Entered at the post office at Kendrick as second class mail matter.

CAMERON NEWS

Mr. and Mrs. Carl Koepf returned from California last Wednesday. They enjoyed a very pleasant trip and are glad to be back again.

Mr. and Mrs. Aug. O. Wegner and Mrs. Silfow assisted Mrs. Henry Wendt with papering, Friday.

Mrs. Henry Wendt entertained a number of the ladies, Saturday, at a quilting bee, in honor of their second wedding anniversary. A very enjoyable day was spent by all those present.

Mr. and Mrs. Jack Bechtel have been visiting at the Brunseik home this week. They left for Kendrick, Wednesday morning.

Herman Wilken of Lenore passed thru Cameron, Monday.

Mr. and Mrs. Frank Wilken entertained the following at Sunday dinner: Rev. and Mrs. Rein and sons, Mr. and Mrs. Chas. Schultz and daughters, Mr. and Mrs. George Ehlers and family, Mr. and Mrs. Wm. Wolff and son, Bertha and August Hartung, Walter McCall and Miss McClelland.

Word has been received that Herman Schultz of Spokane died last Wednesday. His brother, Albert Schultz, is in Spokane now.

Tuesday was a busy day for the Cameronites. The men shingled the Parson hall and cleaned around the place, while the women papered the parsonage.

Mr. and Mrs. Carl L. Wegner entertained as supper guests Wednesday, Mr. and Mrs. Carl Koepf, Bill Brammer and Herman Silfow.

BIG BEAR RIDGE

Mrs. D. J. Ingle entertained the Ladies Guild at her home Wednesday afternoon.

Mrs. Owen Hardman of Peck is spending the week with her sister, Mrs. Wade Keene.

Mrs. Kittrell and daughter, Mrs. J. M. Bramblett, left Friday for a visit with their daughter and sister Mrs. C. C. Belknap at Farmington, Wash. The Belknap family were former residents of this ridge.

Al McKee of Lapwai was looking after business interests here Monday.

Mrs. Bernheart Nelson and daughter, returned home Saturday, having spent several weeks visiting her sister in Boise.

Mrs. Otto Gladden and Mrs. Clyde Ralstin were Lewiston visitors the first of the week.

Mrs. Jennie Solem returned to her home in Dawson, Minn., last week, having made an extended visit at the J. J. Slund and Halvor Lien homes.

A large number of cars were seen on the road Saturday and Sunday. Most of them making their first appearance this season.

The farmers are busy fencing and making preparations for spring work.

A St. Patrick's program and basket social will be held at the Taney school house, Friday, March 20 at 8 o'clock p. m. Everyone is cordially invited to attend.

Next Friday and Saturday, March 20 and 21, "The Sea Hawk" the greatest picture yet produced, will be shown at the New Kendrick Theater. Don't miss it. 11-1t

STONY POINT

Ike Steensma and Wm. Steigers are planting their hot beds this week.

Lloyd Eckman and children spent Saturday night at the Albert Beckman home near Myrtle.

Mrs. Prentiss has taken charge of the housework at the Lloyd Eckman home.

Bill Stephas and Mel Miller were joy riding Sunday on the Clearwater highway.

Mr. and Mrs. Cletis Hoisington, Mrs. Prentiss and Mr. and Mrs. Will Heimgartner were Sunday dinner guests at the Frank Hoisington home.

Mr. and Mrs. Will Steigers received the news of the birth of a fine girl baby to Mr. and Mrs. Henry Steigers of Asotin, Tuesday, March 10.

Mr. and Mrs. Edgar Carlson of Juliaetta spent Saturday night at the Jess Cox home.

Alfred Evans arrived Tuesday at the home of his sister, Mrs. Ike Steensma, having motored thru from Arizona.

Several of the Clearwater farmers

are seeding grain this week and a few of the upper Potlatch ridge people began sowing wheat.

Lester Hill received quite a large order of baby chicks, Tuesday.

CRESCENT CLIPPINGS

Mr. and Mrs. D. J. Hammond who have been staying with their daughter, Mrs. John Darby, the last three months, left Wednesday. They will visit with relatives in Juliaetta and Moscow before returning to their home in Spokane.

Mr. and Mrs. H. H. Pogue called at the F. Reiche home Saturday afternoon.

A large crowd attended the party at the school house, Saturday evening. After supper a part of the bunch left to spend the rest of the evening at the C. L. Trail home.

Mr. and Mrs. Axel Ekman visited at the W. L. Hunt and Wm. and Fred Zimmerman homes, Monday.

Mr. and Mrs. John Darby and daughter, Beth, visited at the E. L. Whisler home, Sunday afternoon.

Mr. and Mrs. H. H. Pogue visited with Mr. and Mrs. Wm. Kauder, Sunday afternoon.

Corinne Griffith

Bird Hunts Snakes

The fanciful resemblance of the long feathers of his crest to a quill pen thrust behind his ear suggested the name "secretary" bird. This bird's habits, says Nature Magazine, are far from literary, as its business in life is hunting snakes and similar animals. It is an African and is one of the largest birds of prey.

