

JOIN THE CROWD AT KENDRICK JULY 4

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns
of Neighboring Papers.

Judging from the number of labels ordered from this office by strawberry growers this week, the strawberry crop of the Upper Potlatch country will be quite large. One grower alone ordered 1000 labels and other orders ranged from 100 to 500. The Texas Ridge growers were the largest buyers of labels this section having established a reputation as a strawberry centre. Big Bear Ridge will this year come into notice as a strawberry section also. John Adams expects to have upward of 400 crates of berries at his place on Pine Creek and there are others who will have quantities of berries.

The strawberries from here go on the market after all the Lewiston and Clarkston product has been disposed of, and prices usually start better than can be had for irrigated berries except for the first offerings from the irrigated fields. Our berries are considered of better quality than those of the lower regions, in that they are firmer and therefore better shippers, and have a finer flavor.—Deary Press

The work of re-surfacing the North and South highway from a point some four miles south of Genesee to Moscow, is progressing very satisfactorily and the gravel is being spread at a rapid rate and will be a big improvement to the highway—or at least here's hoping it will be.

Just now the road is very badly cut up in places by the large gravel trucks, which make it almost impassable for cars that haven't a very high clearance.—GENESEE NEWS.

A pleasant surprise was given Mr. and Mrs. Harold Jones Tuesday evening at the home of Mrs. Jones parents, Mr. and Mrs. R. F. Pepple, when about 30 of their friends came and showered them with presents of different sorts. The evening was spent in various sorts of amusements, after which light refreshments were served. Mr. and Mrs. Jones received many nice and useful presents.—Juliaetta Record

The Idaho Wheat Growers' association, according to a statement given out at a meeting of the Washington Wheat Grower's association in Spokane, Tuesday, is not likely to function this year, as no arrangements have been made to market the 1923 crop through the association. The Idaho association's affairs are now being liquidated by a receiver under court order.

The Washington Wheat Growers' association elected the following officers: Roy V. Ferringer, Belmont, president; J. H. Smith, Ephrata, vice-president; A. C. Adams, Spokane, secretary-treasurer; Walter J. Robison, Pomeroy, general manager. It is estimated that the Oregon-Washington pool this year will represent about 12,000,000 bushels as against 5,000,000 last year.

Shower for Miss Leith

A shower was held in honor of Miss Rita Leith at the home of Mr. and Mrs. O. E. MacPherson, last Friday evening. Twenty-five guests were present and spent a very delightful evening. The rooms were tastefully decorated with syringa, or mock orange blossoms, and the lights softened with old rose shades.

The feature of the evening was the "Honeymoon Express". The "express" contained many pretty gifts and Miss Leith acted as "express agent". After enjoying a number of games during the evening, dainty refreshments were served.

E. P. Atchison returned from a visit at Spokane, Monday.

Enroute to Alaska

President Harding

President Warren G. Harding, who is touring the west on his way to Alaska, will be in Spokane next Monday, July 2.

Woller-Ellis

Miss Elvina Woller of Cameron and Mr. Frank Ellis of Kendrick surprised their many friends in the community by being quietly married at Lewiston, Wednesday evening, June 27, at the Lutheran parsonage at Lewiston. Rev. E. A. Rein, Lutheran pastor of Cameron, performed the ceremony in the presence of Mrs. Rein and Rev. and Mrs. Cronneck.

The bride has been the popular storekeeper at Cameron for the past three years, coming here from Minneapolis, Minn. She has been very successful during her business career and made many friends both in the Potlatch ridge section and in Kendrick.

Mr. Ellis has been a valuable employe of the Vollmer Clearwater Co. here for the past 12 years. He has a wide acquaintance in the community and his friends will be pleased to learn that he has joined the ranks of the benedictus.

Mrs. Ellis will remain at Cameron until she has disposed of her store when she and Mr. Ellis will make their home in Kendrick.

Child-Wegner

Albert Wegner, son of Mr. and Mrs. Carl Wegner of Cameron, and well known in this community, was married to Miss Maud Child at Wenatchee, Wash. An account of the marriage, taken from the Wenatchee Daily World, follows:

The marriage of Miss Maude Child, daughter of Mr. and Mrs. George H. Child, to Mr. Albert R. Wegner was solemnized Saturday morning at 8:30 o'clock at the home of Rev. Paul Gross, pastor of St. Paul's Lutheran church. The wedding was witnessed by Mr. and Mrs. Grant J. Carey.

The newly married couple left for a two-weeks' automobile trip on the coast, following which they will return and make their permanent home in Wenatchee. The bride has been a member of the Great Northern Railway force for the past six years, as assistant cashier. Mr. Wegner is a graduate of the pharmacy department of the Washington State College, being a member of the class of 1916. He enlisted and served in the American army during the World War for 18 months and for the past four years has been connected with the Wenatchee Drug Co.

Only 215 miles of the north and south highway remains to be built. This road will lie between the British Columbia boundary and the southern line of the state a distance of more than 500 miles. The uncompleted part is connected by fair roads and is open, except in the Salmon river region, where construction work is being done.

Ready for the Big Celebration

Grand Old Time Coming Up July 4th for Everybody Who
Spends the Day in the Potlatch Metropolis

Just four more days until the grand celebration. Time for everyone to make plans to be in Kendrick promptly at 10 o'clock. Wednesday morning as that is when the festivities start. Those who have the matter in charge have arranged the program so there will be something doing from 10 o'clock in the morning until late in the night. There will be no time to kill.

A. Wilmot has charge of the pageant, which is the first feature of the day. He wishes to have announced that all veterans of the Civil War and the World War, also tall Boy Scouts will be expected to be in the pageant. This will be a very appropriate manner of calling attention to what the Fourth of July stands for. Any other entries for the parade would be reported to Mr. Wilmot. Everyone welcome to take part.

