

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers.

F. W. Dustan, of the Juliaetta cannery was up from Lewiston Wednesday and held a meeting of local tomato growers for the purpose of securing contracts for the coming season and ascertaining about the amount of acreage that will be put out. The meeting was held at the cannery and was attended by quite a number of tomato growers. Everything considered the outlook is very promising for a large tomato output at the cannery this year. Lloyd Anderson who is in charge of the plant states contracts for a little over 27 acres of tomatoes have been signed up by the growers and it is estimated there are enough more that will sign contracts to bring it up to somewhere between 30 and 40 acres which it is believed will be about all that the cannery can handle with the available help during the canning season, provided the crop is as heavy as last year. The contracts are being made on the same basis as last season, \$12.50 per ton. However, it is understood that the growers will be paid more if the market at canning time justifies it. The outlook at the present time is rather promising, it is said, and it may be possible to pay the growers around \$15. per ton this season. The indications, so far are most favorable for an early spring, and in such an event it will enable the growers to get their plants out early and give them a good start before the advent of the summer dry season which should assure a splendid yield, unless adverse weather conditions should prevail during the growing season, and this is not likely.

—Julietta Record.

Mrs. Geo. Boliou on Tuesday received two large coconuts, in their original outside hull from Miss Ethel Richmond, who was formerly a teacher in the Genesee High School, but who is this year teaching at Lihue, Kauai Island, Hawaiian Islands. The nuts are to be presented to the Rebekah lodge with Miss Richmond's compliments. The name and address had been written on the outside hull and the stamps affixed, no wrapping whatever having been used.—Genesee News.

City Dads Met Tuesday

The town council met in regular session last Tuesday evening and transacted considerable important business. All members were present.

The final ordinance for the closing up of the street improvement was read a first and second time. A copy appears in this issue of the Gazette. Practically two hours were spent looking after the details that enter into the closing up of proceedings of Local Improvement District No. 2.

The Board instructed Treasurer Harry Stanton to pay off the remaining \$2,000 bonds against the water system, which puts the water system in the clear with no indebtedness against it.

An ordinance allowing the Continental Oil Co. to run a side tract and underground pipe line to its property was read a first and second time. Also Ordinance No. 98 regarding dray license was amended to cover motor trucks, as heretofore the ordinance failed to mention motor vehicles, it having been passed before the day of horseless wagons.

Two street lights were ordered to be put in. One at the corner of the Walter Thomas home and the other near the Wm. Meyer property.

The Fire and Building Committee was instructed to order four length of new fire hose, and the Clerk was instructed to order a fire siren on trial.

The Board adjourned until 8 o'clock the following morning when the three ordinances were read a third time and passed.

K. H. S. Student Writes

Chemistry is one of the most interesting sciences studied in high school. It is of great importance to any student and not to the exclusive few that are preparing themselves to become doctors or druggists. As a great chemist once said, "the smaller the matter a man can deal with, the more he can get out of it. So long as a man was dependent for power upon wind and water his working capacity was very limited; but as soon as he passed over the border line from physics into chemistry, and learned how to use the atom and the molecule, his efficiency in work was multiplied manifold."

Some years ago when cotton raising became such a profitable industry in the south, the seeds which now constitute two-thirds of the crop, were then wasted, but now methods of using the seeds has increased the cotton crop profits \$150,000,000 at the present time. These methods of utilizing the seeds were founded by some of our first chemists. There are a great many valuable things made from the cotton seed; some of the products include smokeless powder and celluloid. Paper, cattle-feed and fertilizer made from these seeds now bring \$10 a ton, since the hulls which were previously burned have been used. Again, the kernel of the cottonseed is being pressed and the yellow oil taken from them is made into different kinds of oils, and the mealy cake that is left is used as a rich fodder for fattening cattle. The oil is the most valuable part of the cottonseed. After being pressed out of the seed and after being treated with acids and alkalis, by blowing steam through it, etc., it becomes a refined product suitable for table use. It has often competed with the edible oils in this country, and is often substituted for olive oil.

Chemistry is a subject which deals with the composition of materials and with the changes which they may undergo. These changes are so important to every day life that a whole branch of science has been given to their study. Although chemistry is not a required subject in high school, two years must be given to science, and many students take it as their elective.

In the study of chemistry, we find that a substance which has not yet been decomposed into a simpler substance, is called an element, and that all elements are composed of atoms. According to Dalton, a great Greek philosopher, an atom is the smallest particle of an element that can take part in a chemical change. He said that all matter is composed of atoms, that all atoms of a given element are alike and that all atoms are indivisible. This atomic theory is said to be the most useful and comprehensive theory in modern chemistry.

