Wagner's Piano Brought to America

This piano, on which Richard Wagner composed some of his most famous works, was found in Germany by Robert H. Prosser, a former American soldier, whose portrait is inserted. He has brought it to the United States and will place it in some museum.

Kendrick News Seventeen Years Ago

Local items that appeared in the Gazette in the summer of 1905.

The intense heat last week was not extra favorable to the crops. A careful gleaning of the results shows that spring wheat has been damaged to a certain extent. Just how much it is impossible to state, probably in the neighborhood of 25 per cent. The fall wheat was too far advanced for the hot wave to injure it and the first estimates on the crop are about correct. It is said that the oat crop has been seriously overestimated and that it will run largely to chaff, but we look for somewhat better results when the cutting begins.

Mrs. W. J. Wessels was in town last week after paying a brief visit to the farm. While here Mrs. Wessels made a collection of fresh fruits, more particularly of cherries for the display at Portland.

The school house addition is now under cover and will be ready for occupancy by the time the youngsters are ready to enter it.

The cemetery association now have the posts on the ground for a new fence which will add much to the appearance of the cemetery.

Joe Frucht has placed an order for a quarter million brick to be used in construction work in Lewiston. Mr. Frucht is employing a force of 12 men at the yard and expects to turn over a million brick this season.

A. W. Gordon left here Saturday to fill a position in the First National Bank of Nez Perce. Mr. Gordon thus severs his connection with our town, and as soon as his property interests can be closed up his wife will join him in their new location.

The T. B. West brick has been completed and was immediately occupied by the Monogram saloon.

Barnum & Schwitzer finished the post office building July 31st and that evening Postmaster Hamley moved the fixtures from the old quarters to the new.

We had a fine editorial written for this week's issue, relative to the fire of last August, of which this issue is the anniversary, but lack of space prevented our printing it and we simply note this issue that a year ago today Kendrick was in ashes her citizens in sackcloth, while today she is dressed in brick buildings, 20 of which have been erected and her citizens are wearing—not silk but silkalene.

Vint Parkins and A. W. Longfellow have recently purchased the boiler and engines of the defunct Juliaetta Mill Co. and now have it installed at their mill site on the Potlatch. The boiler is a 90 H. P. one and the engine is 60 H. P. This power equipment gives Mr. Longfellow just what he needs, in the way of equipment for his saw mill.

An exodus of our citizens occurred here the past week, quite a number taking a vacation at one place or another.

Cutting and threshing are now in full blast. Every man and team capable of work are exerting themselves to the utmost and the golden crop is being rapidly harvested. Practically no grain has been hauled as yet and we do not look for it to commence before 10 days at least. The Gazette has been keeping pretty close tab on the yield as reported by the threshers and we believe our estimate of 30 bushels is about correct. The fall sown wheat was a very heavy yield which offsets the shortage in the spring grain caused by the intense heat.

Largest Mushroom Ever Discovered

Dr. Fred J. Brande, botanist of Washington, examining a 15-pound edible mushroom which he found in Rock Creek park. It is said to be the largest mushroom ever discovered and is given the botanical name polyporus giganteus.

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers

A force of men have been busy this week cleaning out the mill race for F. W. Dustin and son who are arranging to utilize it for power to operate the canning plant. The plan of installing a generator and motor is being considered in which the canners will be enabled to furnish its own lights as well as power. This equipment can be installed at no great expense, it is said, and will be the most convenient and satisfactory way of utilizing the water power from the mill ditch. The power obtained will be sufficient to operate the canners and supply a splendid lighting system for the plant at all times when needed.

—Juliaetta Record

Geo. M. Saad and E. F. Williams were at Spokane last week where they had an assay made of the mineral taken from the mine on Mr. Saad's place on Moscow mountain.

Much has been said as to this mine being the lost vein of an old prospect and several land marks bear out that this is the one. Mr. Williams and his associates are working the place for Mr. Saad on the 50-50 plan. The main ledge has been struck and it will only be a matter of a short time when big things will be doing at the mine.

The assay shows that the sands produce \$145.83 worth of gold and \$4.50 of platinum to the ton and the rock \$32.71 of gold to the ton.

—Troy News

Genesee must be pegged on the yeg-man's map as an "easy pickings town," judging from the frequent visits we are receiving from this class of gentry. Early last Sunday morning thieves entered by the front door of Herman's Hardware store, using a skeleton key, and rifled the safe and cash register, receiving for their work the sum of \$42.50. They then passed through to the furniture store and performed the same trick, getting \$20.50. The burglars then passed up the street and opened the back door of the Pollett Bros. store. This time they were disappointed as Jim Jackson uses the oven precaution, which we told something about in last week's issue. Nothing else in Pollett's or the other stores was disturbed, as far as the proprietors can determine.

—Genesee News

Mr. and Mrs. E. H. Dammarell and son, Howard, Mr. and Mrs. Wm. Rodgers and son, Wilson, returned last Friday evening from their trip to the coast. They were in Seattle during the merchants' convention and visited several other Coast points of interest. They had no car trouble except punctures and blowouts until they started up the hill in Kendrick, when they broke an axle not half a block from home.

Beans a Profitable Crop

H. M. Driscoll of Troy, manager of the Idaho Bean & Elevator company, with warehouses at Troy, Kendrick and Juliaetta, was in Moscow yesterday on business, and reports the bean crop on the ridges in the southeastern part of the county fully up to the average, if not above. The wheat crop is also fairly good. Southeast Latah county will enjoy a prosperous season, Mr. Driscoll states, with the bean crop selling at from four to four and one-half cents per pound.

Mr. Driscoll looks upon beans as one of the most profitable crops the farmer can grow, and states that in his opinion a bean crop can be produced as cheaply as a wheat crop. About the same procedure is necessary in preparing the ground for the seed, and the returns from the beans are, as a rule, considerably heavier than from the wheat. The bean crop, threshed with regular bean threshers, can be put on the market at about the same expense as wheat. In addition to this, the beans leave the ground in practically as good condition to grow the next year's wheat crop as though it had been summer-fallowed.

Mr. Driscoll states that he knows of a number of eighties near Troy which will produce 1,000 pounds of beans to the acre. At four and one-half cents per pound, the returns would be \$45 per acre.

This year's bean crop in Latah county is estimated by Mr. Driscoll at 100 carloads, with a money value of at least a quarter of a million dollars. He considers beans one of the important crops in the county, especially in the southern part. The average this year is about up to the average.

