

KILLING WHALES IS PROFITABLE BUSINESS

Represents a Million Dollar Investment on Coast

The writer had the opportunity recently of visiting the whaling station at Westport, Wash., which is located on the coast near Hoquiam. It is a most interesting place and is visited daily by many tourists from all over the country. One man who drove to the gate of the grounds about the same time we did, anxiously inquired if any whales had been brought in that day. When he was informed that there were three, his delight was apparent. He said: "I came clear from Connecticut to see a whale and I am not going to be disappointed."

There is one characteristic feature of a whaling station that is unlike any other business institution, except possibly a glue factory—its "smell". The whales when brought in by the boats are dead—in fact they are very dead as the odor for miles around most amply testifies. If at any time you wish to make a disparaging comparison in the superlative degree concerning the odor of anything, just say it smells like a whaling station and you have said it all. Hoquiam is 15 miles from the station but when an unfavorable wind is blowing the effluvium is plainly evident at that place. Imagine then, what it is at close range.

The whaling station represents an investment of over a million dollars. Being in the newspaper business we are not financier enough to realize a logical reason for spending so much money on an institution for pickling whales. However, it is said that the investment brings handsome profits during favorable seasons. The factory itself is made up largely of huge vats for rendering the oil from the blubber and enormous tanks to retain it.

Four small steam ships are used for hunting the whales. They are short, stubby little vessels but capable of withstanding a very rough sea. They go out on the ocean for a distance of 75 to 100 miles in search of whales, and like all hunting expeditions, their luck varies. The boat that came in the morning we visited the station brought three whales, which was an unusually large number. They were of average size, probably 35 feet long.

The boats are fitted with a harpoon gun in the bow. When a whale is sighted and gets within range the harpoon, attached to a steel cable, is fired into him. The harpoon has a torpedo on the point which explodes when it hits, spreading the points of the harpoon so that it will not pull out. Sometimes the force of the explosion kills the whale instantly. The dead whale is then pumped full of air so it will float, a flag stuck in it so that it may be easily seen and the hunt for another live one resumed.

Every part of the whale is utilized. The oil in the blubber is the most valuable part and the bones in the head are used in many ways. Parts that are good for nothing else, are ground up into fertilizer.

The process of cutting up the whale is not an enviable job. The work is done by fins, who, as we all know, have an affinity for fish. The blubber is cut into strips about a foot wide and about the same thickness. These strips are hauled into the boiling vats. The next step is to split the whale open. This was being done while we were there by a big, bloody fin who wielded a heavy, double bitted axe. He was standing waist deep in the carcass, chopping his way out. We'll venture to say that seventeen Turkish baths could never make him smell like a rose.

It seems that the feature that occasions so much interest in a whale is its size. Aside from its bigness, it is little less than a shapeless mass of flesh and bone. As it

Death of George Creighton

George Creighton of Moscow, one of the best known merchants of north Idaho, passed away Tuesday evening in a Los Angeles hospital, where he underwent an operation a few weeks ago. Mr. Creighton was a pioneer of Moscow and but recently sold out his interest in the Moscow store. He had been very successful in a business way.

LATAH COUNTY NEWS PARAGRAPHS

Clipped From The Columns of Neighboring Papers.

H. M. Driscoll, of the Idaho Bean and Elevator company, Troy, who, with Jack Driscoll, a farmer of the Troy district, was in Moscow, Monday, states that the harvest which is just beginning on the ridges tributary to Troy will be one of the largest in the history of the country. There is a large acreage of both wheat and beans, both of which promise a big yield.

As in all parts of the Inland Empire, the smut showing in the wheat is bigger than usual, Mr. Driscoll states. It is spotted, however, some pieces of wheat having a large percentage of smut, while other pieces are practically clean. Mr. Driscoll anticipated an unusually heavy business this fall, as the tonnage of both wheat and beans is certain to be heavy. Binders are beginning work in the wheat fields this week.—Star-Mirror.

J. G. Limer, the well known pioneer resident of Helmer, was in town for a few hours Tuesday, accompanied by his daughters, Mrs. Bill Peterson and Mrs. Harry Tracy. He states that crops are fine in his section. He cut five tons of clover from less than three acres of land and his timothy is making a like yield.

George Wood who lives on the Morton place, is cutting wheat hay that will yield two tons or better to the acre and Dan Flagg has timothy that stood over five feet tall.—Deary Press.

In addition to the Hazelwood station in Genesee, the Purity Creamery company of Moscow have a station at the rear and basement portion of the Sampson barber shop, which receives and ships quite a large amount of cream each week.

The more cream shipped from Genesee, the more ready money there will be in circulation. If you don't have a cream check coming in each week, ask your neighbor how he likes the idea of having a "pay-roll" on his farm.—Genesee News.

The warm weather since the big storm of last week has ripened grain so that harvesting has begun. The grain was not hurt much by the storm and there will be some large yields, recorded. Threshing is expected to begin next week.—Troy News.

Mr. C. C. Combs has a very fine truck garden in Juliaetta. As a demonstration of what can be raised here, Mr. Combs took some of his garden produce to Moscow, among the lot some excellent sweet corn, for which he received a very high price.—Juliaetta Record.

