

Latah County News Paragraphs

Items of Interest Taken From Neighboring Papers

At a meeting of the council Monday night three new councilmen were elected: C. Clark, C. W. Jessup and C. S. Biddison. The council organized as follows: Columbus Clark, Chairman; M. Pierce, Walter Cochran, C. W. Jessup, C. S. Biddison.

Wednesday of last week, the general school assembly was addressed by Mr. Pepple, the postmaster. Beside giving many amusing and useful details concerning the working of the postal system, much valuable instruction relative to the best way to post mail of all classes was set forth. This is the second of a series of talks by leading men concerning the various vocations which they represent. A third will be given at an early date.—Juliaetta Record.

Over one hundred people turned out for the Parent-Teachers meeting Wednesday night and were well repaid for coming with the excellent program arranged for the occasion. All numbers were greatly appreciated by the audience. The address by Miss Jensen was the main feature of the evening. Her talk was the proper care and feeding of the growing boys and girls. The audience was very attentive and the humor interspersed in her remarks kept them in a jovial mood. Following the program, high school girls and boys served the appetizing lunch prepared by the refreshment committee.

These meetings are growing more popular each time and the attendance was a great surprise to Miss Jensen, who stated that she had expected to talk to but a mere handful of people, as is the custom at the P. T. A. in her town. Moscow.—Troy News.

According to the news drifting up the hill with the fog the Hotel de Welker at Lewiston is overcrowded with guests at this time and some of the doctors are making a fuss because there is not enough room, stating that it is unsanitary. The "hotel" now has 19 "guests" and there are rooms for only 10 to be housed comfortably, but Sheriff Welker seems to be of the opinion that if the boarders do not like the quarters the thing to do is to keep out of the clutches of the law.—Genesee News.

Will Plant Native Trout

R. W. Thomas state game warden of Idaho, recently announced that the Idaho game and fish department is finishing a \$12,000 fish hatchery at Ashton, Idaho, and that next year the department plans to make improvements at the Sandpoint hatchery involving an expenditure of about \$4,000.

The state game warden is not entirely satisfied with the result of the eastern brook trout in northern Idaho streams and that as far as possible only native trout will be raised in the state hatcheries in the future.

Stag Party

Friends of A. V. Dunkle arranged a stag party in his honor last Tuesday evening at the Fraternal Temple. Approximately fifty of his Juliaetta and Kendrick friends were present and spent a very enjoyable evening. A dozen card tables were in use during the entire evening, solo, pinochle, "500", whist and "pedro" being the popular games played.

N. Brocke served a cafeteria lunch about midnight after which the Kendrick male quartet rendered a number of selections that went over big. It was a pleasing affair all round and full of good fellowship.

Dairy Cows Sold Well

The dairy cow sale held here last Saturday indicated to a marked degree that there is a very strong demand for dairy cows in this section. The average price paid for the 27 head sold was over \$100 each. There was a large crowd present at the sale and bidding was spirited and showed keen interest. Mr. Cranke may bring another carload from Oregon some time the latter part of next month.

Season Opened For Basketball

High School Conference Is Getting Into Action

Conference Standings

Team	Won	Lost	Pct.
Orofino	3	0	1.000
Culdesac	1	0	1.000
Lapwai	1	0	1.000
Kendrick	0	1	.000
Troy	0	1	.000
Weippe	0	1	.000
Kamiah	0	2	.000
Kooskia	0	0	.000
Grangeville	0	0	.000
Cottonwood	0	0	.000
Nezperce	0	0	.000
Craigmont	0	0	.000
Lewiston	0	0	.000
Genesee	0	0	.000
Moscow	0	0	.000
Gifford	0	0	.000

With the football season on the decline interest is again turning to the coming basketball season says the Tribune. Seven of the teams in the Snake River Valley conference have already gone into action and by the Christmas holidays the games should be going in full blast.

Lewiston and Moscow will not start their regular season until the Christmas holidays due to the interference of football but the schools which do not engage in the gridiron sport are all getting in shape for the season.

The Moscow High school looms as the most formidable team in the district as they have four members of last year's state championship quintet back for another season. Three of these men were on last year's all district team and as far as veteran material is concerned their outlook is bright for the season.

Orofino has broken into the lead with three straight victories as their season's record: They have four members of last year's team, Gamble and Aud, forwards; Oliver, center; and Edmundson, guard; on this year's squad and are going at a fast pace. The experience these men gained in last year's district tournament will prove valuable to them and they look like strong contenders for the title.

Kendrick Looks Good

Kendrick played Orofino a fast game Saturday night and with three of last year's veterans, Flaig, forward; Perryman, center and Brocke, guard; on the squad they promise some real competition for the other teams of the district.

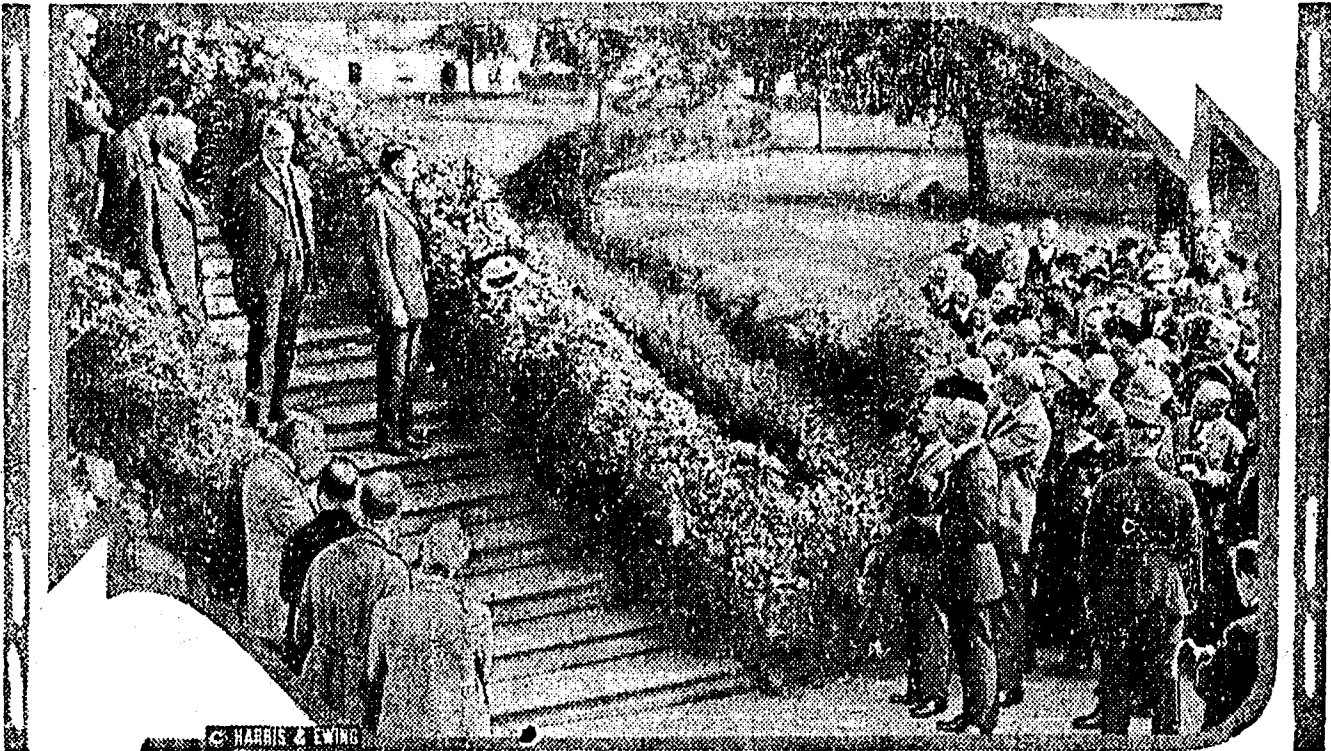

Kamiah with a string of green players has gotten off on a bad start losing both to Lapwai and Culdesac. Their neighboring town, Kooskia, should have a real team however with practically all of last year's veterans back. They proved the surprise of the district last year and in Miles and Montgomery have a pair of forwards which will be hard to stop.

Prairie Fast

The prairie teams have not started their schedule yet but look like they will put up some fast quintets. Grangeville had only a mediocre team last year, but one which at times showed flashes of good form, and with three of these men back and some good substitutes available they should put out a better squad this season.

Cottonwood proved the sensation of the tournament last year and with three of their men back should give the other teams a good chase for their laurels this

President Coolidge Talks to Postmasters

President Coolidge addressing the first and second-class postmasters. In session at Washington, from the steps of the south portico of the White House. Postmaster General Harry S. New is standing beside the President.

Orofino 41, Kendrick 31

In a fast, clean game of basketball between Orofino and Kendrick high schools, the locals went down to defeat by a score of 41 to 31. It was a good exhibition of fast work on the part of both teams. In the first 10 minutes of play Kendrick led by a score of 18 to 3, but couldn't keep up the pace. Orofino began gaining steadily during the balance of the game and finished strong.

Those on the "inside" say that all Kendrick lacked to bring home the long end of the score, was endurance. A strict observance of training rules for the balance of the season will put the Kendrick boys well toward the top in the conference this year.

