

BAND CONCERT SATURDAY NIGHT 7:30

Compromise the Highway Case

Judge Johnson Dismissed Court Action

The Potlatch Highway District case, which had been pending in the district court for the past year, with August Wegner of Cameron as plaintiff, asking for the dissolution of the highway district, was dismissed at Lewiston after both sides had compromised. The object of the action was to prevent the construction of a road down Pine Creek to the Clearwater at the expense of the district. A. H. Oversmith of Moscow was attorney for the plaintiff and Fred Butler of Lewiston for the district.

Following is a copy of the resolution which was signed by the commissioners of Potlatch Highway District and filed with the county commissioners of Nez Perce county:

Whereas on the 8th day of May, 1925, a contract was entered into between Potlatch Highway District and Nez Perce County wherein and whereby the county refunded, out of a \$400,000.00 bond issue, what was estimated to be the portion of the excess over the costs of the construction of bridges, etc., amounting to the sum of \$6000.00; and,

Whereas, Lewiston Highway District waived its portion of the county bond issue in the sum of \$6000.00 upon condition that Potlatch Highway District construct a highway down what is known as "Pine Creek" to a connection with the Clearwater highway; and,

Whereas, it has been found impossible to finance the construction of said road and it is deemed advisable and for the best interests of the district that said "Pine Creek" project be for the time being abandoned and that the money appropriated by Nez Perce County, which had been waived by the Lewiston Highway District, be refunded to Nez Perce County with the request that Potlatch Highway District be relieved from its contract for the construction of such highway.

BE IT FURTHER RESOLVED that out of the portion of the money so refunded to Potlatch Highway by Nez Perce County and now on hand such money shall be, as soon as conveniently may be done, expended upon improvements of the roads in the following communities within said Potlatch Highway District, to-wit: Cameron division .363 per cent Leland division .488 per cent

It is the intention of the commissioners of said highway district to create three voting precincts embracing the divisions hereinabove described, or to make such other divisions for convenience in expending the funds of the highway district, and while the commissioners do not intend to bind themselves to any program the intention will be to expend money in such division as near as practicable, in proportion of the assessed valuation of the property in the respective divisions.

WHEREAS it has been deemed for the best interests of the residents, inhabitants and taxpayers within Potlatch Highway District that the boundary lines of the old road districts as heretofore established and maintained be abandoned, and that said highway district be divided into three highway divisions for convenience in book-keeping and in order that the taxes levied, assessed and collected within said highway district may be more equitably apportioned upon the roads lying within such highway district.

NOW, THEREFORE, BE IT RESOLVED by the board of commissioners of Potlatch Highway District.

(Continued on following page)

DUKEDOM IS HIS

Sir Edward Seymour, who has at last convinced the house of lords committee on privileges that he is the successor to the dukedom of Somerset. He is a cousin of the late duke, and his claim depended on the legality of the marriage of one of his forebears, Col. Francis Seymour, to a sailor's widow, Leonora Hudson, 138 years ago.

Kendrick Club Talks Highways

Road From Arrow is Key to Potlatch Highways

The last meeting of the Kendrick Commercial Club, held at John's Confectionery last Tuesday evening, was devoted largely to a discussion of the road situation in this locality. It was generally conceded that if Lewiston carries out the promise made on several different occasions, that the road from Arrow Junction to the Latah county line will be built in the very near future, there will be some very desirable road projects developing on American ridge, Bear ridge and a road to connect with the Cedar creek grade.

The sentiment of the meeting highly favored the putting over of a substantial road building program as soon as Lewiston starts work on the highway up the Potlatch.

In a communication with a member of the Lewiston highway board it was learned that the Lewiston district had received an estimate of the cost of constructing the road from Arrow Junction to the Latah county line and it was hoped that something of a definite nature might develop within the next two weeks.

It is quite evident that the people of Lewiston are not familiar with the topography of the country tributary to Kendrick, or there would be more activity in starting construction work on this important highway, which would tap the richest territory tributary to Lewiston.

K. H. S. Commencement

The Kendrick High School commencement will be held Thursday evening, May 8, at the New Kendrick theatre. The program is now being arranged and all details will soon be completed.

The class to receive diplomas numbers fourteen members.

The baccalaureate service will be held in the Methodist church, Sunday, May 24. Rev. Thompson of Spokane will deliver the baccalaureate sermon.

A large crowd from Kendrick and the surrounding country attended the lecture by Miss Ruth Warner at the Methodist church, Wednesday evening. Miss Warner is home on a furlough from the mission fields of South America. Her home was formerly in Moscow. Her lecture was very interesting and instructive.

Band Concert at Kendrick Park

Saturday Night, 7:30, Will be First Public Appearance of the Kendrick Band

The Kendrick Band will make its first appearance in public tomorrow night, Saturday, at the park. The concert will be free to the public and everyone is most cordially invited to attend. The opening number will start at 7:30.

The members of the band have been rehearsing faithfully twice a week since early last fall. They have made splendid progress and the concert tomorrow night will be a very creditable affair. It is safe to say that the public has a pleasant surprise in store.

The band consists of from 35 to 40 pieces, mostly young musicians, but under the direction of Walter Thomas they have made giant strides and help to round out a well balanced band.

Following is the program for the Saturday evening concert:
Frat March Barth
Evening Shadows Waltz. Wheeler

Senior Class Play Draws Big Crowd

Efforts of Members of Cast Meet With High Favor by an Interested Audience

The Kendrick High School play "Professor Pepp", drew a good house Thursday night of last week in spite of the very unfavorable weather conditions. The play was a three act comedy full of amusing situations and the members of the cast carried off their parts in a most creditable manner.

Arthur Janes, as Professor Pepp had the leading part and carried it off extremely well. Clarence Bell as Mr. Buttonbuster had a very good part and made a bit with his representation of a scrambled egg. Frank

Brocke, Frank Foster and Buster Brown all showed marked ability in their various parts. Minnie Blum, a junior, had a heavy part and was a star performer. Beryl Harrison as Betty Gardner was very good and characterized her part nicely. The other members of the cast had minor parts but they were well handled, particularly those of the Ameling twins who were especially good.

Following is the cast of characters and a brief synopsis of the play:

- Cast of Characters:
- | | |
|-------------------------|------------------------------------------------------------------------------------------------------|
| Professor Peterkin Pepp | Arthur Janes |
| Mr. C. B. Buttonbuster | Clarence Bell |
| Howard Green | Frank Brocke |
| Sim Batty | Frank Foster |
| Peddler Benson | Buster Brown |
| Betty Gardner | Beryl Harrison |
| Aunt Minerva | Minnie Blum |
| Petunia Muggins | Vera Ameling |
| Olga Stopski | Dorothea Stanton |
| Students | Velma Ameling, Allie Moore, Flossie Bradshaw, Pearl Depatee, Dwight Ingle, Fred Wegner and Jack May. |

Synopsis

- Act I. Professor Pepp's residence on the college campus. The opening day at school. A trip to Russia. Father comes to college.
- Act II. Same scene as Act I. Father is dazed. Surrounded by the nihilists. Bombs and Bumski!
- Act III. Same scene. A garden party by moonlight. Celebrating the foot-ball victory. Bonfire and parade. Father-- the foot-ball hero. The serenade. Aunt Minerva on the warpath. A double wedding.

Via Kendrick Shorter Route

A. G. Peters stated the first of the week that he set his speedometer at Leland recently, just before starting to Lewiston. He drove down Wandcher gulch through Kendrick and Juliaetta to Lewiston and his speedometer registered 31 miles. From there he returned over the Clearwater highway and at the mouth of pine Creek gulch his speedometer registered 61 miles. It is estimated that a grade down Pine Creek gulch from Leland would be 5 or 6 miles farther from coming by way of Kendrick.

Mr. and Mrs. Robert Emmett of Genesee accompanied the ball team here Sunday. Mr. Emmett is a brother of James and B. N. Emmett of this place. He is in the mercantile business in Genesee.

Juliaetta vs. Kendrick

Next Sunday afternoon the Kendrick and Juliaetta baseball teams will play on the Kendrick grounds. Juliaetta won from Kendrick several weeks ago but local fans are confident that the long end of the score will be with the home team in this game. Kendrick will have a strong lineup for Sunday.

Plans are being made to have the band at the grounds, where a short concert will be held before the game.

Ben Cummings and Melvin Morley bought a Garford truck last week. They expect to start hauling lumber soon. They have a good contract and will keep the truck going day and night after they get well started. They are both experienced truck drivers and should do well this summer.

FREED FROM NUN'S VOWS

This is Miss Marie Hirst of Philadelphia, who recently left the Order of the Sacred Heart on special dispensation from Pope Pius, in order that she might be free to marry Webb Levering, prominent in Baltimore social circles. Miss Hirst had served 13 years in the religious order, in which she entered at the time preparations for her debut in society were being completed.

