"The Home of Good Things to Eat and Wear"

## Kendrick Gazette

Ralph B. Knepper, Publisher  
Entered as second-class matter 1892 at Kendrick, Idaho, under the Act of Congress of March, 1879.  
Subscription \$1.50 a-year.

Seventy-six hundred and seven newspapers of the United States, out of a total of 13,388, are now Newspaper Association Members of the National Highways Association. These members receive from the association road news every week. The majority of these papers publish part or all of this news every week.

Why? Only because progressive papers, realizing the intense interest taken by everyone everywhere, in roads, desire to serve their readers with the sort of information and news stories they want to read.

That more than half the papers of this great country are so interested in highways, highway building, highway maintenance, and highway use, is a sufficient indication of the importance of the subject to the body politic. On roads depend, in an increasing degree every year, our transportation. It is not so long ago that the railroads represented the largest industry in the United States. Recently the automobile industry passed the railroads in size; it is now the country's largest industry (exclusive of farming). But the automobile industry in turn is destined soon to be passed by road building, which will be the greatest single industry in this Nation.

Transportation is rails plus cars, rivers plus boats, highways plus motors. Cars, boats, and motors are helpless without their highways. It is because we have more cars than roads, more vehicles than places to use them, and because we need, must have, more highways, good highways, national highways, and good roads everywhere, that 7,607 newspapers have enrolled themselves in a campaign of highway education which will inevitably result in "a paved United States in our day."

It now develops that the proper refreshments for a Mah Jongg party are chop suey, boiled rice and tea, the two former dishes to be eaten with chop sticks.

A man in business may cut down on his advertising to reduce his overhead, but the bad feature of this idea is that by so doing he also cuts down his volume. As Brisbane says: "When you advertise, shout, don't whisper."

There's many a man who can't understand why he should buy a washing machine so long as his wife has got her health.—Ex.

### METHODIST CHURCH

Sunday school at 10:00 a. m.  
Epworth League at 6:45 p. m.  
Preaching at 11:00 a. m., by the Rev. W. H. Forsyth, district superintendent, followed by the Sacrament of the Lord's Supper.

The quarterly conference will be held immediately after the morning service.

Preaching at 7:30 p. m. Subject: "The Great Refusal; or Chapter III. in a Young Man's Life."  
You are heartily invited to attend these services.  
James W. Poolton, Pastor.

### CRESCENT CLIPPINGS

(Too late for last week)  
The J. E. Long family entertained a couple of Spokane gentlemen last week, who spent some time cruising the timber on the Long homestead.

Mrs. George Christensen has been quite sick but is better at the present time.

Ben Pressnal took dinner with P. G. Rews, Sunday.

Mrs. Axel Ekman was very ill last week but is better again now.

Mr. and Mrs. Clem Israel and family and Mr. L. S. DuBois visited at the John Darby home, Sunday.

Walter Dorendorf and James Farrington started cutting logs for Farrington & Kimberley, Monday.

Mr. and Mrs. Wm. Kauder and Mrs. A. J. Wells took dinner at the

Frank C. Souders home, Tuesday.

According to latest report Mrs. Earl Laongdon is improving fast, and expects to be home again before long.

Herman Long left for Wallace, Wednesday.

George and Lois Christensen received first and second prizes, respectively for learning the most verses from the Bible. Anna, who was to receive third prize will get it later.

### BIG BEAR RIDGE

A. E. Janes of Juliaetta spoke at the Community Hall, following Union Sunday school, Sunday morning.

James S. Nelson spent last week with his family in Clarkston, Wash.

N. E. Ware spent last week with relatives and friends in Lewiston and Clarkston.

Misses Opal Jones and Ruth Dammarell spent the week end at their homes here and in Kendrick.

Lester Nelson has gone to Lewiston, where he entered school.

Miss Bertina Forest writes from Spokane that she has a good position at a Lutheran Girls' Home there.

Wood saws have been heard right and left for the past three weeks.

Miss Flora Nelson went to Colton, Wash., Friday to visit her sister, Mrs. Leif Field.

Mrs. Will Whybark and small son, who have been ill for several weeks are both much improved at this writing.