The Red Cross Pharmacy

MURPHY DA-COTE

**An afternoon of fun
—and a new car**

If you want a new car you can get one Saturday—between lunch and dinner—and have a mighty fine time to boot.

It's just like putting an extra pay check in your pocket.

We recommend Murphy Da-cote, the same fine enamel 3,000,000 other car owners have used. Da-cote puts a glowing new surface on the most battle-scarred car.

And it dries quickly—take a drive the next day. Drop in and pick your favorite from black, white and ten beautiful colors.

Carlson Hardware Co.

POULTRY

CULL CAREFULLY TO IMPROVE HEN FLOCK

Culling results not only in immediate saving of feed, but aims at permanent flock improvement. In the selection of better breeding stock. The recent rise in feed prices should prompt the poultry keeper to prosecute a culling program with unusual vigor.

Careful examination of every pullet on the range should follow closely on the culling of the poor layers. Pullets possessing obvious and harmful deformities should never be allowed to go into winter quarters. Such defects as twisted beaks and toes will hamper efficient egg production, while crooked breast bones, slipped wings, wry tails and rouch backs often indicate lack of constitutional vigor and are equally undesirable. Under ordinary conditions, proper economy will eliminate these individuals as soon as they appear. In a year like this, however, when feed promises to be higher in price, the poultryman should cull his flock of pullets with unusual severity.

Only the good pullets can make money during the coming year, says the Department of Agriculture. The late-maturing, slow-growing pullets are not likely to lay many fall or winter eggs. The under-sized, thin pullet is lacking in constitution and is a future menace to the health of the flock. Among the late-hatched pullets only the most thrifty can prove at all profitable. Early-maturing, well-grown pullets of splendid health and vigor have used their feed economically during the growing season and should be found in good flesh. These promising pullets should lay well during the winter months and prove profitable. In the present period of increased feed costs, no other pullets should be kept. If the present increase in cost of feed serves to induce more widespread and careful culling practice, much good will result to the poultry industry. The smaller, more efficient flock will produce more economically, raising the average production per bird. The rigid selection of breeders will permanently improve the productive qualities of the stock.

Wheat Will Profitably Assist Poultry Ration
Wheat instead of a part of the corn may profitably make up a large portion

of the poultry ration. This is the answer given by D. C. Kennard, poultryman at the Ohio agricultural experiment station, in reply to the use of wheat instead of corn. Since yellow corn possesses some properties not found in wheat, he finds that it is well to add 10 or 20 per cent of ground corn to the mash even though the price is considerably higher than that of wheat. If wheat is used to replace bran and middlings in the mash it is well to use 25 per cent bran to overcome the pastiness of the ground wheat.

The scratch grain may be composed largely of wheat, but here again, yellow corn makes a valuable addition. A grain mixture may be made of 60 per cent wheat, 20 yellow corn, and 20 of oats, or the oats may be omitted if desired. As corn is valuable for feeding winter layers just before roosting time, it may be fed alone late in the evening instead of mixing with the other grain.

Since wheat supplies little vitamin A as compared to yellow corn, Mr. Kennard finds it essential that an abundance of green feed, such as cabbage, be provided during the winter if little corn is fed.

Selling Eggs Nearby Is Reason for Big Profits

The success some poultrymen have had in selling eggs on local markets has been due to good management more than good luck. They satisfy the demand of townspeople for fresh, high-grade products:

By producing infertile eggs, gathering them twice a day, and keeping them in a place not over 60 degrees in temperature.

By taking to the consumer's clean kitchen, eggs equally as clean. Most poultrymen use either a cloth and washing powder or steel wool.

By using substantial, convenient cartons of the dozen-size, by putting in such cartons eggs fairly even in size, and by leaving out altogether the small eggs.

Deliveries are usually made at least once a week. Some men run a butter route along with their eggs, and so cut down the cost of delivery of each product.

Using the farm name or some attractive trade mark on the carton helps advertise the producer and broadens more readily the quality of his product.

Mash Feeding Overdone

Mash feeding is a wonderful asset in the right place but can often be overdone. A properly compiled mash will mature pullets too quickly when fed in unlimited quantities. A proper proportion between mash and grain

feeding is necessary for best results. One needs to feed rather heavy on grain and then allow as much mash in addition as they will consume. Under some conditions, the hopper feeding of grain as well as mash is advisable.

WIFE RESENTS HIS AGE; HE ADOPTS HER

Court Approves Plan and Grants Legal Papers.

St. Joseph, Mo.—Hans C. Arentzen and Elizabeth I. Arentzen did not find the relations as husband and wife congenial—at least Elizabeth didn't—so they entered into an agreement to be divorced. Hans is old enough to be Elizabeth's grandfather, and she is not yet out of her twenties.

The conjugal state had existed several years when the young wife applied to the Circuit court last week for a decree of divorce, and Judge William H. Utz granted the petition. The Arentzens were married in Savannah, Mo., in 1921, and have lived together in St. Joseph ever since.

