

### Road Building Experience

Oregon has expended over \$50,000,000 in the past five years in building first units of one of the finest highway systems in the United States.

It has profited by the experience of many other states from the standpoint of laying pavement that requires a minimum of maintenance cost.

It has been able to profit by the experience of other states which have laid many hundreds of miles of rigid base pavement having no shock absorbing qualities and the surface of which has not been protected by a coating of some shock absorbing substance.

The burden of maintaining permanent highways is emphasized by the proposal of the Highway Commission of California to raise an additional \$65,000,000 for "maintenance" of the roads throughout the state.

California was a pioneer in road building and constructed hundreds of miles of concrete highways which in the experimental days of road building seemed indestructible.

The incessant jar of modern traffic, however, on the unyielding concrete road surface can eventually have but one result, namely, crystallization of the concrete with its subsequent disintegration.

Concrete is like cast iron. It will stand for an indefinite period when it is not subjected to the shock of repeated impact. To save its concrete base road, California is finding it necessary to surface it with a top dressing of bituminous character and thus relieve the concrete base from the direct blows of traffic impact.

With this experience to go by, Oregon has confined its road construction almost entirely to pavements of asphaltic concrete character with a result that it seems to have minimized its maintenance cost.

The taxpayers are deeply interested in this question for in the long run they must foot the bill which a permanent highway system involves.

### Recital Greatly Enjoyed

The annual joint recital of the piano students of Prof. and Mrs. W. W. Gatenby was held in the Methodist church at Kendrick Thursday evening, August 31. There was a large and appreciative audience to greet them. The unique feature of the program was the beautiful ensemble work of the pupils. The solos were mostly classical or semi-classical nature, and much praise was accorded them.

Those representing Kendrick and Juliaetta were: Hester Knepper, Jane McConnell, Maud Compton, Wilson Rogers, Alvira Atchison, Alberta Walker, Gertrude Taylor, Anna Hoobler and Mrs. Leo Raaberg.

Those from Clarkston were: Evelyn Peterson, Grace Manley, Bertha Perkins, Anna Caraway, Rebecca Poole, Susilee Perkins. These last named four young ladies gave a program as a specialty—Vivian Reed, Grace Nixon, Ida Taylor, Wanda Standley, Josephine Gordon, Hazel Florence and Hazel Sell.

The Kendrick girls entertained the visiting pupils in fine style. On Friday a picnic dinner was much enjoyed in the Kendrick park.

### Fairview Items

Mr. J. M. Woodward and family were Sunday dinner guests at the Robert Smith home at Leland.

Mrs. McCall enjoyed a visit with her brother Will Hetchner and Son, Clarence, of Lapwai, Saturday evening and Sunday.

Mr. and Mrs. Roy Morgan and son, Donald, were Sunday afternoon callers at the Jesse Walker home.

Floyd Flesman and Wayne Kuykendall were visitors at Kendrick Sunday afternoon.

Mel Miller had the misfortune to lose a valuable horse in the severe hail storm last week. It was thought the horse became frightened and attempted to jump the fence, coming down on a fence post which penetrated nearly through the body.

Mr. Virg'l Flesman and family were Leland visitors Sunday.

Julius Byres of Texas Ridge is spending several days at the Frank Wilken home.

### Busy Season in Woods

This is going to be a busy winter in the woods. Busier than any winter for several years.

The improved lumber market is calling for increased production. The lumber companies must cut more trees and make more lumber. This calls for increased activity and the maximum of production in the forests.

To meet the demand and keep the big mill humming the Potlatch Lumber Company is establishing new camps and augmenting its forces in the old ones. Within a month there should be an army of men—500 or more—working in the adjacent forests.

Camp 3 has wound up its work near Deary and is about to be moved to Vassar meadows, directly across the mountain from Deary. This camp will log the timber from the north slope of Potato Hill. A spur reaches into that section from Helmer and additional track is being laid with the steel that is being taken from the old camp.

Camp 6, at Helmer, and Camps 10 and 11, further up the meadow, are busier than ever and Camp 14, near Avon, will be speeded up as soon as logging horses can be purchased. Old Camp 2 at Bovill is working exclusively on white pine. Most of the logging at Princeton is being done by contract.

Dozens of our young men are now working in the camps. In passing we might state that the camps are kept clean and sanitary, have comfortable beds and an abundance of wholesome well cooked food. The boys say living at the camps is like boarding at the best hotels.—Deary Press.

### Leland Items

The showery weather is hindering the bean threshing. The beans are turning out much better than farmers expected. Many crops were badly damaged by the hail last week, some estimate that they have lost half. Harrison Daugherty got five sacks per acre which is the best we know of so far.

School started Monday with a good attendance. A number of our young people will go away to school this fall, Paul Seeley to the Washington University, Thelma Oylear to Palouse, Alice Winegardner to Genesee, Helen Davis and Lizzie Hund to Kendrick.

James and Miss Edyth Winegardner left Saturday for Genesee where they have positions as teachers in the Genesee school. James is principal of the high school and Miss Edyth will teach in the grades.

Miss Elizabeth Daniels, teaches the Welker school, and Miss Louise Johnson the Agatha school.

Mr. J. J. Weaver and daughter of Lenore, were dinner guests, Sunday, of Rev. and Mrs. Hall. Mr. Weaver and Rev. Hall were schoolmates forty years ago in old Virginia, and hadn't seen each other since then.

The Woodward family were visitors at the R. C. Smith home, Sunday.

Miss Clara Locke, who has been visiting her brother and family, left this week for Vancouver, Wn., where she has a position as teacher in the schools.

Mrs. Archie May came home from the hospital last week and is getting along nicely.

Mrs. Hall was a visitor at the Jeff Flesman home, Wednesday.

Every few evenings there is a certain white horse tied at the gate of a certain home. There must be a reason.

Rev. McCausland will preach Sunday morning, at 11 a. m. and also in the evening at 7 p. m. Mrs. Dean leads the League Sunday evening. Every young person is invited to be present.

Claude Cook took a shot at a big black bear out on Cedar creek last week. It was climbing a bank and looked so large that at first sight Claude thought it was a horse.

Mr. and Mrs. Cook and son, Walter, were dinner guests of Mr. and Mrs. Winegardner, Sunday.

Mr. and Mrs. Floyd Stevens are the proud parents of a ten pound girl, born last Sunday evening.

Wm. J. DePartee has some samples of field corn on display at the Farmers Bank. It was grown on his place on a bench of American ridge and is of exceptional quality. There is about an acre in the patch and it is estimated it will yield 50 bushels.

### Returns From New York

Mr. Joseph H. Johnston arrived in Kendrick Tuesday from New York, to spend a few weeks visiting his home. Mr. Johnston graduated in June from Georgetown University Law College, at Washington, D. C., and plans to return to New York City, by way of Portland and Los Angeles, California, after spending a vacation with his parents, Mr. and Mrs. J. H. Johnston of Lenore.

He reports a splendid crop is being harvested in the Central and Northern states this year. Minnesota and North Dakota have the best crop of wheat in four years. Eastern Montana also seems to have a very good outlook.

The coal strike caused much shortage of coal and many factories in numerous eastern cities are closed, without a prospect of opening soon, owing to the difficulty of transportation which has arisen. In the eastern harbors many vessels are lying at anchor and have been since the early summer, because of the difficulty of obtaining coal to operate them. Unless a satisfactory adjustment is soon reached in the railroad strike many disinterested persons will feel it severely during the coming winter.

### Big Bear Ridge

Miss Johanna Hesby of Deary was the week end guest of Miss Bertina Forest.