Kendrick Wins From Genesee

Game Goes to 10 Innings, Score 3 to 2

The baseball game between Genesee and Kendrick, played on the local grounds last Sunday, was fully up to expectations and then some. The game went 10 innings with a score of 3 to 2 in favor of Kendrick. Up to the 8th inning Genesee led 2 to 1 when the score was tied with a run by Polon. In the last of the 10th Walter Thomas scored the winning run.

The feature of the game was Glenn Fleshman's pitching. He pulled the team out of a number of bad holes and struck out 17 men in the 10 innings.

Blum pulled a fast double play on second base at a critical stage of the game and retired the side.

The game was good, straight baseball, both teams playing consistently.

Following is a tabulation of the game:

School Entertainment

The Kendrick school children will put on the last of the series of "six weeks entertainments" next Wednesday evening, May 20, at the New Kendrick Theater. In addition to the entertaining features presented by the school children, there will be a moving picture entitled "The Country Kid" featuring Wesley Barry. An admission charge will be made and all net proceeds will be used to defray expenses incurred by the domestic science class.

Latah County News Paragraphs

Items of interest Taken From Neighboring Papers

The 1925 Annuals were distributed on Wednesday of this week. Sixty five were made and all were sold. The 1925 Annual is much better than the photograph Annual of the past two years and cheaper for it was sold for one dollar whereas the annuals last year sold for two dollars and contained no descriptive matter. The Senior class is proud of the annual, and should be, for they did the work themselves without previous experience. The annual was made-up and printed in Troy by Mr. B. V. Haas.—Troy News.

Like Bro. Kenepfer of the Kendrick Gazette, when the editor of the press starts making moonshine, by the great horn spoon he'll not do it in Latah county. The sheriff's office is so dog gone persnickity that a poor "shiner" doesn't more than get nicely started in the business of producing first degree murder in jugs and bottles before Summerfield and his minions swoop down, like hawks on a chicken. Then another kind of "jug" for the shiner and, a few remarks by the court, and the hoosgow.

Sheriff Summerfield last Monday arrested Allen, near Avon, and seized a quantity of booze, two 50-gallon barrels of mash etc., that made five successful raids in as many successive days. He was assisted Monday by Deputies Garrison and Malone.

Well, what did we elect him for? We venture the assertion that the sheriff has a line on every still in operation in this county. Shiners who have not yet been molested needn't feel slighted. He will call on 'em when the sign is right, and he gets what he goes after.

Nope—we like to breathe pure air too well to take a chance on bootlegging in Latah county. And if we had any friends in the business we'd admonish them to trade their outfit off for a dog and then drown the dog—in other words, to get out of the business while the getting is good.—Latah county Press.

J. A. Harsh, member of the highway board, went to Lewiston Tuesday where he conferred with State Engineer Oxley relative to the road construction to be undertaken here this season. Upon returning home Mr. Harsh stated that an engineer will be here Monday to re-set the stakes along the right of way. In the meantime the board will proceed to secure title to the right of way on the strip of road to be built. Construction equipment will be assembled as soon as possible. It is to be regretted that the road cannot be extended along Second avenue, as had been hoped for.—Deary Press

On Tuesday of this week F. S. Casebolt closed a deal with Ben Frank of Minnesota whereby Mr. Frank became the owner of the Casebolt harness and shoe repair business, the new owner having taken charge Wednesday morning.

Mr. Frank comes to Genesee highly recommended as a business man and as being highly efficient in his particular line and the good people of Genesee extend him and his family a cordial welcome to our little city. Mr. Casebolt has been in the harness business here for the past 15-12 years and sold his business in order to devote more time to the shoe business, which he will conduct in his store the same as in the past.—Genesee News.

Compromise Highway Case
(Continued from Page 1)

Section 1. That the road districts and the boundary lines of said road districts as heretofore established and lying within said Potlatch Highway District be and they are hereby revoked and set aside.
 Section 2. That said Potlatch Highway District shall be subdivided into three highway divisions; that the names and boundaries of said highway divisions within said highway district be and the same are hereby fixed and established as follows, to-wit:

1. Juliaetta road district. Commence where the Reservation line intersects the north and south center line of Sec. 13, Twp. 37 N. R. 3 W. B. M.; thence due north through Section 13-12 and 1 to the township line; thence west to the Potlatch river; thence southwesterly down the Potlatch river to its intersection with the Reservation line; thence easterly along the Reservation line to place of beginning.

2. Cameron road district: Commence at the southwest corner of Sec. 30 Twp. 30 N. R. 2 W. B. M. thence north to the Potlatch river; thence northeasterly up the Potlatch river to its intersection with the Latah County line; thence east on County line to the northeast corner of Sec. 24 Twp. 38 N. R. 2 W. B. M. thence south, along the Township line 2 miles; thence west six miles to place of beginning.

3. Leland road district: Commence where the Reservation line intersects the north and south centerline of Sec. 13 Twp. 37 N. R. 3 W. B. M.; thence north through Sections 13-12 and 1 to the Township line; thence west to the Potlatch river; thence northeasterly along the Potlatch river to its intersection with the east line of Sec. 25, Twp. 38 N. R. 3 W. D. M.; thence south to the southwest corner of Sec. 30, Twp. 38 N. R. 2 W. B. M. thence east six miles; thence south to the Bedrock creek, thence southwesterly down Bedrock creek to its intersection with the Reservation line; thence west along the Reservation line to the place of beginning.

Section 3. That the assessed valuation of real property for the year 1924 within said respective road districts is as follows:

Juliaetta, \$129,000.00.
 Leland, \$429,000.00.
 Cameron, \$318,000.00.
 and that the percent which each of said road districts bears to the total assessed valuation, as equalized upon the 1924 assessment roll, is as follows:
 Juliaetta, .149
 Leand, .488.
 Cameron, .363.

Original resolution only change in boundary between C. & L. when 6 quarters added to Cameron, 40,000 valuation.

TEXAS RIDGE

Thelma Holstine is visiting for a few days with the Stocum girls.

Mrs. Miller spent a few days in Deary last week.

Mr. and Mrs. Gentry and Clair of Deary were Sunday guests at Ogden's.

Miss Kidney completed an 8 months term of school in the Ellwood district, Friday.

Mr. and Mrs. Ray Bogar of Deary visited over the week end at the W. H. Head home.

Mr. and Mrs. Chester Bogar and Mr. and Mrs. Ford Drury were Saturday night and Sunday guests at the George Drury home.

Albert Pierce of Deary was a caller on the ridge, Sunday.

Sylvia Baker has been quite sick with pneumonia. We are glad to report she is improving at this writing.

The Ladies Guild will be entertained by Mrs. Miller Wednesday afternoon.

Grandma Tout is visiting friends in Deary for a few days.

V. n. Ogden has gone to Lewiston

on a business trip.

The program and sale given by the Ladies Guild, on May 9th, was a decided success. A large crowd attended and the proceeds amounted to \$101.25. The ladies heartily thank all who so kindly aided them in their program and especially Mrs. Hegadon from Avon.

BIG BEAR RIDGE NEWS

The Ladies Guild met at the Wild Rose cemetery, Wednesday, for the purpose of caring for the graves of those who had no relatives living in this vicinity at the present time.

Mrs. Z. Aas entertained the Lutheran Ladies Aid at her home Monday afternoon.

Mrs. Philip Asplund is visiting her parents, Mr. and Mrs. E. H. Dammarell in Kendrick.

A large number were fishing in Atwater Lake, Saturday and Sunday.

P. A. Norman, son Henry and daughter, Mrs. Olaf Burnvik of Deary were Sunday visitors at the Ed Lien home.

Miss Babe Hardman of Peck arrived here Saturday for a visit at the home of her aunt, Mrs. Wade Keene.

Miss Emma Aas is spending the week with Miss Dora May on American ridge.

Mr. and Mrs. George Larson and son, Harold, were visiting Mr. Larson's parents on Potlatch ridge, Sunday.

Mr. and Mrs. N. E. Ware were visiting with Mrs. Ware's sister, Mrs. Jake Herriman on Potlatch ridge last week.

Mr. and Mrs. Wade Keene and children and Miss Babe Hardman motored to Spokane, Tuesday, to spend the week with friends.

Preaching services at the Lutheran church, Sunday, May 17th at 11 a. m.

Dr. W. T. Seeley was called on the ridge, Tuesday, by the serious illness of Mrs. Carrie Hooker.

Poultry and Swine Tuberculosis Cure

Infected Fowls and Animals Were Disposed of.

(Prepared by the United States Department of Agriculture.)
 With the widening knowledge concerning the nature of tuberculosis.

live stock owners are rapidly putting methods of eradication into practical use. The close relationship between fowl and swine tuberculosis is illustrated by a recent occurrence in Michigan. The facts were obtained by the Michigan Agricultural college in cooperation with the United States Department of Agriculture.

