

KENDRICK WON FROM JULIAETTA

Took Fast Game by Score of 5 to 0.

One can get considerable "kick" out of a ball game when the score ends up 5 to 0 in favor of Kendrick. In fact, it isn't at all hard to take, particularly when the big zero represents Juliaetta's runs. It's some credit to lick Juliaetta, because they have a good ball team this year and haven't lost many games. The score book shows 2 games won and two games lost by each team in the series of four games played this season between the two towns. Kendrick is due to take the next game—naturally.

In last Sunday's game it was still more forcibly impressed upon the minds of the baseball fans, that Kendrick has one of the best first basemen in this whole region. Forest who has caught for Kendrick for the past ten years, changed to first base in the beginning of this season, and to say he is a dandy, doesn't half express it. In the last five games, during which he had many difficult chances, he has only made one error.

The batting of the Kendrick boys Sunday was consistent, to say the least. Each got one hit except Flaig who got two.

Kendrick made 1 run in the second inning, 3 in the third and 1 in the sixth.

Juliaetta made 4 hits and 6 errors; Kendrick 10 hits and 3 errors. Shepherd for Kendrick struck out 16 men; Ross for Juliaetta 5. Temperature 100 in the shade.

Report Seed Certifications

County Agent Skuse, of Nez Perce County requests that all farmers who have grain or potatoes they want to get certified this year to report to their community leader of the Crops and Rotation Projects so that they may assemble requests and report to Mr. Skuse.

This should be done at once as grain will soon be ripening on the lower elevations and the field must be inspected after the grain has colored.

The inspection will be done by some representative of the Agronomy office of the University.

To Certify, grain must:
a. Be ninety-nine (99) percent pure and free from penalty mixture;

b. Be free from noxious weeds;

c. Be sound, plump, good quality and color;

d. Not weigh below two pounds of the standard test weight per bushel;

e. Not contain more than one seed of other cultivated plants and all other weed seeds per pound;

f. Contain little or no smut;

g. Contain less than one percent cracked kernels;

h. Germinate—95 percent.

The names of the community project leaders are as follows:

Baker Community, G. W. Nolan; Caldesac Community, Wm. Bozarth; Gifford Community, R. B. Flunarty; Lapwai Community, E. E. Bever; Lenore Community, Boyd Cook; Leland Community, R. B. Parks; Melrose Community, John Watson; Peck Community, H. V. Springton; Rimrock Community, E. M. Becker; and Southwick Community, H. D. Hayward.

Frank L. Moore Files

Frank L. Moore, one of the most widely known attorneys of Idaho, filed, Saturday, his candidacy for the nomination for prosecuting attorney of Latah county, on the democratic ticket. Mr. Moore has always been active in political affairs. He has served one term as prosecuting attorney, having been elected to that office six years ago. Prior to that time he served as state senator. He is the first democrat in the county to file for office.

Baseball The Fourth

There will be a big Fourth of July game of baseball at Cavendish between Orofino and Kendrick. A large number of fans are planning to go from here to attend the celebration and follow the ball team to victory.

Vacation Bible School

Daily round of tasks and pleasures through two happy weeks, under cheerful and sympathetic teachers and leaders, with character and conduct the chief goal.

Vacation, with all its suggestions of liberty and good times amidst congenial surroundings, devoted to the worship of God and a careful study of His will in all things.

Bible becoming a vital modern text book with its lessons in close touch with daily life. Out of its range of truth finding that which fits the mind and heart of children and applying it in an interesting and practical way.

School with all the qualities of school plus more home-like good cheer and a great deal more conversation about being as Jesus would have us be, but a school where children from four to fifteen really study and work with their hands, learning by doing. Pray for the D. V. B. S.

—The Ministers of Kendrick.

Join American Legion

The preamble of the American Legion's constitution states that it is dedicated to God and Country. The Legion, during its career of only three years has demonstrated that it is the best insurance policy the Nation has.

Our post appeals to all eligible ex-service men in this community to join the Legion and to aid our fight for Americanism. The blue and gold button of the American Legion marks its wearer as one who has not thrown away his patriotism with the uniform. It means that he has not "passed the buck" to someone else to see that the sick and disabled buddies get justice and to fulfill all those things that he desired to result from the war.

Every man in the service hoped for better things after the war. More than two million doughboys, gobs and gyrenes realized that it was going to be a fight to bring to pass all the things that they dreamed of. The result of this prevailing sentiment was the formation of the American Legion.

Legion members are from every branch in the service, from those who were forced to remain at home to men who won the congressional medal at Chateau-Thierry and in the Argonne. It includes all ranks from private to general.

Our Legion post can be the most beneficial organization in this community. Its purposes are high; its ideals are untarnished. It deserves your support and the membership of every war veteran. Join Canyon post No. 66 of the American Legion and make it the best post in your State.

Tom Long, Commander, Canyon Post No. 66, A. L.

Manager Wilcox asks that anyone who is going to drive to Cavendish July 4th, and has room for a ball player, please let him know as he wants to keep down expenses as much as possible and by eliminating transportation expenses it will help out finances of the ball team.

WHEN IT WAS YOUR AMBITION TO RIDE ON A RAILROAD TRAIN - AND

NOW!!!

Mending

A Narrow Escape

What narrowly escaped being a fatal accident, occurred last Saturday when a Ford car, driven by Frank Ellers, was crossing the track in front of a train near the R. F. Bigham home. Mr. Ellers, his wife and two children and a young lady friend, were making a trip in their car from Tacoma to visit Mr. Eller's mother in the Fairview neighborhood. In attempting to cross the track the engine lost power just as it had reached the track. Mr. Ellers neither heard nor saw the train until it was so close that he hadn't time to check the car, so he kept on and the train grazed the rear fenders as it went by. The young lady in the car jumped on the track when she saw the train coming, and rolled off just before the train reached her. She was badly bruised but not seriously injured.

Methodist Church Notes

The pastor has had the pleasure of attending, for the past week, the summer school for pastors, held at the Washington State College at Pullman.

The State College in co-operation with the mission boards of the various denominations is, each year, giving a two weeks course in church and community work in all its phases.

There are ministers from at least four denominations in attendance. The faculty are A. A. Cleveland, dean of the school of education and director of the summer session; Dr. Raymond C. Rankin, of Glen Mary, Tenn.; Dr. Wm. M. Ewing, district superintendent of the Boise district of M. E. church; Dr. Valentine Deich, professor of religious education, Gooding College, Gooding, Idaho; and T. F. Bohler, director of physical education and athletics, State College of Washington.

The course of study this year includes church methods, church finances, rural sociology, rural church administration, the community, social teachings of the old testament and organized play and games.

These lectures, together with the round table discussions, will aid the pastors very materially in their ministerial work when they return to their fields.

Benson's in Auto Accident

Mr. and Mrs. Alvin Benson who left Clarkston a few weeks ago for Portland, met with a painful accident when the car in which they were riding collided with another car one day last week. Mrs. Benson is better known here as Rosebud Brown, daughter of Mr. and Mrs. J. F. Brown. The following account of the accident appeared in the Portland Oregonian:

Mr. and Mrs. A. F. Benson, No. 105 East 80th street north, suffered painful injuries late Sunday night when an automobile in which they were riding was completely overturned in a crash with a machine at 24th and Flanoers streets.