The beginning student in chemistry is always interested in the composition of water, the most familiar of all chemical compounds. It is not too much to say that life without water would be impossible, since it is so important in the production of climatic change and in plant and animal growth. As we all know, water is a colorless and odorless liquid, which when sufficiently heated, changes into a water vapor called steam, and when sufficiently cooled, turns to a colorless solid called ice. Thus water exists in three states, liquid, gaseous, and solid. Water is composed of two volumes of hydrogen and one of oxygen, giving us the formula H₂O. Besides this, chemistry students learn the percentage composition of hydrogen and oxygen in water, the boiling and freezing points, the weights, the distillation and filtration, and a great many things which before they would have thought immaterial.

It would be impossible to enumerate all the different phases taken up in chemistry concerning the things which we see in every day life. The study of electricity is one of the most interesting, but the study of the value of foods, the composition of different kinds of materials, etc., is equally interesting. This entire course is one which would be of great value to any student who would apply his knowledge of chemistry to his ways of living, and to the things with which he may deal.

N. G. A.

Vena Cramer arrived from Moscow Wednesday for a visit with friends here.

Poison Nez Perse Squirrels

The squirrel campaign in Nez Perce County starts Monday, March 5, at Peck, with a series of meetings in each community for the distribution of poison at cost, according to the statement of County Agent Skuse. Although the cost of chemicals is a little higher than last year, the same deposit of \$1.25 per ounce of strychnine alkaloid will be required, and any balance remaining at the close of the season will be prorated back to the purchasers.

One ounce of poison is sufficient to treat eight quarts of oats, and this amount of poison mixture is ordinarily figured as sufficient for eighty acres of land with an average infestation of squirrels.

Deposits can be made with the community leaders of the rodent control project or at the County Agent's office in the postoffice building at Lewiston, personally or by mail.

It is necessary that the funds to cover the cost of the poison be in Boise before the chemicals will be shipped out. All deposits must therefore, both from committeemen or farmers who have sent in deposits direct, be in the hands of Mr. Skuse not later than February 28, so that the poison may be shipped in time to be on hand for the series of distribution meetings.

The deposits made at this time should be sufficient to cover the entire amount of poison needed for the year, as it is doubtful about getting it later in the season.

The Rodent Control Committee for the various communities are as follows: Baker community, E. Chambers, Reubens; Culesac community, J. F. Scully, Sickpoo and James Monroe, Culesac; Gifford, F. T. Myers; Lapwai, L. L. Buchanan; Lenore, J. M. Hanks; Leland community, H. M. Miller, Julietta and Aug. F. Wegner, Cameron; Lewiston Orchards, W. S. Thornber, Melrose community, John H. Berry, Peck; Peck community, J. H. Corn, Peck; Rimrock community, Harry Emerson, Genesee; Southwick, Glen Betts.

Cameron News

The Messrs. George Wilken and W. C. Mielke were Spokane visitors this week.

Miss Woller was a dinner guest Sunday at the home of Mr. and Mrs. Ralph Roberts.

Dave Schoeffler returned Saturday from a visit in Lewiston, with his mother.

The C. S. C. dance last Saturday night was enjoyed by all present. We are proud of the improvement made by the orchestra.

Hank Bleck was a dinner guest at the Jake Newman home, Sunday.

Mr. and Mrs. August Meyer were guests at the W. F. Schoeffler home, Sunday.

Mr. and Mrs. Mushletz of Leland were week end guests at the Carl Hartung home.

We are glad to have William Hartung among us again after his severe illness.

W. F. Schoeffler, Fred Newman, Russell Rodgers and Miss Woller are taking advantage of the cold snap and are laying in a supply of ice.

Rev. E. A. Rein and family were dinner guests at the Carl Hartung home, Sunday.

Miss Woller entertained the following guests at dinner, Saturday evening: Mr. and Mrs. Dave Schoeffler and family, Miss Keller and W. C. Mielke.

Mr. and Mrs. Ralph Roberts were host and hostess for a very enjoyable kid party, Tuesday evening. The evening was pleasantly spent in games. Miss Elsie Wegner won the prize and Otto Kauschke won the "booby" prize. All present can vouch that Mrs. Roberts is a good cook.

School attendance has been greatly diminished by the large number absent because of sickness.

W. J. Johnson of Peck was a week end visitor at the Wilken home.

Gus, Laura and Minnie Blum were the Sunday evening dinner guests at the Brunstiek home.

The Misses Thelma Schmidt and Martha Abitz were Sunday dinner

Death of Mrs. Lukens

Mrs. Melissa J. Lukens, widow of the late Judge C. M. Lukens, of the Latah county probate court and mother of Mrs. Frank Crocker of this place, passed away Monday afternoon at the home of her son, Thomas Lukens, in Lewiston, at the age of 65. Death resulted from an attack of pneumonia. She had been sick but two days.

