

REPORT OF FARM BUREAU PICNIC

Large Crowd Attended in Spite of Heavy Rain.

The fifth annual picnic of the Latah county Farm Bureau which was to have been held in the city park of Moscow on Thursday June 7 was held in Eggen's Hall instead of the park. This was necessary on account of the heavy rain which fell during the morning. In spite of the rain there was a large crowd assembled and approximately 300 people spread their dinners on the tables provided in the hall.

Immediately following the dinner the tables were pushed back and addresses were delivered by George Sievers, manager of the Moscow Union Warehouse Company and Dean E. J. Iddings of the College of Agriculture. Music was furnished by the Moscow City Band.

Following the program at the hall there was an excursion over the Experiment Station. Stops were made at all the principal departments. There were 20 cars on the excursion over the farm.

Cooperation was the keynote of the talk given by Mr. Sievers. "We often hear that the business interests are organized to work against the farmer," Mr. Sievers said. "This is not true, and I have no sympathy with the statement. Business interests are organized, not against the farmers but to work for their own best interests. This is a privilege that is granted to any group. The farmers have the same right but have only recently begun to make use of that privilege. Practically all progress in practical cooperation among farmers has been made during the past fifteen years. Now we have the Equity, the Grange, and the various wheat growers associations, the Farm Bureau, and others too numerous to mention, working to better the farmer's financial condition.

"It is time for all farmers to take advantage of their opportunity to work together and to cooperate. I have felt, and still feel, that the Farm Bureau offers what is probably the best organization that we can use in getting together. Let us all get together and do our parts in making cooperation practical and an actual reality.

"For a number of years, I have heard little other than complaint from the farmers," the speaker said at another point. "This has been due to poor crops and to the fact that prices of farm products have not been in proportion to other products. Today we have the prospects that we have not had in the Palouse country in a number of years and we are hearing less complaint in regard to poor prices for farm products."

Dean Iddings spoke concerning the possibilities of modern farming, and of the ways in which the farmer of today can serve his community in a constructive way, protecting the future of the community, and developing new and fertile fields.

"We have come to a new day, a new period in the history of the west, when the great problem facing us is the preservation, conservation, and wisest possible utilization of the natural resources in the state and western regions that have already been taken possession of," he said. "This calls for a new type of pioneer that will find ways of better extraction of metals and of wiser utilization of minerals, coal and oil resources, and those who will build new irrigation works, reveal new knowledge of soil, discover new plants, and breed finer types of animals, solve the problem of protecting the farmer from insects, pests, and plant diseases, thereby contributing to the prosperity of agriculture, and finally, those who will work for humanity, solving the great problems of human disease and finding ways of alleviating the suffering of mankind."

"It is a day, speaking particularly with reference to the farm, when the old methods will no longer suffice. When the conservation of soil, the introduction of new plants, and diversification of methods and

Bolshis Failed To Keep Her

THIS is the Cossack princess, Marina Yurlova. At the age of 18 she ran away from home to join Russia's soldiers in the field. Several times she was wounded and carries three bullets yet. After the revolution she was thrown into a Bolshevik prison, but escaped and has just arrived in the United States.

University Pageant

In drama, dance and song, the history of Idaho, from the days when Lewis and Clark were led across her mountains and through her valleys by Sacajawea, the Indian maid, until the present time, was told in the great historical pageant, "The Light on the Mountains," presented by University of Idaho students Saturday night. The pageant attracted by far the largest crowd ever seen on MacLean field of the number of people who filled the permanent and improvised bleachers on this sidehill ranging from 7,500 to 10,000. Hundreds of people drove in from Lewiston and other nearby cities, and scores were here from the southern part of the state. Perhaps the most interesting group among the spectators, was the pioneers who occupied a section by themselves as guests of the university. Among these were not a few men who were in Idaho before the Nez Perce war, and who were personally familiar with many of the episodes depicted.

The pageant reflected the greatest credit upon the originators and directors, and attracted more attention to the university and to Moscow than anything previously attempted.

Mr. and Mrs. W. M. McCrea spent the week end in Moscow with their sons, Donald and Walter, and also attended the pageant.

careful study of the marketing problems and the bringing of the greatest possible amount of intelligence to bear upon the problems of the farmer are fundamental for success.

"Events of the past few years indicate that Latah county is responding to this new call and the agriculture of the region is being slowly molded to more closely conform to the practices that scientific knowledge indicates to be more desirable. Splendid herds of pure bred beef cattle, new herds of Holstein and other dairy cattle, the seeding of thousands of acres of legumes for hay and pasture, all point to progress in agriculture.

"There has been fear expressed that the alfalfa weevil, one of the problems upon which the Idaho agriculture experiment station is expending a great deal of time, has already invaded this country, and that it may interfere with success in the growing of alfalfa. I can assure you that as far as the entomologists of the station are aware there is no alfalfa weevil north of the Salmon river. As far as we know it exists only in the irrigated sections of Utah, Eastern Oregon, and Southern Idaho."

In closing, Dean Iddings assured the assembled farmers of the cooperation of the local college of agriculture and experiment station. He spoke complimentary of the progress made in molding the agriculture of this region to conform with the needs and ideals of the new period.

KENDRICK DEFEATS LEWISTON TEAM

Three Home Runs Made by Local Players.

On the local diamond, Sunday afternoon, Kendrick hung the crape on the Vollmer-Clearwater team of Lewiston by a score of 15 to 13. The game started off by putting out Lewiston's first three men. Then the fireworks started, with two of Kendrick's men on bases and Clark landing a home run by batting the ball out past the right fielder. Next to bat was McCall, who not wanting to be out classed by Clark, also scored a home run by putting the ball far past the center field fence.

Ramey pitched the first three innings for Kendrick and Flesman the remainder of the game. Lee for Lewiston pitched five innings and Densow three.

It was anything but a good game as the errors were numerous on both sides. Kendrick especially making several errors in the 8th inning and allowed Lewiston five scores. Up to this time the score stood 15 to 8 in favor of Kendrick.

There were three home runs made in the game by Kendrick players, Clark making one in the first and one in the fifth, McCall one in the first.

This makes 6 games won and none lost for Kendrick.

The battery for Lewiston was Lee, Densow and Halley, for Kendrick, Ramey, Flesman and Clark.

The scores were made as follows:

Kendrick	1 2 3 4 5 6 7 8 9
Boyd,	1 1 1 0 0 0
Thomas,	1 1 0 1 1 1
Clark,	1 1 1 1 0 0
McCall,	1 0 1 0 0 1
Ramey,	0 1 0 0 0 0
Herres,	0 0 0 0 0 0
Flaig,	0 0 0 0 0 0
Flesman,	0 0 0 0 0 0
Bolin,	0 0 0 0 0 0
Lewiston,	1 2 3 4 5 6 7 8 9
Clark,	0 0 0 0 0 0
Kuntz,	0 0 0 0 0 1 0
Halley,	0 0 0 0 0 1 0
Densow,	1 1 0 1 1 0
Bergman,	1 1 1 0 1 0
Whitcomb,	0 1 0 0 1 1
Jesse,	0 0 1 0 0 0
Clark, N.	0 0 0 0 0 0
Lee,	0 0 0 0 0 0

Entertains For Niece

Mrs. Norris Walker entertained at a Supper Party in honor of her niece Alberta's fifteenth birthday, at her home Tuesday evening. The evening was spent with games and music. Those present were: Alberta Walker, Dorthy Erickson, Marion Pickering, Margaret McDowell, Dorothy Stanton, Thelma Perryman and Hazel Stanton.

Ain't It True

When a gossip meets a rumor the Recording Angel writes shorthand. There is always enough moisture to sprout wild oats.

Other men besides ministers marry for money.

So many women are shooting their husbands, the men should all take out accident insurance.

Some girls show most everything but a little common sense.

You can make almost any man feel at home by starting an argument.

Misery loves company—and she usually has a houseful of it.

A fool is one who thinks a gambling device was made to be beaten.

A good husband is one who feels in his coat pocket every time he passes a mail box.

The safest place to bury the hatchet is just back of the profiteer's ear.

A doctor says the less you wear the longer you live—we know some girls who ought to live a long time.

Mr. and Mrs. M. B. McConnell and daughter, Jane, and Hester Knepper took in the pageant at Moscow, Saturday.

I. O. O. F. DISTRICT CONVENTION HELD

Troy Welcomes Three Link Fraternity.