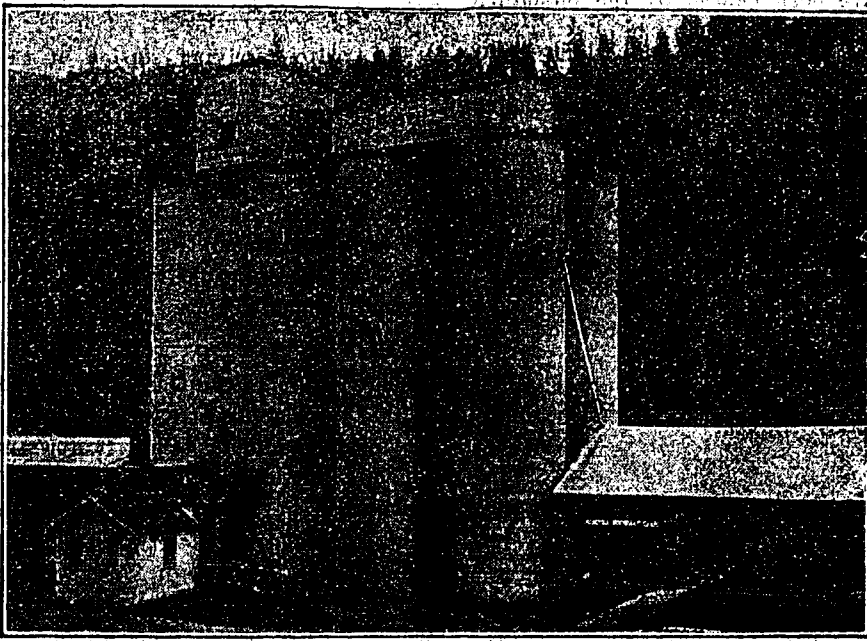

No Change to be Made

Owing to the fact that hot, dry weather has brought on an early harvest, which demands the whole attention of the farmers, it is understood that matters pertaining to the proposed elevator change will be held in abeyance for the present and that the elevator will be operated on the same basis as last year. John E. Waide, who is giving entire satisfaction as manager, will continue in that capacity. J. A. Harsh continues as trustee.

The report of last season's operations showed that the plant cleared over \$1,500. This was encouraging to the stockholders and was a welcome change after several years of poor business. There has not been a normal crop since the house was built, and last year's profits, in the face of a light crop, show that the plant can be made to more than pay its way. Stringent war regulations for a couple of seasons also prevented profits that could have been made under normal conditions.

Mr. Waide, who has entered his second year as manager of the house expects to move his family here from Kendrick this fall.

Mrs. S. E. Crow arrived from Lewiston the first of the week to visit at the home of Mrs. H. P. Hull.

Kendrick Rochdale Elevator

A Part of the Facilities that Kendrick Has to Offer for the Marketing of Potlatch Grain

A little less than 13 years ago, three months after the big fire, when the booster spirit of Kendrick and the surrounding country was rampant, the Kendrick Rochdale Company was incorporated. Fostered by a group of men whose vision was broad enough to see the possibilities of an organization such as the Rochdale plant represents, the company was organized with little opposition and has been one of the most successful business institutions in the Inland Empire ever since its foundation.

The Company has been backed by many of the most substantial farmers of the Potlatch country. Its destinies have been guided by a board of directors, selected from among the farmers who have made a success of their own business interests. That it has flourished from year to year has been fully demonstrated by the substantial improvements that have been made in the equipment of the company's warehouses and facilities for handling the vast amount of grain, hay and beans that is annually marketed through this local concern.

In 1916 the demand arose among the farmers of this section for an elevator, in order that grain might be handled in bulk. By the time grain hauling started that fall a splendid concrete elevator containing four large tubes, had been erected. The venture was so decidedly successful that the

following year four more tubes were added to the structure, giving it a capacity of 140,000 bushels. It is electrically operated and equipped with modern machinery throughout. One of the interesting features in connection with this elevator is that it is the first one built in Latah county and one of the first concrete elevators built in the Inland Empire, demonstrating the fact that the Potlatch always leads.

With the large warehouses and storage capacity of the elevator, the local Rochdale Company has been able to assist in a most efficient manner in the marketing of the grain, hay and beans of the Potlatch. The warehouses are equipped with modern bean cleaning machinery, which is an important item in the marketing of that product.

The executive officers of the Company at present are: K. D. Ingle, president; Claus Eichner, vice president; R. B. Parks, secretary; and Theo. Hanson, manager. Upon these men falls much of the burden of carrying on the business end of the institution. That they are equal to the task is evidenced by the flourishing condition of the finances of the Company, which were never better. This solid institution has pulled through the trying times during the war and after the war, with flying colors and is as ever in a position to look after the marketing interests of the farmers of the Potlatch.

Cows Make State Record

Eleven state records for Holstein cows have just recently been broken by animals kept at the University of Idaho, according to data compiled by Professor F. W. Atkeson of the dairy department of the college of agriculture. His report reads:

The University of Idaho cows have broken eleven state records for the Holstein breed in the past ten months. This seems a very creditable showing when we consider that the herd only contains forty-four females, with just eighteen of that number of milking age.

The latest cows to break state records are Idaho Lily Butter Girl DeKol, No. 338832, and her daughter Idaho Segis Lily, No. 420869. The official figures of the Holstein-Friesian association gives Idaho Butter Girl DeKol a credit of 1429.7 pounds of milk and 507.47 pounds of butterfat, equivalent to 633 pounds of butter in ten months time, beginning test at 5 years, 6 months and 18 days of age. She displaces Zeldenrust Kirby 2nd, No. 293053, the former leader in this class, owned by the Intermountain Institute, Weiser, Idaho, by a surplus of 4198.7 pounds of milk and 142.62 pounds of butterfat.

Idaho Lily Butter Girl DeKol was bred and developed on the university farm and made this record under very ordinary conditions. During her record she was never milked more than three times daily, was never kept in a box stall and was on a feeding experiment for six months during which time, she was fed according to the experiment and not according to her production. She has freshened again, presenting us with a heifer calf and has milked up to ninety pounds the first few days and is expected to go higher. She will be given an opportunity to prove her true capacity this year.

Idaho Segis Lily, No. 420869 is a daughter of the above cow, and has recently completed a record of 19366.2 pounds of milk and 608.59 pounds of butterfat, equivalent to 760 pounds of butter in one year, beginning test at 3 years, 1 month and 1 day of age. The former state record junior three year old, was Eva DeKol Maid Pietertje, No. 412173, owned by F. W. Hastings, Wendell, Idaho. The latter cow held the record with 15342.1 pounds of milk and 527.05 pounds of butterfat.

Not only did Idaho Segis Lily break the record by over 4000 pounds of milk but she did it with first calf as she freshened for the first time as a three-year-old. She was never milked four times a day and stood in the stanchion on the same feeding experiment as her mother. She is not an extremely large milker but very persistent as shown by the fact that her high day was 68.3 pounds of milk and she finished her last day of the year milking over fifty pounds. She is due to freshen in September and will certainly be given every opportunity to make as large a record as she is capable of making.

These two cows are an example of what a good sire can do as the daughter made 127 pounds more butter with first calf than did the mother as a mature cow. The sire of

SECURE TEACHERS FOR ALL ROOMS

List Appears Exceptionally Promising

Several changes have been made in the local teaching corps for the coming year. Owing to the large number of applicants from which to choose the selection was no easy matter. However, the Superintendent and School Board believe that they have now secured the strongest staff of teachers available for the salaries which they were able to pay.