John and Eddie Galloway have installed a radio set at their home here.

Mr. and Mrs. Otto Gladden returned from Coeur d'Alene, last week, where they have spent the winter. They will make their home on the Gladden farm here. A crowd of young people gathered at their home Sunday evening to give them a charivari and to express well wishes.

### UNCLE HANK

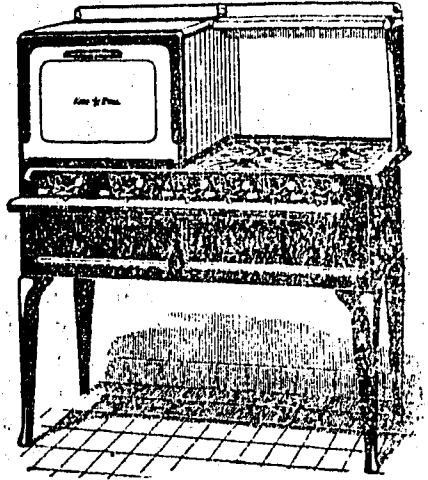

When 'pickin' out an automobile or a wife, don't be deceived by th' hood, th' paint, or th' pleasin' lines of th' body.

Those Who Tell Things. Everybody's list of friends is constantly undergoing declination by the elimination of those who tell things that are said to them in confidence.

But It's a Fact. It is hard to realize that one and his romantic "crowd" of twenty years ago inevitably grow fat, baldheaded and more and more thoughtful of good dinners.

## SANITARY!

## The Stove that uses OIL but burns GAS

The Red Star Oil Stove is the latest word in oil stoves. It has no wicks or wick substitutes. The patented, indestructible, all-metal burner changes kerosene, gasoline or distillate into clean, fast-cooking gas. One gallon of fuel burns 19 hours.

See an actual demonstration of this wonderful oil stove at our store. We have a model and size to fit every need and every pocketbook.

### CAMERON ITEMS

Mr. and Mrs. George Wilken spent the week end in Peck.

Rev. Rein went down Friday to see Mr. Wolff who is seriously ill.

Mrs. Boemeke and daughter, Ruth, were callers at the Mronsiek home, Saturday afternoon.

A stag party was held at the home of Herman Meyer, Thursday evening. The delicious supper, prepared by the boys, was enjoyed by all. The evening was spent in playing cards.

Wilbert Brunsiek returned from Kendrick, Saturday, where he spent a few days.

The Aug. O. Wegner family have been quite sick, with an attack of the measles.

Mrs. Carl Hartung called on Mrs. Oldav, Sunday.

Mr. and Mrs. Gus Kruger and daughter, Rosalie, and Mr. and Mrs. Henry Wendt were Sunday dinner guests at the Blum home.

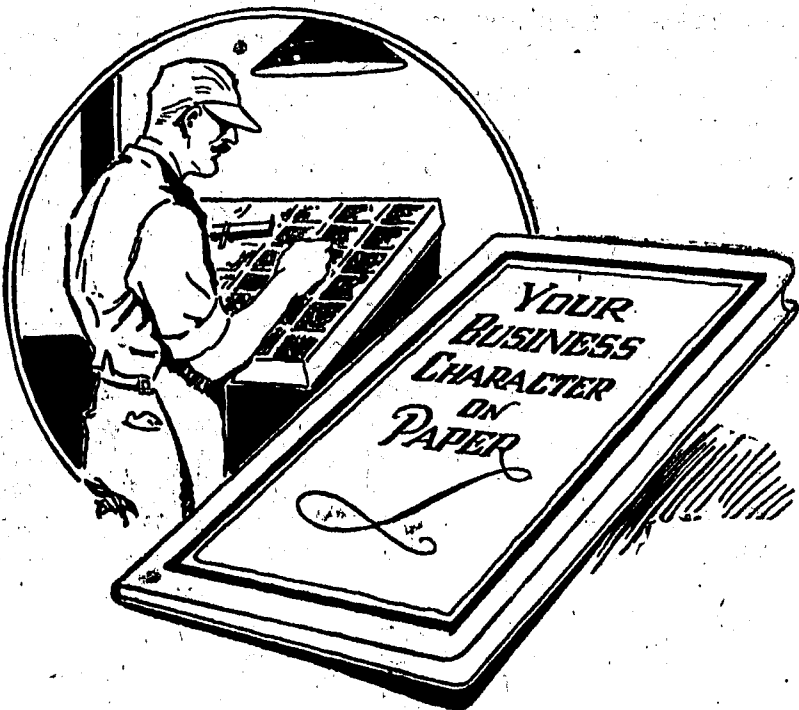

Mr. and Mrs. August Brammer were Sunday callers at the Rev. Rein home.