George E. Baskett, book-keeper of the Empire National Bank of Lewiston, committed suicide Thursday morning of last week by jumping off the Snake river bridge. His body was recovered Tuesday near the Roy Evans dairy ranch. It is said that the unfortunate man was short in his accounts at the bank, which is the motive that prompted him to commit suicide.

lies dead in the water it presents nothing but a huge black bulk, which, if reduced many hundreds of times, would be of no more interest to us than a tadpole.

Will Use Thoroughbred to Develop Breed of American Utility Horses

Imported Thoroughbred Stallion Glaisdale.

(Prepared by the United States Department of Agriculture.)
The imported thoroughbred stallion Glaisdale, shown in the illustration, has recently been obtained by the bureau of animal industry from the remount service of the War Department, for use in the work for the development of a breed of utility horses especially adapted to western range and farm conditions. He will be used at the horse-breeding station near Buffalo, Wyo., where the United States Department of Agriculture is cooperating with the state of Wyoming in this breeding work.

Handsome Specimen.
Glaisdale is a brown stallion, three years old, a handsome specimen of his breed, and he carries the blood of many of England's equine aristocrats in his veins. His sire, Rosendale, won two of England's high-class races as a three-year-old and was third in the Derby the same year. His grandsire, St. Frusquin, has sired some of the greatest horses ever produced in England.

Bleck-Bechtol

On Saturday evening Miss Marie Bleck and Mr. John Bechtol were united in marriage at the home of Rev. Rein in Cameron.

Mrs. Rein played Lohengrin's wedding march as the bridal party approached the improvised altar and bower of shasta daisies and breath of heaven, where the vows were exchanged. Rev. Rein used the single ring service. The couple knelt on a pair of white satin pillows embossed with Luther's shield in colors.

The bride wore a black canton crepe dress made in simple lines. She carried a sheaf of pink gladiolus with a shower of blooming myrtle. Miss Wanda Bronsiek, niece of the bride, acted as maid of honor and wore pink organdy with a corsage bouquet of pink rosebuds and breath of heaven.

Mr. Bechtol was attended by Mr. August Brammer of Cameron.

The young couple left immediately for Big Island on a camping trip accompanied by Mr. and Mrs. Charles Thornton and son. They will make their home in Kendrick upon their return. We wish them a long and happy future.

Cameron News

Arthur Wegner returned home Sunday from Portland.

D. Scharnhorst and daughter, Mrs. H. Koster of Genesee, were visiting relatives, Sunday. Mrs. Olday, Laura and Minnie Blum accompanied them home.

Mr. and Mrs. Schultz, Sr. were Sunday evening callers at the Carl Koepf home.

Miss Helen Mielke was visiting home folks, Sunday.

Chas. Olday was visiting his parents, Sunday.

Mr. and Mrs. C. McCoy and son, and Mr. and Mrs. W. McCoy returned to their home Wednesday after visiting relatives for several weeks.

Rev. and Mrs. Rein and sons, motored to Lewiston, Monday, for a few days.

Grandma Gertje of Lewiston is visiting at the Bronsiek home.

First Load of Wheat

Fred Mielke of Cameron brought in the first load of new wheat to the local warehouse. It was threshed Thursday. Forty-four acres on his place averaged 32 bushels to the acre. Part of the field went 40 bushels and the rest not so good.

NEWSY HAPPENINGS FROM SOUTHWICK

Boy Shot in the Forehead but Injury Not Serious

Last Saturday evening Fred Cowger, a boy of ten, had a narrow escape with his life, when he and a smaller brother went after the cows. They thought it would be fun to scare Mrs. Preston and Mrs. Carter, so they went behind some brush and yelled like wild animals. Mrs. Preston thinking the boys coyotes, took a shot at them with a .22 rifle, hitting Fred in the forehead. The bullet glanced off cutting a scalp wound, which was not serious, otherwise the prank would have ended in a tragedy.

The hay crop in this vicinity is nearly all up. Now the farmers are cultivating beans, which are beginning to look very promising. Some winter wheat is being cut. The straw is very long but the heads are large also and there should be a bumper crop, at least we hope so.

Rev. Benjamin and family were guests at Ben Presnals over the week end.

H. F. Ziemann returned from Seattle, Wash., Saturday.

The Harry Wright mill has closed on account of the scarcity of labor.

Little Neal Southwick was on the sick list last week.

Cleo Southwick of Cream ridge visited relatives and friends here last week.

At the baptismal service held last Sunday afternoon at Cedar Creek, Rev. Clarke baptized Edna Jones.

Bertha Jones returned from the Frank Dygert home near Juliaetta, the first of last week.

Mr. and Mrs. Frank Wilnot left, Monday for Salem, Oregon.

Dr. Seely of Kendrick was called Sunday, to treat Granopa Baker, who is suffering with rheumatism. He is somewhat better now.

Mr. and Mrs. Preston and Mr. and Mrs. Carter of Moscow spent the week end at Far-Nuf-Inn.

Oscar and Alex Lawrence and Ed Schoeffler left the first of the week for Pomeroy, Wash.

