Saving Money!

The amount of thought, will, and habit produced in regularly saving money are the strongest foundation stones of success a man can lay.

The man who saves money, saves self-respect; he begets confidence, not only of himself but of others. The SAVER always wins out in the end; the SPENDER, never. Sooner or later the spender must pay for being the "good fellow" in his earlier days. If you do not have a savings account, start one the first thing TOMORROW.

Greeks Left Few Paintings
On a tripod in the Naples museum are mounted a few thin slabs of marble the paintings upon which constitute the only real Greek paintings possessed by the world.

Fragility and Hope
He seldom lives frugally who lives by chance. Hope is always liberal, and they that trust her promise make little scruple of reveling today on the profits of tomorrow.—Johnson.

Community pride is an asset. The town that improves its streets, cleans up the alleys, keeps its sidewalks in good shape, paints the houses, keeps the yards clean, plants flowers, is advertising to the world that it is a "home town." It is the only kind of a town worth while.

Arthur Brisbane: Harvard will spend \$12,000,000 to improve the study of agriculture. That's sensible. English-speaking nations study Latin, Greek. The Romans studied Greek. The Greek philosophers studied hieroglyphics. Millions are spent teaching many kinds of knowledge little used after the student leaves school. It is about time to begin studying seriously old Mother Earth, the original Alma Mater from which we spring, upon which we depend absolutely during life, to which we all return.

A newspaper says that a baby is a noise done up with a safety pin.

Love causes so much trouble in the world that it is a wonder the reformers don't start a crusade against it. Life is so short, time so fleet that a man has only to be about 30 years old to remember many bright, pretty school girls who now weigh over 200.—Ex.

Here is one running around without credit: The flapper is passe. Now she is the bungalow girl. She has shingles on the top, paint on the sides, nothing in the attic.

Farm Hints

Use clean seed.

Grind screenings before feeding them to stock.

Treat potato seed with formaldehyde or corrosive sublimate.

Clean up around edges of fields and other places where needed.

Plan to grow three and one-half tons of silage and one to two of legume hay per cow.

Get a good fertilizer for the garden. An 8-4-4 will give good results for all kinds of vegetables.

Buy legume seed and prepare to plant several acres per plow to turn under for soil improvement.

Put in a few plants of the red and yellow cherry tomatoes for the children. These baby tomatoes make a big hit with the kids.

When grass is included in a rotation, it should be accompanied by a legume, and, for its best production, should remain down longer than one year.

Soy bean seed is frequently destroyed by a pest known as the common bean weevil. Almost complete control of this insect can be secured by exposing the seed to sub-zero temperatures. Place the beans outdoors in a sack on a cold day and leave them from 36 to 48 hours.

We can handle your ledger sheets as cheaply as you can get them from a mail order print shop. Try the Gazette Shop first.

Latvia Forests Unexploited

Forests of Latvia are not exploited but the government auctions the privilege of cutting trees in various sections.

To Tell Weight of Coal

A solid cubic foot of anthracite weighs about 93 pounds. When broken it weighs about 54 pounds. Bituminous coal when broken up averages about 50 pounds per cubic foot. Therefore, simply find the contents of box or bin in cubic feet and multiply by one of these numbers, according to kind of coal.
