

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers.

Troy News: The clinic held at Dr. Nelson's office Monday, brought out twelve patients, who were operated upon for removal of tonsils and adenoids. Eleven of the patients were school children. There were several others examined but who did not appear for the operation. All the patients operated upon are getting along nicely. It enough children can be secured, another clinic will be held sometime before school commences.

Juliaetta Record: The John Stevens threshing outfit and the Hoisington and Stephas machine have been busy the last week threshing on the lower end of Potlatch ridge. On the Wm. Zumhofs place a 20-acre tract of Red Russian threshed out 415 sacks. On the Hoisington and Heimgartner places the yield will be about an average, so far as we are able to learn. There is some good barley on the Al Heimgartner place and some fine oats on the Wm. Zumhofs ranch. It is expected that all the machines on the ridge will be humming this week and all the grain will be threshed in a couple of weeks, if the weather conditions continue good. The Jones machine started on the Al Whitted place last week, Columbus Clark and the Richardson boys' machine will start this week as will also other outfits.

Genesee News: While only a small portion of the threshing has been done in this section, enough has been threshed to give an idea of the yield that may be expected from at least a part of the fall sown grain.

Edgar Evans last week finished threshing his wheat and reports a satisfactory average. He had 35 acres of summerfallow which was sown September 1 to Red Russian, which yielded an average of 43 bushels per acre. He also had 50 acres of summerfallow that was sown just a month later that averaged about 30 bushels, and 15 acres of corn ground that averaged but 22 bushels, but on the whole the average was far above that in most sections.

Roy Evans' crop averaged between 25 and 30 bushels to the acre.

Wm. Ingle also finished threshing the latter part of last week, just before the rain put a crimp in things. He reports that he had 80 acres of Red Russian that averaged 25 bushels, and that his fall barley yielded 45 bushels per acre.

From several other districts word comes that the average yield is around 20 to 22 bushels per acre.

Star-Mirror: The sheriff's office Monday reported a raid on a still about two miles southwest of Potlatch, Saturday night. Two barrels of mash and all necessary apparatus for the making of liquor were found but the makers had fled.

The mash was destroyed and the still brought to Moscow. It is believed the men responsible for the still had received word of the raid and had fled. The raid was made in a thickly wooded area and the approach of the officers was probably detected.

The raid came as a result of certain tips that moonshiners were operating in that section of the country. The escape of the men wanted is believed due to the inaccessibility of the region that made search difficult.

Expense accounts for the candidates in the primary election in Latah county have been filed. The republican candidates spent \$459.3 and the democrats \$91.50. There being no contests for office among the democrats, their expenses were naturally lighter.

Bakery Installs Sealer

L. E. Pearson, proprietor of the Electric Bakery, last week installed an electric sealing machine for wrapping bread. It is not a very complicated piece of machinery, but is efficient and does away with the old method of sealing with tape. The bread will also keep longer as each loaf is sealed practically airtight. Mr. Pearson's bread is now electric made, mixed, baked and sealed.

LOWER TUITION FOR OUTSIDE DISTRICTS

Cost per Pupil Will be Less Than Last Year

The cost of maintaining the local school last year was \$12,033.14. This was just \$204.86 more than it cost the previous year even though an additional teacher had been employed for the grades. The cost of the high school last year was about \$3.50 per student per month less than for the previous year, or in other words of the \$12,033.14 spent for the school \$5,673.11 was for the high school. This makes an average cost per student of \$120.57 per year or \$13.40 per month. The previous year the cost was about \$16.70 per student per month.

This week Mr. E. E. Bechtel is making some changes in the school building that will add another room to care for the needs of the Commercial students. The new room is being prepared in particular for typewriting, bookkeeping and drawing. This addition will not only make it much more convenient for the classes thus served but will also greatly relieve the congestion in the domestic science room occasioned by the necessity of having the typewriting in that room. The science laboratory will also be relieved of its supply of drawing tables.

Last week Wilson Rogers assisted Mr. Daniel in procuring a supply of fine white sand for the sand tables of the lower grade rooms. The new sand was brought up from the "bar" two miles below Arrow Junction, and will replace the dirty gray sand that has been used in the sand tables.

Big Bear Ridge

The Girls' Sewing Club will hold their annual Fancy Work Sale at the Community hall, Saturday evening, September 2. Ice cream and cake will be served, after which a social good time will be enjoyed by all. You are cordially invited. Come and bring your friends.

Mrs. Ida Comstock came home from St. Maries, Thursday, where she spent the past year. Her granddaughter, Miss Ruth Babcock, accompanied her for a visit.

Miss Bertha Kleth came home from Pasco, Wash., to spend her vacation with her parents, Mr. and Mrs. A. Kleth.

T. H. Rognstad returned to Clarkston, Sunday, having spent several days at the home of his son, Arthur.

Oscar Slind was a Lewiston visitor last week.

Mrs. Ole Lien returned home Tuesday from Spokane, where she has spent the past three months. She is recovering nicely from her recent operation.

Otto and Fred Gladden, Fred and Rhinehart Hecht, Powell McGraw and Clarence Morey motored to Spokane last week to register on the Colville Reservation, opened for ex-service men.

Mr. and Mrs. Einar Bruseth and son of Spokane, are visiting at the Ole Lien home.

Union Sunday school, Sunday, August 27th, at 10:30 a. m. Preaching services by Rev. G. A. Morton of Kendrick, at 11:00 a. m. Everyone cordially invited.

Reports from the surrounding country are to the effect that the local apple crop is larger than for several years and the quality is better. Locally grown apples ought to bring a good price here if they are carefully graded and all wormy ones culled out.

POLITICAL PARTIES PICK CANDIDATES

Republicans and Democrats Ready for Fray

At the republican convention, held at Wallace this week, the following candidates were nominated: Congressman, first district—Burton L. French, Moscow. Congressman, second district, Addison T. Smith, Twin Falls. Justice of the supreme court, William E. Lee, Moscow. Governor, C. C. Moore, St. Anthony. Lieutenant-governor, H. C. Baldrige, Parma. Secretary of state, Fletcher A. Jeter, Coeur d'Alene. Treasurer, D. F. Banks, Caldwell. Auditor, E. H. Gallet, Pocatello. Attorney-general, Albert H. Conner, Sandpoint. Mine Inspector, Stewart Campbell, Hailey. Superintendent of public instruction, Miss Margaret Sweet, Grangeville.

Moses Alexander of Boise, former governor, was nominated by acclamation at the democratic convention, Tuesday. George W. Waters of Weiser and William P. Whitaker of Pocatello were chosen as nominees for congress from the first and second districts respectively.

Lieutenant-governor, Elmer O. Thompson, Twin Falls.

Attorney-general, Lester Harrison of Kellogg.

Auditor, Howard Snell of Nampa.

Mine Inspector, William Snow of Custer county.

State Treasurer, J. H. Tyler of Gem county.

State Superintendent, Miss Retta Martin, Lewis county.

Justice of Supreme Court, John C. Rice.

FRATERNAL ORDERS ASSIST WITH FAIR

Making Preparations for Big Event Sept. 12

The management of the Lewiston-Clarkston Tri-State Fair and Round-up has been most active in its efforts to secure the co-operation and assistance of the various civic and fraternal organizations in staging this year's program and announcement is now made that the Knights of Pythias and the Dokies will have charge of the formal opening of the big exposition on September 12. The Lewiston lodges have sent out hundreds of invitations to their fraternal brothers, asking them to visit Lewiston on this auspicious day and participate in the many festivities to be provided. It will be a great day for the Knights and the Dokies and the many stunts to be provided by these lodgemen will add much to the big program already secured by the fair management.

The making of the fair program is now complete, according to an announcement by Charles E. Parker, who will have charge of the race events. Mr. Parker states there will be more and better horses in the Lewiston stables this year than for many seasons and it is the purpose of the fair management to feature the race and arena events as the entertainment and amusement program. In addition to these features, a large number of special entertainers have been contracted so that the Lewiston fair program this year will be little short of a three-ring circus. The arena is being constructed so that there will be no interference between the arena and the track and between the two will be staged the platform offerings.