Arentzen, who is caretaker of a local church, has reached that stage of life when men of frugal habits prefer their pipe and a seat at the fireside to the moving picture show, or the dance hall. Mrs. Arentzen has not yet passed the age at which many women experience tender emotions at the view of the sheik of the cinema, and find the synopation of the fox trot and the two step simply irresistible.

Longed for Young Friends. Also she found an old-fashioned man who was entirely satisfied with three meals a day and a soft bed beyond endurance. She longed for association with persons nearer her own age, with tastes conforming more closely to her own. So she told her husband.

Arentzen loved his wife and he could not bear to entirely give her up. He feared if she were left to her own way evil or misfortune might overtake her. He was willing to release her from the obligation of wife, but wanted her companionship in the home. He had accumulated some property and wished her to have the benefit of it if she should outlive him, which he conceded to be more than probable. They laid the case before Judge William K. Amick, a former Circuit judge who is noted for his success in adjusting differences between married people, and he advised a divorce, to be followed by the adoption by Arentzen of Mrs. Arentzen as his daughter.

Judge Amick's suggestion met with the instant favor of Mr. and Mrs.

Metronome Orchestra

A good time assured all. Don't let anything keep you away. This will be one of the best dances ever given in Kendrick. Let's go.

Given by

Canyon Post No. 66, American Legion

arentzen. The wife's petition for divorce was promptly granted, as the husband did not answer in court. There was no prayer for alimony and no stipulations of any kind. A few days later the divorced couple went into court with their attorney to ask that the ex-wife be made the legally adopted daughter and heir of her former husband, which was done.

Adopted as Daughter.

It was explained to the court that Arentzen still loved his former wife, but realized the disparity in their ages made it impossible for her to hold him in widely affection. Furthermore, he needed a housekeeper and Mrs. Arentzen needed a home and a guardian. He has no near relatives and wished to make her his heir.

Mrs. Arentzen continues to keep the Arentzen home in order, her status simply being changed from wife to daughter. Neighbors say she is even more solicitous of the comfort of Mr. Arentzen as daughter than she was as wife. She is privileged to receive such company as she wishes, and it is noticeable that callers at the house are of a much younger set than they were when she was a married woman. Friends of the two say they seem happy under the new arrangement and none have been heard to disapprove of it.

\$7,000,000 Botanical Garden for New York

New York.—The board of managers of the New York botanical garden announced a development program involving an ultimate outlay of \$7,000,000 and designed to make the institution a model for the world.

The plans involve endowment, equipment, maintenance and research, according to the board's statement, issued by its president, Dr. Frederick S. Lee, research professor of physiology of Columbia university.

"The more urgent needs demand \$4,000,000; of which \$800,000 should be expended for material improvements and equipment endowment," said Doctor Lee.

"The board of managers is making an effort to obtain this needed \$4,000,000 and confidently looks to the people of New York to contribute it."

Poultry Facts

Feed the pullets to produce winter eggs.

Close the poultry house so as to prevent draughts.

If combs freeze, get more air into the henhouse. It's a sign of dampness.

Cod liver oil is not only good for children but it puts strength into the legs of little chicks as well.

Skim milk is an exceedingly valuable poultry food, and can be profitably used every day in the year.

A damp poultry house is an abomination and is just as certain to cause mischief as anything possibly can.

Milk is the best protein for chickens as well as for folks. One of the best ways to market part of your milk is through the egg basket.

The hen has not yet been invented that can make eggs without shell material to work on. Oyster shell or broken bits of limestone will supply the need.

Keep The Wings of Your Dollars Trimmed

If you don't watch them, dollars have a way of flying over the fence and getting lost in the thicket of needless spending.

The best way to clip the wings of a dollar and make it impossible for it to get away, is to save the dimes, quarters and halves and put them safely away in a savings account.

If you do not have a savings account, start one today—it will come in handy some time—a dollar will do.

THE FARMERS BANK

Kendrick, Idaho

FARM POULTRY

DUCKS USUALLY ARE HARDEST OF FOWLS

Ducks as a rule are hardy. They do not have gapes. The weakest part of a duck is its legs. Indigestion is apt to show itself in the young, if coarse sand is omitted in the food. It is always best to put a handful of sand in a pail of mash food, mixing it thoroughly. This will aid digestion. The oily nature of the feathers makes the ducklings vermin proof. Exposure to hot suns is fatal. There should always be a partial shade to the runs.

The market term "green duck" is of late innovation. The cognomen is applied for the reason that the bird has not yet matured. It should weigh not less than four pounds, and be not over ten weeks old—eight weeks would be better—and should never be allowed bathing water. As an article of diet, if provided by a competent chef, the green duck resembles the famous and

fast disappearing canvasback duck. The Runner duck is not inclined to fatten so readily as other varieties. Its name originated from the fact that this duck has a running rather than a waddling motion. In color it is a light brown or fawn shade and gray. At the joining of the head and bill there is a narrow band of white. The legs are orange. In carriage it is erect, with a long, narrow body, well elevated in front, and closely feathered. The neck is long and slender, and the head rather flat. The bill is long and broad.