William Kinzel, No. 444 East 48th street north, driver of the second automobile, escaped unhurt. According to police, Kinzel crashed into Benson's car while the latter was going east on Flanders street.

The injured persons were treated at the emergency hospital where it was found Mrs. Benson sustained several lacerations and contusions of the right hip. Benson's right shoulder was dislocated.

Ain't it Awful

Mr. and Mrs. Billy Hell and three little Hells live in an unhappy little home on Hells Half Acre at Waterloo, Ia. Mrs. Hell has had Mr. Hell put in jail because she says he threatened to kill all the other Hells and go far away. There have been frequent battles in the Hell home. The police once found Mamma and Papa Hell fighting with knives, rolling pins, chairs, etc., while the little Hells all sought shelter under the bed. If there is anything in auto-suggestion the Hell family auto have the legislature change its name.—Ex.

Kendrick vs Orofino

The baseball fans of the Potlatch are looking forward to the game to be played here Sunday afternoon between Kendrick and Orofino, the latter team having won the only game played between the two teams this season. Kendrick is confident of winning Sunday and a fast game is expected. Kendrick has won 7 and 4 lost games this season, which isn't a bad record at all.

Keeler-Dorendorf

Miss Gertrude Keeler, daughter of Mrs. Elmer Keeler of Linden, was married to Albert Dorendorf at Moscow, Thursday. Mrs. Keeler was present at the wedding. After a short honeymoon trip the bride and groom will be at home on the farm near Linden. The best wishes of their many friends in the community will follow them in their happy marriage.

Income Tax Payers

The number of federal personal income tax returns for the calendar year ended December 31, 1920, filed in the district of Idaho was 25,755 representing net incomes amounting to \$67,391,639.00 and tax (normal tax and surtax) of \$1,086,614.00, according to a statement just issued from the office of the internal revenue collector at Boise.

As compared with 1919, the figures show a growth of 44,307 in returns, as well as an increase in the total net income amounting to \$1,919,099, but a decrease in the tax of \$388,409.00.

The proportion of the population of the United States who filed personal income tax returns for the calendar year ended December 31, 1920, was 6.85 per cent; whereas the proportion of the population of Idaho filing returns was 5.96. The average net income per return for the United States was \$3,269.40, whereas for Idaho it was \$2,616.64 and the average amount of the personal income tax per return in the United States was \$148.08, while for Idaho it was \$42.19.

The growth in the number of personal income tax returns, as well as the expansion in the net income and the variation in the amounts of tax, for the period 1916-1919, for Idaho can be visualized from the following table, which shows for each of the years 1916-17-18-19-20, the number of returns filed, as well as the amount of net income and tax reported:

1916, number of returns 756; net income, \$7,927,064; total tax, \$140,496.
1917, number of returns, 16,414; net income, \$46,465,514 total tax, \$839,646.
1918, number of returns, 19,249; net income, \$55,954,296; total tax, \$1,493,510.
1919, number of returns, 21,448; net income, \$65,472,540; total tax, \$1,475,023.
1920, number of returns, 25,755; net income, \$67,391,639; total tax, \$1,086,614.

Big Bear Ridge

Mrs. F. Hupp and daughter, Miss Adeline, were visiting their daughter and sister, Mrs. K. D. Ingle, last week.

Mrs. Rufus May underwent an operation for appendicitis at a Lewiston hospital, Saturday and is recovering nicely.

Miss Nettie Lacey of Lewiston was the week end guest of Miss Johanna Hooker and Mrs. D. J. Ingle.

Misses Agnes, Hattie and Nellie Larson arrived here, Thursday, from Grand Forks, North Dakota for a visit with their grandfather, A. J. Aas and aunt, Mrs. Ed Lien.

Miss Neva Nelsor returned to Pullman, Wash., where she is employed at the Northwest Sanatorium.

Mr. and Mrs. John Elliott and children, Mr. and Mrs. Jim May and children arrived here last week from Ontario, Oregon.

Preaching services at the Lutheran church, Sunday, July 2nd, at 3 p. m. Young People's League at 7:30.

Rev. G. A. Morton of Kendrick will hold union services at the Steele school house, Sunday, July 2nd at 11 a. m. Everyone welcome.

Dr. and Mrs. A. Otteraaen and Mrs. A. W. Ahl of Kendrick, were Sunday visitors at the Z. A. Aas home.

According to the Deary Press the Potlatch Lumber Company is paying \$360 for a team of good, heavy draft horses. The company purchased a number of horses recently for logging operations.

THE PROGRESSIVE POLITICAL PARTY

New Organization Comes In- to Official Existence.

Boise, Ida.—The progressive political party came into official existence in Idaho and was formally recognized by the secretary of state, following the filing of statement containing the names of 10,461 electors, thus qualifying the party to proceed with the nomination of candidates for state, legislature and electing delegates to the county and state conventions of the state progressive party can now hold a primary election and elect delegates to county conventions and to have a ticket of its own on the ballot at the general election.

Telegraphic notice was sent by Secretary of State Robert O. Jones to each of the 44 county recorders of the state of the new party's compliance with the law. Following is the text of his telegram:

"There has been filed in the office of the progressive party a written notice, in accordance with the provisions of section 517 compiled statutes of Idaho and as such it has all the rights of a political party whose ticket was on the ballot at the preceding general election."

The notice was filed by H. F. Samuels, Dow Donning and Frank Johnness. It recites that the persons whose names are subscribed thereto are in affiliation of duly qualified electors of the state of Idaho for political purposes; that they desire to exercise the rights of a political party under the name of progressive at elections for precinct, county, municipal and state offices in the present year, and that they intend to terminate at least three candidates for state offices and place them on a ticket at the general election under the party name. When interviewed following the filing of the notice and the names of the electors desiring the party, Frank Johnness, state chairman of the progressive party said:

"We will put up a state ticket from governor down to the coroner who will bury the old political crowds all over the state. Nearly every county in the state, with three or four exceptions, have sent in lists of names. We believe the time has come for a new broom to sweep politics in this state. Our people tell us that conditions are ripe for a complete sweep this fall. However, we are saying nothing but simply working."

Death of B. C. Johnson

News of the death of B. C. Johnson, former owner of the Troy News and at one time publisher of the Gazette, was received here last week. His death occurred at Neosho Falls, Kansas, where he had recently entered the newspaper business. No particulars concerning his death have as yet been received here.

After disposing of his interests at Troy, about three years ago, Mr. Johnson moved to Clarkston and was engaged for a time in the real estate and insurance business. About six months ago he and his family left for Kansas. He is survived by a wife and three children.

Cameron Play Thursday

Next Thursday evening the young people of Cameron will give a repeat performance of the play "Starbright", at the pavilion on the Herman Meyer place. The play was well received at its first appearance June 7, but on account of very unfavorable weather many who otherwise would have attended, were forced to miss it. The canvas-covered pavilion is a very pleasant, comfortable place to spend a summer evening and it is hoped that many will take advantage of the opportunity to see the play. A small admission charge will be made to cover expenses.