Mr. and Mrs. O. V. Morey and daughter, Miss Bessie, returned home from Spokane, Monday, having visited with their daughters, Misses Rena and Ollie.

Joseph and Miss Agnes Rogstad of Clarkston, and Mrs. Gordon Henderson of Walla Walla spent Saturday and Sunday with their brother, Arthur.

Mr. and Mrs. J. C. Carlson of Moscow, former residents of the ridge, were visiting at the A. Hooker home last week.

Mrs. Will Elliott and children departed for St. Maries, Thursday, to remain during the winter, as the children will attend school there.

Mr. and Mrs. Dewitt Penland returned to Lewiston, Monday, having visited with Mrs. Penland's parents, Mr. and Mrs. A. Kleth.

Mr. and Mrs. R. W. Bigham and son, Kenneth, and Gertrude Harris of American ridge, were visiting friends here, Monday.

Mrs. Ida Comstock and granddaughter, Miss Ruth Babcock returned to St. Maries, Thursday, having visited relatives and friends here.

Rev. and Mrs. H. Himle of Spokane, were week end guests at the Ole Lien home.

Confirmation services will be held at the Lutheran church, Sunday, September 10th, at 10:30 a. m.

Mr. and Mrs. Ed Halseth and children were Sunday visitors at the Pete Halseth home near Deary.

Miss Johanna Hooker spent Sunday with friends in Moscow.

Gust Hanson returned from Lewiston, Saturday, where he spent the summer.

Born to Mr. and Mrs. A. W. Jones September 3rd, a ten pound daughter.

Lief Field of Moscow is spending the week here.

The Fancy Work Sale and "ice cream social given by the Girls' Sewing club at the community hall, Saturday evening, was very well attended. It proved a success financially as well as socially. The fancy work sale netted \$63.15 while over \$28.00 was taken in for the sale of ice cream, cake and coffee.

The girls wish to thank all who helped make this a success. The usual generous bidding was no exception to this community, and it was greatly appreciated by the club.

### T. F. Schumacher

T. F. Schumacher of Juliaetta died suddenly at his home last Saturday evening of heart trouble. He had been apparently in good health and had done his usual day's work on his farm. He was sitting in his chair visiting with his daughter, when death came, painlessly and without warning. He was 65 years of age. Funeral services were held Tuesday at Moscow and interment made in the Moscow cemetery. Mr. Schumacher was Mrs. G. A. Morton's father.

### No Labor Shortage

Star-Mirror: With the release of the harvest hands from the threshing crews over the country the labor shortage that has for a time restricted operation in other fields of endeavor locally has been considerably eased up, say men in a position to know the situation.

A few weeks ago it was next to impossible to get men for any work other than that of harvesting and they were not readily available in that field. As a result the city construction on streets and sidewalks and other works were halted temporarily.

However, since the fall wheat of the outlying districts is virtually all in the stack a steady stream of laborers has been pouring into the city until now the supply of workers is adequate to care for the needs.

Another condition that made the labor needed hard to get was occasioned in connection with the operation of railroads with non-union help. The railroads offered workers attractive opportunities with housing accommodations. This removed from the district considerable numbers of men who would otherwise have been available for domestic labor.

However, only during the harvest season did this situation especially affect the local industries when there was a large demand for laborers on the farm as well as in other industries. With the letup in the harvest fields the shortage has virtually disappeared.

### M. E. Church Notes

Next Sunday begins a new year in our church, and we hope to see all the services well attended. Let every teacher make a special effort to rally the classes for a full attendance for Sunday school. Rally Day will soon be here, and we must plan for it.

The Epworth League is planning an unusual meeting at an unusual hour, 7 o'clock. A special feature will be the dramatization of "Thanksgiving Ann", with the following characters:

Thanksgiving Ann - Elsie Bird  
Silas - Wilson Rogers  
Mr. Allyn - Arthur Pickering  
Mrs. Allyn - Hazel Stanton  
The children - Edna and Juanita Stanton.

There will be no preaching service in the morning in Kendrick, as services will be held on American ridge.

Prayer service Thursday evening at 7:30 o'clock.

### Couldn't Collect Insurance

But a small per cent of those who had crops damaged last week by the hail, will collect hail insurance. A clause in hail insurance policies states that the policy is in force only so long as the crop is standing. As soon as it has been cut insurance ceases to be in force. Nearly all of the growers on Potlatch ridge had cut their grain and beans and so could not collect insurance. Dave Schaeffer near Cameron perhaps came out as well as most as his beans were standing in the field and he collected insurance on a basis of 85 per cent damage, or \$25.50 per acre.

### Hail Played Havoc

It is reported that a child of Ted Roberts on the lower point of Potlatch ridge almost lost his life in the hail storm last week. He was caught out in the storm and before he could reach shelter he was badly bruised by the hail stones. A horse belonging to Melvin Miller became crazed with fright by the pelting hail stones and plunged into a fence. A stake penetrated his heart and killed him instantly. Raleigh Albright had to get new roofing for his buildings. He also lost 12 acres of melons. The prune crop in the hail area was practically a total loss. Potlatch ridge and Potlatch canyon were hit hardest and suffered most damage.

### Eichner-Simpson

Miss Lulu Eichner, daughter of Mr. and Mrs. Claus Eichner of American ridge, was married last Saturday to Mr. Gerald E. Simpson. The wedding, which took place in Moscow, was a complete surprise to the many friends of the happy couple.

Miss Eichner's girlhood was spent on the farm on American ridge, where her parents have lived since early pioneer days. She has for several years been employed as book-keeper at the J. Alexander store at Lewiston.

Gerald Simpson is a native son of Idaho, having spent the greater portion of his life in Lewiston, where he graduated from high school three years ago. He is now employed by the Mason-Ehrman company as traveling salesman.

Mr. and Mrs. Simpson will make their home at 814 Eighth street.

### Presbyterian Church Notes

The Presbyterian church has experienced a very profitable summer's work under the leadership of Rev. G. A. Morton, in spite of the unusually hot summer.

The D. V. B. S. held jointly with the Methodist church as a community school was very successful and profitable to the community.

The Sunday school has discovered several excellent leaders and the membership has grown materially during the summer. Much enthusiasm is shown and we are in hopes of doing good things for Kendrick since the cooler weather is here.

Preaching service arrangements are not completed but plans are on the way to provide services at least every two weeks this fall and winter. The work of the Sunday school and junior Endeavor will continue every Sunday at the usual hour of 10:00 and 3:00 respectively.

### Lewiston-Clarkston Fair

The settings for the Lewiston-Clarkston Tri-State Fair and Round-up, which opens next Tuesday, are complete according to reports from the Lewiston office. All resources of the Central Idaho and Eastern Washington country will be represented by comprehensive exhibits. These will be supplemented by the exhibit furnished by the United States Department of Agriculture, and round these substantial features will be provided a most elaborate and entertaining program.

It is proposed to have lectures and demonstrations in the various departments during the forenoon and at 1:30 o'clock each afternoon the program before the grandstand will begin. Indians, cowboys, cowgirls, the best racing horses of the northwest circuit, Roman standing races, chariot races, relay races, and bucking contests are only a part of what the Lewiston-Clarkston fair management is offering.

The show has been built on a standard that has won the recognition of the railroad companies, and all lines running into Lewiston are this year offering a special rate of one and one-half fare for the round trip.

### Nelson-May

Mrs. Rose Nelson and Mr. Warney May, both of American ridge, were married at Moscow last Tuesday afternoon by Probate Judge Nelson. The wedding came as a surprise to their friends in this community. Immediately after the ceremony Mr. and Mrs. May left for Spokane for a short wedding trip.