G. H. Ziemann drove to Lewiston, Tuesday.

Mr. McDowell came home last week from the coast where he has been for the past 6 months. He makes his home with his daughter, Mrs. W. R. Smith.

L. J. Southwick drove over to Moscow, Friday.

George Hayward sold his cherry crop to Bob Spencer in Kendrick. They were snipped to points in Montana. The cherries here this year are not so plentiful as last year but what is lacking in quantity is more than made up in size and quality.

It seems there has been enough lumber hauled thru Southwick the last few weeks to build a wall around the world.

Mrs. H. D. Hayward entertained the Ladies Aid last Thursday with seventeen ladies present. The refreshments were sandwiches, salad, ice cream, raspberry short cake and ice tea. Mrs. George Jones and Mrs. Will Jones will serve August 30.

Mrs. Wm. T. Seely is organizing a chorus of young people here, the first meeting to be held this afternoon at 3 o'clock. She will instruct the members of the chorus in vocal music and when they have become proficient they will furnish music at the Methodist and Presbyterian churches on alternate Sundays. This will be splendid training for the young people and will also be the means of assisting the churches to secure many pleasing musical numbers.

Moscow shipped over 12 cars of locally grown cherries this season according to a statement made recently by a Spokane produce firm. Over \$20,000 was paid to the growers in that locality for this year's crop.

Another Pioneer Passes

Andrew Sunberg was born in Sweeden January 25, 1842 and died July 21 at the age of 81 years, 6 months at the home of A. W. Longfellow where he has made his home for about six years.

He was an old pioneer having come to Cedar Creek and located on a homestead in 1884 and has made this community his place of residence for 39 years. Andrew has been a devout christian and was respected by all who knew him. God granted to him in his closing hours the desire that his death should be as his life quiet and peaceful, his life gently faded without a struggle from the life here to the life immortal, and he was "Asleep in Jesus, Blessed sleep from which none ever wake to weep. A calm and undisturbed repose. Unbroken by the dread of toes." The services were held at the Gold Hill Community church, July 29, by the pastor Rev. B. Pressnal.

HARVEST LABOR IS A SERIOUS PROBLEM

May be Solved by Moscow Chamber of Commerce

The Moscow chamber of commerce and the Moscow Farmers' Union will co-operate in an endeavor to help the Latah county farmer solve his harvest labor problem, by maintaining an employment agency. The matter of harvest help was brought up at the meeting of the chamber of commerce, Wednesday, and after some discussion, in which A. H. Oversmith, C. L. Jain, John Naylor and Guy Wolfe took part, the following resolution was offered by Mr. Oversmith and unanimously adopted:

"Be it resolved by the chamber of commerce of Moscow, Idaho, that "Whereas, the Palouse country is now harvesting one of the largest crops of grain in its history, and "Whereas, in order to harvest, thresh and conserve such crop a large amount of labor will be required: "Now therefore, be it resolved, that the Moscow Chamber of Commerce request, that as far as practicable all public work and other operations be postponed until after the harvest season, and that the Moscow Chamber of Commerce and its membership lend every assistance possible for the purpose of assisting the farmers to conserve their crops."

Farmers needing help and men who are willing to work, are asked to call on the Farmers' Union, at the store, on South Main street, or to get in communication with B. C. Rowe, secretary of the chamber of commerce, at his office in the Urquhart building, telephone 140.

Mr. Rowe wishes it stated that he will be glad to give much of his time during the harvest season to bringing the farmer and laborer together, so that there will be as little delay as possible in harvesting the crop. Copies of the chamber of commerce resolution have been mailed to the Potlatch Lumber company, commissioners of highway districts and other employers of men.—Star-Mirror.

Editors Have Their Troubles

Here's a story that is being handed from one newspaper to another: Editors have their troubles. One of these men who preside over the destinies of a western newspaper is mourning the loss of two subscribers. One wrote asking how to raise twins safely, while the other wanted to know how he might rid his orchard of grasshoppers. The answers went forward by mail, but by accident the editor put them into wrong envelopes, that the man with the twins received this answer: "Cover them carefully and set fire to it, and then the little pests, after jumping in the flames for a few minutes, will be speedily settled." And the man with the grasshoppers was told to "give castor oil and rub their gums with a bone."

"Kendrick Terrorized"

The following startling headline appeared in a recent issue of the Moscow Star-Mirror: "Kendrick Terrorized by Man Thought to be Insane". We might state here that the headline exaggerates the case almost beyond recognition. The man in question was a red headed, mild manner individual who was apparently slightly unbalanced mentally. Marshal Joe Gardner rounded him up and learned that he had spent a week in the Colfax jail after which he was turned loose to shift for himself. He also learned that he was a dope fiend and was so weak from the effects of the drug that he was in no condition to work or to hold a job if he got one. He notified the Sheriff's office Tuesday and the "terror" was taken to Moscow.

Japanese Crepes

Imported Japanese crepes are of heavy weight and durable quality. Colors, pink, lavender, orange, coral and medium blue. You won't need to compare these low prices.

Like Steensm and family spent Tuesday night at the Max Rietz home at Moscow.

