an acre of tomatoes yielding 100 pounds of seed would plant 1,000 acres in canning crops. With this small relative return per acre, the seedsmen must take every precaution to maintain the purity of his stock, or he may run the risk of very heavy losses if he loses his reputation for good seed. It is safest for the seed-growing seedsmen not to purchase seed, especially of the Alaska variety, in which impurities cannot be detected in the samples, unless he controls the original stock.

A new farmers' bulletin, No. 1253, "Seed Peas for the Canner," by D. N. Shoemaker, horticulturist, has been issued by the United States Department of Agriculture, and may be obtained upon application to the department at Washington, D. C.

## PUT TREES ON WASTE SPOTS

Conditions Demand That All Land Should Produce Something—Trees Are Favored.

Modern conditions demand that all the wastes and leaks be eliminated, and this means that all the land should produce something. It is not always possible to make every portion of the farm area yield annual crops, but in such cases one may wisely and profitably try trees. If one-twentieth of each farm tract were set aside for forestry, in time there would be timber to spare.

A great many cliffs and hillsides along our many rivers and streams are fit for little else, and hill land that is very stony may be planted to post-timber trees with much profit. Black locust and catalpa are the most profitable for posts, the locust being given the preference on account of its manner of growth being smoother and the quality of timber the very best.

## TURKEYS YIELD GOOD PROFIT IN OKLAHOMA

Woman Substitutes Purebreds for Scrub Stock.

Despite Heavy Losses to Flock, Due to Conditions That Might Not Occur Elsewhere, Return of \$1,525 Is Made.

(Prepared by the United States Department of Agriculture.)

A return of \$1,525 from turkeys in two seasons was obtained by an Oklahoma woman in spite of heavy losses in her flock, due to conditions that might not occur elsewhere. The Greer county extension agent convinced her that it would pay to follow the advice of the United States Department of Agriculture and the state agricultural college and substitute purebreds for her scrub stock. He also gave her information on the management of her flock.

She started with 10 hens and 1 tom of the Mammoth Bronze variety. From these she raised 122 young tur-

Rounding Up the Turkeys at Feeding Time.

keys, but lost 50 of them in a sudden hail storm. The rest she sold as breeders, advertising them in a farm journal. They netted her \$900, or an average of \$12.50 each.

This year she started with the same number of breeders and obtained 145 young poults. Unfortunately one of the farm hogs was fond of turkey, and destroyed all but 51 of the flock before the depredations were traced to him. At about \$12 apiece, however, the remaining 51 brought \$612.

Other instances of successful turkey raising reported by the extension agent of Greer county show a total profit of \$2,418.90 on the sale of 210 turkeys and 12 dozen eggs out of 226 turkeys in different flocks.

## GET BETTER SIRE EMBLEMS

Oldham County, Kentucky, Live Stock Owners Given 46 Certificates in One Day.

In one day recently the United States Department of Agriculture issued 46 emblems of recognition to live stock owners in Oldham county, Ky., who are now using purebred sires exclusively for all classes of live stock kept.

This county has eradicated scrub sires from about half of the territory in the county, according to a report received from Wayland Rhoads, extension specialist of the Kentucky Agricultural college.

Wayne county, Ky., likewise is active in replacing scrub sires with good purebreds. The department recently issued "better-sires" emblems to 44 Wayne county stock owners. Bull sales are being held by local breeders in both counties to bring about a wider distribution of good purebred bulls.

## INITIAL SEASON OF CLOVER

It May Be Pastured From Middle to Close, but Not Too Close—Cure Hay in Shock.

The growth produced the first season by sweet clover is similar in quality to alfalfa. It may be pastured from the middle of the season to the close, but should not be pastured so close as to injure the plants. The growth the second season is much coarser and if used for hay should be cut before it reaches a height of 30 inches. A high stubble should be left as the second growth starts from buds on the cut-over stems. If cut too close to the ground, no second growth will be produced. The hay should be cured in the windrow or shock to prevent the loss of leaves and too rapid curing.

## SHEEP DESTROY MANY WEEDS

Animals Devour Noxious Plants in Pastures, Grain Fields and Clear Fence Rows.

Sheep eat more weeds than any other class of live stock, except goats. Sheep will eat ninety per cent of all troublesome weeds. They will destroy weeds in pastures, in grain fields and corn fields after harvesting, and clear the fence rows. However, sheep are not such scavengers that they can thrive on refuse and weeds alone. In order to get sheep to eat leaves on shrubs, the tenderer grasses must be scarce. Goats are better adapted to clearing brush land than are sheep. Some farmers consider sheep necessary just as a means of controlling weeds.

## EFFORTS BEING MADE TO PREVENT SPREAD OF EUROPEAN CORN BORER

European Corn Borer in Various Stages and its Work.

(Prepared by the United States Department of Agriculture.)