Only 12 signatures were secured on a contract for chautauqua for next year. As the minimum number was set at 50, in all probability there will be no chautauqua here in 1923. Kendrick has had chautauqua for the past five years or more and as there is somewhat of a sameness in the programs from one year to another, it was generally believed that there would be little lost in passing up chautauqua for next year. The program this year was considered the best of any that have previously been given here.

The fire danger incident to the use of matches and tobacco, writes Secretary of Agriculture Wallace, is usually given little consideration by the vast army of smokers. Statistics compiled by the National Board of Fire Underwriters show that the annual loss from fires caused by matches and burning tobacco in the United States reached the impressive total of more than \$73,000,000 during the five-year period 1915 to 1919, inclusive.

To this total must be added a considerable percentage of the unnecessary fire destruction in the forests of our country, where each year fires destroy or damage sufficient timber to build homes for the entire population of a city the size of Washington, New Orleans, Denver or San Francisco.

Campers, hunters, fishermen and woods workers should read this and resolve that their carelessness will not contribute to destructive forest fires.—Manufacturer.

According to X.Y.Z. of Lewiston, we are due for a rain about July 2. If he can make good on his prediction this neck of the woods will be eternally grateful. A good rain during the first week in July would result in very fair crops in the Potlatch.

A wise old wizard says that it is not so much messages from the dead that the world needs, but a few cheerful messages from its dead beasts.

A Chicago "wet" told a prohibition acquaintance he could show him 500 places "right here in the heart of Chicago where you can buy a drink as easily as you could in the old days." "Maybe so," said his friend, "but in the old days there were 7,500 places in the heart of Chicago where you could buy a drink." In a desert a small pond looks as large as a lake.

It begins to look very much as though the lowly bean would once more pull the Potlatch farmer out of the sea of despondency. Shortly after the war when beans went down to almost the level of worthlessness, they were about the most unpopular commodity in this section. Now, with wheat crops, looking considerably below normal, and bean crops looking never better, there is a fair prospect that the little white Navies will be king here next fall.

A New Jersey boy fell head first into a post hole and lost his life by suffocation. Another New Jersey boy ran in between the walls of a garage and the next building while playing with other children and became wedged in so tightly that firemen had to cut a hole in the garage wall to release him. One unsolved wonder of the ages still continues to be, how so many boys live to become men.

American farmers in March, last month for which Uncle Sam has compiled complete figures, exported 22,668,000 bushels of corn compared to only 13,371,650 bushels in March, last year. That looks like big news. Here is the joker: Corn exports increased 70 per cent in bushels, but total money paid for the corn increased only 33 per cent. Win on one hand, lose on the other. There seems to be a joker in nearly every

thing.

We talk about hard times and yet it is reported that during April the railroads hauled 30,200 cars of autos from factories, breaking all records for any one month. Since then the gain has been considerable and the auto trade is experiencing a busy summer. What would have happened this year if the times had been "good"?

Quality Counts Most.
It is not half as important how many cows you keep as what kind and how.

Feeding for Milk.
Good feeding is necessary for milk production. The Scotch say "It is by the head that the cow gives milk."

Term Gasoline is Modern.
The geological survey says that there were some materials like our present gasoline used as far back as the Second century, but the name gasoline was coined within the last twenty or thirty years.

Life's Diseases.
One of the common diseases of adult life is old age, another is middle age. These are not limited to adult life. Youth, actually, is not a function of time, but a physical state.—Eugene Lyman Fisk.

FARM POULTRY

NO DEFINITE RULE FOR FEED

When Hens are Laying Heavily They Should Consume Much Larger Amount of Mash.

Feed according to the appetite of the birds; no definite rule can be given. Feed scantily of grain in the morning and give all the grain they will eat in the afternoon in time to find it before dark. There should be no grain in the litter at noon; when found, it indicates feeding too much in the morning.

In general, feed by weight two-thirds part of grain to two parts of mash. When the birds are laying heavily they should consume a larger amount of mash.

A green range of alfalfa, clover, or grass furnishes the ideal condition. When these are not available it is necessary to give the birds some kind of succulent food. Mangel beets, cabbage, sprouted oats or green clover are usually considered the best green feeds. If these are not obtainable, apples and potatoes make a valuable addition to the ration. Feed at noon in such amounts as the birds will clean up before night.

Hard, sharp grit is necessary for grinding feed; oyster shell to supply lime for egg shells. Neither will replace the other.

The senior League will begin at 7:30 and close at 8:00 o'clock.

Whooping Cough

This is a very dangerous disease, particularly to children under five years of age, but when no paregoric, codeine or other opiate is given, is easily cured by giving Chamberlain's Cough Remedy. Most people believe that it must run its course, not knowing that the time is very much shortened, and that there is little danger from the disease when this remedy is given. It has been used in many epidemics of whooping cough, with pronounced success. It is safe and pleasant to take.—Adv.

REDUCE EXTENT OF DISEASE

Testing Cattle for Tuberculosis and Cleaning Up Infected Herds Having Effect.

(Prepared by the United States Department of Agriculture.)

That testing cattle for tuberculosis and the cleaning up of infected herds are having a permanent effect in reducing the extent of the disease is shown conclusively by figures recently collected by the United States Department of Agriculture from inspectors in charge of the eradication work in various parts of the country. The inspectors were asked to supply figures on the results of three or more tests on badly diseased herds, those that had not less than 10 per cent of reactors on the first test. The first test on more than 58,000 cattle in these bad herds showed that 26 per cent had tuberculosis. Another test six months later on the same herds, from which the reactors had been removed, showed only 6.9 per cent of the disease. By another six months the percentage had gone down to 2.8. A fourth test on more than 25,000 of these cattle showed only 1.8 per cent of tuberculosis.

The reports from which these figures were taken show that under nor-

mal conditions herds very badly diseased may be established as relatively free in a short time. They also show that eradication work can be carried on without destroying the cattle industry as is sometimes thought. Erratic results were obtained on a very few of the 1882 herds tested, the list of this class containing less than 100. Out of the 128,668 herds under

A Dairy Herd Certified by the Department of Agriculture as Free From Tuberculosis.

observation December 1, 1921, there were only a very few that had not shown satisfactory improvement as a result of testing.

Give Much More Butterfat.
Cows sired by purebred bulls give much more butterfat than those sired by scrubs.

CONTROL DISEASES AND INSECT ENEMIES OF VEGETABLE GARDEN

One of Tomato Hornworms—*a*, Adult Moth; *b*, Larva; *c*, Pupa; (Howard.)

(Prepared by the United States Department of Agriculture.)

The insects which attack the potato and the eggplant injure the tomato to a less extent, and tomatoes suffer greatly from pests.

Tomato Hornworms.

