Latah County News Paragraphs

Items of Interest Taken From Neighboring Papers

Four men were arrested on liquor law violation charges, one for speeding and one for driving his truck with a 1924 license, by members of the Latah county sheriff's force. William Kries and J. D. Smith were arrested by Sheriff Charles Summerfield, and Deputies Malone and Garrison at Rowland's park Saturday night for being drunk in a public place. They were fined \$50 each by J. L. Naylor, justice of the peace. Kries paid his fine.

V. Walker and J. Shodine, youths from Troy were arrested also at Rowland's park Saturday night for drinking in a public highway. On account of their youth, Justice Naylor fined them only \$15 each and costs.

Edgar Clarry was arrested by members of the sheriff's force for driving his truck with a 1924 license. He was fined \$10 and costs and ordered to purchase a 1925 license by Justice Naylor.

Clark Kimbill, Pullman, was arrested for speeding 45 miles an hour on the highway north of town. He forfeited his \$10 bond for appearance in court this morning.—Star-Mirror.

At a well-attended meeting held at the Genesee Hotel last week it was unanimously decided to hold another big free celebration in Genesee on the Fourth. The celebration last year was such a success that it was decided to repeat it this year and accordingly, after some considerable discussion, committees were appointed to have charge of the arrangements.—Genesee News.

Work on the State highway west of Deary is progressing steadily, though some time has been lost on account of the rainy weather. The road as finally located leaves the old road at the end of Second avenue and drops to the south along the Bengt Peterson place arriving at Bear Creek over a level grade and crossing the creek a short distance below the old bridge. Instead of following the Van Arsdale survey, which ran south of the hill that skirts the Dalberg and Renstrom meadows, the road is being built on the north side of this hill, at the edge of the meadow. It will climb out of Bear Creek flat on a five per cent grade reaching the summit about 3000 feet from the bridge, thence over practically level ground to the road at the Lundgren place nearly a mile further west. Dropping to the southwest again it follows an easy grade to Dry Creek where it will tie onto the new road coming east from Troy. The rock crusher purchased by the district will be set up on Bear Creek on the rock point above the Dalberg place.—Deary Press.

Carl Porter has resigned as cashier of the Bank of Juliaetta to accept a position as District Agent for five counties in northern Idaho for the Minnesota Mutual Life Insurance Co. of St. Paul. His new duties will be the supervision of agencies in his territory with headquarters at Lewiston. He will be succeeded by Arnold W. Behrens, who is well known and well liked here, having been employed by the bank from 1919 to 1923. Arnold received his first bank training under E. W. Porter, Commis-

Ronald Amundsen

Kendrick Took Orofino Game

Won Spectacular Battle by a 4 to 2 Score

One of the best ball games of the season was played at Orofino last Sunday when Kendrick took the game with a two point lead. The score was 2 to 1 in favor of Orofino up to the 8th inning when a fly ball to right field by Bolon scored Clark and Herres. E. Flaig scored a run in the 9th and doubled the score on Orofino. According to a Kendrick ball fan the score should have stood 1 to 1 at the end of the ninth as the other runs made by both teams were on errors. Nevertheless Kendrick was thankful for the Orofino errors that netted three more runs.

The score book shows 10 strikeouts chalked up against each team; also 6 hits for Kendrick and 5 for Orofino.

Following is the lineup of the teams:

Kendrick—Herres, c; G. Flesman, p; Forest, 1b; E. Flaig, 2b; Clark, ss; J. Flesman 3, b; Parks, H. Flaig and Bolon, field.

Orofino—Johnson, c; Ball, p; Dupont, 1b; H. Cobain, 2b; H. Ball, 3b, Rettig, ss; Rhann, Hamilton and E. Cobain, field.

Umpires: Crumpacker and Walter Thomas.

Picnic Supper Saturday

The Methodist Ladies Aid will serve a picnic supper in the Kendrick Park on Saturday evening, June 20, from 5:45 till 7:00 o'clock. The supper will be served cafeteria style and will consist of sandwiches, potato salad, beet pickles, cottage cheese, cake and coffee. For a helping of each of the articles named in the menu the price for the entire lunch will be 30 cents. You are cordially invited.

Crushing Cedar Creek Rock

E. M. Booth, contractor in charge of the Cedar Creek road construction, started the rock crusher again last Saturday and is now busy surfacing the five mile grade. He is working two crews and with good luck the work should be finished in 30 days. The coarse surfacing was put on part of the grade last fall. This will now receive the fine surfacing which will put it in first class shape.

Commissioner of Finance of Idaho, and he has been very successful in his chosen work, having been field man for the Spokane & Eastern Trust Co. for the past year.—Juliaetta Record.

O. O. Lockard last Friday purchased the shoe store and stock from George Saad and took immediate possession. He is improving the interior and exterior of the building and later on will add a more varied line of stock. Mr. Lockard will give special attention to shoe and harness repairing.—Troy News.

Kendrick Plans Big Celebration

Preparing to Entertain Huge Crowd

If you haven't already made your plans to celebrate in Kendrick it would be a good, practical idea for you to have your wife make up your mind to be in the canyon town promptly at 10 o'clock July 4. If you haven't a wife it is already settled that you will be here as the girls have said they will all celebrate in Kendrick.

The various committees in charge of arrangements are making preparations to accommodate the largest crowd that has ever assembled here. With fair weather for the Fourth it is safe to say the size of the crowd will not be a disappointment. The celebration will be a reunion of old friends—a place where you may put in a quiet, restful day or an active, strenuous time, just as you prefer.

The park will be provided with benches and seats enough for all. There is plenty of delightful shade for picnic parties and everything will be done by the people of Kendrick to add to your comfort.

There will be ample accommodations for you during the noon hour. If you do not care to bring your lunch the hotel dining room will be in operation and lunch stands and refreshment booths will be in sufficient numbers to look after your requirements. Don't let anything change the decision that you probably have already made—to be here promptly when the parade starts at 10 o'clock.

There will not be a moment during the day from the time the parade starts until midnight, but what there will not something doing. A splendid program has been arranged to take place in the park immediately after the parade. Seating capacity will be provided for several thousand people and the rest may sit on the grass in the shade of the trees. After this the lunch hour which is always a busy time.

A band concert immediately after lunch and then the sports. The sports committee has arranged a very interesting list of events and they will undoubtedly prove popular. Most of the sports will be held on Main street in front of the park. A number of new features have been added to this part of the program.

Next comes the ball game which will be played for a purse of \$100. After the game another band concert will take place in the park.

One of the big attractions of the celebration will be the pavilion dance which will be held Friday and Saturday evenings, July 3 and 4. For both evenings Allen's Metro-nome orchestra of Lewiston will furnish music. The pavilion will be built in the park and will be large enough to accommodate a big crowd.

All day and in the evening there will be picture shows with a change of program, so that the movie fans may put in most of the day in the theater if they so desire.

The business men of the town have donated liberally to put on this celebration. There will be no graft connected with it, the whole idea of the occasion being to make it an event where everyone may have a happy day, full of enjoyment.