Special efforts to prevent the European corn borer from spreading to the corn belt, which it now threatens to do from the southern shore of Lake Erie, will be made this season by the United States Department of Agriculture. The most important single measure will be the rigid enforcement of federal quarantine regulations by the federal horticultural board of the department, in co-operation with the Canadian government and the various states where the pest now exists. This will prevent other infestations of the insect from coming into the United States and will go a long way toward keeping the borer from being carried to other parts of the country.

The bureau of entomology of the department has prepared its plans for investigating the insect, which was discovered in this country during 1917, with a view to applying and amplifying methods of controlling it. The slight infestations along the lake shore, it is believed, will not cause serious injury to corn there immediately, giving ample time for a careful study of the insect and its behavior in this new environment before actual commercial damage is done. For this purpose the bureau will establish immediately a number of entomologists at Sandusky, Ohio.

### May Have Come From Canada.

The infestation on Lake Erie, it is believed, originated in the province of Ontario, Canada, where a severe infestation has been present for several years. Favorable winds during the flight season of the moth in the summer of 1921 are supposed to have compelled the adult insects to fly across the lake to the American side, where they became established along almost the entire southern shore. Records of the weather bureau indicate that for the first time in five or six years the winds prevailing then blew from the north or northwest for several days at a time. It is not thought, therefore, that this condition will prevail again for several years, and other moths be blown over.

In order to watch this phase of the matter, however, the bureau of entomology will request permission of the lighthouse service to station observers during the flight season at the powerful lights maintained along the southern shore. They will ascertain, if possible, whether moths are attracted to the lights from the other side.

The federal quarantine includes 144 cities and towns in Massachusetts, three in Michigan, 12 in New Hampshire, 115 in New York, 42 in Ohio, and 13 in Pennsylvania, and prohibits the shipment of corn and broom corn, including all parts of the stalk, cut flowers or entire plants of chrysanthemum, aster, cosmos, zinnia, hollyhock, and cut flowers or entire plants of gladiolus and dahlia, except the bulbs, to other states throughout the year. The ban applies to other products for the period between June 1 and December 31, in the New England territory. The prohibition applies to corn and broom corn, including all parts of the stalk, all sorghums and sudan grass from infested areas in New York, Pennsylvania, Ohio, and Michigan throughout the year. No restrictions are placed on the interstate movement of clean shelled corn and clean seed of broom corn.

### Control Practices Recommended.

To control the corn borer on the farm, the department recommends the following practices:

1. Burn, or otherwise destroy, before May 1 of each year, all cornstalks, corn cobs, corn stubble, vegetable, field and flower crop remnants, weeds and large-stemmed grasses of the previous year.
2. Keep cultivated fields, fence rows, field borders, roadsides and such places free from large weeds or large-stemmed grasses.
3. Cut corn close to the ground.
4. Cut and remove sweet corn fodder from the field as soon as the ears are harvested. Feed direct to live stock or place in silo.
5. Cut and remove field corn from the field as soon as the ears are mature. Feed the stalks to live stock as soon as possible and burn or otherwise dispose of the uneaten parts before May 1 following. Shred or cut the fodder to increase its consumption.
6. Plow under thoroughly, in the fall, all infested cornstalks, corn stubble, other crop remnants, weeds and similar material which it is impractical to destroy in any other manner. When necessary to adopt this practice an attempt should be made to plow under all the material to a depth of at least 6 inches.
7. Plant small areas of early sweet corn to act as a trap crop, adjacent to

fields intended for field corn or late sweet corn. Feed, or otherwise destroy, this early sweet corn, as soon as the ears are harvested, or preferably just before that period, if the grower is willing to sacrifice the ears. Such plantings, where not destroyed at the proper time, constitute a menace to later corn.

8. Limit the size of cornfields to areas that can be kept free of weeds.

9. Do not plant corn within 50 feet of beets, beans, celery, spinach, rhubarb, or flowering plants intended for sale.

10. Do not throw the uneaten parts of cornstalks used as feed or bedding into the manure pile unless this material is worked into piles containing enough fresh horse manure to produce heating.

11. Do not transport outside of the infested area, any of the plants, or plant products, listed in Federal Quarantine No. 43.

12. Do not transport any living stages of the European corn-borer outside of the infested areas.

13. Do not place in swill container any sweet corn ears or portions thereof or discarded portions of celery, beets, beans, rhubarb, and spinach when this material is suspected of containing the borer.

14. Do not dump cornstalks, or other plant refuse from the vegetable and flower garden on public dumps nor on the edge or flood level of brooks, rivers, and other bodies of water.

15. Do not attempt to circumvent the quarantine regulations. The penalty is severe.

16. Do not mix products grown within the infested area with those grown outside the infested area.

17. Do not label packages containing flowers or other products with misleading statements of contents.

18. Do not pack produce in boxes or other containers until all old tags and permits have been removed.

19. Do not feel angry if products are confiscated at border lines for violation of quarantine regulations. Such action is the most lenient that may be taken under the law.