The A. K. Carlson family left Thursday morning for Nez Perce to make their home. They have rented their residence here to Prof. Strauch.

GRAIN YIELDS ARE ABOVE EXPECTATIONS

Difficult to Estimate Average for This Section

To give an accurate report of the grain yields of the Potlatch would be almost impossible. Publishing a list of some of the best yields reported would leave the impression that this section harvested a bumper crop. On the other hand, if none but the lowest yields were given, the figures would look like almost a total failure. The sections of the Potlatch that were blessed with the heavy rain the first part of June, have good crop averages, but the spots that were missed have a very poor yield, except in rare instances.

Conservative estimates place the total average for the entire Potlatch country at better than 18 bushels. American ridge will average considerably over 20 bushels, but that section had more late rainfall than any other.

Carroll Cox of American ridge reports an average of 39 bushels on 120 acres and part of this was stubble ground. Carl Hartung of Cameron made an average of 36 bushels from one of his fields. Art Rognstad got 24 bushel average on Big Bear ridge. On the same ridge Thorvald Nelson had 20 acres that made 35 bushels to the acre, and it is reported that A. Hooker, on part of his crop, got 40 bushels, the best yield on the ridge. Geo. Davidson on American ridge had one piece that went nearly 40 bushels while his average was about 30. Bill Stump near Southwick got about the best yield in his locality with 33 bushel average. These are some of the good yields and as they make a better showing than the poor ones, we will let it go at that. It doesn't read like the Potlatch to publish an account of 5 or 6 bushel yields.

CITY DADS AWARD PAVING CONTRACT

Campbell & Barr of Colfax Get the Job

At an adjourned meeting of the town council, held last Friday evening at the hall, the chairman and clerk were authorized to sign the contract with Campbell & Barr for the street construction work to be done here this fall. The contract, therefore, has been duly signed and a copy sent to a bonding company by the contractors to secure a bond guaranteeing the completion of the job.

The contract calls for the job to be finished not later than December 15. Every day after that if the job is not finished will cost the contractors \$50. However, there is little fear from that source as Campbell & Barr have a good reputation as contractors and it is believed they will complete the job within the specified time, if it is possible to do so. They will begin work the first part of September.

In a telephone conversation with Mayor Walker last Saturday, Mr. Barr stated that local labor would be used on the job as far as possible but that they would probably use their own teams as they had a big outfit, including 28 head of mules. Two and possibly three rock crushers will be used.

Making Poultry Pay

Bill Behrens is making his farm poultry flock pay good dividends. He had 100 White Leghorn pullets last winter that more than paid their board and left a nice profit besides. He sold the pullets about May 1 and after deducting cost of feed and adding \$1.50 a piece which he received for them, he had a profit of \$4.62 for each bird. He now has about 300 White Leghorns and 100 Rhode Island Reds.

Numerous Public Sales

N. R. Shepherd, auctioneer of Troy, was in Kendrick Wednesday looking after business matters. He has a number of sales dated in this community for the early part of next month and says indications now are that there will be more than the usual number of auction sales this fall. He has already had several sales and states that prices are good, taking everything into consideration. In spite of the unstable cattle market, he reports fair prices of cows at his recent sales.

PIANO RECITAL NEXT THURSDAY

To be Held at the Methodist Church at 8 O'clock

An unusual and very interesting recital of solo and ensemble piano numbers will be given Thursday evening, August 31, at 8 o'clock in the Methodist church of Kendrick by the Kendrick and some of the Clarkston pupils of Mr. and Mrs. W. W. Gatenby. This joint recital is an annual affair, and as some of the Clarkston girls are well known in Kendrick, the event has been anticipated for a whole year.

The Kendrick talent includes Mrs. Leo Raaberg, Edith Dammarell, Alberta Walker, Dorothy Erickson, Hester Knepper, Jane McConnell, Wilson Rogers and Maud Compton. Gertrude Taylor and Anna Hoobler of the Juliaetta school faculty will represent Juliaetta.

The numbers on the program will be explained and described briefly as the program progresses. Herold's Overture from Zampa will be a thrilling number. This is played by Fern Florance and Hazel Sell. These two young ladies convert the key board into a veritable orchestra. The ensemble numbers are descriptive, and are a special feature of the program. Some of the young ladies in the class are excellent ensemble players and the people of Kendrick have a treat in store.

There will be no admission charge. Everybody come out to enjoy this musical event and encourage the young folks of your town in this study of music.

Blushed But Paid Up

A local orator was proudly declaiming to a group of friends on one of our public streets recently.

"Live within your means and keep your debts paid," was the burden of his song—and excellent advice it was too.

"For many years," he declared, "I have made it a rule to pay my debts the moment they are due. I never allow a 'bill' to become a 'debt.' It is a comfortable feeling to know that I owe no man a dollar."

Just then he spied the editor on the fringe of the crowd, and he had the grace to remember, and to blush—and to pay.—Ex.

Another Bonehead

"I'm going to comfort Mrs. Brown," said Mrs. Jackson to her daughter, Mary. "Mr. Brown hanged himself in their attic a few weeks ago."

"O mother, don't go; you always say the wrong thing."

"Yes, I'm going, Mary. I'll just talk about the weather. That's a safe enough subject."

Mrs. Jackson went over on her visit of condolence.

"We have had very rainy weather lately, haven't we, Mrs. Brown?" she said.

"Yes," replied the widow. "I haven't been able to get the week's washing dried."

"Oh," said Mrs. Jackson, "I shouldn't think you would have any trouble. You have such a nice attic to hang thing in."—Ex.

LELAND, SOUTHWICK POULTRY MEETINGS

Pren Moore to be on Potlatch Ridge Tuesday.

Two poultry demonstration meetings will be held next week by Pren Moore of the Extension Department of the University of Idaho, in connection with the Farm Bureau of Nez Perce county. The first meeting will be held at 2 o'clock in the afternoon at the home of Herman Koepp near Leland. Mrs. Koepp will serve refreshments so it is safe to say there will be a good crowd. The same evening at 8 o'clock a meeting will be held at Southwick.

Pren Moore will speak on "The Feeding and Housing of Poultry," a subject which he handles in a most interesting and instructive manner. Mr. Moore is probably the most noted authority on poultry in the northwest. He has done some wonderful things along the line of improving the poultry in Idaho and his demonstrations are highly educational. Many who have attended his poultry culling demonstrations in a most skeptical frame of mind, leave them in a "deep brown study."

North is Optimistic

Northern Idaho farmers will be in a better financial condition this fall than the farmers in southern Idaho.

This opinion is held by both W. H. Herrick, assessor of Shoshone county, and A. D. Decker, representative of the Potlatch Lumber company, Latah County. Mr. Herrick is here to attend the annual meeting of county assessors and Mr. Decker came to meet with the state board of equalization. They are stopping at the Owyhee, says the Statesman.

Pessimism in northern Idaho has changed to optimism, these men declared.

In the mines, they asserted, a year and a half of depression has been followed by renewed activity and capital brought into Wallace, at least, has already shown a remarkable and promising return. Mines are running full blast in Wallace, the home of Mr. Herrick, and the smelter has two furnaces in operation.

Lumbering is also "looking up" they added. Regarding the wheat outlook among north Idaho farmers, they said that early season pessimism over the poor stand of wheat had come to naught and that returns from threshers already at work showed a production of from 60 to 70 per cent of the normal, they said, and because of this wheat growers of the panhandle "have it over" their fruit producing neighbors of south Idaho.

Heavy Horses in Demand

Harry C. Cranke, well known auctioneer, who is now located at Moscow, was transacting business in Kendrick last Saturday. While here he made the Gazette a call and in talking over business conditions in general seemed very optimistic. He is looking forward to a very successful sales season. Sales which he conducted recently were surprisingly good. At one sale he received an average of \$225 a head for horses, but they were heavy and young. Light horses, in his opinion, will not be in demand but good heavy stock is selling at fair prices.