Thomas of Moscow refereed the game to the satisfaction of both teams and both teams showed good sportsmanship through the entire game.

Idaho Grows Good Spuds

Idaho potato growers were the big winners at the third annual Pacific Northwest potato show given recently in Spokane under the auspices of the Agricultural bureau of the Spokane Chamber of Commerce, according to an announcement made by H. O. Werner, university of Nebraska, who acted as chief judge. Idaho growers took first prize, both in commercial and certified seed stock, with Netteed Gems, Idaho Rurals and Bliss Triumphs.

Oregon excelled with Burbanks, taking first in both the commercial and certified seed classes. Montana won in both classes with Irish Cobblers. Washington won first in both the commercial and certified classes with Early Ohio, and British Columbia took home all the prizes in miscellaneous varieties of certified stock.

season. Little is known as to the prospective strength of Nezperce and Craigmont, the latter entering basketball competition for the first time this year.

Culdesac as of Old

The Lapwai and Culdesac teams were apparently shot to pieces by graduation and other losses this season but in their first games they have showed every indication of their old time form. In Types and Dawald, Lapwai lost some fine material and their loss will be a hard one to fill. Two former Lewiston high players, Paul and John Croy, are on the Lapwai quintet.

With only one man back, Parks at guard, Culdesac has built up a new team which seems as powerful as any of those which have been winning laurels for the Pocket City for the last four or five years. Basketball seems to be born into the Pocket City boys and whenever they lose a player he has several smaller brothers to take his place.

All in all it should be a great basketball winter which will culminate in the district tournament here March 6, 7 and 8.

Old Commissioners Elected

At the highway district election, held in Kendrick Tuesday, over 170 votes were cast. Considerable interest was evidenced during the day but the election was such a quiet, orderly affair, that several citizens let the day pass without voting, having completely forgotten that there was an election in town that day.

The three members of the old board were reelected by quite a substantial majority, which would indicate that the people of the district are satisfied with the work which they have done during the past four years. There were six candidates, everyone a splendid man and all amply qualified to handle the duties of the office of commissioner. The selection of the three old members was probably in the nature of an endorsement of their past work and a recognition of their opportunity to profit from their four years of experience as highway commissioners.

Now that these men have been elected to look after the interests of the district, the hearty co-operation of every man in the district should be accorded them. They are doing this work without recompense and the co-operation of the citizens is all they ask.

Following is a list of the candidates and the vote which each received: G. F. Walker, 120; Wm. Cox, 119; Ole Lien, 110; O. Alber, 61; Harry Benscoter, 56; Tom Long, 49.

Champion Dairy Cow

Idaho Segis Lily, University of Idaho Holstein cow, has become the highest record cow for milk production owned by any state agricultural institution, with a production record of 30,015 pounds of milk, and a butter equivalent of 1191.1 pounds, over a one-year period, according to word received in Spokane.

Three state institutions in America are using Idaho stock for their herds.

Death of Charles Ameling

Charles Ameling, one of the best known residents of American ridge, died at his home Monday night after an illness of several weeks. Mr. Ameling was a pioneer of the American ridge community and a most highly respected citizen. News of his death cast a shadow over the entire community, as his kindly presence will be missed by everyone. Funeral services were held at the American ridge church, Wednesday morning and interment made in the American ridge cemetery.

An obituary will be published in next week's Gazette.

Revival Starts Sunday

Revival services will be held in the Methodist church, beginning next Sunday. The Rev. W. S. Payne of Weston, Oregon, will assist the pastor, preaching every night next week except Saturday. Meetings will begin every evening at 7:30 with a song service.

Moscow Country Has Rich Harvest

Estimates Placed on Value of Farm Products

On a most conservative estimate, the receipts from agricultural products in the territory immediately tributary to Moscow, for 1923, will be \$2,033,500. The figures were compiled by Robert Whittier, of the Moscow State bank, on request of E. W. Porter, state commissioner of finance, to be used in compiling statistics showing the total value of agricultural products in the state, and through the courtesy of Mr. Whittier, a copy was made available for publication.

The figures are the result of much work on the part of Mr. Whittier, and are most conservative. The figures cover only the products marketed, and do not show the products consumed on the farms. They show, however, that even under the present methods of farming, and with wheat and some other products bringing but little more than pre-war prices, the products actually marketed at Moscow represent a large sum of money, while the same acreage under intensified farming, which is certain to come, might easily be expected to return nearer five million dollars than two million. Comparison of returns from the land which produce these crops, with the land in some localities which is selling from two to five times the price, would be interesting and would show up very much to the advantage, local specialists in production believe, of the Palouse country land, and would place the real value of the land far above the price for which it is selling now.

The following are the figures submitted by Mr. Whittier:

- Grains—Wheat, \$1,000,000;
- oats, \$75,000; corn, \$15,000; barley, \$5,000; peas, \$210,000.
- Seeds—Estimated at \$2,000.
- Vegetables—Potatoes, \$15,000; other vegetables, \$9,000.
- Fruits—Apples, \$15,000; pears, \$15,000; prunes, \$5,000; cherries, \$45,000; berries, \$2,000.
- Hay—Timothy, \$4,000; alfalfa, \$75,000.
- Poultry and poultry products—\$125,000.
- Livestock—\$255,000.
- Dairy products—Milk and cream, \$150,000; country butter, \$25,000.

The livestock figures include only the stock bought in the local territory and do not include the large number of cattle and hogs brought in by the Hagan & Cushing company from outside districts. Neither does the showing of dairy products include the milk and cream shipped in to local creameries from outside points.

While the wheat crop, even at the prevailing low price, accounts for the pretty nearly fifty per cent of the value of the entire products, the pea crop made

News Notes From Kendrick Schools

Report of Activities in the Various Classes

The girls basket ball has chosen its first team, they are: Dorothy Stanton, Margaret Schmidt and Florence Poolton, forwards; Minnie Blum, Ruth Easterbrook and Ida Morey, guards, Maude Compton and Grace Poolton as subs. The girls have been consistent in their practicing which is the chief step toward success.

The first team of the boys basket ball is: Harley Perryman, center, Wayne Herres, and Frank Brocke, guards, Egnaz Flaig and Claude Stanton forwards, Edwin Easterbrook and Edgar Dammarell as subs. The boys have a good, husky team, all they require is more practice and they stand a good chance of winning the rest of the games of this season.

Masonic Party

Those who attended the party, given by the local Masonic lodge last Friday evening report a delightful time. The party was for Masons and their ladies. There were approximately sixty present. The feature of the evening was theater party at the New Kendrick, after which dancing and cards were enjoyed at the hall until the hour of midnight, when Mr. and Mrs. N. Brocke and Mrs. John Brocke served one of their famous lunches in the dining room. When the refreshments had been properly cared for dancing was resumed for another hour.

Left For California

Three Bear ridge boys, Dewey Galloway, Fred Hecht and Tom Whybark, left Tuesday for California. They built a house on a Ford truck and will travel with all the comforts of home. They have a bed with springs and mattress, an oil heater, oil cook stove, chairs, cooking utensils, musical instruments and many other modern conveniences.

As an indication of the complete equipment which they carry, the boys drove down from Bear ridge Monday night parked their house in front of the city park and went to bed—entirely independent of hotels, restaurants, etc. On their trip to California they will travel when they please and if they like any particular part of the country they expect to stop over and look around until they get ready to resume their journey. They will always have their home right with them.

Wins Literary Prize

In the recent contest conducted by the Idaho Farmer for the benefit of their advertisers, Mrs. W. W. Reid won first prize for the best letter. Her exploitation of the Colt Heating and Lighting System won for her the five dollar prize offered. Mrs. Reid has done some very clever literary work and her genius has been recognized by some of the best literary critics. She has won five literary prizes during the past three years.

You can always tell a strong-minded woman, but you can't tell her much.—Ex.

a wonderful showing, the acreage being larger than in any previous year and the steady advance in price during the season making the crop, which a few years ago was not considered, the second crop in importance in the district. The importance of the livestock and dairy industry is also shown in the figures and the returns in the future, judging from the rapid trend toward dairying and livestock raising, will be greater.—Star Mirror.

The Christmas Store

Shop Early

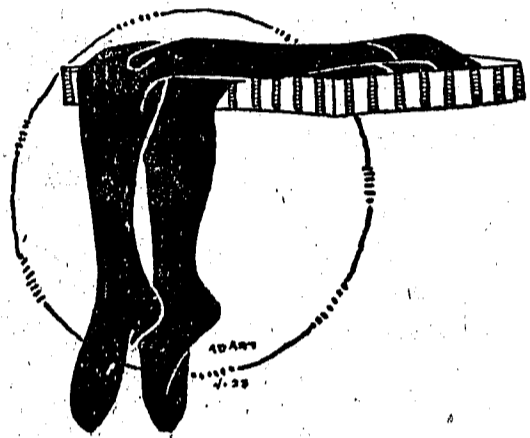

Is the Slogan for this Year

Each day brings this store many things for the gift season. By next week we will have many lines on display for your selection.

Our Art Department

Will help you with your fancy work. Stamped goods, embroidery patterns, complete line of D. M. C. embroidery cotton, Sun-glo rope silks, crochet cottons etc.