## MOLESKINS VALUABLE SOLD THROUGH POOLS

Boys and Girls Have Formed Clubs for Trapping.

Taught Approved Methods by Extension Workers and Representatives of Biological Survey—Prizes for Gophers.

Moleskins, which brought little or nothing in the ordinary fur markets, have been successfully pooled and sold in Washington and Oregon through farm bureau organizations. Boys and girls in many communities have formed clubs for trapping moles. Through the co-operative work of the extension agents and representatives of the biological survey of the United States Department of Agriculture, they have been taught approved methods of trapping and skinning the moles.

Two hundred and twenty mole pelts were sold in Benton county, Ore., for boys and girl trappers. Linn county, Ore., reports three communities which offered 10 cents each for moles and pocket gophers and an additional prize for the three children killing the most pests. One community reports 83 moles killed in this way.

Tillamook county, Ore., was divided into four districts, and \$50 purses were allotted to each district for first, second, and third prizes. The county paid a 5-cent bounty on both moles and pocket gophers. The moleskins were stored in the county agent's office until a salable amount was collected. They were then sold to the highest bidder. All money received for the skins was returned to the trappers.

## OVERCOME PLANT DISEASES

Practical Plan to Allow Land to Remain Idle or Use Crop Immune to Ailment.

There are several diseases of vegetables which live over in the garden soil from one year to the next, and if the same crop is planted in the same soil year after year it will be but a short time until the crop will prove a loss. These are mostly fungous and bacterial diseases and the only practical way to overcome them is to allow the land to lie idle for two or three years or to plant a crop which is immune to the disease.

## NOTICE OF CONTEST

Department of the Interior, United States Land Office, Lewiston, Idaho, June 5, 1922.

To Frank V Thompson of Southwick, Idaho, Contestee: You are hereby notified that Donald M. McCrear who gives Kendrick, Idaho, as his post-office address, did on May 4, 1922, regularly file in this office his duly corroborated application to contest and secure the cancellation of your Second Homestead Entry No. 07572 Serial No. 07572 made March 1, 1920, for Lots 1 and 2, and E½ NW¼, Section 30, Township 39 North, Range 1 East, Boise Meridian, and as grounds for his contest he alleges that you have abandoned said land since March 1, 1920; and that your failure to cultivate or reside upon said land was not due to your employment in the military or naval service of the United States, or as a member of any organization for offense or defense authorized by Congress.

You are, therefore, further notified that the said allegations will be taken as confessed, and your said entry will be cancelled without further right to be heard, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically responding to these allegations of contest, together with due proof that you have served a copy of your answer on the said contestant either in person or by registered mail.

You should state in your answer the name of the post-office to which you desire future notices to be sent to you.

**Catarhal Deafness Cannot Be Cured** by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarhal deafness, and that is by a constitutional remedy. Catarhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarhal, which is an inflamed condition of the mucous surfaces. Hall's Catarrhal Medicine acts thru the blood on the mucous surfaces of the system. We will give One Hundred Dollars for any case of Catarhal Deafness that cannot be cured by Hall's Catarrhal Medicine. Circulars free. All Druggists, 75c.  
F. J. CHENEY & CO., Toledo, O.

## The Home of the Soul

In olden times, it was believed that the seat of the soul was the stomach; most likely for the reason that a man is never so completely used up as when his stomach is out of order. For the cure of ordinary stomach troubles, there is nothing quite so prompt and satisfactory as Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. Give them a trial. They only cost a quarter.—Adv.

**COWS REQUIRE MUCH WATER**

It Should Be 20 Degrees Above Freezing Point and Same Temperature Every Day.

During the winter, when cows are stabled the greater part of the time, they should be watered two or three times a day, say specialists of the United States Department of Agriculture, unless arrangements have been made to keep water before them at all times. The water should, if possible, be 15 degrees or 20 degrees above the freezing point, and should be supplied at practically the same temperature every day. When water well above freezing temperature is stored in tanks and piped directly to the cow, there is probably little occasion for facilities to warm it. When it stands in a tank on which ice often forms, it usually pays well to warm it slightly. This can be done by a tank heater, by live steam, or by hot water from a boiler. If a boiler is used for running a separator or for heating water to wash and sterilize utensils, steam from it can readily and cheaply be used to warm the water.

**AMOUNTS OF FEED FOR COWS**

Upon Capacity of Animal Depends Quantity of Daily Portion of Grain and Roughage.

The quantity of silage to feed a cow depends upon the capacity of the animal. She should have as much as she will clean up without waste when consumed with the grain and hay, is the advice given farmers by the United States Department of Agriculture. A good cow should be fed just short of the limit of her appetite. The smaller cows usually eat from 20 to 30 pounds of silage a day, and the larger animals 40 pounds or more.

