STONY POINT

John Schetzle left last week for Spokane to attend Business College.

Mr. and Mrs. Louie Heimgartner of Clarkston visited relatives here Sunday.

The Hallowe'en party given at the Stony Point School house last Friday night was well attended. Games and a nice supper were the order of the evening. All report a good time.

Grant McDowell of Culesac was a visitor Saturday evening at the Dan Smith home. While in the locality he purchased some hogs of Henry Garout.

The vicinity of Cherry Lane is always a choice place for China pheasant hunters whom we see coming by rail, auto and other common travel, but not until the present season have hunters come by aeroplane. Three aeroplanes carrying hunters and dogs lighted in our vicinity Sunday, where the hunters spent the day hunting the plains, returning that evening.

Most all the fall wheat to be sown here will be finished by the end of the week. Early sown wheat looks good.

Orin Needham, Glen and Lloyd Stevens of Clarkston were Sunday hunters here also dinner guests at the Karried home.

P. M. Johnson of Lenville moved his house hold goods this week to his ranch near Cherry Lane, where he will make his home.

CAMERON ITEMS

The Hallowe'en party held at the Luther hall last Wednesday evening was a success in every respect.

The league members were all met at the door with a cap made from crepe paper, appropriate for Hallowe'en.

Games and Hallowe'en pranks were played until a late hour, when a bonfire was built and everyone roasted wemics. Also doughnuts and buns were served.

Mr. and Mrs. Gus Kruger and daughter, Rosalia and Mrs. Silflow left for Lewiston, Wednesday morning where little Rosalia was operated on. She is getting along as well as can be expected under conditions.

Mr. Gildner and son, Raymond, and Walter Silflow motored to Lewiston.

Mr. and Mrs. A. F. Wegner and family drove to Lewiston, Sunday to visit relatives.

Mrs. George Ehlers returned home Friday after spending a week with her sister in Spokane, who is in the hospital.

Miss Larimore left for Lewiston, Saturday and returned Sunday.

Mr. and Mrs. Lawrence Kline drove down from Spokane Saturday to visit relatives. They left again Sunday, taking Grandma Wegner with them.

A surprise party was held at the Henry Brammer home Sunday afternoon in honor of Mr. Brammer's birthday. A large number were present.

Mr. and Mrs. Carl Hartung and Walter and Bertha, were callers at the Will Wolf home Sunday evening.

Mrs. Brunsek is visiting her mother Mrs. Bleck in Kendrick, this week.

Mr. Gilder and Mr. Silflow motored to Lewiston, Monday, on business.

FAIRVIEW ITEMS

A number of Fairview people attended the Hallowe'en program and party at Leland Friday evening.

Mr. and Mrs. Wm. Wolf and son, Kenneth, were visitors at Lewiston Saturday.

Mr. and Mrs. T. H. Daugherty spent the week end at the home of their son, Philip at Leland.

Orval Walker has enrolled in the Fairview school.

Onev Walker is working at the Garry Hegrefe ranch.

The Russel Smith family were Sunday dinner guests at the J. M. Woodward home.

Mr. and Mrs. George Frederickson were callers at the Virgil Fleshman home, Sunday afternoon.