Feeding Methods Help Live Stock

Plan Evolved by Department of Agriculture to Help Breeders.

(Prepared by the United States Department of Agriculture.)

The United States Department of Agriculture announces a nation-wide service to bring about improved methods of feeding live stock in the United States. The plan is to bring the knowledge of up-to-date feeding methods to the attention of every live-stock feeder in the country; and, in co-operation with state agricultural colleges, county extension agents, and other agencies interested in the betterment of the live stock of the nation, to offer individual assistance to farmers who have special and difficult feeding problems.

Ever since the beginning of the "Better Sires—Better Stock" campaign, which has enrolled more than 1,200,000 head of live stock for improvement by means of better methods of breeding, there has been a demand from stockmen over the entire country that the government inaugurate a better-feeding campaign. A large proportion of inquiries on live-stock problems received by the department from farmers of the country seek information on feeding. The plan which has been evolved is expected to render a definite service to those who ask for feeding help, and also to bring a knowledge of better feeding methods to many who would not make inquiries.

Best Methods Not Practiced.

That good feeding methods are known and practiced by the more experienced live stock owners in the United States is shown by the good condition and finish of a proportion of animals appearing at stock yards, and by good records in production made by some feeders. But the proportion can be made larger with benefit to the individual grower and to the nation, according to the department live-stock specialists. A conservative estimate based on a careful survey of American farms shows that there are 14 million head of runty animals in the country. A majority of nearly 1,000 farmers who commented on the situation stated that adequate and proper feed are the principal means of preventing runtness in animals. The tremendous mortality among young animals is largely attributable also to lack of proper care and feed up to and including weaning time. These, and other facts, point to the great need for more general practice of better feeding methods. They point also to the immense amount of benefit that can accrue to the nation in the way of better live stock, more economical production, and a great saving in feedstuffs, if the general live-stock feeding practice of the nation can be made more efficient.

Department Offers Wide Service.

The Department of Agriculture offers an individual feeding service that is available to any live-stock feeder in the country. One of the principal features of this service will be a "Feeding-Problem Sheet" which farmers may obtain from their county agents, state agricultural colleges, or direct from the department at Washington. On the feeding-problem sheet the farmer outlines his problem briefly, and describes his stock and available feeds. The sheet is designed to enable the farmer to give sufficient information in brief form to make additional correspondence unnecessary. The farmer then refers the sheet to his county agent, who makes a recommendation. When the sheet reaches the department a live-stock feeding specialist studies the problem and makes suitable reply.

A great deal of the correspondence received from farmers asking information on special feeding problems does not state the conditions surrounding the problem in sufficient detail to permit of a definite reply. Additional correspondence often causes delay. The feeding-problem sheet will correct this and make it comparatively simple for a stockman to submit his problem in a form such that it may be correctly diagnosed. Farmers will be encouraged to consult local agencies for help with problems that are plainly local in character.

The feeding-problem service will be of help to others besides those farmers who submit their problems for diagnosis. The department will study the problems confronting live-stock feeders in the different sections of the country and make public the results of this study, thereby enabling the entire country to derive a benefit. Every live-stock feeder who submits his feeding problem, telling his present practice and the results being obtained, will be an active aid in the drive for better methods of live-stock feeding.

Handbook Being Prepared.

A vest-pocket-size handbook entitled "A Handbook for the Better Feeding of Live Stock" is being prepared by department feeding specialists for free distribution to farmers who desire a handy-sized set of simple rules and reference tables to be followed in feeding the different classes of farm animals. Requirements of animals, simple analyses of feeds, feeds to substitute for other feeds, and simple feeding instructions will enable farmers to understand the principles of better feeding, and fit their own practice to suit the conditions on their farms.

The Department of Agriculture realizes that, in order to accomplish the most good, a drive for nation-wide better feeding of live stock must have the co-operation of all persons interested in the subject. Summaries of the progress of the work will be published to keep those interested informed.

ASPARAGUS NEEDS GOOD BED

Should Be Located Where Soil Is Deep and Where Cultivation Will Not Interfere.

No spot in the garden is more valuable than the asparagus bed. It should be located where the soil is deep, and where it will not be in the way when cultivating other crops, as it is permanent. Because it is to stay in the same spot for years the soil should be well prepared before it is planted. Dig out deep and mix well with partially rotted manure so there will be ample humus in the lower soil, and then plant the roots—which should be two years old at least—spreading them evenly all around, and covering with five or six inches of soil.

PUREBRED SIRES WIN FAVOR

Encouraging Increase Reported in Number of Improved Bulls in Wisconsin County.

In 1918 only 329 of the 1,257 bulls in service in Winnebago county, Wis., were purebred, according to reports to the United States Department of Agriculture. After two years of better-sires work the number of purebred sires had increased to 645. At the end of the third year the assessor's records showed 777 purebred bulls in the county. This record shows that at the beginning of 1922 over half of the bulls in service in the county were purebred.

Big Bear Ridge

Rev. and Mrs. Landal who recently returned to Moscow, from China, where they have been doing Missionary work for the past twenty-eight years, gave a most interesting talk at the Lutheran church Tuesday evening.

