N. B. LONG & SONS
"The Home of Good Things to Eat and Wear"

THE KENDRICK GAZETTE

Published every Friday at Kendrick, Idaho, by
Ralph B. Knepper

Subscription price.....\$1.50

Entered at the post office at Kendrick as second class mail matter.

They say that in a neighboring town burglars broke into a store but they found the goods marked so high they were scared away.

In announcing the selection by President Coolidge of Wallace McCamant for appointment on the circuit bench at San Francisco, a press dispatch states that Judge Dietrich beyond a doubt, would have been appointed to the position but for the fact that Mr. McCamant, as a delegate to the republican national convention at Chicago in 1920 had placed Calvin Coolidge in nomination for vice president. In other words, it isn't a case of who best can serve, but "who has done the most for his party."

It seems that undertakers will soon be a thing of the past—they call them morticians now.

It was a woman scientist, Mrs. Mary Swartz Rose, who took the trouble recently to discover by actual investigation just how much the average child eats in a year. According to this source of information it costs \$250 to feed a healthy boy or girl for 12 months. A boy of 14 consumes each month about 20 loaves of bread, 6 pounds of sugar, 1 peck of potatoes, 1 peck or more of vegetables, 2 dozen each of apples, oranges, bananas, 2 or 3 dozen eggs, 10 pounds of meat, a certain amount of other foods. Girls are almost as ravenous, so it is not surprising that the parents rebelled when they found that law makers allow only \$200 a year for the maintenance of a child. This meager amount has been doubled, but many hard-working fathers find the demands upon their pocketbooks much more than 400 years ago, especially when, in addition to clothing, there is a myriad of modern necessities once considered luxuries—Exchange.

GOVERNOR LOWDEN'S CURE

Here is former Governor Lowden's cure for the existing ills of agriculture.

"Farmers co-operative marketing associations—there is no other way out. I can foresee the day, I think, when everything produced upon the farm will be marketed by the farmers themselves through an organization of their own creation. I like to think of the time when the representatives of these great farmer's organizations shall meet in a congress once a year and shall there work out a program for the future, just as other industries now meet annually for the purpose of forming an intelligent and co-operative program for the year.

At such a meeting, if it shall appear that one branch of agriculture is expanding more rapidly than conditions warrant, steps will be taken to restore the balance as between that and the other activities of the farm.

In this way we shall achieve a balanced agriculture. Even more desirable, however, we shall restore the proper balance between agriculture—the greatest of all industries—and other business activities in this organized world in which we find ourselves; there can be no enduring prosperity unless all the principal industries which go to make up the commercial world, keeping step with one another, shall march abreast.

BIG BEAR RIDGE NEWS

Mr. and Mrs. Ed Galloway autotod to Genesee, Sunday.

BACON HOGS MAKE PROFITABLE GAINS

Bacon hogs as foragers made better gains than lard type hogs in an experiment conducted by the North Dakota Agricultural college last year. In their report, which covered pigs pastured on peas and pigs turned into a field of corn, they give the following records:

Bacon hogs on peas gained 385 pounds per acre.

Lard hogs on peas gained 375 pounds per acre.

Bacon hogs on peas gained in 28 days 38.5 pounds per head.

Lard hogs on peas gained in 28 days 37.5 pounds per head.

In Hogging Off Corn.

Bacon hogs gained 1.49 pounds per day. Lard hogs gained 1.34 pounds per day.

Bacon hogs yard fed gained 1.34 pounds per day.

Lard hogs yard fed gained 1.20 pounds per day.

For Fattening Cows

Silage is the cheapest feed which can be used for fattening cows. Two or three pounds of cottonseed cake, together with corn fodder, prairie hay, or other roughage is recommended in addition to the silage. May is usually the best time of the year to sell fat cows. The price next spring might justify the feeding of corn for the last 30 days of the feeding period, according to Dr. C. W. McCampbell, Kansas State Agricultural college.

Which Costs More To Have Hail Insurance and not need it, or To Need Hail Insurance and not have it?

You cannot prevent hail, but you can protect yourself against loss by a Home Insurance Company policy, whose policies mean absolute protection, with prompt and just settlements of all losses.

Give to your crop this year the same care and protection against a loss by hail that you give in working your ground and preparing it to produce a crop. It is good business.

Let us write you up today.

Kendrick, Idaho

GLEANINGS

E. A. Deobald was transacting business in Troy, Tuesday afternoon.

Born to Mr. and Mrs. Philip Asplund, Sunday morning, May 24, a daughter.

The fishing season in Idaho will open next Monday. The usual June 1st rush is expected.

Vera and Velma Ameling were Moscow visitors last Saturday morning.

Tom Long took a carload of fat cattle to the Spokane market the first of the week.

Dr. and Mrs. G. W. McKeever spent the week end in Lewiston.

Mrs. C. F. Westendahl is visiting friends and relatives in Moscow this week.

Sheriff Charles Summerfield poured 20 gallons of moonshine whiskey down the sewer Tuesday afternoon at Moscow, in the presence of a group of sorrowing spectators.

Mr. and Mrs. G. F. Walker and Mr. and Mrs. Ralph Knepper and son, John, drove to Moscow Monday evening.

There were 7 graduates in the Deary high school this year, 14 at Troy, 14 at Kendrick, 15 at Genesee and 2 at Juliaetta.

Clarence Bell went to Moscow the first of the week where he has employment for the summer on the new science building now under course of construction on the university campus.

The winners of the prize contest put on by the Kendrick Store Co., are announced in the advertisement of the Company in this issue. A large number took part in the contest, one entry being mailed from Marshfield, Oregon.

George Holbrook returned yesterday morning from a business trip to Lewiston.

Mr. and Mrs. C. S. Roberts and son, Harold, Mr. and Mrs. Clarence Dougharty, all of American ridge, and Mr. and Mrs. George Dougharty of Juliaetta spent Sunday with Francis Roberts near Myrtle.

Mr. and Mrs. George Procnier, Norris and Thelma Procnier of American ridge, spent Sunday at the home of Mr. and Mrs. Norris Walker.

Ellis Carlson is here visiting at the home of his father Chas. Carlson.

Mrs. Carlson and Mrs. Harry Baker entertained the Ladies Guild Wednesday afternoon at the Carlson home.

Education's Impress

The force of education is so great that we may mold the minds and manners of the young into what shape we please and give them the impressions of such habits as shall ever after remain.

Care of Dairy Bull

The amount of grain to feed to dairy bull varies from four to ten pounds, depending on the size and condition of the animal and the kind of roughage. A grain mixture recommended as having been used with success consists of three parts ground corn (by weight), two parts ground oats, two parts wheat bran, and one part linseed meal. Another mixture suggested consists of three parts ground oats, two parts wheat bran, one part ground corn or barley, and one part linseed meal.

Ice Water Is Harmful

One thing that retards the growth and development of fall pigs is forcing them to drink cold or icy water. It is harmful for two reasons: They won't drink as much water as they should and it chills them so badly they will not eat as well as they otherwise would. Give them warm water and give them most of it during the early part of the day. Give them a little real warm water in the evening. If they have a warm bed they will then keep comfortable and warm all night long.

Raise Pigs by Hand

It requires lots of patience to raise pigs by hand. During the first few days of their life they must be fed very frequently, about every two or three hours. The milk must be warmed for them, 100 degrees Fahrenheit, and it must be clean. Use whole cow's milk. Some use a bottle with a nipple but a spoon may also be used. Give plenty of good fresh clean water and give grain as soon as they will eat it.