The tomato hornworms are large green worms, sometimes called tomato worms or tobacco worms, as they feed about equally well on both plants. They are the larvae, or young, of large sphinx moths of two species, which are very similar in habits and distribution. These insects produce two broods, and when they begin to mature they cut all the leaves from tomato plants. Growers should be on the lookout for the first as well as the second brood. They appear at various times, according to the locality.

Control.—Hand picking can be practiced, but it takes an experienced eye to detect these worms when they are at rest. When feeding they are more easily seen and can be destroyed readily. A single application of lead arsenate at the usual rate will destroy them even though crudely applied. Those which eat the poison first will be found dead the following day. The remainder will be found on the second or third day.

Tomato Fruitworm.—The tomato fruitworm is the same insect as the boll-worm of cotton and the corn earworm and is the cause of much trouble to tomato growers, because of its eating into the ripening fruit and destroying its market value.

Control.—Lead arsenate, 2 pounds to 25 gallons of water, applied two or three times, will keep the insect under partial control. As long as sweet corn is growing in the vicinity it attracts the worms, leaving the tomatoes less subject to attack. Hand picking is too difficult.

Cutworms.—Various cutworms attack the tomato when it is set out. Indeed, it is the favorite food plant of most forms of cutworms.

Flea-Beetles.—The potato flea-beetle frequently attacks tomatoes and does considerable damage.

Control.—Dipping young plants in lead-arsenate solution at the rate of 1 pound to 50 gallons of water, before set-

ting out, will protect them considerably against injury.

Bordeaux mixture also acts as a deterrent.

Late-Blight.—A rapid blighting of the leaves, accompanied by rotting of the fruit, is due to the same fungus as that causing potato late-blight. This is common in the Appalachian region.

It is controlled by spraying with Bordeaux mixture, as advised for leaf-spot.

Leaf-Spot.—In leaf-spot, the leaves are covered with dark brown spots (Fig. 3) and shrivel and die, beginning at the base of the plant. This is the worst disease of the tomato. Spray with bordeaux mixture and resin fish-oil soap before the disease appears, and repeat at ten-day intervals. Try to spray the lower side of the leaves as well as the upper side.

Mosaic Disease.—Mosaic disease crumples and distorts the leaves and produces irregular, light green areas. The plants are weak and unfruitful. In the "fern-leaf" type the leaves become very narrow.

Mosaic disease is communicable from plant to plant by insects, especially plant-lice, and by contact. When it appears in gardens it is best to destroy the affected plants and set out others.

Blossom-End Rot.—A decay of the fruit at the blossom end, though not understood clearly, appears to be connected with soil conditions, particularly with the water supply. To prevent

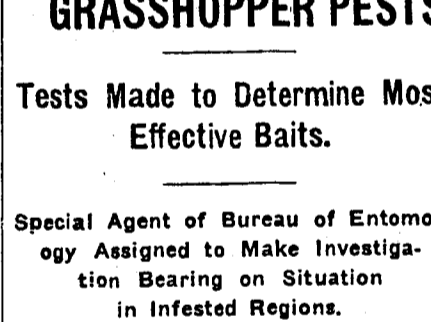

it, try to make the soil well drained, but retentive of moisture. Water the plants if needed. Plant the variety Bonny Best, which seems to resist blossom-end rot. Tomatoes trained to stakes and pruned often are less attacked.

Wilt.—Wilt causes the plants to wilt and die suddenly. It is especially prevalent in the South, where three different forms of wilt are found.

Destroy diseased plants. Use new land for the next planting.

Turnip.—Turnips are attacked by the same insects as cabbages.

Clubroot.—Clubroot of the turnip causes swollen, distorted roots similar

Tomato Leaf-Spot.

to those caused by cabbage clubroot. Rotation and lime are advised, as for the cabbage.

Watermelon.—Watermelons are affected by insects which attack the cucumber, and great injury is done by the melon aphid.

PREPARE TO CONTROL GRASSHOPPER PESTS

Tests Made to Determine Most Effective Baits.

Special Agent of Bureau of Entomology Assigned to Make Investigation Bearing on Situation in Infested Regions.

Various steps are being taken in the regions heavily infested by grasshoppers last year to prepare for their adequate control during the coming season should the same situation arise, says the United States Department of Agriculture.

At a recent conference attended by entomologists from Canada, as well as state and federal entomologists, plans were co-ordinated for conducting a series of experiments this year to determine the most effective poisoned baits for various species of grasshoppers which infest different regions. The work is to be done on a uniform basis, so that the results obtained may be easily compared.

It is also planned to construct an international map, showing in a large, regional way the grasshopper conditions in both Canada and this country. This map will be available both in making an annual record and for future reference in control work. A special agent of the bureau of entomology, with headquarters at Billings, Mont., has been assigned to make investigations bearing on the grasshopper situation this year in Wyoming, North Dakota, Minnesota and other affected areas.

TIMOTHY WILL AID ALFALFA

Yield of Hay Increased Twenty-Five Per Cent in Wisconsin—Keeps Out Bluegrass.

Increasing the yield of hay by 25 per cent was the result obtained when 15 pounds of alfalfa seed and 5 pounds of timothy were used per acre instead of alfalfa alone. Experiments conducted in Wisconsin gave these results. It was also found that the timothy plants aided materially in keeping out blue grass, especially in spots where the alfalfa was winter-killed. The time of harvesting of hay also resulted in a product of superior feeding quality.

NOTICE OF CONTEST

Department of the Interior, United States Land Office, Lewiston, Idaho. June 5, 1922.

To Frank V Thompson of Southwick, Idaho, Contestee: You are hereby notified that Donald M. McCrea who gives Kendrick, Idaho, as his post-office address, did on May 4, 1922, regularly file in this office his duly corroborated application to contest and secure the cancellation of your Second Homestead Entry No. 07572 Serial No. 07572 made March 1, 1920, for Lots 1 and 2, and E½ NW¼, Section 30, Township 39 North, Range 1 East, Boise Meridian, and as grounds for his contest he alleges that you have abandoned said land since March 1, 1920; and that your failure to cultivate or reside upon said land was not due to your employment in the military or naval service of the United States, or as a member of any organization for offense or defense authorized by Congress.

You are, therefore, further notified that the said allegations will be taken as confessed, and your said entry will be cancelled without further right to be heard, either before this office or on appeal, if you fail to file in this office within twenty days after the FOURTH publication of this notice, as shown below, your answer, under oath, specifically responding to these allegations of contest, together with due proof that you have served a copy of your answer on the said contestant either in person or by registered mail.

You should state in your answer the name of the post-office to which you desire future notices to be sent to you.

Catarrrhal Deafness Cannot Be Cured
by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure catarrrhal deafness and that is by a constitutional remedy. Catarrrhal Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, Deafness is the result. Unless the inflammation can be reduced and this tube restored to its normal condition, hearing will be destroyed forever. Many cases of deafness are caused by catarrrh, which is an inflamed condition of the mucous surfaces. Hall's Catarrrh Medicine acts thru the blood on the mucous surfaces of the system.

We will give One Hundred Dollars for any case of Catarrrhal Deafness that cannot be cured by Hall's Catarrrh Medicine. Circulate free. All Druggists.