One Dollar Saved Represents Ten Dollars Earned

The average man does not save to exceed ten per cent of his earnings. He must spend nine dollars in living expenses for every dollar saved. That being the case he can not be too careful about unnecessary expenses. Very often a few cents properly invested, like buying seeds for his garden, will save several dollars outlay later on. It is the same in buying Chamberlain's Colic and Diarrhoea remedy. It costs but a few cents, and a bottle of it in the house often saves a doctor's bill of several dollars.—Adv.

Kendrick State Bank
 Kendrick, Idaho

IN THE PROBATE COURT FOR LATAH COUNTY, STATE OF IDAHO.

Order appointing time for hearing petition for specific performance of contract to convey real estate.

In the Matter of the Estate of Edward Ameling, Deceased.

Carl W. Lohman having filed his verified petition in this Court, setting forth facts on which he bases a claim that he is entitled to the specific performance of a contract, made with him by said decedent in his life time, to convey certain real estate, which said contract is set forth in his petition, and praying for an order requiring the administrator of the above-entitled estate to execute to him a conveyance of the following described real estate, to-wit:

The East half of the Northeast quarter of section Twenty-five, Township Thirty-eight, North of Range Two, W. B. M. in Nez Perce County, Idaho.

It is ordered, that Monday the 20th day of August, 1923, at the court room of said Court, at Moscow, Latah County, Idaho, be and the same are hereby appointed as the time and place for the hearing of said petition; and that this order as notice thereof be served on the Administrator of said estate, personally, and published in the Kendrick Gazette a newspaper published in Latah County, Idaho, for at least four weeks successively five publications before said hearing.

Adrian Nelson, Probate Judge.
Dated July 17, 1923 29-5t

SUMMONS

In The District Court of The Second Judicial District of The State of Idaho, in And For The County of Latah.

VERMONT LOAN & TRUST COMPANY, a Corporation, Plaintiff,

vs.—
JOSEPH O. CATLETT, the unknown heirs of Kate Catlett, deceased; the unknown devisees of Kate Catlett, deceased, and all unknown owners of and unknown claimants to the following described real estate in Latah County, State of Idaho, to-wit: West half of the Northwest quarter of Section numbered Fourteen, and the South half of the southwest quarter of section eleven; also a tract commencing at the southeast corner of the northeast quarter of the northeast quarter of section numbered fifteen in township numbered thirty-eight North of Range numbered two (2), West of the Boise Meridian, running thence west to the east side of the Big Potlatch Creek, thence in a Northeasterly direction along the side of the Big Potlatch Creek to a point where the said east side of said Big Potlatch Creek intersect with the east side line of section numbered ten in township numbered thirty-eight North of Range numbered two, West of the Boise Meridian, running thence south along the section line to the place of beginning, said tract being on the south and east side of the said Big Potlatch Creek, all in township numbered thirty-eight (38) North, of Range numbered two West of the Boise Meridian, EXCEPT that part of the southwest quarter of the southwest quarter of section numbered eleven (11) in township numbered thirty-eight (38) North of Range numbered two (2) West of the Boise Meridian, lying North and west of Big Potlatch Creek, which has heretofore been deeded to Theodore Riley, Defendants.

THE STATE OF IDAHO SENDS GREETING To the above name defendants.

You are hereby notified that a Complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff the nature of the above entitled action in general terms is as follows: To foreclose a certain mortgage upon the above described real estate and, which mortgage is of record in book 49 at page 251 of Mortgages of the records of Latah County, State of Idaho.

And you are hereby directed to appear and answer the said complaint within twenty days of the service of this Summons, if served within said Judicial District and within forty days if served elsewhere and you are further notified that unless you so appear and answer complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and seal of said District Court, this 24th day of July, 1923.

HARRY A. THATCHER, Clerk of the District Court.

By Adrian Nelson, Deputy Clerk. (Seal of Court affixed)
A. H. Oversmith, attorney for plaintiff, residing at Moscow, Idaho.
L. H. Brown, attorney for plaintiff, residing at Spokane, Washington. 30-6t

FOR OVER 40 YEARS

H. Oversmith, Moscow, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

Johanna Hooker, Administratrix of the estate of Abraham Hooker, deceased.
Dated at Moscow, Idaho, July, 14th, 1923. 29-5t

"The Kid"

"The Kid," which will be the attraction at the New Kendrick theater this week, is the most striking venture of Charlie Chaplin into the field of six-reel attractions. The production is about three times the length of the comedian's previous pictures and is considerably more than three times funnier than anything he has done. The story has a real plot, and the humor is caused by situations in a real story and is doubly laughable because of the comical antics Chaplin can always be counted upon in any situation.

The story carries so much delicious humor that in the hands of an ordinary actor it would be a comedy hit, but with Chaplin in the role of the foster father of "The Kid" the production is the fastest laugh-sustainer that has ever been issued in the form of a motion picture. It is deservedly designated as First National's six reels of joy. Do not depend on anyone else to tell you about it. You won't be able to understand them because of the laughing memories it will cause.

Fir Bluff News

Dave Scott of Lenore visited T. J. Buckles, Tuesday.