Miss Clara Newkirk has been retained in the primary grades. She did some excellent work in those grades last year.

Owing to the death of Miss Viola McAllister, the 3rd and 4th grade room will be taught by Miss Clara Archbald. Last year Miss Archbald proved herself a very strong teacher in the overflow 2nd and 3rd grades, and as she has had much more experience in the 3rd and 4th grades we feel that we are fortunate in being able to make the change.

The 5th and 6th grades will be taught by Miss Grace Dawson. Miss Dawson has had 4 years of successful teaching experience, the last 2 being in the 5th and 6th grades of the Kamiah Public School.

Mrs. Katherine R. Kelly will have the 7th and 8th grades. Mrs. Kelly has had several years of successful teaching experience in Nez Perce County and is highly recommended by those who know her work.

The number of qualified applicants for high school positions was small. A new State law requires teachers of accredited high schools to have at least a bachelors degree. This law at present works quite a hardship on small schools as there are but few teachers in the state who hold the required degree.

The school was fortunate in securing Miss Cada Loree Whitney of Kent, Washington to teach Domestic Science and English. Miss Whitney is a graduate of the State College of Washington, having received her B. A. Degree in June.

Mr. A. O. Strauch will teach Manual Training, Mathematics, and Chemistry. Mr. Strauch is also a graduate of the State College of Washington, taking his degree from the department of Electrical Engineering. After graduation Mr. Strauch was for some time an assistant instructor in the Engineering Department. He has also been with the Washington Water Power Company for 13 years, in the capacity of both master mechanic and construction engineer. Mr. Strauch likes construction work and has turned to teaching only because construction work has been dull for the last two or three years. Last year Mr. Strauch was very successful as Manual Training instructor at Waterville, Washington.

STANTON BROS.

"Where the New Things Are Newest"

BOWEL TROUBLE IN POULTRY

One Good Way to Prevent Ailments Is Not to Feed Anything Solid for Seventy-Two Hours.

"To prevent white diarrhea and bowel trouble, chicks should not be fed any solid feeds for at least 72 hours after hatching," says Harry Embleton, head of the poultry department of Oklahoma A. and M. college. "During this period, however, they should receive sour, skim milk when taken from the incubator, and this should be kept before them all the time. In addition to the milk they should receive some fine sand which acts as a grit.

"When beginning to feed solid feeds, feeding should be little and often. A commercial chick feed scattered in a finely cut litter accompanied with some rolled oats or Johnny cake or a mixture of these feeds with hard-boiled eggs makes a very good feed for starting young chicks. Care should be taken not to over-feed them."

BIG COWS GIVE MOST PROFIT

Records Show That Large Animals Are Biggest Producers of Milk and Butterfat.

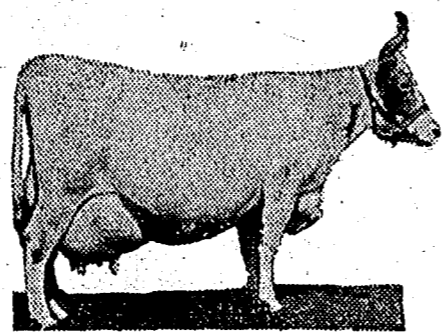

(Prepared by the United States Department of Agriculture.)

Figures collected from various cow-testing associations throughout the country and compiled by the United States Department of Agriculture tend to confirm the previous conclusions of the department that within the breeds, so far as they were represented by these animals, which were mostly grades, the large cows are the biggest producers of dairy products and are also the most profitable. The evidence seems to point to the fact that in the

individual farmer's herd it will be found that on the average the larger cows are more profitable than the smaller ones, although there are some indications that this may not hold true in the case of herds of native cattle containing much beef blood.

The cows whose records have been used by the department have been sorted out so that only mature animals were used for these comparisons, thus eliminating any differences that might have been caused by the immaturity of some cows.

In one group for which figures have been prepared there were 160 cows classified as small, 201 as medium, and 129 as large. The small cows averaged 248 pounds of butterfat a year, and made an income over the cost of feed of \$77.39. Those of medium size made 289 pounds of butterfat and an income over feed cost of \$83.91. The large cows produced 345 pounds of

A High Producing Cow—The Result of Good Breeding.

butterfat and a return above feed cost of \$105.74.

In another group there were 461 small cows, 483 classed as medium, and 326 large. Those in the first classification made 240 pounds of butterfat on an average and an income over cost of feed of \$89.11. The mediums made 278 pounds of butterfat and \$106.00 over feed cost. The large ones produced 299 pounds of butterfat and an income over feed cost of \$103.29.

These tables were based mostly on figures for the years 1916 to 1919. Inclusive, which accounts for the high average income over cost of feed.

Put your eggs in cold storage via the waterglass route.

Keep the baby chicks hungry at all times. Never feed too much.

Pinches of sodium fluorid in the feathers will rid a hen of lice.

Scatter air-slaked lime freely about the houses and yards; it will go a long way towards preventing disease.

Alfalfa meal and wheat bran are, perhaps, the most common "bases" for chick growing mash and they are hard to excel.

Alfalfa meal should be in all mash rations and it will pay to encourage the chicks or fowls to eat as much of it as possible. It makes for greater capacity.

Don't sell the hens because the price of eggs is low and prices for the hens high. Keep plenty of hens to lay eggs for home use and to sell next winter when prices are up.

Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

In the obituary of a Mississippi editor is the statement that he died out of debt. The Cimarron, Okla., News thinks possibly the make-up man got the obituary of the leading citizen and the editor mixed up and demands an investigation.

It is said that the only difference between a six cylinder automobile and a four cylinder, is all in favor of John D.

E. C. Gertje of Southwick has demonstrated year after year that it pays to raise clover seed. He raises the seed with little expense, has the clover straw for his stock and is improving the quality of his land instead of wearing it out. A few of his neighbors have followed in his footsteps and made money by the experience but it would seem that more acres of clover would swell the profits of the Potlatch.

If you drive a car, you'll be interested in this: When the government finishes up the roads it is helping build, the country will have a network of 180,000 miles of surfaced main highways, connecting Atlantic and Pacific coasts and our northern and southern borders. To travel over that much road, you'd have to drive your car 30 miles an hour, 24 hours a day, for 250 days. Road projects under way 1921 amounted to nearly 65,000 miles—about 11 times across the continent and back. During the year Uncle Sam and the states built 11,830 miles of federal-aid highways.

A western Kansas editor admits that ministers are called, but also claims that editors are called. Which leads to the observation that the difference lies in what they are called.

The radio receiving station at the New Kendrick last Saturday evening, tuned in to a voice in the ether that was loudly proclaiming the fitness of George Carlson as Kendrick's candidate for assessor of Latah county.

There was no politics mixed up in the affair as the radio is said to have no political affiliations.

The readers of the Gazette will find in this issue a list of Kendrick teachers for the ensuing year. It appears to be a particularly strong corps of teachers, as all have had successful experience and come very highly recommended. Three of last year's teachers will return, the rest of the teaching force being composed of new members. Everything seems to indicate a most successful school year in prospect.