Special Purchase Sale of Corticelli Silk Hosiery for Ladies

\$1.95

We were very fortunate in buying a lot of high grade Corticelli hosiery that we can offer you during the Holiday Season at a big reduction in price. This hose should sell at \$2.50 a pair. The colors are black, African brown, nickel and log cabin. The pair \$1.95.

SOUTHWICK NEWS

A number of the Southwick people went to Kendrick, Saturday. Among them were: H. A. Russell, Mr. and Mrs. Floyd Russell, Chester Melver, Grant Bateman, R. M. Wright and son and T. J. Armitage.

The first snow of the season fell last Wednesday. The ground was white for a while but it soon melted.

There was a large crowd at Mr. Elvy's sale, for all the day was so stormy.

Mrs. George Jones bought Mr. Elvy's share in the telephone company and expects to get it moved and in working order this week.

Claud Craig of Leland has rented the store building formerly occupied by Ziemann Bros. and is moving his stock of goods up from that place.

Mr. and Mrs. Goan, Prof. Calvert, Miss Gossett, Stella McClelland and W. R. Smith, went to Lewiston, Friday to attend the teachers meeting at that place.

Mrs. Homer Hayward went to Lewiston, Thursday, returning Sunday.

George Wells visited with his mother, Tuesday.

Charley Kimes is home from Kellogg, where he has been working. He got his hand hurt and is unable to work for a couple of weeks.

Mrs. Chester Melver visited with her mother, Mrs. Jap Triplett, Sunday.

Alex, Albert and Oscar Lawrence are in Marshfield, Oregon, where they have work for the winter. They drove thru in their car.

D. B. Triplett has sold his ranch to Earl King of Seattle. Earl is a nephew of J. K. King of this place.

Mr. and Mrs. Wm. Herriman spent

the day, Sunday, with Mr. and Mrs. Dan Betts.

Phil Elvy took the mail to Kendrick, Monday, as Claud Kimes had some work to do on his car.

Clarence Henderson and wife spent the day, Sunday, with her mother, Mrs. Ralph Wright.

Jarvis Kimes celebrated his 81st birthday, Sunday.

The death of George Yeager occurred Sunday evening about 6 o'clock. He was taken sick Thursday evening and grew worse rapidly. Dr. Seeley was called Saturday and again Sunday. He was taken to Lewiston to the hospital for an operation, but died before being operated on. He was buried in the Southwick cemetery, Tuesday.

BIG BEAR RIDGE

Mrs. Ed Halseth, daughter Helen and son, Arnold, are spending the week with Mrs. Mary Halseth in Kendrick.

Delmer and Wayne Mathes left for Potlatch last week, where they will work during the winter.

Mrs. D. Penland and son of Orofino are visiting at the home of her parents, Mr. and Mrs. A. Kleth.

Adolph Forest was a Lewiston visitor, Saturday.

A public auction was held at the W. M. Blenden place, Friday.

The annual Red Cross Roll Call is now on. Those wishing to renew their membership to the local branch, kindly send your name and dollar to Mrs. N. E. Ware or Miss Johanna Hooker.

The Christmas Seal sale has begun by the four local schools. It is conducted in the same manner as in previous years.

A genuinely good time was spent at the home of Mr. and Mrs. Chas. Bowers, Sunday, when about fifty relatives came in to give Mr. Bowers a pleasant surprise in honor of his birthday. A delicious goose dinner was served to which everyone did justice. Those present were: Mrs. Kate Galloway and family, Mr. and Mrs. Otto Alber and daughter, Mr. and Mrs. O. V. Morey and family, Mr. and Mrs. Will Bowers and family of Avon, Mr. and Mrs. A. LaBolle of Texas ridge. This happy occasion will long be remembered by everyone present.

STONY POINT

Henry Garoutte is plowing for Leonard Fairfield at the present writing.

W. M. Evans of Texas ridge is visiting at the Ike Steensma home this week.

Mr. and Mrs. Leonard Fairfield were Sunday visitors at the Garoutte home.

A. P. Stevens and family of Pine Creek spent Sunday visiting at the Dave Johnson home.

Clarence Dygert has been tearing

down and rebuilding his barn this week.

Contractor Booth who is putting in the fills at the Myrtle bridge and completing the highway road to the bridge is progressing nicely with his work.

Boy Wins First Prize at Indiana State Fair

Muncie Youth Takes Baby Beef Championship.

When the leaders of the live stock industry promoted the baby beef club work among boys and girls, they did not expect that within only a few years these juniors would be able to surpass the experienced veterans in the show arena. But this, however, happened at the recent Indiana state fair when the winner in the baby beef contest showed in the open classes and defeated the breeders themselves for the grand championship of the show.

The boy who had this proud distinction was William Robert Wilson, the son of the well-known Aberdeen-Angus breeder, W. W. Wilson of Muncie, Indiana. After winning at his county fair, the young man took his baby beef, Baron W, to Indianapolis to compete for the state championship. There he met stiff competition in the show of 62 calves, 24 of which were Short-horns, 22 Aberdeen-Angus and 16 Herefords.

This promising stockman was asked to tell the story of his success for the benefit of the thousands of farmer boys and girls who are enrolled in club work all over the country. The following account is given in his own words:

"The calf that I showed in Indianapolis is a pure bred Angus. His sire is Belmont E. Baron and his dam is

William Wilson and His Champion Steer, Baron W.

Leona Dean. I named him Baron W. I bought him of my father in March. He weighed on March 1, 920 pounds.

"When I bought him he was running in the lot with other cattle, feeding on ensilage, clover hay and straw. I tied him up for a week and began to feed him some ground oats and corn and oil meal with his ensilage and carried him water.

"I won grand champion on him at our county fair and then I took him to our state fair, where I won first in the calf club and grand champion of the club. Then he won first in the open Angus class and was made champion Angus steer and later grand champion over all breeds. I am going to show him at the International Live Stock Exposition in the Calf club contest."

Professor W. J. Kennedy, Sioux City, Iowa, who judged the steers at Indianapolis, is reported to have stated that the animals shown there were among the best he had seen this year.

Ordinary Grain Binder Will Handle Soy Beans

The essential thing when harvesting soy beans for grain is to do the work just when the pods are nearly ripe, for even a few days' delay will cause many of the dead-ripe pods to shatter. The Iowa experiment station says that small acreages of soy beans may be economically handled with an ordinary grain binder, for then the sheaves can be shocked like other grain and left until they are fit to hull. The beans may be colored up some from the rains, but they will be kept sound and sweet and will be fit for feed or for seed.

Might Not Be Bad.

We have yet to see brown wrapping paper used as an ingredient for salad, but have no doubt that it can, and will be done.—Kansas City Star.

Infernal.
Natural heat is supplied for campers in the recently completed campground in Hawaii National park. This is accomplished by building the fireplaces about 100 feet from the edge of the firepot of Halemauau. Over hot cracks comes up heated air, free of gas, smoke or ashes, says a bulletin of the Department of Interior. One of the advantages of these "infernal cookers" is that they are always ready for the next meal. A recent party of 35 persons baked their potatoes, boiled their coffee, and did all their cooking in the natural fireplaces.

Music in your home will furnish recreation and relaxation for the family; it's a stimulant to young and old alike. What greater pleasure can be had than to enjoy the secluded comfort of your own home, listening to the New Edison Re-Creating the golden voices of the great masters singing the never old operas, or the stars of the variety and concert stage rendering the popular songs of today and yesterday?

The New Edison, the only phonograph that dares the test of direct comparison with living artists, can become a reality to you by the payment of but a few dollars a month. Thousands have already availed themselves of the advantages of the budget plan and have paid the balance with the least inconvenience while enjoying good music, the kind that should be in every home.

Come in and talk it over today.

Have You Heard the New Columbia Process Records?

The RED CROSS PHARMACY

DAIRY HINTS

Choosing Dairy Sire Is Important to Breeders

"The selection of the right bull has many times been the real beginning of a successful dairy farm," says A. C. Baer, professor of dairying at Oklahoma A. and M. college, Stillwater. "Thousands of farmers still make use of a scrub or grade sire on account of a mistaken economy in the cost of the animal. Such farmers or dairymen would be more successful and would make more money and get more pleasure out of the business if they paid more money for a good pure bred bull, one which would be certain to transmit desirable qualities.

"Some of the important factors to consider in the wise selection of a herd bull or a community bull are as follows: "First—The bull selected must be pure bred of the same breed as the cows. If it be used with a grade herd the breed best suited for the purpose intended should be chosen.

"Second—The pure bred bull should have a pedigree which shows official production records. For a grade herd, the dam and granddam of the bull should have at least a record of 9,000 pounds of milk or 400 pounds of butterfat. For a pure bred herd a bull with dams of 500 to 600 pounds of butterfat should be selected. The better the class of cows, the better the bull chosen for the herd should be.

"Third—The bull selected should have good conformation, strong vitality and constitution, and should show good breed characteristics. An animal showing male characteristics (strong masculinity) generally always proves to be a good sire.

"Fourth—The sire chosen should be as a rule large in size. An undesirable animal or one which seems to lack vigor is not as desirable as a fairly large, vigorous animal.

"A good herd bull should be pure bred with known production record of his ancestors; should have good conformation; should be fairly large in size and show strong vitality and constitution.