The American Legion boys started building the big dance pavilion Thursday morning. It will be a spacious building and care is being taken to make the floor first class in every way. A splendid orchestra has been engaged to play for the dance both afternoon and evening, so those who enjoy dancing will have ample opportunity to indulge. The program committee has completed arrangements for a very interesting, patriotic program. Rev. E. A. Rein, who is always a popular speaker in this community, will deliver the address of the day. Congressman

Burton L. French is expected here and will no doubt talk to his many friends here as a part of the program. Musical numbers and other interesting features have been arranged.

The Kendrick band will be on deck during the day, bigger and better than ever. Two splendid concerts will be their part of the days entertainment. You will enjoy these concerts.

The sports are always a pleasing feature. The last celebration in Kendrick witnessed the defeat of Potlatch ridge in the tug-of-war. Harry Hupp's team carrying off the prize money. Bill Mielke and Harry Hupp are again heading the tug-of-war teams and it is a speculation which will get the money. Bovill and Kendrick will cross bats for the \$100 purse and the outcome of this event is also far from certain.

The committee is making an effort to secure a merry-go-round for the children, but their plans are still indefinite, so that this feature cannot be announced as a part of the program. However, it is hoped that the merry-go-round will materialize as it will mean a big time for the children.

Everyone is expected to be here early Wednesday morning. Come with the expectation of having a good time and you will enjoy the day.

Dempsey to Meet Gibbons, Wednesday

Jack Dempsey

Tommy Gibbons

Next Wednesday afternoon, July 4th, Jack Dempsey, world's heavyweight champion, will defend his title against Tommy Gibbons at Shelby, Montana. Dempsey is to receive \$300,000 for this bout, \$200,000 of which has already been paid to his manager, and the remaining \$100,000 will be paid before Dempsey enters the ring on the afternoon of the fourth.

Fairview Notes

The Herman and Will Wolff families, Mrs. McCall and three sons and Mrs. Frank Wilken attended the charivari and shower given for Mr. and Mrs. George Wilken at Cameron Thursday evening.

T. J. Fleshman made a business trip to Lewiston, Saturday.

Frank Wilken has been helping with the bean planting at the Wolff ranch the past week.

Mrs. Virgil Fleshman and family were visitors at the Amil Peters home Wednesday.

Miss Bertha and August Hartung were callers at the McCall home Thursday.

Frank Byrne spent the week end in Lewiston with his family.

Mr. and Mrs. Lyle Harrison and son were Sunday visitors at the T. J. Daugherty home.

Roy Morgan had the misfortune to lose a valuable work horse last week which spoiled a splendidly matched team.

Mr. and Mrs. Wm. Wolff and son, were visitors at the Hartung home at Cameron, Sunday.

Sunday guests at the Wilfred

Corkill home were Mr. and Mrs. Abner Corkill and family and Mr. and Mrs. Ralph Corkill.

Mr. and Mrs. Virgil Fleshman entertained at dinner, Sunday, the following: Mr. and Mrs. T. J. Fleshman and daughter, Edna; Mr. and Mrs. B. F. Fleshman, Mr. and Mrs. Ed Fleshman and family, Mr. and Mrs. Glen Fleshman, Mr. and Mrs. Yenni and son, Mr. and Mrs. James Helton and James McVicker.

Miss Mildred Craig spent several days last week at the home of her sister, Mrs. Jesse Thornton.

The infant son of Mr. and Mrs. Wm. Wolff was quite ill Monday, having swallowed some kerosene, but is better now.

Vacation Bible School

Vacation Bible School started at the Presbyterian church Monday morning with approximately fifty children in attendance. Rev. Russell was present to get the school started properly. On account of the fact that the Fourth comes next week, the bible school will end this week.

Flu Microbe Is His Captive

THIS is Dr. George E. Vincent, head of the Rockefeller Foundation, which has just located the influenza germ. In five years, it is estimated that influenza has cost 20,000,000 lives throughout the world—nearly one-fifth the population of the United States—more than there were victims of the World War. The chief trouble was that doctors weren't acquainted with the germ and therefore didn't know how to fight the disease.

Wade Keene Improves Farm

Wade Keene of Big Bear ridge is making some extensive improvements in his farm home. He recently drilled a well and got a splendid supply of water. This week he received shipment on a pressure water system which will be installed in the near future. He will have hot and cold water and complete bath room fixtures. He is also making arrangements to have electric lights before long. With these modern conveniences he will have all the comforts of home.

Built Sidetrack

The side track has been put in this week by an N. P. construction crew for the Barnum Lumber & Mill Co. Mr. Barnum has arranged his lumber sheds and planing mill with special reference to economical loading facilities. The sidetrack runs along the full length of his sheds so that with a motor driven loading arrangement lumber may be loaded automatically from the planer to the car. The new lumber sheds, planing mill and office have recently been painted and present a very attractive appearance. Mr. Barnum's lumber business will be a distinct addition to the business facilities of Kendrick and the Potlatch country.

New Road in Good Shape

The highway commissioners are to be complimented on the splendid manner in which they have kept the new surfaced road dragged during the wet weather. There were a number of soft places below town around Powell hill, but they are setting nicely and will soon be packed as hard as the rest of the road. Dragging and keeping the ruts filled seems to be the secret of keeping a crushed rock road in shape.

Hold Joint Club Picnic

About 300 boys and girls, club workers of Washington and Idaho, joined forces recently at a big picnic in the Moscow mountains five miles northeast of Moscow. This was the first joint state club gathering of record in the West, and the boys and girls made the mountains echo with their yells and song. The party included 181 delegates from 20 counties in Washington and 110 delegates from the northern counties of Idaho.