Herman Meyer was a Sunday dinner guest of Mr. and Mrs. C. L. Wegner.

Sunday evening callers at the Blum home were: Mr. and Mrs. August Brammer, Otto Siffow and Wilbert Brunsiek.

Mr. Carl Hartung was a visitor of Mrs. Emil Larson in Leland, Tuesday.

### UNCLE HANK

It takes a weddin' to bring out 57 varieties of pickle-forks.

### PROMOTE HEALTH OF FLOCKS

Much Good Can Be Accomplished by Spraying Runways and Houses With Lye Solution.

Every poultry raiser knows that

fowls thrive best in clean, well ventilated places. By keeping the houses, roosts, nests and runways sprayed with a concentrated lye solution you will do a great deal toward promoting good health and productiveness among your poultry.

Many of the most successful poultry raisers use this lye solution around their poultry houses at least every other week. The solution is made by dissolving a small can of lye in five gallons of water. A sprinkling can, hand spray, or an old whisk broom may be used to apply the solution.

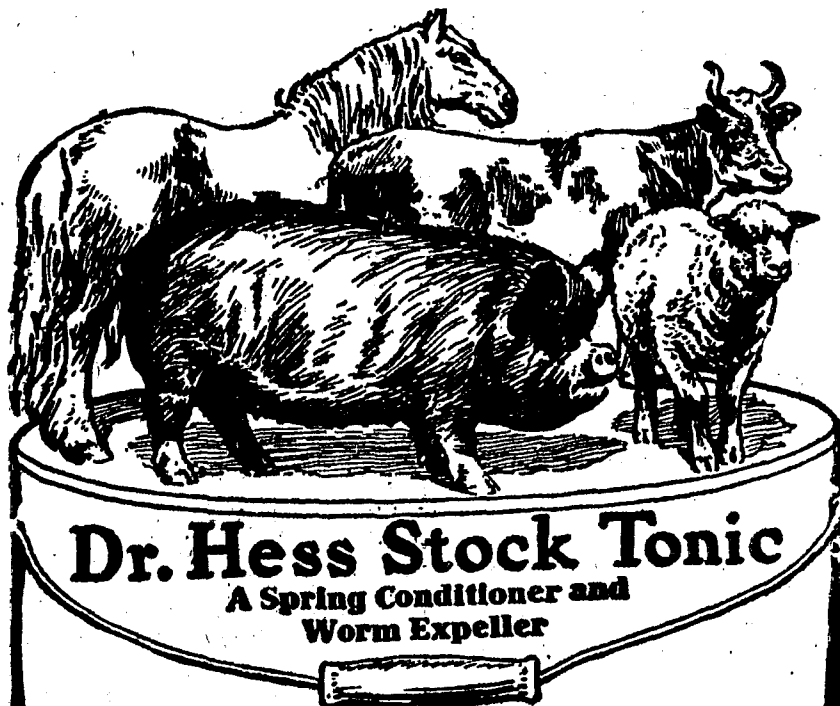

### AVOID EXCITEMENT IN PENS

Poultrymen Will Save Several Eggs Every Day by Observing Rules of Silence.

Whistling, or speaking gently, or knocking on the door to let the hens know when he is coming will save the poultryman several eggs in the day's gathering, says Prof. Willard C.

### Highbrow Chatter.

In talking with a gifted highbrow one finds himself summoning up all the information he generally hasn't much use for.