Building Silo

E. E. McDowell finished building an E. M. F. silo, which he purchased from J. C. Hamil. The silo was put together in a few days last week and is located on the flat close to the new road. Mr. McDowell expects to move all his farm buildings to the flat so that they will be close to the highway. He has a nice herd of cows and believes that the new 60 ton silo will soon pay for itself.

Fall Goods Now Ready for Your Inspection.

Young Men! They Are Here

Jazz Slip-over Sweaters

They sure have got the class. No sweater like it. We sold the entire shipment last season in a week. Be sure to get yours early as they will not last long.

Beau Brummel Shirts

Good looks combined with fine workmanship.

The fall line of Beau Brummel Shirts is now on display, and you, who are particular about your shirts will be very much interested in our showing.

Lightning Strokes.
With regard to the voltage of lightning strokes there are only estimates. These range from a few hundred thousand to several billion volts, depending upon the ideas of the persons making the estimates. No measurements have been made. The amperage of lightning strokes is more definitely known, a few attempts having been made to measure it. The best measurements of this kind show that the current intensity may be as great as 25,000 amperes. As for harnessing lightning and turning it into energy useful to man, no practicable scheme has yet been presented.

One of Pasadena's society girls has a marked talent for art. She studied in Paris, and last year one of her pictures got into the salon. This is all very well, but—
Said her mother the other day to a well-known landscape painter of southern California:
"I don't at all object to dear Dorothy's painting, but I don't want her to neglect her social duties for it. If she paints one masterpiece a year, that's quite enough, I think."—*La-guna Life.*

UNWELCOME GUEST IN AUTO

Blinded by the headlights of an automobile, a deer jumped through the windshield of a car on the Pleasantville-Mays Landing road near Atlantic City, causing serious injury to a New York woman, who was riding with her husband. The woman was slashed across the face by a piece of flying glass and kicked in the stomach by the frenzied animal. Her husband also was slightly cut by glass and was kicked several times by the deer.

M. E. Church Notes

Services both morning and evening Sunday.
Sunday school and Epworth League at regular hours.
There will be no prayer meeting Thursday on account of the recital to be held in the church.

"BAD MEN" NEVER POPULAR

Product of Early Days of the West, They Antagonized Section's Sense of Fair Play.

The actual "bad man" of the West was a feature of the towns rather than of the range, for he preyed mostly upon the gold and silver that, starting from the mines, had been entrusted to a lumbering stage, or to an express car upon the railway, explains Philip Ashton Rollins, the New York lawyer who has written a history of the cowboy.

But, all in all, there were very few of the actual "bad men." The West did not like them. They ran counter to the actuating western motive, which was fair play or justice, as the West conceived it. Consequently, each "bad man" sooner or later would "go out of the territory for his health or to hell on a shutter." If he "passed out," it would be either on the end of a rope or before a bullet. His demise was sometimes referred to as his "snuffing out," "bucking out," "croaking," "cashing in," or "passing in his checks."

Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

It is little short of marvelous the splendid quality of melons that have been raised in the Juliaetta section this season when the lack of rainfall is taken into consideration. Watermelons, cantaloups and muskmelons are all exceptionally fine. A. B. Janes brought a load of cantaloups and muskmelons to Kendrick, Tuesday that were good enough to put on display at a fair. A number of the muskmelons weighed 12 or 13 pounds each and the quality was excellent. It is unfortunate that a lower freight rate cannot be secured so that a better market would be available to the Juliaetta growers.

This season Martin Thomas has again demonstrated the fact that what the Potlatch land needs is a rest and a chance to recuperate. Last year his land made an average of 46 bushels of wheat to the acre. This year, in face of the unfavorable conditions, 110 acres of the land made an average of 39 bushels and part of this was stubble ground. A few years ago he seeded much of his land to alfalfa and still has many acres that produce splendid crops of alfalfa hay. After being seeded down for two or three years the land produces wheat like it used to do in "ye good old days."

Cameron News

Several of the threshing machines have "pulled in" for the season and now the bean cutting and bunching is in full swing.

Mr. and Mrs. H. E. Wessels, of Spokane and Mrs. O. Reinertsen and two sons, of Yakima, and little grandson, Muriel Wessel of Colfax, arrived in Cameron to visit with relatives. Mr. Wessels sold his property at Greenacres, Wash., and after leaving Cameron will return to Spokane to "pack up" and then the Wessel family will leave for California to spend the winter. Mr. and Mrs. Wessels are well known on the Potlatch ridge having farmed here and having resided in Kendrick before moving to Spokane.

Herman Wilken was visiting on the ridge last week. Mr. Wilken is now engaged in the farming business, having rented Mr. Buckles' ranch at Agatha.

Mr. and Mrs. Byron Tupper and family, and Miss Maud Pounds of Clarkston, were visiting in Cameron with friends and relatives last week.

Rev. and Mrs. Groeschuf of Spokane was visiting old time friends in Cameron this week.

Mr. and Mrs. H. E. Wessels and Mr. and Mrs. Olday drove to Cavendish, Tuesday, in Mr. Wessel's new car, to visit the Sutton family.

Leland Items

Threshing will be completed on the ridge this week, except for beans.

Mr. Yenni had the misfortune, Monday, of having a load of hay upset with him, throwing him off and breaking some bones in his wrist, also dislocated a bone in the same arm, besides bruising him up otherwise.

Rev. Hall left Tuesday morning for Milton, Oregon, to attend the annual conference.

Mr. and Mrs. Jesse Hoffman were Orofino visitors, Tuesday.

R. C. Smith is suffering from a severe case of tonsilitis.

Georgene Smith is visiting at Cavendish this week.

Mrs. McCoy of Southwick is visiting her daughter, Mrs. Harry Smith, this week.

If we didn't know different, we would say Mr. Woodward was a North Carolinian, judging from the fine melons he raises every year—this one no exception. He presented us with a fine big one—"the best ever."

Mr. and Mrs. B. F. Fleshman, Rev. and Mrs. Hall and son, ate fried chicken and other good things, as guests of Mr. and Mrs. Ed Fleshman, Sunday.

The ice cream and pie social, Saturday evening, was very well attended, netting the ladies \$32.20.

Miss Clara Loche of Everett, Wash., is visiting her brother, A. R. Locke.

Sufficient Anyhow.
 "Is this good soup, waiter? I'm terribly fond of soup." "Yes, sir. Can I recommend it very highly, sir." "Well, bring me a couple of dollars' worth."
 —Kansas City Star.

Biliousness and Constipation.

For years I was troubled with biliousness and constipation, which made life miserable for me. My appetite failed me. I lost my usual force and vitality. Pepsin preparations and cathartics only made matters worse. I do not know where I should have been to day had I not tried Chamberlain's Tablets. The tablets relieve the ill feeling at once strengthen the digestive functions, helping the system to do its work naturally," writes Mrs. Rosa Potts, Birmingham, Ala. — AD.

GREEN MANURING ONE OF OLDEST METHODS USED TO IMPROVE SOIL

Red Clover Ranks High in Importance Among Leguminous Crops.

Although green manuring is one of the oldest methods used to maintain or to increase the productivity of the soil, there have been enough new developments in the practice and in the plants used for the purpose in recent years to make desirable the publication by the United States Department of Agriculture of Farmers' Bulletin 1250, Green Manuring, by C. V. Piper and A. J. Pieters.

The subjects discussed range from a definition of the term "green manuring," which means "the turning under of any crop, while green or soon after ripening, for the purpose of soil improvement," to descriptions of the many crops that are used for land betterment in most regions of the United States and in some other countries. The use of special green-manure crops, says the bulletin, is much more general in the South than in the North. In the semi-arid regions, for reasons made clear, under-dry farming green manures are not used, but in irrigated areas in the West orchardists depend upon them to a great extent to increase the yield of fruit.