Mrs. Dean and daughter, Nellie, visited at the Steiger's home, Thursday afternoon.

Mr. and Mrs. Tom Mox Mox of Julieteta and Mr. and Mrs. Jim Wilson Davis of Lapwai visited Felix Lowery, Friday and Saturday.

Dave Carson of Culesac visited friends in Fir Bluff this week.

Mrs. T. J. Buckles and daughter, Lulu, were Lewiston visitors Saturday.

Helen Davis and Beryl Harrison and Roy and Charlie Craig of Leland were picnicking along the Clearwater river, Sunday.

Mr. and Mrs. George Coffland of Clarkston arrived Sunday, to visit at the Dean home.

Mrs. A. E. Dean, and daughter, Nellie, Lloyd Brown and Mr. and Mrs. George Coffland were Sunday dinner guests at the Johnson home at Bed Rock.

The following were Sunday visitors at the I. J. Buckles home: Mr. and Mrs. Frank Wilken and children, Montie, Floyd, Leon and Eugene Stephens, Jim Barnett, George Barnum, A. O. Wegner, Gus Kruger and Mr. and Mrs. Ike Steensma, and children.

Ernest Steigers left for Asotin, Sunday morning.

I. J. Buckles left for Orofino, Monday, with a load of Apricots.

A. P. Stephens made a trip to Lookout, Monday.

Many of Food and Feed Necessities Profitable

A plan that is suitable to many farmers who succeed in raising as many of the food and feed necessities as may be profitable, estimating cost of production, and then grow a crop or two, or a few animals for cash. Such a plan will enable the farm manager to meet his obligations for both present and future, better than diversifying merely to live or for money without considering cash as well as food and feed.

The money crop is very important and care should be taken to plan wisely for the cash. Farmers must have cash as well as food for their families and feed for stock.

Increase Food Value of Potatoes by Spray

Has Effect of Controlling Diseases and Helps Yield.

(Prepared by the United States Department of Agriculture.)

Spraying potatoes with such copper sprays as bordeaux, pickering sprays, and barium water sprays not only has the effect of controlling the diseases for which they are applied, but, according to the United States Department of Agriculture, thorough and timely spraying usually greatly increases the yield, influences the composition of the tubers, and increases their keeping qualities.

For many years observers have reported also a stimulating effect of bordeaux mixture on potato foliage and a gain in yield even when no diseases were present. The why and how of this effect of copper have been much discussed by scientists and many experiments made. An interesting contribution to this subject has lately been made by F. C. Cook of the bureau of chemistry in department bulletin 1146, where evidence is presented to show that bordeaux and other copper sprays increase the starch and nitrogen constituents of the potato tubers and consequently make them more valuable for food and industrial uses.

The bulletin contains considerable data collected from a number of stations doing experimental work with copper sprays on potatoes and should be of interest to the plant physiologists and others doing investigational work of this nature. Results obtained in seven states (Virginia, Maine, Minnesota, Pennsylvania, New York, Connecticut and New Jersey), showed an average of 2,581 pounds of solids of the tubers per acre for the non-copper sprayed plants and 3,430 for the copper-sprayed plants, an average increase of 32.4 per cent, or 48 bushels, due apparently to the use of copper sprays. The results should furnish additional support to the practice of spraying potatoes.

Those interested may secure a copy of this bulletin free of charge upon request from the United States Department of Agriculture, Washington, D. C.

Value of Pure Bred Is Taught by County Agent

A county agent in Colorado reported to the United States Department of Agriculture a convincing method he has used in furthering the better-sires work in his county. A butcherling and meat-cutting demonstration was given with two market hogs, one a pure-bred Duroc Jersey and the other a scrub red hog. The hogs were weighed, then slaughtered and dressed, and weighed again. The live weight of each hog was practically the same. The dressing percentage of the pure bred was about 7 per cent more than that of the scrub. The good hog figured to be worth \$2.10 more than the other. This was but a fraction of the difference in value between the two hogs, however, as the pure bred was but half as old as the scrub hog, and had consumed much less feed.

The meat-cutting demonstration was held in the auditorium of the county school, and more than 500 men and

\$250.00

8 foot McCormick or Deering Binder

Complete with tongue truck

at

KENDRICK HARDWARE COMPANY
"EXCEPTIONAL SERVICE"

women were present. The two carcasses were cut into the various cuts of meat, showing the superior quality of the meat of the pure-bred hog.

Alfalfa in Full Bloom Will Produce More Hay

Alfalfa cut in full bloom is slightly less palatable but produces more hay than when cut at beginning of bloom. Fields mowed earlier die out sooner. Cutting the alfalfa just when the new growth starts from the crown gives the plants the best chance of competing against weeds and conserves moisture by keeping the ground shaded most of the time. Too late fall cutting promotes winter killing. Nebraska station finds that it does not pay to plant alfalfa in rows and cultivate for hay.

Combination to Provide Pasture for Farm Stock

A combination that will provide a good pasture for sheep, calves and colts all summer may be secured by using rape as a base. The mixture consists of three pounds of rape, one bushel of oats, one-half bushel of one or two other small grains, and from ten to twenty pounds of sorghum. If desired ten pounds of Sudan grass may be substituted for the sorghum with satisfactory results.