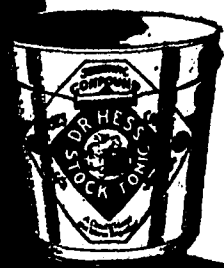

**Dr. Hess Stock Tonic**  
A Spring Conditioner and Worm Expeller

**Spring Is Here.** Soon the litters of pigs will be coming, the calves, the lambs, and the colts will be dropped. Feed your brood sows Dr. Hess Stock Tonic before and after farrowing. It makes the bowels active, relieves constipation, promotes good health and good digestion which means healthy pigs and a mother with a milk supply to nourish.

Condition your cows for calving by feeding Dr. Hess Stock Tonic before freshing. Then feed it regularly to increase the flow of milk. It lengthens the milking period.

Give your brood mares a course of Dr. Hess Stock Tonic. And your work horses. It puts your team in fine fettle. You cannot afford to plow, harrow, sow, mow, reap or team with a team out of sorts, low in spirits, rough in hair, blood out of order, or full of worms. Dr. Hess Stock Tonic is good for sheep—especially good for ewes at lambing time.

Why Pay the Peddler Twice My Price?

**Red Cross Pharmacy**

Tell us how much stock you have. We'll tell you how much Tonic to buy.

**Dr. Hess Instant Louse Killer Kills Lice**

**Rape Crop Is Valuable Forage for Swine Herd**

Dwarf Essex rape is one of the best forage crops for swine that can be pastured the same season it is seeded, according to W. L. Robison, of the Ohio experiment station.

Averages ranging from 787 to 609 pounds of gain to live weight creditable to an acre of rape pasture have been secured in tests.

The amount is influenced by a number of factors such as the yield of the crops, the age and condition of the pigs, the kind of ration fed, and the method of feeding.

**Find Different Problem in Every Patch of Corn**

Every patch of corn presents a different problem, but if you apply commercial fertilizer wisely you can nearly always make it profitable.

To establish a regular demand and income, marketing must be done on regular fixed days.

The head of the dressed carcass should be tucked back under the wing, when packed for shipment.

Pullets Lay in Winter. Young stock that begins to lay in the fall of the year will usually lay throughout the winter, the period when eggs are highest in price.

**USE OF MULES ON FARMS INCREASES**

**Washington Was the First to Breed Them in U. S.**

Washington.—The ability of the mule to endure hardship and perform sterling service under adverse conditions has established him as a real asset in American agriculture.

The importance and popularity of the mule as a work animal are attested by the greatly increased use of the animal in our farm operations.

Can Endure Hardships. "The mule is a hardy work animal," says J. O. Williams in a bulletin of the United States Department of Agriculture.

His Eccentricities. "The mule is an animal with possibly more eccentricities and undeniable virtues than any other domestic animal.

Must Be Treated Gently. "There are some peculiarities which belong to the mule alone. He does not like to be hurried, worried or cuffed about; to try to force him to do things against his will is practically impossible.

Wrong and Right Way. "There is a wrong and a right way to lead a mule. A man who looks at a mule and lugs at his head will never make any progress."

"COLD IN THE HEAD" is an acute attack of Nasal Catarrh. Those subject to frequent "colds" are generally in a "run down" condition.

**PROPHECY OF PARIS SEER IS CONFIRMED**

**Fortune Tellers Thrive Despite Arrests and Fines.**

Paris.—"Monsieur, you are born under a lucky star, and will certainly succeed in the affair you are undertaking."

"Madame, I have no doubt you are right, for I am the police commissary of this district and my present undertaking is to arrest you for fortune telling."

So Madame Carnaut, one of the hundreds of Paris wise women who predict the future from cards, coffee grounds and by other means, found herself headed for the police station.

A dissatisfied client therefore can cause much trouble to the prophetess. Madame Carnaut had a practice of casting a spell over a lump of sugar and making the client eat it, at a cost of from 60 to 100 francs.

**Famous Police Dog Picks Out Suspected Murderer**

Dresden.—Elga, a famous police dog of Weimar, which has become known throughout the German republic for her ability to track criminals, has just furnished evidence in a murder of which Oscar Nicht of Dittersbach, Czechoslovakia, was suspected.

Nicht, in prison here for theft, has been suspected of two murders, although courts were unwilling to accept the evidence against him as conclusive.