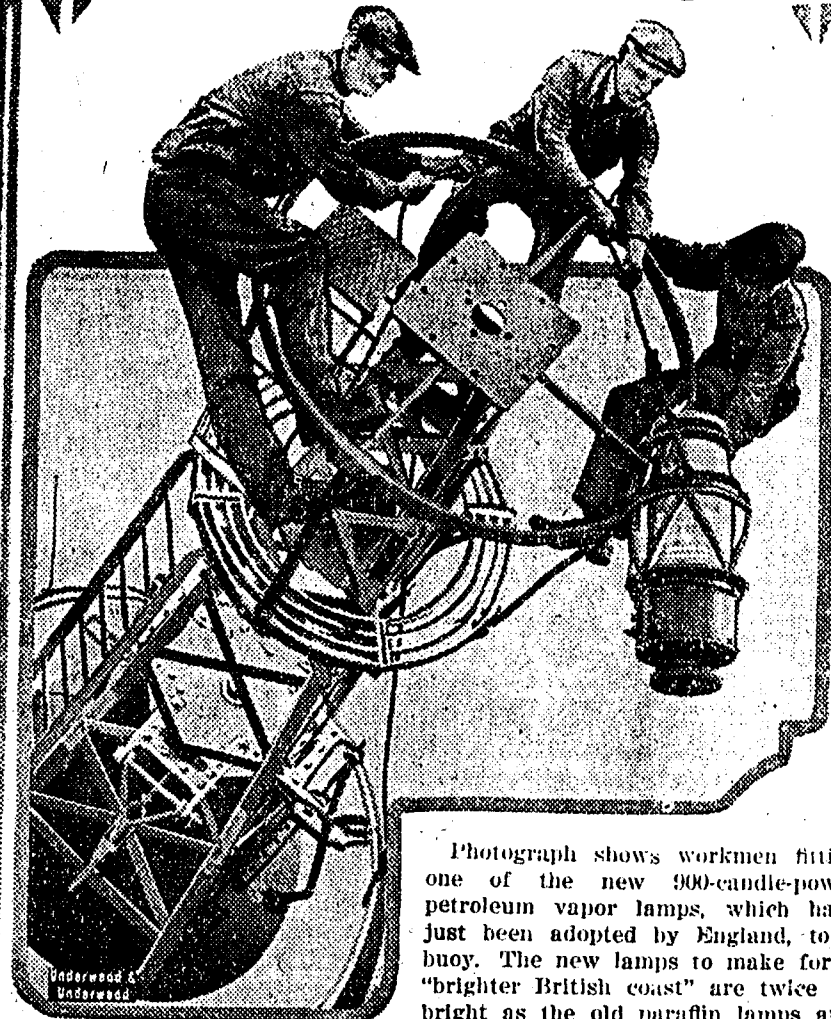

Mrs. McCall spent Sunday afternoon visiting the Wilken home.

Mr. and Mrs. T. J. Fleshman were visitors at Lewiston the first of the week.

METHODIST CHURCH

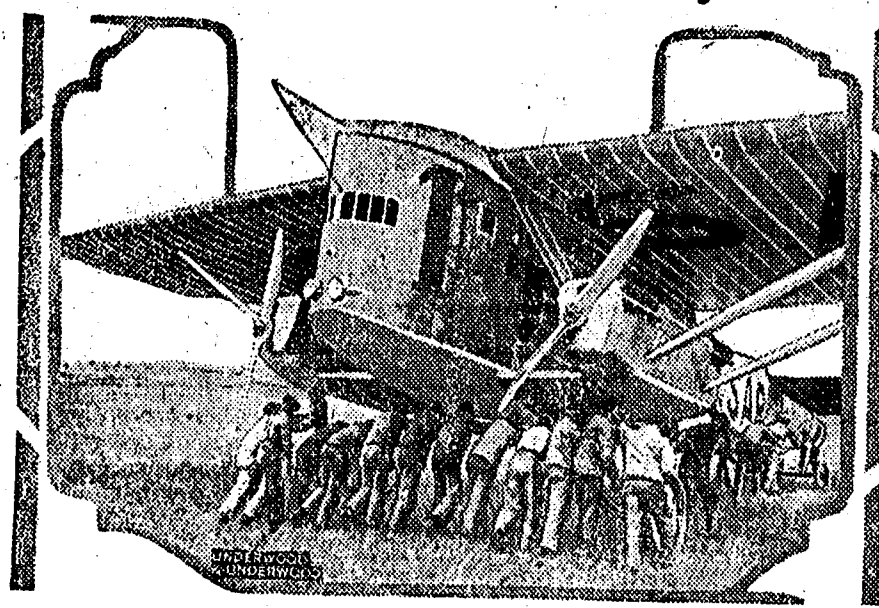

Sunday school at 10:00 a. m. Preaching at 11:00 a. m. Subject: "The Coming Day". Epworth League at 6:45 p. m. Led by the pastor. Topic: "The Prayers

Making British Coast Brighter

Photograph shows workmen fitting one of the new 900-candle-power petroleum vapor lamps, which have just been adopted by England, to a buoy. The new lamps to make a "brighter British coast" are twice as bright as the old paraffin lamps and on a clear night the range is limited only by the earth's curvature.