Crops Benefit Soil.

These crops that are grown primarily as roughage for feeding the soil produce both chemical and physical effects that are of benefit to plants that succeed them. When a green-manure crop is turned under, the various fertilizing elements that have gone into the making of the crop are returned to the soil, and a quantity of organic matter not before in the soil is added, and, in addition to improving the physical condition, serves as food for beneficial bacteria. One of the most important functions of organic matter in the soil is to keep up the nitrogen supply. The bulletin gives three ways in which this is done: (1) Growth of nodule bacteria on roots of leguminous plants; (2) the making of nitrates by soil bacteria from organic nitrogen in the soil; and (3) growth of bacteria and molds that feed on plant waste in the soil and take nitrogen directly from the air. These processes may be stimulated by adopting the proper practices and suitable crops.

Satisfactory Cover Crops.

Legumes are of course the most satisfactory cover crops under most conditions, and all legumes do not have the same strain of nodule bacteria. For instance, that of clover is different from that of alfalfa, and that of the cowpea is distinct from that of the soy bean. These selective associations of plants and bacteria make inoculation of the soil necessary where the crop has not been previously grown, either by scattering soil from a field where the crop to be sown has been grown recently or by using an artificial culture. A strain of bacteria will often inoculate differ-

A Field of Soy Beans, a Good Home-Grown Feed, Rich in Protein and Excellent for Dairy Cows.

ent closely related legumes. Alfalfa, bur-clover, and sweet clover nodules are produced by the same strain; a different strain inoculates most of the vetches, as well as the field and garden peas; still another strain is apparently used in common by red, white, alsike, and crimson clovers.

The question often arises, whether a crop should be turned under for green manure, fed on the farm, or sold as hay. The authors sum up the argument as follows: Where a forage crop can be grazed or advantageously fed and the manure returned to the land, this will be found most profitable. Where insufficient live stock is kept

or where the soil is poor and in need of organic matter, a green crop may often be worth more if turned under. It is known that the turning under of a green-manure crop may effect the yield of subsequent crops even to the third year, and this fact should have weight when the question of selling a legume hay crop or turning it under is considered.

A Regular Farm Practice.

Green manuring in some form should be part of the regular farm practice on most of the farms east of the hundredth meridian and on irrigated land elsewhere. Rotations should be arranged so as to work in a green-manure crop between regular crops without sacrificing direct money or feed crops. Preference should be given to a legume if possible. The value of these crops is determined by the quantity of humus formed, measured by the tonnage of the crop, the physical changes brought about in the soil, and the quantity of nitrogen taken from the air and added to the soil. There are probably other factors that are as yet but little understood. It is said that green manure in orchards checks certain diseases and improves the quality of the fruit.

Order of Importance.

The leguminous crops grown in this country listed in the bulletin in order of importance are: Red clover, alfalfa, alsike clover, sweet clover, cowpeas, peanuts, soy beans, velvet beans,

An Excellent Stand of Alfalfa.

crimson clover, field peas, vetch, Japan clover, bur clover, and white clover. A few others, such as beggarweed, grass peas, fenugreek, and horse beans are grown to a small extent in restricted localities. Non-leguminous crops that are considered as useful green manures are grasses, buckwheat, weeds, and some plants of the mustard family that are used more in Europe than in this country.

The bulletin contains more than 40 pages of valuable information on these plants and the ways of handling them; also tables of results that show their value in increasing returns. A copy may be obtained free by addressing the Department of Agriculture, Washington, D. C.

ERADICATION OF ALL WEEDS

One of Most Serious Agricultural Problems is Prompt Destruction of Noxious Plants.

There is nothing which has a graver menace to agriculture than our noxious weeds. It is all right to think of serious marketing problems and economic subjects, but the solution of these is not a bit more important than the prompt eradication of Canada thistle, quack grass and other noxious weeds. Town, city and village must lend mutual strength to the warfare on weeds. It is a community problem, a personal issue.

ROBBING SOIL OF FERTILITY

Of Utmost Importance That Land Be Kept Fertile With Manure and Phosphorus.

If farmers continue to rob the soil of its natural store of fertility, what is the next generation of human beings going to do for food? Our best soils can produce profitably only 30 to 40 years unless they are kept fertile with manure, clovers, and finally phosphorus.

MEN WANTED

The Northern Pacific Railway Company will employ men at rates prescribed by the U. S. Railway Labor Board as follows:

Machinists	70c per hour
Boilermakers	70c to 70½c per hour
Blacksmiths	70c per hour
Electricians	70c per hour
Sheet metal workers	70c per hour
Freight car men	68c per hour
Stationary engineers	Various rates
Stationary firemen	Various rates
Passenger car men	70c per hour
Helpers, all classes	47c per hour

Mechanics and helpers are allowed time and one-half for time worked in excess of eight hours per day.

Young men who desire to learn these trades will be employed and given an opportunity to do so.

A strike now exists on the Northern Pacific Railroad.
 Apply to any roundhouse or shop or superintendent

Northern Pacific Railway,
 Spokane, Wash.

CLEAN PACKAGE FOR BUTTER

Carefully Packed Product Gives More Enjoyment to Consumer Than Slip-Shod Parcel.

(Prepared by the United States Department of Agriculture.)

For the same reason that a man prefers to eat his meals from a clean table both he prefers to get the butter he eats in a clean and attractive package—it helps him to get more enjoyment from his food and that means he really gets more value out of it, even though carelessly packed products may contain just as much food value as those that are put up carefully.

The package into which butter is put is of more importance than most

Working Butter Before Putting in Package.

food packages, because the product which it holds is extremely sensitive to outside influences, especially odors. Men who have made a business of studying market conditions and methods have long given attention to the package problem and they are still at it. This year at the National Dairy show, held in St. Paul, Minn., October 8 to 15, the United States Department of Agriculture had an unusual show of butter packages that proved of as much interest as a lot of curios. The department has collected packages from the various countries of the world that make butter in considerable quantities, and they were shown in comparison with packages that are used in our own country. In addition there were examples of good and of poor packing.

SUMMER WEATHER AND FLIES

Many Calves Can Be Saved If Given Careful Attention and Kept in Shaded Pens.

Hot weather and flies ruin a great many calves. It is advisable to protect the young animals very carefully during the fly season. Spring calves are never allowed by some breeders to pasture the first summer, but are kept in shaded pens away from the heat and flies. Fall calves, likewise, are not allowed pasture during the hot days, but are turned out at night into small paddocks or exercise pens. Unless the calf is getting plenty of grain, waxy grass may do it more harm than good.

"WAYSIDE" BATTERY SOLUTION

Saves time, Saves you money, Saves you repairs, Saves you rentals, Saves recharging bills and eliminates trouble.

Keeps battery free from crystal sulphation.

Prolongs life of your old battery.

One Dollar Saved Represents Ten Dollars Earned.

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seed for the garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea Remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—AD.

ASSESSOR'S FIGURES AID EXTENSION WORK

Useful to Determine County's Big Farm Problems.

In One Instance It Was Discovered That 51 Per Cent of Land Was Farmed by Tenants—Federal Farm Loan Unknown.

(Prepared by the United States Department of Agriculture.)

In making county and community programs of demonstrations and other extension activities for the year, extension agents in Oklahoma report to the United States Department of Agriculture that the use of county census and assessor's figures as a basis for determining the county's major agricultural problems is proving very successful. A meeting of the men and women from each community is called each year by the county agricultural agent for the purpose of making a program for the year's extension work.