A few days ago Nicht was led into the courtyard of the Dresden prison with twenty other criminals and a number of detectives in plain clothes.

**Man's Good Acting Wins Pardon From Sing Sing**

Ossining, N. Y.—Because W. A. Reeves, a British veteran of the World war, proved to be a good actor in the recent musical comedy in Sing Sing to the outside public, the state board of parole, which had refused to release him recently, decided later to set him free.

In the show Reeves played the role of a former Sing Sing prisoner who had just been released from prison and who, when tempted, not alone decided to reform himself but tried to reform other crooks.

**Missourian Prefers Oxen to Horses for Farm Work**

Kansas City, Mo.—Reports from the rural districts are that farmers are returning to the use of horses. But there is a farmer near Ashland, Boone county, who prefers oxen, even to horses.

**Women Ask Equality in Barber Shops**

New Orleans.—Business women of New Orleans have demanded of the New Orleans Association of Commerce equal barber shop rights with men, and the commercial organization has passed the buck to the locals of the barbers' union and the Master Barbers' association.

**DESCRIBES GRAVES DISCOVERED AT UR**

**Explorer Tells of Treasures Found in Mesopotamia.**

Philadelphia.—The first report of joint expedition of the British museum and the University of Pennsylvania in the work of excavating at Ur of the Chaldees in Mesopotamia during the present season has been made public and contains interesting and important archaeological information of the work being performed in the land where history dawned.

For the first time we have been able to learn the real character of the site and to recover in good condition some of the astonishing works of art which it conceals.

"Up to the present, two distinct parts of the site have been attacked, a cemetery and the building on which Doctor Hall worked. The graves are probably the earliest yet found in this country, dating from the fifth and early fourth millennium, B. C.

"The people, who were, at least in part, Sumerian, were still using many stone implements, but were none the less quite familiar with copper, and had developed great skill in hammering and casting the metal.

"Pottery is for the most part wheel-made, but hand-made wares had not wholly disappeared, and painted pottery, recalling that found in the early strata of the ruins of Suss, was in use at the beginning of the period, though it seems to have been ousted later by the plain types.

"The dead were laid sometimes at full length, sometimes in the contracted, or 'embryonic' position; many were in mere troughs cut in the hard soil, some were in clay urns, oval or circular, such as continued in use throughout all Babylonian history.

"The building lies close to the cemetery. On the top of the mound are the scanty remains of a temple put up by Dungi, the second king of the third dynasty of Ur, who reigned about 2250 B. C.

"Entirely buried below the terrace floors lies the building which Doctor Hall first discovered. A lucky chance has brought to light a tablet recording its foundation, and we learn that it was the temple of the goddess Nin-Khursag, set up by King An-An-Pad-Na, son of King Mes-An-Pad-Da, king of the first dynasty of Ur.

"The scribes who soon after 2000 B. C. drew up a list of the kings of Sumer and Akkad have left it on record that the kings who reigned immediately after the flood were those of Kish, and the years of their reigns would put Methusaleh to shame.

"Then came the second dynasty, that of Erech, vitiated by the like incredible longevity, and third from the flood is put the first dynasty of Ur. This dynasty, like the two that preceded it, has commonly been regarded as mythical. Its rulers were assigned no more than normal length of power, but nothing was known of them, and they were merely names in a schematic list: a dead reckoning basis on the king lists would put their date somewhere about 4000 B. C., and Sumerian history, properly speaking, could not be carried back much beyond 3000 B. C.

"Tell-El-Obeld has produced not only the oldest dated document yet known, but a contemporary record proving the real existence of these shadowy kings.

**Nurse Asks 15 Million for Shattered Nerves**

York, Pa.—Mary Keister, a trained nurse, who said her nerves were shattered by the blasting of stone while workmen were improving a road near her home, has asked \$15,000,000 damages from the county. It is the largest claim ever made against York county, Comptroller Bartensehager said.

NEW YORK JEWELERS TO QUIT MAIDEN LANE

District Has Been Home of Gem Business for 80 Years.

New York.—No more diamonds will be stolen from Maiden Lane by "gem bandits" after next spring. Police learned that no ambitious plots for fortunes in pearls, rubies, rhinestones or amethysts can be carried out there...