The concessions committee report that all concessions have been sold out. The number was limited so that this feature would not be overdone.

Considerable interest is being taken in the parade, which is under the direction of A. Wilmot. Everyone in the Potlatch country is urged to enter a float of some kind, either comic or otherwise. If you have a good stunt, bring it in and join the procession which

Band Concert Tomorrow Night

Everybody is Cordially Invited to Attend

The business men of Kendrick extend a most cordial invitation to everyone in the surrounding country to be present at the band concert to be held in the park tomorrow evening. The concert will start promptly at 7:30 and will last an hour.

It is hoped a big crowd will attend Saturday night as these concerts make it possible for the people of the Potlatch country to get together and visit for a short time and renew acquaintances.

In addition to the regular band music the male quartet will furnish a few numbers on the program. This will prove a popular feature along with the regular band concert.

It has been arranged that the concert will in no way conflict with the picture show as the management of the theatre states that the show will start immediately after the concert program.

Following is the program that will be given tomorrow night:

- Frat. - March - Barth
- Sweet Sounds, Waltz - Jenkins
- Old Folks at Home - Jenkins
- Hawaiian Love Song, Male Quartet
- Twilight Echoes, Intermezza, Miller
- Enerprizer, March, Lampe
- Freedom, Grand March, Jenkins
- Kentucky Babe, Male Quartet
- Sweet Recollections, Waltz, Collins
- New Colonial, March, Hall
- Star Spangled Baner.

Big Sunday School Rally

The annual Rally of all the Sunday schools of the Potlatch country will be held at Juliaetta on Sunday, June 21. The program will begin at 10 a. m., and continue all day. At noon a basket lunch will be enjoyed. The Kendrick Band will be present and furnish music for the occasion. Each Sunday school represented is expected to prepare a number for the program. In past years this rally has been very profitable, and this year it is hoped to make it the most successful of all.

Everyone is cordially invited. Come, bring your basket lunches and enjoy the services. Remember the place, Juliaetta Park.

Secured Good Music

George Barnum, chairman of the committee in charge of the pavilion dance to be held here the nights of the 3rd and 4th of July, stated Tuesday that he had secured one of Prof. Allen's Metro-nome orchestras for these two dances. The dances will be held under the auspices of the Kendrick Fourth of July committee. The pavilion will be built in the town park.

Grading Soon Finished

County Commissioner Walker stated Tuesday that the grading on the road between Kendrick and Juliaetta would be practically finished this week. It is a first class job and a vast improvement over the old road. The roadbed is 24 feet wide and is on a grade not to exceed five percent in the steepest place. Mr. Walker has made this section of road according to state highway specifications. When this seven-eighths of a mile is surfaced the two towns will be connected with a standard highway.

will leave the old Standard lumber building back of the postoffice, promptly at 10 o'clock.

Watch for the program of the day which will be published in next week's Gazette.

MARY PICKEFORD

News Paragraphs From Leland

By Special Correspondent to the Gazette

Work has been started on the road east of town. The rock crusher has been put into operation and approximately 1200 yards of rock will be crushed and put on the roads, extending the surfacing about a mile. The work is being done by local men and considering the state of this same stretch of road all last winter, we are all glad to see this done. It is surely a much needed improvement. Commissioner May is neglecting his own farm work to help put this project thru at this time and many local men are also putting these days in the work, when their farm work is urgently calling them.

The community picnic last Thursday was well attended and everybody had a good time. We wish to heartily thank the Kendrick Band for the splendid program they rendered, as well as their presence among us and also all others who attended from outside districts. There was a good ball game between Juliaetta and the home boys, a program by the local Sunday school and the Misses Bell of Kendrick sang a duet. Rev. Martin of Orofino spoke on the "Young Life of the Community". There was the usual round of races.

Donald and Herbert Goudzward left last Friday morning to attend the Summer Military Academy training at Fort Wright.

R. B. Parks and son, Harold, were visitors in Lewiston, Tuesday. Harold's eye is rapidly improving.

Prof. and Mrs. Gillespie and daughter, Opal, and son, Earl, left last Monday for Seattle where the Professor will attend the summer term at the university.

Mrs. R. B. Parks left last week for Oregon where she was called by the illness of her father. She was accompanied by her sister from Colfax.

Rev. Tuber and family went to Lewiston, Tuesday, to take the girls to visit their grand parents for a short time.

Rev. J. A. McKee will preach at the Leland church, Sunday morning in the interest of Sunday school work. In the afternoon a program at Juliaetta will be given. Everybody is urged to attend both sessions.

Orofino Plays Here Sunday

One of the best baseball games of the season is scheduled to take place here Sunday afternoon when the fast Orofino team comes over to seek revenge for the defeat they suffered last Sunday on their home grounds. A. E. Wilcox, manager of the Orofino aggregation, cherishes a fond dream that he can walk away with the big end of the score in this game. He has in prospect a sad awakening. Come and see it.

"What do you think of an artist who paints cobwebs on a ceiling so naturally that the hired girl wore herself into an attack of nervous prostration trying to sweep them down?" Well, there may have been such an artist, but was there ever such a girl?—Swiped.

Lewiston Talks Potlatch Road

To Circulate Petition Among Taxpayers

The matter of building the highway from Arrow Junction to the Latah county line and the completion and surfacing of the Lewis and Clark road from a point west of the Spalding road to Arrow Junction will be submitted to the taxpayers and residents of the Lewiston highway district, says the Tribune. This improvement has been under consideration for the past three years and recently a survey was made by Engineer C. C. Van Arsdol, showing the cost of the proposed improvements will be in the neighborhood of \$40,000.

The proposed construction will not only serve the entire upper Clearwater section by the improvement between the Spalding bridge and Arrow Junction but it will tap the Juliaetta and Kendrick sections and the rich farming communities beyond.

During the past few months, a number of delegations have visited Lewiston from points beyond Kendrick. These delegations have represented the farming communities that contemplate highway improvements and want to spend their money to get an outlet to Lewiston in the event the highway between the Latah county line and the North and South highway at the Spalding bridge, is improved. Latah county has improved the road from a point above Kendrick to the Latah-Nez Perce counties' line and the small link in Nez Perce county is all that remains to open a large empire to Lewiston as a trade center.

The road proposed for improvement lies in the Clearwater highway district and this district is without funds with which to make the desired improvement. The district bonded itself to the limit and used the funds for the construction of the Lewis and Clark highway from a point near the Spalding bridge to the Clearwater county line above Peck.

It is explained Nez Perce County is no better able to finance the desired improvement than the Clearwater highway district and if the improvement is to be made, the financing must come from the Lewiston highway district.

This is a matter that will be placed before the taxpayers and residents of the district by the Commercial club committee composed of C. F. Bennett, Charles E. Parker and Sam C. Skillern. The Commercial club has been asked to organize and direct the campaign, the request coming from business men who are acquainted with the country to be developed and the possibilities of bringing a large territory to Lewiston as a trading point in the event a good highway is constructed.