"Whether to buy an old bull, or to select a young animal is still an unsettled question. Sometimes an old bull may be purchased from a breeder who has no further use for him. In such case, a valuable sire can be secured for a small sum.

"In America, the average dairyman prefers to select a young animal, mostly because a young one is handled easier and shipped more easily than an old one, and also because he can be used for a longer time on the herd."

Butterfat Still Holds

Prewar Purchase Power

Butterfat is the one agricultural product that has the same purchasing power that it had during the period previous to the war, according to J. B. Fitch, head of the dairy department of the Kansas State Agriculture college. Butterfat is 14 cents higher than it was a year ago.

With a 10,000,000 pounds' shrink in the volume of butter in storage during the past year, with imports greater during 1923, and with the industrial situation good, Professor Fitch is of the opinion that butter prices will remain steady. He states that farmers contemplating the purchase of cows need have no fear that because dairying is a profitable business it will soon be overdone. He points to the fact that our population is increasing more rapidly than the cow population.

High Producing Cow Has Big Capacity for Feed

Why one cow will make a heavy producer while her stable mate of the same age and similar breeding, under the same management fails to pay her way is a problem many men have given up. At the Missouri experiment station two such cows were found. A careful study of the feed sheets showed that the high producer was eating a great deal more feed than the other cow. In other words, the good cow, because of large capacity and a well-developed mammary system, was able to not only eat enough for her bodily needs but considerably more besides. The poor producer, after satisfying the needs of her body, had no room left to store feed from which to make milk.

Secure Economical Milk by Liberal Cow Feeding

The most economical milk production is not secured by liberal feeding of each cow in the herd, but by studying each cow and feeding according to the production of each, giving to the heavy producers all the feed they will eat and convert into milk, and giving the light producers no more feed than they can utilize for milk production. Overfeeding is to be avoided just as much as underfeeding.

Keep Promising Heifers. You cannot afford to buy inferior cows when you can raise good ones at home. Farmers should keep promising heifers and raise their own milkers.

Popular Testing Associations. Cow-testing associations are gradually becoming popular throughout the Middle West.

One Cow in Six a Loser. One cow of every six, on an average, loses money for her owner.

LIVE STOCK NEWS

Sheep Are Particularly Subject to Parasites

(Prepared by the United States Department of Agriculture.)

Sheep probably suffer more from parasites than do any other kind of live stock, says the United States Department of Agriculture in a publication just issued entitled "Farmers' Bulletin 1330, Parasites and Parasitic Diseases of Sheep," by Maurice C. Hall of the bureau of animal industry. Most of our losses in sheep, mutton, and wool are from animal parasites, as sheep suffer comparatively little from bacterial diseases, it is said. Lambs and young animals are most susceptible to parasites and suffer from them.

Special emphasis is placed in the bulletin upon disease prevention. It is the sheepman's business to prevent disease, and as soon as an outbreak is noticed a competent veterinarian should be called in. Act promptly, the department urges, to ascertain the trouble when sheep become unthrifty. A postmortem examination of one of the sick animals may disclose the trouble and save others. Parasitized animals usually do not have fever—they are unthrifty, and unthriftiness may go on to emaciation with a fatal termination.

Pasture rotation, use of forage crops, feeding from racks or bare floors, draining or filling swamps, and restraint of wandering dogs are measures the department recommends as being of value in parasite control. It points out emphatically that permanent pastures perpetuate parasites. Parasite eggs pass in the manure, usually. The disposal of the manure determines the fate of these eggs, whether they find their way back into the animals and hatch out or not.

Copies of the bulletin may be had without cost, as long as the supply lasts, by writing to the Department of Agriculture, Washington, D. C.

Better Lambs Campaign Is Winner in Kentucky

Kentucky is leading the eastern sheep-producing states in a campaign to eliminate the "bucky" lamb, according to reports to the bureau of agricultural economics of the Department of Agriculture. This is the third season that the campaign has been carried on by the state extension agents and, as a result, it is estimated that more than 200,000 docked wether and ewe lambs will be marketed from Kentucky this year. The high quality of these lambs already has attracted the attention of many eastern buyers, who are going into the state and buying direct from the producers instead of waiting for the lambs to arrive at the central markets. A number of public auctions have been held, with the highest bid frequently within 50 cents per 100 pounds of the top at the leading eastern markets the same day.

Losses from docking and castration have been very small. The greatest advantage from eliminating the "bucky" lamb, according to members of the trade and marketing specialists, is in reducing the number of seconds and culls in the market receipts. It is estimated that from one-third to one-half more lambs can be handled in the future than are now sold, because of the improvement in the supply.

Potatoes Particularly Valuable for Fattening

"Potatoes are particularly valuable for fattening pigs," says Austin A. Dowell, live-stock extension specialist with the University of Minnesota. "They should be cooked, the water discarded, then mixed with grain at the rate of three parts potatoes to one part of the concentrates. Prepared in this way they may be fed liberally to fatten pigs or sows with litters. Raw potatoes may be fed in limited quantities to mature and idle brood sows. If fed to pregnant sows, they should be cooked and fed in relatively small quantities."

Mr. Dowell says that raw potatoes are often readily eaten by cattle, horses and sheep. Fed in large quantities to dairy cattle they are likely to taint the milk and produce a white saline-like butter. Another reason why potatoes should not be fed too freely, says Mr. Dowell, is because they contain a poisonous material called solanine. The sprouts carry this substance in relatively large quantities and should be removed before feeding.

Lambing Time Is Looked Upon as One of Troubles

Lambing time is looked upon by many flock owners as one of difficulty. It is a very important season for the shepherd and the degree of success through the lambing season largely determines the profit or loss from a flock. Cared for properly after they are bred, very little trouble will be experienced at lambing time.

Fall Pig Ration Giving Most Lucrative Results

One ration which has given good results in the fall pig feeding is composed of 50 pounds of corn, 50 pounds of middlings and 10 pounds of tankage. Another used successfully is made up of 10 parts of corn and 1 of tankage. Fifty pounds of corn, 50 pounds of shipstuf and 10 pounds of tankage also makes a good ration, while 8 parts of corn and 1 part of soy beans may be used for a fourth.

POULTRY

How Much Grain to Feed Hens of Various Breeds

Most people who are attempting to put the flock on a scientific basis are perplexed as to the amount of grain which they should feed to their hens. Some people feed by measure, others by "handfuls" and most people by guesswork.

Measure feeding is probably to be condemned more than any other method. Merely giving a quart pail of grain to the hens and letting it go at that is what causes so many poor flock records over the country. The hens should be fed all that they will consume, never by measure, yet measures can be used as an indication of the amount they are likely to require.

Morning feeding of grain should be just sufficient to get the hens busy. Oats make a good morning feed and one quart to a hundred hens will keep them busy most of the morning, but where a balanced grain and mash ration is being fed you will not want to disturb it by feeding oats alone in the morning. Feed a small quantity of the grain mixture you are using in the morning, only enough to get the hens working and give them all they want at night.

Experiments carried on by the federal poultry farm authorities have brought out some interesting figures as indicating how much grain and mash by weight is required for fowls per day. General-purpose fowls, such as Rocks, Reds and Wyandottes, require one quart of scratch grain and a quart and a half of mash per day for each 13 hens, or for each 16 hens of the smaller or egg breeds. This is at the rate of 7½ pounds each of grain and mash per day for 100 Leghorns and 9½ pounds of each to 100 general-purpose fowls. Hens having range consume 75 pounds of feed in a year, while the Leghorns consume 55 pounds in addition to the green food eaten.

Much Butter Being Made on a Household Scale

Farmers and their wives residing on the approximately 4,500,000 farms, where at least one cow is kept on each, continue the practice of making

butter on a household scale, despite the growth of modern creameries to the extent of 3,885 in number in 1922. For the purpose of making butter on the farms, 13,125,000,000 pounds of whole milk were utilized last year and 625,000,000 pounds of this product was manufactured. Thus nearly 40 per cent of the total butter production of the United States is made on approximately one-half of the farms of the country.

Series of Experiments to Decide Value of Corn

Recently a series of experiments was run to decide the value of grinding corn. In these tests it was found that cornmeal produced 7 per cent more milk and 14 per cent more fat than ear corn. Where corn and cornmeal were compared with cornmeal it was found that the cornmeal was slightly in the lead, having a 2 per cent better production in butterfat. Even though the corn is extra cheap, the cows will give a better account of themselves to the tester if they are fed corn that has been ground.