F. J. CHENEY & CO., Toledo, O.

The Home of the Soul

In olden times, it was believed that the seat of the soul was the stomach, most likely for the reason that a man is never so completely used up as when his stomach is out of order. For the cure of ordinary stomach troubles, there is nothing quite so prompt and satisfactory as Chamberlain's Tablets. They strengthen the stomach and enable it to perform its functions naturally. Give them a trial. They only cost a quarter.—Adv.

Make Any Range a Gas Stove

Attach to any range, all the best with common burners and ready for use any time. Cheaper than coal, wood, or gas. Burns better than oil. Saves hundreds of dollars. Thousands received for it.

WHY AND HOW TO CULTIVATE SOIL

Of Much Importance That Roots of Various Plants Be Given Supply of Air.

MAKE PLANT FOOD AVAILABLE

Many Persons Make Mistake of Working Too Deeply and Cut Off Feeding Rootlets—Steel Rake Is Useful Tool.

(Prepared by the United States Department of Agriculture.)

Most people have an idea that gardens are cultivated solely for the purpose of killing weeds. As a matter of fact, the killing of weeds is just one object of garden cultivation, says the United States Department of Agriculture. The roots of plants require air just the same as do the tops, and if the ground is packed or hard or is sunbaked over the surface after a beating rain, the roots cannot get air, and for that reason the plants will suffer if not cultivated. The same thing is true where the land is poorly drained and waterlogged. The water keeps out the air and the roots cannot feed the plants.

Cultivation has another object, in that it breaks up the soil particles and makes plant food available for the feeding rootlets of the plants. Many persons, however, make the mistake of cultivating too deeply, and by so doing cut off or injure the feeding rootlets and deprive the plant of its source of nourishment and support. Frequent shallow cultivation during dry weather results in the formation of a layer of fine dust which serves as a mulch or blanket to retain moisture.

Cultivating After Rains.

The soil should always be cultivated, just as soon as it is sufficiently dry to be safely worked after heavy rains. If it is not cultivated, a crust forms, the surface bakes, and the crops are injured. The same will apply where irrigation is used, and it has been found best to give the soil a thorough soaking, then cultivate as soon as it is dry enough, and apply no more water until absolutely necessary.

The hoe and the steel rake are the most important tools for cultivating the small garden. On a larger scale a wheel hoe or a horse cultivator may be used to advantage. The wheel-hoe outfits are provided with a number of different attachments adapted for the different types of work to be performed. These implements have the advantage that one can go over the garden very rapidly and break up the surface of the soil in a comparatively short time. It is generally necessary, however, to follow with the hoe and the fingers to remove any weeds that have not been destroyed by the wheel cultivator. Even where horse-drawn tools are occasionally used, the greater part of the work, especially during

One Section of a Well-Planned Garden.

dry weather, may be performed by means of a common steel rake. It is not necessary to go very deeply into the soil, but merely to stir the surface.

A Tool That Helps.

A handy little tool for loosening the soil can be made from a piece of thin board 2 inches wide and 14 inches long, with one end whittled down to form a handle and the opposite end provided with three No. 6 or No. 7 wire nails. This little home-made implement can be used very soon after a rain to loosen the surface, so that any small seeds can break through.

It should be borne in mind that the time to kill weeds is when they are just coming through the ground. If allowed to become established, it is much more difficult to get rid of them than if they are taken in time. If the top 2 inches of soil is kept continuously and thoroughly loosened, there will be no serious difficulty in keeping out weeds.

SOY BEANS FIT IN ROTATION

Take Place of Oats and Are More Profitable as Cash Crop—Of Benefit to Soil.

Soy beans fit perfectly in rotation in the place of oats, making a four year rotation corn, soy beans, wheat, clover, they being more profitable than oats as a cash crop, and leaving the soil in much better shape, both as to mechanical condition and fertility, as little or no preparation for wheat is needed on land from which a crop of well cultivated soys has been mowed.

IMPROVEMENT OF DAIRY INDUSTRY AIMED AT BY RECENT CONFERENCE

There is a Decided Need for Improvement in Dairy Animals and in Making the Best Use of Those Now Available.

(Prepared by the United States Department of Agriculture.)

As a result of the conference of representatives of the purebred dairy cattle associations held in Washington, May 5, at the call of Dr. C. W. Larson, chief of the dairy division of the United States Department of Agriculture, a number of important recommendations were made for the improvement of the dairy industry, especially the purebred dairy cattle business. Each of the breed associations, including the Ayrshire, Brown Swiss, Guernsey, Holstein-Friesian, and Jersey, was represented by two or more delegates. The subjects of discussion had to do with the improvement of dairy cattle, advanced registry, fairs, and sales.

No conferences of this kind had been held for several years, and the representatives expressed the desire that this one might result in the formation of a permanent organization to thresh out problems of mutual interest and to work for the general betterment of the industry. Figures prepared by the department showed a decided need for improvement in dairy animals and in making the best use of the improved animals that are now available. The average production of the cows of the United States is about 4,000 pounds of milk and 100 pounds of butterfat a year, while the average cow in some other countries produces almost twice as much. There are 30 million grade and scrub dairy animals in the country, and less than a million purebreds. There are 4,506,664 American farms having dairy cattle, and only 208,251 of these farms have purebred dairy cattle. It is estimated that approximately 250,000 purebred dairy bull calves born each year are not needed on the farms where purebreds are kept. Of the purebred animals that were registered last year, about 150,000 were females and less than 75,000 males, which indicates that not half of the purebred dairy bulls are registered.

Recommend Better Sires.

Among the recommendations made by the conference were those expressing approval of plans for increasing the use of purebred bulls in scrub and grade herds, and of the plans for cooperative bull associations as being the best known means for distributing surplus bulls and introducing them into new territory. Although there is a place in this country for all the purebred dairy cattle that may be produced for some time, it was the consensus of opinion that an expert business in purebreds would help to stimulate interest among farmers at home.

A number of questions related to advanced registry were brought up. Co-ordination of effort by and between the agricultural colleges and the breed associations was suggested, and it was recommended that these organizations and institutions make special efforts to co-operate. In this connection it was suggested that the various representatives ask their associations at their earliest meetings to appoint committees to meet with the Dairy Science association to see if an improved plan for making official tests of cows can be worked out, which will be agreeable to the breeders, the associations, and the colleges that send out the official testers.

The showing of dairy animals at fairs and expositions received a good deal of attention from several angles. It was decided to recommend to the associations that they cease giving money prizes at these shows, but spend the funds in putting on educational exhibits; that more attention should be given to production records in awarding prizes at fairs and shows; that the associations represented should give more attention to educational exhibits showing the economic advantage of purebreds in dairy practice; that each association has a distinct duty in connection with the selection of suitable persons to act as judges of the various breeds of dairy cattle at fairs and shows; that no animals should be admitted to fairs and expositions unless they are from herds accredited as being free of tuberculosis or in herds under federal or state supervision, and that fairs not enforcing such a rule should not be favored with animals for exhibits.

Live Stock Sales Discussed.