Duck eggs are in demand by confectioners, as they impart a glaze to their icing, which cannot be had with hen eggs. For making plum puddings, duck eggs are more economical than those of fowls, being both larger in size and richer. In the household duck eggs are used in making all kinds of cakes, omelette, cooking generally, and they are also relished fried.

Furniture Made From Weed

For many years the natural seedling known as the "bakain" which grows in the Punjab of India was destroyed as a weed, being cut out to protect other growths. Economic development has caused this weed to be used commercially for light furniture, packing cases and shelving.

TRACES SOURCE OF 'AMERICAN BEAUTY'

Geography of Cosmetics Seen to Be Shifting.

Washington, D. C.—"The geography of cosmetics is shifting," says a bulletin from the Washington (D. C.) headquarters of the National Geographic society. "Formerly the women of the United States drew upon the more sophisticated countries of Europe for the boxed and bottled substances that alter their appearance for better or for worse. Now they are coming more and more to use what might be called 'made in America' complexions, and the country is even exporting aids to beauty to the ends of the earth.

"The big three in the world of cosmetics are powder, rouge and cream; and of these stand-bys of the feminine toilet table the United States exports about \$2,500,000 worth annually. This probably is close to the value of the imports of these specific substances, for the greater part of the \$9,000,000 worth of 'perfumery and cosmetics' brought into the country each year is made up of perfumes and perfume materials. Many times the amount of the exports and imports of powders, creams and rouges are consumed in American boudoirs—and on American street corners—for the value of the products turned out annually by the perfumers and cosmetic manufacturers of the United States is between \$75,000,000 and \$100,000,000.

"For the best rouge the consumers of the United States must still look beyond the country's borders. The original coloring material was dried red corollas of the thistlelike safflower plant of the Near East. The plant is cultivated in France and still is the source of the bloom on millions of rosy cheeks. Much of the coloring matter of commercial rouges is carmine, the red obtained from the crushed, dried bodies of the cochineal insect, also a foreign substance.

Face Powders.

"Face powders are made of ground and bolted talc and chalk, rice powder and corn powder. Of the last named ingredient America possesses vast quantities, but unfortunately the grains of cornstarch are about three times the size of those of rice starch, and therefore do not make as high-grade face powders. Much rice is grown in the United States and home-produced as well as imported rice powder is metamorphosed into the Poudre de Riz of the cosmetic counter.

"Tremendous quantities of talc and chalk are used annually in the form of talcum powder and in combination with rice and corn powders. Low-grade powders are made from domestic talc mined in several eastern states, but for highest grade powders the manufacturers import their materials. Annual imports of talc and chalk amount to about 10,000,000 pounds from Italy and 5,000,000 pounds from France.

"Cold cream is the typical cream cosmetic and one of the oldest of the beauty aids used today. Savages started the cold cream habit millions of years ago with rancid butter and salt.

"Face powders and rouges are largely for application to the cheeks, but no other facial feature has been permitted to escape the cosmetic specialist. There are henna and other washes for the hair, eyebrow pencils, lipsticks, lash pastes, and 'shadow' coloring for eyelids. In addition the well appointed cosmetic shop offers hand lotions, and nail polishes and enamels, and such general cosmetics as skin foods, complexion clays and sunburn removers.

"Henna is extracted from the leaves of an Egyptian plant. The coloring matter of eyebrow pencils and lash pastes may be India ink or coal-tar dyes. Most lipsticks are made of greases stiffened with beeswax and colored with carmine or safflower. The majority of the hand lotions and vanishing creams contain glycerin, of which the United States produces ample quantities. Nail polishes usually contain tin oxide and nail varnishes and enamels consist of resinous gums, mostly imported. The ingredient par excellence for 'skin foods' is cocoa butter, the fat produced as a by-product in chocolate and cocoa manufacture. The cocoa butter imported as such comes chiefly from the Netherlands and Germany.

United States Helps World Keep Clean.
"Soap, the basic substance in the toilets of men and women alike, is made in vast quantities in the United States, and more than \$3,000,000 worth is exported annually. Various oils, treated with alkalis, are used in soap manufacture, including our own cottonseed oil. Coconut, olive and palm oils are the standard fatty substances employed, however. Annually the Philippines contribute \$10,000,000 worth of coconut oil, while \$50,000,000 worth of olive oil comes from Italy and Spain, and \$55,000,000 worth of palm oil is imported directly from British West Africa and via England from other tropical countries.

"The history of soap is closely intertwined with the history of modern civilization. It is believed that the Phoenicians were the first to make soap and that they taught the art to the Gauls. The Gauls in turn taught the Romans their rather crude method of treating tallow with wood ashes. The Romans improved the method somewhat. A complete soap factory whose product was doubtless highly prized by the beauties of ancient Rome, has been found among the ruins of Pompeii. From Rome the use of soap has continually spread farther and farther. One might say that civilization has slipped around the world on a film of soap."

POULTRY

SKIM MILK FAVORED FOR LAYING FOWLS

Hens must have some form of animal protein in their feed. This is usually supplied by beef scrap. Two years ago an experiment was started at the experimental farm, Nappan, N. S., to determine the relative values of beef scrap and skim milk when added to the laying ration. Two pens were made up of ten birds, as uniform in breeding, age and type as it was possible to select. The rations fed to each pen were alike and constant except that Pen 1 received beef scrap and Pen 2 skim milk.