A. Wilmot returned Tuesday night from a business trip to Spokane.

Dean Wright of Agatha was transacting business in Kendrick the first of the week.

POTLATCH GROWS HEAD LETTUCE

This Crop Can be Grown
Here Successfully

The growing of lettuce is spreading from the Lewiston Orchards to various parts of the surrounding territory. It has been found that head lettuce of excellent quality can be grown in the territory tributary to Kendrick and no irrigation needed. The lettuce here matures just about the time the last of the crop is marketed in the Lewiston country. The quality is excellent.

Oriel Dumbauld of Juliaetta raised a head of lettuce that weighed 5 1/2 pounds. Other excellent specimens have been brought in from American ridge and from town lot gardens in Kendrick. Gardeners in Kendrick have raised first class head lettuce for several years, even through the past three dry years, without irrigation.

A little organized effort, particularly on the part of the bench farmers tributary to Kendrick, might make the growing of head lettuce here a most profitable venture. The lettuce here would come on the market after the Lewiston lettuce had all been marketed, so the demand ought to be good.

6 Miles to a Dirt Road

Believe it or not, here is a good story about a dog. A little woolly dog appeared with a bone in his mouth on the main street of a California village. He was bent on burying the bone, and to that end attempted to scratch a hole in the pavement without, of course, making any impression in its hard surface. From street to street he went with the bone in his mouth, stopping at intervals to scratch furiously at the pavement, until finally he arrived at the corner of a street where a new sign had been erected. A resident of the town saw the little pup gaze earnestly at the sign for a few minutes, and then, with the bone firmly clenched between his teeth, he darted off up the street and was still going at top speed as far as the men could see him. A moment later the resident looked at the sign. It read: "Six miles to a dirt road."

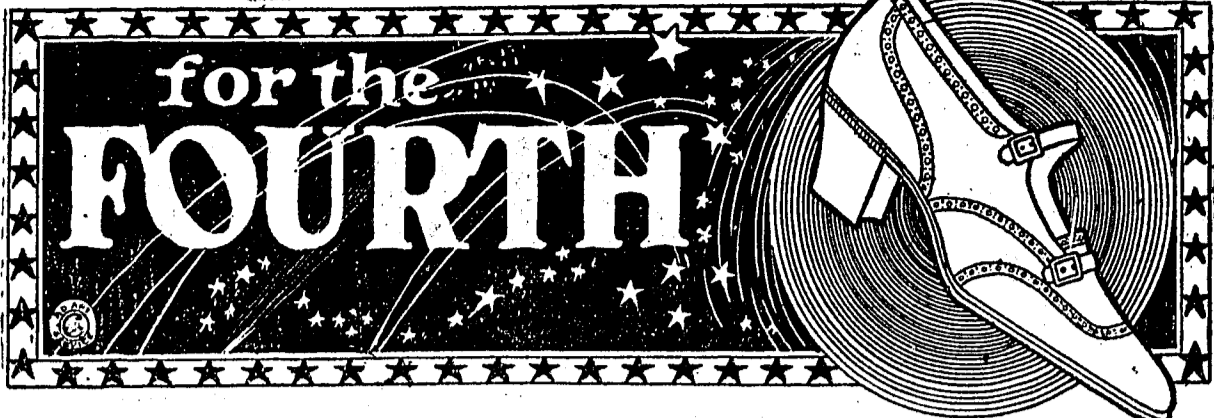

She Wags Her Tail

Walt Mason: When 1st I bot my brinded cow she was as wild as cows can be; a frown was over on her brow, she seemed to have it in for me. And she would hook me with her horns, and crush me up against a post, and rudely step upon my corns, and kick me where it hurt the most. "It's evident to me," I said, "her former master had no heart; he doubtless clubbed her on the head, and knocked her achling ribs apart. Consistent kindness, I believe, will make this cow forget her cares; I'll see what kindness can achieve in softening the grouchy she wears." And so her furrowed neck I'd pat, and tell her she was simply grand, and take a pumpkin from my hat and let her eat it from my hand. I used no language ruff and rude, I did not swat her with a rail, and soon old Bossie ceased to brood; when I approach she wags her tail.

Killed in Auto Wreck

C. E. Faye, real estate dealer of Culesac, was instantly killed Wednesday evening when his car went over a 300 foot embankment on the Culesac grade. He was alone in his car except for the company of his faithful dog, whose barking after the accident attracted the attention of a man who was passing by.

Mrs. A. Otteraaen left Thursday for Shelby, Montana, where she will join her husband. Dr. Otteraaen has opened offices in Kendrick and is now permanently located there.

You will want to be well dressed. It will make you feel comfortable. We can outfit you from shoes to hats in the latest of their kind. Make your selection now, don't wait until the last day.

New Bertha Collars

A new assortment just received and you will want one of these for that new dress.

Ladies Silk Hosiery

We carry a large stock of silk hose and they are priced very reasonable. Colors are black, brown, white, grey, silver and otter.

Corsets and Bandeau

Warner and College Girl Corsets are featured at this store. Many styles for your choosing.

CELEBRATE

Everybody is going to Celebrate. Where? At KENDRICK of course. The band will play an' everythin'. Don't miss the Grand Street Pageant which will take place promptly at 10 o'clock a. m. Our Rest Room and store will be at your disposal all day. This store welcomes you.