A shipment of hogs from a certain farm proved to be badly infected with tuberculosis. An inspector who visited the farm applied the tuberculin test to the remaining hogs and found practically all of them tuberculous. He also found the chicken flock on the farm badly affected. Acting on the inspector's advice, the owner disposed of the entire flock of chickens, restocking with day-old chicks in the spring. Meanwhile he had also disposed of the tuberculous hogs and cleaned and disinfected the premises, especially the poultry buildings and yards.

After a period of time the owner sold 32 hogs which went to the same market as before. A report covering the postmortem examination of 27 of these animals showed that none was infected. With the source of infection gone the introduction of healthy stock naturally resulted in continued freedom from the disease.

"A man should not go into the stock business, but should grow into it," is an old saying, but one never more true than today.

Pure bred animals must be sold. The idea that pure bred animals are expensive and a luxury in the farmer's hands must be dispelled.

"Pop, what's a monologue?"
 "That's a conversation between husband and wife."
 "I thought that was a dialogue."
 "No, a dialogue is where two persons are speaking."—Ex.

PRESBYTERIAN CHURCH
 Preaching services on Sunday morning as well as Sunday school at the usual hour. Subject of sermon: "Men who have Hazarded Their Lives for the Lord Jesus."
 A hearty welcome extended to all.
 H. A. Vicker, minister.

POULTRY

FACTS OF POULTRY WORTH REMEMBERING

The poultry producers who do not give their flocks the run of the farm have a problem of yard management to consider in the handling of their flocks. Where the poultry have the run of the farm this problem is not so important, but, instead, the producer has the problem of keeping the ground immediately adjacent to the houses in a sanitary condition.

It has been demonstrated in all classes of live stock that rotation of pastures is an important means of lessening disease. This has been recognized for many years in the management of sheep and is becoming more recognized in the handling of hogs under the system which is known as the McClean county system.

In the handling of poultry it is well to have double yards so that one might rotate green crops. The yards may be sown to rye, oats, wheat or any quick-growing crop and while the fowls are using one yard the green feed in the other is getting a fresh start.

If the yards are only on one side of the house it is preferable that they be on the south side in order that the birds get the benefit of the dry ground and the warm sun in the early spring.

If the yards are in permanent sod it usually requires from 70 to 80 square feet for each bird. If part of the green feed is supplied in other forms half of this amount will be sufficient.

Shade of some type is needed in the poultry yards. Fruit trees are often used for this purpose. If trees are not available then some type of artificial shade should be supplied.

Select the best eggs for hatching. Use the mother hen when possible or hatch early chicks with incubators. Care for early hatched baby chicks well.

Feed early baby chicks properly to give them a good start. It is always well to clean and disinfect the houses and pens thoroughly where the pullets are to live. This is especially true if the birds formerly occupying the building have been diseased or have had worms.

Artificial lights should not be used on pullets until they have had a chance to respond to normal conditions. If they do not respond quickly enough, or if neck molt starts, then lights can be used with good effect.

Lack of ventilation causes dampness in the houses and this in turn results in colds and roup.

Sunlight a Panacea for All Kansas Hen Flocks

"Why use the ultra-violet ray machine or cod-liver oil to stimulate egg production when Kansas sunlight is so available?" asks Prof. L. F. Payne, head of the department of poultry husbandry at the Kansas State Agricultural college.

Experiments at the college have indicated that a vital element for egg production and for general vigor of poultry is provided by sunlight, by the ultra-violet ray, or by the vitamin contained in cod liver oil, and that if this element is lacking improper development results.

Professor Payne has conducted experiments which indicate that direct sunlight is more beneficial than that which comes through ordinary window glass. In an experiment contrasting egg production of pullets grown in an open house with those grown in a glass-front house the ones grown in the open house were heavier producers and had no trouble with colds or molting, while those in the glass-front house suffered from colds and from molting.

Palatability of Feeds Appreciated by Fowls

A hen does not have a keen sense of taste, but she does dislike certain feeds, and if they make up an appreciable part of the mash she will reduce the quantity eaten. Linseed meal, bean meals and ground hulls must be used only to a limited extent. Blood meals, rye and cottonseed meal should be left out of the ration. Wheat bran and millet are probably the best-liked fibrous feeds. Light colored mashes are usually eaten more readily than dark ones.

Undoubtedly hens or flocks develop individual likes and dislikes. Birds raised on kafir, for instance, may like it, while another flock to which it is newly introduced may practically refuse to eat it. Hens do not enjoy feed or eat as heartily when it must be dug out of a filthy litter.—O. C. Krum, Colorado Agricultural College, in Extension Bulletin 234-A, "Feeding for Commercial Egg Production."

Feed for Young Chicks

The young chicks should not be fed until they are 48 hours old, whether they are with hen or in a brooder. The first feed should consist of baked Johnny-cake broken up into small pieces, or hard-boiled eggs mixed with stale bread crumbs or rolled oats, using a sufficient quantity of the latter to make a dry, crumbly mixture or a mash of two quarts of rolled oats, one part bran and one part middlings by weight, mixed with milk or with boiled eggs.

Manure Pile Quite Costly to Farmers

Tests Extending Over Twenty-One Years in Ohio.

Every ton of manure allowed to accumulate around the yards costs the farmer 53 cents. This figure has been obtained from actual field tests extending over 21 years in Ohio.

Realizing that crop yields tell a story much easier to understand than a chemical analysis, the Ohio experiment station has applied manure to clover sod in the three-year rotation of corn, wheat and clover for twenty-one years.

One series of plots received manure directly from the stables. Another series was treated with an equal weight of manure that had been left in a pile in the yards for three months. Stable manure produced 23 bushels of corn an acre, 10.5 bushels of wheat and 1,363 pounds of hay. Barnyard manure yielded at the rate of 19.5 bushels of corn, 9 bushels of wheat and 840 pounds of hay. Measured by the average value of crop increase, one ton of yard manure is worth \$2.92 and one ton of stable manure \$3.45.

The idea exists in some sections that a considerable portion of the manure hauled during the winter is wasted. Missouri tests prove this idea unfounded except in the case of steep hillsides where the water from melting snows may carry away the manure. L. E. Call of the Kansas Agricultural college, in a recent statement, says: "Barnyard manure can safely be scattered on most fields when the ground is covered with snow. It is only when the snow melts rapidly on rolling fields that very much of the fertilizing value of manure is lost. Under most conditions the loss will be greater when the manure is piled outdoors than when it is scattered."

Put Additional Weight on Poultry for Market

Comparatively little attention has been given to the matter either of placing additional weight on market poultry or of improving its quality before marketing, say the specialists at the New Jersey agricultural experiment station. Recent experiments at that institution show that nearly one-half pound, can be placed on heavy roasters in ten days through the use of semi-solid buttermilk with a mash high in corn meal content.

In this method the roasters are confined to the colony houses, starved for 24 hours, and then subjected to a ten-day special feeding process. During this time an attempt is made to reduce exercise to a minimum. Perches and dropping platforms are removed from the houses, and curtains are closed—except while the birds are actually feeding. No drinking water is supplied during the period. The following ration is used: Corn meal, seven pounds; wheat middlings, three pounds; wheat bran, one pound; semi-solid buttermilk (diluted one to seven) 22 pounds.

This ration is fed as a wet mash three times daily—at 7:30 a. m., noon, and 4 p. m. Half as much of the mixture is given at noon as in either the morning or the night feeding.

On this ration roasters have averaged 7.7 per cent, or 44 pounds increase in weight per bird.

Purposes of Windbreaks

Windbreaks about buildings have a twin purpose, they provide shelter and gather moisture for the garden. Trees and shrubs are essential to the making of a real farm home, as they increase the value of the property and make conditions more pleasant and healthful. There is scant comfort in a house or barnyard exposed to the chilling winds and drifting snows of winter and the withering blasts of a hot dry day in summer.

FARM NOTES

- Break land as early as possible.
- Purchase fertilizers before planting time.
- Procure legume seed for summer planting.
- Mixing of fertilizers is also like charity; it should begin at home.
- It pays to treat the seed oats for smut. Are you planning to do it?
- A soil without legumes is as "unfulfilled" as an orchard without bees.
- The county farm agent is your farm "trouble shooter." Tell him what to aim at on your farm.
- Wouldn't you encourage a boy to spend his spare time in the development of a lamb, a pig or a calf?
- It takes manure to make good potatoes, so don't forget the potato patch when you are cleaning the stables.
- If one horse carries his head too high or drives more freely than his mate, adjusting the coupling reins will make a difference.
- Every producer should remember that quality counts and is paid for in the market's final analysis. Sooner or later the consumer pays for quality and some seller gets the quality price. This hint ought to make money for the farmer who will set it to going on his place.