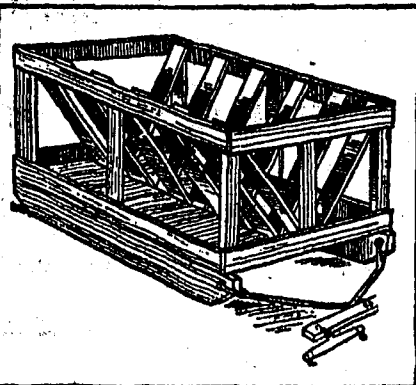

In these meetings it has been found that these figures are of great service in showing agricultural conditions of the county in a concise and comprehensive way. In one instance it was found that about 51 per cent of the county's agricultural land was farmed by tenants. Discussion brought out the fact that the federal farm loan was practically unknown in the county and plans were made to conduct a campaign to bring the benefits of the loan to the attention of the communities as a possible means of securing a greater percentage of farm ownership.

Figures showing that more acres in the county were being planted to wheat than any other crop started a discussion which indicated there was difference of opinion as to the best variety for the locality; it was therefore decided that demonstration plots of the best liked varieties of this crop be grown in eight sections of the county. In a similar way all the figures covering the agricultural activities of the county are studied in these program-making meetings, and as a result a program is made which is based on what statistics have shown to be the most urgent needs of the communities and in which general interest throughout the county is felt.

HANDY PORTABLE FEED RACK

Sixteen-Foot Runners, Rounded at Each End, Make It Easy to Haul to Any Desired Spot.

A portable feed rack for hogs is a mighty convenient device for any farm. It can easily be moved from one spot to another. The 2x12—16 foot runners

Portable Feed Rack.

are rounded at each end. Three 2x6—12's nailed between the runners make a solid foundation. The uprights are 2x4's and the slats are 1x3's. The space between the runners and the bottom of the "V" shaped rack is floored and a 1x12 board running all around the rack just above the runners completes the manger.

STABLE FLIES ARE ANNOYING

Pests Are Cause of Much Discomfort to Live Stock and Financial Loss to Owner.

Stable flies are the cause of much discomfort and annoyance to live stock and of financial loss to the owner. Keep the stables, poultry houses, pig pens, etc., clean and avoid the accumulation of manure or filth. Provide screens for doors and windows. Spray the animals lightly each morning with a mixture of the following proportion: Five gallons kerosene, one pint either oil of mirbane, oil of tar or cresylic acid.

HARVEST CLOVER SEED CROP

If a Little Overripe Loss of Heads May Be Reduced by Cutting Early in the Morning.

Under normal conditions clover should be cut when the heads have turned a dark brown. If the clover is a little overripe, the loss of the heads may be materially reduced by cutting early in the morning or in the evening when there is dew. The clover should be cut as high as possible; this enables threshing to be speeded up, as there will be less straw to handle.

CLEAN AND SPRAY HEN HOUSE

Important That Work Be Done During Warm Months to Keep Out Insect Pests.

Thoroughly clean and spray chicken house, especially nests and roosting quarters, with coal oil, fuel oil, crude oil thinned with coal oil, or the oil drained from an auto. Repeat this spray monthly during warm months to keep free from red mites.

BEST VARIETIES OF BROOM CORN

Success With Crop Depends Largely on Proper Care During Harvesting Period.

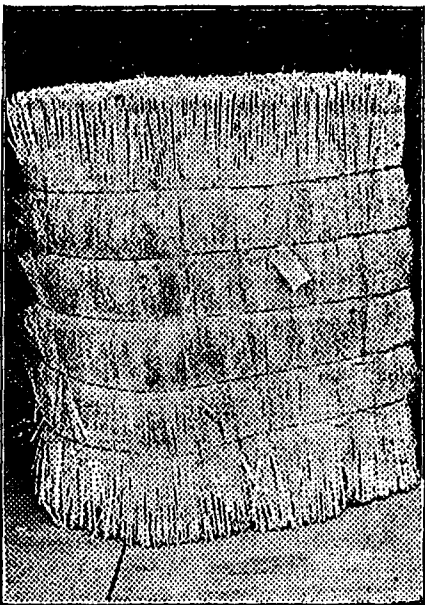

FIRST PICK MATURED HEADS

Proper Time for Harvesting is When Fiber is Deep Green From Tip to Knuckle—Avoid Immature and Overripe Brush.

(Prepared by the United States Department of Agriculture.)

Success in handling either of the two varieties of broom corn produced in the United States—Standard and Dwarf—depends to a large extent on proper care during the harvesting period. Even with the most efficient systems of distribution it is impossible to overcome the handicap of an inferior product, says the United States Department of Agriculture in a new publication, Department Bulletin 1019, Marketing Broom Corn, prepared by G. B. Algure, assistant in marketing hay and broom corn.

Selection of Heads. The selection of properly matured heads is a matter for first attention. Broom corn is in the proper stage for harvest when the fiber is deep green

Broom Corn Must Be Well Baled to Bring Best Price.

from tip to knuckle, a stage that may be reached when the head is in bloom or not until the seed is in the dough stage. Immature fiber lacks elasticity, shrivels perceptibly on curing, and presents an uninviting appearance when baled. Overripe brush is equally undesirable.

Preventable waste among manufacturers can be traced in many instances to the first steps in harvesting. In general, anything unfit for use in the manufacture of brooms should, so far as practicable, be left in the fields. To command the best price, broom corn must be free from seed and well baled.

Methods of Handling.

The bulletin discusses the various methods of handling broom corn on the farm and in the process of distribution, including marketing, practices employed by various classes of dealers, methods of sampling, storage facilities, and co-operative marketing. Copies of it may be had free upon application to the United States Department of Agriculture, Washington, D. C.

GRASS GROWN WITHOUT SEED

Best Strains Have Been Developed by Cutting Up Runners From Thrifty-Looking Spots.

Many good turf grasses that reproduce by runners have lost the habit of producing seed, and for this reason the United States Department of Agriculture has been experimenting with the vegetative propagation of some of the most satisfactory strains of bent grasses. Better strains have been developed by finding spots in lawns and on golf courses where the turf was particularly good, cutting up the runners and planting these cuttings in increase plots. Most of this work has been done in northern states, although some good strains of Bermuda grass have been selected which give promise of value in the South.

A number of commercial growers have been working on these improved grasses and now have cuttings for sale. However, it is possible for a person to improve his own lawn or for a golf club to improve the turf on the course by selecting spots where the grass is particularly good and growing the cut runners in rows in a garden or field. When the good strain has been increased sufficiently in this way the old lawn or turf may be plowed up and the new strain established.

POULTRY LITTER HELPS SOIL

Straw Filled With Droppings is One of Most Valuable Fertilizers for Gardens.

Poultry litter, particularly straw filled with droppings, is one of the most valuable fertilizers for gardens and small fruits. It is particularly worth while where clay soils are to be worked, because in a few seasons the addition of this litter will completely change the character of the soil and give one a rich, friable and easily worked soil capable of producing almost any garden crop, whether vegetables or flowers.

NICOTINE KILLS STRIPED BEETLE

When Applied in a Mixture It Has Been Found Effective in Protecting Plants.

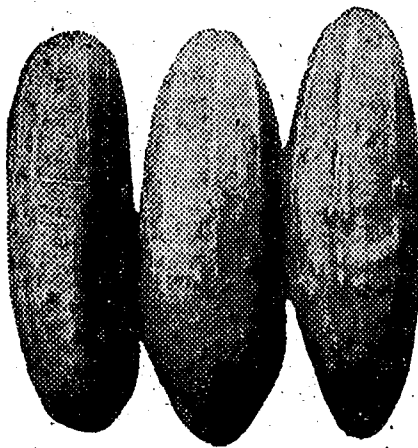

POISON ACTS AS REPELLENT

Insect Makes Its Appearance Suddenly and in Large Numbers and Serious Injury May Result if Application is Neglected.

(Prepared by the United States Department of Agriculture.)

Nicotine sulphate, when applied in a mixture with a dust, has been found by the bureau of entomology of the United States Department of Agriculture to protect young cucumbers, melons and related crops successfully from the ravages of the striped cucumber beetle. Department Circular 224, "Nicotine Dust for Control of the Striped Cucumber Beetle," by W. H. White, scientific assistant in truck-crop insect investigations, recently issued, gives the results of various experiments at Arlington farm and directions for preparing and applying the dust.