Business was bad everywhere in 1921, but Fred P. Mann sold \$500,000 worth of Merchandise in Devils Lake, N. D., a town of 5,000 population. "Advertising built my business for me," he said; "and my aim today is to outdo in newspaper advertising the mail order houses which flood my district with circulars." There is always plenty of business for the man who goes after it.

POULTRY

INCREASING EGG PRODUCTION

Poultry Keepers Will Do Well to Keep
In Touch With What Leaders
Are Doing.

(Prepared by the United States Department
of Agriculture.)

The methods favored by large poultry-
men for increasing the productivity
of their flocks are often applicable on
the general farm or in the back-yard
poultry plant. Every poultry keeper
will, therefore, do well to keep in
touch with what the leaders are doing
to increase their profits, says the
United States Department of Agriculture.
Certain localities in California,
for instance, have become famous for
their poultry and egg production, and
the study that is given to these prob-

Obtaining High-Class Breeding Stock
Is Easier for the Small Poultryman
When Sales Are Held.

lems by farmers, and the owners of
big plants, has resulted in a great im-
provement in their practices.

The county extension organization
in Alameda county, California, has
taken steps through its poultry divi-
sion to raise the standard of all poultry
in the county by improving the
quality of fowls used in breeding
flocks. Owners of hatcheries in the
county have entered into an agree-
ment with the county extension or-
ganization to use eggs for incubation
from selected breeding stock, exclud-
ing the incubation of eggs from the
general run of fowls in the locality,
with the understanding that the county
extension organization shall fur-
nish judges to pass on the desirability
of birds selected for breeding.

This method of controlling the
quality of the poultry in a county is
expected to result in a rapid general
improvement in the productivity of
the flocks. It should also give the
county a good reputation wherever
hatching eggs or birds are sold.

Promising development that is being
encouraged in the famous Petaluma
poultry district is the consignment
sale of cockerels. In this the poultry
breeders have been following the lead
of other growers of high-class live
stock. Cattle breeders have been
holding bull sales for a number of
years; sheep breeders have ram sales;
hog breeders have sales of boars and
of bred sows. In the case of cockerels
no pedigree papers are supplied, as
they are with other kinds of purebred
live stock, but sworn affidavits as to
breeding go with each bird.

A White Leghorn cockerel sale was
held in Sonoma county (the Petaluma
district) October 15. The 14 Pacific
coast breeders who consigned birds
gave sworn statements as to their
breeding. According to the county
agent, who was instrumental in putting
on this sale, most of the 52
cockerels consigned represented un-
usually high breeding, many of them
having pedigrees extending back eight
or nine generations with trap-nest re-
cords. Most of them had inheritance
records of more than 275 eggs in a
year and some more than 300. The
fact that 1,000 catalogues were issued
shows the importance given to the
first sale of this kind.

These two methods of flock improve-
ment ought to be popular among poultry
raisers in all parts of the country.
They are practical, say the poultry-
men of the United States Department
of Agriculture, and they help to make
good stock available to the average
poultry raiser who in the past has had
no assurance, other than the breeder's
word, that he was getting birds of
superior performance merit. Few
dairymen, hog growers or beef-cattle
raisers are also good live-stock breed-
ers, but methods have been developed
that make it possible for any good
farmer to build up an excellent herd.
It should be just as easy for a poultry
raiser to improve his flock.

PREVENT SPREAD OF DISEASE

Roup and Other Contagious Ailments
Are Difficult to Control—Sep-
arate Sick Birds.

Cold, damp, poorly lighted and
ventilated poultry quarters favor the
spread of such diseases as roup.
Such contagious diseases as these are
difficult and sometimes impossible to
control unless given attention in the
early stages. Wherever preventive
measures fail, separate sick birds from
the flock as soon as there is evidence
of disease and then obtain expert ad-
vice to effect a cure.

**ROADS STAND BY
LOYAL EMPLOYEES**

Tell President Harding Old and
New Men Must Be Protect-
ed in Strike Settlement.

NOT A MATTER OF CHOICE

Faithful Employees Have Both Legal
and Moral Rights to Seniority
and Other Benefits.

New York. — The keynote of the
reply made by railway executives
representing more than 180 Class 1
railroads of the United States to the
proposition of President Harding that
"All strikers be returned to their work
and their former positions, with seniority
and other rights unimpaired," lies in
the last paragraph of their reply to the
president, as follows:

"It is submitted that the striking
former employees cannot be given
preference to employees at present
in the service without doing violence
to every principle of right and justice
involved in this matter and without the
grossest breach of faith on the part of
the railroads to the men at present in their
service.

"Under these circumstances, it
becomes apparent that the railroads
cannot consider any settlement of the
present strike which does not provide
protection in their present employment
both to the loyal employees who re-
mained in the service and to the new
employees entering it."

The executives had accepted the
first two conditions proposed by the
president, namely, that both employ-
ers and employees accept the deci-
sions of the labor board, and that all
law suits growing out of the strike
be withdrawn; and in relation to the
third condition state, not only as
above, but also as follows:

Agree With the President.

"The railroad executives and man-
agers agree entirely with the presi-
dent's statement in his letter that it
is wholly unthinkable that the rail-
road labor board can be made a use-
ful agency of the government in main-
taining industrial peace in the rail-
way service unless employers and
workers are both prompt and unques-
tioning in their acceptance of its
decisions.

"Many men in the service refused
to join the strike and in so doing
were assured of the seniority rights
accruing to them and of the perman-
ence of their positions. On some im-
portant lines 50 per cent or more re-
fused to join the strike. To these old
loyal employees have been added
thousands of new men who were em-
ployed and could be secured only up-
on a definite promise that their ser-
vices would be retained, regardless of
the settlement of the strike, with all
the rights appertaining to such em-
ployment, including that of seniority
under the working rules and regula-
tions previously approved by the rail-
road labor board.

"Just the Opposite Effect."

"We especially point out that a re-
fusal to the old men who remained
in the service and to the new men who
accepted service of the rights of sen-
iority incident to their employment
would have just the opposite effect
to that desired by the president, and
would most seriously discredit the
labor board.

"The board itself prescribed the
rules of seniority under which the
men referred to have secured their
seniority rights, and the rail-
road companies have neither the legal
nor moral right to deprive these men
of those rights. By public utterances
since the strike began the board has
recognized and emphasized these
rights, and to deny them now would,
instead of upholding the authority of
the labor board, overthrow its rules
and discredit its authority. The chair-
man of the labor board at the time
the strike was called made the fol-
lowing public statement:

"Upon one question the striking
employees should not be deceived.
Their leader has said that the
strikers are no longer employees
of the railways, and they have thus
automatically abandoned all the
rights they possess under their
agreements and under the decisions
of the board, including their sen-
iority. This is not the board's ac-
tion. It is their own. Many car-
riers are giving their former em-
ployees the opportunity to re-enter
the service within a limited time.
It must be understood now that
men who remained in the service
and those who are now entering it
will have rights of seniority that
the board could not ignore."