The diamond district is moving uptown, Maiden Lane, for more than eighty years the home of the watch, diamond and jewelry trade, will become just plain Maiden Lane in a few months. Firms which have been established in this street for more than fifty years have made arrangements to move to a new center in Forty-seventh street.

There has been a gradual exodus from Maiden Lane for some time, following the general trend northward of both wholesale and retail trade.

But there has been no concerted movement until the present one, arrangements for which have been perfected during the last year.

The pioneers among the dealers who moved up town settled on Fifth avenue. Now the others' virtually will take possession of Forty-seventh street from Fifth avenue to Sixth avenue. This will tend to concentrate the shopping centers of all types in one district, taking into account the northward movement of department stores as well as jewelers.

"Wizard" of the Treasury Is Only 24 Years of Age

Washington.—A. W. Gregg of the bureau of internal revenue, only twenty-four years of age, holds the position of special assistant to the secretary of the treasury. He is a tax expert and a wizard at figures, his duties consisting of advising the secretary with regard to tax matters. He has been connected with the bureau since March, 1920, and for a time was connected with the office of the solicitor and was chairman of the special committee on appeals and review. Later he was chairman of the committee on the revision of the revenue act. Mr. Gregg was in the army during the war and is a native of Palestine, Tex.

Cop Emulates Solomon; Geese Pick Out Owner

Fairfield, Conn.—Tony Moddert, who recently lost a flock of cherished geese, got a tip to look for the missing birds in the chicken coop of George Vasco, a neighbor. He did so and found the coop full of geese.

Availing that he recognized the geese and the geese recognized him, Tony started to take them away. George objected vehemently and finally called Policeman Bennett, who listened to the arguments of both sides and rendered a decision that the birds should be turned loose. The decision was executed and the geese promptly made for Tony's house, cackling in delight or terror, according to the varying interpretations of Tony and George.

"Sure, them ducks belong to Tony," announced Bennett, eminently satisfied with the vindication of his decision, but George is threatening a civil suit to get the geese back.

U. S. Eats 45,093,892

Bunches of Bananas Washington.—Every man, woman and child in the United States ate two-fifths of a bunch of bananas during 1922, or at least the total number consumed, if divided equally among the entire population would have given each that amount. During that year 45,093,892 bunches of bananas were imported into this country valued at \$10,145,911.

This country also bought abroad during 1922 around 111,000,000 pounds of lemons, 34,712,185 pounds of figs, 53,606,000 pounds of dates and 21,437,820 pounds of currants.

English Roads Safe

London.—There was only one railway accident in England involving loss of life during 1923, according to the Railway Gazette. This was at Diggle in July, when two passengers were killed. Since the beginning of the present century there have been two years—1901 and 1908—without a single fatality to passengers. In only three years have more than five people been killed, and in twenty-three years the number totals seventy-three.

SCIENTIST FINDS LARGE SUN SPOT

Theories as to Why They Affect Earth's Temperature.

New York.—A new sun spot having a diameter of more than 50,000 miles, a length large enough to stretch twice around the earth was observed recently from an observatory at West Chester, Pa., by Dr. David Todd, former director of Amherst college observatory. This great sun spot is situated on the eastern edge of the sun.

Sun spots have been observed by astronomers since the remotest times, and many have attributed some of the abnormal weather phenomena of the earth to influences exerted by them. Many years ago the Australian astronomers, who had analyzed the observatory records of weather covering more than a century, found that droughts and periods of heavy rains followed each other regularly in periods averaging about 18 years. And during these cycles numerous sun spots phenomena were noted. In recent years astronomers have given much study to the influences of the appearances of sun spots upon our weather and while there is not at present a general agreement on the theory, little grounds are left for believing that other factors than sun spots are responsible for many of the more violent terrestrial weather and climatic disturbances, magnetic and electrical storms, hurricanes and droughts are intimately connected with sun spots.

Affects Earth's Temperature.

Notwithstanding the large amount of study that has been devoted to sun spots during the last 100 years, they are not at present fully understood. Two theories are advanced to explain them. The one most generally held is that sun spots are vortex of cyclonic phenomena within the sun's external envelope, which are, in many respects, analogous to tornadoes and hurricanes on the earth.