Amount to Apply. A dust mixture containing 4 per cent nicotine proved as effective as those containing greater amounts, and

Cucumbers of Uniform Size Result if Vines Are Given Proper Attention.

is therefore recommended. One-fourth to one-half an ounce to the hill is effective for one application. The dust acts as a repellent and also kills the beetles when they come into contact with it. When applied properly it drives the insects from the cracks in the soil.

Type of Effective Duster.

A duster that will throw a good volume of dust quickly and forcibly to prevent the beetle from escaping by flight should be used. A cheese-cloth sack or knapsack-bellows type of duster is effective on small areas. The dust must be applied as soon as the plants appear above the ground, so that they are well covered. The insect makes its appearance suddenly and in large numbers and serious damage may result if this application is neglected.

Department Circular 224 may be obtained free upon application to the United States Department of Agriculture, Washington, D. C.

MARRIED MEN BEST WORKERS

Chances for Securing Employment on Farm Are Less Than 50 Per Cent for Single Men.

If you want a job on a farm your chances of getting it are slightly better than 50 per cent if you are married, and slightly less than 50 per cent if single. But if you're married and have children your chances are around 45 per cent.

The United States Department of Agriculture has found that, of 1,201 farm jobs advertised in eastern farm papers from 1920 to 1922, single men were wanted in 387 instances, and married men in 416 instances. In 398 cases the social requirements were not stated.

Of the advertisements for married men children specifically were not wanted in 54 instances. Children were wanted or were permissible in 14 instances.

Many farmers who hire laborers have no dwellings to let and consequently cannot employ married men, it is said. If the farmer has a dwelling for a laborer's family he prefers that it should be occupied.

SILO FOR STORING COW FEED

One Should Be Constructed Where Farmer Has as Many as Six or Seven Dairy Animals.

Build a silo for storing feed if you have as many as six or seven cows. A home-made stave silo 10 by 24 feet will cost less than was paid last winter for five tons of hay. Four acres of corn will fill it and do the work of ten acres of hay.

GENTLE TREATMENT IS BEST

It Pays to Keep Milking Periods as Regular as Possible and Milk in Same Order.

It pays to treat the cows gently and firmly, to keep the milking periods as nearly regular as possible, to milk in the same order, and for each milker to milk the same cows each time. This is necessary to the highest development of a herd no matter if the influence in individual cases seems insignificant.

COURTESY SERVICE FIRST STABILITY

The Bank For Farmers

The Farmers of the Potlatch Region are prosperous and their prosperity is largely the result of hard, intelligent work, combined with practical banking co-operation.

The Farmers Bank has for many years co-operated to the fullest possible extent with the Farmers of this region and we cordially invite more business of this desirable kind.

CORN SHELTER EASILY MADE

Both Lever and Cut-Away Portions of Block Are Studded With Protruding Spikes.

A homemade corn sheller is just the thing where only a little corn is to be shelled. A block of wood with a sloping notch cut from one end is mounted on three legs. A lever is at-

Homemade Corn Sheller.

tached to the block. Both lever and cut-away portions of the block are studded with spikes driven so that the heads protrude about half an inch. The box that catches the corn is fastened to the legs of the sheller.

KEEP HOE GOING IN GARDEN

Much of the success of vegetable culture depends on keeping the hoe going. Never miss a chance when the ground is in a semimolst condition. That is just the very best time for the work. Keep stirring as deeply as possible between the rows of all young growing vegetables to open up the soil and lay it ready for the action of sun and air. By this process weeds never get a foothold, far less reach the seeding stage. If this plan is persisted in one can almost see the vegetables growing. It is not hard work, and it is well worth the time it takes.

Sealed proposals will be received at the office of G. F. Walker, Kendrick, Idaho, up to 8 o'clock p. m., of the 8th day of September, 1922, for repairing the Potlatch bridge which extends from Good Road District No. 1 to Kendrick Highway District.

The work is to be done in accordance with plans and specifications on file at the office of G. F. Walker. The right to reject any or all bids is reserved, as is also the right to award the contract for all or any portion of the work.

Good Road District No. 1, Frank Lyons, Sec. Dated August 19, 1922. 34-4t.

Why Suffer from Rheumatism?

Do you know that nine out of every ten cases of rheumatism are simply rheumatism of the muscles or chronic rheumatism, neither of which require any internal treatment? The pain may be relieved by applying Chamberlain's Liniment, which makes sleep and rest possible, and that certainly means a great deal to any one afflicted with rheumatism.—Adv.

IS EARTH'S OLDEST HIGHWAY

Grand Trunk Road of India Has Been in Existence for Many Thousands of Years.

It is contended that the Grand Trunk road of India is the most romantic highway in the world. A stately avenue of three roads in one—the center of hard metal, the roads on each side ankle-deep in silvery dust, fringed by a double row of trees—runs for 1,400 miles through the vast southern plain that skirts the Himalayas, from Calcutta to far Peshawar, which keeps sentinel at the gate of Afghanistan.

From horizon to horizon it stretches like a broad white ribbon, as straight as if traced by a gigantic ruler. And dotted along the entire lengths are hundreds of serais—wayside rest houses—each with its arched and turreted gateway, its spacious inclosure, where humans share shelter with oxen, camels and goats, and its central well of sparkling water.

For three thousand years the Himalayas have looked down on this road and have seen it as they see it today. It has witnessed a hundred generations of men come and go; a score of dynasties rise and fall. And yet today it is to the eye exactly the same as in the long-gone time when Nineveh was a proud city.

SENATORS NOW IN SECLUSION

Good Story That Explains the Substitution of Opaque Glass for Transparent in Lobby.

The secret of the substitution of opaque for transparent glass at either end of the lobby abutting the senate chamber is said to rest in the embarrassing experience of one senator with a well-meaning visitor. According to custom, the visitor, a constituent of the senator, sent in his card from the door just off the lobby.

The senator, so the story goes, returned the card with instructions to the page to tell his visitor he was not there. It so happened, however, that the visitor lingered a while and, peering through the then transparent windows by the door of the lobby, caught sight of the senator resting comfortably on a sofa. Senators now smoke and chat in calm security, free always to be "not in" to troublesome constituents.—Washington Dispatch in the Philadelphia Public Ledger.

MEASURING SEA DEPTH

The destroyer Stewart, equipped with the sonic range finder, used for sounding at sea, has made a practical test trip from Newport to Gibraltar. The new method is closely related to radio, depending on the transmission of sound waves through water, and is employed to measure depths of the ocean. Soundings are made by measuring the length of time required for sound oscillations sent out from the ship to travel to the bottom of the ocean and back again.

Soundings were taken at regular intervals without stopping the ship, and indicated depths from 90 to 2,500 fathoms.

FINANCIALLY EMBARRASSED

I was a greenhorn and seeking a way to spend my two weeks' holiday so as to get the greatest amount of health and pleasure for my money. I decided upon a lakes cruise and bought my transportation for the ten-day cruise. I was shocked at the little amount I had left, but went aboard determined to make the best of my bargain. I came to meals only when absolutely driven to it by hunger. Upon leaving the boat after the ten days had passed, imagine my feelings when the steward said, "If we had a few more passengers like you, we'd get rich." My transportation covered board while enroute!—Exchange.

IF DAD HAD SEEN—!

"But, daughter, you are only seventeen years old. How do you know Charley was made for you?"

"Father," replied the young flapper, dropping for the moment every trace of artificiality, "if you could have seen the look in Charley's eyes when he told me he was made for me, you wouldn't doubt it."—Birmingham Age-Herald.

A PERTINENT QUESTION

"Now, daughter, carrots are good for your health. If you will eat carrots I'll buy you a diamond ring."

"How many carats?"—Louisville Courier-Journal.

ISLAND CUT OFF FROM WORLD

St. Kilda, in the Hebrides, Has Become Accustomed to Long Periods of Isolation.