What the Proposed Plan Means.

"It must be understood that any
proposal that employees now on strike
shall be permitted to return to the
service without impairment to their
seniority, is merely another way of
suggesting that those men who took
employment in this crisis in good
faith, relying on the promises of the
railroads to protect them in their
positions, these promises being just-
ified by the authoritative utterances
of the labor board, and thus have
made possible the continued operation
of the railroads, shall now be sacri-
ficed in favor of men now on strike,
who not only brought about the crisis,
but, by their own action and declara-
tion, are no longer employees of the
railways, under the jurisdiction of the
United States Railroad Labor Board,
or subject to the application of the
transportation act.

"In addition to the necessity of up-
holding the labor board and maintain-
ing the pledges made by the railroads
to the men now at work, there is the
practical effect on the supervisory of-
ficers of a violation of the pledges
they were authorized to make. Their
discouragement and demoralization
would be far more disastrous than this
or any other strike."

MEN WANTED

The Northern Pacific Railway Company will employ men at rates prescribed by
the U. S. Railway Labor Board as follows:

- Machinists 70c per hour
- Boilermakers 70c to 70½c per hour
- Blacksmiths 70c per hour
- Electricians 70c per hour
- Sheet metal workers 70c per hour
- Freight car men 63c per hour
- Stationary engineers Various rates
- Stationary firemen Various rates
- Passenger car men 70c per hour
- Helpers, all classes 47c per hour

Mechanics and helpers are allowed time and one-half for time worked in excess of
eight hours per day.

Young men who desire to learn these trades will be employed and given an
opportunity to do so.

A strike now exists on the Northern Pacific Railroad.

Apply to any roundhouse or shop or superintendent

**Northern Pacific Railway,
Spokane, Wash.**

RATION MUST BE ATTRACTIVE

Dairy Cow to Do Well Requires Feed
Containing Proper Elements
for Milk Flow.

Cows won't do well on food that
isn't palatable, say the feeding men
at the New York College of Agricul-
ture at Ithaca. Not only must the
dairy cow's ration contain the proper
elements if she is to be "worth her
keep," but it must be so attractive to
her that she will eat plenty and keep
up a good flow of milk.

On the other hand, say the dairy-
men, it isn't wise to change a ration
suddenly even to make it better. A
cow is a delicate milk-producing ma-
chine, and sudden changes in her food
are quite likely to upset some part of
the machinery, with a resulting loss of
milk.

The condition of the food probably
has most to do with its palatability;
moldy grains or roughage don't appeal
to any self-respecting cow.

One Dollar Saved Represents
Ten Dollars Earned.

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seed for the garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—AD.

RADIO IN TELEPATHY

Hereward Carrington, Ph. D., in his laboratory in New York with his radio apparatus, making the first actual attempt to get at the mechanical end of mental telepathy. He has adapted the radiophone to the detection of the dynamic action of thought waves. Superinduced by a high tension coil, the thought waves are caught by a radio detector and transmitted to the phones. The subject's head is placed in a "directional aerial" as shown in the photograph.

British Army "Swagger."

It has been said that the English army authorities once issued an order that officers should not wear eyeglasses or spectacles, these being considered evidence of defective sight. A number of army officers then took to wearing the monocle, disobeying the army order by a safe margin and giving to themselves, as it was thought at the time, an air of distinction, the thought being something like that which prompted so many officers and enlisted men to carry a short cane which came to be called a "swagger stick."

POULTRY

FATTENING MARKET POULTRY

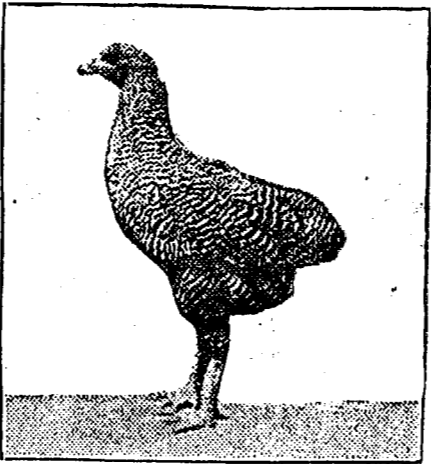

Great Variety of Feeds Can Be Used in Preparing Fowls—Broilers Grow Rapidly.

(Prepared by the United States Department of Agriculture.)

The most desirable types of rations and the most profitable feeding periods for the different classes of poultry fattened in packing plants are discussed in Department Bulletin 1052, Rations for Feeding Poultry in the Packing House, just issued by the bureau of chemistry of the United States Department of Agriculture. Since the fleshing of poultry has become a large industry in the United States, information of the kind contained in this bulletin should be of a great deal of value.

The results obtained in the experiments reported in this bulletin show that a great variety of feeds can be used in fattening broilers, springs, roasters and hens, a fortunate situation since it permits the feeder to adapt his ration to market conditions by taking advantage of special prices of certain feeds and also to use feeds available locally. A growing bird, such as a broiler or spring, requires a different ration than a mature hen, which changes most of her feed into fat. A simple ration of corn meal and buttermilk is about as good as any for hens. Broilers fed rations containing protein concentrates, such as peanut meal, coconut oil, soy-bean meal, or meat scrap made appreciably better gains than those fed on corn meal and buttermilk. They grow rapidly and need tissue-forming feeds. Springs also respond readily to rations containing protein concentrates.

Throughout the 14-day feeding period broilers continued to gain well, which shows that this is not too long a feeding period. Springs grew very rapidly during the first 11 days, but not so rapidly, though profitably, during the remaining three days. Roasters gained well during the first two four-day periods, but not so well the last six days. It was found that the practice of feeding hens only six to eight days is well founded. The dressing and chilling shrinkage of hens, however, was much less than in the case of broilers, springs and roasters. Any of the ordinary cereal grains

Young Plymouth Rock Broiler.

supply the necessary carbohydrates and fats. More care is needed in selecting feeds for protein, salts and vitamins. The proteins of the cereal grains are present in too small amounts and are of too poor quality to produce the best results in broilers and springs unless other protein concentrates are added. Milk and cereals make one of the most profitable rations, as milk supplies mineral substances, vitamins and very valuable proteins. The results given in the bulletin show that peanut meal protein, as well as soy-bean meal protein, is especially valuable. The proteins of buttermilk are especially valuable, and if used in sufficiently large amounts produce very desirable results. Other protein concentrates are meat and fish scraps, cottonseed meal, coconut meal and sesame-seed meal.

Corn, wheat, oats and other grains lack such mineral substances as calcium, sodium and chlorine which growing animals require. In the rations where buttermilk or skim milk is used, these ingredients are fairly well supplied. Milk also supplies vitamins. At present the milk available for poultry-fleshing purposes is largely buttermilk, fresh, condensed or powdered.

Those interested in the fleshing of poultry may get this bulletin by addressing the Department of Agriculture at Washington, D. C.

POULTRY NOTES

Hatch chicks early. They make the good winter layers.