The results show the possibilities there are of realizing good value by feeding skim milk. The average production from the ten birds receiving beef scrap for the two six-month feedings periods (November 1 to April 30, each year) was 615.6 eggs, at a feed cost of \$13.75, or 26.8 cents per dozen, leaving a profit over feed cost of 97.2 cents per bird.

In Pen 2 the ten birds receiving skim milk over the same period had an average production of 699.5 eggs, at a feed cost of \$12.70, or 21.8 cents per dozen, leaving a profit over feed cost of \$1.49 per bird. By taking the average of two years it was found that 598.7 pounds skim milk, valued at 20 cents per hundred and thus costing \$1.20, gave greater returns than 39 pounds beef scrap at a market price of \$7.24 per hundred, thus costing \$2.62.

If, as believed at the experimental farm, the increase in production from the pens receiving milk can be attributed to the value of skim milk as a food for laying hens, it would only be fair to state that the farmer had received slightly better than one dollar per hundredweight for his skim milk when he marketed it through his eggs.

As this feeding test has been carried on for two years only, it does not permit the drawing of definite conclusions yet. However, the results to date would lead one to believe that a part of the skim milk available on the farm can be very profitably marketed through the egg and would seem to be a more profitable proposition than paying \$7 per hundred for beef scrap in order to supply the amount of protein so essential for profitable egg production.

Early Hatched Fowl Is Sure to Be Profitable

The early hatched pullet can be made the most, or the least, profitable pullet on your farm.

Cared for in the usual way, she will begin laying during August; lay until fall, and quit, to go through a molt, when eggs are highest in price and when they are needed most.

A hen molts because she quits laying, therefore our problem is to keep her laying, fighting anything that tends to retard production.

Many pullets, being fed on a narrow ration, begin laying before they are fully developed. After a short period they quit, because they haven't the physical strength to stand up under prolonged production.

Having your pullets fully developed is not alone sufficient. There comes the season when the long winter nights cut into the fowl's feeding, thereby reducing production. Here is where the value of lights comes in.

January and February pullets, rightly developed and properly handled, should start laying in August, and under lights, continue through high-priced fall season until about February, when they will spend a short period going through the molt.

Protect Chicken Flock During Severe Weather

There is always the likelihood of a spell of cold, damp weather and it is just at this time that colds, roup and allied diseases are likely to get started, with the result that we have them to battle with all winter. Get everything in full readiness for inclement weather and whenever a bad day comes the flock should be given ample protection. The houses should be thoroughly cleaned and if repairs are necessary this should be attended to. There should be plenty of clean, dry litter.

Many successful poultrymen follow the practice of supplying a little more feed than usual when the weather is unfavorable and some of them change the ration slightly, supplying a little more of the heat and fat-producing elements. This is done on the theory that the fowls are warmer and more comfortable when so fed and there is no doubt but that this is the case. In any event special attention when the weather is bad is the best way to avoid the beginning of disease and disorders.

Cause of Damp Houses

A good many poultry houses are damp and some of them are well constructed, too. They are damp simply because they are not situated in the right place or because some small detail of construction has been overlooked. In such case the trouble can usually be remedied with very little labor and expense. Other houses are nearly hopeless because located in the wrong place or because there is some fault in the manner in which they were constructed.

PUBLIC SALE

I will sell the following described property at public auction at the Charles Quick place one-half mile west of Cedar Ridge school house; 3 miles east of Linden; sale to start at 10 o'clock on

Monday, March 16

Horses, Cattle, Hogs

- Good Holstein Milch cow
- 3 Holstein yearling heifers
- 1 Brood sow
- 1 black team, weight 2650
- 1 team, weight 2500

Farm Implements

- 3/4 inch Deere wagon and grain rack
- Wagon and bundle rack
- John Deere walking cultivator
- Parker bean cutter
- Success fanning mill
- 1 1/2 h. p., P. & O. gas engine
- Dain mowing machine
- Deering hay rake
- 3 section spring tooth harrow
- 16 inch P. & O. walking plow
- 8 foot land roller
- John Deere 14 inch gang plow

Acme harrow

- 6 foot John Deere disc and trailer
- 4 section John Deere harrow
- 8 foot Van Brunt grain drill
- Light pair bob sled
- Lewis-Mitchell bob-sled

HATCH CHICKS EARLY FOR WINTER LAYERS

Early hatched chicks are the ones that make the early and consistent winter layers. However, this does not mean that earlier than around March 15 is desirable. Neither does it mean that late April and May hatched chicks are the desirable kinds. The problem is to have the chicks hatched sufficiently early to have winter laying pullets and yet not have them so early that they will molt in the late fall. Again, the quicker-maturing, smaller breeds like the Anconas may be safely hatched later than the larger breeds like the Wyandottes. Yet, all in all, it appears to me that in far too many cases, the hatching of chicks on farms is too late and that few are they who have their chicks coming off too early, writes A. C. Hartenbowe in the Oklahoma Farmer.