Newest Type of French Army Plane

Here is an airplane of the new type adopted by the French army. Note the unique fuselage and wings with closed cabin to protect the fighter, and double propellers and engines.

of Jesús".
Preaching at 7:30 p. m. Subject: "The Divine Challenge to Man's Helplessness."
A hearty invitation extended to all.

James W. Poolton, Pastor.

Farming Adapted to Given Region

In Making Change Physical Factors Such as Soil and Climate Are Important.

(Prepared by the United States Department of Agriculture.)
To stick to cotton or to change to corn and hogs, to grow wheat and oats or to go into dairying, or to change to any other type of farming which may at the time seem to offer more profitable returns than the prevailing type, is a question ever present in great farming regions, and one which is often keenly considered in time of agricultural depression. In attempting to make such changes serious errors are almost certain to be made, says the United States Department of Agriculture, unless those who are directing the movement have a thorough understanding of the forces which control the types of farming adapted to the different regions.

Enterprises Best Adapted.
It is possible, at least in a general way, says the department, to determine what farm enterprises are adapted to a region by studying the physical, biological, and economic conditions prevailing there, and the adaptability of various enterprises to these conditions. An analysis of the types of farming in the United States has been made on this basis and the discussion is presented in Farmers' Bulletin No. 1259, Distribution of Types of Farming in the United States, just issued by the United States Department of Agriculture.

Physical factors such as soil and climatic conditions play an important part in the type of farming adaptable to a given region. Temperature limits the northern distribution of cotton, southern distribution of wheat, and northern distribution of corn. Rainfall and length of growing season are other important factors the effects of which are very apparent in our agriculture.

Factors of Second Class.
The second class of factors discussed in the bulletin is called biological factors. The effect of the boll weevil in reducing cotton acreage near the Gulf and Atlantic coasts is an example. The chinch bug has reduced the acreage of corn in southern Illinois, and the Hessian fly has changed the date of seeding winter wheat and has probably reduced the acreage of this crop in some localities. Many other cases are cited in which insect pests and fungous diseases are determining factors.

In the third class are economic factors, such as cost of transportation and distance from market. Another important one is competition with regions

How Suburbanites of Dayton Get Library Books

Miss Electra Doren, chief librarian at Dayton, Ohio, conceived the idea of carrying books to readers who could not conveniently patronize the library, and her "rolling library," consisting of a truck with shelving for 600 volumes and 104 current periodicals, has proved a great boon to suburban dwellers. The truck canvasses a different section of the suburbs every day. The plan is economical, too, in that it is saving the construction of branch libraries. The photograph shows Miss Doren standing at the rear of the truck.

**Youth Exhibits
Champion Steer**

**Lloyd Taube of Marion,
Iowa, Wins First Prize
With His Calf.**

Lloyd Taube, a seventeen-year-old boy from Marion, Linn county, Iowa, had the proud distinction of exhibiting the grand champion baby beef at the Iowa state fair, held at Des Moines, in what was probably the largest show of this character ever held. The boys and girls whose animals had won at the various county fairs were entitled to compete for state honors at Des Moines, and a total of 446 head were lined up before the judges when the state contest was called.

The steer with which Lloyd won the highest honor against this strong field was a pure bred Aberdeen Angus calf named "Tiney". He was a February calf, sired by Erin Boy II of Loue Ash. Lloyd bought him in September and fed him largely on a home-grown ration of shelled corn and clover hay. The calf did so well that his owner entered him in the Baby Beef club in his county, and at the local fair was awarded the championship over 32 entries. This award carried with it a free trip to the International Live Stock exposition, which will be held in Chicago the first week in December.

Spurred on by this success, Lloyd took his pet steer to the Iowa state fair. This animal and one other were the only entries from Linn county, which made his subsequent triumph all the more noteworthy. After the large classes of well-fitted heaves had been sifted down by the breed judges, Prof. H. H. Kildee was called upon to

Lloyd Taube and His Champion Steer.

tie the ribbon on the grand champion of the show, and he selected Tiney for this high honor. Lloyd accepted the congratulations of the ringside crowd with becoming modesty and attributed his success to plenty of good feed and constant attention.

Tiney weighed 925 pounds when records were started on April 1, and at the close of the contest balanced the beam at 1,150 pounds. He was allowed about eighteen pounds of shelled corn a day and all the clover hay he would eat. At Des Moines he presented such a highly finished appearance that he could not be denied the victory, in spite of very strong competition.