Mr. and Mrs. May will make their home on the farm on American ridge, where they have extensive land interests. Their friends throughout the community extend best wishes to them.

Dan Guy drove to Grangeville, Wednesday. His father and mother and Milton Odem accompanied him. They will visit at the Jack Odem home.

### American Legion Notes

NEW ORLEANS—New Orleans is preparing an effective answer to the well known Army question. "When do we eat?" The reply will be ready for thousands of members of the American Legion, who come to the Crescent City for that organization's annual national convention, October, 16-20.

Delectable old-time Spanish and French creole dishes, instead of the ordinary victuals on the menu will appease the appetites the restaurant men say.

Descendants of creole cooks and those whom they taught the mysteries of preparing famous dishes will concoct the "gumbo flet", jambalaya "courtbouillon", "entremets" and "creole desserts" especially for veterans at the convention.

French drip coffee, aptly termed "morning joy", will be served, it is rumored, early in the morning at the visitor's bedside.

BOISE—Last winter the American Legion of Idaho found jobs for more than a thousand unemployed ex-soldiers. It is believed that conditions for the coming winter will necessitate a continuation of this work on the part of the Legion, and each post is being urged to make preparations to see that every veteran has a job.

BOISE—In order to take care of 150,000 Legionnaires, New Orleans during the National Convention will requisition every available room in hotels and lodging houses. In addition there will be erected a tent city and the railroads will maintain pullman cities in the yards. The prices of a place to sleep range from 25 cents to \$2.50 per day.

BOISE—The school children in the State of Idaho will have until October 6 to present their essays on "How the American Legion can best serve the Nation." This extension is in order to give the students an opportunity of consulting with their teachers. Prizes as follows will be given winners: National, first \$750.00, second 500.00, third 250.00. To be used for scholarships.

State, first Silver Medal, second Bronze Medal. The essay must not be over 500 words in length and should be constructive and affirmative rather than negative. Any boy or girl between the ages of 12 and 18 may compete. All essays must be in the hands of the County Superintendent of Schools not later than Oct. 5 who will select three judges to choose the best essay in each county and forward them to the Department Americanism Officer, Paul Davis at Boise, who will turn them over to three state judges selected by the state superintendent of public instruction. The three best essays from these will be forwarded and entered in the national contest. The national winners will be announced during November.

### What Happened to Bertha?

Twenty years ago, Bertha, Minnesota, was little more than a "talk town", the country around it a howling wilderness of stumps. Today you find modern improvements, fine modern stores, churches, schools, prosperous well-dressed people. What made the change? It was the dairy cow, says an exchange.

A recent annual report of the Bertha Creamery gave the names of 104 patrons to whom the creamery paid during one year more than \$1000 each for their butterfat. Again, the average payments to each of these 104 patrons that year was more than \$1500—\$13,000 of new money rolling into that little community every month—\$156,000 every year. Think of that, you bankers, farmers and merchants, in communities where "times are hard", "money is tight", "collections slow."

Mrs. Edgar Long left Wednesday afternoon, for Spokane to visit friends.

A negro mammy had a family of well-behaved boys, and one day her mistress asked, "Sally, how did you raise your boys so well?" "Ah! tell you, missus," answered Sally. "Ah raise dem boys with a barrel stave, an' Ah raise 'em frequent."

## One Big Shoe Week

Commencing Saturday, Sept. 9 to 16

During this week we are going to feature shoes for the entire family. The fact that our shoe sales are increasing by leaps and bounds is proof that this store is the logical place to buy all leather shoes at low prices.

### FREE! Silk Hose!

With each pair ladies pumps over \$3.90, 1 pair \$1.25 silk hose FREE!

### Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.

Subscription \$1.50 a year.

Foreign Advertising Representative  
THE AMERICAN PRESS ASSOCIATION

How much does it cost you to run your car? The Lamp, magazine published by Standard Oil company of New Jersey, says that—on the average—\$100 spent by an auto owner goes as follows: Oil and grease, \$1.12 gasoline, \$10.26; tires, \$10.42; depreciation, \$15.38; repairs, \$42.17; miscellaneous, \$20.05. If these figures are accurate, every time you buy \$1 of gasoline your car has depreciated in value about \$1.50.

Tennessee is trying out a law to protect fool drivers from getting killed by the trap. It places a "Thank-you-ma'am" about 100 feet before each railroad crossing, of sufficient height to make every car slow down while crossing it. Another plan is to erect concrete ridges parallel and in the road. These ridges have a rather sharp crook in them. A car at slow speed can go thru without any bump, but at high speed would strike the ridge, cause such a jolt that a driver would never want to try more than once. It is figured that a fool driver will not speed up and try to beat an oncoming train if he has to slow down and give his sober attention to his driving.

Only 10 per cent of the farmers got back their cost of operation in 1921. Their returns were only 3 per cent on the outlay. The agricultural conference brot out these facts. Farm earnings in 1920-1921 represented between \$416 and \$460 a family for each working farmer. The striking miners and shoemen all do better than this. The farmers return last year was less than the lowest union wage scale.

The best method to bring prosperity to this community and get on a sound business footing is for everybody to pay his bills as far as his resources will permit. If those who are in a position to pay, would do so, it would greatly relieve financial conditions and there would be no such thing as "hard times" in this community. It might require sacrifice on the part of most everyone to square up, but the better conditions resulting therefrom would be worth the cost. Of course there are some who are not in position to square up, but these could easily be carried another year if the more fortunate ones would get their money in immediate circulation.

### Just Like a Boy

Here's a bit of real boy. Archie, 5 years old, had found a cat and given it the name of Mary. "Why did you give it a girls name?" "Well," replied the youngster, "I saw her washing her face and she washed her ears and she washed behind her ears, and nobody but a girl cat would wash behind her ears."—Boston Transcript

A news butch on a train was a rare salesman. He used his head. "Have some peanuts, popcorn?" he asked an old lady. She smiled, said, "Young man, I have no teeth." "I'm sorry, lady, but I have some excellent gum drops," he said.

### "Lahoma"

"Lahoma" is a story of the early days in the territory now known as Oklahoma. Every man, in those days, was a maker of history. The country now comprising Oklahoma was, in 1880, at the time the story opens, known as No Man's Land. It was set aside as Indian country and white settlers were forbidden to locate on it.

A picturization of John Breckenridge Ellis's novel of the same name, "Lahoma" depicts in vivid manner the adventure and romance of white settlers on the forbidden land. Brave-hearted and courageous were these men and their women-folks. Pioneers in a new country where dangers lurked at every turn, they blazed the trail to civilization.

The central figure in the story is a girl, beautiful Lahoma, a waif who is brought up in the Western hills by two kind old men, one an outlaw and the other a cynic. They are like doting mothers in their tender care of the girl. A pretty little romance is introduced when Lahoma falls in love with a young cowboy, who is looked upon with disfavor by her guardians.

At the New Kendrick theater, tonight and Saturday.—Ad.

### PRESBYTERIAN CHURCH

Sunday school 10:00 a. m.

A class for all.  
Junior Endeavor 3:00 p. m.

### MEN WANTED

The Northern Pacific Railway Company will employ men at rates prescribed by the U. S. Railway Labor Board as follows:

Machinists.....70c per hour  
Boilermakers...70c to 70½c per hour  
Blacksmiths.....70c per hour  
Electricians.....70c per hour  
Sheet metal workers...70c per hour  
Freight car men.....63c per hour  
Stationary engineers... Various rates  
Stationary firemen.... Various rates  
Passenger car men... 70c per hour  
Helpers, all classes... 47c per hour

Mechanics and helpers are allowed time and one-half for time worked in excess of eight hours per day.