The hay needed ordinarily ranges between 5 and 12 pounds per cow a day, or 0.8 pound per 100 pounds of live weight when fed in connection with silage. Silage should be fed in the proportion of about 2.5 to 3 pounds per 100 pounds of live weight. Concentrates should be fed according to size of animals and richness of milk. One pound is required for each 2½ to 4 pounds of milk produced.

Although corn silage is one of the

best feeds, particularly for dairy cows, there are some milk producers who use it too freely. It is not a complete feed; neither is it a food that will give best results with only leguminous hays as alfalfa or cowpeas.

Since cows cannot consume enough of these rough feeds to produce the best results under ordinary conditions, it is necessary to feed concentrates in addition, particularly when the price is not high, as is the case this year. Farmers' Bulletin 578, "The Making and Feeding of Silage," contains much helpful information on feeding when silage is the basis of the ration.

**WARM WATER FOR MILK COWS**

Animals Will Not Drink Necessary Amount From Icy Tank—Heaters Can Be Provided.

Cold drinking water given to dairy cows will result in reduced quantity of milk. A cow which yields a large quantity of milk must drink lots of water; she won't drink much from an icy tank. Water tanks can be provided with heaters, or hot water can be poured into the tank.

Winter Dairying Held Back for many years, largely through the failure of cow-keepers to provide comfortable barns properly equipped.

**Linden News**

Mr. and Mrs. A. W. Longfellow were shopping in Southwick, Monday.

Mrs. I. E. Foster and children spent Wednesday with Mrs. McAllister, who recently returned from Kendrick, where she spent the winter.

O. S. Fletcher of Moscow held a farm bureau meeting with the farmers of the ridge, last Wednesday afternoon.

Mrs. Mary Vaughan and son, Ted, returned home from Milton, Ore., Wednesday, where they have been visiting the past few weeks at the home of her son, Lyman. They also visited the Ed Patterson and Willie Cable families who were former residents of Cedar Creek ridge. They were accompanied home by her son, Claud, and Mrs. Thornton, the latter visiting at the home of her brother John Carr, while here. Claude and Mrs. Thornton returned to Milton, Friday, John Carr going with them for a few day's visit.

Mrs. A. Alexander went to Clarkston, Thursday, to visit her sister, Mrs. Pete Vanderberg, returning home Saturday.

Mr. and Mrs. C. P. Isreal and Mr. and Mrs. Lou Alexander went to Lewiston, Thursday, returning home Saturday. While there they visited the Rose Show.

George E. Smith returned home Saturday from Spokane, where he has been attending the Lyon's Military school.

Mr. and Mrs. F. C. Lyons and children motored to Dayton, Wash., Saturday to visit her sister, Mrs. Ed Linn. They returned home Sunday evening.

Mr. and Mrs. George Garner, Mr. and Mrs. Rube Garner, Mrs. McPhee, Cleve and Celia, and Ed Fongburg went to Lewiston, Friday, in George's truck to attend the Rose Show.

Aunt Carrie and Arlie Allen, and Mr. and Mrs. Earl Langdon visited at the Harry Langdon home on American ridge, Sunday.

Those present at the dance held at the Jennings home, Saturday night, report a good time.

Mr. and Mrs. Elmer Quick, Mrs. John Carr, Mrs. Annie Morrison and John Michael spent Sunday at the Elmer Hudson home.

The Misses Eva and Anna Smith, and brothers, Ben and George, spent Sunday afternoon at the A. W. Longfellow home.

Clem Isreal went to Lewiston, Monday, returning home Tuesday with a new Dodge car.

Mr. Calvert, presiding elder of the U. B. church, had charge of the services at the Gold Hill church, Sunday. He was accompanied from Southwick by Mr. and Mrs. Ben Pressnel, Miss Alvira Henderson and Mr. Benjamin. After the services they were guests at the Gilchrist home.

There will be Children's Day exercises at the Gold Hill church, June 25th, at 10:30. Everyone cordially invited to attend.

There will be a community picnic held in the Volmer grove, half mile north from the Crescent school house, July 4th. Everyone cordially invited.

Dr. Otteraaen was called to the home of Arthur Bohn one evening last week. When he reached the Potlatch bridge he found a pole had been laid across to stop traffic. Thinking the bridge must be condemned he left his car and walked up to "Scotty" Wilson's to find if this was true. Mr. Wilson knew nothing about it, so did Clarence Fry, who was called to the phone, and so it was decided to be the prank of some mischievous boy. This might have turned out to be a very serious prank and every child as well as grown-ups, should know there is a heavy penalty for obstructing public roads.

**BOYS AND GIRLS  
 LIKE CLUB WORK**

Members Pay Way Through College From Money Earned in Different Branches.

**GIRLS TAKE HOME ECONOMICS**

Number in Southern States Attending School on Scholarships Won Is Placed at 1,056—Alabama Women Assisting.

