Minerals Necessary for Milk Found in Legumes

That clover, alfalfa, and soy bean hays are probably the best source of the minerals necessary for milk production was proven by recent tests at the Ohio station.

These legume hays contain more of the essential minerals than other feeds and the cows in the experiments seemed to be able to assimilate these minerals better than those fed as supplements in the form of bone meal, etc.

These experiments also indicate that the way in which hay is cured has an influence on the availability of the minerals which it contains, and that hay cured without heavy dews or rain or without long exposure to the sun is the most nutritious.

Kendrick Gazette

Ralph B. Knepper, Publisher

Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879. Subscription \$1.50 a year.

BIG BEAR RIDGE

Mr. and Mrs. Wade Keene were Lewiston visitors, Monday.

Mr. and Mrs. O. E. MacPherson and son, Donald, were week-end visitors at the N. E. Ware home.

A church convention will be held at the Lutheran church, October 23, 24 and 25.

Mr. and Mrs. W. H. Fairfield, daughter, Miss Verna and son, Rufus, have moved to Clarkston, Wash., to make their home.

The Girls' Sewing Club wish to express their thanks to everyone who helped to make their annual sale a success. The fancy work sale brought over fifty dollars while \$18.25 was realized from the lunch.

Miss Clara E. Cowgill home demonstration agent from the U. of I. was the guest of Mrs. K. D. Ingle and Mrs. A. N. Rognstad during her stay here.

Mr. and Mrs. D. J. Ingle and son, Dwight, Mrs. Hendren and daughter, spent Sunday with friends in Jubaetta.

Mr. and Mrs. Horace Comstock and children spent Sunday near Troy.

Miss Carol Sternberg of Troy spent the week end with Miss Johanna Hooker.

Fred Hecht was a Lewiston visitor, Friday.

FAIRVIEW LOCALS

Misses Agnes and May Byrne are moving to Kendrick to live and Mr. and Mrs. Frank Wilken and family are moving to the Byrne ranch.

Frank Duff of Thurlow, Montana is a visitor at the T. J. Pleshman home. He came through with the emigrant car belonging to Ony Walker. Mr. and Mrs. Walker and son are coming overland in their car and are expected to arrive with in the next few days.

Dr. Moser of Lewiston was a visitor at the J. L. Glenn home Sunday.

Mr. and Mrs. Lyle Harrison and son escaped a serious accident Saturday evening when their team became frightened by some loose stock in the road coming down the hill by the Ralph Corkill place, they were thrown from the buggy and very severely bruised but no bones broken. The buggy was entirely wrecked and the team ran to the T. H. Daugherty home where they stopped.

L. Clann was in the neighborhood on business the first of the week.

Mr. and Mrs. J. E. Long and family visited at the Wm. Kauder home, Sunday.

Oat Improvement Plan Secures Good Results

Superiority of Cornelian Variety Shown.

(Prepared by the United States Department of Agriculture.)

Sometimes we are prone to think that practices advanced by the extension service are slow to become general farm practices. Many times it is necessary to look over a long period of years to witness results. This is not so, however, in Dutchess county, N. Y., according to reports to the United States Department of Agriculture. In this county the superiority of Cornelian oats has been demonstrated. This year commendable tangible results were forthcoming. In all, 3,000 bushels of these new oats have definitely been put in the ground.

This is how the seed improvement program has been worked. The following example is but typical of the work in other communities. The county agent met with the Millerton community committee and, in planning their program, they desired to stress the importance of a larger acreage of improved oats. With the data on the variety demonstrations which had already been in that community, the committeemen had a selling point that could not be discounted, as the demonstration was held under local conditions. The committeemen brought this to the attention of the growers and, as a result, one carload of oats and 200 bushels of Alpha barley were ordered.

The publicity that this program developed has spread to other communities until the oat improvement program has been like an epidemic. Further cooperation was secured through local warehouse men, who distributed this improved sort. Fully 1,000 acres of oats were sown in Dutchess county as a result of the campaign.

Dust Bath for Chickens

Kills Harmful Insects

Many people are not aware of the fact that dust acts as an insecticide to rid poultry of lice and mites. Have you ever noticed how a hen enjoys a dust bath? If no dust can be found she will wallow over a hole in the ash

or cinder pile and dust herself from head to foot. It is a well-known fact that lice and mites are more troublesome in damp weather, simply because no dust can be found. When the hen takes a dust bath she is following nature's law to fight insect pests. If your chickens cannot enjoy a dust bath on account of wet weather, a box should be placed in a dry place where it will always be in the dry. If no dust can be found use clean wood ashes, or coal ashes with the cinders sieved out. You can improve this by adding a small amount of insect powder to the ashes.

Kill Horse Nettles by

Keeping Them Cut Close

The only way to kill horse or bull nettles is to keep them from growing from July to December. They must store some food in their roots some time before winter, and they get this food out of their tops, but when the tops are kept cut close to the ground all fall there is no way the plants can get food to store in their roots, and if they store none they will die during the winter.

Use Pure Bred Sires to

Improve Sheep Flocks

Woolgrowers in several counties in middle Tennessee, including back-

woods communities, are improving their flocks by the use of pure bred sires, according to reports received by the United States Department of Agriculture from C. C. Flanery of the Tennessee extension service. Recently 73 farmers signed agreements to use pure bred sires exclusively under the "Better Sires—Better Stock" plan. The drive is being continued and live-stock judging is to be a feature of the activities at "club" camps during the summer.

September 1 is a noteworthy date in live-stock progress in that region, for on that day a carload of scrub sires will be shipped out. In October, according to plans, all the pure bred sires recently placed on farms in the region are to be shown at a county fair.

Corn for Silage Must

Be Cut Fine and Packed

Corn for silage must be cut fine and tramped well in the silo if it is desired to make the best quality of feed and fill the silo to its greatest capacity, says the United States Department of Agriculture. The usual length of cutting varies from one-fourth of an inch to one inch, but the latter is a little too long, as the pieces do not pack so readily in the silo, and they are not so completely consumed in feeding as the shorter lengths.

YOUNG MEN!

How About Collars?

Our stock is at your service. A new shipment just received includes some of the very latest styles in soft, semi-soft and starched collars.

Price 20c to 35c

Extra Trousers

are a necessity as well as a luxury. Some pretty patterns just received in young men's sizes. We can also fit the partly "young men" of mature age in sizes up to 42, prices

\$4.75 to \$6.50