Mrs. Lukens was born in Henderson county, Illinois, and came west to the state of Washington in 1886, the family locating near Daton. Two years later the family moved to Lewiston, where they spent two years, moving from there to Kendrick, from which place Mr. Lukens was elected probate judge for Latah county in 1902, the family then moving to Moscow, where they lived until 1910, when they returned to Lewiston, where Judge Lukens died six years ago.

Mrs. Lukens had been an invalid since 1893, a period of 30 years, as a result of an attack of inflammatory rheumatism. She bore her suffering with patience and through it all endeared herself to all who had the privilege of knowing her. She was a lifelong member of the Methodist Episcopal church, and, in so far as her health would permit, was a faithful worker.

Four of the six children were privileged to be at their mother's bedside when death came.

Callison a Famous Cook

Last Sunday, at his home on American ridge, Mr. B. E. Callison entertained a number of his bachelor friends. The time was spent in pleasant games and conversation until about 2:30 when dinner was served. "Oh, Boy!" the memory of that "feed" will endure until the sounding of taps.

We can think of no especial praise due any particular dish, for each item was an achievement in ordinary art from chicken to the caramel cake. Dinner was cooked and served exclusively by our genial host and our appetites sure paid tribute to its excellence.

Following is a list of the favored guests: Walt Bigham, Jim Cain, Walt and Harry Benschoter, Kyle Anderson, Ernest Roberts and Nyle Callison, son of the host.—One who was there.

Legion Dance

Canyon Post No. 66, A. L., will give a dance at the Fraternal Temple, Friday night, February 23. Orchestra music and lunch at the usual hour.

More than 500 farmers and breeders raising all kinds of domestic animals answered questions sent out by the United States Department of Agriculture and from these replies it has been determined that these men consider pure bred 40 per cent better from a utility standpoint than common stock. They say that offspring of pure bred are worth practically 50 per cent more in sale value than the offspring of grades and scrubs. Also, pure bred were found in nearly all cases to be more readily salable.

guests at the Blum home.

A. H. Blum was a caller at the Carl Lohman home, Sunday.

The Carl Lohman family have had a mild case of the "flu" but we are glad to report they are all improving.

Mr. and Mrs. Aug. F. Wegner and family, Rev. Rein, Otto and Herman Siffow were visitors at the Blum home, Tuesday evening.

Mr. and Mrs. Mushletz of Leland were the week-end guests at the Carl Hartung home.

Mr. and Mrs. Charles Schultz went to Lewiston, Tuesday where Mrs. Schultz is to receive medical aid.

Little Vern and Cecil Spekter have been sick, but are on the road to recovery.

Herman Meyer returned from Spokane, Monday, where he has been visiting relatives.

Latah Farm Bureau Met

Farmers representing practically all sections of Latah County attended the annual meeting of the Latah County Farm Bureau which was held at the Farmers' Store in Moscow on Wednesday, January 31st. In the absence of Erick Oller, president, A. S. Lyon, of Moscow, was elected chairman of the meeting.

County Agent O. S. Fletcher reported on farm bureau and extension work that had been done in the county during the past year. Special stress has been laid on the livestock, grain improvement, soil and crop rotations, poultry and pest control projects, and some work has been done with potatoes, women's work, and other projects. The county agent also outlined plans for the coming year.

Farmers from all communities represented were called upon by the chairman and reported progress of the past season in their respective communities. George Sievers reported for Moscow community, following which he gave a talk on the benefits to be derived from the farm bureau, county agent work, and co-operation in general. He pointed out that unless the farmers will pull together, and continue to do this, no real progress can be made in bettering conditions in agriculture.

The meeting recognized the importance of marketing as a part of farm bureau work and selected this as a project for the coming year. George Sievers was elected county leader of this project. Women's work was also adopted for the first time as a project, and the executive committee was authorized to select a county leader for this line of work. Other projects adopted were the ones that have been carried on for a number of years. These projects, and the county leaders elected for these lines of work are as follows: Pest control, Frank Benschoter, Kendrick; grain improvement, Crawford Patton, Palouse; soil and crop rotations, A. N. Rogstad, Kendrick; livestock, R. E. Nordby, Genesee; weed control, F. M. Gustafson, Moscow; poultry, J. C. Hamil, Julietta; potatoes, Ivar Dragstedt, Troy; beans, George Davidson, Kendrick; and crop reporting, W. A. Liseus, Potlatch.

The following officers were re-elected for the ensuing year: President, Erick Oller, Moscow; secretary, George T. Davidson, Kendrick; treasurer, F. M. Gustafson, Moscow. A. S. Lyon was elected vice-president. Elmer M. Paulson, member of the Board of County Commissioners, was elected as an executive committeeman at large.