A correspondent in touch with the lonely Hebridean island of St. Kilda, in the Atlantic, has received a report that the first steamer from Glasgow since August 23 last was unable a week ago to land all her stores owing to stormy weather, according to the Notes of the Day in the Westminster Gazette, London. With the exception of occasional visits from Fleetwood or Aberdeen trawlers, the island has been completely cut off from the mainland since August, and it is not surprising to learn that, from December till February, when the first touch of spring came, the natives were "very depressed."

The population of St. Kilda is now as it was a year ago—73—the death of a girl having been balanced by the birth of "a fine boy." There is no form of governance or administration on the island, but, strange to say, there is a "queen," a woman who exercises no office, but merely carries on the title given long ago to a woman of the mainland, who married an islander, and, being better educated than the natives and the only one who spoke English, was recognized as being in some way their superior.

The St. Kildans are, nevertheless, loyal subjects of King George and Queen Mary.

TEMPORARY LAKE IN DESERT

Overflow of Water From the Colorado River Threatened to Submerge Millions of Acres.

The Salton sea was a temporary lake in southern California formed in 1905 and 1906 by the overflow inland of water from the Colorado river through the water channel of an irrigation canal conducting water from the Colorado river near Yuma, Ariz., to the Imperial valley region. The Salton basin, or lower part of this valley, sometimes known as the Colorado desert, is 280 feet below sea level in its lowest part, and when the water was deflected from the

natural channel of the river normally entering into the Gulf of California, over four hundred square miles were flooded and the submergence of an area of two thousand square miles, involving large loss of property and natural resources, was threatened. Several unsuccessful attempts were made to turn the river back into its original channel. The overflow was finally controlled in February, 1907, by the construction by the Southern Pacific railroad of three parallel trestles across the break, from which large stones were dumped almost simultaneously. This checked the flood, and the lake gradually disappeared through evaporation.

LONDON MOST SMOKY CITY

London leads the world in fog, smoke and soot. During a single month, according to the department of health, 47 tons of dirt were dumped from the air upon the unsuspecting heads of the populace. Of this mass approximately 27½ tons were soluble and 19½ tons were insoluble, and consisted of tar, carbon and grit.

London is no nice place for white collars, straw hats, Palm Beach suits or light-colored gowns. These soon assume a black hue which even the laundries find it difficult to remove. Hatmakers are overcoming the dirt by making this summer's straw hats a deep black.

"DON'T EVER MARRY"

Jealousy, however, has its humorous side to those not effected. Innocent escapades or precautions which cause friction between married couples furnish most of the humor of the world, and it is a delightful humor as Marshall Neilan shows in his latest production for the screen "Don't Ever Marry." It is the story of the happenings which take place within twenty-four hours after a secret marriage, when for reasons best known to themselves, two other women claim the young groom as their lawfully wedded husband.

The fun happens fast and furious from the opening scene to the end where tranquility is once more restored. "Don't Ever Marry" will be shown at the New Kendrick Theater, Tonight and Saturday.

Public Auction Sales

Mr. Walks, the auctioneer of Moscow and Pullman, having left the country, I have opened an office in Pullman as well as in Moscow, for the purpose of carrying on my auction business. Due to the fact that I sell practically every day thru the sales season, I would not be in either office very regularly. I have authorized Mr. Geo. Vengerholz to date my sales for me in this territory. The Kendrick Gazette or either bank will be only too glad to make your date thru Mr. Vengerholz.

I have conducted more farm sales than any other auctioneer in the northwest and my references are many satisfied farmers.

GLEANINGS

Leo Raaberg purchased a new Chevrolet car this week from the Kendrick Auto Co.

Frank Chamberlain has rented the Grinold's livery barn and will use it as his feed stable for the time being. He will continue the livery service.

L. A. Grinolds of Lewiston was in Kendrick on business last Saturday.

Mr. and Mrs. G. G. Oldfield and son, Max, drove to Spokane, Sunday, to spend the week visiting relatives.

Groseclose & Richardson of Juliaetta received delivery of a new Gardner car last week through the local agent, Carl Kinzer. Mr. Kinzer recently took the agency for this territory and already has a number of likely prospects for sales.

Captain Schatner of Lewiston was transacting business in Kendrick last week. He is the executor of the A. Emtman estate.

F. B. Smith, cashier of the Bank of Peck, was in Kendrick last Saturday on business.

Mrs. A. R. Shumaker of Pullman spent the week end at the home of Mr. and Mrs. Jody Long. Lillian Long returned to Pullman with her, Monday, for a visit.

Ernest Bolon went to Lewiston Monday afternoon. He had his back injured last week while working in the warehouse and has not been able to work since.

Mrs. N. C. Thomas is visiting her daughter, Mrs. Ernest Randall, at Orofino.

Mrs. C. A. Pickering was a Moscow visitor the first of the week.

Mrs. Leo Raaberg and daughter returned the first of the week from a visit with relatives at Clarkston.

Miss Manila Hanson was a Lewiston visitor the first of the week.

Mr. and Mrs. Frank LaBolle and child returned to their home in Alberta, Monday, after visiting relatives in this community for the past week.

John Phillips of Clarkston was transacting business in Kendrick the first of the week.

Mrs. F. E. Erickson returned Tuesday from a visit at Spokane and Lewiston.

Ethel and Ruby King returned to their home in Moscow the first of the week after visiting at the home of their aunt, Mrs. George Leith.

Charles Sattler writes from the I. O. O. F. Home in South Idaho that he is getting along very well there. He has charge of the cows, hogs and chickens at the home and is busy most of his time.

Fred Bolon, who has been with the Clearwater Hardware company since its establishment in Orofino, quit Friday night to accept a position with Bullock & Holmberg in place of Loyal Garrison, who is now with the Orofino Mercantile company.—Clearwater Tribune.

J. A. Harsh, Deary banker, has rented a house in Moscow and will move there with his family next month.

E. H. Damarell and family drove to Lewiston last Sunday afternoon. They took the river road but found it closed below Arrow, a big steam shovel blocking the road. The reports of this road being opened and closed are a good deal like Finnegan's story of the railroad wreck.

Mrs. N. E. Walker was a Troy visitor last Saturday afternoon.

There will be five Kendrick young men registered at the University of Idaho this fall. They are: Rex Pickering, Nora Callison, Kester Damarell, Donald and Walter McCrea. This is the largest number Kendrick has ever sent to the University in one year.

The Kendrick Highway District and Good Road District No. 1 are advertising for bids for the repairing of the bridge across the Potlatch. Steel arches are to be put in along the sides to brace the structure.

L. E. Pearson drove to Winchester, Wednesday, on business.

Mr. and Mrs. N. E. Walker spent Sunday on American ridge with the Proconior family.

Miss Waide was a Lewiston visitor over the week end.

Charles Crocker fell from a motorcycle, Wednesday afternoon, and suffered a fracture of the bones of the left arm.

John Roach, auctioneer of Genesee, was in Kendrick on business last Saturday.

This week we had to leave out several good items that were sent to the office but not signed. As we had no way of knowing who the writer was we couldn't take the chance of publishing them.

The Okoke Klootchman Club met at the home of Mrs. Ralph Knepper, Wednesday evening.

Bob Spencer is enjoying a visit

with his sister, Miss Ruth, who arrived Thursday afternoon from Missoula, Montana.

Mrs. I. D. Bradshaw returned last Saturday from a three-week's stay at Clarkston.

Joe Frucht of the Lenore country was in town yesterday on business.

Mr. and Mrs. Bryon Tupper and daughters, and Miss Maud Founds of Clarkston, spent Wednesday at the home of Mr. and Mrs. O. E. MacPherson.

Mr. Strong, hotel keeper at Elk City, arrived Wednesday to visit his brothe-in-law, Theo Riley.

There will be a chicken dinner at the Methodist church Saturday evening, August 26, at 6 o'clock. Everybody is cordially invited.