Durability of Leather Can Be Much Increased

Specialists in the bureau of chemistry, United States Department of Agriculture, have learned that the durability of machine belts, driving belts, harness, and other leather articles used by the farmer can be greatly increased after a judicious selection in the first place by giving them the care that will strengthen and preserve them.

Rat Viruses Unreliable and Also Quite Costly

"Generally unreliable and costly," the United States Department of Agriculture says of rat viruses. The department has vigorously urged the destruction of rats and co-operated with local rat-killing campaigns. Farmers' Bulletins 896 and 932, issued by the department, describe methods of destroying rats.

Spread Manure Thin in Every Short Rotation

Best evidence indicates that manure gives largest returns to the ton when applied thin once in each short rotation, or twice in a rotation of more than five years. Eight to ten tons to the acre in a three or four-year rotation, used with an average of 200 pounds of acid phosphate to the acre each year, give excellent returns, the New York State College of Agriculture at Ithaca has found. A manure spreader is said to be a time and labor saver, particularly in making light applications, and it tears up the manure so it is mixed more uniformly with the soil.

A Splendid Medicine for the Stomach and Liver.

"Chamberlain's Tablets for the stomach and liver are splendid. I never tire of telling my friends and neighbors of their qualities," writes Mrs. William Vollmer, Eastwood, N. Y. When bilious, constipated or troubled with indigestion, give them a trial. They will do you good. Adv.

GLEANINGS

Mr. and Mrs. C. B. Green of Moscow and Mr. and Mrs. S. P. Callison left this week on a camping trip in the Bungalow country on the North Fork of the Clearwater. They expect to be gone two weeks.

The Kendrick ball team will go to Bovill for a game next Sunday.

Mr. and Mrs. L. J. Brown and family of San Francisco were in Kendrick, Monday, for a short time. Mr. Brown is a newspaper man and started the Moscow Star in 1886. He and his family have been touring the northwest in their car for the past two months.

Mr. and Mrs. Jim Baird of near Calgary, Alberta, returned home Monday after visiting at the home of Mr. and Mrs. Sidney Dicks on American ridge.

Dr. S. I. Ringsage expects to leave the middle of this month for Aberdeen, Wash., where he will locate having rented office rooms there.

It is reported that Mrs. Harvey Barr died the first of the week at a Moscow hospital after an illness of several weeks. She was the wife of one of the contractors who did the street work here last winter, and is well known in Kendrick, where she made a number of friends during her short stay here.

Harold Hanson went to Spokane last week and returned with a Ford bug.

Mr. and Mrs. F. E. Erickson and children left Monday for Orofino where they will make their home. They have many friends here who regret to see them leave. Mr. Erickson will open a pool hall in Orofino.

George Lamphere, publisher of the Star-Mirror and Idaho Post at Moscow, was in Kendrick on business last Friday.

The Kendrick Hardware Company has taken over the agency for the Brunswick phonograph. They received their stock of machines and records the first of the week.

Mrs. N. B. Long fell from a cherry tree last Friday while picking cherries and suffered a dislocated shoulder and a number of severe bruises. She was quite ill for several days after but is getting along very nicely at this time.

It is reported that Juliaetta shipped 15 carloads of cherries this summer. The growers received from 7 to 10 cents a pound. Juliaetta tomatoes and apricots are now on the market.

Rev. and Mrs. C. D. Bell and daughter, Alice spent Sunday in Kendrick at the home of Rev. and Mrs. C. A. Pickering. Rev. Bell preached here Sunday morning and evening and on American ridge in the afternoon.

According to a report of the prohibition director of Idaho there were 94 distilleries seized in the state during the past year and 65 stills.

William Bozarth, among the leading farmers in Idaho, and whose crop near Culesac embraces about 1000 acres, placed an order recently for 17,000 sacks, for the 1923 harvest. Mr. Bozarth remarked that his crop will measure up to the 1916 production, when his grain returned 35 bushels an acre and tall grain 45 bushels.

Don Miller, Harry Fowler, Frank Crocker and two sons, Lester and Charles, went to Elk River, Sunday, to spend the day. They each secured about a gallon of huckleberries.

A man who shocks wheat all day this harvest season in the Potlatch earns his money. The bundles are reported to be exceptionally heavy. Wheat heads are filled from tip to tip.

Prof. A. O. Strauch made a business trip to Lewiston yesterday.

B. Ramey, local N. P. agent, was quite ill for several days last week with an attack of appendicitis.

"I don't need any speedometer on my car," said John McNeer. "I can easily tell the speed."

"How do you do that?" asked Jim.

"Well, when I go ten miles an hour my lamps rattle; when I go fifteen miles an hour my mudguards rattle, and at twenty miles an hour, my bones rattle."

Mr. and Mrs. G. F. Walker, Mr. and Mrs. N. E. Walker and Freda, spent Sunday near Bovill along the banks of the Potlatch. They also drove to the Elk River country.