PUBLIC AUCTION

3 miles east of Leland, 2 and one half miles southeast of Cameron on the J. R. Hepler ranch, the following described property on

Monday, December 3rd

Sale Starts at 10:00 O'clock Sharp

Livestock

- Black horse age 8 years, wt. 1200
- Black mare age 11 years, wt. 1200
- 2 black mares, 10 years, wt 1450
- Will Stump's gaited saddle horse, black, wt. 1200
- Jersey milch cow, fresh in April
- Milch cow due to freshen Nov. 26
- Milch cow fresh Nov. 16
- 2 Full blood roan Durham cows, milking strain, fresh December and January 1
- Full blood roan Durham bull, milking strain, 9 months old.
- 2 heifers giving milk
- Roan Durham bull
- 4 Steers coming 2, 1 coming 3, 1 coming 4
- 2 yearling heifers
- 4 cows fresh in April

About 80 S. C. White Leghorn chickens

Implements

- ¾ Winona wagon and rack. ¾ Mitchell wagon and bundle wagon. Hack. 14 inch Moline gang. 12 inch P. & O. gang. 18 inch John Deere walking plow. 14 inch walking plow. Riding cultivator. 2 walking cultivators. One-horse cultivator. 8-foot disc. Rightlap. 2-section spring tooth harrow. 6½ foot Acme harrow. 2 section harrow. 8 foot Tornado weeder. 7-foot Orchard cultivator. Hay rake. Chatham fanning mill. Set butt chain harness. 2½ inch Moline wagon. New 14 foot California rack. Pair bobsleds. Pair light bobs. Light sleigh. 4 sets harness. 1500 chick coal brooder. 30 tons alfalfa hay.

Household Goods

- Malleable iron cookstove, good as new. Cast iron cook stove. Heating stove, 4 burner oil stove and oven. Cream separator. 10-foot solid oak dining table. Breakfast table. Kitchen cabinet. Sewing machine. Library table. Dresser and commode and numerous other articles.

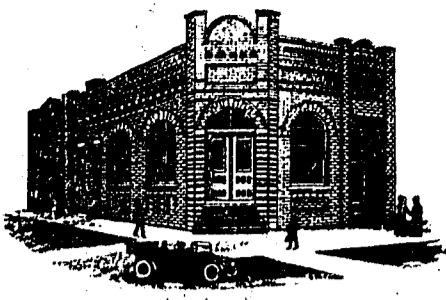

Terms: All sums of \$20 and under cash; all over that amount bankable note bearing 10 per cent and due October 1, 1924. 5 per cent discount for cash.

LUNCH WILL BE SERVED BY THE LADIES AID

SAVING MONEY

Through Force of Habit---

We all find it hard to save money until we have "developed the habit." Everyone knows that if we do a thing once or twice it becomes a habit—we do it unconsciously.

The habit of saving money is not hard to acquire, as thousands of successful men and women will testify, but there must be a desire to get the habit.

Better than a gift of money is the gift of making money. A large part of that is the habit of saving, because it provides capital with which to work.

START NOW, and "develop the habit" of saving money—Save a definite amount each week, but START NOW.

Convert Old Buildings

Into Houses for Fowls

(Prepared by the United States Department of Agriculture.)

Many farms have old-style closed-up poultry houses, with poor light and ventilation, or old sheds and other buildings of little use for other purposes, that can be remodeled or built over with little difficulty into satisfactory poultry houses for the flocks this winter. The size and the shape of the buildings makes little difference, says the United States Department of Agriculture, but the essential factors are dryness, good ventilation, freedom from drafts, plenty of sunshine, and room enough to allow the birds to move about with freedom and comfort.

If new houses are to be built or old buildings converted into poultry houses, locate them on high or sloping ground if possible, but always on dry and well-drained soil. The amount of floor space to be allowed each fowl varies somewhat with conditions, but on a farm or where the birds can be out of doors nearly every day the department has found that about 2½ square feet of floor space per bird in flocks of 20 is enough. In a village or city or in a climate where there is a good deal of snow, making it necessary to confine the birds closely, 4 or 5 square feet per bird is needed. The interior of the house should be simple, convenient, and easy to clean.

The converted poultry house may or may not have a floor. If the house is on dry, sandy soil a dirt floor is usually quite satisfactory although often more damp than board or cement floors. Fresh gravel and sand must be added from time to time to keep them sanitary. If board floors are used, make them tight and smooth so as to make them dry and easy to clean. If possible, build board floors 8 or 10 inches from the ground to allow a circulation of air and to prevent rats from harboring under them. Cement floors, especially for large houses, are quite satisfactory, as they keep rats out, and last much longer than board floors. They must be kept well covered with litter, however, department workers say, to make them warm and comfortable for the flock.

Comfortable Houses for Ducks Quite Important

In cold weather ducks should be kept in the house because their feet are so tender that when they come in contact with the cold ground they suffer greatly and hobble along as if their backs were broken. However, they should not be kept housed more than is really necessary.

If the roof is good the rest is easy. If the weather boarding is not sufficiently close to keep out draughts in cold weather, cover the outside with tarred paper or strip with lath.

A board floor is better than an earth floor because the ducks will often stir up the ground in a very disagreeable manner when there is the least sign of moisture.

Provide suitable houses if you wish to be successful. The houses need not be very expensive, but they should be substantial so that they may be used for the same purpose several years in succession.

Ducks, both old and young, should have a dry, comfortable place to stay in at night. If forced to sit on the damp ground they are liable to be taken with cramps and colds in the head. The latter are almost certain to

turn to croup. There is usually some shed or building that can be converted into a duck house at small expense. Where only a small flock is kept this plan is advisable.

Corn Fodder as Litter Is Excellent for Hens

Litter is almost indispensable in every henhouse where eggs are desired, as well as healthy and contented fowls. Some farmers complain about using good wheat or oats straw for the hens to scratch in. In this event, cut-corn fodder makes an excellent and lasting litter for the poultry house—and even if one must pay to have the fodder cut, it is cheaper than other litters.

When cut up, ten bundles of corn fodder makes enough litter to cover 400 square feet of floor space. For the same space, when straw is used, at least two bales would be required, and this would cost several times as much as the corn fodder. Fodder is good not only because of its cheapness, but also because the hens like to eat the pieces of leaves, thus obtaining some bulky food, which is often lacking in poultry rations.

Pure Air Is Essential to Health of Laying Hen

It has been estimated that the hen consumes twice as much air as a horse does, pound for pound of weight, and three times as much as a cow, and yet we see hen houses with no means of getting any pure air into them except through cracks, which may give a direct draft over some bird. With other conditions favorable to the development of germs, there soon are colds, roup and bronchial disorders of many kinds.

Training Shipper to Grade and Pack

Much Waste and Loss of Fruits and Vegetables Can Be Prevented.

(Prepared by the United States Department of Agriculture.)

Waste and loss in fruits and vegetables due to spoilage or breakage in transit have been one of the serious problems connected with the profitable production and selling of perishable foods.

The market specialists of the bureau of agricultural economics of the United States Department of Agriculture have long urged growers to take steps to prevent this unnecessary waste, which brings them no profit and often means a serious loss, at the same time reducing the total supply of fruits and vegetables. Increased care in selecting, grading, packing and shipping their products has accomplished much in spite of the risks involved in shipping perishables over long distances, across deserts, mountains and plains in all kinds of weather.

Tomatoes All Year. Tomatoes are now found on the large markets practically all the year, coming from Mexico, Cuba, and the Bahamas in early winter, from Florida and south Texas next, and from east Texas, Mississippi and Tennessee during the spring. Ohio, Illinois and New Jersey supply the summer trade of the large eastern markets until local growers and home gardeners can fill the demand. California ships tomatoes from May to November. In order to avoid high freight charges on tomatoes which will spoil in transit, very careful grading and packing must be done by the shippers. Both consumer and grower reap the benefit of this care preceding shipment.

Losses and waste in handling poorly graded cabbage are quite frequent. The shippers lose by their own negligence and the consumer loses because of the lessened supply, poor quality and higher local prices. Growers are being systematically urged not to ship over-ripe, decayed and soft heads of cabbage.

Grade All Products.

The large associations of potato growers have succeeded in grading their products under brand names which protect the customer against oversized, hollow and defective tubers. Boxed apples from the Northwest leave that region splendidly graded, although at times they suffer unavoidably in transit to eastern markets. California growers are making vigorous efforts to put only standardized cantaloupes, citrus fruits and other products on the market, to avoid shipping either green or overripe melons and to enforce such rigid grading, packing and shipping rules that only those oranges, grapefruits and lemons which will surely withstand travel and changes in climate, are now being shipped.

The list might be indefinitely continued. Every effort is being made by the United States Department of Agriculture to influence growers to grade their products and pack them properly for shipment, enabling the housekeeper, who is the final purchaser of California's cantaloupes, Florida's tomatoes, or Oregon's apples, to obtain her money's worth when she deals with the retail storekeeper.

Fowls Appreciate Good Feed of Grain at Night

A hen consumes approximately four ounces of food a day, and poultry authorities at Minnesota University farm find she will eat two ounces of this in the form of dry mash when it is available. These ground grains are quickly

digested, and the fowl is saved the trouble of grinding all the feed in her crop. Thus by feeding dry mash production can be forced.

The other two ounces of feed, says the poultrymen, should be in the form of whole or cracked grains, fed twice a day in a deep, clean litter, giving a little less than an ounce in the morning and a little more than an ounce at night. The hen's crop is small and the winter nights are long, consequently the heavier feeding should be given at night. Care should be taken always that the fowls go on the roosts with full crops.

Why Doesn't Farmer Put Implements Under Cover?

Ask a farmer why he doesn't put the farm implements in the shed instead of leaving them just where he unhooked. He may answer, "What's the use? The parts that will rust out are covered with oil, and those that aren't covered with oil last longer than the rest of the machine anyhow."

The implement dealer knows that if the machinery is not housed he will sell two machines where he should have sold only one, and that he will also sell more repairs.