FARM STOCK

RAISING SHEEP ON DIVERSIFIED FARM

There are three systems of sheep management in the United States:

1. Running sheep in large bands on the range.
2. Keeping small flocks on the farms.
3. Fattening of range sheep.

The second and third are farm enterprises. The third is often more or less a speculative business, but the second—keeping a flock on the farm—may well be considered a permanent part of diversified farm business.

Sheep fit well into a system of farming because of the small investment required, the quick returns, their habits of feeding, their benefit to the land and their "two-way" cash crop.

It is usually considered that sheep can be purchased cheaply in comparison with other live stock. At present prices, however, an animal unit of sheep (seven ewes), is not so much lower in price than in other classes of live stock. The investment for shelter need not be large, as expensive barns are not necessary. The fleece of the sheep will prevent it from suffering from cold if it is kept dry and given a windbreak. Proper fencing will be the greatest investment necessary.

It should never be but a few months after sheep are purchased until a cash crop may be sold, either wool or lambs, either one of which will return a considerable part of the purchase price.

A very large part of the feed for sheep should be roughage. This makes it possible to utilize large quantities of grain that would otherwise have very little value. They can also graze profitably on waste lands, fields, meadows, lanes and roadways.

Sheep benefit the land upon which they run, in two ways, by keeping down weeds and by increasing the fertility. Their value to soil fertility has been so generally recognized that they have been called the Golden Hoof. They have an advantage over other common classes of farm live stock because their lighter weight does not pack the soil and also because their droppings are distributed to much better advantage.

There Are Two Types of Runty Pigs, Says Peters

W. H. Peters, head of the division of animal husbandry at the Minnesota experiment station, University Farm, St. Paul, says there are two types of runty pigs—one the pig that is born small and weak, of which there are from one to three in a litter, and the other the pig that has become runty after getting a good start from its mother.

The problem as to what to do with the runt of the first kind is not difficult. If the litter is small, such a runt will probably do fairly well and make nearly as good a pig as the rest. If the litter is large, it will probably be starved out, or it may be destroyed on the ground that it will not pay to attempt to raise it "by hand."

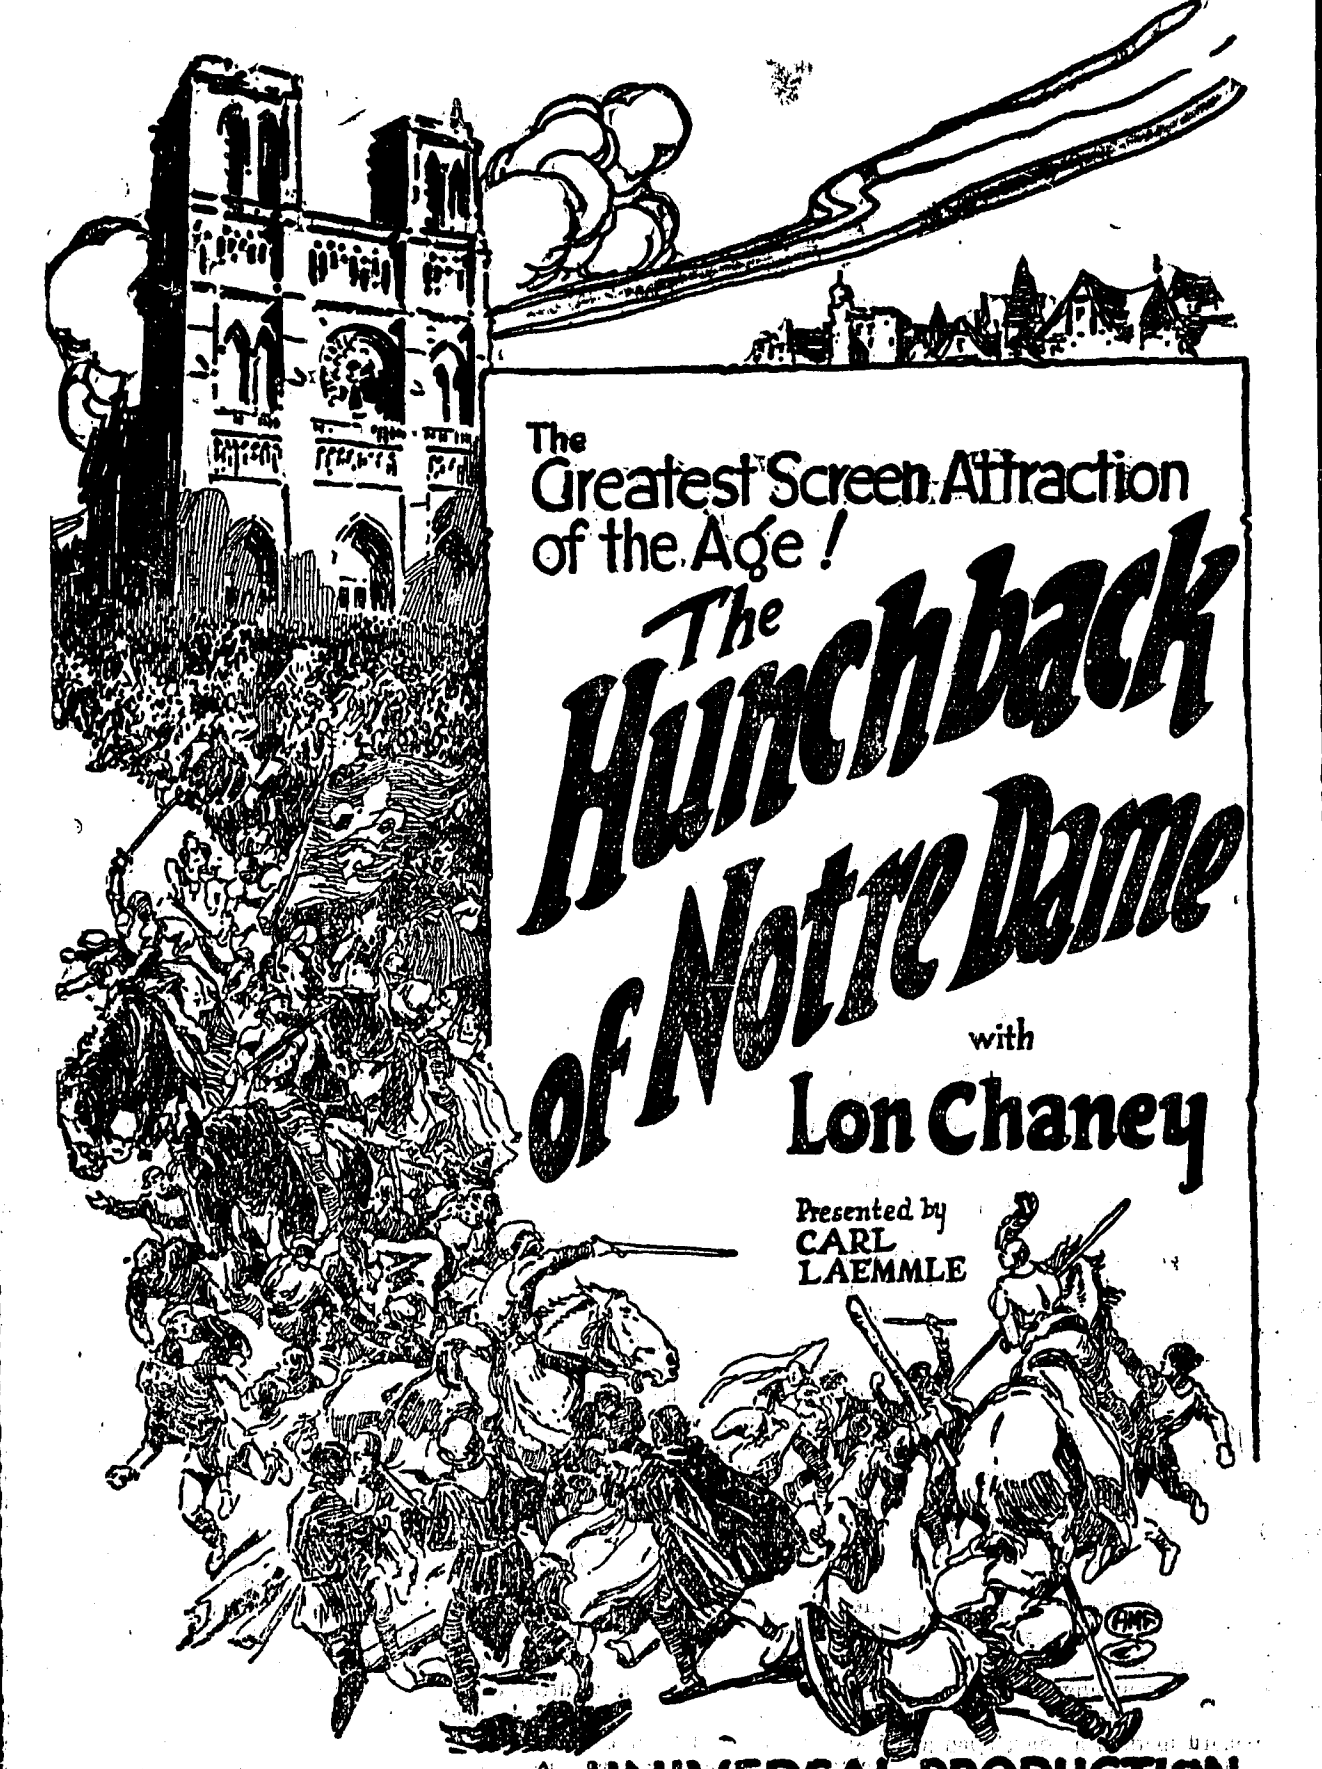

Runts of the other type, however, are more serious. Their presence indicates that the owner has made some mistake in caring for his pigs, and instead of one pig's becoming runty, all are likely to be runty. The real cause for the presence of such pigs is likely to be either lack of proper care and feed or else lack of attention to sanitation and health.

