UPPER BEAR RIDGE (Too late for last week)

Misses Ada, Alice and Edith Bean and Miss Cleo Huffman visited the Kern Hill school, Thursday evening, Mr. and Mrs. F. E. Antonsen departed for Bovill, Wednesday.

A birthday surprise party was given at the Huffman home, Saturday evening, in honor of Miss Cleo and Eula. Those present were Frank Harvey and Rufus Fairfield, Irwin, Ernest, Ada, Alice and Edith Bean, Mr. and Mrs. Fred Gladden, Herbert and Emma Weber, Mr. and Mrs. W. E. Hecht and daughters, Cleo and Joseph Whybark, Mrs. Clemenhagen, and Miss Grieser. The evening was spent in playing games. Everyone reported a fine time.

Miss Ann Grieser was a week end visitor at the R. Clemenhagen home.

LENORE LOCALS

Rev. George Calvert of Lewiston conducted services at the school house, Sunday.

Charlie Harris of Southwick has been visiting at the Kay Southwick home for a few days.

Silven Miller and Harry Fine were callers at the W. J. Green home.

Born to Mr. and Mrs. Lee McFadden, February 20, an eight pound girl.

Mrs. Granquist has gone to Lewiston for medical treatment.

Misses Edna Green and Cleo Southwick visited the Carmen Green home at Cavendish, Sunday.

Miss Curtis, who is teaching school at the Vaughan district, spent the week end with home folks in Lewiston.

Ray Southwick and family spent the week end visiting relatives at Southwick.

Mr. and Mrs. W. E. Tarry of Cavendish were visitors at the F. S. Vaughan home, Sunday.

A certain canny Scotsman had carried on a courtship of long duration without definitely committing himself. The girl, if she worried herself at the long probation, gave no sign until one morning her tardy lover, thumbing a small notebook, said: "Maggie, I hae been weighing up your guid points, and I hae already got to ten. When I get a dozen I'm goin' tae ask ye the fatal question."

"Weel, I wih ye luck, Jock," answered the maiden. "I hae also gotten a wee book, and I've been puttin doon your bad points. There are nineteen in it already, and when it reaches the score I'm goin' tae accept the blacksmith." Ex.

Food for Children

Child specialists inform us that between the ages of four and twelve years a very active child requires double the total calories of a very quiet child, and a moderately active child requires one-third more calories than the quiet child. Because of the demands incident to rapid growth all children require highly nourishing food.

Milk Excellent Feed for Stock

Rich in Proteins and Vitamins and Also Carries Minerals Necessary.

It is a well known fact that milk is a most excellent feed for all kinds of growing stock because of its protein and vitamin content. Milk is nature's food and for that reason is a perfect food, because it is prepared for the young. It is rich not only in protein and vitamins, as mentioned before, but it also carries a comparatively large amount of mineral constituents—the constituents needed for building bone, which the young animal builds very rapidly during its early life.

Drying Processes.

Drying skim milk and buttermilk by the processes now employed in no way decreases their feeding value. Neither does it increase their feeding value, but most poultrymen do not have enough skim milk or buttermilk on the farm to supply all the protein which the layers need for high production. In recent years, however, the buttermilk produced at our large creameries, which used to be wasted, has been dried and sold in powder form or in the semi-solid condition. The latter, of course, contains considerably more moisture. Dried buttermilk, in fact, contains only about 7.5 per cent of moisture—about the same amount as our ordinary well-dried grains. For that reason it keeps very well, so that one can keep a large supply on hand without fear of deterioration.

Dried buttermilk is comparatively high in price, but its feeding value is also high and can be used to advantage in egg-laying rations. Here is a mash recommended by Iowa State college, which contains dried buttermilk: 100 pounds finely ground corn, 100 pounds finely ground oats, 100 pounds wheat bran, 100 pounds flour middlings, 30 pounds dried buttermilk, 20 pounds bone meal, 50 pounds 60 per cent tankage, 5 pounds salt. In connection with this mash the college recommends 200 pounds shelled corn and 100 pounds oats for the scratch grain. In fact, that is the scratch grain the college almost always uses for its layers.

Use More Ground Oats.

There are times when wheat bran and flour middlings may be relatively too high in price to make them economical feeds. When that obtains more ground oats may be fed than is recommended in the ration mentioned. For example, 150 pounds ground corn and 250 pounds finely ground oats, together with the dried buttermilk, tankage, bone meal and salt mentioned, would perhaps give equally good results.

Lime on Gardens

Most farm and backyard gardens are benefited by an application of lime at least once every three years. The form in which this lime is applied does not matter greatly. It may be air slacked or water slacked or hydrated or ground or even the ground raw limestone rock itself. It is sometimes difficult to determine the lime requirements of the garden, but in view of the fact that a little excess lime does no harm, except to Irish potatoes, it is safe to apply lime as suggested once in three years.

Thought and Labor

It is only by labor that thought can be made healthy, and only by thought that labor can be made happy, and the two cannot be separated with impunity.