Young men who desire to learn these trades will be employed and given an opportunity to do so.

A strike now exists on the Northern Pacific Railroad.

Apply to any roundhouse or shop or superintendent.

J. L. DeForce, Superintendent.

Northern Pacific Railroad  
Spokane, Wash.

Manager Olsheld of the New Kendrick announces that he has just closed a contract for top-notch feature pictures, the same being shown on Tuesday nights of each week as well as feature pictures on Friday and Saturday, assuring our Tuesday night patrons a show of equal entertaining value as the week-end features. 36-1b

### PARIS GREEN FOR POISONING

Mixed With Hydrated Lime It Should Be Dusted on Foliage While Dew is on Plants.

In using Paris green for poisoning biting and chewing insects, that is the type that bite off and chew up their food, apply 1 to 3 teaspoons of the Paris green to 6 tablespoons of dry hydrated lime. Dust this on the foliage of plants while damp with dew. Paris green will not dissolve in water and hence is not suitable for spraying unless the sprayer agitates the mixture constantly.

"Lowered your score, eh?"

"No. Better than that. Stuck  
the club tightwad for lunches."—  
Detroit Free Press.

**MEXICAN BEETLE  
SPREADING FAST**

Already Established in Several  
Southern States and Expect-  
ed to Migrate North.

**RESISTANT CROPS WILL HELP**

Insect Feeds on Many Table Beans  
and Other Legumes—No Satisfac-  
tory Means for Control Has  
Been Discovered.

(Prepared by the United States Department  
of Agriculture.)

Cropping and cover-cropping meth-  
ods in the South are likely to be rad-  
ically affected if the Mexican bean  
beetle lives up to the predictions  
made by the bureau of entomology of  
the United States Department of Ag-  
riculture. It is expected that the  
bean beetle, which is already estab-  
lished in 36 Georgia counties, as well  
as in 35 in Alabama, 34 in Tennessee,  
2 in Kentucky, 2 in North Carolina  
and 3 in South Carolina, will prob-  
ably be distributed southward, and  
westward to the Mississippi river, as  
well as following the main direction  
of spread, northward to the Michigan  
and New York bean areas. At points  
in Tennessee where it was found only  
after close inspection in 1921, the  
beetle is now causing great concern  
among growers.

**Aids in Solving Problem.**  
A study of the situation and some  
experimentation in advance, in plant-  
ing resistant crops, are recommended  
as aids in solving the problem for the  
fruit grower and general farmer. Cer-  
tain legumes, including the mung  
bean and the horse bean, have been  
found resistant to the bean beetle.  
The immature beetles or grubs do not  
feed on the velvet bean, and the adult  
beetles often starve if no other food  
is present.

The food plants of the Mexican  
bean beetle are so important as soil-  
ing and green-manuring crops in the  
farm practice of the southern states  
that the future of southern agriculture  
is seriously imperiled. The insect  
feeds on many table beans and other  
legumes, including snap, lima, pinto  
and navy beans, soy beans, hyacinth  
beans, cowpeas and cultivated beggar-  
weed, and occasionally on sweet clo-  
ver and alfalfa. In Colorado and  
other western states where the Mex-  
ican bean beetle has existed for years  
the attacks have been confined prac-  
tically to table beans, and not over  
two generations or broods are pro-  
duced annually between June 18 and  
September 15. In Alabama, however,  
four and even five generations have  
been observed with continuous breed-  
ing from the latter part of March to  
the first of November. If the bean  
beetle gains a foothold in Florida  
from five to seven generations might  
be expected.

**Study Made of Pest.**  
The bureau of entomology main-  
tains a laboratory at Thomasville, Ga.,  
in addition to the one at Birmingham.

Adult Mexican Bean Beetles at Work.

Ala., for the study of this pest. No  
satisfactory recommendations for con-  
trol, other than changes in cropping,  
have yet been worked out, although  
the department has been studying the  
problem since the discovery of the  
pest in Alabama in 1920. The Mex-  
ican bean beetle threatens to become  
even more serious in effect than the  
gypsy moth, the hessian fly, the Eu-  
ropean corn borer or the boll weevil.  
The total money value of crops de-  
stroyed is not less than \$100,000,000  
annually, of which damage to table  
beans alone is at least \$50,000,000.

**TIME TO CUT SWEET CLOVER**

If Allowed to Blossom and Mature  
Stems Get Woody and the Leaves  
Will Shatter Off.

As a rule, sweet clover should be  
cut just as the blossom buds appear,  
because if allowed to blossom and ma-  
ture the stems get woody and the  
leaves shatter off. The height of cut-  
ting is important. In order to get a  
second crop the second year the first  
crop of the second year's stand should  
be cut eight inches above the ground.  
This is because the plant does not  
propagate from the crowns at this  
time, as alfalfa does, but from buds  
on the lower portion of the stalks. So  
if the first crop in the second year is  
cut too low so as to nip off those lit-  
tle branches that bear the shoots,  
there simply will not be any second  
growth.

**PROPER METHOD OF FLY CONTROL  
IS TO PREVENT MULTIPLICATION**

A Fly-Trap That Kills the Larvae—The Manure is Stored on a Slatted Rack  
Above a Concrete Pit Containing Water—Larvae, Following Their Tendency  
to Burrow Downward, Pass Through Manure and Fall into Water.

(Prepared by the United States Department  
of Agriculture.)

Fly-traps have a distinct place in the  
control of the house fly and other  
noxious fly species, although the lim-  
itations of fly-traps must be recog-  
nized and other methods of control  
also practiced. The bureau of ento-  
mology, United States Department of  
Agriculture, points out that the logical  
method of fly control is to prevent  
multiplication, by proper attention to  
breeding places.

The two main ways in which fly-  
traps are valuable are by catching  
flies that come to clean premises from  
insanitary places and by capturing  
flies that have escaped from other  
means of destruction. Nearly all fly-  
traps are made on the same general  
principle, although they may appear  
quite different. The flies are attracted  
by bait, odors, or light into a cage  
with a large entrance and an exit too  
small to be easily found, which is  
often made by using a cone-shaped  
passage.

**Two Chief Classes of Flies.**

There are two chief classes of flies  
that can be caught in traps—those  
that breed in animal matter or become  
a pest to live stock, and those that  
breed in vegetable as well as in animal  
matter. The former consist mainly of  
the so-called blow-flies, including the  
screw-worm fly; in the latter group  
the house fly is by far the most im-  
portant. It is attracted to almost any  
moist material, especially that having  
an odor.

The general principle involved in  
nearly all fly-traps is modified to fit  
different conditions, as in the window  
trap, which catches the flies as they  
endeavor to enter or leave a building;  
The garbage can trap, and the manure  
box trap, which retains flies bred from  
infested manure already in the box.  
Light is an important factor in the  
success of all traps, for flies have a  
marked tendency to go toward the  
light.

While many commercial traps are on  
the market, anyone with a few tools  
can construct traps at a small frac-  
tion of the sale price of ready-made  
ones. The conical hoop trap, which  
appears from extensive tests to be  
most effective, durable, easily made,  
and repaired, can also be made quite  
cheaply. It consists of a screen cylin-  
der with a barrel-hoop frame contain-  
ing a screen cone inside. The total

retail price, is about \$1. If only wire  
and tacks are bought the cost should  
not exceed 80 cents.