The commissioners of the highway district are deeply interested in the proposed improvement and have indicated a willingness to participate in the improvement in the event the taxpayers of the district indicate a desire to have the Lewiston district take such action. The petition to be circulated is intended to secure an expression of the people of the district but those who are familiar with the project and the possibility of opening a new territory to Lewiston as a trading point in the event a good highway is constructed.

OPPORTUNITY

If an opportunity presented itself now would I be in a position, financially, to take advantage of it to the fullest extent?

Am I saving now for the opportunities of the future?

You alone can answer both of these questions.

Opportunity knocks more often than once, but unless answered, the raps become less distinct.

The man or woman with a Savings Account and who adds to it consistently need not worry about the uncertainties of the future. Savings and thrift lead only to the path of success.

Entered at the post office at Kendrick as second class mail matter.

The husband: A wise husband makes up his wife's mind before he makes up his own.

"What kind of a store is that fellow over at Toad Rock running?" asked a motorist. "Well, he has Ford parts for sale," replied the attendant in the filling station at Ten Degrees, "buys butter, eggs, poultry, deals in real estate, paints houses, marries folks in his capacity as justice of the peace, runs the post office, sells stamps, hams, molasses, so forth, takes boarders upstairs. I reckon you'd call it a drug store."

Governor Paulen of Kansas said: "The greatest thrill in my life came from turning over sod with a plow." Probably some ambitious politician in these parts will be saying that the sweetest music he ever heard was the squirting of the milk in the pail. There are plenty of Potlatchers who would feel like mobbing him if he did.

These days if a man is susceptible to painter's colic he should kiss his girl on the back of the neck.

Some bright paragrapher whose identity has been lost, makes this comparison: How times have changed is illustrated by the comment of the man who said: "In the old days if anybody missed a stage coach he was content to wait 2 or 3 days for the next. Now he lets out a squawk if he misses one section of a revolving door."—Exchange.

The man who does not advertise has been aptly likened to a parasite. He is a man who is content to let some more enterprising business man draw the people to town to trade, and then absorb business from their efforts. The advertiser in certain lines gets the crowd to town, when all lines of business will receive part of the patronage. If a customer is induced to come to town by seeing bargains advertised in one line, he will naturally take the occasion to purchase what he needs in other lines whether they are advertised or not. A parasite is one who lives on the efforts of another, one of the greatest parasites is the man who does not advertise.—Borrowed.

You can't lay down a set of rules by which a man can make a lot of money. The rules of honesty are few, simple, perfectly clear. Every man knows in his own heart whether his deeds are worthy of commendation or not—that is the only commendation that is worth while. No man can do a thing which is morally dishonest, then really fool himself into thinking that he has done the right thing. He may be able to convince himself in the daytime that he is on the square. At night—when he is all alone with himself, his conscience—he knows the truth. If he wants to do the right thing he needs no better guide than his own conscience.—Exchange.

"Look here, teacher, what daddy gave me," said a little girl, while proudly exhibiting some trivial gift. "Your daddy is a dear, isn't he?" asked the teacher. "Well, I don't know just what kind of an animal he is," said the little girl. "You say he is a dear; daddy says he is an Elk, mamma says he's a bear."

SOUTHWICK NEWS

Tom King and Ivory King, who have been visiting with relatives here for the past two weeks, left for their home in Seattle, Saturday. They were accompanied by Ivory's mother, Mrs. J. R. King and her grand-daughter, Rowena Rossell, who will visit them until after the 4th or July before returning home.

H. A. Russell returned home from Arizona, Sunday, where he has been since last fall.

Nelson McCall and family of Caldwell visited with his niece,

Mrs. Harold Whiting, last week.

Mrs. John Melver spent last week with her brother, Ben McCoy and family.

Mrs. George Jones and daughter spent the day Sunday with Mrs. Arthur Locke in Leland.

Wm. Henderson family motored to Clarkston and back last Thursday.

Mrs. C. E. Hewitt and Mr. and Mrs. John Phillips drove to Clarkston last Friday, returning home Sunday.

Mr. and Mrs. Jake Berriman were visiting at the B. E. Tupper home in Clarkston, Sunday.

Alonzo Douglas left last Friday for Hillsboro, Oregon, where he will visit for a while with his sister, Mrs. Marie Thomas.

Grandpa Bateman, who is seriously ill at his home, is reported as being no better.

Mrs. Harry Smith of Leland visited with her parents, Mr. and Mrs. Ben McCoy from Friday until Sunday.

Mrs. Chas. Hayward and daughter, Clara, went to Elk River, Tuesday evening, where they will visit with Mrs. Hayward's son, Cecil, and wife for a week.

There are a number of whooping cough cases reported in and around town.

Asa Calvert left for Lewiston, Monday, where he will attend summer normal.

Mrs. Luce of Myrtle is visiting her sister, Mrs. Calvert.

Born, Thursday, June 11, to Mr. and Mrs. Ben Presnal, a seven pound girl.

Mrs. Blanche Frank and son, Herman Smith, are visiting with relatives in town.

Miss Nadine McCoy spent Sunday as the guest of Miss Verla Thornton.

Mrs. E. M. Locke went to Leland, Tuesday evening, where she will visit with her daughter, Mrs. Jim Cook.

Mrs. Wells spent Monday at the home of John Stalnaker.

POULTRY

DUCK RAISING IS WORTH CONSIDERING

The average farm has all the facilities which are necessary for the raising of a goodly number of ducks and with a little outlay may add considerably to the farm income from that source.

Duck raising in some sections of the country has become a greatly specialized industry. It is hardly advisable for the average person to go into it extensively, at least not until he has become acquainted with handling ducks on a smaller scale. However, ducks do afford a side line to the regular poultry business of the farm that is worthy of the consideration of the average person.

The houses which are needed for ducks are simple affairs. They are plain and comfortable and need very little furnishings. Generally on every farm there is a small shed or building that can be used for this purpose. Warmth is not essential to the extent that is necessary with hens, but if it is dry and protected it will generally serve the purpose. Ducks should not be closely confined.

Artificial incubation and brooding are used almost entirely by the large producers of ducks, but under most farm conditions the incubation and brooding will be mostly done by hens or by ducks. Before the hens are put on the eggs and again before the ducklings are given to her she should be thoroughly dusted with insecticides. The nest should be watched for lice and treated as may be necessary.

The feed of the ducks in nature is both vegetable and animal. In the wild state they get a great deal of their food along the creeks and marshes. This type of food needs to be limited to some extent. The duck has no crop like the chicken, the food passing directly to the gizzard and as a consequence they are not fitted for

as much hard food as chickens. In fact, a large number of the professional raisers depends largely on soft foods. However, under farm conditions where the ducks have free range the problem is not so difficult and most of the additional feed will be grains. Feed that is adapted to producing growth on chickens will answer the purpose for ducklings without going to the expense and inconvenience of mixing additional rations. The main difference that will be noted by the beginner is that the ducklings make a faster growth and therefore they will consume a larger amount of food.