Questions relating to private and public sales were discussed, and it was decided to suggest a meeting at an early date of all the dairy cattle associations with a view to drafting a code of ethics for sales that would eliminate some of the undesirable conditions. Since an excessive amount of attention is given to a few high priced sales, the neglect of average conditions, it was also agreed to recommend to the associations that they send in to the bureau of markets and crop estimates of the department regular re-

ports of prices paid for purebred dairy cattle.

The representatives were well pleased with the accomplishments of the conference and were in favor of holding similar ones at frequent intervals. During their stay in Washington they were received by President Harding and were addressed by Secretary of Agriculture Wallace. Dr. John R. Mohler, chief of the bureau of animal industry, attended the meetings and addressed the conference. A part of the second day was spent in a visit to the department's farm at Beltsville, Maryland.

The list of associations and their representatives taking part in the conference is as follows:

- Ayrshire Breeders' association: Paul O. Reymann, president, West Virginia; C. L. Burlingham, secretary, Vermont.
- Brown Swiss Cattle Breeders' association: A. E. Bower, president, Ohio; L. E. Hull, Ohio.
- American Guernsey Cattle club: Robert Scoville, president, New York; S. M. Shoemaker, Maryland; Karl B. Musser, New Hampshire.
- Holstein-Friesian Association of America: Fred Pabst, Wisconsin; H. W. Norton, Jr., Michigan; D. D. Aitken, Michigan.
- American Jersey Cattle club: M. D. Munn, president, Minnesota; R. M. Gow, secretary, New York; O. H. Baker, New York; C. J. Tucker, Missouri.

REFILLING SACKS IS PROHIBITED BY LAW

Food and Drugs Act Is Violated by Some Feed Dealers.

Federal Officers Have Been Instructed to Watch for Interstate Shipments of Feeds Adulterated or Misbranded.

(Prepared by the United States Department of Agriculture.)

Some feed dealers are refilling used feed sacks stamped or printed with the name of the manufacturer and the brand name of the feed that was originally in the sack, so that the names and brands are not true in reference to the feed in the sack after refilling, according to officials of the bureau of chemistry, United States Department of Agriculture, who are charged with the enforcement of the Food and Drugs act.

A feed dealer of Iowa was recently cited to a hearing under the Federal Food and Drugs act for shipping into interstate commerce a molasses feed in bags which he had refilled but which bore the name of another feed manufacturer. The sacks also bore a brand name under which the original owner of the sacks sold a stock feed of much higher grade than the feed with which the sacks were refilled.

The Federal Food and Drugs act does not require the name of the manufacturer or the brand name to appear on sacks of feed coming within its jurisdiction, according to officials of the bureau, but if the name of the manufacturer and brand are given on the sack they must be true. The Food and Drugs act prohibits the use of any statements on foods or feeds that are false or misleading in any particular.

A dealer who contemplates refilling used feed sacks on which is printed the name of another manufacturer or any statements that are not correct when applied to the product he uses in refilling the sacks should be very careful to see that all such statements are obliterated.

Inspectors have been instructed to look out for interstate shipments of stock feeds which are adulterated or misbranded in this or any other particular. Appropriate action will be taken in all cases found to be in violation of the law, it is said.

BEES PLAY IMPORTANT PART

Especially Valuable to Orchard Owner During Rainy Season in the Blooming Period.

Bees play an important part in the production of fruit in cross pollinating and fertilizing the flowers. They carry and distribute pollen. Prof. W. A. Price, entomologist at Purdue, says bees are especially important to the orchard owner in rainy, backward seasons, during the blooming period. When it is rainy the flies, butterflies, and the wind, pollinating agents, may not function, but the bees work between showers and are often responsible for the success of the fruit crop.

CREAMERY TAKES SAFE MILK

Vermont Association Accepts Product
Only From Herds That Have
Been Tested.

Increasing interest in the tuberculin testing of cattle is evident from reports received by the United States Department of Agriculture from many parts of the country. This tendency applies not only to milk used directly, but to manufactured dairy products. A co-operative creamery association at Barre, Vt., accepts milk and cream only from herds that have been tuberculin tested under federal and state supervision.

The products of the association's dairy plant are butter, cheese, ice cream, milk and cream, the products being sold both wholesale and retail. Specialists in the bureau of animal industry regard the increasing interest in tuberculin eradication as an important development in the dairy manufacturing industry.

Warm Quarters for Cows.
Cows in winter should have access to warm quarters during stormy

weather although they require exercise and should not be stabled all the time. Warm water is a great help in keeping the animals in good winter condition.

Cow Needs Vacation.

After a season of steady, high-pressure work, the dairy cow needs a six or eight week's vacation—not at the shore or in the mountains, but out in the quiet of the back pasture.

GOOD FEED BEFORE ROOSTING

About One-Third of Total Amount
Fowls Will Clean Up in Day Is
Just About Right.

Chickens need a good feed before going to roost at night, and if fed about one-third of the total amount they will clean up in a day, in the early morning, and the remainder in the afternoon, the proportion will be about right. The mash can be fed in a large hopper which is kept constantly before them, care being taken to see that it is so placed that it does not become dirty and that the chickens do not scratch into or in it.

Cameron News

About 75 people of the Cameron congregation gathered at Cedar Creek, Sunday, for an all-day outing. The morning was spent in playing horse shoe, baseball and exploring the surrounding country by the young folks. At noon a delicious lunch was served.

In the afternoon Ed Wegner and family of Bear Ridge drove over in the truck and thanks to the Wegner orchestra, the afternoon passed quickly, and all enjoyed the beautiful music. After supper the bunch gathered at Mrs. Rein's and the orchestra played again.

Miss Loloa Hedge of Everett, Wash., is visiting Mrs. Rein, until the university starts for the fall term.

George Larson returned from the mines at Mullan, Idaho, Friday.

Frederick Mielke left for Washington, D. C., Saturday to procure a residence, while his wife and children remained until he has found a place.

Mr. and Mrs. Carl Lohman and family, motored to Genesee, Sunday morning, returning Monday afternoon.

Mrs. Birkie of Minnesota is visiting her uncle, Mr. Fred Mielke.

Herman Silflow, went to Lewiston last week.

Herman Silflow had the misfortune to lose one of his colts this week.

John Emtman returned to Kiesel, Wash., after visiting his brother for a month. His daughter, Emma, will remain for another week.

Rev. Rein returned from conference at Salem, Oregon. His brother, Adolph and family of Castle Rock, accompanied him.

Gertrude and Gustav Stahl of Tacoma, Wash., are visiting relatives in Cameron.

Lact Thursday evening a surprise party was given on Mr. and Mrs. Frederick Mielke. The young folks spent the evening playing games and the older folks enjoyed "500". At 11:30 ice cream and cake were served. A good time was reported by all present.

Mrs. Schmidt and children of Spokane are visiting Mrs. Schmidt's father and sisters.

Texas Ridge

Albert Pierce has decided to become a Dearyite. He has purchased the Ted Gloum grocery store.

Mrs. Leslie Mallory of Deary was visiting her parents, Mr. and Mrs. Al LaBolle.

Owen Hammond and friends of Clarkston spent Monday night on the ridge.