A modification of this trap that can  
be made more quickly and with fewer  
tools is suggested. The tent trap is  
not considered as effective as the  
conical type. Any good trap may be  
used over a manure box, which must  
have a hole cut in the top. The trap  
is fitted closely over this hole to catch  
flies bred in the manure.

**A Trap for the Window.**  
A type of modified tent trap may  
be used in a window. It is adaptable  
also to barns and buildings where  
foodstuffs are prepared. It is advised  
that properly baited traps to catch  
screw-worm flies be used near water-  
ing places and where cattle congre-  
gate.

In choosing bait for fly-traps it  
should be remembered that fermenta-  
tion renders the material attractive.  
A mixture of cheap "black-strap" mol-  
asses and water is an economical and  
effective bait for the house-fly. One  
part molasses is mixed with three  
parts water. Sugar-beet or "stock  
molasses" is fairly attractive in re-  
gions where it is produced. Brown-  
sugar syrup allowed to ferment is good  
if mixed in the proportion of one part  
brown sugar in four parts of water.  
A small amount of vinegar added has-  
tens fermentation. If honey bees are  
attracted by this bait some other kind  
should be used. Milk on dairy farms

A Good Catch

is the next choice to cane molasses as  
a cheap and convenient attractant.  
The curd from the milk combined with  
brown sugar and water is a very good  
bait. The best bait containers are

gives a delightful  
quality that can  
not be duplicated

Flies Enter This Trap at Bottom  
Where There is a Shallow Pan of  
Bait.  
cost of the material, if bought new at

broad and shallow rather than deep.  
Traps must be properly cared for and  
placed in suitable locations. The bait  
containers must be kept well filled and  
also frequently washed out. Traps  
should be emptied of dead flies at  
least once a week.

Sticky fly papers and poisoned baits  
have their uses in fly control as well  
as traps, and it is advised that Farm-  
ers' Bulletin 851 be consulted for fur-  
ther information on house-fly control,  
and Farmers' Bulletin 857 for addi-  
tional measures to be used against the  
screw-worm fly and other flies infest-  
ing wounds in stock and those that  
blow soiled wool in sheep.

**EXHIBIT GOOD AND BAD PIGS**

Boys' and Girls' Clubs in California  
Community Show Results of  
Proper Feeding.

At an exhibit held recently at the  
close of a pig club conducted by the  
boys' and girls' club agent in River-  
side county, California, both good and  
bad types of pigs grown by club mem-  
bers were shown, with initial and  
final weights, feeds, costs, and gains  
of both types. Two pigs out of the  
same litter, each fed 150 days, were  
entered; one gained 70 pounds at a  
cost of 18 cents a pound, the other  
gained 200 pounds at a cost of 9  
cents a pound.

The Key that Unlocks the Door to Long Living.

The men of eighty-five and ninety years of age are not the rotund, well-fed, but thin, spare men, who live on a slender diet. Be as careful as he will, however, a man past middle age will occasionally eat too much or of some article of food not suited to his constitution, causing indigestion or constipation, and will need a dose of Chamberlain's Tablets to move his bowels and in vigo-rate his stomach. When this is done, there is no reason why the average man should not live to a ripe old age.—Ad.

## LEADING BREEDS OF GEESSE FOR MARKET

Toulouse and Emden Are Most Popular in This Country.

All Utility Breeds Are Kept for Production of Flesh and Feathers—African Is Rapid Grower and Matures Early.

Six breeds of geese have been admitted to the American standard of perfection, namely, Toulouse, Emden, Chinese, African, Wild or Canadian and Egyptian. In addition to the standard breeds there is the so-called mongrel goose, which is a hybrid made by crossing one of these varieties, or the common goose, with wild geese. Crosses of the varieties of geese, especially of the Toulouse and Emden, are occasionally made, but without any apparent gain. The Toulouse, Emden, Chinese and African are easily the

A Toulouse Gander.

most popular breeds of geese in this country, the first two greatly leading the other breeds. All utility breeds of geese are kept primarily for the production of flesh and feathers; and although their eggs are occasionally used for culinary purposes on the farm, there is no demand for them for food purposes in the markets.

The Toulouse, the largest of the standard breeds of geese, is a good layer, producing from 20 to 35 eggs a year, is docile, grows rapidly, and makes a good market bird. However, its dark pinfeathers make it a slightly less attractive market goose than the Emden.

The Emden, a large white goose, slightly smaller and with somewhat longer legs than the Toulouse, is only

a fair layer and is usually less prolific than the Toulouse. This breed has white pinfeathers, is a rapid grower, and matures early.

The African, a gray goose with a distinct brown shade, about the size of the Emden, is a good layer and makes a good market goose, although it has the objectionable dark pinfeathers. It is a rapid grower and matures early.

There are two standard varieties of Chinese geese, the Brown and the White. Both varieties mature early and are said to be prolific layers and rapid growers, but shy and rather difficult to handle.

### WISE TO BURN DEAD ANIMALS

Big Bottle Flies Breed in Decaying Animal Matter and Depredations Cause Loss.

The big bottle flies are abundant in warm weather. There are several kinds of flies that infest wounds on animals, and all of them breed in decaying animal matter. The bureau of entomology tells us that if all dead animals could be disposed of properly, no cases of infestation of living animals would occur.

A wound on a fine bird often causes death because of the depredations of these flies. It is not unusual for a bird to be in bad shape before the owner knows it is hurt. The only safe way is to burn dead animals, and disinfect a wound promptly. Limber neck has been traced directly to the eating of carrion by the victim.

## CONTROL CHINCH BUGS BY SPRAYS

Countless Millions of Insects May Be Destroyed by Use of Nicotine Sulphate.

### BULLETIN OUTLINES SCHEME

Three Periods When Pests May Be Destroyed Most Effectively—Co-operation Among Neighboring Farmers Most Essential.

(Prepared by the United States Department of Agriculture.)

Barriers of various kinds are one of the most effective ways of controlling chinch bugs at wheat harvest time when they migrate from the smaller grain fields to the row-crop fields. Countless millions of the bugs may often be destroyed also by using nicotine sulphate spray in the wheat stub-

ble, immediately following the binder. How to fight this pest by these methods is described in Farmers' Bulletin 1223, The Chinch Bug and Its Control, by J. R. Horton and A. F. Satterthwait, scientific assistants in cereal and forage insect investigations, bureau of entomology, United States Department of Agriculture.

There are three periods, the bulletin states, when chinch bugs may be destroyed most effectively: In November and December, by burning or plowing down their hibernating places; in May and June, by spraying in wheat fields with oil-emulsion nicotine sulphate, and trapping in barriers, following by spraying in marginal rows of corn, if necessary; and in September, by plowing corn stubble deeply before the bugs have gone to winter cover.

Chinch bugs spend the winter largely in bluestem and other bunch grasses in pastures, neglected fields, roadsides, sunny hill slopes, and similar uncultivated places. These should be burned over in November and December, and unused areas kept as clean as possible. The bugs leave their winter quarters in early spring, migrating to fields of wheat, oats, and other small grain until it is nearly ripe and then attacking the corn and other row crops. Trap strips of millet, oats or rye should be placed between the winter quarters of the chinch bugs and the nearest fields of small grain.

Fully \$46,000,000 worth of wheat, corn, oats, grain sorghum and broom corn is destroyed annually by chinch bugs. They occur over the entire United States east of the Rocky mountains, so that there are few climatic

Chinch Bug.

conditions which they are not able to withstand. Fungous diseases and parasitic enemies of the chinch bug are of little help in reducing its numbers.