Sick Fowls Afterwards Are Usually Worthless

When a fowl becomes ailing and emaciated it most often denotes either a tubercular condition or coccidiosis. Such hens, should they recover, are poor layers and are apt to pass their weaknesses to their offspring. Seldom will they get well and fatten to marketable condition, so it is a money-saving method to kill and burn their carcasses.

As the majority of poultry diseases are contagious, retaining such birds menaces the present health of the flock, as well as the vigor of future ones. Often one sees an emaciated hen walking stiff-legged about a henhouse. Such birds almost always die without human aid, but while alive very likely infect other fowls as well as the yard where the remainder of the flock runs. Whole flocks are often devastated through the owner's neglect of destroying worthless individual hens.

If flock owners realized that through ignoring such present menaces they are inviting weakly flocks in ensuing years, more importance would be placed on the necessity for immediately killing and burning hens or growing stock that becomes ailing, especially those which get decidedly poor in flesh, an almost unfailing tubercular indication.

"War Map" Shows Extent of Bovine Tuberculosis

(Prepared by the United States Department of Agriculture.)

Proceeding on the principle that one can fight an enemy best if he knows the enemy's position and strength, the United States Department of Agriculture has issued a map-poster showing the extent of bovine tuberculosis in the country. The map is the central feature, but the poster also contains explanatory matter and figures showing the degree of infection in various parts of the country. Six different intensities of shading enable any person to see how the county in which he lives compares with others in his state and in other states with respect to the prevalence of cattle tuberculosis.

An encouraging feature of the nation-wide campaign to eradicate the disease is the conspicuous appearance on the map of "modified accredited areas." These appear as white spots against tinted and red backgrounds and represent the numerous counties which have reduced tuberculous infection among cattle to less than half of one per cent.

The combination poster and map is largely for the guidance of veterinarians and sanitary officials engaged in the work of eradication, but it is an illuminating presentation of the subject for live-stock owners also. Officials of the bureau of animal industry suggest that every live-stock association should have a copy of this "war map" against the disease as a guide in the purchase of breeding stock when its health status is not otherwise known. The poster measures 20 by 25 inches, is printed in red and black and may be obtained free on application to the United States Department of Agriculture, Washington, D. C.

DAIRY

DAIRY FEEDS MUST BE DIGESTIBLE

It is not what a cow eats, but what she digests that counts. You might feed a cow wood, as chemical analysis shows that wood has a high percentage of carbohydrates, but this does not do the cow any good because she cannot digest it. Protein is found abundantly in tankage, feathers and other substances, but these substances are not fitted to the cow's digestive system and are, therefore, useless as a dairy ration, points out B. E. Goodale, associate professor of dairying, at Clemson College.

Take corn for example, a cow will digest 75 pounds out of every 100 pounds of corn, but only 33 pounds out of 100 pounds of cottonseed hulls. That means that 67 per cent of the cottonseed hulls fed to a cow is wasted. These figures also vary according to the different nutrients. Of the protein in oat hulls, only 50 per cent is digestible, while in linseed meal, cottonseed meal, and gluten feed, 85 to 89 per cent of the protein will be digested by the cow.

This all goes to show, says Mr. Goodale, that the crude analysis that you will find printed on the tags attached to feed bags may be misleading. A cow can't read a tag and she is the one that has to digest the feed. It is, therefore, up to you to supply her with the right kind of materials to keep her machine working at maximum efficiency.

It stands to reason that the more a cow digests, the more she can produce in the way of milk, so it is up to us to find out how we can help the cow digest her feed and what kind of feed provide the materials needed for milk.

Nearly everyone knows that a ration should be bulky so that it is sure to go into the first stomach and be rechewed as cud.

Then a feed must be palatable. You wouldn't eat a very big meal if you sat down to a pot of cold, boiled potatoes without salt or butter, but if you sat down to a nice juicy steak with appetizing gravy, sauces, vegetables, and desserts, you would eat a hearty meal.

It is just the same with a cow. She digests a palatable feed much better than one she doesn't relish. This is an important point, because the milk flow depends largely upon the quantity of feed eaten. The average cow needs about sixteen pounds of digestible nutrients a day, to maintain her body and produce three and one-half gallons of milk. Half of this sixteen pounds goes for body maintenance and half for milk.

If a cow doesn't like her feed, she will consume less and the digestive juices are held back. Palatability is a big aid to digestion.

Heifer on Thin Pasture Needs Supply of Grain

Herds of cattle, some handled in the right way and some handled in the wrong way, have been noticed by L. V. Wilson of the division of dairy husbandry at University farm, St. Paul, Minn., in visiting farms in the vicinity of the twin cities recently.

The young cattle in some of these herds, says Mr. Wilson, are turned out on the theory that they will pick up on pasture and look pretty good in a few weeks. Their owners fail to realize that while they are "picking up" their growth is really being retarded.

The young cattle in other herds, however, show that the breeders have realized that young heifers must be given the best possible chance during the winter and that they must continue their gains in weight every day when first turned out to pasture. Such gains are assured by adding a little additional grain in the early pasturing days. In this way the inevitable shrinkage which comes to animals when only access to grass is given is avoided.

Dairy Notes

As each cow's milking is weighed, a glance up the columns will tell how she compares with the rest.

It is impossible to fatten calves for butchers on silage without some kind of supplementary feed such as cottonseed cake or corn.

Ground oats are considered especially valuable for bulls. Cottonseed meal is not usually regarded with favor, especially when fed in large amounts. Some breeders think it causes impotency.

Cows are better natured and better producers when furnished a variety of feed.

The government reports state that there are only about 86 per cent as many cattle on feed in the eleven corn-belt states as there were last year at this time.

Potato growers who have dairy cows and who make a practice of feeding small and otherwise unmarketable tubers, have found cull potatoes a valuable addition to the dairy ration.

Tonight and Saturday

A Wonderful Story of Life

Once in a long while a drama springs from life; a drama that teaches something, yet retains by its very truthfulness the pleasure and entertainment for which it was conceived.

Have You a Secret?

There are many things that happen after the wedding bells have chimed; little things, and the greater ones, too, that the wife and husband know. Things that may make you happy or that cause a heartache. We all have have experienced them.

Norma

Seldom a drama that touches the soul as this, seldom a story so truthfully tells what every wife, every husband, every sweetheart must learn. Wives will take courage from this glimpse into marriage, husbands will love their wives more and sweethearts will find anew their undying devotion. You'll be happier for seeing it; you know life so much better. This is a greater picture than "Smilin' Thru," and one that you cannot afford to miss.

Don't miss the Open Air Concert at Kendrick Park Saturday evening from 7:30 to 8:30, consisting of selections by the band, vocal and instrumental solos and duets. You will be able to see the entire show after the concert. Don't miss it.