The District Convention of the Odd Fellows assembled in regular session at Troy last Tuesday, June 12th, with a very fine attendance of Odd Fellows and Rebekahs from this district. An open meeting was called in the morning at ten o'clock and a large number of non-member citizens took advantage of the hospitality of the convention, being entertained by an excellent program of addresses and musical numbers.

The convention was welcomed to the town by its Mayor, T. A. Myklebust, and W. F. Morgaridge of Moscow entertained the crowd with a graceful and witty acceptance of the mayor's extended good-fellowship.

In the afternoon business session of the Odd Fellows, the following officers were elected for the ensuing year: Chairman, John Kite of Kendrick; First Vice-Chairman, T. H. Christie of Troy; Secretary, Hugh Stanton of Kendrick; Treasurer, Columbus Clark of Juliaetta; Marshal, W. L. Fields of Juliaetta; Chaplain, Rev. Pickering of Kendrick; Guardian, O. E. Johnston.

The Rebekahs elected the following to serve for the same period in this District: Chairman, Mrs. Eliza Compton; First Vice-Chairman, Mrs. Dolly Lewis; Second Vice-Chairman, Mrs. Morgaridge of Moscow; Secretary-Treasurer, Mrs. Pearl Long.

In the evening, the Moscow Lodge exemplified the third degree in the Odd Fellow meeting and the Moscow degree team of the Rebekahs put on the Rebekah degree. The two spacious halls of the building were tastefully decorated for the occasion, the Odd Fellows using the top floor and the Rebekahs holding their meeting on the ground floor.

The next regular meeting of the District will be held at Kendrick some time next June.

Pepple-Jones

Monday, June 11th, at noon in the Methodist parsonage in Lewiston occurred the marriage of Miss Helen Pepple and Harold Jones, two of Juliaetta's popular young people. Miss Pepple is the daughter of Mr. and Mrs. R. F. Pepple. Mr. Jones is the son of Mr. and Mrs. George H. Jones, all of Juliaetta.

The wedding is the result of a teacher-pupil romance, Mr. Jones having been Miss Pepple's teacher, '20-21, the year she graduated from the Juliaetta high school. After one year at the Lewiston State Normal school Miss Pepple has been her father's assistant in the postoffice and his drug store here in Juliaetta. Mr. Jones has accepted a position with an electric company in Denver, Col. and will leave for Denver June 2. Mrs. Jones will follow him later when he has gotten settled in his work.

Taxes Due June 23.

The last installment of the taxes is due and payable to the county treasurer at the court house at Moscow, not later than Saturday, June 23, other wise the same will become delinquent.

Idaho Pioneer Day

Governor Moore has issued two proclamations calling upon the people of Idaho to observe Idaho Pioneer Day, June 15, as a holiday, and the other proclamation questioning the general observance of Flag Day, June 14.

A. V. Dunkle was a business visitor to Spokane and Wallace, last Friday and returned home Monday evening. Mr. Dunkle's father, who lives at Lewiston, accompanied him to Wallace.

She's Best Paid Postmistress

MRS. ELIZABETH D. BARNARD, shown here, has been appointed postmistress of Tampa, Fla. Only five postoffices pay more than her salary of \$6000, only seven others as much, and of the thirteen, Tampa is the only one with a woman in charge.

Schupfer-Long

A very quiet wedding was solemnized at the parsonage of the Corbin Park Methodist church, Spokane, Monday morning, June 11, at 11 o'clock when Miss Ida Schupfer became the bride of Marvin Long. Rev. Rexroad performed the ceremony in the presence of Mr. Tom Long and Miss Beulah Long, brother and sister of the groom.

After a short wedding trip, the happy couple will return to Kendrick where they will make their home.

Mrs. Long is one of Kendrick's most popular young ladies and has a host of friends here and at Juliaetta. She has been operator at the local telephone office for a number of years. Mr. Long has lived in his community practically all his life and is well liked by everyone. He is also a member of the firm of N. B. Long and Sons.

Challenges The World

The tug-of-war at Kendrick's one big day celebration on the Fourth promises to be the headliner on the day's sports card. Anyone wondering why it is called a tug-of-war rather than a tug-of-something-else is herewith tendered a cordial invitation to come out and see something that will make him forget that the Armistice was ever signed. War is what it ain't nothing else but!

Harry Hupp informs us that he knows of a piece of almost new inch and a half well drilling cable which his team has been braking regularly in practice pulls and that nothing on this earth or the next give him more pleasure than to have nine or twelve huskies connected to the other end of the line on the morning of the Fourth. It seems that he has found nothing but the largest bull-pine trees safe to snub the rope around since his team has been in action.

We don't know exactly how we are going to appease this war-like spirit and thirst for blood but it seems highly probable that, with all of this perfectly good notice, some group of hand-loggers or sack-tossers will come forward with an aggregation that will give a reasonably good account of themselves at the rope's end. Bill Mielke has some thing up his sleeve which will probably make some of the other pullers stutter when they boast hereafter. We would like very much to hear both sides of this matter discussed so that the public will be fully informed regarding the possible strength of each team and know how to lay their bets.

Children's Day Program

The Children's Day exercises at the Methodist church, Sunday morning, was well attended and greatly enjoyed by everyone. There were twenty-five little ones who took part in the program and much credit is due Mrs. Pickering for the splendid manner in which the children performed.

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers.

TAKEN TO FEDERAL PRISON

Four prisoners from the Latah county jail are enroute to the federal prison at Fort Leavenworth, Kansas, to serve terms of from five to seven and one-half years. The men are James Woodson, Michael Conway, and Sam Rose, convicted in the federal court at the recent session here, of robbing the Orofino postoffice, and sentenced to serve seven and one-half years, and Joseph Deckard, convicted on the charge of resisting an officer and sentenced to serve five years.

The men are in charge of Frank M. Breshears, United States marshal for Idaho; R. C. West, deputy United States marshal; W. S. Robbins, a former Latah county sheriff, and Sherman Breshears, son of the United States marshal.

At Spokane two more prisoners, from Coeur d'Alene, were picked up and from there east the officers and their prisoners made the journey in a special car. —Star-Mirror.

MANY CARS STUCK

Many cars were stuck in the deep mud hole near the Wm. Ingle farm, just south of town, on the highway, last Sunday. Mr. Ingle said he was kept busy practically all the day pulling cars out of the deep mud hole. The place is naturally a springy one and the large gravel trucks had cut the road up so badly that when the heavy rains came a deep mud hole was formed and cars went clear through the rock bed to the mud below—and if the axles had not stopped them, there is no telling how far they might have gone.

It goes without saying that the joy has surely been taken out of joy riding on the first four miles of the Lewiston road, and it will be for some time because of the loose gravel, but it will pack very rapidly owing to the recent rains. —Genesee News.

AFTER BETTER SERVICE

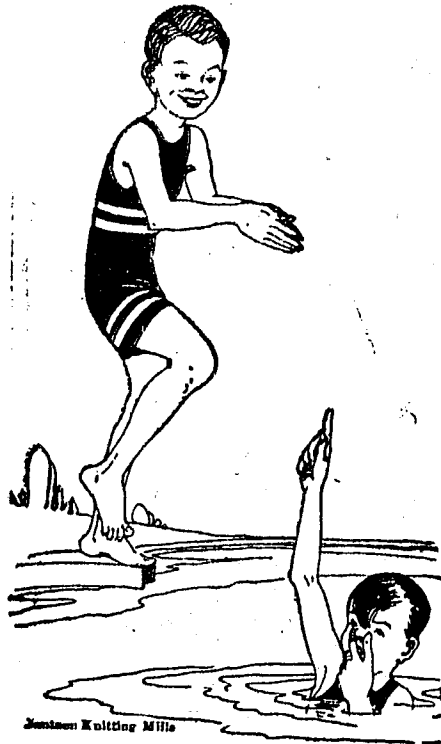

The people of Deary will be interested to learn that the village council has decided to open negotiations with the Washington Water Power Company with the view of inducing that concern to extend its power line to this place. It is thought possible by the board that enough business can be promised to enlist the power company's interest, and it is certain that the board will do everything in its power to secure the service. Should they succeed we would have 24 hour service, with a sufficient current to operate motors of any size, irons, stoves, etc. to our heart's content, which is not possible now by several watts. —Deary Press.

FIRE BRICK IN DEMAND

Mr. Montague of the Montague Stove Co., of Portland, Ore., who called at Myklebust Bros. the other day, stated to T. A. Myklebust, who buys the ranges and stoves for his firm, that they had tried all kinds of brick, but the only one they could get to do the work right was the Troy Idaho fire brick. This speaks very well for the local institution and is just another testimony that the Troy Idaho Fire Brick is the best in the West. Mr. Watson, the manager states that last month they shipped twenty car loads of their products. —Troy News.