The meeting unanimously adopted a resolution presented by the program of work committee complimenting County Agent O. S. Fletcher, and endorsing him and the work that has been done during the past season by the county agent and the farm bureau.

G. P. Mix, of Moscow, moved that the Latah County Farm Bureau go on record as endorsing the work of the extension division of the University of Idaho, and that the State Legislature now in session be asked to make a liberal appropriation for the maintenance of the extension division. This motion carried unanimously.

Board Pays School Bond

The local school board at their last meeting paid \$5,000 of the \$20,000 bond issue against the school district. The bonds were ten year optional and the ten year period expired last week. The sinking fund to take care of these bonds was only started a few years ago, so only one-fourth of the issue, or \$5,000 could be cared for at this time. The remaining \$15,000 will have to run ten years more before it may be paid.

Ernest Davis arrived from near Lewistown, Montana the first of the week. He had charge of a big cattle camp there last summer and fall. There were 700 head of cattle in Ernest's outfit.

NEWS NOTES FROM KENDRICK SCHOOLS

Events of Interest to School Patrons,

The Basket ball boys are going to Genesee to play, Friday evening. They will make the trip by car, and it is thought that several "rooters" will accompany them there.

A new student, Minnie Riley, enrolled in the freshman class here, Monday, having passed the state eighth grade examinations which were taken here in January.

About an hour was taken up in high school Wednesday when Mr. Kennel from the Kennel Studio of Coifax took several departmental pictures of the school. These pictures will be mounted in books, and will be sold to the students.

The Kendrick boys played the Asotin basket ball team here last Friday. The results were 23 to 29 in favor of Asotin. After the game a party was given by the associated students in the high school auditorium, in honor of the basket ball boys. The entertainment was cleverly arranged into a "College Night", featuring rush week at college. The different forms of amusement made fun for everyone, and the party was a success in every respect.

Of the pupils of the 7th grade who tried the midyear examinations in physiology, three passed, Pearl Johnson, Ellis Carlisle and Hester Knepper. This means that the physiology class must continue until May. Double time had been spent on physiology because of the 8th graders.

Of those in the 8th grade who still had the 7th physiology and 7th geography, only Maude Compton passed both subjects.

Loren Lewis and Arthur Wayland passed the test in 8th history.

Pearl May, Olive Keeler and Othar Thomas passed in geography. Most of the 8th grade still have the two 7th grade subjects and all the 8th subjects to finish at the May examinations. It is a difficult situation, caused by previous failures and lack of application this year. Parents are very earnestly requested to cooperate with the teachers in the matter of evening study period and careful preparation of assignments; otherwise, failure at the end of the year is inevitable.

Eva Moore has entered the fifth grade this week. She perviously attended a Canadian school.

Those in the fourth grade who led in the Curtis Standardized Arithmetic test are: George Bailey, Ella Sturdevant, Helen Clem, Arlos Crocker and Iva Johnson.

Big Sale Going Good

The Big Gregson sale at the Kendrick Store Co. opened Thursday morning under most favorable conditions. The weather was all that could be desired and a crowd that packed the store poured in when the doors swung open at 9 o'clock. With this splendid start it is believed that the sale will be a great success.

Mr. Dammarell has a large force of clerks and they have been busy since the opening of the sale. The sale is under the personal supervision of P. F. Richardson of the Gregson Sales Co.

Valentine Dance

There will be a Valentine Dance on Big Bear ridge at the Community Hall, Friday night, February 16. A 5 piece orchestra will furnish music for the occasion; supper will be served at midnight. Everybody invited.

Mitch Blackburn of the Cavendish country left Wednesday on the afternoon train for Kelso, Wash, where he may remain for some time.

Chamberlain's Tablets For Indigestion and Constipation.

"The nicest and pleasantest medicine I have used for indigestion and constipation is Chamberlain's Tablets," writes Melard F. Craig, Middle Grove, N. Y. They work like a charm and do not gripe or leave any unpleasant effect.

GLEANINGS

Rev. Wm. T. Russell will hold services at the Presbyterian church for next Sunday at 11 o'clock a. m. Mr. Russell states that his wife, who has been quite seriously ill, is at a Lewiston hospital and will probably have to remain there for a number of weeks. He thinks that her condition is some better.

Miss Manila Hanson who is attending the university spent the week end here with her parents.

W. M. McCrea went to Spokane Tuesday where he will attend the Hardware dealers' convention which is in session there this week.

Miss Manila Hanson is a charter member of the Chi Beta Epsilon, a new local Greek sorority which made its appearance on the university campus with a charter membership of sixteen. Miss Ellen Peterson of Troy is president.

M. V. Thomas went to Moscow on business, Wednesday morning.

Howard Thomas of Kamiah made a brief visit here Tuesday with his uncle, M. V. Thomas.

Gordon Harris of Southwick is advertising an auction sale to take place Tuesday, February 13.