GUESTS: Tonight E. A. Deobald } Please call at ticket office for complimentary tickets
Saturday, Frank Roberts }

BUILDING FOR CALF IS BIG ESSENTIAL

Economical commercial dairying demands that the dairy calves be raised by hand rather than by nursing their mother. This fact makes it necessary to provide a place to keep the young calves while being fed milk, says Prof. J. P. LaMaster, chief of the dairy division, Clemson college, who suggests that the essentials for such quarters are: (1) that they can be easily cleaned; (2) provided with an abundance of sunlight; (3) properly drained, so as to prevent any surface water from entering, or from becoming damp from any cause; and (4) an arrangement which will permit the feeding and care of the calves with the least amount of labor in quarters that give the calves enough room.

Calves raised on skim milk in practically every case develop the habit of sucking one another's ears, navels, and udders immediately after being fed milk. This habit often results in the udders being misshapen, or entirely blind in one or more quarters when the heifer comes in milk. If this habit was limited to the period just after feeding milk, the difficulty could be overcome by keeping the calves in stanchions for 30 minutes or more after each feeding; but during the day, when the young calves

become hungry, they will start sucking again.

To prevent this trouble each calf should have a small pen of its own. This is not as hard to provide as might seem. A long pen six or seven feet wide can be divided into pens by placing gates across at proper distances, depending on the number of calves on hand and the space available. To make it easy to get the calves in and out of the pens and to clean the pens, these gates may be fitted with a cord in the center which passes over a small pulley overhead, and with a weight attached on the other end heavy enough to balance the gate. This will allow the gate to be raised overhead out of the way when not needed. The gate should be fitted into grooves at each end formed by using a 2 by 4-inch upright and 1 by 3-inch slats nailed on each side to form the slot. Such an arrangement is inexpensive and makes a safe and convenient pen for young calves.

Breeds of dairy cattle vary in their origin, size, color, and in the quantity and quality of the milk they produce. Successful dairymen and cow buyers insist upon cows which represent some one of the distinct dairy breeds, the choice being largely a matter of personal preference.

Modish Dinner Gown

One-piece dinner gown of black Spanish lace over black satin, having a band of silver-thread lace trimming the front of the gown and two bands forming a border at the hem-line; sash of black moire ribbon. Posed by Josie Sedgwick, Universal star.

POULTRY

COMFORTABLE HENS ALWAYS LAY WELL

Do everything you can to make your hens comfortable. If their health and vitality are kept at the highest level, it will add many eggs to your basket. If your hens are worried by lice and mites, then they cannot lay the maximum number of eggs. An ounce of prevention just now is worth a pound of cure later on.

This is good poultry gospel, according to D. H. Hall, extension poultry specialist, who warns us that with the warm weather coming on we will have more trouble with lice and mites than we had during the cooler months, and that everybody should take extra precaution at this time of the year to get rid of these parasites.

Mites can be controlled by spraying the house with whitewash to which has been added enough disinfectant to make a 5 per cent solution. A good coal-tar product, such as creosote or taroleum, may be used as a disinfectant. Carbolic acid is also good. In spraying the house be sure to spray every square inch of surface. If you miss a few mites, then you will have a multitude to deal with the following week. It is also a good idea to paint the perch poles with a mixture of equal parts of kerosene and used engine oil.

Lice are found on the individual hens. They spend their entire life on the body, laying their eggs and sticking them to the feathers in small colonies. They can be found in the fluff feathers and under the wings. No hen will go about her business of producing eggs with any degree of efficiency with lice covering her body. The best method of getting rid of lice is by dusting with a good insect powder. Sodium fluoride is a good parasite killer. Take a pinch of sodium fluoride and dust it into the fluff feathers, under each wing, on the neck, back and body of the fowl. Work the powder down into the feathers to the skin. Another good powder can be made from one pound of snuff and one-half pound of sulphur mixed with one gallon of road dust or ashes. It is a good idea to build a dust box and allow each hen to dust herself.

Look over the hens in about ten days to see if all the lice were killed, and if necessary give them another good dusting.

Breed Dairy Cows for Late Fall Freshening

Dairymen who can successfully practice a system whereby their cows will freshen during the early winter months almost invariably make a greater net return and find that the cow's production holds up longer, as when spring grass comes the milk flow is stimulated after three or four months of winter production.

In addition the price of butterfat is increased during these months, which is an added inducement for early winter freshening.

The fact that most farmers have more time at their disposal during the winter than during the growing season constitutes the third important reason for having the cows freshen during the late fall and early winter months. H. R. Luscilles, Colorado State Dairy Commissioner.

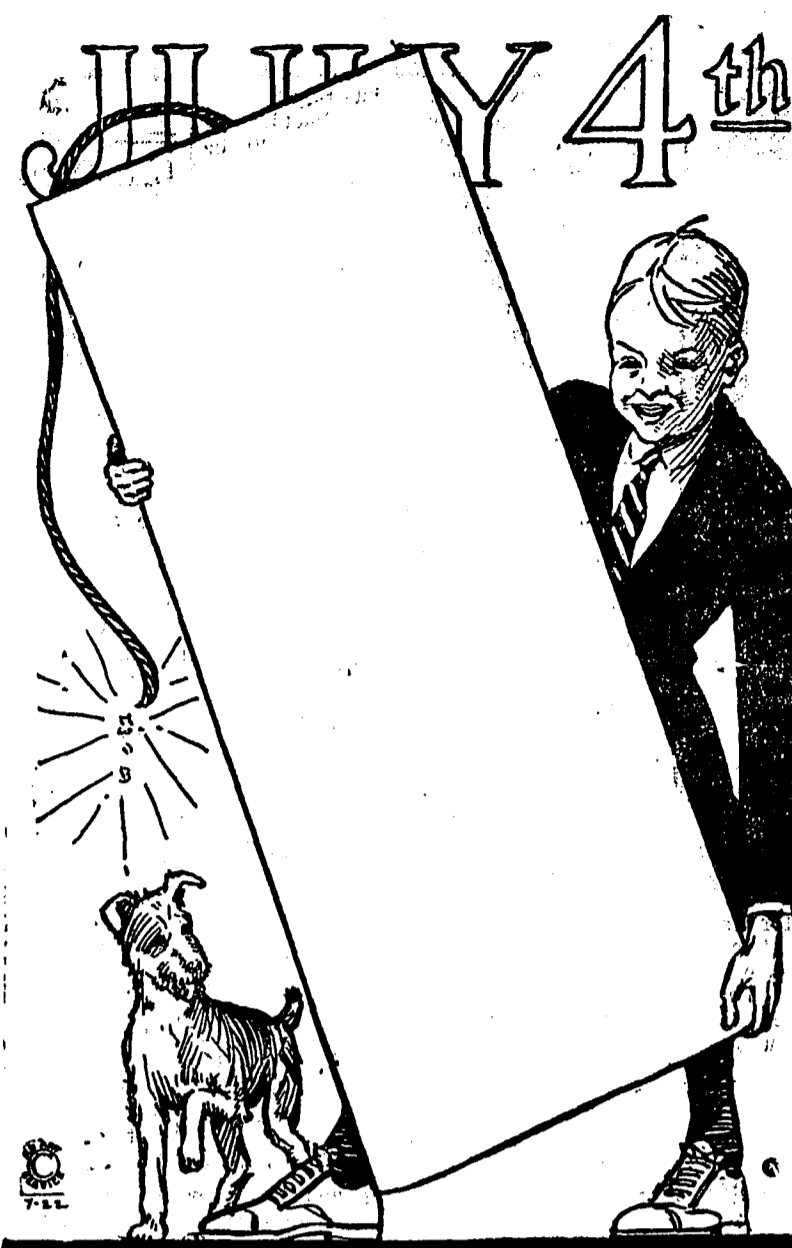

Calf Needs Colostrum

All calves should have an opportunity to suck their dams at least two or three times because, as dairymen well know, the first milk, or colostrum, is necessary for the new-born calf in order to clean out its bowels. This milk seems to be laxative; nature has made it so for a specific purpose and that is why a calf should suck its dam for at least a day or two. After that it is best to resort to hand feeding. As a general rule, start by feeding the calf one pound of milk for each ten pounds of its weight.