Officials Caught Speeding

J. H. Nash, state land commissioner of Idaho, was fined \$10 and costs, by Justice J. W. Settle, of Post Falls, for speeding, yesterday afternoon. Governor C. C. Moore was with Nash. Nash was stopped with a pistol by Ed Fitzgerald, deputy sheriff. He was charged with driving 40 miles per hour on the Apple Way. Governor Moore explained that they were hurrying to Moscow to keep an engagement.

Southwick News

Clarence Whittinger of Russell Ridge has been visiting relatives and friends and in the Southwick vicinity the past week. He expects to work on the fire patrol this summer.

Mrs. Clay King left for Marshfield last Thursday.

Mrs. Dr. Smith left last week for Mabton, Wash., to stay with her daughter Mrs. Donald Powers.

Mrs. H. D. Hayward had dental work done in Lewiston last week.

Mrs. Geo. Jones and son Richard went to Spokane last Wednesday.

Mrs. Al Frank arrived from Spokane last Thursday, and visited her parents Mr. and Mrs. J. Kimes and daughter, Mrs. Ben Presnall. She returned to her home Monday.

Mr. and Mrs. Calvert and children left Monday morning for Lewiston. Mr. Calvert will attend Summer school there.

Two large groves of sheep belonging to Mrs. Brewer of Clarkston passed thru the first of the week.

Mr. and Mrs. Columbus Triplett of Peck visited at the Luc Triplett and Jap Triplett homes Sunday.

Mr. and Mrs. Albert Guernsey, of Peck were over night guests at Will Jones Saturday.

Mr. and Mrs. Floyd Russell were Kendrick visitors Wednesday.

H. A. Russell lost a fat cow Sunday, it seems the animal was suffering with bloat and ran into a burning straw stack and was burned to death.

Murray Benjamin who is working at Potlatch was a week end guest at the Wm. McClelland home.

Miss Cowgill spent Thursday, Friday and Saturday instructing the Farm bureau women in dress making, she was a guest of Mrs. L. J. Southwick.

Mr. and Mrs. Pete Spekker, Raymond Spekker of Asotin, Iva Mustoe and Miss Hogan of Lewiston spent Sunday with the Mustoe and Stump families.

Mr. and Mrs. Ben McCoy spent Sunday with Mr. and Mrs. Floyd Russell.

Ray Triplett had the misfortune to smash up Wm. Ehlers car when he ran of the grade and tipped over, south of town last Sunday. No one was seriously hurt.

Jin Thornton who now lives in Spokane, came down last Thursday and took a truck load of his furniture back to Spokane.

Mr. and Mrs. Powell were over night guests of Sherman Winters, Thursday and left for their home at Valley Ford, Friday.

Jane Ziemann is spending this week in Lewiston as the guest of the R. E. Bowerman family.

Mr. and Mrs. Terry of Cavendish were over night guest of grandpa and grandma Southwick Sunday.

Miss Grace Plummer of Kendrick is visiting at the Frank Bunger home.

The G. H. Ziemann family returned from Walla Walla Saturday evening.

Mrs. J. L. Harris went to Lewiston Tuesday to visit her sons, Gordon and Walter.

Ed Bond was in Southwick Tuesday setting up a tomb stone and fixing a cement wall around his children's graves.

Claude Craig of Leland drove a large band of cattle thru here Tuesday; he was taking them to the Cedar Creek range.

Last Tuesday a team belonging to J. E. Long, of Crescent became frightened at some little boys coasting in wagons in front of the store; broke loose and ran away. They ran to the Geo Hayward place two miles north of town where Mrs. Hayward caught them. Both single trees were broken but otherwise the damage was small.

Linden News

Mrs. S. H. Fry went to Moscow Wednesday to visit at the George Stewart home.

W. Weyen delivered two truck loads of fat hogs to the Moscow market last week.

C. H. Harris and family spent Saturday with his parents at Troy.

Arthur Bohn and Leslie Weaver are sailing around in cars these days. Arthur's being an Overland and Lesters' a Ford.

Mrs. Winegardner and children returned from Lewiston Saturday evening. They were accompanied by Miss Alice Winegardner.

Mrs. H. O. Gilchrist shipped her household goods to Longview, Wash. the first of the week after a short visit with friends here. She and four sons, will join Mr. Gil-

christ who has been there since early spring.

George Smith returned from Spokane Saturday where he has attended school the past year.

Mr. and Mrs. A. W. Longfellow are treating their house to a new coat of paint which adds greatly to the attraction.

Miss Eva Smith returned Saturday evening from a visit with relatives and friends at Palouse and Moscow.

Smith-Mitchell

On Friday, June 1st at two-thirty, Ellison L. Mitchell and Anna M. Smith were united in marriage at the home of the Rev. A. F. Colver, pastor of the Grace Baptist Church in Spokane.

The bride was becomingly attired in an elaborate traveling suit of the new spring suiting.

She carried a bridal bouquet of bride roses and lily of the valley festooned with maiden hair fern and sweetpeas.

Her sister, Eva, was brides maid and carried a beautiful bouquet of pink carnations and sweetpeas.

The Bridgroom was attended by George Smith, brother of the bride. The ring ceremony was used.

The bride was born and reared at the family home at Linden, Idaho. She is a most estimable young lady, loved and respected by all who know her. She is a graduate of the Lewiston State Normal and has taught several years in Idaho, her last school being near St. Maries.

The Bridgroom is a native of North Carolina, but has been in the West some years. The news of this wedding will be a surprise to many of their intimate friends. Nevertheless their courtship has been brewing for several years.

The happy couple left immediately on their honeymoon for the groom's boyhood home at Greensboro, N. C. where they will help celebrate his parents golden wedding anniversary. After spending a few weeks visiting different points of interest in the East they will return to Billings, Montana where the groom has been a steam engineer for 12 years with the Security Bridge Co.

Texas Ridge

(To late for last week)

Mrs. Jack Bailey visited at the Herb Slocum home on Bear ridge Wednesday. She was accompanied home by her daughter Clara.

Mr. James Pierce went to Clarkston Friday for a visit with friends.

Mr. and Mrs. Chas. Ross of Juliaette visited from Thursday until Tuesday at the home of their daughter Mrs. E. C. Babcock.

Miss Edith Loughhead of Princeton is staying a few days with Miss Lula Weber.

Grandma Baker returned from Greer where she has been visiting at the Bert Baker home. Elmer Baker accompanied her home.

Nelson Olson's barn burned Tuesday. There was 200 baby chicks that were burned, fire caught from the brooder lamp.

Mrs. T. A. LaBolle has gone to Chehalis Wash. to visit her daughter Mrs. Lewis Schultz.

Mr. and Mrs. Carl Drury, Mr. and Mrs. Aubrey LaBolle and Mrs. C. Bokar, Mr. and Mrs. E. A. Babcock, Georgia and Dick Drury, and Miss Anthony attended the program on Bear ridge Wednesday evening.

Ruth Olson of Deary was week end guest at the Miller home.

Mr. and Mrs. E. C. Babcock were Sunday afternoon visitors at the Drury home.

Grandma Tout spent a few days last week with Mrs. James Pierce.

Mr. and Mrs. H. Comstock and children of Bear Ridge spent Sunday night at the Babcock home.

Clarence Baker went to Lewiston Monday.

Mrs. James Miller was a caller at Ogdens Tuesday afternoon.

We understand that Herman and Clarence Baker have purchased a Chevrolet truck to market their strawberries in.

E. C. Babcock lost a valuable horse Tuesday.

Crescent Clippings

Elsie Zimmerman is at home after a several weeks visit with her sister Mrs. Stewart Wilson of Long Meadow.

Mr. and Mrs. J. E. Long have made another addition to the family as Frances Carmen is staying with them.

Mary Forest returned home Monday after staying some time at Riley's, near Kendrick.

Harry Wright's mill had a break

down Friday.

Will Wright's mill stopped sawing for the season, Friday.

Rose Zimmerman is home for a week.

Mike Forest went to Kendrick Wednesday, returning Friday.

Frank Meyers went to Kendrick Saturday, and returned Tuesday.

Marion Helton spent Sunday at the Wm. Kauder home. Mr. and Mrs. John Darby, Mrs. Souders and sons Marion and Marvin visited there in the afternoon.