Aggressive work against these insects is more profitable than defensive work, the bureau of entomology believes. Co-operation among neighbor-

ing farmers in ridding their fields of chinch bugs by spraying is absolutely essential. If the bugs are destroyed in one field but unmolested on a neighboring farm they will quickly reinvade the territory from which they were banished.

Farmers' bulletin 1223 describes the newest and most effective machine and hand sprayers and gives formulas for the insecticides of greatest value. It may be obtained by writing to the United States Department of Agriculture.

### CAPONS BRING HIGHER PRICE

Meat is of Finer Flavor Than That of Cockerel and Will Be Produced at Less Cost.

Capons will produce fifty per cent more growth during the same period than will cockerels. More than that, the meat will be of a finer flavor; it will be produced at a lower cost, due to ease of fattening, better endurance of close confinement, and more docile disposition; it will also sell at a higher price.

### PROFITABLE POTATO SPRAYS

Where Blight is Prevalent Fifty to One Hundred Bushels Increase Per Acre is Expected.

Potato spraying can be made profitable in almost any part of the country. Where blight is prevalent, fifty to one hundred bushels per acre increase may be expected from proper spraying, and even in the absence of blight twenty-five to forty per cent increase in yield is not unusual.

Some Are Built So That Sides May Be Raised for Needed Shade During Hot Weather.

Some producers build individual hog houses with sides that may be lifted to provide an increased amount of shade during the summer months. This plan furnishes shade for hogs where only a few are kept.

After seeing what some sellers have left in this world, it's no wonder that their departed spirits never return.

#### IN ERUPTION MANY MONTHS

Last Exhibition of Activity of Lassen Peak Was in 1914 and Much Damage Was Done.

Lassen peak, in the Lassen Volcanic National park, northwestern California, is the last exhibit of activity of the dying volcanism of the Cascade mountains, the Detroit News states.

Lassen peak broke its long sleep in the spring of 1914 with a series of eruptions covering a period of nineteen months. May 22, 1915, occurred the greatest eruption of the series. A mushroom cloud of smoke burst four miles up in the air. The spectacle, one of grandeur, was plainly visible even from the Sacramento valley.

Another interesting phenomenon was the blast of superheated gas which swept down Lost creek and Hot creek valleys. For ten miles it withered and destroyed every living thing in its path. Large trees were uprooted. Forests were scorched to a cinder. Snowfalls were instantly turned into water, and flooded the lower valleys with rushing tides.

#### The Ideal Purgative

As a purgative, Chamberlain's Tablets are the exact thing required. Strong enough for the most robust, mild enough for children. They cause an agreeable movement of the bowels without any of that terrible griping. They are easy and pleasant to take and agreeable in effect.—Ad.

#### TUBERCULOSIS FIGHT AIDED BY PUBLICITY

Inspired More Faith in Safety of Foods From Cows.

Statistics Show That Number of Animals Has Increased and Consumption of Milk is Much Greater Than Ever Before.

(Prepared by the United States Department of Agriculture.)

When extensive campaigns against tuberculosis of cattle were launched many persons interested in the dairy business predicted that giving publicity to such conditions would alarm the consumer and reduce the consumption of milk and dairy products. But instead of producing this result, says the United States Department of Agriculture, the increasing efforts to improve the health of herds have inspired more faith in the safety and value of foods from the dairy cow. Hundreds of towns have made tuberculosis regu-

lations to provide for clean herds and to make milk wholesome and publicity has been given to the various kinds of work done by cities, counties, states, and the Department of Agriculture. As a result of this work to improve the health of the dairy cow, statistics show that the number of cows has increased and the consumption of milk is greater than ever before.

In recent months the most encouraging development in the work of eradicating this great cattle disease has been the number of counties that have made a complete clean-up of the herds on every farm. This area work is demonstrating that complete eradication is not a dream but a practical possibility. The expense will be paid for by more efficient herds and better products.

#### THE ROSE OF JERICHO

Pilgrims Told of Its Power to Bloom on Christmas Day.

Blossom Given the Name of Resurrection Flower; Also Called St. Mary's Rose.

SEVERAL varieties of the so-called resurrection plant have appeared among the novelties offered by florists, but the original is the rose of Jericho. Along the shores of the Dead sea, far enough away to be out of reach of the death-dealing vapors and the salt spray, grows this rose, a little plant famed in many a legendary story, which, when ripened, rolls up its sprays and branches into a curious little brown ball.

The desert winds snap off its dry stem and whirl the seemingly dead little ball away over sandy plains, like a feather-weight. After it chances to reach some damp place, in about ten days, the moisture has wrought a miracle for the once dead is alive again, green and growing.

The old-time pilgrims, who brought back this plant with them from the Holy Land, told wonderful tales of its power to bloom out on Christmas day and gave it the name of resurrection flower. Another old legend names it from every spot where they halted to rest.

The dry ball when unfolding drops its seeds, and from these it may be cultivated as an annual. To resurrect these dry balls it is simply necessary to keep them standing in glasses of water, immersed about halfway to the top of their branches. The expansion is merely a mechanical spongelike process.

The botanical name of the rose of Jericho is anastatica, from anastasis, resurrection. There are other species of resurrection plants, but they are not so attractive as their Dead sea relative, which, although it has very little beauty, has an honored place among flowers because of the many fancies and associations it calls up and its peculiar development.—Argus.

#### STATE INSPECTS HATCHERIES

Poultry Industry in Wisconsin Under State Regulation—Certificates Are Given.

The Wisconsin poultry hatcheries are the only ones in the United States which are under state regulation and inspection, according to information collected by the United States Department of Agriculture. Because of the menace to the poultry industry through the sale of young chicks of inferior quality and breeding, the state department of markets and the poultry department of the University of Wisconsin have established regulations and requirements for hatchery flocks and for hatcheries, and those that fill the requirements and live up to the regulations will be known as "Wisconsin inspected and accredited hatcheries and hatchery flocks." A list of the accredited hatcheries and flocks has been prepared and published. Chicks purchased from hatcheries on the list bear the mark of the department of markets, which gives assurance that they are standard bred and from reasonably good egg-producing strains. Inspectors issue certificates to owners of hatcheries and flocks that fill the requirements.

## Schools Are Making Filipinos An English Speaking Race

This is the type of schoolroom that is rapidly making an English speaking nation out of the 10,500,000 inhabitants of the Philippines.

If a teacher in a public school in the Philippines desires to punish a child, she doesn't have to apply the ruler. She simply sentences the offending pupil to remain away from school a few days!

This is the most severe punishment she can inflict, for Filipino children take an almost abnormal pleasure in going to school and acquiring an education. The all-Filipino legislature, in response to the popular demand for "schools, and still more schools," is constantly increasing its appropriations for education, but the schools can scarcely be constructed fast enough to care for the ever-increasing enrollment. The school enrollment is now 892,000 without any compulsory attendance laws. When Dewey sailed into Manila Bay there were 2,100 private schools in the islands. Today there are 6,500 schools and colleges, with 17,000 Filipino teachers and about 1,000 other teachers, 341 of whom are Americans.

The University of the Philippines is the center of learning of the entire Orient, and is the pride of the Filipino people. It has an enrollment of 3,500 students. Santo Tomas university of Manila, older than Harvard, is another famous seat of learning.

The school system includes normal schools, agricultural colleges, twenty-seven farm schools, a nautical school and a school for the deaf and blind.

The Filipino pupil, in addition to learning English and in addition to his regular studies, learns basket making, embroidery and hat weaving, the trades peculiar to the islands, as well as the domestic sciences and pedagogy. There are more positions than can be filled by the trade school and commercial college graduates. The trade and agricultural schools produced \$1,178,850 worth of goods in 1919.