Fir Bluff News

I. J. Buckles is harvesting his cherries this week.
Mr. and Mrs. Ike Steensma and children were Kendrick visitors, Saturday A. P. Stephens made a trip to Lookout, Sunday, returning Tuesday.
Several of the young people spent Tuesday evening at the A. P. Stephens home.
Mr. and Mrs. H. C. Wilken went to Lewiston Wednesday to attend the wedding of Miss Martha Finke and George Wilken.
Montie Stephens and Tom Kelly were business visitors in Lewiston, Wednesday.
Mrs. W. C. Wilken and Mary Buckles visited Mrs. Ike Steensma Wednesday evening.
Leon Stephens is working for Lloyd Brown this week.
Miss Mildred Spindler of Kooskia arrived in Fir Bluff Thursday to visit Mrs. H. C. Wilken.
Nellie Buckles went to Peck Friday to visit Mrs. Wm. Johnson.
Marion and Clarence Kelly of Lookout are visiting at the Stephens home.
Josephine Wilken is visiting Bertha Buckles this week and picking cherries.
Alfred Evans of Texas ridge is visiting his sister, Mrs. Ike Steensma.
Jim Barnett was a business visitor in Lewiston, Friday.

Southwick News

The Clarence Hewett family have been batching and looking after their farm east of town the past week.
Anna Triplett is staying with Mrs. Leslie Triplett, while Leslie works at Wright's mill.
Mr. and Mrs. Kerr of Sandpoint were in Southwick last Wednesday and Thursday buying cedar poles. While they were here they were guests of Mr. and Mrs. R. M. Wright.
The childrens' day picnic announce-

ed for last Sunday at the Golden Rule school house was postponed on account of the rainy weather.
Miss Alma Finke attended the reception given for her sister and brother-in-law at Cameron last week.
Dr. and Mrs. Stalker returned to their home in Lewiston Saturday afternoon.
Mrs. Harry Smith of Leland visited with the McCoy family last week.
Mrs. Dean Baker, Miss. Flora Smith and Lee Kirk drove over from Winchester, in his new Overland car last Thursday.
Flora Smith was an overnight guest of Jessie Henderson Friday.
Iva Triplett is staying with her father over at the Wright mill this week.
G. H. Ziemann drove to Winchester last Thursday.
Mrs. R. E. Bowerman and children of Lewiston spent the week end at the Ziemann home, Dan Ziemann returned to Lewiston with them to stay until after the 4th.
Marion Helton was a Kendrick visitor Tuesday.
Edna Jones left Wednesday for Lewiston.
Miss Caroline Bowerman of Lewiston, is a guest of Jane Ziemann.
An 8 pound girl arrived at the Ben Reed home last Tuesday morning.
Mrs. Ben McCoy went to Leland and spent the day Wednesday.
Mr. Hoppe plowed and seeded the U. B. church yard last Monday.
E. McCoy is working at Fruchtl's mill.
Oscar Lawrence went to Marshfield Oregon to work last week.
Last Tuesday the body of Mr. Smila was disinterred from the cemetery here and shipped to Nebraska for reburial. The body was buried here 15 years ago last January.
Again we have rumors of more weddings in the near future.
Mr. and Mrs. Dan Betts returned home after an extended visit in Spokane and Wilbur, they left here two weeks ago with Mr. Gerlach of Spokane, making the trip by auto.

Linden News

The chicken demonstration held by Frem Moore at B. L. Whislers Monday afternoon under the direction of O. S. Fletcher, County Agent was well attended, and greatly enjoyed by those present as was the picnic dinner at noon.
Mrs. S. H. Fry and Mrs. Mary

Vaughan returned from Moscow, Monday.
Mrs. Granyll Wall and children spent Sunday with Mrs. Noble at the Fonberg home.
E. L. Whisler is building a new modern chicken house.
Walter Dorendorf who was working at Gus Farrington's saw mill had the misfortune to get his leg broken Thursday of last week.
C. E. Ponburg delivered a load of porkers to Moscow Thursday.
Mrs. H. O. Gilchrist and sons, David, Harold, Walter and Robert left Sunday for their new home at Longview, Wash.
Frank Starr returned from Elk River where he has been working at a logging camp.
Mrs. Gilchrist, Mrs. Earl Langdon and children and Miss Carrie Allen spent Saturday with Eva Smith.

Time of Cutting Alfalfa for Hay

Has Much to Do With Value of Cured Product as Feed for Different Animals.