With both the farmer and the implement dealer satisfied, why house the farm machinery?

Sunflowers for Silage Should Be Cut Promptly

Sunflowers for silage should be put in when the seeds reach the hard dough stage. When grown on wet land so the pith is sappy and full of water, they may be cut and wilted in the field before putting into the silo. When grown on very dry ground, they should be put into the silo as promptly as possible and enough water added that a little can be squeezed from the cut stalks.

DAIRY FACTS

Dairy Cow Should Have Best of Care in Fall

"Regular housing and barn feeding of the dairy cow should not be delayed too long in the fall," says T. V. Gullickson of the dairy division, University farm at St. Paul, Minn., "for unless she receives plenty of food and is kept in comfortable quarters a slump in her production is sure to occur with the change in season. A drop in production is always a serious matter, for it is well known to all experienced dairymen that when a loss of milk yield occurs it is almost impossible to bring production up to a high level again later, even if the cow is given the best feed and care.

"The stable in which the cow is to be kept should be cleaned and well bedded, broken windows and doors replaced or repaired, and the ventilation system put into working condition so that the change from outdoor and pasture life to that of the stable may be made as moderate as possible. The cow must be comfortable if she is to be profitable.

"The feed of the cow, always an important factor, is extremely so at this season. A splendid basis for her ration is found in the feeds that are usually grown on every dairy farm. Clover or alfalfa hay with corn silage furnish a very satisfactory roughage combination for the ration. It is economical to supply the hay in as large amounts as the cow will consume. Twenty to thirty-five quints of silage, depending on the size of the animal, should be given from the first day of barn feeding for it will aid greatly in making easy the transition from pasture to dry feeding.

In addition to the roughage the cow producing milk should receive some grain or concentrate feed. Corn and oats furnish an excellent basis for such a grain ration. It will usually, however, be found profitable to purchase other feeds to add to these. A combination of 300 pounds ground corn, 200 pounds ground oats, 200 pounds bran and 100 pounds linseed oilmeal will give good results. One pound of this mixture to every three pounds of milk produced is about the proper ratio for a Jersey or Guernsey cow, while the lower testing Holstein should receive only one pound for every four pounds of milk she gives. The quantity should vary from this rule with different individuals, some cows consuming a larger proportion of roughage than others and therefore requiring a trifle less concentrates."

Find Crushed Corn Best at New Jersey Station

At the New Jersey station ear corn was compared to corn and cob meal for feeding cows. The corn was broken on the cob and compared to corn crushed in the ear; 6 pounds wheat bran, 10 pounds corn stover and 9.4 pounds of hay produced 20.2 pounds milk with .89 pounds of fat for each cow, while 6 pounds corn and cob meal, 6 pounds wheat bran with same amount of hay and stover produced 22.1 pounds milk, .93 pounds fat. Thus corn-and-cob meal exceeded corn from the ear by 9.4 per cent for milk and 4.5 per cent in yield of fat.

Save Heifer Calves.

Here's a good rule to follow—save your heifer calves and sell your bull calves. If he is a pure bred he is worth good money to an older breeder—sell him. But it is different with the heifers, give them a chance to prove their worth in the milk pail.

Properly Prepare Fowls for Holiday Marketing

While November is generally regarded as turkey month, there is also a strong demand for fowls of all kinds and good prices can be realized for almost any kind if they are properly prepared for market.

In this connection it should be remembered that careful grading of poultry pays. All fowls should be assorted according to age and condition, size, color and shanks. Never mix good and poor stock in shipping to market, as the poor birds always reduce the value of the lot. In other words, uniformity of appearance and quality must be considered.

Poultry should be fattened quickly to be tender and juicy. If the fowls have been kept in good condition during the summer and fall, two weeks of liberal feeding should put them in excellent condition for marketing. After they have commenced to fatten give them all they can eat four or five times a day.

Turkeys ought not to be confined for any length of time, but for just a short time prior to marketing. If fed liberally while they have a free run, they can be put in condition for marketing within ten days.

This is the time of year when the chicken flock should be culled closely. The undesirable fowls will bring better prices now than later, and if kept throughout the winter will only be an expense and a detriment to the rest of the birds.

Uniformity in Fowls Is of Utmost Importance

For those who are breeding standard fowls it is essential that they look out for type in the first place, and not allow their flock to run to the dogs in this particular, as some we have seen recently.

What is a Rhode Island Red good for in the breeding yard if he has a short Wyandotte of Cochin back on him? You might just as well put him in the pot and be done with him, for he is worth more there than anywhere else. Then there is the Orpington standing upon shanks almost like a game. He is of good color, perhaps, but that is all you can say about him.

No matter what breed you are attempting to breed or handle, your first duty to that breed and yourself is to get in line with the best possible type to be had. If you find that you do not have that kind, better get rid of them and get the right kind before you waste any more valuable time in experiments. Study the type that goes to make a good one of your kind, both in males and females, and get in line. Get the best color, of course, that is consistent with the right type, but get type at any cost first. Be sure you know your breed or variety as that is of the most importance. Work intelligently at all times, and you will be surprised how well things will go along.

Dealers Can Stop Much of Waste in Egg Supply

How the dealer can help stop the waste in eggs is pointed out on a poster recently issued by the extension service of Colorado Agricultural college, in line with a campaign for better quality. Dealers can help by:

× Discouraging production of infertile eggs by paying more for them.

× Packing eggs only in good cases, using new flats and fillers.

× Placing excelsior pads on top and bottom of each case and not using any straw.

× Keeping eggs in cool, dry place, away from kerosene and never allowing a shipment to stand in the sun.

× Shipping at least once every other day, because holding eggs in temperatures above 60 degrees causes rapid deterioration.

Dried Whey Fed Laying Hens on Government Farm

New uses for dried whey are being revealed by a series of investigations by the United States Department of Agriculture.

Four pounds of crude sugar and 1½ pounds of dried whey containing about 30 per cent of albumin were obtained from 100 pounds of whey. The dried whey was sold to a laboratory making baby food, at a price giving a satisfactory return for the whey.

Dried whey and dried buttermilk are being fed experimentally to laying hens at one of the department farms. In the first half of the twelve-month experiment the pen of hens receiving dried whey produced eggs at a rate comparing favorably with results obtained with other kinds of feeds.

Get Maximum Production of Eggs During Winter

If you are planning to add more pullets to your laying pens get them as soon as possible, in order to get the maximum production of eggs this winter. Just as a cow's milk production is decreased by moving her from one place to another, disturbing her routine, laying is delayed where pullets are disturbed by moving them from one farm to another or from their regular quarters. Disturbing pullets also retards growth.

Plan Outlined to Avoid Grassy Flavor in Milk

When the herd is first placed on pasture or is turned into clover or alfalfa, a grassy taste is often caused in the milk for a short time, not only making the milk objectionable to trade, but affecting the butter taste as well. This can usually be eliminated by starting the herd on a change of pasture, or a pasture from confinement, gradually.

Do not leave the herd on the new pasture too long the first day—a few hours in the morning or afternoon, supplementing this with some grain and a dry roughage such as silage. The silage can best be saved during the time of good pasture, after the cows have gradually been allowed more time in the pasture, as it will make a good supplement for poor pastures later in the summer. After a week or ten days, cows producing twenty pounds of milk a day or less will need little if any grain on good pasture. For heavier producers, feed a pound of grain for each six or eight pounds of milk produced per day.

A mixture of 400 pounds of ground corn, 200 pounds ground oats, or bran, and 100 pounds of cotton seed meal is recommended by the Purdue dairy department. Cottonseed meal is especially good at this time, to produce a firm butter with better quality, as well as to tend to check the laxative effects of a fresh pasture. A liberal supply of salt should be available to herds on pasture at all times.

Ohio Cow Makes Record of Five Sets of Twins

The Ohio Station Bulletin 7 makes note of a cow in the station herd that is reported to have dropped five sets of twins out of seven times calving. Twinning has also been rather common in other closely related cows in the herd. The possibility of establishing a family of cows which would produce a high percentage of twins is suggested, but it is pointed out that of the nine sets of twins recorded six sets were male and freemartin and three were males.

DAIRY FACTS

Dairy Cows Respond to Good Feed and Treatment

A dairy cow will respond to good feeding and good treatment, perhaps better than any other farm animal. Each individual dairy cow should be a unit by herself. Unlike other farm animals, dairy cows cannot be efficiently fed in a feed lot, as the requirements for each cow may be different.

The best feed for dairy cows is an abundance of pasture grass when that is available. A good pasture provides a balanced ration. Some high-producing cows will require a little grain as a supplement to pasture.

During the time of the year when a good pasture is not available, a cow can be fed efficiently by providing:

1. An abundance of palatable feed.
2. A balanced ration.
3. Succulent feed.
4. A moderate temperature in barn.
5. Comfortable surroundings.

A dairy cow is fed for the following purposes:

1. For maintaining the body.
2. To supply material for milk.
3. For development of fetus.
4. For growth of animal, if immature.
5. At times to produce gain in weight.