Has Won Three Times.

Lloyd has been in club work for six years and has won at a county show three times, always with an Angus calf. Three years ago he was awarded a trip to the international, and it was the inspiration received while at Chicago that later proved a big factor in achieving his crowning triumph. While he will again attend that premier exhibition of the live stock world this year, he will not exhibit Tiney there himself, as he had promised a well-known Angus exhibitor living in

his home town to let him have the calf at the close of the Iowa state fair. This breeder will continue to grow out the steer and will enter him at Chicago in the open classes against the highest fitted beaves of the most skilled and experienced exhibitors. It will be interesting to watch how this highest type of boys' club endeavor will rank when pitted against the finest products of the noted veterans of the industry.

SHE KILLED A PRIEST

Mrs. Emma Strutyinsky, wife of the pastor of a Ukrainian church at Ramey, Pa., who went to Chicago and killed Rev. Bagli Sietusk in a Greek church as she was pretending to confess to him.

**Fall or Winter Best
Time to Fight Borer**

**Canes Infested Should Be
Cut Before Bugs Emerge.**

(Prepared by the United States Department of Agriculture.)

Fall or winter is the best time to apply control measures to raspberry, blackberry or dewberry crops infested by the red-necked raspberry cane-borer, according to Farmers' Bulletin 1236, by F. H. Chittenden, entomologist. The damage to these crops is caused by a flat-headed, milk-white borer, which is the larva of a small, slender, velvet-black beetle with copper red or golden thorax ("neck"). The larvae form irregular swellings or galls, which gradually enlarge the canes and split the bark. Canes thus infested die, or become weakened and fall to develop a crop. The beetle also does some injury by feeding on the leaves of the plants.

To control the insect the infested canes should be cut out in the fall or winter, or in the early spring before the beetles have emerged from them. All cuttings should be promptly burned. To insure thoroughness, all wild blackberry, raspberry or dewberry plants nearby should receive the same attention. Co-operation among neighboring fruit growers in the observance of these measures for successive years is highly desirable. Farmers' Bulletin 1236 may be obtained by applying to the United States Department of Agriculture, Washington.

**Table Scraps Important
Item for Small Flocks**

Table scraps become an important item for a small flock, but are of little value for large numbers. The small flock will pay at all seasons, because the scraps lessen the cost of the food by permitting of the utilization of waste materials that would otherwise go into the slop barrel. For this reason every family should keep a few hens, even if but half a dozen, and especially the families that live in the suburbs of cities and towns, or who

have a space that can be utilized for that purpose. The greatest obstacle is the attempt to keep too many. Be satisfied with a few, and the cost will be less and the result more satisfactory.

**Winter Cover Crop Will
Afford Soil Protection**

A winter cover crop protects the land from washing during the winter months, and at the same time conserves the plant food materials made available during this period. Soil which remains bare during the winter loses much valuable plant food by leaching. A cover crop would make use of this plant food and release it the next spring in time for the crop of cotton or corn to obtain it.

Whenever possible the winter cover crop should be a legume, for legumes are able—by reason of their well-known ability to obtain nitrogen from the air—to increase greatly the store of this element in the soil.

**Roaming Turkeys Devour
Many Harmful Insects**

After the turkeys begin to roam, widely, complaints may be expected from neighbors in regard to damage done to crops. The grower ought not to be indifferent to the trespassing of his birds, but it is a fact, nevertheless, that such losses are rarely serious. Turkeys care little, apparently, for most kinds of growing or ripening grain and do not like to pass through standing grain. It is the belief of careful observers that the good they do in destroying insects vastly exceeds the ill they take.

**Scab Seriously Reduces
Yield of Wheat Crop**

Scab seriously reduces the yield of wheat in infested fields throughout the central states and eastward. And it not only affects wheat, but other grains and grasses as well. The cause of this disease is a tiny fungus parasite, which grows in the wheat plant a little like the wheat plant itself grows in the soil, and this parasite destroys the parts of the wheat plant in which it grows.