(Prepared by the United States Department of Agriculture.)
It is probable that alfalfa is not yet in its heyday. Enthusiasts, whose name is legion, believe that the possibilities of this crop are far from being realized. A great part of the nearly 10,000,000 acres now devoted to this forage is annually harvested for hay, and the conditions under which it is put up, the methods used, and the time of cutting have a great deal to do with the value of the cured product as a feed for live stock.
The number of cuttings that may be taken from an alfalfa field in a season varies according to the locality and the variety from eight or occasionally more, in the extreme Southwest, to two, or sometimes only one, in the northern and semi-arid regions. Thirty to forty days of good growing weather are necessary to produce a hay crop.
Time to Cut Alfalfa.
There are conflicting opinions on the proper time to cut alfalfa for hay. Chemical analyses, says the United States Department of Agriculture, show that when cut in early bloom it has slightly more protein than when cut later, and that certain animals, such as hogs and cattle, prefer it when cut in the earlier stages. These reasons and the belief that frequent cutting produced a larger total yield led to the old practice of cutting just before the flowers appeared. That practice has been discredited.
As the result of experience accumulated it was found that these early and frequent cuttings, although they produced greater yields the first season, usually reduced the life of the stand and the average yield over a period of years. Later the basal shoots were used as a guide, cutting being recommended when they had reached a length of one or two inches or when the plants were one-tenth in bloom. The two guides seemed to be needed as the basal shoots make very little growth in dry weather and blossoms are slow to appear in wet periods.
Recent experiments indicate that cutting at a later date than has generally been advised is more desirable, everything considered. At the Kansas agricultural experiment station a comparison was made of cutting at four stages—in bud, one-tenth in bloom, full bloom, and when the seed pods were forming. The earliest cutting was highest in feeding value, but the stand was practically killed out in one season. Cutting when one-tenth in bloom gave less hay than cutting when in full bloom and seemed to encourage grass and weeds. Cutting when the seed pods were forming gave less hay than earlier cuttings, but the stand was not injured. No damage resulted from cutting the basal shoots, although it has long been taught that clipping them off will reduce the succeeding crop. The Department of Agriculture has conducted experiments which verify these results.
In regions where the rainfall is rather limited, such as the Great Plains, stands are sometimes badly injured by delaying cutting until the plants are nearly through blooming. The injury is more serious when a second cutting is made or a crop is harvested for seed. This is more serious in dry seasons when there will be very little growth after cutting as far as the plants are concerned. Cutting is harmful rather than beneficial, but of course there must be a harvest.
Worries for Farmer.
Once the problem of the time of cutting has been solved, the thing which worries the farmer most is getting the hay into the best condition and stored in the mow or stack. There is general agreement that putting the hay into cocks in the field saves more of the leaves, the best part of the feed; than when curing is done in the windrow, but it takes more labor, and, since more time is required, there is more danger from rain.
Where the weather promises to be fair for two or three days it may be advisable to hurry the curing by doing most of it in the windrow. The amount of shatterings will be greater than when the curing is done in the cock provided the weather remains fair in both cases. However, when the hay is cocked it requires longer to cure, thus increasing the danger of exposure to unfavorable weather. If the hay is exposed to several days' rain, even though cocked, the loss is likely to be greater than would result from taking advantage of the favorable weather and curing more rapidly.

Culling Small Flock of Sheep Quite Profitable

The farmer who raises a small flock of sheep will find it profitable to cull the flock well, suggests J. C. Holmes of the South Dakota State college.
After the wool is sheared, the farmer can tell whether his ewe has a hearty constitution and needs extra care, or whether she is unfit to keep in the flock. If the wool does not come up to standard weight or show uniform quality and grade, the ewe should be branded for culling or for market.
It is as profitable to cull the farm flock of sheep occasionally and thoroughly for wool and mutton as it is to cull the poultry for eggs and white meat.

Hog Is Most Efficient in Making Use of By-Products

With few exceptions, says the United States Department of Agriculture, there is feed enough wasted on every farm in the country to make the pork and pork products consumed on that farm. The hog is more efficient than other farm animals in making use of the farm by-products. With the hen the hog will select and utilize the wholesome parts of unsound and unmarketable grains, refuse from truck crops, and by-products from the dairy. This is one reason why hogs are used on such a large proportion of our farms. But the hog's principal article of diet is corn, and the secretary of agriculture has remarked that "our hog crop serves as a slow absorber for the variations in production of our corn crop year by year, thus ironing out the irregularities in corn prices."

Mysterious Disease of Yellow Soy Bean Plant

A mysterious disease of yellow varieties of soy beans which causes mottling of the seed is believed to be caused by something in the soil or in the way the crop is tilled rather than something inherent in the seed, according to a news bulletin from Ohio State university.

Chamberlain's Colic and Diarrhoea Remedy

Every family should keep this preparation at hand during the hot of the summer months. It is almost sure to be needed, and when that time comes, it worth many times its cost. Buy it now.

UNCLE HANK

It seems like th' main function of a woman's forefinger is to find out whether cullin' cards are engraved.

Within the past few years ducks and geese have both been selling at high enough figures to make them profitable.

Raising early broilers simply means starting the chicks as usual and following with scratch grain and a growing mash until nearly ready for market.

Why Suffer from Rheumatism
Do you know that nine out of every ten cases of rheumatism are simply rheumatism of the muscles or chronic rheumatism, neither of which require any internal treatment? The pain may be relieved by applying Chamberlain's Liniment, which makes sleep and rest possible, and that certainly means a great deal to any one afflicted with rheumatism.

When a BANK ACCOUNT Looks Good

When you have come to the end of your earning capacity—when your working days are over, then is when a bank account looks good. It is then too late to wish for the money you spent foolishly in early life.
"Experience is the best teacher." No truer words were ever spoken, but let's not wait for experience to teach us, because then it will be too late.

The mill will never grind with water that is past, and the money you spend foolishly is gone beyond recall.

If you have not already made regular saving a part of your life plan, do so at once. You will never regret it and you may have cause for thanksgiving later if you practice savings bank thrift now.

Several Advantages of Sweet Clover for Stock

The soy bean can be grown successfully with corn and is becoming a very popular crop in the corn belt, as it can be hogged down and helps to balance the ration of corn. It can be grown on a wide range of soils, but inoculation is necessary when it is grown for the first time. The hay from this crop contains a high percentage of protein and is palatable. This plant adds a great deal to the value of silage when it is grown with silage corn.

Taking Tail From Lambs Not Difficult Operation

The time to take the tail from the lamb is in its second week of life. The operation is not difficult and docking the lambs simply removes something unnecessary to the lamb. Two men and a sharp knife or a docking iron are all that is necessary. Let one man hold the lamb, while the other locates the joint in the tail by feeling on the inside. Push back the loose skin so that a flap will grow over the stub and cut the tail off at a joint about one and one-half inches from the body. The cut is simply made with a sharp knife, in which case a stout cord tightly tied about the stump close to the body will stop unnecessary bleeding. This cord should be removed in eight or ten hours so that there will be no sloughing.

A much better way of docking the lamb is the use of hot docking irons, searing the tail off with an iron heated to a cherry red. This cauterizes the wound and prevents bleeding.