Three general classes of food material are required for feeding cows:

1. Protein or nitrogenous material.
2. Carbohydrates and fat to supply heat and energy.
3. Ash or mineral matter.

A well-balanced dairy ration will contain the above food material in the proper proportions. In making up a feed for dairy cows, it is usually most convenient to balance the roughage and concentrates separately and then feed all the roughness each cow will eat and adjust the grain mixture to the amount of milk or butterfat produced by the cow.

A good general rule to use as a guide in feeding is to feed from one-fourth to one-half as much of a balanced grain mixture per day as the cow gives milk per day. Cows giving rich milk usually give less per day but need a little more grain in proportion of the milk.—A. C. Baer, Professor of Dairying, Oklahoma A. and M. College.

Summer Suggestions on Care of Dairy Utensils

It is more or less difficult to give adequate care to the dairy utensils during the summer months. This is due to the fact that hot scalding water or steam is more troublesome to obtain. Proper care of these utensils is important during the summer months due to the temperature which favors the multiplication of bacteria. In the production of high-grade milk it is necessary that all utensils be thoroughly cleaned, for if any organic matter is left in any of them, it is almost impossible to produce the desired quality of milk.

If the utensils are cleaned with water just as it comes from the well or tap, some bacteria will remain which will multiply very rapidly during the warm weather of the summer months. The utensils should be sterilized, and this is done by exposing them to live steam for several minutes. In the cleaning of tinware they should be first washed with cold water and then with hot water and a washing powder that is alkaline in nature. Ordinary soaps are not satisfactory in the cleaning of the utensils of the dairy. After the tinware has been thoroughly cleaned it should be sterilized. Sterilization is the most important factor in the production of high-grade milk.—B. W. Fairbanks, Associate Professor Animal Husbandry, Colorado Agricultural College.

FARM LIVE STOCK

Young Cocklebur Plants Are Poisonous to Stock

(Prepared by the United States Department of Agriculture.)
The cocklebur, variously thought to have been troublesome only as a weed and because of its stiffly armed burs, has been demonstrated definitely to be poisonous to live stock in the early stages of its growth, as was reported by other observers. The report on this demonstration is made by C. D. Marsh, G. C. Roe, and A. B. Clawson of the United States Department of Agriculture, and the results published in department circular 283, Live-Stock Poisoning by Cocklebur. Only the very young plants, before leaves have formed, produce poisoning, and the dose which produces sickness or death is about 1½ pounds to a 100-pound

animal. This means that young pigs up to 50 pounds in weight, which have been found the most susceptible, are poisoned by 12 ounces or less of the small cocklebur plants. Cattle or sheep also may be poisoned if they eat enough of the plants in proportion to their weight.

Little can be said so far about medical treatment for this kind of poisoning. Feeding of whole milk was found to prevent pigs feeding on the cocklebur plants from being poisoned. Salted bacon grease, lard, and raw linseed oil also gave good results. The best method, says the circular, is to keep pigs off pastures infested with cockleburs until the plants are large enough to be harmless; or to kill out the plants by mowing them before they seed. It must be remembered in this connection that each bur contains two seeds and that ordinarily only one of them will grow the first year after ripening, consequently it is not possible to kill out a patch of the plants the first year.

Copies of the circular may be obtained from the Department of Agriculture, Washington, D. C., as long as the supply lasts.

Farm Free of Scrubs.
Make your farm a scrub-free area by using pure bred sires.

Will Make or Break.
The sire will make or break any breeder.

Regularity of Feeding Is of Much Importance

Regularity of feeding is of greater importance than time of feeding, in the care of dairy cows. The dairy cow should have regular meal hours. More roughage will be consumed if it is fed two or three times a day instead of only once.

Feeding of Minerals to Cows Is Not Profitable

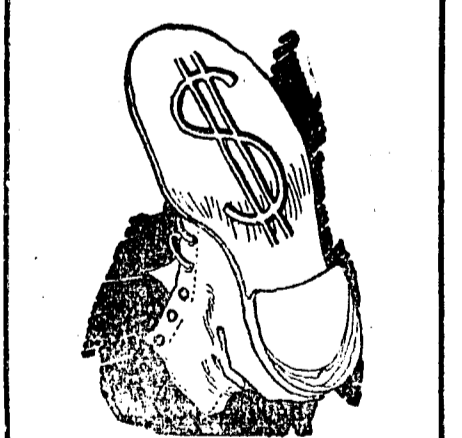

Feeding of mineral mixtures to dairy cows did not show profit in pounds of milk produced at the Ohio station, where it was carefully tried out.

To supply minerals to dairy cows in forms that can best be used is by feeding legume roughage, such as alfalfa hay, clover and soy bean hay, rich in minerals and nitrogen. This applies both in raising young animals and feeding for milk production.

Chamberlain's Tablets Have Done Her a World of Good.

"Chamberlain's Tablets have done me a world of good," writes Mrs. Ella L. Button, Kirksville, N. Y. "I have recommended them to a number of my friends and all who have used them praise them highly." When troubled with indigestion or constipation, give them a trial and realize for yourself what an excellent medicine it is.

To know how good a cigarette really can be made you must try a

Save Your Shoes
My modern repair methods preserve the comfort of the old shoe. Save \$ by having your shoes repaired before they are too badly worn.

SUMMONS

IN THE DISTRICT COURT, SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF LATAH.
Chester H. Stanfield, Plaintiff vs. Henry Kern, William Albert Kern, Maudie Kern, Elizabeth English, and Maggie Gallagher, Defendants.
THE STATE OF IDAHO SENDS GREETINGS TO Henry Kern, William Albert Kern, Maudie Kern, Elizabeth English and Maggie Gallagher, the above named defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, OF THE NATURE IN GENERAL TERMS AS FOLLOWS:

To partition and set apart to the respective parties, Plaintiff and Defendant, the following described real property situated in Latah County, Idaho, to-wit:
The Southwest Quarter (SW-¼) of the Southeast Quarter (SE¼) of the East One-half (E½) of the Southwest Quarter (SW¼) and Lot Four (4), all in Section Thirty (30) in Township Forty-three (Twp. 43) North, of Range Five (5) West of the Boise Meridian, containing 161.76 acres according to the United States Government Survey as a good, sure and infeasible title in Fee Simple, as their several interests therein may appear.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 22nd day of October, A. D., 1923.

HARRY A. THATCHER Clerk.

By ADRIAN NELSON Deputy.

FRANK L. MOORE and LATHAM D. MOORE. Residence. Moscow, Idaho. Attorneys for Plaintiff. 44-6t

SUMMONS

IN THE DISTRICT COURT, SECOND JUDICIAL DISTRICT OF THE STATE OF IDAHO, IN AND FOR THE COUNTY OF LATAH.
Matthew Horrigan, Plaintiff; vs. Jacob Walker and Anna C. Walker, his wife, Defendant.
The State of Idaho sends greetings to Jacob Walker and Anna C. Walker, the above named defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To foreclose that certain mortgage given to Mrs. Archie M. Duckett and Mr. Archie M. Duckett and recorded in Book 44 of Mortgages at Page 184 of the records of Latah County, and covering the following described lands and premises situated in Latah County, State of Idaho, to-wit:

The Northeast Quarter (NE¼) of the Southeast Quarter (SE¼) of Section One (Sec. 1) Township Thirty-nine (Twp. 39) North, of Range Five (R. 5) West of the Boise Meridian.
And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 31st day of October, A. D., 1923.

HARRY A. THATCHER Clerk.

By ADRIAN NELSON Deputy.

Good Health
If you would enjoy good health, keep your bowels regular. No one can reasonably hope to feel well, when constipated. When needed, take Chamberlain's Tablets. They are mild and gentle.

GLEANINGS

Mr. and Mrs. Billy Crews arrived last Friday for a visit with friends here. They were former Kendrick residents, Mr. Crews being proprietor of the barber shop here for a number of years. They left Kendrick 16 years ago.

Dorothy and Carl Erickson of Orofino were in Kendrick Saturday to visit friends and witness the basket ball game Saturday evening.

A telegram was received here the first of the week stating that oil had been struck on the Stapleton holdings near Shelby, Montana, at a depth of 1600 feet. This is the second well that has been brought in by this company on their 80 acre lease. There are a number of local people holding stock in the company.

The Grand Theater is giving a Thanksgiving dance tonight, (Friday) and an oyster supper to be served at midnight.

Rumors are still current that the Kendrick flour mill is to be started some time between now and the first of the year. If the mill is started it will probably mean two shifts every 24 hours. Considerable overhauling will have to be done to put the mill in shape to operate. The mill running to full capacity means quite a respectable little payroll in town.

On the old McFadden place on the breaks of Bedrock Canyon, there is a grapevine that is worthy of mention. It was planted by Mr. McFadden many years ago and is now at least 4 inches in diameter at the base. It has climbed to the top of a tall pear tree, the branches of the tree forming a trellis. This fall Grant Bateman, who is renting the ranch, sold over 500 pounds of grapes from this one vine, and there were at least 200 pounds left hanging on the vine.

Mrs. Gregory Eaves of Lewiston spent several days visiting her sister, Mrs. Frank Boyd. Theo Hanson was a Moscow visitor last Saturday.

The Barnum Lumber & Mill Co. has installed a new band saw in the wood working department. The shop is now well equipped to do most any kind of wood work.

Mr. and Mrs. E. W. Lutz and children went to Spokane, Tuesday morning. Eleanor, who has been ill for some time, was taken to a specialist.