Mrs. Roy McKay and children of Moscow are visiting her parents, Mr. and Mrs. McGraw.

Florence Anderson of Deary is spending a few days at the Chris Beyer home.

Mrs. James Miller and son, Leonard, were at Bovill, Tuesday, to have Leonard's tonsils removed. Dr. Gibson performed the operation.

Mrs. Harry Stanton and children of Kendrick are spending a few days on the ridge.

Quite a number from the ridge were shopping in Deary, Tuesday, and also attending the meeting of the Farmer's Elevator Co.

Miss Marie Bower of Avon is assisting Mrs. Nestor Olson with her housework during the strawberry season.

Mesdames Ogden and Babcock were callers at the John Adams home Tuesday afternoon.

"THE U. P. TRAIL"

"The U. P. Trail," at the New Kendrick Theater, tonight and Saturday, is adapted from the well-known book of the same name by Zane Grey, this splendid, virile story of pioneer days of adventure along the Union Pacific railroad, where men from all over the world came to try their luck at gold-getting and gold-making, has lent itself remarkably well to the screen.

There are many laughs as well as tears in the play, happiness as well as sadness, and the greatest happiness in the end. On a noble theme it builds in color, dramatic incident, and red-blooded action a powerful and appealing photoplay that will live forever in one's memory.

There are many reasons why you should have your printing done at the Gazette office. 26-27

Proper Way to Display Flag.

When the American flag is hung as a banner the union, or field of stars, should be in the upper left hand corner. When hung with stripes perpendicular the union should be in the right-hand corner. When hung from a rope stretched from building to building across the street, on streets running north and south, the union should fly to the east, on streets running east and west, the union should fly to the north. When hung from a rope stretched from the house to a tree in the yard the union should fly toward the street.

DAIRY

COW-TESTING ASSOCIATIONS

Small Group of Michigan Farmers
First Entered Upon Experiment
Considered Doubtful.

(Prepared by the United States Department of Agriculture.)

Fifteen years ago a small group of farmers in Michigan entered upon what many of them probably considered a very doubtful experiment. It was the organization of an association for testing their cows, in respect to how much feed they ate and how much milk they gave; an association such as the farmers of Denmark had organized

Cow-Testing Associations Have Proved
Big Success.

ed about ten years before, and which various other European countries had copied.

The experiment, as studied by the United States Department of Agriculture, proved a success, however, and now the number of such associations has grown from 1 to 452. It is notable that some states which took up the idea at an early date have stuck to the movement and organized more and more associations, while others continue with only a few. Most states increase the number of their cow-testing associations as time goes on and the Department of Agriculture is fostering the work.

The lack of testers during the war caused a setback to the movement, but recovery from this has taken place, and the number of associations in the country is now much larger than it was before the war.

SEEK VACCINE FOR CHICKENS

Field and Laboratory Tests Are Being
Conducted at the Kansas Agri-
cultural College.

Experiments involving many field and laboratory tests are being conducted at the Kansas State Agricultural college to determine the efficacy of

a vaccine for fowls to prevent cholera, typhoid and roup. It has been determined that cholera and roup are caused by the same organism. In field tests a vaccine produced at the college by Prof. F. R. Baudette has given some very satisfactory results and this is now being tested out in the laboratory. If these tests are successful more field work will be done by college experts. No vaccine is being given out at this time because the chemists are not in a position yet to guarantee it.

PRODUCING EGGS IN WINTER

Palatable Mash Can Be Made From
Mixture of Bran, Meat Scraps,
Oats and Meal.

A palatable mash which should produce winter eggs in a well-bred flock of fowls kept in light, roomy and sanitary quarters, can be made as follows: One hundred pounds of bran, 100 pounds of gluten meal, 100 pounds of meat scrap, 150 pounds of crushed oats and 150 pounds of cornmeal. Two ounces of this mash, with one and one-half ounces of cracked corn, and one-half ounce of whole oats should be fed to each hen daily.

DETERMINING SEX OF DUCKS

Hen Always Quacks in Coarse Voice,
While Drake Will Emit
Sibilant Sound.

Not every one knows how to tell the sex of ducks, but it is easy. The hen duck always quacks in a coarse voice; the drake never quacks, but emits a sibilant sound, described by one woman as being "like an old man with brownkeepers." It has a "quack" sound, but is high-pitched and not so loud as the raucous quacking of the hen ducks.

Ice Water Is Expensive.
Feed can never get cheap enough to make it profitable to give the cows ice water to drink.

Don't Neglect Your Floors

It's fun to paint or varnish them
yourself—easy too

FLOORS that have a good finish do not get scarred and worn, the finish takes the wear. Well finished floors always look better, too.

If your floors need refinishing and you can't get a painter to do the work, refinish them yourself. You can do it easily—it's really fun.

Our "Home Service Paint Department" was organized just to help women refinish things about the home. Write for free advice, telling us what you want to refinish and how you want it to look.

Our experts will explain every step of the work and recommend the right materials, brushes, etc. There are special Fuller Paints, Varnishes, Enamels, Wall

Finishes and Stains for you to use. They are the best products of their kind that we know and we have been making such products for 73 years.

Take advantage of Fuller's Free Advice and Fuller's Products in beautifying your home. The results will surprise you. The work will fascinate you.

Fifteen-for-Floors

Fifteen-for-Floors Varnish. This varnish is unequalled for beauty of finish, durability and ease of application. Rolling furniture, boiling water, heel marks, everyday wear and tear have no effect on this glossy, elastic and durable finish. We also make Decorat Varnish Stains, All-purpose Varnishes, Rubber-Cement Floor Paint, Washable Wall Finishes, Silk-white Enamel, Fuller's Varnish, Floor Wax, Auto Enamel, Fuller's Hot Water Wall Finish (kalsomine), Porch and Step Paint, and PIONEER WHITE LEAD.

The Farmers Hardware Company

GLEANINGS

The 4th annual picnic of the Latah County Farm Bureau will be held at the City Park in Moscow, on Tuesday, July 18th. Particulars will be published later. All farmers should keep this date open.

Mrs. B. N. Emmett expects to leave the last of this week for Tina, Missouri, where she will make an extended visit with relatives.

Wm. Sparber left Tuesday morning for Garfield, Wash., where he has employment.

The heavy rains that visited this territory several weeks ago, washed out fifty acres of beans for Harry Hupp on Little Bear ridge. Harry re-seeded the patch and this week he said the beans came up in fine shape and are almost as far along as some of the first he planted.

Dr. and Mrs. Kelly and Eloise, and Mr. and Mrs. G. F. Walker expect to leave the last of this week for the Red River Hot Springs country for an outing. They will make the trip by auto, taking a complete camping equipment. Dr. Kelly and Mr. Walker expect to return within a week but their wives will remain for probably a month. They plan to spend two days going in, but may be on the road longer as the roads are said to be muddy in spots, the snow having but recently melted in the mountains.

The many friends of Mrs. Jody Long will be glad to hear that her health is considered to be decidedly improved. Her friends will be very much delighted when she is able to be up and around again.