The good Fellowship Club will meet at the school house at 7 o'clock next Tuesday evening. The subject for discussion will be "Civic Improvement." The speakers chosen to lead the discussion are N. E. Ware, Joday Long and N. E. Walker.

G. G. Pickett of Moscow, attorney for Kendrick, and P. P. Oehler, engineer for the local street improvement were in attendance at the council meeting Tuesday night.

A. Wilmot went to Wallace on business the first of the week.

A surprise party was given at the home of Mr. and Mrs. I. H. McDowell, Saturday night, by members of the Rebekah Lodge, in honor of Mrs. Lloyd Stanton. A jolly evening was enjoyed by everyone. Mrs. Stanton left Tuesday for Astoria, where Mr. Stanton has employment in a sash and door factory.

J. J. Pickerd of Troy arrived Thursday afternoon to look after his stock of undertaking supplies here.

Rev. Thompson, district superintendent of the Walla Walla Presbytery, is expected to be here Thursday of next week. A dinner will be given in his honor at 6:30 Thursday evening, in the Presbyterian church basement room.

Born to Mr. and Mrs. Everett Frazier, Wednesday morning, a son.

The Ladies' Aid of the Presbyterian church met at the home of Mrs. John Kite, Wednesday afternoon.

A literary program will be held at the new school house in Cameron tonight (Friday) after which supper will be served at the Luther hall.

Linden News

The ground hog saw his shadow here February 2.

I. P. Fisher returned from Southern Idaho, Wednesday, where he was called by the sudden death of his brother-in-law, Mr. Aken.

Mr. and Mrs. Weyen spent Sunday at the home of his brother, Fred, on the Potlatch.

Mrs. Frank Farrington has been very poorly the past week.

John Michael and Anna Morrison spent Wednesday with Mrs. Carr.

Mrs. Granvill Wall and children spent Sunday with Mrs. McPhee.

A number of the neighbors are logging for Fred Crocker.

Ed Fonburg and Earl Langdon delivered a load of meat to Elk River the first of the week.

Mr. Carmin and son Bill returned to Elk River, Thursday, where they have employment. Emerson and Francis are at Weyen's and Mr. and Mrs. Long are keeping Walter and Hazel.

Mr. and Mrs. Harold Smith returned to Coeur d'Alene, Thursday. They were accompanied home by Edith and Jimmy Carmin who will make their home with them.

Mr. and Mrs. Earl Langdon and children visited Friday night at the Harry Langdon home on American ridge.

Mrs. Hattie Alexander, the Misses Sarah Sweeney and Eva Smith were Sunday visitors at the Lou Alexander home.

Mrs. Lou Alexander and children and Mrs. Sylvia Jenks spent Monday with Mrs. Clem Israel.

James Garner and J. D. Perry returned Sunday evening from Juliaetta. They report Flora Perry, who has been seriously ill, improving.

Foreign Advertising Representative THE AMERICAN PRESS ASSOCIATION

"Can we play keeping store in here mamma?" "Yes, but I have a headache, so if you do you must be very quiet." "Oh, all right, mamma. We'll pretend we don't advertise."

An old ducky got up one night at a revival meeting and said: "Bruders and sisters, you knows an' I knows dat I ain't been what I oughter been: I've robbed hen roosts, and stole hawgs, an' stole lies, an' got drunk, an' slashed folks wi' mah razzah, and shot craps, an' cussed an' swore; but I thank the Lord der's one thing I ain't nebber done; I ain't nebber lost mah religion."—Ex.

"These are times that try mens rolls."

Eggs are another farm product which is being sent from the other side of the globe to this, the greatest agricultural country in the world. In 1921 we imported more than 3 million dozen eggs in their natural state, from China, Japan, Australia, but most of them from China. On top of this we imported 5 million dollars worth of frozen, or dried eggs, the same year, notwithstanding the American hen now averages about 20 million eggs a year.

Walt Mason: Think of someone you can aid; think of someone you can cheer, and the grouch you wear will fade, and you'll smile from ear to ear.

The Altoona Citizen doesn't favor new expenditure to find the north pole. It was found once, the paper says, and couldn't be used for anything.

ANIMAL FEEDS FOR POULTRY

Pullets Fed Skim Milk and Meat Scrap Make Most Profitable Record at Purdue.

Animal feeds have a decided value in the ration of laying hens and pullets. Experiments made by Purdue university showed an average egg record of 140.2 eggs in a year from a pen of pullets fed skim milk; 135.9 eggs from those fed meat scrap; and 61.2 eggs from those that received no animal feed of any kind.

A REEL TREAT

A reel treat will be yours this week! One of the finest pictures ever made is coming to the New Kendrick Theatre and we want you to see it without fail.