Baby chicks should be encouraged to eat as much bulk as possible.

One of the best animal foods, both to induce egg production and promote growth, is cut fresh bone.

Cold, damp land is no place for poultry; that which dries soonest after a rain is the best land on which to raise fowls.

Wheat bran is especially valuable for feathering out the baby chicks, and, properly used, it will grow feathers faster than anything else. It is advisable to keep it in the dry form before the chicks all time.

OPPORTUNITIES FOR KEEPING HONEY BEE

Nectar Going to Waste in Tulip-Tree Regions.

No Question but That Area May Furnish Many Times More Product Than at Present—Bulletin Discusses Methods.

(Prepared by the United States Department of Agriculture.)

With the tons and tons of nectar going to waste every year in the tulip-tree region of the United States because the colonies of bees are not strong enough to get the full amount of surplus, there is no question that this area may furnish many times more honey than it does at present. This opinion is expressed by the United States Department of Agriculture in Farmers' Bulletin 1222, "Beekeeping in the Tulip-Tree Region," prepared by E. F. Phillips and George S. Demuth, and now available for distribution.

The tulip tree is occasionally found as far north as Vermont and Rhode Island, and west to Michigan, Arkansas and Louisiana. On the outer limits of its distribution it is not abundant. It is more plentiful on the south shore of Lake Erie and rare west of the Mississippi river, except in northeastern Arkansas and southeastern Missouri. The trees are more abundant and larger in the southern part of its range, especially in Tennessee, Kentucky, the western part of the Carolinas, and in the Ohio river basin. It is common throughout the Piedmont plateau of Maryland and Virginia.

That this honey can be marketed at a profit is attested by the fact that this section now sends to outside re-

Modern Homes for Bees.

gions for part of its honey supply. There is not the local prejudice to dark honey which exists in the clover region and in the West. All these factors taken together make the region one of promise. The enormous number of colonies of bees in this region is pointed to as proof of the great nectar resources, and if these colonies are given proper care vast quantities of honey can be produced.

The abandonment of the "gums" and box-hives and the adoption of modern equipment, together with practices more suited to the region, is advised. The region, it is said, needs more men engaged in beekeeping on a commercial scale as a chief or only occupation. The peculiarities of the region, however, are such as to demand a close study of the business. Careless beekeeping, it is pointed out, is entirely unprofitable, especially in places where the main honey flow comes so soon after the last killing frost of the spring.

Copies of the bulletin, which discusses methods for carrying on the business successfully, may be had free by writing to the Department of Agriculture, Washington, D. C.

LAYING HENS IN FARM FLOCK

Most Efficient Number is Between 150 and 500, Say Ohio Poultry Experts.

At least 150 laying hens should constitute the farm flock, say poultry experts at the Ohio experiment station. The most efficient flock is between 150 and 500. The flock containing fewer than 150 hens is not efficient, while flocks of more than 500, though perhaps too large for the general farmer, may be better adapted to those specializing fruit and poultry farms.

PROPER FERTILIZER TO BUY

Most Economical Material is That Containing Highest Percentage of Plant Food.

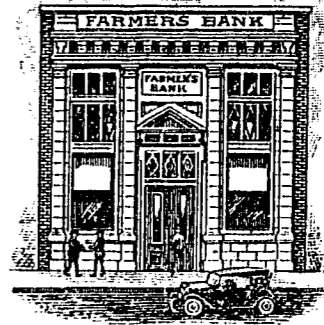

The most economical fertilizer to buy is the one containing the highest percentage of the plant food needed. It will cost more per ton, but may be used at a lower rate per acre because it does not contain so much useless material.

CARING FOR TOMATO PLANTS

Four or Five-Foot Stake Should Be Driven Alongside Each Vine When Soil is Soft.

Secure a four or five foot stake for each tomato plant and be ready so the stakes can be driven down by each plant when the ground is soft. If the tomatoes are to be trellised similar to grapes, secure posts and two wires for each row.

FAVOR SWEET-CREAM BUTTER

Product in Storage for Year at Norfolk, Va., Scores Higher Than That on New York Market.

After remaining in storage for one year, samples of sweet-cream butter recently inspected at Norfolk, Va., scored higher than the highest score for butter quoted on the New York market. These samples, which received scores averaging 93.47, were representative of 1,000,000 pounds of butter packed for the United States navy under the supervision of the United States Department of Agriculture. The scoring was done by a specialist from the dairy division and a representative of a commercial butter firm in New York city.

"This butter, which was made for the navy last year," said the inspectors, "was of such fine quality that we cannot neglect the opportunity to comment upon the comparatively small amount of extra work required to produce a product of this quality as compared with the average butter found on the large markets."

This butter was made from a perfectly sweet cream, with a comparatively high salt content and low moisture. The moisture content did not exceed 13.5 per cent. After one year in storage only one sample scored as low as 92.4. Of the other 50 samples, 24 scored 94, two scored 93.4

and 24 scored 93.

Consumers who are accustomed to a pronounced flavor in butter do not at first show favor to sweet-cream butter as it is somewhat lacking in this respect when fresh. A demand for sweet-cream butter, however, is growing steadily, according to butter dealers handling this product. On being held in storage the flavor becomes more pronounced, and for this reason sweet-cream butter is often scored higher after storage than when fresh. For storage purposes such a butter is far superior to the ordinary butter, which usually loses in quality during the storage period.

High-Priced Sire.

Any sire is high priced that will not pass on to his offspring the characters which go to make them desirable from the market standpoint.

NOTICE TO CONTRACTORS

Sealed proposals will be received at the office of the Village Clerk, Kendrick, Idaho, up to 8 o'clock, p. m., of the 15th day of August, 1922, for grading, macadamizing, construction of concrete gutter, storm sewer and other incidentals. The principal estimated quantities are as follows:
Common Excavation 11,200 cu. yds.
Solid rock Excavation 400 cu. yds.
Overhaul 22,000 cu. yds.
Macadam Surface-6in. 32,295 sq. yds.
Macadam Surface 8in. 4,900 sq. yds.
Concrete Gutter 2,460 lin. ft.
Concrete Cross walk 550 sq. yds.
Sewer pipe 6 in. 600 lin. ft.
Drain Tile 2 in. 900 lin. ft.
Corrugated Metal
Pipe 12 in. 100 lin. ft.
Corrugated Metal
Pipe 24 in. 50 lin. ft.

The work is to be done in accordance with the plans and specifications on file in the office of the Village Clerk and in the office of the Engineers, Van Arsdol & Oehler, Lewiston, Idaho.
Bids must be made on blank forms which may be had upon application to either the Village Clerk or the Engineers, and must be accompanied by a certified or cashiers check in the amount of five (5) per cent of the amount of the bid, payable to the Village Treasurer of Kendrick.
The right to reject any or all bids is reserved, as is also the right to award a contract for all or any portion of the work.
R. B. Knepper, Village Clerk.
Dated July 28, 1922. 30-3t

A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," write Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or trouble with indigestion, give them a trial. They will do you good.—AD.