Feed Laying Hens Well During Summer Season

On far too many farms the hens are left to shift for themselves, or perhaps, if the owner feels particularly generous, a little grain is thrown to them. Though hens fed in this way may produce well at the time, they will not do well, or give a profitable production the next fall and winter.

Main Things Necessary in Handling Brood Mare

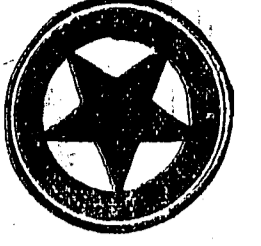

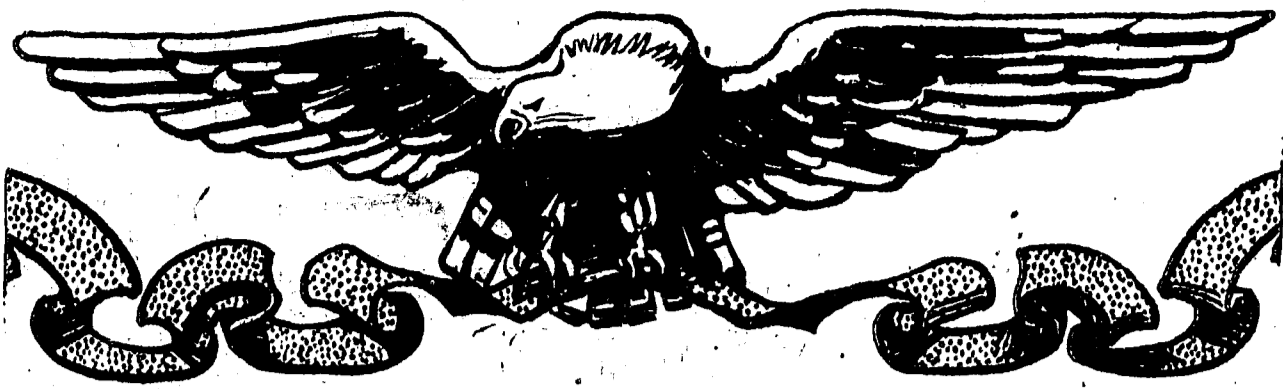

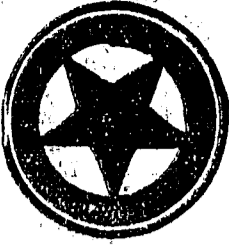

The two main things necessary in handling brood mares are feed and moderate exercise. Wheat bran and oats are the two best grain rations and are better if fed together. Excessive corn and kafir will cause trouble at foaling time.

Pure Bred Sows Are Most Efficient Pork Producers

Experiments conducted by state and government stations all over the country have proven conclusively that pure-bred sows are more efficient pork producers than grade or scrub sows. It has also been proved on one of the largest hog ranches in the Northwest.

Troublesome Weeds a Menace to Alfalfa

(Prepared by the United States Department of Agriculture.)
Weeds are, perhaps, the greatest enemy of the alfalfa crop, says the United States Department of Agriculture. Dodder, which acts as a parasite on alfalfa plants, is very objectionable in seed-producing districts. It does not ordinarily give much trouble

Let Us Write You Up Today

The Farmers Bank

In fields that are devoted entirely to the production of hay, but nevertheless there is great prejudice against seed contaminated with dodder, and most states have stringent laws against the selling of seed containing it. It is relatively easy to kill out patches of dodder in a hay field.

Other troublesome weeds are blue-grass and quack-grass in northeastern United States; crab-grass and Bermuda-grass in the central and southern states; and foxtail or wild millet in the Middle West and the great plains. In the irrigated sections of the West the wild barleys, also known as foxtail and squirrel-tail grass, are decidedly troublesome, as the beards ruin the first crop of hay for feeding unless it is cut very early.

Where weeds are troublesome in the West, wheat is sometimes drilled in the alfalfa in the fall, and as it comes on early the growth of weeds is checked. The first cutting of hay the following spring consists of a mixture of alfalfa and wheat. Cultivation of established stands of alfalfa may help to hold weeds in check, but unless done with considerable care the crop may suffer. The best way to fight weeds is to make conditions so favorable for alfalfa that they are smothered out.

When weeds become abundant in an alfalfa field it is usually better to

plow up the field and make a fresh start than to try to rogue them out.

Vaccination Recommended for Control of Blackleg

Regardless of the perfection achieved in the control of blackleg the disease continues to exact considerable toll every year. Treatment of the sick animals, of course, is fruitless. After death the carcasses should be disposed of by deep burying or, better still, by burning. The best way to combat the disease is by building up immunity in susceptible animals by vaccination. It should, however, be remembered that protection is not built up until after eight to ten days after vaccination. When the immunity or protection is once established, it continues from fifteen to eighteen months. Ordinarily calves under six months and cattle over four years are not vaccinated, the disease being most prevalent between these two ages.

Clean Chicken House to Eradicate Harmful Mites

To eradicate mites a thorough cleaning of the chicken houses and spraying with a suitable disinfectant having a sufficient body is all that is necessary. All roosts, loose boards, and

boxes should be removed and the disinfectant applied in the form of a rather coarse spray, using a suitable pump. Some of the best materials for the purpose are the so-called wood preservers which consist of anthracene oil and zinc chloride. As a mixture of this kind is a little too heavy to spray well, it may be thinned with an equal part of the kerosene. Crude petroleum is almost equally effective and is usually cheaper. It should be thinned by adding one part of kerosene to four parts of crude oil.

Outline of Method for Seeding Sweet Clover

A good method of seeding sweet clover or other clovers is to sow it on oats ground. It may be sowed at the same time and with the same machine if a drill with grass seed attachment is used; or it may be sowed after the oats are sowed and the seed covered by harrowing or rolling. Sweet clover is not likely to smother out the oats, though on some timber lands which are rich in minerals and poor in organic matter it might happen that the clover would tend to check the growth of the oats. If the land is rich enough in organic matter to grow good oats the clover will not be likely to injure the oats to any extent.