"Rip Van Winkle," Washington Irving's immortal classic we have booked for your entertainment, and we want to tell you here and now that you're going to enjoy every moment of it.

Thomas Jefferson plays the title role, and so perfect is his characterization that critics have said that it compares more than favorably with the work done by his father—the world-famous "Joe" Jefferson—in his playing of the stage version.

The picture moves at a fast pace from the start to finish; the cast leaves nothing to be desired; the sets and scenic effects are rarely beautiful; altogether "Rip Van Winkle" is a picture that is distinctly worth while. See it and judge for yourself.

Faithfully yours,
G. G. OLDFIELD,
Manager.

Chamberlain's Cough Remedy Aids Nature

Medicines that aid nature are always most effectual. Chamberlain's Cough Remedy acts on this plan. It allays the cough, relieves the lungs, aids expectoration, opens the secretions and aids nature in restoring the system to a healthy condition. Thousands have testified to its good qualities. Try it when you have a cough or cold.

SUMMONS

IN THE DISTRICT COURT OF THE SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF LATAH.

Lawrence W. Gebesen, Plaintiff,

vs.

All Unknown Owners of, and all unknown claimants to, any rights, or title to, or interest in, or lien or claim upon the Northeast Quarter (NE $\frac{1}{4}$) of the Northwest Quarter (NW $\frac{1}{4}$) of Section twenty-five (25), in Township thirty-nine (39) North of Range Two (2) West of the Boise Meridian, in Latah County, State of Idaho, Defendants.

The State of Idaho Sends Greeting To each and all of the above-named defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms is as follows:

To quiet title in plaintiff in and to the Northeast Quarter (NE $\frac{1}{4}$) of the Northwest Quarter (NW $\frac{1}{4}$) of Section twenty-five (25), in Township thirty-nine (39) North of Range Two (2) West of the Boise Meridian, in Latah County, State of Idaho.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 5th day of January, A.D. 1923.

Harry A. Thatcher, Clerk

(Seal) Frank L. Moore, Residence Moscow, Idaho, Attorney for Plaintiff. 2-6t

All the Gems You Can Pile On
Are Style Today

THIS headdress is the latest creation worn by the actress, Jane Cowl. As will be seen, it's simply loaded down with gems. Time was when the wearing of jewelry could be overdone to the point of bad taste. But not today. As to both millinery and gowns, it's just a thing to fasten on all the gold and precious stones it's possible to make stick.

Uncle Sam's Cavalrymen Show New Yorkers How to Ride

TROOPERS of the Third Cavalry are shown here demonstrating their "stunts" at the Madison Square horse show, New York. The Third is stationed at Fort Meyer, Va.

Pointers by Thomas

You can always do without anything you can't do anything with.

There are two kinds of buck fever. One catches a man who sees a deer and the other a man who sees a dollar.

Burbank's new seedless fruits remind us of the new cook who cleaned and dressed the dinner sausages.

Arguments are easy to start, but hard to stop.

Some go to church because they want to, but a great many more go because they think they should.

Soft words turneth away wrath, but hard ones hammer home facts.

Clemenceau says gold is the curse of the world. European nations want America to cuss.

Life Lines BY H.M.C.

WILLIE'S ma saved up her change a nickel at a time. Of course she knew what she was saving for. And now and then his dad would add a quarter or a dime. And then, one day, they spread it on the floor.

"I was counted over many times, this pile of 'chicken feed.'" In even dollars there was just a score. And now, from many worries, said the parents, we'll be freed; we'll buy our son the things he's wishing for. And so they went a-shopping and a pair of leggings bought; and then a stocking hat, and mittens, too. The strings upon their money purse were open—far from taut. And little Willie's wardrobe quickly grew.

And now we see the youngster, and he's dressed up spic and span. He's standing in a snow drift to his waist. His little mind is thinking all the deviltry it can. He'll give his clothes a full-sized winter's taste.

Alas! The brand new leggings and the mitts are wringing wet. They've shrunk until they look as awful tight. And mother says, "They are the last of new things you will get." 'Twas something else that Willie got that night.

MILK EXCELLENT FOR FOWLS

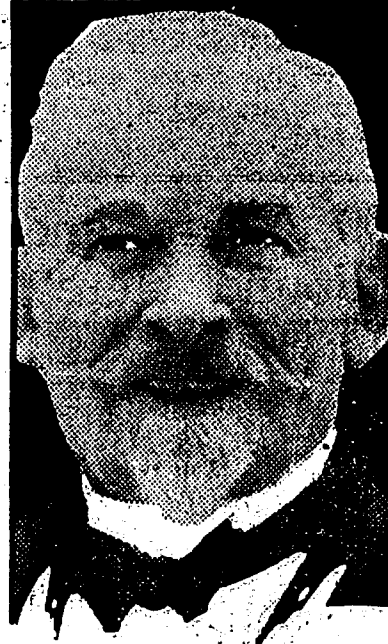

Productive of Good Money-Making Results and May Be Fed Alone or to Moisten Mash.