Ralph Richardson stated this week that the wheat in his neighborhood on Six ridge was comparatively free from smut. A test of his wheat was made recently by County Agent Fletcher and it averaged about 14 smut heads in 600, which is considered good. Some fields in the Potlatch are very much worse than this.

Halvor Nelson of Farmington, Wash., was transacting business here the first of the week.

The Helpman property on school house hill is being repaired preparatory to getting it in shape for renting.

A. W. Jones and wife visited at the home of Mr. and Mrs. N. E. Walker Tuesday night. Mr. Jones is a conductor on the O. W. R. & N. from Spokane to Pendleton.

There is a move on in Latah county to secure a county health nurse through the Moscow chapter of the Red Cross. It is said that sentiment among the various branches of the chapter is favorable to the movement.

The Moscow Chamber of Commerce will call a northwest meeting, Saturday, August 18, for the purpose of working out some plan of stabilizing the price of wheat. Congressmen and senators from several states have signified their intention of being present at the meeting.

Mrs. J. L. Kelly, trained nurse of Lewiston, who formerly lived in Kendrick, is taking care of Mrs. N. B. Long who was injured last Friday.

Worn to Mr. and Mrs. F. O. Wittman of Cameron, Wednesday of last week, a son. There are now five sons in the Wittman family.

Mrs. Harry West of Peck arrived the first of the week to visit relatives here. She is a sister of Norris and Floyd Walker.

Harold Hanson will leave today for Reardon, Wash., where he has accepted a position as book-keeper with the Farmers Union Warehouse Co. of that place.

Mrs. Trumbull of Spokane is visiting at the Atchison home this week.

Mr. and Mrs. Ralph Knepper and family returned home Saturday night from their vacation trip to the coast.

N. B. Long returned Thursday afternoon from a trip to Leavenworth, Wash., where he visited his daughter, Mrs. Varo. He also visited at a number of coast points and reports a very enjoyable trip.

Mrs. C. H. Cole of Dunsmuir, Cal. returned home Tuesday after visiting her parents, Mr. and Mrs. John F. Brown.

Harry Ameling and Frank Brocke had a narrow escape from serious injury last Saturday evening while returning from the Cavendish country. They were driving Harry's Dodge runabout at a pretty good clip when the car swerved, jumped a ditch and struck a bank head-on. The only damage done was to the car which came through with a bent fender, axle and other minor injuries.

Walter McCrea, Jr., purchased a used Ford car this week and is transposing it into a bug.

Rev. D. L. Clarke, evangelist, was here a short time Friday enroute to Southwick where he is holding meetings.

Mr. and Mrs. Dammarell, Ruth, Bobbie, Kester and Quentin left early Wednesday morning for a camping trip to Priest Lake.

Mrs. Hollada, who for a number of years has been head of the dry goods department at the Kendrick Store, has accepted a position with the David's Store at Moscow. She and her two daughters left Wednesday afternoon for their new home. Mrs. Hollada has had a wide experience in the drygoods business and is very efficient in this department. The Hollada family will be greatly missed here.

Increase in Savings

Savings deposits of Idaho state banks increased \$479,350.37 for the year ending June 30, 1923, according to a statement of the total resources and liabilities of the banks issued recently by E. W. Porter, state commissioner of finance.

At the close of business June 30, 1922, savings deposits in the 119 state banks amounted to \$3,233,385.82 and on June 30, 1923, there was \$3,712,736.19 in the savings deposits accounts. Demand certificates of deposit showed an increase of \$75,644.88 in the year, thus making a total increase in these two classes of deposits of \$554,995.26.

This record is made, Mr. Porter says, with 10 banks less than were doing business June 30, 1922. Ten banks closed during the year.

Loans and discounts were reduced during the 12 months covered in the report by more than \$4,100,000. On June 30, 1922, the 119 banks showed a total of \$26,996,526.40 in loans and discounts as the largest item of their resources. One year later this figure was reduced to \$22,856,254.10.

The total resources of the banks at the beginning of the year was \$40,909,323.12 and 12 months later after 10 banks dropped out the resources were cut to \$36,432,987.01.

Linden News

James Langdon returned to Juliaetta Friday afternoon having finished painting C. E. Fouburg's residence, he will return later and paint

the other buildings.

Mr. and Mrs. Geo. Garner and family moved out from Kameron Siding Saturday evening. George will harvest near Cavendish.

Mr. and Mrs. Arthur Bohn spent Sunday with Eva Smith.

A shadow was cast over the community Friday, afternoon when the news came of the death of Andrew Sunberg. Mr. Sunberg hasn't any relatives in this country but leaves a host of friends by whom he will be greatly missed.

Mr. and Mrs. F. C. Lyons and sons left Friday for the Little Salmon River where they will join a fishing party of Mr. and Mrs. Ernest Goodnight, Mr. and Mrs. Roy Lyons and Mr. and Mrs. A. Longfellow of Nampa, Idaho.

Miss Alice Lebito arrived from Spokane, Monday, and will spend the remainder of the summer with Mrs. J. E. Long at Crescent.

Herman W. Long who has been spending part of the summer with home folks, left Saturday morning for Kellogg, Idaho, where he expects to work in the mines.