Whether to incubate the eggs on the farm or to buy baby chicks must be governed to no small extent by the equipment on the farm, by the prices of eggs when compared with that of baby chicks, and by the breeding stock available. In many cases, it will be a paying proposition to purchase baby chicks from reliable breeders to the end, especially, that good stock may be had to replace the mixed stock now on the farm, while in still other cases, where the farmer makes consistent improvement in his flock of pure bred chickens by culling, using high-class males or keeping a breeding pen, it would be folly to send away for baby chicks. I know there are thousands

of dollars practically thrown away each year in purchasing baby chicks for the simple reason that the equipment at hand for caring for the chicks is not suitable, and the result is a good per cent of the young chicks never reach maturity. In other words, the cost of those raised is away out of reason when compared with what they will bring when sold either as breeding stock or on the market.

Production of Eggs Is Where Most Profit Made

Probably the greatest hindrance to the profitable keeping of poultry on the ordinary farm is the retention of a lot of fowl that are poor layers, due either to their being too old or of a type to produce meat rather than eggs. The production of eggs is the end of the poultry business in which the most profit can be made, so that a heavy egg producing type is best suited to ordinary farm conditions.

Generally speaking, the pullet year is the most profitable period of a hen's life. It is advisable, therefore, either to mark the chicks when hatched, using a different mark for each year, or to band the pullets when they are put into winter quarters, so that at culling time the age of the different birds can be seen at a glance and only those that are required for breeding purposes retained after the first year's production.

The trap-nest is the most reliable means to use in culling the flock, but the ordinary farmer does not use trap-nests, so that reliance must be placed on physical characteristics. The high

producer will be of an active disposition, early off the roost in the morning and late to go on at night and always busy. Her head will be clear cut, face smooth and free from wrinkles, with bright, prominent eyes; skin soft, pliable and of fine texture; and a general appearance of health and vigor.

Feed in Severe Weather

Many successful poultrymen follow the practice of supplying a little more feed than usual when the weather is unfavorable and some of them change the ration slightly, supplying a little more of the heat and fat producing elements. This is done on the theory that the fowls are warmer and more comfortable when so fed and there is no doubt but that this is the case. In any event special attention when the weather is bad is the best way to avoid the beginning of disease and disorders which may throw the entire flock out of condition for an entire season.

Poultry Notes

- Show your best fowls at the fairs.
- Feed the hens to force them through their molt.
- Cull all undeveloped pullets and old hens from the flock.
- Grain will put on flesh and that is the ideal that one should strive to attain.

Have you some chickens to sell? Tell your customers that poultry is as cheap as other high-grade meat.

Killing a crippled chick is an act of greatest kindness and ought to be done as soon as the deformity is discovered.

Of course egg shells are more brittle at the end of the hatch than at the beginning. If they weren't, how could the chicks break their way out?

It is better to discard hens with defects the moment they are detected than to hold them at a loss until late summer, or until the end of the year, when there is a general cull.

Vitamines in Bran Good

Feed for Poultry Flock

Bran is a standby foodstuff for the poultry keeper. It is not as digestible as some other feeds which enter into the rations of chickens, but it is rich in mineral and vitamin elements. When only concentrated food is given to hens their vitality is quickly sapped. Bulk is required to ensure the proper assimilation of the food, and this is obtained in large part when a proportion of bran enters into the ration.

Some poultrymen advise the feeding of middlings in place of bran, but to do this is to do away with one important "roughage" food necessary to keep the birds in good trim. It is not a question of whether we should use wheat middlings or wheat bran. Both should be used in nearly equal proportions, the two together, constituting nearly 50 per cent of the entire grain ration.

GLEANINGS

Mrs. W. W. Wilcox of Clarkston arrived Saturday to spend the week end with her grand-daughter, Miss Anna May Anderson.

Chris Maier of Lewiston was transacting business in Kendrick last Saturday.

Mr. and Mrs. O. E. MacPherson and son, Donald, and Mr. and Mrs. Harold Thomas and daughter, Phyllis, drove to Lewiston Sunday, to spend the day with relatives.

Mr. and Mrs. Gregory Eaves of Lewiston spent the week end at the Frank Boyd home.

Otto Schupfer showed his public spirit the first of the week by hitching up his Fordson tractor and dragging the bad strip of road from Juliaetta to the Kendrick Highway District line. It was a much-needed improvement.

Jeff Buckles of Agatha was transacting business in Kendrick, Tuesday.

Carl Kinzer of Lewiston was a Kendrick visitor last Sunday.

Ben Callison was in Moscow on business the first of the week.

Mrs. Walter Thomas went to Lewiston, Tuesday afternoon to visit her parents, Mr. and Mrs. E. G. Dirks.

The infant son of Mr. and Mrs. Eben Adams of Juliaetta, died last Saturday after a brief illness. Funeral services were held in Juliaetta, Monday afternoon, and the little body laid to rest in the Juliaetta cemetery.

Marshal Gardner is cleaning up the town park and installing water pipe for irrigation purposes. He plans to keep the park green during the coming summer. Last week he ordered a 22 inch lawn mower to be used in the park. With plenty of shade and a well cared for lawn, the park will present a very attractive appearance during the dry summer months.