PRESBYTERIAN CHURCH

Sunday school at 10:00 a. m.

Dr. Hess Stock Tonic

A Spring Conditioner and
Worm Expeller

Spring is Here. Soon the litters of pigs will be coming, the calves, the lambs, and the colts will be dropped. Feed your brood sows Dr. Hess Stock Tonic before and after farrowing. It makes the bowels active, relieves constipation, promotes good health and good digestion which means healthy pigs and a mother with a milk supply to nourish.

Condition your cows for calving by feeding Dr. Hess Stock Tonic before freshing. Then feed it regularly to increase the flow of milk. It lengthens the milking period.

Give your brood mares a course of Dr. Hess Stock Tonic. And your work horses. It puts your team in fine fettle. You cannot afford to plow, harrow, sow, mow, reap or team with a team out of sorts, low in spirits, rough in hair, blood out of order, or full of worms. Dr. Hess Stock Tonic is good for sheep—especially good for ewes at lambing time.

Why Pay the Peddler Twice My Price?

SUMMONS

In The District Court, Second Judicial District of the State of Idaho, in and for the County of Latah.

Elias W. Smith, Plaintiff, vs Elizabeth A. Smith, Defendant.

THE STATE OF IDAHO SENDS GREETINGS TO Elizabeth A. Smith, the above named defendant. You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows: To obtain a decree of divorce from defendant on the ground of desertion. And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take Judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, this 27th day of January A. D., 1925.

HARRY A. THATCHER Clerk.
By ADRIAN NELSON Deputy.

LEOLA R. KING, County Treasurer. Dated at Moscow, Idaho, this 24th day of February, 1925.

3 issues of the Kendrick Gazette. 1st. February 27th. 2nd. March 6th. 3rd. March 13th.

Iowa Ration No. 11

Here is Ration No. 11, recommended by the Iowa experiment station. The mash is as follows: Two hundred pounds ground oats, 100 pounds ground corn, and 100 pounds of 60 per cent tankage. This is fed with scratch feed composed of 200 pounds shelled corn and 100 pounds oats. It is considered one of the lowest priced and one of the most practical rations, the college states, that can be recommended for farm conditions.

Poultry Hints

Gather eggs twice a day.

Keep the eggs in a cool, fairly dry place.

Remember quality is essential for best prices.

Know the shipping requirements of express or railroad companies when you use their services.

More Protection Is of Big Importance for Bees

Bees require more protection in winter than the modern hive provides. Honey bees do not hibernate but form a winter ball or cluster to keep warm and comfortable. In an exposed modern hive with the air temperature from 10 to 20 degrees below zero the bees are unable to keep warm.

Under such conditions 6 to 8 inches of dry chaff, leaves, corn husks or sawdust used for insulation all around and over the hive helps to keep the bees warm.

It is important, also, to make sure that the bees have sufficient winter stores. If a colony has less than the equivalent of six standard combs or 40 pounds of honey it is safer to give the colony some additional combs of sealed honey or feed it a gallon or two of sugar syrup.

We print ANYTHING at the Gazette shop, and prices are right.

Market eggs at least twice a week. Delay in marketing means selling stale and deteriorated eggs.

Keep an abundance of clean litter on the poultry house floor. Clean floors mean fewer dirty eggs.

Don't crowd the winter layers. Each hen should have at least three square feet of floor space, where the flock is confined in the house, for maximum egg production.

Provide one nest for every four or five hens and make the nests of clean material. Plenty of clean nests reduce the number of stolen nests and the number of cracked and dirty eggs.

Sheep equalize the labor on the farm, requiring least in the summer when labor is scarce and high-priced and most in the winter when it is usually plentiful and cheap. Sheep-raising requires less labor than grain farming.

DAIRY CATTLE SALE

Having disposed of our retail milk business we are selling our entire herd, the best in the west, at public auction on

**Wednesday
March 4
10 O'clock Sharp**

On the farm situated 13 miles east of Lewiston and 1 mile north of Lapwai on the North and South Highway. These cattle are all T. B. tested and are all pure bred but not registered.

110 Head Holsteins, Gurnseys, Jerseys and Milking Shorthorns

Time will be given until November 1, 1925, notes drawing 7 per cent.

Keep The Wings of Your Dollars Trimmed

If you don't watch them, dollars have a way of flying over the fence and getting lost in the thicket of needless spending.

The best way to clip the wings of a dollar and make it impossible for it to get away, is to save the dimes, quarters and halves and put them safely away in a savings account.

If you do not have a savings account, start one today—it will come in handy some time—a dollar will do.

THE FARMERS BANK
Kendrick, Idaho

GLEANINGS

Herman Schupfer and E. A. Deobald returned on the night train Tuesday from a business trip to Spokane.

County Commissioner G. F. Walker went to Moscow Tuesday to attend a session of the county commissioners Wednesday.

Mrs. G. M. Lewis of Coeur d'Alene arrived the first of the week to visit at the home of Mrs. Jessie Callison.