(Prepared by the United States Department of Agriculture.)

In 15 southern states 2,042 boys' and girls' club members last year paid all or part of their school expenses from money earned in club work. In other sections 1,344 former club members are now attending agricultural colleges, most of whom are partly paying their expenses from club-work earnings. This does not include 465 girls taking home economics in various colleges. The number of boys and girls in all the states attending high schools, normal schools, and colleges on scholarships won for club work is 1,056. These clubs are an important feature of extension work as carried on by the United States Department of Agriculture co-operating with the state agricultural colleges.

**Begun Work Early.**

These boys and girls did not wait until ready to go to high school or college before starting their club work and savings. Some began two, three, or more years before, or, as one boy said, as soon as he could, meaning 10 years—the youngest age at which children are admitted to the clubs. Two girls of Mobile, Ala., with a flock of chickens, began their savings three years ago. In Georgia a number of club girls have started "go-to-college funds." They put the money realized from the sale of their club products, which are mostly fancy packs of pre-

**WASH ALL MILK CANS  
 AS SOON AS EMPTIED**

Most Dealers Have Appliances for Cleaning Utensils.

Hotels, Restaurants and Others Buying Milk in Wholesale Quantities Are Particular in Giving Attention to Containers.

(Prepared by the United States Department of Agriculture.)

The milk can has the same relation to the wholesale trade as the milk bottle has to the retail trade, and it is just as important that it be washed immediately after being emptied, says the United States Department of Agriculture. Milk dealers have appliances for washing and sterilizing the cans, but this does not excuse the buyer from rinsing them before they

Sterilizing Dairy Utensils is an Important Factor in Keeping Milk Sweet.

become sour as a result of the multiplication of bacteria in the film of milk left in the can. Cans that become foul in this way are hard to clean when they arrive at the plant.

Investigations show that hotels, restaurants, bakeries and other places which buy milk in wholesale quantities do not always give proper attention to the containers. As soon as the cans are emptied they are placed on the doorstep or left in a warm room until collected by the dealer. They return to the plant teeming with bacteria, and the mechanical washers will not always clean and sterilize them thoroughly. They must be soiled, washed by hand with a brush, and then sent to the machine washer.

Consumers can help a great deal in making it easier to maintain a safe milk supply. All that is needed is a little care at the right time, says the department.

**PLAN FOR SUMMER SPRAYING**

More Care and Attention Necessary Than Work in Winter—Combinations Save Time.

Summer spraying requires more care and attention than winter or dormant spraying because summer sprays must be applied after the buds or leaves are started and hence when there is danger of injuring the foliage. The common spray for the control of chewing insects is arsenate of lead, but arsenate of calcium is gaining in favor. Paris green is still used to some extent on Irish potatoes and tobacco. Nicotine sulphate, or tobacco parts, sometimes called blackleaf, is effective against plant lice. Bordeaux mixture is an effective spray when reduced to summer strength for apples, pears, grapes and other fruits.

But there are combinations for various fungus diseases and insect pests that save time and trouble and are highly recommended by practical orchardists and gardeners.

**SOY BEANS AND SUDAN GRASS**

Combination Makes Good Feed and May Be Handled Like Timothy—Work Land Well.

Soy beans and sudan grass seeded together at corn planting time and cut for hay when the beans are in the dough stage make good feed, and may be handled same as timothy. Moist black land is suitable for this use, and some of the alkali peat soils may be used to advantage for this crop mixture. Work the land down well, and sow broadcast about 12 pounds of sudan grass to the acre, then drill in three pecks an acre of beans. The drilling will cover the grass seed. Mammoth Yellow or Hollyrock Mongil are good soys.

**SWEET CLOVER FOR PASTURE**

All Types of Plant Make More or Less Undesirable Hay Because of Its Coarseness.

Under most conditions sweet clover can only be used profitably as pasture. When it is decided to use it for this purpose, the cattle should be put on it and not be allowed other pasture until they start to eat it. This will take a day or two, after which they will thrive on it. All types of this plant make a more or less undesirable hay, because it is coarse and has comparatively few leaves. For the best quality of hay, it should be cut just as it starts to blossom.

A Pig Club Boy Preparing His Prize Winner for the Show Ring.

serves, jams, and marmalades, in the bank to their own credit. Thus far 200 Georgian girls are attending school on the proceeds from their work.

**Scholarship Is Voted.**

Another development from the interest shown in education by the club girls is that in Birmingham, Ala., the members of women's clubs became so much interested that they voted an annual scholarship of \$200 to be lent to girls wishing to prepare for home demonstration work.

**WARM RECEPTION FOR MITES**

Kerosene Will Prove Efficacious in Keeping Pesticiferous Little Parasites Away.

Hot weather brings the roost mites. They multiply so fast that the hen house is soon swarming with them. The egg yield then drops to almost nothing.