Aaron McCrery went to St. Maries the first of the week where he has employment.

W. S. Baird left Wednesday afternoon for St. Maries where he expects to get work in one of the sawmills. Mrs. Baird will join him there later.

Attorney Geo. G. Pickett of Moscow was transacting business in Kendrick Tuesday evening.

Holbrook & Emmett shipped a car of cattle and hogs, Wednesday of this week.

Tony Agrell of Moscow, who for many years lived on American ridge, spent the week end at the Frank May home. He was in very poor health for over a year but his friends will be glad to learn that he is recovering and his health is much improved.

Signs of the times: "If it costs money to go up in the aeroplane on the Fourth, I'll have to dig a hole in the ground."

Malcom McIver returned to his home in Canada after visiting relatives in the Cavendish section.

Adolph Wegner and little daughter, Vivian, and Mr. Wegner's sister, Mrs. William Rogers, went to Spokane the first of the week to consult a child's specialist. Vivian has been ill for some time but the Spokane specialist didn't consider her case to be of a serious nature. His advice was to have her tonsils removed next fall.

The McConnell, E. Bechtol and Knepper families spent a very pleasant week end along the North Fork of the Clearwater river, above Dent. Fishing was very poor, but the drive along the Clearwater is a beautiful one and well worth the trip.

G. G. Oldfield of the New Kendrick has secured the Clarke Oldfield Vaudeville Company for his theater, Saturday, July 8. The manager of the company is "Barney's" cousin.

There was a good attendance Sunday, to hear Rev. J. W. Hoyt, Sunday school missionary of Walla Walla, who spoke at both churches here.

Audrey and Dorothy Stanton, Helma Christensen and Mrs. Pickering went to Moscow, Tuesday afternoon to attend the annual Epworth League institute for the Moscow district. Those who attend the institute from outside points are camping in tents at the city park, more than 20 tents being in evidence the first day. The morning and a part of the afternoon is devoted to class work and from 3 to 5, athletic sports are given full sway.

Herman Schupfer was in Moscow on business Wednesday afternoon.

Ben Callison and son, Norla, returned Wednesday from a fishing trip to Elk River. They report fishing good but mosquitos too prevalent.

Rev. Rein of Cameron, who recently returned from a trip through Oregon, says the crops in the Walla Walla section and all of the lower country, look very poor and are being badly damaged on account of the dry weather.

Mrs. Herbert Helm of Oakland, California, daughter of Mrs. S. E. Crow, is visiting today at the home of Mr. and Mrs. H. P. Hull.

S. P. Callison caught a four-pound bass at Chatelet Lake last week.

Three candidates have filed for the nomination for sheriff on the republican ticket in Latah county. John L. Woody is a candidate to succeed

himself and O.W. Beardsley filed last week. Wednesday, Edward H. McConnell of Moscow, an ex-service man, filed his candidacy. These are the only filings on the republican ticket to date, in which there is a contest.

Mr. and Mrs. George Leith and family and Mrs. O. E. MacPherson and son, Donald, were Lewiston visitors, Wednesday, making the trip in Leith's car.

Mrs. Elbert Kuykendall and children were Pullman visitors, Thursday.

Linden News

The community was deeply grieved when the news came that John Carr had lost his mind. He was returning home from a visit with his sister and relatives in Oregon, and stopped in Lewiston a few days to have some dental work done, when he was stricken with insanity. Some think the intense heat and excitement were instrumental in bringing about the change. After an examination by Dr. John Alley and a hearing before Judge Seales, he was committed to the asylum at Orofino.

Mrs. John Carr and Miss Anna Smith went to Lewiston, Thursday, returning home Friday.

Mrs. Joe Perry of Juliaetta visited at the home of her parents, Wednesday, returning home Thursday, accompanied by her mother, Mrs. James Garner.

George Garner and Mr. Sadler drove to Coeur d'Alene, Wednesday, in George's truck. They were accompanied as far as Spokane by Mrs. George Garner and son, Melvin, Cleve McPhee and William Kyle. They came home Friday night.

Quite a number of people from the ridge attended the chautauqua in Kendrick last week.

Mort Jenks, who is working on a rock-crusher near Southwick, visited at the Lou Alexander home Sunday.

Mr. and Mrs. Ed Darby and family visited at the John Darby home at Crescent, Sunday.

Jake Michael arrived this week for a visit with his brothers, John and Jesse Michael.

The George Garner family and D. McPhee family were Cavendish visitors, Sunday.

Lester Weaver is working on the fire patrol for the Potlatch Lumber Co.

Mrs. Sylvia Jenks returned to Lewiston last week after a visit at the Lou Alexander home.

The Children's Day exercises held at the church Sunday were largely attended and greatly enjoyed by all.

Mrs. Dick Winegardner visited at the Harry Wright home Tuesday afternoon.

Preparations are being made for the community picnic to be held in the Vollmer grove near Crescent school house, July 4th. Ice cream is being ordered for the stand, and a bowery is under construction.

TURKEY EGGS FOR HATCHING

They Should Be Gathered Daily Where There is Danger of Them Being Destroyed.

When there is danger that turkey eggs may be chilled or destroyed they should be gathered every day, and a nest egg left in each nest. Skunks, opossums, rats, crows, and dogs are the greatest destroyers of turkey eggs, although occasionally minks, raccoons, coyotes, wolves, foxes, cats, and certain large snakes also eat eggs. When a turkey hen has been disturbed by one of these pests, she may change her nest to some other place and abandon the eggs.

Eggs for hatching should be kept at a temperature of as near 50 degrees or 60 degrees F. as possible, and should be turned over every day, say poultry specialists in the United States Department of Agriculture. They should be jarred as little as possible while handling and should be incubated while fresh, never holding more than two weeks if it can be avoided. It is an excellent plan to mark the date on each egg as it is gathered, in order to be certain that no eggs are kept too long before they are incubated.

CHERRIES

We will take orders for locally grown cherries to be delivered Wednesday, July 5, at following prices:

Black Tartarians, per lb 11c
Royal Ann, per lb 9c
Sour pie cherries, per lb 7c

The chery crop is short and those wishing cherries for canning should not fail to place their orders.

Mysteries of the Infinite.

What do the stars above us mean? What's around them? What is their purpose in creation? Our "star," which we call the sun, we fondly believe is for the purpose of giving our little grain we call the earth, warmth and light, so that we may live and move and have our being. As we strut about and enjoy our petty achievements we do not often contemplate the starry vault above us. Perhaps it is just as well so, for when we search out the knowledge of the heavens how we shrink! How we shrink!—Chicago Journal of Commerce.

American Playing Cards.

Early American playing cards, according to an article in the American Printer, showed the national antipathy to kings and queens by presenting, instead of the conventional figures with which playing cards are now adorned, the following pictures: "President" of hearts, George Washington; of diamonds, John Adams; of clubs, Benjamin Franklin; of spades, Lafayette. The "queens" were Venus, Fortune, Ceres and Minerva. The knaves were represented, appropriately reflecting the general feeling among the whites, by pictures of Indian chiefs.—Outlook.