Ostrich Feathers Latest Trimming for Evening Wear

Evening costume consisting of gown of rose chiffon trimmed with girde and hem-line banding of pink ostrich feathers, and double tiered cape of rose chiffon having full collar of feathers. Worn by Mary Astor, playing opposite Reginald Denny in Universal's production of Harry Leon Wilson's story, "Oh, Doctor."

Yellowstone Geysers and Bears Are More Frolicsome Than Ever

Yellowstone National Park opened on June 18th this year, two days earlier than ever before, to accommodate the tourist hundreds already in the West who desired to begin their trips through this wonderland as early as possible. Superintendent Horace M. Albright in a communication to A. B. Smith, passenger traffic manager of the Northern Pacific railway, stated that both geysers and bears are more playful than ever. Mr. Smith said that the volume of inquiries from prospective travelers indicates a big tourist season. Conservative estimates places the total number of Yellowstone visitors at 180,000 this year against 144,100 in 1924. Upper picture shows a mother bear and her two cubs welcoming one of the first motor parties over Yellowstone trails this year. Lower picture is of the first party of tourists to leave Gardiner gateway for the tour of the Park.

NOTICE TO CONTRACTORS.
 Sealed bids will be received at
 the office of the Clerk of the Board of
 County Commissioners of Latah
 County, at Moscow, Idaho, until ten
 o'clock A. M., June 22, 1925, and then
 opened, for the following improve-
 ments, the enlargement of the pres-
 ent courthouse vault and other im-
 provements, as are shown on the
 plans and specifications for the im-
 provements, now on file with the
 Clerk of the Board of County Com-
 missioners, of Latah County, Idaho.
 Each bid must be accompanied by
 a certified check, payable to the
 County of Latah, for five per cent of
 the amount of the bid.
 The right is reserved to reject any
 and all bids.
 If on acceptance of the bid the
 bidder fails and neglects within ten
 days from such acceptance, to enter
 into a contract and furnish the neces-
 sary bond, the certified check will be
 forfeited and the proceeds paid into
 the current expense fund of Latah
 County. The check of all unsuccess-
 ful bidders, after the contract is
 entered into, and the bond given,
 will be returned.
 By Order of the Board of County
 Commissioners of Latah County,
 Idaho.
HARRY A. THATCHER, Clerk.

Much Lamb Loss Is Due to Mistakes in Feeds
 Lamb losses in this state are largely
 due to errors in feeding, and mostly
 by the lack of appropriate feeds for
 the ewe before lambing and for both
 the ewe and lamb after lambing.
 "Ewes that come through the winter
 in poor flesh can't raise a strong
 thrifty lamb. This is too evident to
 need data to certify it," says G. P.
 Williams, sheep extension specialist
 for the North Carolina State College
 of Agriculture. "This condition is
 proved beyond doubt by the fact that
 lambs arriving after grass starts grow
 off promptly. Ewes that eke out the
 winter on hays of the meanest kinds
 and on cottonseed hulls or that graze
 the stark, weatherbeaten landscape
 can score no success at lambing time.
 "Much of the lamb losses attributed
 to cold weather is in fact due to a
 badly nourished and thin ewe and to
 a weak lamb that can't help being
 weak and flimsy under such circum-
 stances. The foundation of success
 with ewes at lambing time rests on
 proper feeding through the winter
 coupled with outside exercise on range
 sufficient to keep the bodily processes
 strong and vigorous."
 A dairyman who began to weigh the
 milk from his cows, and to keep a
 record of each milking, found that the
 cow he thought was the poorest in his
 herd gave next to the highest yield.

 es of Edna F. Fenimore, deceased,
 and all unknown owners of and
 claimants of Lot 1, Sec. 3, Twp. 42
 N., R. 5 W. B. M., save and except
 strip 10 rods wide off north end of
 said lot, all in Latah County, Idaho,
 Defendants.

The State of Idaho Sends Greet-
 ings To the above named defend-
 ants:
 You are hereby notified that a
 complaint has been filed against you
 in the District Court of the Second
 Judicial District of the State of
 Idaho, in and for the County of
 Latah, by the above named plaintiff,
 the nature and general terms of
 which is to require each and all of
 the above named defendants to ap-
 pear in the above entitled cause and
 to set forth any right, title or inter-
 est that said defendants or either
 of them may have or pretend to
 have in and to the above described
 real estate, and to quiet the title
 thereto in the name of the plaintiff;
 And you are hereby directed to
 appear and answer the said Com-
 plaint within twenty days of the
 service of this summons, if served
 within said Judicial District, and
 within forty days if served else-
 where; and you are further notified
 that unless you so appear and an-
 swer said Complaint within the
 time herein specified, the plaintiff
 will take judgement against you as
 prayed in said Complaint.

Witness my hand and seal of said
 District Court, this 14 day of May,
 1925.

HARRY HATCHER,
 Clerk of said District Court.
 By **ADRIAN NELSON,**
 Deputy Clerk.

(Seal of Court Affixed)
F. C. Keane, attorney for plain-
 tiff, residing at Moscow, Idaho.

STONY POINT

Haying and bean planting are the
 chief industries in our locality.
 Mr. and Mrs. Ike Steensma visit-
 ed relatives on Texas ridge, Sun-
 day.

Mr. and Mrs. Cletis Hoisington
 went to Clarkston, Sunday, for
 cherries.

Albert Beckman of Cottonwood
 creek was a business visitor at the
 Frank Hoisington home, Saturday.

George Dygert returned to the
 section work this week after a 3
 weeks illness from an attack of flu
 and pneumonia.

Mrs. Carl Rietz is visiting at the
 Will Schetzle home this week.

John and Herman Dushman of
 Lewiston were visitors, Tuesday, at
 the home of Dygert Bros.

Dan Smith is helping Bill Zum-
 hofe put up hay this week.

John Dushman is helping Clarence
 Dygert stack hay this week.

Mr. and Mrs. Cletis Hoisington
 were callers at the Leonard Fair-
 field home, Tuesday evening.

Francis Sweeney of Genesee was
 a visitor at the home of Dygert
 Bros., Tuesday.