Every sun spot has a magnetic field, the polarity of which is secured by noting the direction of rotation of the electrons in the vortex of the spot. This is done by spectroscopic measurements.

A sun spot rarely occurs alone. There is usually a group of them, although the smaller members may not always be visible to us. The spots often exhibit opposite magnetic polarity, and smaller spots of either polarity often follow the members of a pair of spots. This electrical phenomenon is believed to be reflected on earth by changes in the atmosphere. A great part of solar radiation of heat and electric power is absorbed in the higher layers of our atmosphere. About 40 per cent is lost by reflection, 40 per cent by absorption, leaving only 20 per cent to penetrate down to the earth's surface. The 40 per cent which is absorbed in the upper air is believed to exert the greatest effects in changing the earth's temperature. It acts by modifying the circulation of the whole atmospheric mass. When this is violently put in motion radiation is allowed to reach the earth's surface, but when circulation is stagnant radiation is deflected and absorbed. Both the thermal and electrical radiation of the sun vary together, and electrical storms within the sun are reflected in some climatic changes on the earth.

Cause Magnetic Storm.

About 10 or 14 days usually are required to notice changes in our atmosphere after solar disturbances have been observed. The center of the sun's disk is the important part regarding its thermal radiation; but the marginal areas of the disk are the chief electrical centers, because the sun's magnetic field changes the paths of the charged particles emitted from the sun spots and other areas of disturbance.

The second sun spot hypothesis holds that they are due to large areas of heated gases projecting up through the disk, in many cases for thousands of miles, which radiate heat and magnetic waves into space, and when they exhaust themselves fall back into the chromosphere to become reheated and recharged. Dr. H. H. Clayton has suggested that when clouds of hot gases are ejected in the form of sun spots they do not increase the radiation from the central portions. The cooling of the projected gases, in some cases hundreds of thousands of miles beyond the sun's disk, causes them to act as a screen, which hinders the radiation from the sun's mass immediately below. Should this hypothesis be true it will follow that the sun's influences upon the earth will be controlled by phenomena on its margins rather than by radiations from its central masses.

The British astronomer Maunder and Camille Flammarion both believe that streams of electrical particles ejected into space by sun spots are the causes of magnetic storms on the earth through creating disturbances in the atmosphere.

Wills \$20,000 to Buy Turkeys for the Poor

Detroit, Mich.—The will of George W. Fowle, Detroit millionaire, was filed for probate. Mr. Fowle's first bequest is of \$20,000 to supply the poor of Geneva, N. Y., his old home town, with turkeys every Christmas as a memorial to his mother, Mrs. Charlotte Fowle. Albert Fowle, a brother, and Mrs. Elizabeth Barnes, a sister, both of Geneva, are left \$10,000 each.

WILL TRAIN 40,000 BOYS NEXT SUMMER

War Department Gives Plan for 1924 C. M. T. C.

Washington.—War department plans for the 1924 summer training camps made public recently disclose that forty thousand students between seventeen and twenty-four years old will be enrolled throughout the country for instruction at the citizens' military training camps, which open in all army corps areas August 1.

These camps are an extension of the Plattsburg idea of 1915, favorite Americanization plan of Theodore Roosevelt. They offer a thirty-days' course in outdoor training to volunteer candidates who can measure up to the moral and physical standards set by the War department. All expense is borne by the government.

Instruction is divided into four groups, designated as the basic, red, white and blue courses. In the basic course, only the elementary drills are to be taught, athletics and citizenship studies receiving the principal attention. But students in the advanced classes may specialize in infantry, cavalry, engineers or other branches of the service.

As a result of experiments at the 1923 camps, important changes, to go into effect in the camps this year, appear in the War department announcement. Advanced students, who have attended previous camps, will go into the ranks with the regulars, drilling, hiking and shooting alongside seasoned veterans. These youths, however, will occupy quarters and take their meals with the main body of C. M. T. C. candidates.

Reserve officers, who are specialists in various fields, are to be called to active duty for much of the nonmilitary studies this year, the troops of the regular army being used largely for drill instruction and field maneuvers.