The same parasite also grows on corn, and naturally wheat following corn may be seriously affected by scab. In order to control the disease the United States Department of Agriculture recommends that the farmer—

- (1) Avoid sowing wheat after corn unless the cornstalks are removed and the stubble completely plowed under.
- (2) Plow under all crop refuse and clean up the old straw and grasses along the fence rows and in nearby waste places.
- (3) Use clean seed of adapted varieties. Seed should be thoroughly cleaned, graded and treated.
- (4) Sow wheat when the ground is cool, winter wheat on the latest date in the fall, and spring wheat on the earliest safe date in the spring.

**Many Injurious Insect
Pests May Be Destroyed**

Since many troublesome insects hibernate in dead plants and trash and in grass and weeds along the borders of cultivated land, H. A. Gossard, entomologist of the Ohio experiment station, states that large numbers of them may be destroyed in late fall or very early spring by burning the collected trash and dead grass.

Tarnished plant bugs, squash bugs, and slugs are cited as examples. These pests pass the winter in weedy borders, among refuse, under stones and other objects. They could be almost entirely eliminated if entire communities would co-operate in removing all means for their protection during winter. Potato stalks, squash vines, onion tops, asparagus plants, bean and pea

ANNOUNCEMENT

Kendrick, Idaho, November 9, 1923

Dear Friends:

I wish to announce that I have purchased the Shoe Shop from Mr. B. F. Shay which will be moved into the harness shop, and have added a shoe sole stitcher and finisher with other tools to make as good an equipment as found in any city shoe shop.

In order to make this business a success it will be necessary to place the entire shop on a strictly cash basis. Any goods ordered by phone or mailed in for repair will be sent C. O. D. as it takes too much time to make small charges, and the small charges are the hardest to collect.

I aim to reach each customer with a copy of this either through the mail or in the Kendrick Gazette, so there will be no chance for any hard feelings on the part of any customer, and I must treat all alike. I hope to make my work merit your patronage.

Very truly yours,

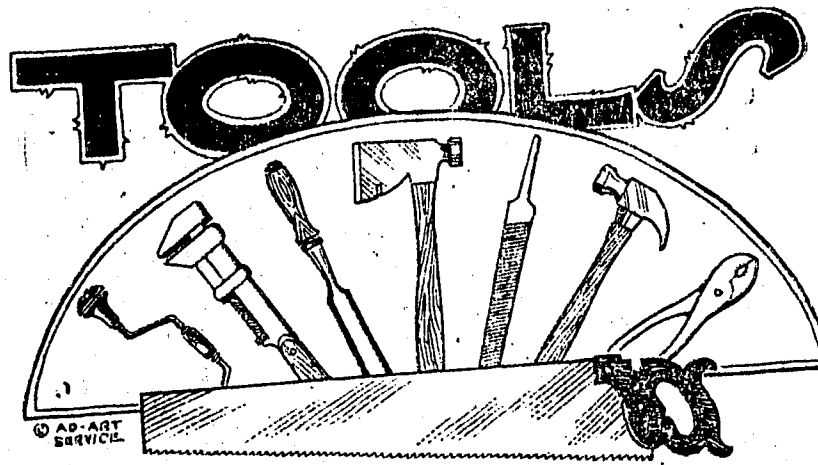

N. E. WALKER.

vines, and the like furnish shelter during the winter for many insects that feed upon these plants.

Fall plowing, where soil conditions permit the practice, will result in the destruction of many cutworms, white grubs, corn ear worms, army worms, and eggs of the grasshopper, where these pests are numerous.—Weekly Press Bulletin, Ohio experiment station.

**Too Much Moisture Will
Cause Potatoes to Decay**

An excess of moisture will cause the growth of decay in the potato storage. Some growers make a practice of "curing" their potatoes before storing. This is done by piling them in piles of 30 bushels or more, and covering them with the potato vines. After the potatoes are well dried so there is no excess moisture, and are free from dirt, they may be placed in storage. Sometimes the ventilators of the storage are left open for several days after storage to facilitate drying. Care should be used, however, that potatoes in storage do not become too dry, as they may wilt or shrivel.

**Right Place to Select
Seed Corn Is in Field**

It is a well-known fact that the best place to select seed corn is in the field. The best time to pick it is when the earliest ears are ripe. Don't wait till every ear is fully matured, as that may mean injury from frost. Besides, it is always desirable to pick from the ears that ripen first, so as to encourage early maturity.