BIG BEAR RIDGE

Mr. and Mrs. Bob Riggins of
 Clarkston, were week end guests at
 the J. Bramblet home.

Miss Helen Slind entertained the
 Girls Sewing Club, Thursday after-
 noon of last week.

Mrs. Dewitt Penland and child-
 ren of Orofino and Mrs. Garrison of
 Juliaetta spent Tuesday at the
 Kleth home.

A. W. Jones and daughters, Opal
 and Lizzie, were Lewiston visitors,
 Monday.

Several of the young people
 motored to Orofino, Sunday, to see
 the ball game.

Mrs. Bramblet of Spokane is here
 to spend the summer at the home
 of her son, J. Bramblet.

Mr. and Mrs. H. Lien and Mr. and
 Mrs. Z. Aas and family spent Sun-
 day with relatives and friends in
 Deary.

Mrs. Carrie Hooker who has been
 quite ill, is some better now.

Mrs. F. Whitcomb and Mrs. R.
 Clemehusen and little daughter,
 Violet, arrived here Monday, from

Roseburg, Oregon, where they have
 been staying the past few months.

Miss Christine Torstad returned
 to her work in Spokane, Friday.

The Ladies Guild met with Mrs.
 Otis Gentry, Wednesday afternoon.

Mr. and Mrs. Wallace Emmett
 and sons, and Mrs. Wade Keene
 motored to Spokane the first of the
 week.

LIVE STOCK

SEPARATED MILK IN RATION FOR SWINE

The Michigan experiment station
 has recently reported an interesting
 experiment in growing pigs on corn
 and water as compared to corn and
 separated milk. Two pigs that got
 milk gained 221 pounds each in five
 months. Those on corn and water
 gained only 9.5 pounds.

At the end of five months the milk-
 fed pigs were marketed and the two
 stunted pigs put in separate pens. Pig
 No. 4 got shelled corn, water and a
 good mineral mixture. Pig No. 3 got
 corn and separated milk and though
 he only weighed 43 pounds at seven
 months old, weighed 350 pounds at a
 year old, a gain of 307 pounds. No. 4
 gained only 28 pounds, weighing 76
 pounds at one year. Then No. 3 was
 marketed and No. 4 got separated
 milk and corn for five months. At the
 end of this time he had gained 274
 pounds, weighing 350 pounds, show-
 ing that separated milk can bring out
 even a stunted pig to make good gains.
 The gains with separated milk cost
 6.7 cents per pound, with skim milk
 at 35 cents per 100 pounds. Gains
 without milk cost 19.7 to 39 cents per
 pound.

Although separated milk contains
 valuable mineral matter, this was evi-
 dently not what was lacking in the
 corn. The main deficiency was in pro-
 tein and in the growth-promoting vita-
 mines, both of which were supplied
 abundantly by the separated milk.
 Many people try to feed pigs on corn
 alone, while others who have dairy
 cows separate the milk and throw the
 skim milk away. Both are mak-
 ing a serious mistake. If separated
 milk is not available one should use
 alfalfa pasture, tankage or some other
 protein supplement along with corn.

Some will say that they get better
 results on corn alone than were ob-
 tained by the Michigan station. This
 is probably true where pigs are get-
 ting some grass or weeds to supply
 them with mineral matter and vita-
 mines and with some of the supplere-
 mentary proteins. The main thing to
 remember is that corn is not a com-
 plete feed for growing animals.

Separated milk should be consid-
 ered as a supplementary feed, not as
 a complete feed in itself. Where fed
 in moderate quantities, 2 or 3 pounds
 of separated milk may take the place
 of 1 pound of corn. In large amounts
 8 or 10 pounds of milk equal to
 1 pound of corn. A good rule is to
 count 100 pounds of separated milk
 worth half the price of corn per bush-
 el.—Chas. I. Bray, Colorado Agricul-
 tural college.

Salt Supply for Stock

Is of Great Importance
 Without giving much thought as to
 why they do so, most farmers provide
 salt for their live stock. They know
 that cows will become "salt hungry."
 If not well supplied with salt regu-
 larly.
 Denied salt, normal growth, health,
 general thrift and production either
 cease entirely or are sadly impaired.
 Carefully conducted experiments have
 proved this to be true. Salt is an es-
 sential as good feed and pure water.

Most farm crops and mill feeds are
 very low in the element chlorine, the
 very element that common salt sup-
 plies cheaply, abundantly and in read-
 ily available form. The main use of
 salt is to supply chlorine that is re-
 quired to make the hydrochloric acid
 found in the digestive juice of the
 cow's stomach, and without which that
 organ cannot properly perform its di-
 gestive function. Diminished milk
 flow and generally impaired physical
 condition soon follow if salt is not in-
 cluded in the ration.

It is sometimes customary to add
 salt to the grain mixture at the rate
 of one pound salt to 100 pounds grain.
 This, however, is not enough to pro-
 vide the requirements for all purposes.
 Whether fed in the grain mixture or
 not, additional salt should be available
 at all times in the barn lots and pas-
 tures. This may be provided in the
 form of rock salt or salt blocks. It
 is advisable to keep this outside sup-
 ply protected in some way from the
 weather. A common practice is to
 keep common feeding salt in a covered
 box, where the cattle may have access
 to it at all times.

Dairy Hints

Cows do not enjoy moldy silage,
 and it makes horses sick.

Maybe scrub bulls got that name be-
 cause they keep the bank account
 cleaned out.

Breeding, feeding, and general man-
 agement of the dairy herd are the
 three fundamental factors to be con-
 sidered in making dairying profitable.

DAIRY FACTS

DAIRY SIRE OFTEN BADLY NEGLECTED

The dairy sire is often the most
 neglected animal on the farm. There
 are two factors which are largely re-
 sponsible for this condition. First, the
 average farmer has not been con-
 vinced of the important place which
 the well-bred sire holds in building up
 the production of the herd. Although
 the bull represents 60 per cent of the
 future herd he often receives less than
 50 per cent of the care he deserves
 from his owner. On many farms the
 bull is required to stay most of the
 time during the winter months in a
 dark, damp stall without sufficient
 space for proper exercise, and is fed
 largely on cottonseed meal and low-
 grade roughage. Such treatment not
 only reduces the vigor of the bull, but
 often results in either temporary or
 permanent sterility.

The second factor which is partly
 responsible for the poor care which
 the bull receives is his nervous tem-
 perament. This makes it necessary to
 handle him with care to avoid acci-
 dents. The press frequently carries
 reports of persons being injured or
 killed by bulls. Because of such oc-
 currences, dairy bulls have come to be
 looked upon in many cases as neces-
 sary evils. This attitude, coupled with
 a low appreciation of the value of the
 herd sire on the part of the owner, re-
 sults in neglect of such essentials as
 feed, exercise, removal of manure from
 the stables and such other details of
 care that are necessary.