The Kendrick glee club sang at the meeting of the Julietta Parent-Teachers meeting Tuesday evening.

Mr. and Mrs. Edwin Smith of Spokane spent Thanksgiving in Kendrick at the home Mr. and Mrs. H. P. Hull. Mr. Smith is editor of the Idaho Farmer and his daughter edits the Twice-a-week Spokesman.

Wade Keene of Bear ridge came out pretty well at the shooting match at Cameron, Monday. Out of 10 shots he got five turkeys. Amiel Peters was next with 4 turkeys. Wade Keene is one of the best rifle shots in the state.

Mrs. S. P. Callison went to Coeur d'Alene, Wednesday, to visit her parents, Mr. and Mrs. M. B. Lewis. Mr. Lewis has been quite ill for the past two weeks and narrowly escaped an attack of pneumonia.

Mrs. H. R. Ramey and Mrs. Edgar Long returned Wednesday morning from a visit at Lewiston.

A dancing party was given last night at the Fraternal Temple by the young married people of Kendrick, in honor of Mr and Mrs. A. V. Dunkle. Mr. Dunkle is leaving for Kellogg today. His family will join him in Kellogg as soon as he can make arrangements for a house there.

J. A. Tertling & Sons of Moscow secured the contract of building ten and one-third miles of the North and South Highway between Viola and Potlatch. The bid was \$100,843.76, while that of the next highest bidder, Campbell & Barr was \$102,119.48.

Roy Florance arrived Wednesday afternoon to visit friends in the Crescent country.

Miss Esther Bethel arrived Wednesday afternoon from Pullman to visit friends here.

Mr. and Mrs. Lloyd Kuykendall arrived Wednesday afternoon from Interstate, Idaho, to spend Thanksgiving with home folks near Island.

Mr. and Mrs. Harold Thomas went to Lewiston, Wednesday to spend Thanksgiving at the home of Mr.

and Mrs. John Phillips.

Walter McCrea, Jr., arrived Wednesday afternoon from Moscow to spend his Thanksgiving vacation with his parents.

K. H. Ramey and A. V. Dunkle entertained a number of their Julietta and Kendrick friends at a stag card party at the Fraternal Temple last Friday evening. Pinochle furnished diversion for the evening after which refreshments of cookies and cider were served. Joe Gardner carried off the prize, a pinochle deck.

There will be a meeting of the local Red Cross at the city hall tonight, (Friday), for the purpose of transacting important business. Everyone is urged to be present.—Theo Hanson, president.

Dorothy and Agnes Jones arrived Wednesday afternoon from Lewiston, where they are attending the normal. They will spend their vacation with their parents on Bear ridge.

Will Raise Big Turkeys

O. Henry of Cameron went to Spokane, Wednesday for the purpose of buying some extra fancy Bronze turkey gobblers to improve his next year's flock. This year he raised nearly 200 turkeys and made a nice profit from them. He is now making plans to raise a flock of at least 500 next year, as he says it requires almost as much work to care for half that many. He expects to have nothing but full blood Bronze stock on his place.

Sales Day Good Business

Word has been received from Ritzville that the sales day held recently was so successful that the commercial club plans to have a day of this kind every fall. The business men of Ritzville report a better cash day than any time in the history of the community. Prizes were offered for the farmers coming the longest distance.

CAMERON ITEMS

The Ladies Aid sale was held last Wednesday and the sum realized was \$203.50 which was very good under the condition of the roads and rainy weather.

School has been shut down on account of the illness of the teacher, who has the measles.

Mr. and Mrs. Gus Kruger and daughter, Rosalie, and Mrs. A. O. Wegner left for Lewiston, Monday, where little Rosalie will undergo another operation, the first one not being successful.

Miss Hilga Ehlers is on the sick list at this writing. It is believed she has the measles.

LENORE LOCALS

Mr. and Mrs. Jack Schultz returned last week from Coeur d'Alene where Mrs. Schultz was taking medical treatment.

Mr. and Mrs. C. F. Henry made a flying trip to Lewiston, but were caught in the rain and had to lay over till the roads got some drier.

O. Zinn's house burnt to the ground last Wednesday. Not a thing was saved. Mr. Phillips had the place rented.

Albert Wheeler is quite sick with the flu and has been in bed for a week. We are in hopes he will soon be better.

The farmers are busy plowing, seeding and husking corn.

Mrs. M. Granquist and her daughter, Mrs. Lloyd Pea, went to Coeur d'Alene for medical treatment. They are both getting better.

The Ladies' Sewing Club met at the home of Mrs. Wm. Green last Wednesday. They made one quilt and partly finished another. Some 16 ladies were there at noon. They served a big chicken dinner.

Several cars of wheat have been shipped out of Lenore the last week, also a carload of beans.

Mrs. C. Swartz returned from Haven Lake. She had a nice time.

Mrs. F. A. Wheeler made a business trip to Lewiston last week.

WOODMEN OF THE WORLD MEETS WED., DEC. 5.

All member of the Woodmen of the World are requested to meet next Wednesday evening, December 5th. We are planning on a big time. Initiation. Election of officers and refreshments on for this meeting. Try and come. Marvin Long, Council Commander. 48-11

Order your Christmas cards from the Gazette as soon as possible. Orders should be in within the next few days. A fine line to select from. 47-11

Are We?

We all remember when we were foolish, and are we sure we have not utterly overcome that?

Easy to Lead Sheep If

You Know Proper Method

Most sheep lead well if properly handled, old shepherds say. Even the stubborn, fine-wool breeds will come along if they are started right. No real shepherd tries to drag a sheep by the neck or wool. From the sheep's left side he guides it, with his left arm around its neck, tickling the base of the tail with his right hand. The sheep moves—sometimes faster than is expected—but it moves.

In catching a sheep, too, there is a right way to hold the strongest ram, and a wrong one; the wrong one may let him go and will cause a bruise that takes two months to heal. Wise shepherds know that the skin is only lightly attached to the flesh, and that holding by the wool tears this tender skin loose from the flesh even farther than the hand's grip; the resulting bruise not only is painful to the sheep, but damages the carcass for market until it heals.

The best of practical tips that old shepherds pass among themselves make up a large part of the correspondence course in sheep and wool production recently included in the extension service of the state agricultural college at Ithaca.

The course is free, the only requirements being residence in New York state and a chance to work with sheep while taking it.

Hogs Get Little Benefit

From Undigested Grain

Some people argue that hogs will get the benefit from unmoistened and undigested grain which passes through animals. It would appear that this logic is no better than to contend that the threshing machine needs no special adjusting because, after all, the flock of hens will get the grain which passes out the wind stacker. Everyone knows that when grain becomes wet and allowed to become stale, in case of hogs following stock, the quality of the grain for feeding is much reduced.

It is true that calves several months old do not masticate their feed thoroughly, thus grinding oats and corn will be profitable.

Mineral Mixtures Quite

Necessary for Hog Herd

Swine growers who are puzzled about mineral mixtures will find their questions answered in the following formulas which include the essential ingredients combined in the right proportions. A careful survey of experimental work with minerals suggests the following mixtures:

Four parts acid phosphate, or two parts rock phosphate, or one part bone meal with four parts ground limestone, or six parts unleached wood ashes, or one part air-slacked or hydrated lime with one part salt.

Pigs Fed Standing Corn

Will Do Little Rooting

Pigs fed standing corn with all the tankage that they would eat did no rooting. The pigs fed corn, only, did the most rooting. Pigs fed four-tenths pound per day of tankage with access to a third crop alfalfa did a small amount of rooting. Each lot also received coal and salt. The above results were secured in experiments conducted by Prof. J. H. Shepperd at the North Dakota Agricultural college experiment station.

Cockerels from early hatches generally mature more rapidly and at less expense than those of midsummer hatches.

Small drinking fountains are always becoming empty. Then the chicks suffer with thirst and when the fountain is filled they trample each other in the fight for water.

Tonight And Saturday "Across The Divide"

A picture of intense interest to both young and old. It is different than the ordinary western dramas.

Harold Lloyd in 'High and Dizzy'

Here's another good comedy and one you will want over again.

Don't Hold Your Votes, Cast Them Each Night.

The contest is getting hot as well as close. Are you casting your votes!

A Timely Suggestion This is the season of the year when the prudent and careful housewife replenishes her supply of Chamberlain's Cough Remedy. It is almost certain to be needed before the winter is over and results are much more prompt and satisfactory when it is kept at hand and

given as soon as the first indication of a cold appears and before it has become settled in the system. There is no danger in giving it to children as it contains no opium or other harmful drug.

What Shall I Give for Xmas?

That is the Question Asked by Everyone

To solve your problem, come to the Presbyterian LADIES AID AUCTION

Which will be held in the dining room of the old Hotel Kendrick.

Saturday, December 8

Bring the whole family at noon. Sandwiches and coffee will be served and all afternoon tea and waffles will be served.

Sale starts at 2 o'clock sharp and immediately afterwards the drawing will take place, the person holding the lucky number will be given the comfort.

NEW DISHES

We have received several new patterns in dinner dishes in both imported English ware and high grade American ware. All patterns carried in open stock and will be carried in stock so that you can add to your set at any time.