A Good Thing—DON'T MISS IT.

Send your name and address plainly written together with 5 cents (and this slip) to Chamberlain's Cough Remedy for coughs, colds, croup, bronchial, "flu" and whooping coughs, and tickling throat; Chamberlain's Stomach and Liver Tablets for stomach troubles, indigestion, gassy pains that crowd the heart, biliousness and constipation; Chamberlain's Salve, needed in every family for burns, scalds, wounds, piles, and skin

affections; these valued family medicines for only 5 cents. Don't miss it.—Adv.

GLEANINGS

Mr. and Mrs. Ernest Bolon of Lewiston visited relatives here the first of the week.

Mr. Goudzward of Leland returned Monday from Moscow where he spent the week end with his family.

Mr. and Mrs. E. A. Deobald and children were Moscow visitors the first of the week.

A. V. Dunkle and G. G. Oldfield drove to Clarkston, Sunday, where they got their winter supply of apples at the John Florance orchard.

Kendrick lodge No. 37, I. O. O. F., conferred the initiatory degree at the regular meeting last Saturday night. There was a large attendance. At the close of the lodge the Oddfellows were surprised by the Rebekahs, who had prepared a dinner in the banquet room. Following the refreshments dancing was enjoyed. The initiatory degree will be conferred again next Saturday evening.

Myklebust Bros. of Troy closed a deal last week for the purchase of the Emerson store at LaCrosse, Wash. The two brothers will own Troy and LaCrosse stores together. K. T. will remain in Troy and T. A. will have charge of the LaCrosse store.

The Gus Wegner family of Southwick, Mr. and Mrs. Bryan Deobald of Kendrick were Sunday dinner guests at the home of Mrs. M. A. Deobald on American ridge.

R. E. Densow of Lewiston was transacting business in Kendrick Wednesday.

Halvor Nelson of Farmington, Wash., was an arrival on the afternoon train Wednesday.

In answer to our gentle hints in the Gazette a number have improved the appearance of their particular page in our subscription books to a marked degree. "Lest you forget" we wish to call your attention to the fact that maybe your subscription is past due. If you have a guilty feeling when you read this you can rest assured that a dollar and a half, or whatever it may be, sent to the Gazette immediately will relieve you.

Mr. and Mrs. R. M. Walker and daughter visited the N. E. and G. F. Walker homes here last week. They were on their way from Kansas to their home in Peck, having spent the winter in Kansas where they have property interests. Mr. Walker was in the furniture business here years ago and is well known in the Potlatch country.

Mr. Jones states that the figures in last week's Gazette concerning the amount of seed corn which he sold this fall were incorrect. We gladly make the correction but still hope that his sales will reach the figures as published last week as corn is one of the most profitable crops that can be raised in the Potlatch.

Born in Kendrick, Wednesday, November 7, two kids. They've got John Kite's goat for a mother. John is now operating a town lot goat farm which is flourishing.

Mr. and Mrs. Greer of Coeur d'Alene visited at the home of Mr. and Mrs. M. B. McConnell this week.

It has been requested that attention be called to the meeting of the Kendrick band at the Fraternal Temple next Monday evening. All band members are urged to be present as important matters are to be brought up.

Mrs. E. W. Lutz and son, Phil, were Moscow visitors Thursday.

Frank Meyer came in from the homestead the first of the week to look after business affairs.

Mrs. Russel Daniels of Cavendish community is in Kendrick this week having dental work done.

J. B. Helpman returned Wednesday from a business trip to Spokane.

Frank Chamberlain in making good progress in the construction of his new bungalow in the lower end of town. From present indications it will be a very attractive residence and a decided improvement to the town.

Otis Gentry so far holds the record for "Chinks." Sunday he got three and Monday the bag limit of four.

It is rumored that there are very encouraging prospects that the local flour mill will be started next month. In case the Vollmer-Clearwater Co. decide to start the mill they will begin making necessary repairs in the very near future. When the mill is operating a day and night shift here it makes quite a respectable payroll in the town.

Storing Vegetables for Home Use During Winter

It is to the interest of every family to grow each season a supply of those vegetables suitable for storage, and to see that they are properly stored for use during the winter months when prices are high and vegetables often hard to get. Less work and less expense are involved in storing vegetables than in keeping them by other methods, as canning, drying, and pre-

serving, and the product retains its characteristic flavor much better.