There is nothing that the Filipino people take more pride in and that

they are more grateful to the United States for, than their school system, which has been declared by many competent critics to be one of the finest in the world. While the system was implanted in the islands by Americans, every cent of the cost has been cheerfully borne by the Filipino people. The schools are making an English speaking race of the Filipino nation. English is the official language, and it is declared will continue to be when independence is granted.

"The Filipino boys and girls are well balanced, docile and industrious

University of the Philippines which Has an Enrollment of 3,500 Students.

pupils," says Julius B. Wood, who was sent to the islands by the Chicago Daily News to investigate conditions there. "To attend school is a privilege to a Filipino child or young man, not an unwelcome duty. In the cities those who work days go to school at night.

"Today there is hardly a barrio where youngsters cannot be found who speak English. One-third of the house of representatives and eighteen of the twenty-four senators speak English. In the next election, in 1922, the young men of the new schools will be stepping into control, and the first great goal of the public school system will have been reached."

## Public Auction Sales

Mr. Walks, the auctioneer of Moscow and Pullman, having left the country, I have opened an office in Pullman as well as in Moscow, for the purpose of carrying on my auction business. Due to the fact that I sell practically every day thru the sales season, I would not be in either office very regularly. I have authorized Mr. Geo. Venergerholz to date my sales for me in this territory. The Kendrick Gazette or either bank will be only too glad to make your date thru Mr. Venergerholz.

I have conducted more farm sales than any other auctioneer in the northwest and my references are many satisfied farmers.

#### PROTEIN IN ORCHARD GRASS

Plant Endure Hot Weather Better Than Timothy and Seems to Thrive in Shade.

Orchard grass is a standard grass which endures hot weather better than timothy and also seems to thrive better than most other kinds in partial shade. The objectionable features are its bunched habit of growth and the tendency of the hay it makes to become woody when cut a trifle late. Early harvested orchard grass is good, and carries a little more protein than timothy hay.

## GLEANINGS

Mr. and Mrs. H. P. Hull and niece went to Spokane last Saturday for a visit with relatives.

Miss Florence Hollada came down from Moscow Sunday to spend the day with her mother and sisters.

Prof. and Mrs. A. O. Strauch and little daughter arrived the first of the week and are now at home in the A. K. Carlson residence. Mr. Strauch will teach in the high school here. Their little daughter, age seven, will be in the fourth grade this year. Mr. and Mrs. Strauch are from Water-ville, Wash., but spent the summer vacation at Pomeroy.

A Juliaetta melon grower doesn't intend to take an entire loss on his crop just because the market is dull. He is selecting good melons and gathering the seed, which he believes will sell readily next spring throughout this locality.

Mr. and Mrs. F. B. Smith and family of Peck were in Kendrick on business Saturday.

A. Wilmot and son, Billy, went to Spokane the first of the week to attend the fair. They also visited other points in Washington.

Mr. and Mrs. Stewart Compton and children drove over from Orofino Saturday to spend the week end visiting relatives.

Lester Crocker came up from Clarkston Sunday to spend Labor Day with home folks.

John Brown brought a potato vine, bush or top, to the office last Saturday that is somewhat of a freak. The spuds grow on the tops like tomatoes instead of under the ground like Irish potatoes are supposed to grow.

M. B. McConnell, Elmer Bechtel and Ralph Knepper spent the week end in the Big Island country, leaving Kendrick Saturday evening and returning Sunday night. The fishing was nothing to brag about as a total of forty trout was all the three creels contained. The last seven miles before reaching the river is typical mountain road as it apparently was built with the intention to go over all of the highest points and down into the deepest canyons along the Clearwater. Some of the hills are very steep.

Bob Spencer left last Saturday afternoon for Missoula, Montana, to spend a week with relatives.

Wm. Rogers received a telegram from Spokane last Friday stating that his sister, Mrs. Nora Hazeltine, was not expected to live. He left on the afternoon train, but before he had reached Spokane his sister had passed away. Death followed shortly after an operation. The funeral was held at Spokane at three o'clock Sunday afternoon.

George Brocke purchased a new Gardner car last week through the local agent, O. B. Kinzer. Mr. Kinzer also sold his old model Gardner to Harry Wright and went to Spokane after a new one Saturday.

Miss Edith Dammarell went to Clarkston, Friday to visit Miss Fern Florence for a few days.

Five carloads of sheep were driven in from the Three Bear country last Saturday and shipped to Chicago, where they will be fattened this winter. It will take about seven days to get them to their destination.

Harold Sanders returned to his home in Colfax, Saturday, after spending two weeks with his grandmother, Mrs. Grinolds.

Miss Rose Wolff left last Saturday for Santa, Idaho, where she will teach school. Her school work began Monday.

Miss Ida Smith, who has been visiting her friend Miss Olga Wolff, near Leland, returned to her home at Kennewick, Wash.

Mrs. H. Helpman and son, arrived, Wednesday, from Mullan, to visit her mother, Mrs. Grinolds.

Mr. and Mrs. Jack Jouery arrived the first of the week from Yakima to visit Mrs. Jouery's parents, Mr. and Mrs. J. Bolen. Jack is one of the riders in the wild west show at the Lewiston-Clarkston fair.

Mrs. J. A. Lathrop returned to her home in Clarkston, Tuesday, after visiting her son, Leo Raaberg.

A special train will be furnished by the Northern Pacific for the Spokane Merchants' Associated Trade Extension Tour, to leave Spokane the morning of September 19. The schedule calls for brief stops at all of the important places in the Inland Empire. It will arrive in Kendrick, September 22, for a stop of 20 minutes.

Mrs. F. O. Snow and grandson, of Minot, N. D., arrived last week to visit at the home of Mr. and Mrs. Theo Hanson.

X G. G. Oldfield has closed a deal for the purchase of the F. B. Smith bungalow, now occupied by the John Kite family. He will take possession the first of next week. The Kite family have rented the residence being vacated by the L. J. Herres family.

Otto D. Burns, candidate for prosecuting attorney; Wm. H. Bundy, candidate for assessor; John L. Sanderson, candidate for auditor; all on the progressive ticket of Nez Perce county, were in Kendrick, Friday morning, on their way home from a meeting held at Leland, Thursday night. They all hail from Lewiston.

The town council met in regular session last Tuesday evening. Nothing but routine business was transacted.

Alfred Crow has published his intention to apply for an absolute pardon. He was convicted of embezzlement February 22, 1921 in Lewis county and sentenced to a term of imprisonment of from 2 to 14 years.

Sheriff John L. Woody has moved his family from the farm on American ridge to Moscow, where they will spend the winter.

Rev. Rein and family returned Friday afternoon from their trip East.

J. C. McCrea arrived, Friday, from Coeur d'Alene to visit his brother, W. M. McCrea.

The 3 in 1 oil company, financed mainly by Troy, Idaho, stockholders, has struck oil in the Sweet Grass country in Montana at 1100 feet. G. C. Hoyt, brother of Dr. J. E. Hoyt, is president of the company. Prospects are favorable for a good strike in the near future.

The house which Stewart Compton has occupied was sold a few days ago and it was impossible for him to rent. He is therefore building for himself a four-room modern cottage on Michigan avenue opposite the new J. M. Bryant residence. Contractor D. L. Webb is doing the work and expects to have it ready for occupancy by the tenth of September.—Clearwater Tribune.

Milton Rogers and family visited at the home of Mr. and Mrs. Wm. Rogers the first of the week. Milton and William are brothers.

Miss Mable Bleck went to Spokane, Wednesday, to attend the fair.