Milk Indispensable in Feeding Young Chicks

It is generally agreed that sour milk or buttermilk should not be fed to chicks in galvanized containers. When fed, glass, porcelain or earthenware utensils should be used. The lactic acid in the milk may act on the galvanized containers, resulting in a chemical combination which may prove poisonous, resulting in chick losses. Milk is indispensable in feeding chicks, and if properly fed there is absolutely no danger in feeding it. Perhaps the type of container has been responsible for the occasional report of unsatisfactory result in feeding milk. It is, of course, necessary to keep the utensils clean.

Soy Beans Provide Feed for Dairy Cow in Winter

In order to provide a winter's supply of cow hay equal to alfalfa in feeding value, try soy beans. In ordinary seasons a crop of soy beans grown immediately after the removal of the wheat crop will yield from one to two tons of hay an acre. The wheat stubble should be plowed and the beans drilled at the rate of 40 to 60 pounds an acre any time up to August 1, earlier seeding being preferred.

GLEANINGS

Mrs. Harry Grinolds returned Saturday from a two weeks' visit with her daughter at Mullan.

A. K. Carlson closed a deal last week for the purchase of the brick residence which was the home of the Carlson family before they left Kendrick a year ago. They will again make this residence their home.

Fred Bolon and W. M. Hughes of Orofino were in Kendrick, Monday, driving through to Lewiston. They were representing the Pictorial Sales Bureau and selling U. S. official pictures of the World War. Mr. Hughes and Mr. Bolon have the agency for the entire state.

Mr. and Mrs. D. K. Pearson of Spokane arrived Friday for a visit with their daughter, Mrs. G. G. Oldfield.

Mr. and Mrs. E. E. Bechtol and family of Moscow visited relatives in Kendrick Sunday.

Mr. Kennedy of Pierce City arrived Saturday morning to spend the week end at the home of Mr. and Mrs. Walter Thomas. His wife had been visiting here a week prior to his coming.

Mr. and Mrs. George Leith and daughter Rita, and Robert Spencer drove to Spokane, Sunday afternoon, returning Monday evening.

Mr. Helber of Spokane, owner of the Kendrick Hotel, was transacting business in Kendrick Friday and Saturday of last week.

The ball game scheduled to be played last Sunday between Genesee and Kendrick was called off on account of the rain.

It is being rumored that the treasury of the town of Kendrick will soon be enriched by some heavy fines unless auto drivers are more observing of the speed limit.

According to the Deary Press the state road between Deary and Bovill will soon be completed. This road will be on regulation grade and will eliminate the steep hills that formerly had to be negotiated to get from one town to the other.

Miss Amsel Green, daughter of Mr. and Mrs. T. O. Green of Juliaetta, left last week for a trip to Hwall. She will return in the fall and teach in the Coeur d'Alene high school.

Orofino, Genesee, Nez Perce and Culaeac have all had chautauques this summer. At all four towns the guarantors had to dig up to a more or less extent. Nothing daunted, however, they have all signed up for chautauque programs for next season. Nez Perce has over fifty signers to the contract, each one guaranteeing to take \$25 worth of tickets. Orofino has over 50 signers also. Weather was poor chautauque variety.

It is reported that J. M. Woodward, who lives near Leland, has a crop of sweet clover that will yield 2½ tons to the acre. There are 10 acres in the patch.

Grangeville has passed an ordinance to macadamize 24 blocks within the city. The citizens will vote on a proposed \$15,000 bond issue July 24, to pay for the street improvement.

According to an announcement last week the Lewis County Fair will take place next fall, October 4, 5 and 6.

Little Will's, a 6-year-old youngster, had been disappointed in love. He had a date to play with little Mary Ann at her house across the way. When he got there he found she had forgotten all about him and was coasting down hill on his rival's new wagon. Willis returned home, disgusted with girls in general and this one in particular. He didn't cry or contemplate suicide. Instead he went straight to his mother and with childish naïvete said: "Mamma, do you know what I'd do if I was Adam? I'd go right up to heaven and I'd say, 'Please Mr. God, if its just the same to you, I'd like to have my rib back.'"

Ted Graham who operates the launch between Asotin and Rogersburg, caught a 500 pound sturgeon in Snake River recently. The big fish was 10½ feet long.

Mr. and Mrs. Theo. Riey and family moved to Spokane last week where they expect to spend the summer. They will return next fall before school starts.

Rev. Russell will preach on the following subject at the Presbyterian church next Sunday at the usual hour: "What should be the Attitude of the Church toward the Ku Klux Klan?" In the afternoon at 2:00 he will hold a service for Men and Women only.

Mrs. Kelley and Eloise, arrived

Tuesday afternoon from Lewiston to visit friends here.

The road program for the northern part of Idaho contemplates an expenditure of \$3,000,000, according to William J. Hall, state commissioner of public works at Boise. Much of the work is proceeding, and the remainder is to be contracted for soon.

The county commissioners of Latah county met as a board of equalization at Moscow, Monday to take up the matter of equalizing such tax matters in connection with the assessment of 1923 as may have come before them.

It is reported that Oscar Torgerson, who is well known here and a fine fellow, suffered a broken leg while working in the woods in the Marble Creek country last week. It is said the right leg was fractured above the knee.

Frank Boyd said the first of the week that in a letter from his father, who lives in Clarkston, it stated that the recent rains had damaged the cherry crop there to a very great extent and that only a small portion of the crop had been picked.