Mrs. M. B. McConnell returned last Sunday from the hospital at Lewiston where she underwent an operation for appendicitis some time ago. She is very much improved in health.

Earl Langdon is selling off his farm equipment next Monday at public auction. Earl is now in California, where he and his family expect to locate. Arley Allen is looking after the necessary arrangements for the sale.

Ye editor of the Gazette had a "mess" of spinach from his town lot garden the first of the week. Is there anyone in the Potlatch country that can beat it for rushing the season?

The snappy styles for young men, according to the latest from New York, is to wear their hose without supporters. This allows their socks to hang down over their shoes, which is the latest thing in college style. The effect is similar to that produced when girls wear gotoshes.

A trial jury of 35 members was drawn Monday for Nez Perce county to report at the district court room at Lewiston at 10 o'clock Monday morning.

Frank Crocker is installing a power hammer in his blacksmith shop and is making a number of other improvements to increase the efficiency of the shop.

S. D. White of Lewiston was transacting business here this week.

Mrs. S. P. Callison left Wednesday morning for Coeur d'Alene to visit her parents, Mr. and Mrs. M. B. Lewis, at the home of her brother, Guy Lewis.

Ben Wilcox returned to his home at Mullan, Idaho, Wednesday morning after visiting at the home of Mr. and Mrs. Frank Boyd.

The morning passenger Wednesday was delayed here for a short time as a freight car at Bovard jumped the track.

Theo Hanson left Wednesday morning for Troy where he has accepted a position with the Idaho Bean & Elevator Co. His family will remain here for some time but will probably move to Troy later.

John Knepper, age five, has the right idea. He told his mother the other day that if you want to live to be 100 years old you should eat good food, get plenty of sleep and don't drink "bootleg".

Sunday, March 15, is the last day that automobiles may be run in Idaho on the old licenses. The new law takes effect this week and places the deadline at March 15.

Pete Stump of Southwick went to Lewiston on business Wednesday afternoon.

County Commissioner G. F. Walker went to Lewiston on the afternoon train Wednesday on business.

M. V. Thomas was transacting business at Moscow, Wednesday morning.

At the meeting of the Potlatch Highway Commissioners at Leland last Saturday the following overseers were appointed for the three road districts: Cameron, Frank Wil-

ken; Leland, Wm. Bond and Denzel Kuykendal; Stony Point, Oney Walker.

Watch for the Announcement in next week's Gazette of the "Sea Hawk", one of the greatest pictures ever made which will be shown at the New Kendrick Theater, Friday and Saturday, March 20 and 21.

FAIRVIEW NEWS

Rev. J. C. Taber and family and Clifford Powell and family were guests, Sunday, at the J. M. Woodward home.

Wm. Wolff and Leonard Wolf were business visitors at Lewiston Monday evening and Tuesday.

Miss Melva Walker was a week end guest at the Virgil Flesman home.

Mrs. Mary McCall and Claire were dinner guests at T. H. Daugherty's, Sunday.

O. A. Walker has moved onto the T. J. Flesman place south of the Fairview school house.

Jack Kuykendal is here visiting his mother, Mrs. M. Kuykendal.

Mr. and Mrs. Keno visited Wilfred Corkill and his mother, Friday night, Mrs. Keno remaining to care for Mrs. Karmode who is in poor health.

Charles Hoffman and family visited at the Richard Blankenship home, Sunday.

Mrs. Julia Flesman and children were callers on Clara Flesman, Friday.

August and Bertha Hartung visited at Wm. Wolff's the first of the week.

Denzil Kuykendal has been re-appointed supervisor of Fairview district.

Maxine Flesman visited Juanita and Alvira Flesman over the week end.

Mrs. Minnie Blankenship visited the school on Tuesday.

LINDEN LOCALS

Mrs. Fred Ashland and Mrs. M. Arley of Spokane and Miss Mamie Kurer of Lewiston, arrived Wednesday evening to visit their father, R. V. Garner, who has been ill for some time. Miss Mamie returned Friday, but the other girls will remain longer.

Mr. and Mrs. Arthur Bohn are visiting in Kendrick while Arthur is having his finger cared for, which he had badly mashed Monday, while moving a wagon.

Mr. and Mrs. Edgar Bohn, who have been visiting at the McPhee home returned to their home at Long Meadow, Sunday.

Mr. and Mrs. Weyen and children spent the week end with relatives at Leland returning Monday.

Mrs. Joe Perry of Juliaetta is visiting her mother, Mrs. Jim Garner.

Mrs. George Lockhart and children of Longmeadow are visiting at the Smith home.

Mrs. R. C. Winegardner and daughters spent the week end with relatives in Leland.

Mr. and Mrs. Clem Israel and children, Mrs. Louis Alexander and children and Mrs. Sylvia Jenks spent Sunday with Mrs. Longfellow.

Jim Garner, who has been working in Bellingham, Wash., returned home Tuesday.

Mrs. Jim Ball returned from Kendrick, Wednesday, and is getting along nicely although her arm is very sore and she is unable to use it.