Tested Cattle for T. B.

Dr. W. R. Kidwell, deputy state veterinarian, has just submitted a report on testing of cattle in Latah county during July for tuberculosis. A total of 1092 head of cattle were tested in two weeks. Of these 1084 passed; two were suspicious, and six were found to be tubercular and condemned. The communities in which cattle were tested and the number tested in each community are as follows—

Driscoll Ridge 186, Burnt Ridge 94, American Ridge 223, Fix Ridge 168, Big Bear Ridge 84, Juliaetta 85, Troy 28, Kendrick 51, Deary 70 and Moscow 142. Owners of cows in Kendrick, Juliaetta and Troy took their cows to a central place in their respective towns and had them tested when the cattle of the surrounding community were tested.

The testing was done by Dr. Kidwell and Dr. B. L. Taylor, under the direction of Dr. J. D. Adams, Director of the State Bureau of Animal Industry. Dr. Taylor is in charge of the herds of the University of Idaho and gives instruction in veterinary work to Animal Husbandry students, but was loaned to the State Bureau of Animal Industry for two weeks by Dean E. J. Iddings.

The testing done in Latah County was in cooperation with County Agent O. S. Fletcher and the Latah County Farm Bureau. Testing of cattle for tuberculosis was adopted as part of the farm bureau work in the various communities at their meetings last winter, at which work for the season was planned. At the time the testing was done, the livestock committee in the various communities made necessary arrangements in their communities and saw to it that all who desired to have their cattle tested had them in the barn or corral where they could be reached with the least loss of time.

Practically all other communities of the county desire to have their cattle tested, but Dr. Adams could not furnish men at this time long enough to complete the work. More testing will be done in Latah county at a later date. It is the plan of Dr. Adams to test all the cattle in the county as soon as possible.

Leland Items

Mr. B. Goudzward, accompanied by his two sons, Donald and Herbert, drove to Spokane last week to attend the merchants' convention. They report having had a fine time.

The hum of the threshing machines can be heard in every direction these days, but it will not last long, as crops are short and machines numerous.

Tuesday night there was quite an electric storm, but not a drop of rain fell here.

This scribe and family visited Mr. and Mrs. A. H. Smith Sunday afternoon and as luck would have it, happened in when they had a big freezer of ice cream frozen, which was mighty fine.

Mr. and Mrs. R. Winegardner returned home Thursday from a two months' visit in Missouri and Kansas.

Mrs. McVicker and girls are visiting in the Fairview neighborhood this week.

Donald Goudzward is now the possessor of a brand new saxophone.

The Missionary ladies will give a pie and ice cream social at the I. O. O. F. hall Saturday evening, Aug. 19. Every young lady is supposed to bring a pie and the young gentlemen (or old either) are invited to come and buy them.

Agatha News

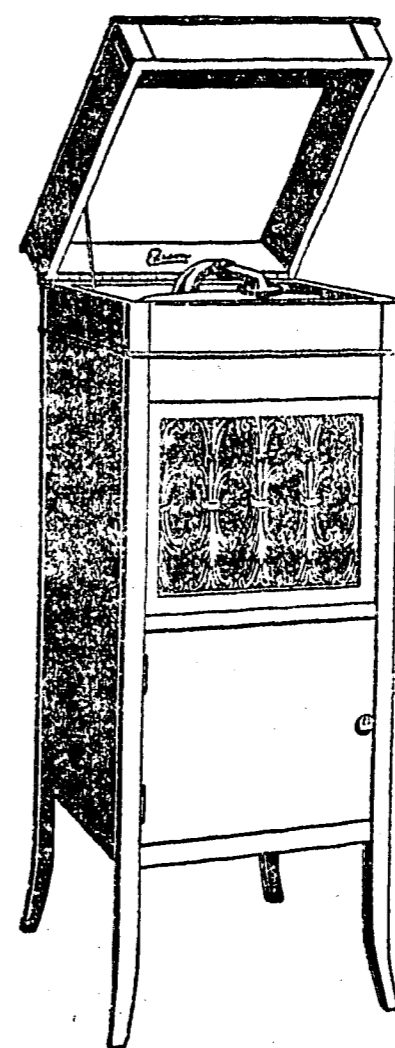

Mrs. R. J. Hoskin spent Wednesday and Thursday of last week in Leland with her daughter, Mrs. Marvin Vincent.

Mr. and Mrs. Hank Aldrich left for Spokane on Saturday of last week.

Mr. R. S. Hoskin started his threshing machine Thursday of last week.

Mr. and Mrs. Pat Smith, from Lenore, made a trip to Cavendish, Sunday.

Married Men Trustworthy.
Statistics indicate that married men are more trustworthy than single men in the ratio of 6 to 1, probably because of their increased sense of responsibility.

Why Suffer from Rheumatism?

Do you know that nine out of every ten cases of rheumatism are simply rheumatism of the muscles or chronic rheumatism, neither of which require any internal treatment? The pain may be relieved by applying Chamberlain's Liniment, which makes sleep and rest possible, and that certainly means a great deal to any one afflicted with rheumatism.—Adv.

Have Improved the World.
Every heart that has beat strong and cheerfully has left a hopeful impulse behind it in the world and bettered the tradition of mankind.—Stevenson.

GLEANINGS

Last Friday was the 18th anniversary of the Kendrick fire. It was a hot day here but not as hot as it was 18 years ago.

G. G. Oldfield of the New Kendrick is showing some of the best features that can be secured. The show "Way Down East," to be given tonight and tomorrow night, is a top-notch and one of the best in the moving picture world.

Raymond Kaiser of Spokane returned home Sunday after visiting two weeks with his mother, Mrs. A. C. Deeter. Mr. and Mrs. Deeter and Mr. Kaiser drove to Grangeville for a visit of several days, returning home last week.

Returns from some of the threshing machines in this locality show a wide variation in yields. Some fields only threshed out 7 bushels to the acre while others made 40 bushels. The general average for the country is being placed at about 20 bushels.

S. P. Callison bought a trout rod this week that cost him \$25.00. It is a split bamboo and weighs only 1-2 ounces. The supposition is that he is going to use it for catching gold fish.

M. O. Raby has been busy this week hauling dirt over the rocks on a short stretch of road east of town, to make it passable for wheat haulers. The fill being put in by Axel Swanson is not finished, so it was necessary to put the detour in shape for travel.

Prof. Daniel, O. E. MacPherson, John Dammarell, Lester and Charles Crocker left last Saturday afternoon for the Bungalow, which is located beyond Pierce City. They expect to spend a week or more exploring the fishing streams of that locality.

Archie May of Leland says he has lived in the Potlatch country for over 40 years and he believes the crop average this year is the lightest he has ever seen. And yet he thinks we ought to be satisfied as it will be a good, big half a crop, at that.

Claus Eichner lost his barn by fire Thursday morning of last week. It is thought that the fire was caused by spontaneous combustion.

S. P. Callison says this is the hottest, driest summer he has ever spent in the Potlatch during his 35 years residence here. It's certainly an off year, but might be many times worse.