"The process of keeping out the mites is one of the simplest in poultry culture," says A. C. Smith, head of the poultry division at University farm. "Kerosene will do it. It is easily applied, either by a broad flat paint brush or a spray. The paint brush will save kerosene, but takes time. The spray will save time and use kerosene. Take your choice, but paint or spray the roosts and supports with kerosene before the mites put in an appearance.

"The morning is the best time, as the roosts will be dry and much of the odor will have disappeared before the hens seek the roosts. Repeat every two weeks during warm weather."

**KEEP UP VEGETABLE SUPPLY**

Farmer Should Not Overlook Importance of Making Successive Plantings in Garden.

Do not overlook making successive plantings of vegetables in order to keep up as steady as possible a timely fresh supply. Among such vegetables are radishes and beans. Pale snap and pole lima beans will come nearer growing a supply of green beans than the bunch beans.

**SUPERIOR FARM IMPLEMENTS**

Good Tools of Far More Importance Than Some Farmers Believe—Poor Ones Unsatisfactory.

Good implements are far more important in good farming than some farmers believe. It is a very hard matter to do good farming with poor or unsatisfactory farm implements. Considering their utility, farm implements are cheap.

## GLEANINGS

Bride—I want to buy an easy chair for my husband.  
Salesman—Morris?  
Bride—No, Clarence.

A card was received last Saturday, announcing the arrival of a daughter at the home of Mr. and Mrs. Jess Waitman Wade to Grangeville, Friday morning, June 16. Mrs. Wade was formerly Miss Doris Gregory of Kendrick.

Mr. and Mrs. E. W. Lutz and children spent the week end in Lewiston at the home of Mr. and Mrs. W. C. Brooks.

Mr. and Mrs. F. B. Smith and children drove over from Peck Sunday to visit friends. They were sporting a new Gardner car.

Messrs. McCrea, Dunkle, Knepper and Bechtol enjoyed a fishing trip in the Elk River section, Sunday. On account of the measly limit of fifty fish, baskets were only partly filled. Figured on a basis of dollars and cents, by taking into consideration the wear and tear on the car, cost of gas and effort expended in catching the speckled beauties, they were worth about a dollar apiece or 3 or 4 dollars a pound, but then they were worth it.

In order to help along the chautauqua, G. G. Oldfield has decided to cancel his Friday and Saturday night shows this week at the New Kendrick.

Dr. and Mrs. H. R. Veon and son, Harvey, were Lewiston visitors the first of the week.

There will be a dance at the Fraternal Temple tonight, given by the American Legion. The dance will take place immediately after the chautauqua program. The Legion boys have reduced the price from \$1.50 to \$1.00.

Frank Chamberlain secured the contract of transporting the chautauqua people and their baggage from Bovill to Kendrick. The talent that is on the Kendrick chautauqua shows at Bovill the day before coming here.

Ellen Peterson of Moscow filed her nomination for the republican ticket for the office of county superintendent of public instruction. Miss Lillian Scattaboe, who held the office for the past two terms will not be a candidate for re-election.

W. W. McAllister was transacting business in Moscow, Tuesday.

Hester Knepper went to Moscow Tuesday morning to spend a few days with friends.

John Kite, as chairman of the grounds committee of the chautauqua deserves credit for his strenuous two days of work to get the tent up and everything ready for the opening of chautauqua. Those who assisted him are also deserving of recognition.

According to the Press, Texas ridge strawberry growers have adopted a uniform label for their boxes. The labels are worded "Texas Ridge Strawberries," and have the name and address of the grower. Texas ridge berries are grown without irrigation and have a superior flavor.

Rev. W. L. Killian of Snohomish, Wash., made a brief visit at the home of Mr. and Mrs. N. B. Long the first of the week.

Rev. Pickering went to Pullman, Tuesday, to attend a session of the school for rural pastors, which is held under the direction of the state college.

The annual rose carnival at Lewiston, Idaho, was a great success this year, the flowers being very abundant and of fine quality. Miss Helen White was crowned rose queen.

Ed Cavanaugh, who has a position at the First National Bank at Lewiston, arrived the first of the week to visit at the home of his sister, Mrs. Leo Raaberg.

Leo C. Raaberg was a Lewiston visitor over the week end.

M. V. Thomas returned the first of the week from a visit with his brother at Clarkston.

Mrs. U. S. G. Evans of Endicott, Wash., is visiting at the home of her parents, Mr. and Mrs. Julius Petrick.

The Misses Nellie and Carrie Buckles of Lewiston arrived Wednesday for a visit with friends here.

Fred Bolon came over from Orofino, Tuesday, to see the ball game between Kendrick and Juliaetta.

John Hill was an arrival, Wednesday, from Canada, where he went some time ago to look after his property interests.

Charles Chandler left for St. Maries, Wednesday morning, where he had employment.