Mrs. C. L. Trail went to Moscow Monday to attend summer school.

Mr. and Mrs. John Darby spent the day at Ed Darby's home Monday.

Mrs. Frank Carey Jr. came in Tuesday to visit with her parents, Mr. and Mrs. Frank Souders.

GOOD TREATMENT OF LEGUMES IS NEEDED

Alfalfa and Clover Insist on Plenty of Lime in Soil.

Type of Material to Use Is the One That Gives the Most Calcium Carbonate or Its Equivalent of Proper Fineness.

Legumes, since they are such a valuable part of agriculture, have a right to demand, as they do, that conditions for their growth shall be as they want them. That alfalfa and red clover, for example, insist on a fair supply of lime in the soil, is pointed out by the New York state agricultural college at Ithaca.

If the soil contains limestone, is neutral, or even slightly acid, no lime need be added, but if the soil is very sour, lime should be put on before seeding red clover. Where clover fails frequently or does not thrive and produce a good crop, lime is usually necessary, and should be applied every time clover is seeded at the rate of one ton or more per acre in the form of limestone, or its equivalent in other forms.

Three forms of lime are in general use: Limestone, "hydrated" lime, and burned or quicklime, together with smaller quantities of marl and oyster shells.

The form of lime to use is the one that gives most calcium carbonate, or its equivalent, of proper fineness, spread on the land for each dollar paid out for lime, freight and labor of hauling and spreading.

For red clover it is usually not necessary to neutralize the acidity fully. Alsike stands more acidity, while vetch and white clover, peas and field beans, are still more resistant to soil acidity. Soy beans respond to conditions favorable to red clover. Alfalfa and sweet clover need more lime than does red clover, and it is desirable to know something of the lime content of the subsoil down to 20 to 30 inches below the surface.

"NOMADS OF THE NORTH"

The filming of a huge forest fire is not without its dangers as members of the cast of "Nomads of the North," coming to the New Kendrick Theater, tonight and Saturday, will testify. Twice during her attempts to find her way out of the maze of roaring flames which entirely surrounded her during the moment the motion picture cameras were recording the scene, Betty Blythe's skirt caught afire. In both instances Lon Chaney sustained painful burns on his hand in smothering out the flames. "It looks pretty on the screen, but I must say it was about the hottest job I've had since I made my bow in the movies," Chaney remarked after he had recovered from his experience.

One of the biggest moments in this photodrama is a deadly struggle between a man and a huge bear, the latter of which fights in order to save the life of its mistress. According to advance reports this conflict between such sharply contrasted gladiators offers a series of thrills which make gasping unavoidable.

WOODWARD ENTERTAINERS

The program of the Woodward Entertainers to be given at the Grand Theater, next Wednesday evening, will be a rare treat to lovers of good music and readings. The program will consist of songs, piano solos, monologues, piano-ologues, dramatic and humorous reading. The program will be an unusual one as it is an entire "Family affair" which will please every member from the baby to the old folks.

Chamberlain's Colic and Diarrhoea Remedy

Every family should keep this preparation at hand during the hot of the summer months. It is almost sure to be needed, and when that time comes, is worth many times its cost. Buy it now.

When a BANK ACCOUNT Looks Good

When you have come to the end of your earning capacity—when your working days are over, then is when a bank account looks good. It is then too late to wish for the money you spent foolishly in early life.

"Experience is the best teacher." No truer words were ever spoken, but let's not wait for experience to teach us, because then it will be too late.

The mill will never grind with water that is past, and the money you spend foolishly is gone beyond recall.

If you have not already made regular saving a part of your life plan, do so at once. You will never regret it and you may have cause for thanksgiving later if you practice savings bank thrift now.

STUDY VARIETIES OF WHEAT

Endeavoring to Determine Those Best Adapted to Various Sections of Country.

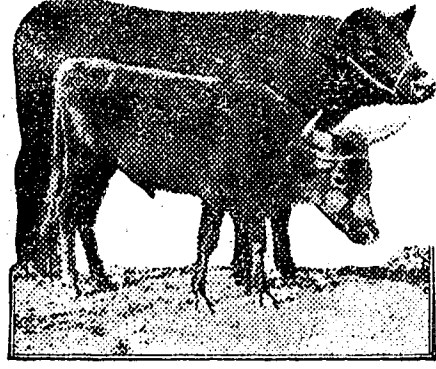

The agricultural experiment stations of some 25 states are studying varieties of wheat to determine those best adapted to the regions in which they are located, according to reports to the United States Department of Agriculture. Widely differing conditions are included—the near-Arctic in Alaska and the semitropical in Alabama, Louisiana, and Georgia; mountain fields in Pennsylvania and prairies of Kansas and Nebraska; lands under cultivation for many years as in Virginia and New York, and practically virgin soils in some of the Western states.

KENTUCKY ACTIVE IN WAR ON SCRUB SIRE

Wayne County Farmers Careful of Breeding Stock.

Twenty-Two Purebred Beef Bulls Placed on Farms During Last Fiscal Year—Grade Animals Were Formerly Used.

(Prepared by the United States Department of Agriculture.)
Reports received by the United States Department of Agriculture from Wayland Rhoads, field agent in animal husbandry for the University of Kentucky, shows effective work in live stock improvement. Following are representative results: In Wayne county 22 purebred beef bulls were placed on farms during the last fiscal year. These animals were either shipped in or purchased at purebred sire sales. Wayne county is a mountainous region, and, although the live stock industry is not highly developed, farmers are giving a great deal of attention to the quality of their stock. The average weight of baby heaves at a recent show was 1,275 pounds.

The Large Animal is an Aberdeen-Angus Steer 1 Year Old; the Small One is a Piney-Woods Steer 3 1/2 Years Old—Better Breeding is One of the Principal Methods of Overcoming Runtiness in Live Stock.

Prize money for the show amounted to \$1,700, which will be increased next year to \$3,000.

A cattleman in Crittendon county, Kentucky, reports that he has been offered three cents a pound more for his feeder calves since he used purebred sires. Formerly his bulls were grades, but having used purebreds he expresses his intention never to return to grade sires.

As typical of the determination of Kentucky communities to improve their live stock, following is one day's work of County Agent John R. Spencer and M. Wayland Rhoads of the State university, who was with him that day: Three farmers visited disposed of scrub bulls and ordered good purebreds; four farmers disposed of scrub rams, 21 signed enrollment blanks in the "Better Sires-Better Stock" movement, pledging themselves to use purebred sires only; a farmer placed an order for a purebred dairy bull from a register-of-merit cow; and the same day a full program of work for further live stock improvement was drawn up with the farm bureau executive committee. The foregoing statements are believed to be of educational interest since nine years ago more than 80 per cent of the bulls in the county were scrubs.

KEEP ALL POULTRY HEALTHY

Wise Poultryman Keeps House Clean and Well Ventilated—Disinfectant is Useful.

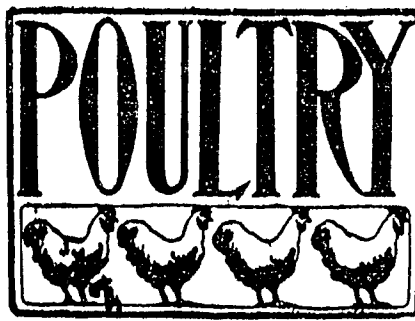

Every poultry raiser knows that fowls thrive best in clean, well ventilated places. By keeping the houses, roosts, nests and runways sprayed with a concentrated lye solution you will do a great deal toward promoting good health and productiveness among your poultry.

Many of the most successful poultry raisers use this lye solution around their poultry houses at least every other week. The solution is made by dissolving a small can of lye in five gallons of water. A sprinkling can, hand spray, or an old whisk broom may be used to apply the solution.

Say, Is My Hat On Straight?

SILK and fine linen make up the material in which this youngster's arrayed. Principally silk, so far as the eye can discern, for the fine linen's worn underneath. The child was winner at the New York silk show, and for style, his raiment is pronounced a model of what a baby ought to wear.

POULTRY

MAKE SUCCESS WITH GEESSE

Goalings Month Old Are Hardest of Fowls—Grass in Ration Is Most Important.

After goslings are a month old they are among the hardest of fowls, but they are rather delicate at first and should have careful attention. The main thing is to keep them warm and dry the first few weeks, feeding them a little at a time and often—say four or five times a day. One of the best rations on which to start goslings is a mixture of corn meal and shorts, mixed with bread or cracker crumbs, hard boiled eggs chopped fine, etc.