One class of feeds that is excellent for poultry and that can be used advantageously on dairy farms, includes milk, skim milk, buttermilk, sour milk, cottage cheese, etc. These are all productive of good money-making results and, where they are available, it is wise practice to feed them. They may be fed either alone or used to moisten the mashes.

The mash, however, should not be moistened one day and then fed dry the next. Follow one or the other of the two plans constantly. Fowls will convert what many times would otherwise waste, into meat and eggs if fed the milk and its by-products that are often obtainable on the farm.

The use of green feed in the winter ration not only helps to keep the birds healthy, but it seems to influence the following spring.

Every Day Coue Feels Better

EMILE COUE, the Nancy, France, proponent of the curative power of autosuggestion, is probably more prominent in the public eye just now than any other individual. "Every day, in every way, I feel better and better"—thousands are saying it. M. Coue is in this country lecturing.

CALL FOR BIDS

January 31, 1923.
The Trustees of School District No. 9, Nez Perce County, will receive bids up to March 1, 1923, for the delivering of 32 inch Red Fir wood, the same to be cut from green timber, seasoned and delivered on the school yard at Le-lard by September 1, 1923. A \$50.00 bond will be required of the successful bidder. The Trustees reserve the right to reject any or all bids.
R. B. Parks, Clerk. 5-4t

PUBLIC AUCTION

I will sell at public auction at Southwick, Idaho, the following described property, sale commencing at 10 o'clock on

Tuesday, Feb. 13

Horses, Cattle and Hogs

Bay gelding age 4 weight 1400; sorrel gelding age 4 weight 1400; black mare age 9 weight 1400; black colt age 2; sorrel colt age 2.

Jersey cow giving milk and Durham cow giving milk; 2 year-old heifer and a fat, stall fed cow.

BENEFICIAL EFFECT OF SULPHUR SPRAYS

Quick Results From Field Demonstration in New Jersey.

Returns From Potato Crop in New Jersey Had Been Greatly Reduced on Account of Scab—Crop Now Clean.

(Prepared by the United States Department of Agriculture.)

A good example of quick results in the improvement of a farm practice following demonstration work by the United States Department of Agriculture and the state was found recently on a New Jersey potato farm, where the returns from the crop in the last few years had been greatly reduced on account of scab. The department and the state put on a demonstration on this farm last year to show the beneficial effect of the use of sulphur in preventing this disease in this region. On one part of the field, according to the owner, where no sulphur was used the tubers were hardly good enough for hog feed. This year, as a result of the lesson brought out in the different parts of the field, the entire field produced a good clean crop. To be on the safe side the grower applied 600 pounds to

the acre. Where the scab had been worst last year there was no disease at all and the yield, estimated by digging a large number of hills, was ascertained to be 300 bushels of clean potatoes to the acre.

In the demonstration conducted last year three different quantities of sulphur were used—at a rate of 150, 300, and 600 pounds to the acre. The first gave practically no control, the second about 60 per cent reduction, and the third practically complete. In this work flowers of sulphur, or sulphur dust, was used.

PROTEIN FEED IS ESSENTIAL

Alfalfa is Especially Adapted to Profitable Flow of Milk From Dairy Cows.

Dairy cows require high-protein feed to give a profitable flow of milk. Alfalfa is especially suited to this and is much cheaper than protein concentrates fed with non-leguminous rough-

Alfalfa is Very Palatable.

It is estimated that a dry cow will eat 20 to 25 pounds of alfalfa a day and a milking cow 25 to 30 pounds. Alfalfa is cooling, laxative, and very palatable. When alfalfa is used instead of concentrated feeds, the cost of production is cut down.

POULTRY FLOCKS

FEEDING GEESSE ON NOODLES

Much Improved Fattened Fowl Obtained by Stuffing With Combination of Grains.

(Prepared by the United States Department of Agriculture.)

A method said to produce a much better fattened goose than almost any other, involving, however, considerable work, is that of stuffing the geese with noodles for three or four weeks. The feeder sits on a box in a corner of the pen, holds the goose between his legs, and stuffs it with noodles, usually beginning by feeding from three to five noodles three times daily, and increasing gradually to six or seven noodles five times daily at four-hour intervals.

The noodles are made of scalded cornmeal, ground oats, ground barley, and ground wheat or wheat flour.