By arrangement with Secretary Weeks, the Military Training Camps association has undertaken to launch a nation-wide campaign to bring the benefits of a course at the C. M. T. C. camps, to the attention of eligible youths.

Young Girl Evangelist Converts Thousands

San Francisco, Cal.—Uldine Uley, eleven-year-old girl evangelist, conducted her first big meeting in San Francisco. The child has been preaching for six months and has made thousands of converts. She is a blue-eyed, golden-haired, a laughing, rollicking youngster, like any other little girl of eleven, and yet from her lips fall such phrases as: "The main points of my commission are three in number: Salvation, divine healing and baptism of the Holy Spirit."

"I firmly believe in the doctrine of the immaculate conception—in the virgin birth." "I'm a fundamentalist as opposed to the school of modernists—the latter don't accept every word of Holy Writ, whereas the fundamentalist says each line of the Bible is literally true."

Army Airmen to Take Photographs of Crater

Honolulu, T. H.—Attempts to take aerial photographs and observations of gas and heat directly above the continuously active fire pit of Halemauana in the volcano of Kiluaea on the island of Hawaii, will be made by army aviators in the near future, it has been announced by headquarters of the Hawaiian department.

This, it is believed, will be the first time in history that airplanes will be used for the purpose. The photographs and observations will be used by scientists.

Work will be started immediately on a landing field and airfield at the Hawaii National park, which includes the volcano. The air survey of the volcano will consume several months. The aviators also will photograph Hilo harbor and other strategic points on the island.

Pay \$17,000 for Book

London.—At a recent auction a William Blake "Milton," 1804, brought \$17,000. The volume is believed to be superior to the one in the British museum, as no other copy has 50 leaves. Two others are in the United States.

Has Twentieth Child

Saskatoon, Sask.—Mrs. Peter Thauberger, wife of a Dilke (Sask.) farmer, gave birth to her twentieth child. Nine of her children are living.

**UNCLE HANK**

One can't appreciate the vastness of the universe until he sees a small boy eatin' pop-cora.

**Yes, Can He?**

Can a man who writes the best love letter be equally successful in keeping the flour barrel filled?

**Must Reform Self.**

You never get a man much reformed who didn't make the plans and specifications for the work himself.

**TONIGHT And Saturday**

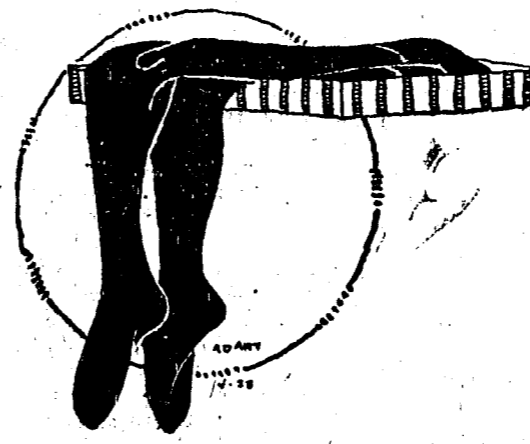

FRANK MAYO

**FRANK MAYO in "The FIRST DEGREE"**

This is the picture which won widespread fame as a short story under the title of "The Summons", published in the Saturday Evening Post. It is well worth your while to see it.

**Kendrick Store Company The Quality Store**

**Waiting Means Losing**

Suppose that the use of a new implement this spring would save you \$100.00. How much will you lose by not buying that implement this spring? How much will this implement really cost you if you wait until next year to buy it? It will really cost you the market price plus the One Hundred Dollars lost by not having this implement in use this coming season. Waiting to buy such an implement would be just as poor economy as waiting until next year to put out a crop, in hopes of getting lower priced seed.

Good implements are the best friends that a farmer can have. They are profit makers—not profit takers. Year in and year out, good implements enable you to make the best of conditions as they come. Don't go into the race for farming profits this year crippled by worn-out implements. Get the full benefits of labor-saving, cost reducing, crop-improving equipment, adequate to your needs. You have the needs; we have the equipment.

Let's get together and figure out how we can make your farming pay more.