It is also a good plan to provide some tender grass as a relish right from the start. The goose is essentially a grazing bird, hence grass in its ration is quite important at all times. Other grain food, along with meat scraps, should be added to the ration gradually as the goslings grow. Most people keep goslings in small movable runs for the first two weeks, so they can't run wild but can be moved to fresh ground each day where they can pick grass and bugs. The extent of this ranging space can be gradually increased until the goslings are a month old, then they should be turned out on free range where they will find lots of pasturage to make rapid growth.

Geese do not have to have water to swim in, but at the same time they get lots of enjoyment from it. If a small stream or pond cannot be provided, then it is quite essential that the fowls have an abundant supply of good drinking water, which they consume freely.

After goslings are turned on pasture, if the grass is in good condition, it is not necessary to feed them grain more than twice a day at first and later once a day. The first object should be to get as large a growth of frame as possible. Let fat come last. To build frame requires lots of grass, bugs and worms, and grains like oats and buckwheat that are not especially fattening.

As fall approaches and the grass begins to fail, corn should be substituted for one of the other grains as it is more fattening. Starting at least a month before the holiday selling season, the geese we want to sell on market are fed all they will eat of a mixture of corn and oats at first and corn alone later. In fitting geese for market it is hardly possible to make them too fat, as extreme fatness has no bad effect upon their table qualities and therefore most people want lots of it.—Farm Life.

GEESSE AND CHICKENS MIXED

Fowls Do Not Breed Very Well Together—Supply of Clean Water Is Important.

Geese and chickens do not breed very successfully together. As is well known, geese like to dig around in the dirt and then wash their faces in every pool of water that is placed in the yard for the poultry. The geese will soon empty the pails by dipping their heads deeply in the water and throwing it over their backs until the pails contain only a few inches of dirty water. A steady supply of clean water is important for growing chickens so the geese become a nuisance in the enclosure.

Geese will often drive the poultry away from the dry mash hoppers. As the profit in geese depends on raising them on a cheap ration largely composed of grass it does not pay to feed them much mash during the summer.

The best place for geese is a field near a pond. This gives the birds plenty of water. They do not need a body of water but it saves the work of carrying a lot of drinking water if the geese have their own supply for washing in.

POULTRY POINTS

Call your flocks as many times as possible during the year.

Drafts in the poultry houses mean colds and colds mean less eggs.

Chicks in the habit of receiving good, fresh milk each day, are very apt to develop some digestive troubles if old milk—milk that is beginning to turn—is given them.

Americans are eating more poultry every year. Farmers may yet find that the henery department is among the most profitable. Start with a standard breed rooster and breed up the flock.

Lack of suitable equipment is one of the main reasons why mediocre success is experienced in raising chicks.

Newly-hatched chicks should not have any feed for 36 hours after hatching, and in most cases 48 hours is better.

To get eggs in abundance, it is necessary not only to place feed in the hen house but to get it into the hen's crop in the right proportion for manufacture of eggs.

PROFIT MADE IN LAMBING SEASON

Little Extra Care by Shepherd at This Critical Period Will Be Repaid Later On.

GRAIN FEED CAUSES TROUBLE

Use of Small Individual Pens Prevents Other Sheep From Injuring Young Animals—Prevent Chilling in Cold Weather.

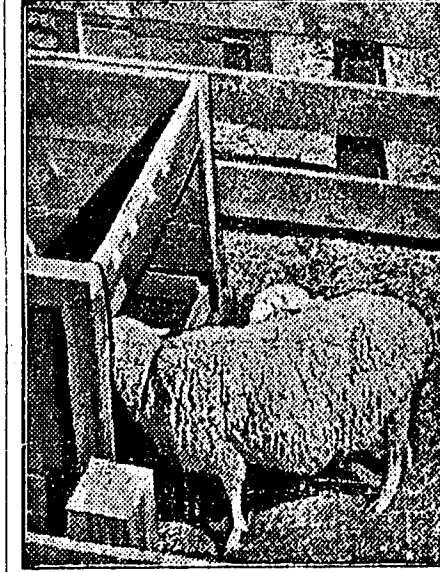

(Prepared by the United States Department of Agriculture.)

The lambing season is a busy time for the shepherd, as the percentage of lambs saved affects the profitability of the flock. Extra work at this period will be well repaid, as a little care given at the right time will result in the saving of many lambs, and even of some of the ewes that would otherwise be lost, and will often thus greatly increase the amount of profit from the flock, according to specialists of the United States Department of Agriculture.

Ewes which have been well cared for and which arrive at this season in good condition will give very little trouble during lambing. It should be remembered that only a small amount of grain, approximately one-quarter to one-half pound per head per day, should be fed to the ewes just before lambing, as heavy grain feeding at this time will often cause udder trouble. Even in flocks which have received the best of care, it is usually necessary to help some of the ewes deliver their lambs. When assistance is needed the hands should be thoroughly cleansed and rubbed with oil to prevent infection and irritation to the ewe.

Ewe in Individual Pen. Just before or immediately after she has lambed, each ewe should be placed in a small individual pen. The use of these pens prevents the other sheep from injuring the lambs and gives the ewe a much better chance to "mother" her lamb.

As soon as the lamb is delivered the shepherd should cleanse the plegm from the lamb's mouth and nostrils.

Ewe and Lamb in Individual Pen.

Some lambs when dropped, while apparently normal in every way, will fail to start breathing, but oftentimes their breathing may be started by blowing into their mouth and nostrils.

The first few hours of the lamb's life is the most critical period through which it passes. In cold weather care is required to prevent the new-born lamb from chilling. In case a lamb becomes slightly chilled it may usually be revived by wrapping in dry cloths or by being placed near a warm fire for a short time. If badly chilled, however, it may be necessary to immerse the lamb for two or three minutes in water which is as hot as the hand can bear, after which it should be wiped as dry as possible, wrapped in dry cloths and placed in a warm room.

Lambs which are unable to stand and suckle, and those which have been chilled, should be helped to secure a fill of milk as soon as possible. After they have suckled two or three times and become thoroughly dry and warm they will stand considerable hardship.

Ewes Disown Lambs.

If individual pens are used for the ewe and lamb, and the ewes are in good condition so that they have sufficient milk for their offspring, very few of the lambs will be disowned. Young ewes with their first lamb, and those in poor condition, give the most trouble in disowning their lambs. In case a ewe refuses to own her lamb it often helps to draw some of the milk and rub it upon her nose and over the lamb. If she has lost her lamb she may be induced to adopt some disowned one or a twin lamb by taking the skin from her own lamb and fastening it over the one to be adopted.

The ewes should be given all the water they want immediately after lambing, and care should be taken to cut down on their feed, particularly

INCREASING EGG PRODUCTION

Poultryman Should Make Use of Trap Nest and Employ Systematic Method of Breeding.

The poultryman who would increase the average egg production of his fowls should employ the trap nest, at least to some degree, practice careful selection always, and put into effect a systematic method of breeding which will result in a more efficient strain, grain, for the first few days.

DON'T POISON INNOCENT BEE

Many of the Little Honey Gatherers Are Destroyed by Spraying at Wrong Time.

Why poison the innocent bee by spraying your fruit trees in full bloom, when it is absolutely unnecessary? "The only way to save and protect our bees," says R. E. Vaughan, plant disease expert at the Wisconsin College of Agriculture, "is to conduct a spray at the right time." He is heartily in favor of the resolution No. 1, passed by the forty-fourth annual convention of the Wisconsin State Bee Keepers' association.

"We don't stop to think of the damage we do to the bees in the neighborhood every time we spray our trees when in full bloom," says Mr. Vaughan. "It does no good to spray trees when in full bloom."

R. H. Roberts of the horticultural department of the University of Wisconsin and a fruit specialist, also is in favor of the resolution. He says we must realize the importance of bee-keeping, and arrange our work so that we can do our spraying at the proper time.

FEED BROOD SOW LIBERALLY

Feed the brood sow liberally. Give her plenty of protein for her own good and for the development of the embryo. Don't neglect the supply of mineral matter. Dry sows can be carried along on alfalfa hay, ear corn, and perhaps a little tankage.

In Training for The Season

THE Fort Worth Girls' Baseball Team is practicing already for the coming season. The club have a good account of itself last year and experts say some, at least, of its members are capable of performing creditably on any diamond. Shown here is Miss Evelyn Singleton, at bat.

CHANGE MADE IN OPERATING FARM

Tractor Is Cause of Numerous Alterations, According to Department of Agriculture.