J. Swenson of Lewiston, representing the Continental Life Insurance Co. of Des Moines, was transacting business in town Monday and Tuesday.

Mrs. S. P. Callison returned home Tuesday from Coeur d'Alene, where she has spent the past three weeks visiting her parents, Mr. and Mrs. Lewis.

G. M. Scott, grand master of the Masonic Grand Lodge of Idaho, visited the local Masonic lodge last Friday evening. After the usual lodge meeting a banquet was served in the dining room. Mr. Scott made an address during the course of the evening.

Jesse Collins of Lewiston was looking after property interests in Kendrick Wednesday of this week.

O. E. MacPherson has a big, black shepherd hound dog that has outgrown Kendrick. He is the star boarder at the MacPherson home. He is good natured and is good to eat and sleep. Anyone wishing a dog possessing all of these virtues may have the same with the blessing and well wishes of its owner, absolutely free of charge and no questions asked. Come and get him.

There will be a meeting of the Fourth of July committee at the town hall tonight. All members of the various sub-committees are requested to be present.

Mr. and Mrs. Delbert Riggle are spending the week in Clarkston. Mr. Riggle is taking his vacation from the bank.

There will be a union meeting of the two churches in the park Sunday evening. Everybody is cordially invited to attend.

Manager Oldfield of the New Kendrick is advertising a special program for July 4th. He will have a good program during the day with added feature for the night shows. Movie fans will have a treat in store for them both in the morning, afternoon and evening.

CRESCENT CLIPPINGS (Too late for last week)

Mrs. Mike Forrest and children, Mary, Frances and Ida took dinner at the Axel Ekman home last Wednesday.

Quite a bunch of pack mules passed thru here Tuesday.

Will Wright, Frank Wilmet, and Harvey Triplet made a business trip to Lewiston Thursday. The latter bought a car.

Mr. and Mrs. J. E. Long and Hazel Carmen visited with Mrs. A. J. Wells at Southwick Thursday.

Mike Forrest and son Burton went to Kendrick Thursday, and returned Saturday with a new team.

Mrs. Frank Carey Jr. returned to her home near Cavendish, Thursday. Her brother, Elmer Souder, accompanied her.

J. E. Long took dinner at the C. C. Wright home Friday.

W. H. Weyen took a load of hogs to Moscow for John Darby, Friday.

Tillie Dorendorf spent Sunday with Alloo Craimer.

Mr. and Mrs. John Darby visited at the Addison Alexander home Sunday, and the E. I. Darby home Monday.

Mr. and Mrs. Wm. Kander visited Sunday afternoon at the Mike Forrest home.

Texas Ridge

Mrs. Pres Osborn and Mrs. Anna Smith visited with Mrs. M. Pierce Thursday.

Mrs. Al LaBoile has been staying a few days with her daughter in Deary.

M. L. Pierce made a business trip to Clarkston, Thursday.

Mr. and Mrs. E. C. Babcock were visitors at the Blenden home on Bear ridge Wednesday.

Mrs. Chas Anderson has been

visiting at the home of her daughter, Mr. Peterson, in Deary.

Gus Birchmier made a business trip to Moscow one day last week.

Jake Atber and family spent Sunday at the John Gentry home in Deary.

Mrs. Bert Baker and son, Lloyd returned home Saturday after spending a few days at the Viola Baker home.

Mr. and Mrs. Birchmier and children were visitors at the Otto Alber home on Bear ridge Sunday.

Reginald White came up from Juliaetta Saturday, to help Nestor Olson thru the strawberry season.

James Miller and family and Mr. and Mrs. Babcock were callers at the Ogden home Sunday afternoon.

Mrs. Chas Weber has gone to St. Maries to visit a while with her daughter, Elsie.

Methodist Church

Come and worship with us Sunday morning at American ridge. The preacher will be there if he has to walk.

Production of Certified Potato Seed Increasing

(Prepared by the United States Department of Agriculture.)
Production of certified potato seed has made rapid strides in the last four years, according to the United States Department of Agriculture. In 1919 there were in the United States but 3,750 acres of potatoes that met the requirements set for the production of certified seed. In 1922 the acreage reached 17,258, and the production of certified seed was 2,273,900 bushels. In 1919, 43 per cent of the acreage inspected and offered for certified seed was accepted and passed; in 1920, 52.75 per cent; in 1921, 59.5 per cent; while in 1922, due to higher standards called for by the regulations, but 40 per cent of the acreage offered was accepted as good enough for certification.

Canadian potato growers have also been making increased effort to produce more certified seed, producing 309,865 bushels in 1922, as compared to 234,551 bushels in 1920.

The grading of certified seed potatoes is being given much attention in a number of the states and Canada where grading inspection is required, and requirements are equally strict in all localities. Certified seed must live up to its name both in looks and in results. It must be free from varietal mixtures, true to type, and comparatively free from blemishes and mechanical injuries. The growers of certified seed, the inspection agencies, and the organizations conducting the marketing of the product are all equally concerned and share a mutual responsibility.

Soy Beans to Replace Alfalfa in Lamb Feed

The use of soy beans to replace alfalfa in lamb feeding was given a trial during the past winter at the Illinois station. Results obtained from a ration of corn and soy bean hay were practically as good as from the standard ration of corn and alfalfa hay. When whole or ground soy beans with soy bean straw were fed in place of the hay, the results were less satisfactory, the gains being lower and the feed consumption higher.

The two lots fed alfalfa hay and soy bean hay gained at the rate of a third of a pound per head per day. On the basis of feed requirements for 100 pounds of gain, the alfalfa-fed lambs ate six pounds less corn but six pounds more hay than those fed soy bean hay. This showing would indicate that soy bean hay of good quality makes a very acceptable substitute for alfalfa.