Mr. Peters believes that if the farmer is not able to determine the cause of lack of thrift among pigs, he should appeal to his county agricultural agent, and, if the county agent thinks it advisable, should call in a veterinarian. He says that the farmer cannot afford to ignore unthriftiness among his pigs, as it removes any chance of profit. A normal healthy pig should weigh about 200 pounds when 200 days old.

Live Stock Hints

- Get the pastures ready for the mower.
- Dock lambs when they are about two weeks of age.
- A good 1,000-pound steer will dress out 580 pounds of carcass, while a common steer of the same weight will usually dress out about 520 pounds. The well-bred critter also brings more on account of quality.
- Potatoes make very fair fattening feed for hogs, particularly when cooked. From 4 to 4½ pounds of potatoes cooked are equal to a pound of corn. It is desirable to feed some other feed, such as oats or shorts, with the potatoes.
- Plenty of good pastures mean the best and cheapest feed for live stock. Have pastures all the year.
- Sanitation in the hog lot sounds impractical but this method of preventing small pig ailments has kept a number of Kansas hog men in the business.
- In fattening stock for market don't over-stuff them. They will make faster gains if you keep 'em a little hungry. It's the last mouthful of grain that puts 'em out of condition.

Tonight and Saturday

The Greatest Screen Attraction of the Age!
The Hunchback of Notre Dame
 with
Lon Chaney

Presented by
CARL LAEMMLE

A UNIVERSAL PRODUCTION

You Never Saw Its Like Upon The Screen

Never in the history of motion picture making has so much splendor, magnitude and dramatic action been employed in one production. It will live in your memory for years to come. Everything we could tell you has been written before—in more colorfully glowing phrases than we would dare to employ!—by the leading critics, educators and prominent men of the present day. Never has a production won such universal praise, AND IT DESERVES EVERY WORD OF IT!

This Picture Cost \$1,500,000 to Produce

GUESTS: Tonight, Tom Blevins, Saturday, Gabriel Forest | Please call at box office and receive 2 complimentary tickets each

Band Concert in the Kendrick Park, Saturday evening, commencing at 7:30. This is the first appearance of the band since its organization. You will have plenty of time to see the entire show after the concert, if you can get a seat.

Doors open 7:30. Show starts 8:15. Get in Early

ADMISSION 25c and 50c

The New Kendrick Theatre

DAIRY

PROVED SIRES WORTH FIRST-CLASS STABLE

Years of observation have led E. J. Perry, New Jersey State college dairy specialist, New Brunswick, to believe that proper stabling of the bull makes it easy to retain him for several years.

"Since the bull is half the herd where heifers are raised, his health and physical well-being are of signal importance," says Mr. Perry. "A box stall 10 by 12 feet is suitable for the bull on the average farm. A strong paddock outside should be provided with a door from the box stall. In this paddock the bull can take the exercise which he always needs. A steel pen of heavy construction with a corner manger makes the best bull pen.

"All but the severest weather is beneficial to the breeding bull. Open-air treatment with the attendant exercise helps to insure a bull's breeding powers until he is nine or ten years old.

"New Jersey dairymen need to use more proved sires. The man who has a dairy already highly developed cannot afford to risk lowering his pro-

duction by the use of young, untried bulls every two or three years. A study of the methods of great breeders of the past shows that they judged a bull by his offspring rather than by his ancestors. When a sire once proves his worth through his daughter, he is invaluable.

"After using a young bull for two years a forward-looking dairymen can afford to loan him out until his daughters come in milk. The exchange of matured, proved sires between dairymen with healthy herds should become a common practice. The strongly built box stall and paddock or runway will eliminate all danger in the handling of the matured animal."

Feeding Heifer Calves to Secure Best Returns

Holstein heifers that were fed a liberal ration of grain, either corn or mixed grains, were 150 pounds heavier at two years of age than those fed only a limited amount of the same kind of grain, according to the tests at the Nebraska Agricultural college at Lincoln. Liberally fed Jerseys were fully 50 pounds heavier than their mates that were fed only a little grain. Liberal feeding produced no more gains than light feeding during the first six months of the calf's life while milk was being fed. The benefits from the additional grain all came after the calf had been weaned from the milk. All dairy calves should be on

a light grain ration by the time they are old enough to be weaned from their milk, and this ration should then be increased at such a rate that the desired growth will be obtained.

Scarcity of Hog Feed

The probability of a great scarcity of hog feed in the summer of 1925 is now troubling many farmers. "One way out of the difficulty is early seeded and early threshed barley. If everything goes well, it should be possible over a large part of the corn belt to have barley ready to feed to hogs by the last week in July. Of course the barley should be ground, but even after the expense of grinding, the barley should keep the spring pigs growing much more cheaply than the exceedingly scarce and high-priced corn of the crop of 1924.

Feeding Oats to Hogs

The bulk of past experiments indicate that for fattening hogs a bushel of oats has only about 40 per cent as much value as a bushel of corn. For growing hogs and for breeding stock, they may be worth about half as much per bushel as corn. Grinding oats helps a little, but it is doubtful if it helps enough to pay for the cost of grinding. With fall pigs weighing 100 pounds, feed about one-half to a pound of oats per head daily for a month or so.

**Aid Greenhouse Men
in War on Insects**

Much Progress Has Been Made During Last Year.

(Prepared by the United States Department of Agriculture.)

Of especial interest to greenhouse men are the studies of greenhouse insects and problems of greenhouse fumigation conducted by the bureau of entomology of the United States Department of Agriculture. Distinct progress has been made in this field during the past year. Among some of the insects on which work has been done may be mentioned the larger bulb fly, the cyclamen mite, the Cuttleya fly, and the tip moth of pine seedlings.

Life history studies of the larger bulb fly have been started, and experiments conducted in the disinfection of bulbs from the insect. The larvae appear to be very resistant to vacuum fumigation with carbon disulphide at the rate of 4 and 10 pounds per 1,000 cubic feet of space. Control experiments intended to test the efficacy of nicotine, sulphur, oil emulsions, soap sprays, pyrethrum, hydrocyanic-acid gas, carbon disulphide, etc., against the cyclamen mite have been begun. Fumigation against the Cuttleya fly with hydrocyanic-acid gas has not thus far proved of value in any of its stages, and other control methods are being studied.

Investigation in the general field of fumigation have included the testing of various dosages and exposures on a variety of plants, such as orchids and various bulbs. The killing power of calcium cyanide for certain greenhouse aphids compares favorably with equivalent dosages of sodium cyanide. Under greenhouse conditions it was found that overnight fumigation at the rate of 1/4 ounce of calcium cyanide to 1,000 cubic feet of space gave 100 per cent kill for three species of aphids. A higher proportion, combined with high humidity, caused severe burning of many varieties of plants.

**Pennsylvania Improves
Cattle Feeding Methods**

Cattle feeding methods in the Lancaster district have been changed completely in the past ten years because of the results obtained in steer feeding at the Pennsylvania State college, states Dr. John M. Thomas, president of the college, in a report on "The Service of the Pennsylvania State College to the Commonwealth."

"The old method has been changed to the modern method as developed at the experiment station," says President Thomas. "According to the best available information, only 10 per cent of the cattle feeders in the Lancaster district had silos on their farms in 1914. Approximately 80 per cent of all the cattle feeders in that district are now using silos in their steer feeding work. This change in the method of feeding has resulted in more economical production and has meant many thousands of dollars to the cattle feeders of Pennsylvania."

"The experimental work in maintaining a beef-feeding herd has been a stimulus for the establishment of more such herds in Pennsylvania, the number of which is constantly increasing."