REDUCTION OF WORK STOCK

Among Other Innovations Brought About Is Variation in Cropping System, Increase in Size of Farm and Fields.

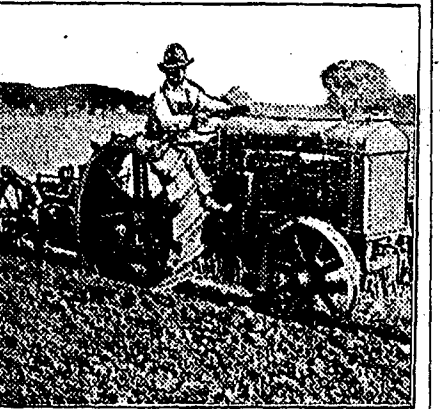

(Prepared by the United States Department of Agriculture.)

Numerous changes in the organization and operation of a farm may be effected by the use of a tractor, according to recent investigations by the United States Department of Agriculture. These changes may be a reduction in the number of work stock, changes in cropping systems, an increase in the size of the farm, a change in the size of fields, a saving in man labor, and changes in livestock enterprises. Detailed results of the investigations are contained in Farmers' Bulletin 1296, entitled Changes Effected by Tractors on Corn Belt Farms, just published. L. A. Reynolds, junior farm economist, and H. R. Tolley, agricultural engineer, are the authors.

Reduction of Stock.

The extent of the reduction in work stock depends primarily upon the number which are already owned, and the work which it is planned to do with the tractor, says the bulletin. No rule is given to show in advance how many work stock can be disposed of on farms in general, but it is said that on most corn-belt farms enough horses will have to be kept to cultivate corn and do the other necessary horse labor which comes at that time.

Where hired help is employed during the year, all or a part at least, of such help may be eliminated, according to the bulletin. On farms run without the use of hired help, the tractor will enable the operator to do his work in less time than he formerly did by combining different operations, such as disking and harrowing, and by performing his work at more opportune times. Where land is available, adjoining or in the vicinity of the farm, it may be possible to increase the number of acres in crops which can be handled with the same

Tractor Changes Farm Operations.

amount of man labor and number of horses as on the smaller acreage before a machine was purchased. Reduction in work stock and increase in the size of the farm may often result in a change in the acres of different crops raised for feed and sale and in the rotation followed. Where the lay of the land permits, or additional land is obtained close by, fields can be enlarged, resulting in more work being accomplished in a given time. Where permanent pastures occur, or the acreage in pasture is not changed to conform to a reduced number of work stock, additional head of other stock can be carried. In nearly every instance the purchase of a tractor requires the further purchase of some machinery for use with it. This machinery may be either for the drawbar, belt, or both. A practice which has met with success is for several farmers to buy one or more belt machines co-operatively, especially a grain separator, thus enabling the farmers to do their own thrashing when they are ready.

How Made Profitable.

"It is obvious," say the authors, "that a tractor will not be profitable if it does not enable the farmer to do at least one of the following things: (1) reduce the number of work stock on the farm; (2) reduce the amount of hired help required; (3) farm an increased acreage; or (4) increase the amount of crops produced." On some farms where peculiar conditions may be present other changes of a minor nature may be made. Often these minor changes cannot be foretold, but will develop naturally after the tractor has been in use some time and has been fitted into the work on the farm.

Copies of Farmers' Bulletin 1296 may be obtained free, upon request, of the United States Department of Agriculture, Washington, D. C.

MATING OF BREEDING FOWLS

It Takes Two Weeks After Male Has Been Introduced Before Maximum Fertility Is Sure.

Breeding flocks should be mated, especially for early hatching. It takes two weeks after the male has been introduced before maximum fertility is obtained. If the hens have been with an undesirable male, it will take three weeks for them to get rid of his influence.

POULTRY

SUCCESS IN TURKEY RAISING

One of the Most Important Steps in Selection of Breeding Stock—Look for Vigor.

One of the most important steps toward success in turkey raising is the proper selection of breeding stock. Unhatchable eggs, weak poults, and small, scrubby turkeys are largely the result of carelessness in the selection of the parent stock. In selecting turkeys for breeding purposes, strength and vigor are the first points to be considered. To indicate this the body should be deep and wide, the back broad, and the breast round and full. The head-shoulder should be of good size and of a clean, healthy appearance. A

A Strong, Well-Made Frame Is Desirable.

strong, well-made frame is shown by thick, sturdy shanks and straight, strong toes.

Inbreeding is harmful and if carried on very long will result in the loss of vigor and vitality. It is, therefore, advisable each year to obtain a new ton of unrelated blood, but of the same type. Nothing is to be gained by crossing varieties, as such practice soon reduces purebreds to mongrels.

By purchasing breeding stock early in the season one not only has a larger number to choose from, but the birds are given ample time to become acquainted with their new surroundings before the mating season.

GEESE THRIVE ON PASTURE

Fowls Will Pick Up Most of Their Living Except During Winter and Breeding Season.

Geese are usually raised where they have a good grass range or pasture as they are good grazers and usually pick most of their living, except during the winter months and the breeding season. Goslings should be fed a mash of two parts shorts and one part cornmeal by weight, changing at the end of three weeks to equal parts of shorts and cornmeal with 5 per cent each of beef scrap and grit. A fattening ration may be made of a mash of one part shorts and two parts cornmeal by weight with 5 per cent of beef scrap, fed in the morning, and a feed of corn at night.

SLIGHT IMPORTANCE OF GRIT

Lack of Material Will Cause Indigestion and Impaired Health—Gravel Also Helps.

Many poultry raisers gradually begin to slight the importance of grit. Lack of grit means poor digestion and impaired health. Regular poultry grit should be kept before the fowls in boxes or hoppers at all times. In addition, a load of gravel near the chickens' home would improve the health and increase the egg yield.

POULTRY NOTES

- It does not pay to feed roots.
- Variety in feed helps to keep the flock in good condition.
- Have the poultry house dry, well ventilated and free from drafts.
- A pullet is a female less than a year old, and when over that age is a hen.
- Removing the cause of disease is better than doctoring the chicken afterward.
- Dropping boards of matched lumber save time and temper when cleaning the house.
- Corn silage in small amounts helps production of eggs and increases the hatchability.
- Semi-solid buttermilk aids the health of fowls and the number and hatchability of eggs.
- Many beginners with poultry make a failure of it because they start on too large a scale.

You Can Budget Your Way to a New Edison

The unique Edison Budget Plan places the New Edison within the reach of all. Thousands have already availed themselves of this practical and convenient method of placing good music in their homes.

You, too, can arrange for convenient and easy Budget Terms under which the New Edison can be delivered to your home at once. With a New Edison in your home, the best music in the land as well as the popular songs and jazz hits of the Great White Way are at your command.

Inquire about the New Edison today and find out why it is the only phonograph that dares the test of direct comparison with the living artists.

NOTICE

The Public Utilities Commission of the State of Idaho has authorized the Potlatch Telephone Company to make a charge of Five Cents for each call over the lines of such Company to all persons who do not have telephones installed. This charge will not apply to any member of the household where a telephone has been installed.

We found it necessary to make such a charge for the reason that there are too many people getting service and paying nothing therefor. This is not only unfair to the telephone company but it is also unfair to the people who pay monthly telephone charges.

Every person who is not a subscriber must pay to the subscriber five cents for each call through central, and it is up to the subscriber to see that the call is paid for as the charge will be made against the subscriber at the end of the month for each nonsubscriber's call over such telephone.

The public will rapidly understand that it is not fair for some to get free service while others pay for it and a charge of this kind rigidly enforced may prevent a future raise of rates.

This charge will be in effect from and after June 20, 1923.

SUMMONS

IN THE DISTRICT COURT OF THE SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF LATAH.

Nellie Foster, Plaintiff,
vs.
Albert Foster, Defendant.

The State of Idaho Sends Greeting To Albert Foster the above named defendant.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows:

To obtain a decree of divorce from defendant on the ground of desertion.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 28th day of May, A.D. 1923.

— Harry A. Thatcher, Clerk
By Adrian Nelson, Deputy
(Seal)
Frank L. Moore, Residence Moscow, Idaho, Attorney for Plaintiff.

NOTICE FOR PUBLICATION

Notice of Intention to Issue, Negotiate and Sell \$65,000.00 Bonds of Good Road District No. 1, Latah County, Idaho, and Inviting Bidders Therefor.