Plan to see "The Sea Hawk" at the New Kendrick Theater, Friday and Saturday, March 20 and 21. It is a wonderful picture and worth going miles to see. 11-11

TEXAS RIDGE

Geraldine and Virginia Bogar returned to their home in Deary, Saturday, after spending a couple of weeks with their grandmother, Mrs. Drury.

Mr. and Mrs. John Gentry of Deary visited at the E. G. Ogden home Sunday.

Alfred Newman of Bear ridge was a caller at the Gibson home Tuesday afternoon of last week.

M. L. Pierce and family visited at the Chas. Carlson home Sunday.

An 8 1/2 pound son arrived at the Quesenberry home March 2. All concerned are getting along fine.

Mrs. Fred Bailey visited from Thursday until Tuesday at the Slocum home.

Mrs. Dave Onsterhout and daughter Sarah Pierce came up from Spalding Monday and will visit with relatives and friends.

The Guild will meet with Mrs. Osborn Wednesday afternoon.

Mr. Martin Frantzych enjoyed a week end visit from his father and brother of American ridge.

Rev. Wortman was a Spokane visitor last week.

There will be no preaching here Sunday as Rev. Wortman will

Save Money at Kendrick Store Co.

Words cannot tell how much it is to your advantage to call at our store this spring, but a visit will convince you that you cannot buy so much to your advantage elsewhere. Don't delay, the best things always go first. Here are some examples of our wonderful values:

GROCERIES

Assortment Campbells Soup, 2 for	21c
Stuffed Spanish Olives, 15 ounce	52c
Pure Cream corn, 3 for	50c
Royal White Soap, 6 for	25c
Clean Easy Soap, 5 for	25c
Cake and pastry flour	25c
Bulk cocoa, 3 pounds for	25c
8 ounces Vermicelli, 3 for	25c

DRYGOODS

Percales, light and dark, a yard	21c
Printed organdies	43c
Galatea	32c
Women's silk hose	93c
Japanese crepes	25c
Calico, 8 yards for	98c
Colored Indian Head	48c
Women's good cotton hose	17c

SHOES

Women's black kid Oxford	\$2.95
Women's Suede Pumps	\$3.50
Men's brown dress shoes	\$3.50
Men's smoked elk shoes	\$2.35
Boys' buckskin shoes, solid leather	\$2.00
We have hundreds of bargains for you in our shoe department. Make us prove it.	

CLOTHING

Bib overalls, "good ones"	\$1.75
Men's work shirts	75c
Men's work sox, 2 pairs for	25c
Men's black dress sox, a pair	15c

WE WANT YOUR BUTTER AND EGGS

The Kendrick Store Co.

"The Quality Store"

preach at Avon also at Deary in the evening.

Prehistoric Ugliness

Skeletons of three prehistoric men and one woman, who are believed to have lived in southern France more than 15,000 years ago, were discovered recently. All have square, receding chins, flat noses and huge eye cavities.

Eccentric English Duke

The duke of Bedford's gold plate at Woburn abbey is among the most magnificent collections of its kind in the world. So lightly, however, was it regarded by the eighth duke, that on his death in 1872 gold plate worth tens of thousands of dollars was found strewn about the floor of his house in Belgrave square in such a deplorable condition that it narrowly escaped being consigned to the dustbin as worthless metal.

A visitor at the Capitol was accompanied by his small son. The little boy watched from the gallery when the House came to order. "Why did the minister pray for all those men, papa?" he questioned. "He didn't. He looked them over and prayed for the country," was the answer.—Ex.

It was at the registration clerk's office. The man in the felt hat was answering questions.

"What's your occupation?" "Mason and builder!" Behind him stood a little Irishman in a brown derby. When his turn came, the clerk asked him the same question. "Knights of Columbus and brick layer!" he shouted.—Ex.

The old gentleman was lost in a London fog so thick that he could scarcely see his hand before his face. He became seriously alarmed when he found himself in a slimy alley. Then he heard footsteps approaching.

"Where am I going?" he asked anxiously. A voice replied weirdly from the darkness: "Into the river. I've just come out."—Ex.

"Can you prove that this hair restorer is good?" asked the customer. "See that clerk by the sponge case?" asked the proprietor. "Yesterday he pulled the cork out of a bottle of this hair tonic with his teeth. Today notice he has a moustaache."—Ex.

We print ANYTHING at the Gazette shop, and prices are right.

Improve Your Home

The thrifty man uses economy by keeping his home well painted. It is not only the economical thing to do, but it improves the appearance as nothing else can do. There is a heap o' cheer in a few cans of paint.

Our paint covers the maximum surface with every gallon. See our color charts.

A Comfortable Home

A few attractive pieces of furniture lend enchantment to your living room. We are increasing our furniture stock and can give you a goodly number of patterns from which to make your choice. We will be glad to show you anything we have in the line of home furnishings.

Don't overlook our new rugs which we have in stock.

SEEDS

SOON BE PLANTING TIME

To make this year's garden a big success you must have good seed. The place to buy garden seed is at the "Potlatch Seed Store."