Mrs. Calver arrived Wednesday afternoon from Missouri to visit at the home of her sister, Mrs. James Emmett.

Mr. and Mrs. Harry Driscoll of Troy attended the chautauqua here Tuesday night.

Miss May Seals arrived this week from LaGrande, Oregon, to visit at

the home of her aunt, Mrs. Jody Long. She has a splendid position in a large department store at LaGrande and likes her work very much.

Halvor Nelson of Karmington, Wash., arrived Wednesday to look after business interests here.

A petition was filed Wednesday in the probate court by Sarah F. Jacobus requesting the appointment of E. W. Lutz as administrator of the estate of Edward Ameling. The petition set forth that the estate left by the deceased is valued at approximately \$29,000. The heirs mentioned in the petition are: Sarah F. Jacobus, Mary Deobald, Bertha Eichner, Julia Brocke, Lizzie Jessup and Charles Ameling. Judge Nelson has fixed July third as the date for hearing of the petition.

R. E. Densow, better known here as "Dick", was in Kendrick, Thursday, auditing the Farmers Bank. Mr. Densow is with the First National Bank of Lewiston as assistant cashier.

Tomorrow, (Saturday) is the last day in which the last half of 1921 taxes can be paid without a penalty.

In a letter from Rev. and Mrs. J. C. Gregory, who have an irrigation farm near Pasco, Wash., they say that Mr. and Mrs. O. O. Young have a son, Gregory Odd, born April 20, 1922. Mrs. Young is a daughter of Rev. and Mrs. Gregory and is well known here, as she spent several months in Kendrick when her father was Methodist minister here.

Mrs. James Rogers arrived this week from San Francisco for a visit with friends and relatives.

Herman Schupfer went to Pullman, Wednesday, to attend a convention of telephone men.

G. G. Oldfield drove the Ford coupe, owned by Bob Shumaker, to Pullman, Thursday. He returned home on the hurricane deck of a cayuse, which he purchased at Pullman for his son, Max.

Miss Josephine Winters returned to her home in Minnesota, Wednesday, after visiting relatives in this community.

Herman Wegner of Asotin was visiting friends in Kendrick and Cameron communities over Sunday.

The Kendrick boys' team went to Johnson, Sunday, and defeated the boys' team at that place by a score of 17 to 7. Johnson had the same team that played the first team here two weeks ago, with the exception of the pitcher and catcher. Frank Chamberlain took the boys over in his truck.

Mrs. Nettie Killian arrived Saturday from Grandview, Wash., to visit at the home of Mr. and Mrs. N. B. Long.

Born to Mr. and Mrs. Otto Schupfer of Juliaetta, Tuesday, a daughter.

### RIGHT CULTURE OF CABBAGE

Rich Soil Encourages Fast Growth, Large and Solid Heads—Chinese Variety Favored.

The history of the development of the cabbage gives the key to its culture. The richer the soil and the faster it is kept growing, the larger and stouter the heads. It must be grown fast to head fast. If through lack of fertility or drought its growth is checked, there is either no real head or a loose, very inferior one, the whole strength of the plant going to develop such leaves as it had produced before the check. The Chinese cabbage is an entirely different species from the common cabbage and its brothers.

### KEEP COMPOST HEAP MOIST

Arrange Pile So That Rain Will Keep Material Wet and Prevent Loss of Fertility.

"It is of the utmost importance," says the Flower Grower, "that the top of the pile be kept hollow or at least flat, so that rain will keep the material wet and prevent burning and loss of fertility. Don't let the pile get rounded on top under any circumstances, as it should absorb the rainfall and not shed it, and therefore, the nearer level it is kept the better job of composting will result."

### MORGAN TYPE IS USEFUL ON FARM

Horse Is Gaining in Favor in Southwest Because of Many Sterling Qualities.

### POPULAR NEW ENGLAND BREED

Stallions Are Being Used on Native Light Mares to Produce Animal That Satisfies Ranchers' Chief Demands.

(Prepared by the United States Department of Agriculture.)  
Because of its superiority in activity, hardiness, and stamina, the Morgan horse is increasing in popularity in the Southwest where stallions of the breed are being used to improve the saddle horses on the range. Used on the native light mares they produce a use-

ful animal that satisfies the ranchers' demands.

**Good Show of Breed.**  
At the Southwestern Exposition and Fat Stock show, held at Fort Worth, Tex., March 11 to 13, this year, there was a particularly good show of the breed. Sixteen horses were exhibited and there was a strong class of aged stallions. Red Oak 5249 was the best aged stallion and champion Morgan. This horse, sired by General Gates, was developed at the United States Morgan Horse farm at Middlebury, Vt. The Morgans were placed by one of the best known horse judges in the country, who described the champion as one of the finest horses he had ever seen.