NOTICE IS HEREBY GIVEN that the Board of Commissioners of Good Road District No. 1, Latah County, Idaho, intends to issue, negotiate and sell bonds of the District in the aggregate amount of Sixty-Five Thousand Dollars (\$65,000.00) which shall be dated June 1, 1923, shall mature \$5,000 thereof at the end of ten (10) years from their date, and \$60,000 thereof on June 1 of each year from the eleventh to the twentieth years, inclusive, from their date, and all of said bonds shall be subject to redemption, in the order of their numbers, lowest numbers first, at the option of the district, on June 1, 1923, or on any interest date thereafter. They shall be in denominations of Five Hundred Dollars (\$500) each, and shall be numbered consecutively from one (1) to one hundred thirty (130), both inclusive, and shall be payable at the Bank of America in the City of New York; said bonds to bear interest at the rate of six per cent (6 per cent) per annum, payable annually on February 1 of each year, and at maturity.

Sealed bids for said bonds will be received by the said Board up to ten o'clock a. m. June 15th, 1923 at Linden, Idaho.

Bids must name the best terms at which bidder will purchase said bonds. Each bid must be accompanied by an unconditional certified check in the sum of \$5,000.00 payable to the Treasurer of the District. All bids must be unconditional, and the bidder must be prepared to take the bonds as soon as delivery can be made by the District.

Bids will be opened and considered by the Board of Commissioners of said District, at a Special meeting thereof, to be held in Linden, Idaho, on the 15th day of June, 1923, at ten o'clock a. m.

The Board reserves the right to reject any and all bids.
Dated at Linden, Idaho, Latah County, this 29th day of May, 1923.

F. C. LYONS,
Secretary, Board of Commissioners, Good Road District No. 1, Latah County, Idaho.

NOTICE TO CREDITORS

Estate of Elmer H. Keeler, Deceased.

Notice is hereby given by the undersigned administratrix of the estate of Elmer H. Keeler, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers, within 4 months after June 8, 1923, the first publication of this notice, to the said administratrix at Morgan & Keene's office, in Moscow, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

ELIZABETH KEELER
Administratrix of the Estate of Elmer H. Keeler, Deceased.
Dated at Moscow, Idaho, this 4th day of June, 1923.
23-5t

NOTICE

Notice to the qualified electors of the Village of Kendrick, Latah County, Idaho.

You are hereby notified that on the 19th day of June, 1923 at the City Hall in Kendrick, Idaho, at the hour of 8 o'clock p. m. of that day, there will be held a public meeting of the qualified voters of the said Village, for the purpose of ascertaining whether or not the majority of said voters will authorize the Board of Trustees of the Village of Kendrick, Idaho, to levy in addition to the ten (10) mills provided by law, such number of mills, not exceeding five (5) mills, for the purpose of raising sufficient revenue for the general expenses of said Board of Trustees, and said voters are advised as follows, to-wit:

(a) The assessed valuation of all property in the Village for the preceding year is \$230,178.00.

(b) The amount of money the ten mill levy authorized to be made by the Village Board, \$2301.78.

(c) An estimate of the amount of money necessary to be raised to pay the expenses of said Village for the purposes provided for by law is \$3452.67.

(d) The additional five mills is necessary to defray the general expense of the said Village.

(e) Public meeting will be held June 19, at the hour of 8 o'clock p. m., at City Hall, Kendrick, Idaho.

(f) Qualification of electors: Three months within the corporate limits of the Village, provided such elector is registered according to law.

(g) It will require a two-thirds vote to authorize the Board to levy the additional five mills.

(h) Only qualified electors shall be entitled to vote.

(i) If at such public meeting two-thirds of the qualified voters shall vote in favor of the additional five mills, then the said Village Board shall be authorized and empowered to make the said additional levy, not to exceed the number of five mills.

Dated at Kendrick, Idaho, June 5th, 1923.
A. V. Dunkle, Chairman.
Attest: Ralph B. Knepper, Clerk.

NOTICE TO CREDITORS

Estate of Ira Delbert Bradshaw Deceased.

Notice is hereby given by the undersigned executrix of the estate of Ira Delbert Bradshaw, deceased, to the creditors of and all persons having claims against the said deceased to exhibit them with the necessary vouchers within 4 months after the first publication of this notice to the said executrix at Kendrick, Idaho, the same being the place for the transaction of the business of said estate, in Latah county, State of Idaho.

GARLIC NOT POPULAR FLAVORING FOR MILK

Dairymen With Infested Fields Familiar With Complaints.

Dairy Specialist of New Jersey College Has Helpful Recommendations to Offer—Cleanliness Is Great Factor.

Garlic is not a popular flavoring for milk, and the dairymen with his garlic-infested pastures is all too familiar with complaints that arise at this time of year about off-flavored milk.

Natural grassy flavors are palatable to most people, but even people who can eat the strong-smelling garlic straight down, object to swallowing it in their milk. Since so many pastures are infested with garlic and it is not so practicable to attempt to eradicate garlic in many of our permanent pastures, the dairymen is often confronted with the problem of how to pasture cows on garlic-infested pastures and still keep this flavor out of the milk.

This is often very difficult, but M. H. Keener, dairy specialist of the New Jersey State Agricultural college, has the following helpful recommendations to offer. Bring the cows from the pasture from two to four hours before milking. Aerate the milk thoroughly and cool it to 50 degrees Fahrenheit as soon as milked. The milking should take place in a milk house separate from the stable. If these pre-

cautions are followed religiously the garlicky flavor can usually be controlled.

Another serious trouble, causing that "off" taste in milk is the high bacterial count which results in sour milk. Warm weather, of course, is conducive to the rapid souring of milk. This must be overcome by cooling the milk to 50 degrees Fahrenheit as soon as milked and holding it at a low temperature, 50 degrees or below, until it is delivered. Get a thermometer and check up on your temperatures.

Cleanliness is a paramount factor in the production of good milk. Clean stables, clean cows, clean utensils and clean men are all essential. Unless milk is clean when it leaves the stables, no amount of care thereafter can make it good milk.

POULTRY NOTES

A lazy hen is not a well one. Turkeys are profitable, but need a lot of care to get them started.

Moving layers from coop to coop frequently checks egg production.

Turkeys can eat almost any kind of feed after they are three months old.

It is common knowledge that hens and pullets should be out of doors as much as possible during the winter.

Ordinarily, a gander may be mated with from one to four geese, although pair or trio matings generally give the best results. Wild ganders seldom mate with more than one goose.

Many breeders find it pays to fatten broilers for a week or ten days on a sloppy mash of sour milks and cornmeal.

Eggs kept for hatching purposes that are not set immediately should be turned at least once a day and they should be handled gently.

Fir Bluff News

A. P. Stephens went to Gifford, Tuesday, returning Wednesday.

Wm. Stephas and Clarke Jennings were Lewiston visitors Wednesday.

GLEANINGS

Miss Emma Seelen of Moscow and Miss Ella Seelen of Portland arrived Monday afternoon to visit a few days at the home of their brother-in-law, A. Wilmot.

Lester and Charles Crocker and Don Miller left early Sunday morning for a days fishing trip on Cedar creek. Between them they caught 35 nice trout.

Raleigh Hughes of St. Maries was in Kendrick the week end on business. He made the trip in his truck. Raleigh says that business in St. Maries is very good at the present time.

Neal Nelson and family of Clarkston spent Sunday at the Benscoter home on American ridge.

N. E. Ware and son, Lloyd, returned from Lewiston Sunday afternoon. Mr. Ware was a delegate from Big Bear ridge to the Red Cross convention held in Lewiston last week.

Mr. and Mrs. Byron Smith of Peck were in Kendrick over Saturday and Sunday visiting at the Dammarell and Ramey homes.

Miss Carrie Bunker arrived Sunday noon from Seattle, where she has been attending the Washington University.

According to the Lewiston Tribune, Byron Smith and family of Peck had a narrow escape when their car went off the grade between Peck and the river. Fortunately the car did not overturn and no one was hurt.

Claude Stanton and Merit Smith are both working in the sawmill at Elk River. Claude is working in the boiler room and works seven days a week.

Mr. and Mrs. Fred Sheets and children, Mr. and Mrs. Martin Lee and O. Lee of Lewiston, were in Kendrick, Sunday, to take in the ball game between Lewiston and Kendrick.

Mr. and Mrs. Elmer Bechtold and children spent Sunday in Kendrick visiting relatives and friends.

Mr. and Mrs. Louie Pearson came down from Moscow, Saturday. Louie has given up his position at the Electric Bakery and expects to go to the coast about the 5th of July. In the meantime he will help Ed Halseth with his farming operations.