**Value of Silage Varies
With the Price of Corn**

Silage made from corn that will yield 50 bushels per acre is worth from \$6 to \$8.50 per ton, depending when the corn was put into the silo.

Corn that is put into the silo when it is denting and all the leaves are green will weigh more than it will when it is more nearly ripe and some of the husks and leaves have begun to dry.

The value of a ton of silage always varies with the price of corn per bushel and also upon the quality of the corn. When corn is put into the silo before it is in the glazing stage, it is not worth as much as it would have been if it were more mature.

Farm Hints

Good cows are kept; poor cows maintained.

Those who wish to start the year wrong will buy cheap seed.

Wet days in spring are well spent in cleaning and oiling the harness.

Even the poorest garden spot contains "buried treasure" for the real gardener.

Perhaps the farm home garden is often a failure because it is not taken seriously enough.

Though sunlight costs nothing, it is about the most valuable thing you can give your chicks.

If you fail to beautify your premises with flowers and shrubbery, you cheat yourself and your visitors.

In starting a new crop year it is well to remember that the incentive to agriculture is not chiefly profit but the satisfying of the human interest in creative production.

All crops except timothy give better yields when they are grown in rotation than when grown in continuous culture. Experiments at the New York State College of Agriculture show.

LIVE STOCK

**FEEDING COLTS ON
GRAIN IS FAVORED**

That young colts to do their best must be fed grain, has frequently been advised in these columns. Recently it was our pleasure to visit one of the large stock farms located in the central portion of the state, writes an expert in the Farmer and Breeder. On it we saw a splendid herd of Shorthorn cattle and also large Yorkshire swine, but what pleased us most was the twenty-three grade and pure bred Shire colts which we saw in the box stalls at their dams' sides in the horse barns. They were an excellent lot of colts—as good as we have seen on any farm for a long time.

We visited at the farm for several hours with the herds and in the fields, observing the results of breeding which had been practiced in the former and the methods of management which were being practiced about the farm. We chanced to go into the horse barns just as the caretaker was feeding the mares at four o'clock p.m. before turning them, together with their colts, out to pasture for the night. Immediately we looked into the stalls to see what the colts would be doing while the mares were munching their grain. These colts ranged in age from three to eight weeks.

Were they lying down and asleep, standing back in the stall, or nursing the mothers? Not a single one of them. As we passed from stall to stall, we found every colt standing up to the feed boxes and enjoying its bite of grain with its mother. No wonder they were such fine fellows, big for their age, and the pictures of thrift—drafters all in the making. We then followed the feeder from stall to stall as he fed the remaining mares with colts, and sure enough, those colts knew what was coming when the door opened and he stepped into the stall with pail in hand. They didn't hesitate to be shown the way, but made a bee-line for the feed box. They stayed, too, until all the feed was gone.

We repeat, if young colts are to do their best, as well as they should, they must have grain. The colts on this stock farm were getting it together with their mothers; a mixture of bran and oats with a little corn. The feed boxes were attached to the walls in one corner of the stalls at a point low enough so that the colts could easily reach them and eat out of them. It is a good way and a very simple one. Colts are naturally curious to know what their mothers are doing and to do likewise, and so soon learn to eat in this way.

While at this farm we had an opportunity to further study the benefit of feeding the colts on grain and continuing to do so during their early development. Out in the pastures we saw a number of yearlings, two-year-olds, and three-year-olds, all of which had been fed similarly to this year's colts. They were all big, growthy drafters, far advanced in their development for their respective ages, compared with the general run of young horses seen about the state. Producing high class draft horses isn't a matter of breeding alone, but one of good feeding, too.

**Feeding of Tankage on
Any Pasture Is Favored**

Working with growing shotes the past summer and fall, Professor Loeffel of Nebraska found that where shotes had access to alfalfa and received only corn, that the cost of producing 100 pounds of pork was \$8.94, whereas when tankage was fed with the corn and alfalfa, the cost was \$7.62 per 100 pounds of gain. Furthermore the corn-tankage pigs weighed 210 at the close of the test, while the corn-alfalfa pigs weighed 142 pounds. Similar results were obtained where sudan grass was used as the forage. Where corn alone was fed, the cost per 100 pounds gain was \$8.41, whereas with the corn-tankage-sudan-grass pigs, the cost was \$7.14 per 100 pounds gain. In this test \$75 profit was made on each ton of tankage fed when full fed in self-feeders. Tests carried on at the Iowa station also bear out the statement that full feeding of tankage on any kind of pasture is advisable for growing shotes. In the Nebraska tests, corn was figured at 98 cents and tankage at \$65 per ton. With corn at \$1.25 to \$1.50, tankage would show even a greater saving. Of course tankage might go to such a figure where it would be advisable to limit the amount but at prevailing prices such is not the case.

Other feeds like ground oats, ground barley, shorts and hominy feed will no doubt be used very extensively this summer, and the corn can be made to go much further by adding to it ground oats, barley or shorts. If hominy feed is fed it should be fed along with barley or oats.

Transferring Pigs

If another sow, with a small litter farrowed about the same time as the large litter, is available, some of the pigs from the large litter can often be transferred to the sow with the small litter. Seldom will any sow raise more than one pig to each teat successfully if all are allowed to remain with her. Attempting to raise little pigs on cow's milk right from the start is of doubtful economy, as it requires more work than the pig is worth.

**Fertilizers Are
Getting Better**

Colleges and Experiment Stations Given Credit for Improvement.

There is ample evidence to indicate that the quality of fertilizer which farmers are buying is getting better each year. This improvement can be traced to the work which the agricultural colleges and experiment stations have been carrying on for several years in co-operation with fertilizer manufacturers through the soil improvement committee of the National Fertilizer association. The following brief summary of the situation in a few typical states should be of interest:

Increase in Indiana.
In his last report, Prof. E. G. Proulx, state chemist of Indiana, says, "Indiana in four years has changed from a low-grade fertilizer state to a high-grade fertilizer state and has learned that plant food makes the fertilizer." During these four years, the total quantity of nitrogen sold in Indiana increased by 29 per cent and potash by 136 per cent, while phosphoric acid decreased by 4 per cent.

Figures for Ohio, compiled by Professor Bear, show that in one year, 1923 compared with 1922, high-analysis fertilizers increased 68 per cent and that the sale of those included in the "Ohio Standard Dozen" list increased 171 per cent.

In Maryland, those analyses of which 1,000 tons or more were sold show an increase of 24 per cent for ammonia and 56 per cent for potash in 1923 as compared with 1921.

Progress in Missouri.
The following statement by Director Mumford, which appears in the latest fertilizer inspection bulletin issued by the Missouri experiment station, is indicative of the progress that is being made in that state:

"The experiment station has also conferred directly with the manufacturers of fertilizer material and has encouraged them to manufacture the brands of fertilizers that ought to be used in this state. The result of these efforts has been very gratifying. The manufacturer on one hand has pushed the sale of good fertilizers adapted to Missouri conditions, and the farmer on the other hand has followed the advice of the experiment station, to his great profit."

Progress in Michigan is clearly indicated by the following statement made by Prof. O. B. Price in a recent

issue of the Michigan Farmer: "In 1912 50 per cent of the brands sampled were low-analysis material; in 1917, 68 per cent were low analysis; in 1922, 31 per cent, and in 1923 only 17 per cent."

Manufacturers are rapidly reducing the number of grades offered for sale and increasing the actual plant-food content of those fertilizers that are sold.

**Crops to Follow Early
Vegetables in Garden**

Spinach, mustard, lettuce and radishes are off the ground early and the ground is released for other crops, but we should plant something that will not be troubled by the insect pests that are common to any of these. A second planting of beets will be good for this purpose, for the aphids is the worst pest that is likely to be on these early vegetables and the beets will not be troubled. After the bean crop is picked follow it with sweet corn, planting even before the beans are off. After any crop coming off in early June plant rutabagas, and in July plant turnips, Chinese cabbage, winter radishes, or set any of the mid-summer cabbages to head in the fall. The potatoes may be dug in July and followed with sweet corn of an early variety, which would be planted earlier and be large enough to permit the potato digging to serve as a cultivation.

**Potatoes Are Attacked
by Different Diseases**

Potatoes throughout the United States are attacked by quite a large number of diseases, which are transmitted either within the seed tuber, or upon it. Certain ones of these are now recognized by the botanists and plant pathologists as "deterioration" diseases. It has always been a theory of farmers and experienced growers that potatoes "run out," says Professor Bolley of the North Dakota College of Agriculture.

The best experts in the potato business also admit that potatoes often do "run out," become quite worthless as to type, etc. These deterioration diseases which are now being studied have always existed, but were not recognized. They are of such nature that under ordinary methods of cultivation and handling, potatoes may be expected to run out. We are, however, quite hopeful that potatoes can be kept from running out.