Fairview Items

Ercil Woody of the U. S. Navy spent the past week at the home of his uncle, John Glenn. Mr. Woody is stationed at San Diego, California.

Miss Melva Walker and her brother, Joe, who have spent sometime here visiting their relatives, have returned to their home at Kosokia.

Jack Flesman spent the week end with relatives and friends at Lewiston.

Mrs. Cain of American ridge was a Sunday visitor at the Corkill home.

Mr. and Mrs. Virgil Flesman and family were dinner guests at the T. H. Daugherty home, Sunday.

Walter McCall and Mr. Hunter motored from Gifford and spent Saturday evening and Sunday at the McCall home.

James Helton and wife were Sunday evening callers at the Corkill home.

Mr. Miller had 25 acres of straight summerfallow wheat which threshed 460 sacks. That is remarkable for this year.

Jesse Walker had the misfortune to lose a good milk cow last week.

Sunday guests at the John Carlton home were Mr. and Mrs. Will Carlton and family of Daryon, Wash.

The Misses Marion and Mildred Medford of Spokane are visiting at the home of their cousin, Mrs. Roy Morgan.

Texas Ridge

Mrs. Elmer Anderson was a caller at the Quesenberry home, Tuesday afternoon.

Mrs. Gibson and Mrs. Chas. Anderson were Sunday visitors at the L. K. Danlgren home.

Walter Pierce and Reginald White were Sunday visitors at Fritz Olson's.

Bernadine Drury visited with Bessie Miller, Sunday.

Mr. and Mrs. Dahlgren and Mrs. Orval Miller were callers at Ogden's, Friday.

Mrs. E. C. Babcock spent Thursday at Quesenberry's.

Jim Butler and family of Bovill have moved onto the Dora Riley farm.

Mrs. Ogden and daughter, Hattie, were callers at Miller's, Monday afternoon.

Leslie Mallory and family of Deary were entertained at the Al LaBolle home, Sunday.

Charley Carlson of Clarkston, was a business caller here Saturday.

Mr. and Mrs. John Gentry and son, Clair, spent Sunday at Jim Butler's.

Mr. and Mrs. Nestor Olson visited home folks on Bear Creek, Sunday.

Mrs. Jim Baker has gone to Bovill to spend a couple of weeks with her daughters.

SEEKING ARTHRITIS CURE

Chronic arthritis, which is like a permanent rheumatism, affecting the joints, is one of the most obstinate of diseases, rarely yielding to any treatment but occasionally clearing up of itself. Dr. Joseph Eideberg of the New York Post-Graduate Medical School and Hospital has been trying the effect of injections of boiled milk and has had a certain measure of success, from which he urges in the Journal of the American Medical Association it be tried by others.

SUGAR SUBSTITUTE

Artichokes are said by the United States Department of Agriculture to furnish a chemical with a sweetening power more than half as great again as sugar. Inulin it is called. Careful experiments are being made to see how far this substance can be used to replace sugar.

PARISIAN HAS RAREST STAMP

Issued by British Guiana in Emergency, It Has Long Been Sought by Collectors.

The rarest stamp in the world, according to philatelists, is the one-cent British Guiana of 1856, recently put up for sale in Paris by the French government for liquidation of sequestrated property. Wealthy stamp lovers of many nationalities vied with each other for possession of the unique specimen.

It was produced in the colony to meet an emergency demand brought about by the nonarrival of an expected consignment of the regular series from England. It is composed of ordinary printer's type with the figure of a sailing ship in the center. Above, and below this device is set in type the motto of British Guiana: "Damsus Petimusque Vicissim." The whole is inclosed in a rectangular frame with the inscription, "British Guiana Postage," and the value in words on the outside. For better security each stamp was personally initialed by the postmaster, and was printed on surface colored paper.

Not until 17 years later was this present solitary specimen brought to light by a London collector and he failed to appreciate its importance so much that he sold it for a few shillings. Eventually it reached the famous collection of Baron van Ferrary, its last owner.

HADN'T INVOKED THE SPOONS

Mexican Butler Had His Own Idea of Peculiar Ceremony Which Preceded Household Meals.

When a Dutch family moved into Mexico recently, friends there lent them a native butler, so that they might the more quickly settle down in the new land. Juan was greatly awed by their unchanging calm, their absolute routine. Waiting upon them was a ceremony to which he gave his most emotional attention.

Especially was he impressed by the rite of grace before meat, uttered in a monotone, invariable and solemn. But one day the father of the family arrived late, after every one else had started, and grace had not been said. Turning to Juan, he bade him proceed to serve him with soup. Then Juan in horror exclaimed: "But, senor, you have forgotten as yet to talk to the spoons!" —New York Evening Post.

VETERAN SOVEREIGNS

The king of Spain is the world's senior monarch, despite his youth. He has now completed 36 years as a sovereign, for nominally King Alfonso acceded to the throne on the day of his birth, six months after the death of his father. It is surprising to note how few of the principal rulers of today are survivors of the Nineteenth century. Besides King Alfonso, the only "veterans" are the queen of the Netherlands, who ascended the throne in 1890, at the age of ten, and the octogenarian prince of Liechtenstein, head of his little state since 1858.

BABY BORN IN AIRPLANE

"Guynemer" is the name of the French war ace and it's also the name of a brand new baby, who has the distinction of being the first child born in an airplane. The mother, Mme. Georges Breyer of Lyons, gave birth to the child 6,000 feet above the Mediterranean while she was en route from Naples to Paris.

The mother has purchased the airplane as a souvenir. The question of the nationality of the child is not disputed as the French law specifies that a child takes the father's nationality, regardless of place of birth.

HAD SEEN HIM BEFORE

A college professor who is head of the department of physics went away for a few days' visit. On the train on his way home he sat next to a man he thought he knew. He said: "You look mighty familiar, haven't I met you somewhere before?"

The young man smiled and said: "I think you have. I am a student at the college where you teach and I live at your house."

CHEAPER ELECTRIC CURRENT

An English railway is experimenting with electric kitchens in its dining cars, current being provided by generators driven by belts from the cars' axles.

No two alike.

The French Shop
Kendrick, Idaho

A minister, with two lovely girls, stood entranced by the beauties of a flowing stream. A fisherman happened by and mistaking the minister's occupation, said: "Ketchin' many, pard?"
"Sir," answered the minister with dignity, "I am a fisher of men."
"Well," replied the fisherman with an admiring smile at the girls, "you sure have the right bait."

New Kendrick
DICKINSON G.G. OLDFIELD

LOOK! Whose here again

Dinty in
"DON'T EVER MARRY"

It's a mirthquake!

and the "Skipper" too in
"Meeting all Trains."

We'll say you'll laugh!

Tonight and Saturday

Watch for "Queen of Sheba"

Brunswick
VICTORGRAMS AND GRAMMOPHONES

New Brunswick
Records

Let's Play it Over Again!

That's what you both will say when you hear the latest Brunswick hits fresh from Broadway. They're catchy and tuneful and the dances are so jazzy you can't keep your feet still. Come in and hear the wonderful Brunswick Super-Feature records today.

If you haven't a Brunswick Phonograph this will be a good time to learn how it excels in tone, the utter absence of vibration or metallic suggestion.

Models are beautiful, the range of prices suits every pocketbook; payment can be arranged in accordance with our convenient monthly plan.

Say to Father "I want a Brunswick"

Then explain how comfortably he can get it for you and bring him to our shop to hear it. He will enjoy a Brunswick just as much as you and your friends. Everyone who appreciates the best music should own a Brunswick—the favorite of musicians.

The Red Cross Pharmacy

Butterwrappers printed at the Gazette Office.

Soapstone.

Soapstone is a rock composed essentially of the hydro-magnesian mineral talc, but never chemically pure, owing to the presence of varying quantities of other minerals, such as mica, chlorite, amphibole, pyroxene, etc. Soapstone is a massive rock, of bluish-gray-green color, and soft enough to be readily cut with a knife.