Mrs. Crow of Lewiston spent the first part of the week at the home of Mr. and Mrs. H. P. Hull.

A. K. Carlson went to Nezperce last week and returned Saturday with his family. A. K. says that it took him 9 hours to drive from Nezperce to Lewiston, a distance of 67 miles, by way of Reubens and Culesac, due to the bad roads caused by the recent heavy rains. The Carlson family will move into the John Wade residence as soon as it has been vacated by Dr. and Mrs. Citteraen who are moving to Shelby, Mont.

Miss Edith Compton, who has been teaching at Boise, Idaho, arrived Sunday evening to visit with her parents. Miss Compton intends to go to Portland or Berkeley, Cal., for the summer.

Misses Joice Hunt and Minnie Torgerson arrived from Lewiston, Monday afternoon, where they have been attending Normal.

Mrs. S. McAllister and daughter, Nona, left for Marshfield, Oregon, last Friday where they expect to spend the summer with relatives.

Opal and Dorothy Jones were passengers to Lewiston, Sunday afternoon, where they will attend summer normal which opened Monday morning.

Miss Evelyn Hanson went to Moscow Saturday to spend the week end with her sister, Manila, and to attend the pageant.

Jesse Collins of Lewiston was transacting business in Kendrick, Saturday morning.

Miss Thelma Perryman spent the week end in Moscow with relatives.

Ed Long returned Saturday evening from Kellogg with the household effects of Mr. and Mrs. L. J. Herres. The Herres family have rented the John Christensen house.

Miss Wade spent the week end at her home in Lewiston.

Miss Florence Hollada was heard over the radio Friday evening. She sang two solos at the U. of I. com-

mencement program at Moscow which program was broadcasted by the university radio station.

Mrs. R. M. Walker of Wallace and Mrs. Roland of Sandpoint, spent a few days with Mrs. H. P. Hull this week.

Miss Gertrude Harris spent the week end in Troy with her mother.

Mr. and Mrs. Blevens and family were passengers to Spokane Saturday afternoon returning Sunday evening.

Miss Lucile Grinolds returned from Moscow Sunday evening, after spending the week end with friends.

E. P. Atchison went to Lewiston on business Monday.

In a letter received by Mrs. Jackson Baily from Curtis Baily, of Sawtelle, California, he says that there is plenty of work there for a man that is willing to work. He states that there is a boom in the building line there and that the Fox Motion Picture Corporation has purchased 440 acres of land at Sawtelle and expect to spend some \$60,000,000 within the next two years in erecting their motion picture studio.

Messrs. and Mesdames Lester Hill, Ed Long and John Kite drove to Moscow Saturday afternoon to attend the pageant, staged by the students of the University, on the campus, Saturday evening.

President Harding will speak at Spokane, July 2, enroute to Alaska.

E. H. Dammarell, Kester and Edith, and Elvira Atchison and Audrey Stanton drove to Moscow Saturday afternoon.

Everett Frazer purchased a Ford car from Frank Fairfield last week, he will use it to carry the mail on route two.

Mr. and Mrs. George Leith and daughters, Reta and Clarice, Bob Spencer and Mr. and Mrs. O. E. MacPerson left early Sunday morning to try their luck at fishing. They found the water very muddy in Pine Creek and the fishing very poor as there evidently had been many up the creek since the season opened.

J. I. Mitcham writes from Tiger, Wash., that if his health will permit he will be in Kendrick for the Fourth. He says that he has been very poorly since his accident last August. But he can't stay out of politics for he says that both the Republicans and Democrats nominated and elected him for Justice of the Peace. However we would advise the democrats of this community not to try speeding through Tiger, as long as J. I. is in office.

Mrs. Ralph B. Knepper and son, John, returned from Spokane Monday afternoon. Mr. Knepper is improving and may be able to come home the latter part of the week.

Many from here attended the Odd-fellow and Rebekah convention held at Troy, Tuesday of this week.

Ben to Mr. and Mrs. Emulus Brown, Wednesday, June 13, a nine pound boy.

The vacation Bible school to be held at the Presbyterian Church, will begin Monday June 25. All the children are requested to be at the church by 9 o'clock.

Carl Erickson, who has been visiting the past two weeks with relatives at Reubens, returned home Tuesday noon. His cousin Vernett Pankey came over with him for a short visit.

Rev. John W. Hoyt of Walla Walla will fill the pulpit at the Presbyterian Church, Sunday morning June 17, at 11 o'clock.

Walter McCrea, Jr., returned from Moscow, Thursday noon.

Mr. and Mrs. E. W. Lutz and children, left Thursday for Spokane to spend the week end with friends.

E. H. Watts and son, and Emulus Brown, returned Wednesday from American ridge, where they have just completed the erection of a large modern barn for Claus Eichner.

Hazel Longteig was a passenger to Lewiston, Thursday, where she will attend summer school at the Normal.

Harley Perryman returned from Orofino, Thursday, where he has been working for the past two weeks at the mill.

While returning from the pageant at Moscow Saturday evening, Jim Cain had the misfortune to smash a wheel on his car. It seems that Jim tried to pass another car while traveling at a pretty fair clip, and was crowded into the bank causing one of the front wheels to collapse. No other damage was done.

"BUNK-ITS" is a chronic gassing disease for which doctors are unable

to find a cure. It's an affliction which causes its victim to expend thousands of good words trying to put something over, only to get a couple of bad words for his pains. Caution—Use your bunk exclusively for sleeping purposes—and don't talk in your sleep.

J. F. Brown received word this week from his son, Carl, who is now located at Sacramento, California, stating that he had undergone an operation last week for appendicitis.

George M. Scott, Grand Master of Masons of Idaho, will make his official visit to the local lodge on Friday, June 22nd.

Mr. and Mrs. F. E. Erickson are advertising an auction sale of their household effects to take place at the Hotel Kendrick, Saturday, June 23. Mr. and Mrs. Erickson and family expect to move to Orofino shortly after the Fourth, where Ed will open a pool hall.

Jack Keshman left Thursday afternoon for Portland, Ore., where he has a position.

Mrs. Mary V. Stevens of Lewiston, organizer for the Women of Woodcraft, was in Kendrick, Wednesday evening to attend a meeting of the local chapter. A class of eight was initiated at the meeting. Mrs. Stevens left Thursday morning for Pullman and Farmington.

George P. Barnum left for Spokane, Thursday morning on business.

Jack Heacock of Juliaetta was transacting business in Kendrick, Thursday morning.

Mrs. C. R. King of Carlton, Oregon went to Moscow, Tuesday afternoon for a short visit after spending a couple of weeks with her daughter, Mrs. George Leith.

E. Erickson was a Troy visitor, Tuesday.

According to Saturdays Star-Mirror, Wm. Dilly, formerly carrier on route two out of Kendrick, while driving a Ford coupe in which five other Moscow young people were riding, overturned near Genesee injuring some of the occupants quite badly. The accident happened last Friday night when Dilly's light went out and he plunged into the ditch, while making a sharp turn, in the road.

Committee Meeting Tuesday

A meeting of all the members of the various committees of the Fourth of July celebration will meet at the town hall, Tuesday night, 8 o'clock. It is hoped that everyone will be present as there are several matters of importance to be attended to.

DON'T FEED FOWLS HEAVILY

Poultry Being Prepared for Shipment Should Not Have Large Amount of Grain.

Don't feed heavily before shipping and expect to get paid for the weight of your feed. Heavy feeding of birds that are accustomed to range causes digestive troubles in shipment, and consequently large shrinkage in weight, to say nothing of off-condition.

CURE ALFALFA CROP SLOWLY

If Dried Too Fast Leaves Dry Faster Than Stems and Become Brittle, Closing Pores.

Alfalfa should be cured slowly and as much in the shade as possible. It should be air-cured, as this method allows the water in the plant to pass out through the natural course, if dried too fast, the leaves dry faster than the stems and become brittle, thus closing the pores and retarding the evaporation of moisture in the stem.

DUCKS FAVOR GRASSY SPOTS

Digestive Apparatus Not Fitted to Take Care of Grain—Fowls Also Require Grit.

Ducks graze like cattle, and should be kept in grassy lots. Their digestive apparatus is not suited for digesting grain, though they enjoy some once in a while. They should be fed twice a day on a mash food the same as hens eat. Ducks will also require grit, oyster shell and charcoal, consuming nearly twice as much as the same number of chickens would eat.