Some Garden Mistakes

There are a number of mistakes frequently made which have a tendency to reduce the value of a garden. The first one is in making a plan which

covers too large an area. It may be that when the first warm days of springtime arrive, in the first flush of enthusiasm we will plan a larger garden than we can properly care for. In course of time the rush of farm work comes on, the weeds in the garden get the start of the vegetables, and we let the whole thing go.

Chinese Dancing Rules

In China, the ballroom floors are divided into squares, each of which bears a sign of a bird, fish, or some other form of nature. Dancers must keep to their own squares and if they fail to do so are stamped with a colored disk. Three failures to keep within the square assigned results in the penalty of leaving the place.

**COMING!
United Doctors
Specialists**

Do Not Use Surgery
Will be at

Davenport Hotel, Spokane
WEDNESDAY, THURSDAY
FRIDAY
MAY 20, 21, 22

Palouse Hotel, Palouse
Saturday, May 23

Office hours 9 a. m. to 3 p. m.
No Charge for Consultation

The doctor in charge is a graduate in medicine and surgery, and is licensed by the state of Washington. He visits professionally the more important towns and the cities and offers to all who call on this trip, consultation and examination free, except the expense of treatment when desired.

According to his method of treatment he does not operate for chronic appendicitis, gall stones, ulcers of stomach, tonsils or adenoids.

He has to his credit many wonderful results in diseases of the stomach, liver, bowels, blood, skin, nerves, heart, kidney, bladder, bed wetting, catarrh, weak lungs, rheumatism, sciatica, leg ulcers and rectal ailments.

If you have been ailing for any length of time and do not get better do not fail to call, as improper measures rather than disease are often the cause of your long-standing trouble.

Remember above date, that consultation on this trip will be free and, and that his treatment is different.

SOUTHWICK NEWS
Grandma Thornton's birthday was celebrated Sunday. Those present were Roy Southwick, John Holmes, Frank Thornton and family, Harold Whiting and family, Mr. McDowe, Mr. Helton and Mr. and Mrs. Wolsen.
Mrs. Howard Southwick went to Lewiston, Monday morning where her little boy has been receiving medical treatment.
A. Calvert and family and Grace Hoskins were Sunday visitors at the J. E. Hoppe home.
Mrs. Ben McCoy and daughter, Eva went to Clarkston, where Mrs. McCoy will visit her mother.
John Lettenmeir and family motored to Moscow, Sunday.
George Christensen was in town Friday.
Bernice Snyder was a guest of Nadine McCoy, Sunday.
Homer Hayward and family, Georgia and Joy Bell were visitors of Mr. and Mrs. Farris, Sunday.
Southwick boys played ball Sunday with Cavendish. The score was in favor of Cavendish.
Mr. and Mrs. Clinton Wright and son, were Sunday guests of Clarence Henderson.

Fertile Soil Is a Real Treasure
English Scientist Emphasizes Importance of Organic Matter.
A fertile soil is to the farmer what a mine rich in ores is to the mine operator, but there the comparison must end, for the good farmer never depletes the fertility of his soil.
"But what is a fertile soil?" asks A. W. Blair, soil chemist of the New Jersey agricultural experiment station. Soil Fertility Defined.
"Definitions will vary according to the viewpoint of those giving them. A definition given by the noted English scientist, Sir Henry Gilbert, in a lecture on 'Agricltural Investigations,' delivered at Rutgers college forty years ago last October, is at least full of meaning. He said: 'The history of agriculture throughout the world, so far as we know it, clearly shows that a fertile soil is one which has accumulated within it the residue of ages of previous vegetation, and that it becomes infertile as this residue is exhausted; and enormous as are the accumulations in the prairie lands of the American continent, it is still desirable to postpone rather than to accelerate the time of their exhaustion.'

Statement by English Expert.
"Another of England's distinguished scientists, Sir John Russell, while on a visit to the New Jersey experiment station in October, 1924, made this significant statement: 'The English farmer must get 30 bushels of wheat and about 300 bushels of potatoes to the acre or he loses money.'

"This definition is given in terms of the soil's crop-producing power, but the two definitions are not far apart in actual meaning, since a soil that is deficient in organic matter—the accumulated residue of ages of vegetation mentioned by Doctor Gilbert—will not produce 30 bushels of wheat or 300 bushels of potatoes to the acre.
"In one of his lectures in this country, Doctor Russell further emphasized the importance of a supply of organic matter as follows: 'One of the great needs of agriculture in America, as I see it, is a more general practice of saving and applying barnyard manure, the using of lime to sweeten the soil, so that leguminous crops may be grown, and the following of proper crop rotations. The English farmer was forced to adopt this practice long ago, because of the limited acreage of farm lands.'

"The question of maintaining the supply of organic matter in the soil is becoming more serious every year. There is yet much room for improvement in methods of handling and using farm manure, and in the growing of green manure crops. American farmers must sooner or later adopt the practices which long ago proved so successful in Europe."

Cocklebur Plants Will Cause Serious Injury
A series of experiments conducted by the United States Department of Agriculture has shown that cocklebur plants are poisonous to swine, cattle, sheep, and chickens. Some have contended that deaths due to cockleburs were caused by mechanical action of the burrs on the tender organs of the animals rather than to poisonous qualities of the plant.

After extended experiments with the animals mentioned above, the department concludes that while the burrs may produce some mechanical injury and while the seeds are very poisonous, stock poisoning is caused by feeding on the very young plants before the development of true leaves. If there is a shortage of good forage and animals find the young plants, they may easily eat enough to cause serious results.
Feeding milk to pigs immediately after they have eaten cockleburs has proved beneficial, probably because of the fat content. Successful results may be expected also, when such oils and fats as bacon grease, lard and linsed oil are used as remedies, according to experts.

Asparagus One of Most Dependable Vegetables
Remember that asparagus is one of the most dependable and nutritious vegetables that we have, and one of the earliest to be ready for use in the spring. The Mary Washington variety is considered the best for both home use and commercial purposes. Set the crowns in the garden in rows four feet apart and two feet apart in the row. A good crop will be produced.
Prepare hills for melons, cucumbers and squash now. Mix the manure well with soil after adding a handful of acid phosphate and kaint, but do not plant outdoors until apple blossoms open. A few for very early use may be started in strawberry boxes placed in hotbeds.

Orderly marketing can only follow orderly production. The huge cotton crop at the expense of other crops is disorderly production.
The climate and weather sharps continue to predict a dry year for 1925. They say our solar radiation is lower than usual and that drought always follows such a state of things. It might pay to conserve soil moisture.

For The Smoker
We have just received a shipment of pipe and cigarette holders of the very latest designs, some of which are on display in our window. Prices are very reasonable and the pipes in designs that will please you.

GLEANINGS

M. B. McConnell returned Monday evening from a business trip to the Big Bend country.

Mr. and Mrs. R. D. Newton and family and Mr. MacGregor spent Sunday in Lewiston.

C. C. Carlson of Moscow visited over the week end at the home of his son, A. K.

Miss Bernadine Moser of Lewiston, Miss Hamley of Pendleton and several other young ladies, visited friends here for a short time last Saturday. Miss Hamley is a daughter of John Hamley, the world-famous saddle maker who was formerly in business here.

Rev. C. D. Bell was transacting business in Moscow the first of the week.

Miss Edith Dammarell came up from Lewiston Saturday to spend the week end at home.

Mr. and Mrs. Tony Agrall returned to their home in Troy, Tuesday, after visiting at the home of Mr. and Mrs. Ray Snyder.

Mr. and Mrs. Wm. Watts and two sons of Kendrick, and Mr. and Mrs. Byard Davidson and family of Colton, Wash., were guests at the home of Mr. and Mrs. A. B. Shumaker at Pullman, Sunday.

E. A. Deobald went to Lewiston the first of the week and returned with a new Chevrolet touring car.

Ullie Ellis bought a used Hudson touring car last week.

Mrs. Manford Nutt of Juliaetta was shopping in Kendrick the first of the week.

Doc. W. B. VanWert was called to Potlatch last Friday on account of the serious illness of his mother.

Mr. and Mrs. Stuart Compton and children of Orofino spent Sunday at the home of Mr. and Mrs. O. E. MacPherson.

Mr. and Mrs. Jean D'iberville, who arrived recently from St. Louis, stopped off here the first of the week to visit friends and relatives.

Mr. and Mrs. Frank Green of Troy visited friends here last Sunday afternoon.

W. M. McCrea was a Moscow visitor Tuesday of this week.

Born to Mr. and Mrs. Melvin Morley, Thursday evening, May 7, a daughter, weight 7 pounds.

The Misses, Thelma and Doris Byrum, who are attending the Ursuline Academy at Moscow, spent the week end in Kendrick.