Careful Handling Is of Importance With Apples

Care in handling is of great importance in storing apples. Rough handling results in stem bruises, broken skin and bruised spots. A broken skin gives entrance to blue mold, which develops slowly at a low temperature, but causes considerable deterioration in the fruit.

Increasing Oats Yield Is Now Being Produced

Nearly a quarter of the oat acreage of the United States is at present producing at least one to two bushels of oats more to the acre than formerly, as a result of the introduction by the bureau of plant industry of the now popular and widely distributed varieties, Swedish Select and Kherson (Sixty-day) oats. Prior to 1900 these two varieties were practically unknown in this country, but today they are grown on about 9,000,000 acres, the former variety being grown on almost 10 per cent of the total oat acreage and the latter, including selections made from it, on about 14 per cent.

Hi-Power Studio Light

The Sterner Studio on Main Street, Moscow, Idaho, has just installed a new Hi-power twin arc white flame photographic lamp which will make the studio independent of daylight. The light is powerful and duplicates daylight perfectly, making it possible to distinguish all colors in their true tones. As the light is strong enough to make pictures instantaneously we always get the baby's.

KENDRICK STORE CO.

"QUALITY STORE"

SOUTHWICK NEWS

The chicken dinner, given by the Ladies Aid of the Methodist church on Hallowe'en Night was well attended and enjoyed by all present.

The Ziemann brothers have finished moving their store and household goods to Astoin, and Mr. Calvert will occupy their former residence for the winter.

The Southwick School Basket Ball teams played Juliaetta on

the home grounds last Friday. The Juliaetta boys and the Southwick girls being the winning team.

The guests of the Roy Southwick family at dinner Sunday were: Mr. and Mrs. Baker, Mr. and Mrs. Homer Hayward, Mr. and Mrs. Howard Southwick and children and Mr. and Mrs. Goans and children.

Rev. George Calvert and family of Lewiston were week-end visitors in Southwick. Rev. Calvert occupied the pulpit at the U. B. church on Sunday evening.

Grinold School District No. 11 has thirty pupils enrolled this year. They are now busy preparing a Thanksgiving program. Several friends spent Sunday at the Brammer home, the occasion being Mr. Brammer's birthday.

Mr. and Mrs. F. E. Russel and Math. Kazda made a trip to Lewiston Sunday returning Monday evening.

Prof. Calvert moved his family to the Ziemann residence Saturday.

Jap Triplett has moved to the Geo. Baker residence.

J. R. King made a business trip to Kendrick last Wednesday.

Geo. Jones is confined to bed with La Grippe. Dr. Seely from Kendrick was called to see him Saturday.

Mr. and Mrs. Wm. Berriman, who have been visiting at Summit, returned home Friday.

Clarence Whiting is visting friends around Southwick.

Mr. and Mr. Graham visited with Mrs. Wells Sunday.

Mr. and Mrs. Frank Thornton and family and Nadine McCoy spent the day Sunday with Grandma Thornton.

Albert Jones returned home Saturday night after being away since harvest.

Wm. Henderson and family spent the day Sunday with Vester Whitinges in Leland.

A number of the young people of Southwick attended the dance at Cameron Sat. night.

Arthur Locke and family of Leland visited at the Geo. Jones home, Sunday.

Mrs. Ralph Wright who has been visiting her brother, Albert Baker of Orofino, returned home Sunday.

Wm. Stump and wife went to Asotin Sunday.

Mr. and Mr. Will Wright were dinner guests at the Cuddy home Sunday.

Ward Helton, Clarence Whiting and Elton McCoy left Sunday for a fishing and hunting trip and expect to be gone a week.

Floyd Russel had the misfortune to lose eight of his fattening

hogs recently. Cause unknown. Milton Benjamin spent Sunday at the Will Henderson home.

Ben McCoy, the mail carrier, while waiting for the mail at Teakean had a run away Monday. The horses became frightened, pulled loose from the hitching rack and started for home at a lively rate. They ran about a mile and were stopped at the Sutton ranch by Elwood Pierson. No damage was done to the buggy and the mail arrived at the Southwick on time.