**Useful American Breed.**  
As a result of the efforts of the United States Department of Agriculture in improving the Morgan and in stimulating a renewal of interest in this useful American breed, good

This is the Type Being Used to Breed Army Remounts.

breeding specimens are now found in many parts of the country. In order to obtain suitable remounts for the service the army has placed Morgan stallions in Kansas, Missouri, Montana, Nebraska and Texas. A few are owned privately in Illinois, Missouri, and Iowa, but the stronghold of the breed remains in New England, particularly in Vermont, where it was first developed.

### FARMERS ENGAGED IN RAISING SILVER FOX

Estimated That \$8,000,000 Is Invested in Industry.

Problems Met Require Knowledge of Species, Treatment, Sanitation, Diseases and Parasites—Handle Wild Animals.

(Prepared by the United States Department of Agriculture.)

More fur farmers are engaged in raising foxes than any other fur-bearing animal, according to reports to the biological survey of the United States Department of Agriculture. Observations made in the field by representatives of the survey indicate that at least 500 ranchers are raising silver foxes, and that there are between 12,000 and 15,000 foxes in captivity. It is estimated that about \$8,000,000 is invested in this industry.

The industry of breeding fur-bearing animals has grown because of the

Industry of Breeding Fur-Bearing Animals Has Grown Rapidly in Recent Years.

rapid development of the modern fur trade in the last twenty-five years. The United States is the largest fur market and fur-consuming country in the world.

Many inquiries concerning fox farming are sent to the biological survey. The problems met by fox and other fur farmers require, as in the case of other live stock, a knowledge of species, temperament, sanitation, diseases and parasites. "In addition, fur farmers are handling wild animals in captivity and not domestic stock. A knowledge of pelts, particularly of values and market requirements, is essential to success from the business standpoint, and this ordinarily means to visit personally warehouses, manufacturing furriers, or sales of furs. As breeders cannot always do this, representatives of the biological survey are constantly bringing before them all possible information relating to the fur industry in all its phases.

### SLIDES ON BETTER FARMING

Most Popular Set Has Been One Illustrating "Better Sires—Better Stock."

Two hundred and ninety-one sets of lantern slides were loaned to extension workers in 46 states during January, February, and March by the United States Department of Agriculture for use in illustrating better methods in farming and home making. Agricultural instructors and other teachers also found the slides useful, for 451 sets were sent to schools during this time.

The most popular set has been one illustrating "Better Sires—Better Stock." Next in demand to slides

### UNCLE HANK

Owln' to th' great number of motors, you can't rely upon th' charm of a rabbit's hind foot.

## Men's Hats

### Just Arrived.

All the latest styles and colors in Men's felt hats at the new low price.

Ladies' black cotton hose at 17c  
Ladies' white silk hose \$1.60

### BATHING SUITS

Heavy ribbed cotton color, blue with red trim sizes, 38 to 46, price \$1.45  
Same as above, boy's sizes, 28 to 34, \$1.20  
Pure worsted bathing suits at \$3.75

### Munsingwear for the whole family

We have received another shipment and can fit you with this splendid underwear that gives you long service and perfect fit. Ladies who care, come long distances to buy the perfect fitting Munsing unionsuits. Our stock is complete again. Prices are still very low.

Ivory Soap Flakes, 3 pkgs. 25c Pure bulk cocoa, a lb. 15c

"Certo" the concentrated fruit Pectin also called Surgjell, requires less sugar and makes perfect jam and jellies without boiling away the flavor, 35c a bottle.

## Kendrick Store Company

### The Quality Store

on this subject were those on home grounds improvement, followed by corn production, public road improvement, poultry management, dairying, forage crops and a wide variety of agricultural and home economics subjects.

The states making the largest number of requests for slides during this period, were Arkansas, Ohio, Michigan, Illinois and Pennsylvania.

### CLEAN OUT ALL FENCE ROWS

Such Pests as Grasshoppers, Wire Worms and Cut Worms Can Be Controlled.

Insect pests, such as grasshoppers, wire worms and cut worms, can be controlled to quite an extent by cleaning up the old grass and weeds on the unused land along fence lines and on waste land. According to F. A. Fenton, entomologist at Iowa State college, these locations harbor such pests, and by cleaning them up early, many insects will be killed before they start

work. Where pests have been prevalent on any area, rotation of crops will often starve out the offenders. This is particularly true of wire worms, cut worms and corn root worms.

### BIG IMPORTANCE OF TOMATO

No Single Garden Crop So Easily Grown—Success Depends on Soil and Cultural Methods.

There is probably no single garden crop so easily grown, and at the same time playing so large part in the winter supply of canned goods, as the tomato. Therefore, in the face of the high prices of canned and uncanned food stuff, more attention should be given to this valuable crop, to provide an abundant supply for the home and local market.

Successful tomato growing is largely dependent upon judicious soil selection, fertilizer application, and cultural methods. The best soil for tomatoes is the well drained garden loam soil.