Miss Winifred Davidson, who is attending the Lewiston State Normal, spent the week end here with relatives.

Miss Evelyn Hanson, a freshman at the University of Idaho, spent the week end here with her parents.

E. H. Dammarell returned Saturday afternoon from a business trip to Gifford.

Paul H. Morton of Spokane visited at the home of Ralph Knepper, Tuesday.

Miss Ernestine Callison came down from Moscow last Friday to spend the week end with relatives here.

Engineer C. C. Van Arsdol, of the Lewiston highway district, commenced the survey for the improvement of the Potlatch creek road from Arrow Junction to the Latah county line. Mr. Van Arsdol will locate the road and will prepare an estimate of the cost of construction. As soon as this data has been compiled the Commercial club committee will take up the matter with the taxpayers and if sentiment is favorable, the petition will be laid before the commissioners of the Lewiston highway district.

C. S. Westendahl was transacting business in Moscow the first of the week.

Mrs. Matt Miles of Hoquiam, Wash., is visiting her sister, Mrs. Ralph Knepper.

Harold Thomas is making some extensive improvements at his residence property in the east end of town. He is grading and filling his yard and putting a concrete retaining wall around the front of his lot.

The Maude Henderson Co. made a very good impression here last Friday and Saturday nights in the presentation of two comedy dramas "Putting it Over" and "Turn to the Right". On account of the extremely bad condition of the roads the attendance was not what it should have been, but those who saw the shows were very much pleased. Both entertainments were clean and full of clever situations.

Dr. Stockslager of Lewiston was in Kendrick Tuesday in consultation with Dr. Seeley.

Lightning struck one of the big transformers on the power line here last Monday evening. A broken insulator resulted which allowed a short circuit in the transformer, causing a brilliant arc light. At first it was thought the shed covering the transformer was burning, but Otto Schupfer phoned to Moscow and had the power cut off and the fire was out. In an hour repairs were made and the power turned on.

The American Legion put on a very good dance last Friday evening. A Lewiston orchestra furnished music for the occasion.

The general sentiment seems to be that the roads in the surrounding territory have never been much worse. The continued rains have almost caused the bottom to drop out of them in places. The road from here to Moscow is impassable and from here to Lewiston is almost as bad, although cars can get thru. One car was struck the first of the week in the mudhole between Kendrick and Juliaetta and had to be pulled out with a team.

Louis Otnis of Moscow is transacting business here this week.

Dr. J. T. Moser was in Kendrick, Thursday to attend the funeral of S. P. Callison.

L. E. Ozunov was transacting business in Moscow the first of the week.

CAMERON ITEMS

Henry Wendt made a business trip to Lewiston, Sunday evening, returning Monday.

Mr. and Mrs. Herman Meyer had as dinner guests, Sunday: Rev. and Mrs. Kein and sons, Mr. and Mrs. E. Schmidt and family of Leland.

Mrs. C. L. Wegner and children spent Thursday with Mrs. Blum.

Herman Silflow and Bill Brammer were on the sick list last week, but we are glad to report they are able to be around.

The following ladies were entertained by Mrs. F. W. Silflow, Jr. at a quilting bee: Mesdames Silflow, Sr., Kruger, A. O. Wegner, H. Wendt, Emil Larson of Leland and Grandmother Lohman.

Rastus: "Wheah you-all bin?"
Pinney: "Lookin' foah work."
"Man, Man! Yoah cu'sosity's gonna git you into trouble yit!"
Judge.

Charge Account

Another time man gets the last word is when he says: "All right! All right! Just tell 'em to charge it."—Duluth Herald.

Work for Increase of Reindeer Herds

Agricultural Department Is Conducting Investigation.

(Prepared by the United States Department of Agriculture.)

Although only about ninety tons of reindeer meat were shipped from Alaska to this country in 1923, indications on July 1, 1924, were that there would soon be a rapid increase in the quantity shipped. In 1923 the entire number of reindeer in the territory totaled about 241,000, according to estimates made in 68 herds. The increase in the number of reindeer in Alaska each year runs from 33 to 45 per cent of the total number of animals in the herd. This percentage can be raised by a better understanding of herd management on the part of the Eskimos and other owners, and better business methods in marketing the meat will result in a higher output. The biological survey of the United States Department of Agriculture conducts important investigation work in Alaska in the interests of the reindeer industry, including studies of diseases and parasites, feeding experiments to determine the nutritive values of different types of native forage, poison-plant problems, herd management, and breed improvement.

Through the establishment of corrals, herd owners are improving conditions in their herds. Co-operative handling and management of some of the herds has been practiced with good results. An additional impetus has been given to the industry by two American companies which are now operating refrigerating plants to receive reindeer carcasses for the purpose of shipping them to markets in the United States through Seattle. One of these companies operates refrigerating barges which can move from one point to another, mainly in the rivers, and the other company has several small cold-storage plants along the coast.