Geese Finished for Market, using about equal parts of each. Add

salt as for bread, thoroughly mix the feed and put it through a sausage stuffer, cutting the product into pieces 2 1/4 to 3 inches long. Boll them for ten to fifteen minutes, or until they float, in a wash boiler containing a wire rack which stands 1 1/2 inches above the bottom of the boiler. Dip the noodles in cold water and roll in flour, to keep them from sticking together. Pour hot water over the noodles just before they are fed, to make them slippery and keep them warm.

The noodles are put into the mouth one at a time, and worked down with the hand on the outside of the neck. If any feed can be felt, no noodles are given at the next feeding time; otherwise the bird will go off its feed. Keep plenty of water before the geese. Young geanders are used for this special fattening and any older geanders or geese to be marketed. "Noodled" geese average 25 to 28 pounds, and individual weights of nearly 40 pounds have been obtained.

Coaching Girls' Hockey Team

MISS H. G. ARMFIELD, pictured here, is the English hockey star who came to the United States to coach the All-America girls' team soon to visit the British Isles for a series of matches with the best hockey clubs of their own sex on that side of the Atlantic.

POULTRY RAISED AT PROFIT

Farmer Has Little Knowledge as to Cost of Production of Fowls Sold for Meat.

Poultry meat is a by-product on most farms. The farm flock is supposed to lay enough eggs to satisfy the family and provide a balance to help out with the grocery bill, but when the birds are sold as meat they are turned off without much knowledge as to the cost of production. It is necessary to keep track of the feed that the birds use and know if they are paying a profit. There is no reason why poultry meat should not be raised at a profit the same as cattle and hogs.

Chamberlain's Cough Remedy

This is a pleasant, safe and reliable medicine for coughs and colds. It has been in use for many years and is held in high esteem in those households where its good qualities are best known. It is a favorite with mothers of young children, as it contains no opium or other harmful drug. Try it when you have need of such a remedy.—Adv.

Wealth That Works

Money saved and deposited in a bank is wealth that works. Wealth that works is capital. Unlike brain and muscle, it does not wear out or deteriorate. It grows and improves.

The only gain from labor is what is saved. Labor, therefore, makes wealth and when wealth works it is capital.

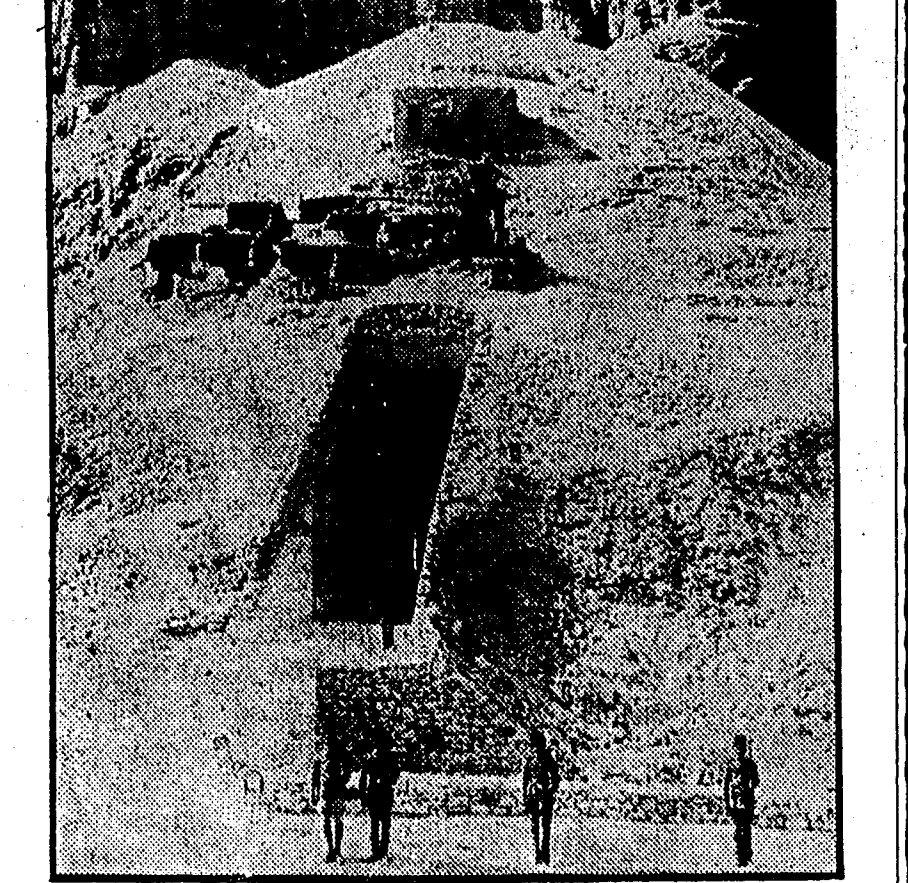

Capital at work pays wages, which, when saved, creates more capital. Labor is the producer when labor saves.

Savings bring independence. A savings bank is a public servant.