Lost: 5 months old heifer, red with white heart in forehead. Finder please notify August Dalin, Kendrick, Reward. 20-1p

Egnaz Flaig played with the Lapwai Indians last Sunday against Orofino. Lapwai won the game.

R. D. Newton and E. H. Dammarell were transacting business at the county seat last Tuesday afternoon.

A. K. Carlson was transacting business at Moscow, Wednesday.

The case of G. G. Danforth of Potlatch ridge, heard before the federal court at Moscow this week, was held over for judgment to the term of court to convene at Coeur d'Alene immediately after the close of the Moscow term. The case involved a liquor charge.

G. F. Walker went to Lewiston, Wednesday and returned with a new Dodge sedan. It is a beauty.

A woman told a lady book agent in Kendrick yesterday that she couldn't afford to buy a \$65 set of books at that time. The agent said, "Well, I wonder if this town is like the last I visited, where a woman said that she had been to four parties that week but had lost so much money at bridge that she couldn't afford to buy books for her children."

Homer Bell has a good job at Moscow for the summer, working on the new building under course of construction on the university campus.

Mrs. MacInturf and two daughters arrived Wednesday to visit at the home of Mr. and Mrs. James Emmett. Mrs. MacInturf is Mr. Emmett's niece. Her name is in Honolulu.

An Underwood Typewriting test last week revealed a marked increase in the efficiency of a number of the high school students in their typing work. Those qualifying for the 30 word Certificate were: Jack May, Dorothy Holt and Clarence Bell. For the 40 word Bronze Medal: Allie Moore and Elsie Morey. For the 50 word Silver Medal: Hester Knepper. For the

60 word 10 carat Gold Medal: Hazel Stanton. D. A. McClain is to be awarded a Gold Medal by the Underwood Company for efficiency in typing instruction.

Mr. and Mrs. Ira Havens and family left last Monday by auto for eastern points to visit relatives. They expect to be gone about two months.

Born to Mr. and Mrs. Wm. Deobald, Thursday, May 14, a 9 pound daughter.

Mr. and Mrs. James Emmett returned Wednesday from Waitsburg, Wash., where they visited at the home of Mr. and Mrs. E. R. Porter.

Mrs. Harry Stanton and daughter, Dorothy, gave a very enjoyable party last Friday evening to celebrate Jaunita's birthday. About 14 girls and boys were present and spent a jolly evening.

You will have a good time at the band concert in Kendrick tomorrow night. It will be held in the park and is free to everyone.

Those who have traveled the road from here to Lewiston report it to be in very bad condition from the Latah county line to Arrow Junction. It is certainly time for Lewiston to get busy on this road.

Cyrus Roberts of American ridge is in Moscow and is a member of the trial jury of the federal court.

The pipe line from the Vollmer Clearwater spring is being put in to furnish a reserve supply of water to the town reservoir. The pipe line froze during the extremely cold weather last winter and much of the pipe burst.

Charles Schultz and family of Cameron had a narrow escape Wednesday evening of last week while driving to Cameron in their car. The car went over an embankment, rolled over once and landed on its wheels again. Not one of the occupants of the car was seriously injured. Mr. Schultz cranked up the car and drove it home and aside from a smashed top and broken wind shield it was damaged but little.

Julius Petrick said this week that from his 19 Leghorn hens during the months of March and April, he gathered an average of 17 eggs a day. Can you beat that?

"Central lied," said a Great Bend man to the Tribune paragrapher, after a long distance conversation with his wife. "She said I talked 7 minutes, when I only listened."

The war cry of the modern woman, according to the Noreatur Dispatch, is: "Millions for dress, but not one cent for clothing."

M. B. McConnell, cashier of the Farmers Bank, is a member of the grand jury at this term of the federal court.

Dr. G. W. McKeever was unable to attend to his office duties the first of the week on account of illness.

The weather has been everything that could be desired for crops in this locality. Bean growers have had ample opportunity to get the ground in good condition before planting, which is one of the important features of raising a big crop. The ground has a heavy reserve of moisture so that with any kind of reasonable weather during the balance of the growing season there should be a better crop than ordinary in the Potlatch this season. There will be a big bean acreage, much larger than the average year.

Recent Laws Passed

All of the Session Laws passed by the 1925 Legislature, with the exception of emergency measures, became effective May 5.

One of these laws, which no doubt be of interest to the public, is Chapter 22, which limits the use of the term of drug store. This chapter states that no person or firm shall use or exhibit the titles "Drug Drugs, Drug Store, Pharmacy or Apothecary", unless such person or firm has in his or its continuous employ in each place of business a licensed pharmacist registered in Idaho.

This law effects many confectionaries and merchandise stores in the state so far as the use of such term as "drug store" in advertising their wares.

The Optometry Law, as amended by Chapter 155, requires that an applicant must have completed a high school course in addition to being a graduate of a recognized school of Optometry. It also limits the practice to Optometrists; the only exception being made to those licensed to practice Medicine and Surgery in Idaho. This raises the state standard so that it equals that of any state in the Union.

A new section was added to this law limiting the duplication of lenses to licensed optometrists.

Idaho's Pocket Book Fat

Idaho's official pocket book is "fat" again, according to the April

report of D. F. Banks, state treasurer, which shows that the general fund received more than one million dollars during the month and when the month closed there was over six hundred thousand dollars in the fund.

The increase in the fund came from the sale of treasury notes April 1, in anticipation of taxes that will be paid between now and the later part of June, when the last installment on 1924 taxes is due.

During the month there came in to all funds more than \$3,300,000, but \$2,600,000 of this was spent, so that when the month closed there was a balance of \$3,287,999.39, about seven hundred thousand dollars more than what the treasury started with April 1.—Statesman.

LELAND NEWS

Born to Mr. and Mrs. Ben Hoffman, Wednesday morning, a fine 10½ pound baby girl.

Ed Flesherman accompanied by his daughter, Jennie, made a trip in his car to the Pierce country and returned Friday.

Mr. and Mrs. Siebert were guests at the Leland parsonage Sunday.

Little Esther Whiting entertained last Sunday afternoon, the occasion being her 9th birthday. There were ten little playmates present and all had a very good time.

While spraying the chicken house last Saturday, Harold Parks had the misfortune to have something go wrong with the spray pump. It bursted, causing his eyes to be badly burned by the spraying fluid. He was taken at once to Lewiston to the hospital. Just the full extent of the injury is not known but the total loss of one eye is feared. Owing to the swelling it cannot positively be determined as yet.

Prof. Gillespie returned from Peck where he has been teaching school. His school closed last Friday. Mr. Gillespie and family went to Clarkston, Tuesday, to attend the graduating exercises of their son Carl. They were accompanied by Miss Lillian and Marie DeWinter.

Miss Velma Porter returned from Pomeroy where she has been working for some time.

Miss Helen Eichers and Will Koepf went to Pomeroy to visit relatives last week.

The high school pupils are taking their examinations this week. School will close Friday. The pupils are contemplating a picnic to the North Fork of the Clearwater for the last day of school.

Mother's Day was observed at the church Sunday. A good program was put on and a large crowd attended. The Sunday school attendance was 136.

The Washburn seed agent was here this week contracting seed beans of the garden variety, offering 6c. Beans continue to be king here.

Archie May is building a new granary on his farm.

Rev. C. J. Taber made a trip to Orofino this week.

The frost killed most all of the cherries in the Leland vicinity last week.

Mr. and Mrs. Tom Daugherty are enjoying a visit by their youngest daughter and family from Spokane. The whole family had a reunion picnic in Peter's grove, Sunday.

CAMERON ITEMS

Those attending the road meeting at Lewiston, Friday were Herman Blum, Gus Blum, Rev. Rein, Aug. F. Wegner and Mr. Reitz.

Mr. Boemeko spent the week in Portland. He will return home the latter part of this week.

Mr. and Mrs. Carl L. Wegner entertain the following at Sunday dinner: Mr. and Mrs. Schmidt and family, Mr. and Mrs. Herman Meyer Leland little daughter and Adolph Miller.

Mr. and Mrs. George Larson passed thru the city Sunday. The following took Sunday dinner with Mr. and Mrs. Silflow: Mr. and Mrs. Aug. O. Wegner and family, Mr. and Mrs. Otto Silflow, Mr. and Mrs. Gus Kruger and little daughter, Rosalie.

Herman Silflow spent the past week in Lewiston.

The Misses Thelma Hansen and Katherine McMahon of Lewiston called at the Blum home, Monday.

Mrs. Ehlers returned home from Spokane, Monday evening. She reports Mr. Ehlers as getting along nicely, which we are all glad to hear.

Miss Laura Blum is at home for the week, being unable to work, on account of being in a car accident.

"Ah, good morning, Mrs. Murphy. An' how is everything?" "Sure, an' I'm having one grand time of it between my husband and the furnace. If I keep me eye on the wau the othr is shure to go out."—Peacock Feathers.