The first load of ripe watermelons from Juliaetta were put on the market here the first of the week. They were of very fine quality.

Mahe Segis Lily was King Steg's Matador Walker, No. 172052, who has six or seven daughters in the university herd on test with second calves that will average close to 900 pounds of butter.

Deobald Bros., of the Kendrick Garage Co., made delivery of a new Ford car this week to Charles Jessup, of Juliaetta, and a new Overland light four to Gus Kruger, of Potlatch ridge.

Mrs. W. M. McCrea went to Spokane, Wednesday, for a brief visit.

Luther May, of Spokane, arrived Wednesday evening to transact business in Kendrick.

Mrs. L. A. Daniel and children went to Pullman, Thursday, to visit relatives.

Mr. and Mrs. Clem Israel and family, of Crescent, left for Flora, Ills., Thursday afternoon, where they were called by the illness of Mr. Israel's father. They may remain there for several months.

Mr. and Mrs. Owens, of Pasadena, Cal., arrived the first of the week to visit at the home of Mr. and Mrs. James Emmett. Mrs. Owens is Mr. Emmett's sister. They drove from California here in their car and had highway all the way until they were within a short distance of Kendrick.

A number of ex-service men expect to leave soon for the Colville reservation to take a chance on securing a homestead. The south half of the reservation will be thrown open soon, and the ex-service men have first choice.

Holbrook and Emmett will ship a mixed car of hogs and cattle to Portland, tomorrow. The hogs are some that they have fed out in their own pens here.

Mr. and Mrs. L. J. Herres and family returned Tuesday evening from their vacation trip to the mountains. They drove as far as the Bungalow in their car, having joined the James Kayler family at Peck. From the Bungalow they

look pack horses and went back 20 miles on the trail to Kelly Creek. They enjoyed splendid fishing there and also caught some large trout in the North Fork of the Clearwater.

Mrs. A. V. Dunkle and children and Dorothy Erickson went to Spokane, Tuesday, to spend the week.

Miss Bernadine Plummer arrived the first of the week from Spokane to visit her mother. She has had a position with the Western Union office at Spokane for the past three years.

Mrs. Leola King and daughters returned home Tuesday, after visiting several weeks with the Leith family. Mrs. King will teach in the Moscow schools during the ensuing school year.

A. Wilmot and son, Billy, left Wednesday for an extended visit in Portland, Seattle and other coast points.

Miss Evelyn Hanson returned, Wednesday, from a visit with friends in Lewiston.

J. J. Pickerd, of Troy, rented the room back of the local postoffice and has installed a stock of caskets and undertaking supplies.

M. Y. Eatman, of Texas Ridge, who is farming one of Dr. Moser's places, says this week that he had the best crop of beans this year that he has ever had since the "big crop" about four years ago. He says the cool nights on Texas ridge were a great benefit to the bean crop.

Mrs. Archie May, of Leland, underwent an operation last week at the home of Dr. Kelly. Dr. Bradlock, of Lewiston, performed the operation and was assisted by Dr. Kelly. Mrs. May is reported to be getting along very well.

Texas Ridge

Mr. and Mrs. Frantzick and son Gordon and Ernest Randall were Sunday guests at the Albert Pierce home.

Mr. and Mrs. Ed. Ogden and daughter, Hettie, were callers at James Miller's Sunday afternoon.

Mr. and Mrs. Len Bailey, of California, arrived here Sunday for an extended visit with relatives. The trip was made by auto.

Lige Baker and wife, Carl Drury and family were Sunday guests at the James Pierce home.

Horace Comstock and family, of Bear ridge, visited at the Babcock home, Monday.

Mr. and Mrs. Alfred Naumann and Mrs. Chas. Weber visited at the Blenden home on Bear Ridge, Sunday.

Mrs. E. C. Babcock returned home from Juliaetta, Sunday, where she had spent the week end. She was accompanied home by her parents, Mr. and Mrs. Ross and son, Reginald White.

Orville Miller and wife have returned to the ridge, after spending a few weeks in Lewiston.

Chas. Dahlgren and family were Sunday dinner guests at the Chris Beyers home.

Erwin Baker has departed for St. Joe to work.

Harvest is most over and the threshing machines are humming.

Fairview Items

Mrs. McVicker and daughters, of Leland, are visiting at the McCall and Flesman homes this week.

Miss Melva Walker, of Kooskia, is visiting her sister, Mrs. Roy Morgan.

Mr. Rowley is reported on the sick list this week.

Virgil Flesman and family were guests Sunday at the Frank Flesman home at Leland.

Madaline and Margaret Shultz of Cameron, are visiting their grandparents, Mr. and Mrs. Herman Wolf.

James Helton and wife and Mrs. McCall were callers at the Wolf home Sunday evening.

Helen Whitted, of Fix Ridge, is visiting at the Jesse Walker home.

Edna Flesman spent several days last week visiting friends at Leland.

Mrs. Karmode had the misfortune to fall and severely hurt her arm, but is much improved at this writing.

Otto Byers, of Texas Ridge, is spending several days at the Frank Wilkin home.

Mr. Woodward, who has been quite sick for the past two weeks, is much better and was able to start his threshing machine Monday.

Big Bear Ridge

John Heath, of Texas Ridge, spent the first of the week here.

Mr. and Mrs. H. Dalberg and children of near Deary, were Sunday visitors at the Halvor Ljen home.

Misses Agnes, Hattie and Nellie Larson returned to their home at Grand Forks, N. D. last week, having visited their grandfather, A. J. Aas and their aunt, Mrs. Ed. Lien.

A large number of young people from here attended the ice cream social given by the Bear-Creek Union Sunday School Saturday evening.

A. Hooker and daughter, Miss Johanna, were Sunday visitors at the R. W. Bigham home on American Ridge.

Frank Whitcomb is building a new barn.

Mr. and Mrs. Nels Nelson and children, of Little Bear Ridge, spent Saturday at the Anton Nelson home.

Miss Bessie May returned to Little Bear Ridge, Monday, having spent the week end with home folks.

W. A. Pearson, of Pomeroy, was visiting his daughter, Mrs. A. N. Rogstad, last week.

Mrs. Carl Drury gives music lessons at the hall Thursday of each week. The following pupils are enrolled in the class: Joseph Forest, Robert Reid, Elsie Morey, Ida Morey, Wilma Fairfield, Alecie Ingle, Johanna Hooker, Helen Slind, Esther Whybark, Allie and Claribel Moore, Vina Hecht, Neva Ware.

School Starts Sept. 11

According to an announcement made by the secretary of the local school board, the Kendrick schools will open Monday, September 11. A full corps of teachers has been engaged.

Let Us Fill Your Family Recipes

If you have some recipes which you consider valuable, bring them to us to be filled.

Such recipes receive the same careful attention at our shop as a physicians' prescription.

The fresh, pure drugs which we use will make such remedies more effective. Right prices are also assured as we use a fair and accurate method in arriving at the charge in each particular case.