A. V. Dunkle left Thursday afternoon for Idaho Falls to attend a meeting of the Masonic Grand Lodge, which convenes there next week. E. W. Lutz, master of the Kendrick Lodge, will leave Sunday to be in attendance at the meeting.

Mr. and Mrs. E. W. Lutz and children and Mrs. Ralph Knepper drove to Moscow Friday afternoon for a brief visit.

Butser Brown returned Wednesday from Alaska where he spent the summer.

Frank Bailey of Texas ridge, who is advertising a public sale for September 12th, expects to move to Clariton this fall to make his home.

Ray Snyder left Wednesday afternoon for Spokane to attend the fair and visit his brother.

The Presbyterian Ladies Aid met in the basement of the church Wednesday afternoon, it being a short business session.

Don McCrea returned home Tuesday afternoon from Potlatch where he has been working. Walter is expected home the first of the week.

Miss Elsie Bird was a Pullman visitor this week.

Mrs. Wm. Rogers and Mrs. J. L. Kelly took little Miss Vivian Wegner to a Lewiston hospital, Wednesday, for an operation for the removal of her tonsils. The little girl is getting along very nicely.

Miss Carrie Bunker went to Tacoma, Thursday, where she will attend school.

Sylvester Stevens returned Wednesday from Winchester, where he has been working.

Mr. and Mrs. Andy Hill and baby were Lewiston visitors the first of the week.

Claus Eichner of American ridge was transacting business in Moscow Wednesday.

Miss Bernice Gentry underwent an operation last Tuesday morning, at the Deconess hospital, in Spokane, for the removal of her tonsils.

Miss Ruth Edwards, graduate nurse of Spokane, arrived the first of the week and was a guest at the home of Dr. and Mrs. Otteraaen.

Will Carlton of Fix ridge bought a Gardner car through the local agent, C. B. Kinzer, Thursday.

X B. E. Callison, Ernestine, Norla, and Miss Babe Hollada left Friday afternoon for Peck in the Callison car. From there they will go to Grangeville to visit at the home of Mr. and Mrs. Jesse Wade. Mrs. Wade will be remembered here as Miss Doris Gregory.

Mr. and Mrs. C. B. Kinzer drove to Milton, Oregon, Wednesday, returning Thursday evening.

Miss Elizabeth Boyd and daughter, Maxine, of Asotin, returned to

her home, Thursday, after spending several days at the home of Mr. and Mrs. E. H. Dammarell. Mrs. Boyd is a niece of Mr. Dammarell.

Will those desiring tonsil and ad-noid work, please communicate with Mrs. Kelley, as a clinic is now being arranged by the Drs. Crampton & Braddock, with two graduate nurses in attendance. 36-1p

### Linden News

X Mr. and Mrs. Earl Langdon and children spent the week end in Juliaetta, at the James Langdon home.

The Misses Eva, Anna and George Smith and Harold Callahan spent Friday evening at the Gilchrist home.

Mrs. S. H. Fry was a Moscow visitor Thursday.

X Rube Garner and Bud Harris went to Lewiston, Saturday, for a load of peaches.

X Len Bailey, who recently returned from California, visited the first of the week at the Allen and Earl Langdon homes.

Mr. and Mrs. Kjoness and Mr. Reardon of Boise visited several days last week with Mrs. Kjoness' brother, Mr. Everett Whistler and family.

A. W. Longtellow was quite sick Friday and Saturday, but is reported better at this writing.

X Mrs. Hattie and Mrs. Pearl Alexander spent Friday afternoon with the Smith girls.

X The Cedar Ridge school opened Monday with Miss Joyce Hunt as teacher.

Elmer Shingler, who has been haresting in the Pullman and Craigmont countries, was visiting home folks Tuesday, returning to Outlook, Wednesday.

Louie Ray of Lenore is staying at the Weyen home and attending school here this winter.

The neighborhood feels quite honored in having Miss Sweeney with us again this winter. School opened Monday with an enrollment of 33 pupils.

A large number of the neighbors gathered at the home of Mrs. Mary Vaughan, Sunday, to give her a surprise farwell, as she left early Monday morning for Milton, Oregon, to spend the winter, where Ted will attend school.

Mr. and Mrs. John Darby are enjoying a visit with Mrs. Darby's parents, Mr. and Mrs. Hammond of Spokane.

## FIGHT TUBERCULOSIS IN VARIOUS STATES

### Campaign Against Great Stock Plague Gaining Impetus.

Many Communities See Possibility of Ending for All Time Drain Upon Their Live Stock Resources —Louisiana in Line.

(Prepared by the United States Department of Agriculture.)

As the possibility of eradicating tuberculosis in cattle becomes apparent to a greater number of people, the campaign against the great live stock plague gains impetus. States and countries that had given little thought to this work from the economic standpoint are now taking it up in a businesslike manner, says the United

The Kind of a Cow That Will Pay Any Farmer.

States Department of Agriculture, because they can see the possibility of ending for all time this drain upon their live stock resources.

The latest state to fall into line for practical tuberculosis eradication work is Louisiana. On June 20 the legislature passed a bill authorizing the state live stock sanitary board to co-operate with the United States Department of Agriculture, and providing an indemnity fund of \$15,000 a year for two years. A small amount of eradication work had been done there before, but because no money was provided for paying indemnities for slaughtered animals almost no progress was made. Since the state has only a light infestation of tuberculosis, estimated by the bureau of animal industry at 1 per cent, it should require only a few years of such appropriations to free the cattle entirely.

Massachusetts, a state that has been spending money to fight tuberculosis of cattle since 1894, recently passed a law enabling the state bureau of animal industry to co-operate with the

### RAPE IS FINE FORAGE CROP

Crop Makes Rapid and Rank Growth and Affords Highly Nutritive Feed for Hogs.

Because of its heavy yielding qualities and high protein content, rape is one of the best of our forage crops, says J. C. Eldridge of the Iowa State college. No hog breeder should be without a small patch of it unless other excellent pasture is provided. Rape makes a rapid and rank growth and affords highly nutritive feed for hogs early in the season and later when the blue-grass pasture is about gone.

Rape may be sown any time until late in the summer. Early planting will insure higher yields, however. Rape is also excellent as an emergency pasture crop when other forages have failed to make a stand. Where it is intended to hog down corn, a good practice is to plant a small patch of rape adjoining the corn field, thus providing a balanced ration for the hogs late in the summer.

Some slight precaution is necessary in handling the rape pasture. It should be pastured only lightly at first and hogs should not be turned in early in the morning when a heavy dew is still on the rape. White or thin-skinned hogs blister in such instances.

Sow rape alone 4 to 6 pounds to the acre. Use the Dwarf Essex variety only, as it has been found to be best for our conditions.

## Weather Rots Unpainted Buildings

Can You Afford to Rebuild in a Few Years?

YOUR investment in buildings depreciates rapidly unless it is protected from the weather by paint.

A rotting building is a heavy expense. It means either costly repairing or total rebuilding. Paint saves this cost. Use paint now.

The next question is what paint to use. Use the best. It costs less in the long run.

The best paint spreads easily—it saves labor cost. It covers more surface per gallon than "cheap" paint.

And the best paint will serve you five or more years longer than "cheap" paint.

So paint your buildings when they

need it and use the best paint. That's a dollar-saving policy.

The best paints are scientific in formula and preparation. We've made them for 73 years—to meet the weather conditions in the West.

The best materials—PIONEER WHITE LEAD, pure linseed oil, pure zinc and pure colors—are combined in Fuller's Paints in scientifically exact proportions with long-time skill.

### Free Advice on Painting