The ration of the bull may be much
 the same as that for the herd. Many
 breeders feed him the regular herd
 grain mixture. However, this is not
 advisable if this mixture contains a
 high percentage of cottonseed meal,
 as many breeders think that it has a
 tendency to cause impotency. A grain
 mixture composed of 300 pounds corn
 meal, 200 pounds wheat bran, 200
 pounds ground oats, and 100 pounds
 soy bean meal is recommended when
 fed with a legume hay. Enough grain
 should be fed to keep the bull in a
 vigorous physical condition, but not
 too fat, which tends to make him slug-
 gish.

The roughage part of the ration
 should be made up of legume hays
 and a small allowance of silage.
 Legume hays are rich in protein and
 mineral matter and are valuable in
 keeping heavily used bulls in condi-
 tion.

Heavy feeding of silage has a ten-
 dency to distend the paunch and make
 the bull less active on his feet. From
 10 to 15 pounds per day can be fed
 with safety.

The daily bull should have plenty of
 good pure water. He should be wa-
 tered at least once per day in the
 winter and twice per day during the
 summer.

The main things to be considered in
 housing the bull are safety in hand-
 ling, comfort and provision for exer-
 cise. His stall should contain an
 abundance of light and be connected
 with a paddock if possible so he can
 exercise at will. When the bull has
 a tendency to be sluggish it is advi-
 sible to place an empty barrel or tree
 stump in the paddock with which he
 can exercise. Where a paddock can-
 not be erected, a good method of giv-
 ing him exercise is to have a heavy
 wire stretched between two stout
 posts. The lead rope from his ring

GLEANINGS

Mr. and Mrs. John F. Waide of Deary were Kendrick visitors last Monday evening.

Mr. and Mrs. Harold Thomas and Phyllis spent the week end in Lewiston with relatives.

Ruth Watson of Tekoa, Wash., is visiting her aunt, Mrs. C. D. Bell.

For Sale: Small steel range at a bargain for quick sale. Mrs. Brammer, Kendrick. 25-1p.

Mr. and Mrs. A. R. Shumaker of Pullman were guests at the Wm. Watts home over the week end.

Mrs. George Leith went to Lapwai last week where she was called by the illness of her sister.

Mr. and Mrs. N. E. Walker, Miss Alberta and Miss Joy and Georgia Bell drove to Lewiston Monday evening.

Wm. Meyer and son, Frank, are building a concrete tire-heating furnace at the rear of the blacksmith shop. The furnace will save time and will eliminate fire risk. Most of the tire resetting is done during the dry summer months and the old way was to build a fire outside to heat the tire, which was more or less dangerous during the extremely dry weather. The steel hinges to be used on the furnace came from an old safe door which went through the fire when Kendrick burned 21 years ago.

Mr. and Mrs. O. E. MacPherson and son, Donald, Miss Nell Ameling and Lester Crocker drove to Lewiston Sunday to spend the day.

Mrs. Fred Braden and little daughter arrived Tuesday to visit at the home of her mother, Mrs. S. P. Callison. Mrs. Braden was a resident of Kendrick several years ago.

Mr. and Mrs. Ralph Knepper entertained the members of the Okoke Kloutchman club last Friday evening at a bridge party in honor of Mr. and Mrs. A. V. Dunkle of Kellogg. A. Wilmut was a guest of the club.

John Galloway of Bear Ridge is driving a new Ford coupe.

Mr. and Mrs. A. K. Carlson and family drove to Spokane, Wednesday, to attend the wedding of Mrs. Carlson's niece.

Don't pass up the band concert at the town park tomorrow night. A special program has been arranged. The concert will start promptly at 7:30, so make it snappy.

Fourteen of the young people of Troy spent Tuesday evening with W. D. McGregor, their former teacher. The evening was spent in music and relating the happenings of by-gone days. The odor of the coffee brought to memory the many pleasant social functions during the two years spent together in the 7th and 8th grades. At midnight they started for home fully decided to return some time before their work begins next September.

The Kendrick male quartet will go to Peck today to take part in the program to be given at the Peck Pioneer Picnic.

The decorating committee for the Kendrick Fourth of July celebration will take orders for flags from each business house in town. The flags are 3x5 feet with a 12 foot staff and socket. They will be placed in front of each business house along Main Street and may be used for any day during the year when it is proper to display the flag. J. G. Gardner and Herman Schupler are the members of the committee who have charge of this work.

The Kendrick park has been made so attractive that three swarms of bees tried to locate there Tuesday. They settled on the trees and were safely hived by W. B. Byrum, local barber, and J. G. Gardner, town marshal. The following day a swarm was located at the rear of Byrne's warehouse. Bees are noted for their industry, so if they are so dead set on locating here it ought to be a sign of busy times ahead.

George Davidson and Walter Biggam left this week for Lewiston. From there they embarked in a gasoline motor boat for a fishing trip up Snake river about 100 miles above Lewiston. This is said to be one of the most scenic trips in the west.

Mr. and Mrs. Theo Riley drove down from Oakesdale this week to look after farming interests here.

It is reported that Mr. and Mrs. Halvor Nelson, former residents of Bear ridge, are seriously ill at a Spokane hospital. Mr. Nelson re-

cently underwent a major operation at Spokane.

Miss Dorothy Stanton now has a position as book-keeper with the local light company.

Mr. and Mrs. Walter Murphy of Los Angeles arrived Wednesday by auto for a brief visit with Mr. Murphy's cousin, Walter McCrea. Mr. and Mrs. Murphy were residents of Kendrick about 19 years ago.

Miss Mannering of Juliaetta is assisting at Pertyman's confectionery.

Martin V. Thomas, president of the Kendrick State Bank, attended the bankers' convention at Lewiston the first of the week.

Merton Pierce of the Deary community has been hauling some extra fine Texas ridge strawberries to Kendrick for shipment to the Lewiston market. He hauls 100 crates or more at a load with his truck.

Mrs. Wm. I. Seeley was taken to a Lewiston hospital Wednesday for treatment.

Mr. and Mrs. J. G. Gardner and little daughter spent the week end in Lewiston with relatives.

Walter McCrea and son, Donald, plan to leave Sunday by auto for Denver, Colorado, where Donald will represent his fraternity as a delegate from Idaho. They will carry a camp outfit with them and expect to tour Yellowstone Park on their way to Denver.

Prof. and Mrs. Strauch and daughter were Moscow visitors Wednesday afternoon.

The Kendrick Band will play at Juliaetta, Sunday, June 21, at the Union Sunday School picnic. A big delegation is planning to attend from here.

H. A. Russell, who spent the winter in Arizona, arrived home last Sunday to look after farming interests here. Mrs. Russell and the little girl remained in Glendale, Arizona, where the family has property interests. Mr. Russell expects to return to Arizona next fall as soon as the cold weather starts.

Unless the second half of the county taxes are paid by tomorrow they will become delinquent.

Mrs. Frank Crocker and daughter, Mrs. Donald Miller and her little son, went to Lenore, Wednesday to visit relatives.

Henry Lien of Bear ridge bought a Ford touring car from the Kendrick Garage Co. this week.

Mr. Gundar of Deary started work in the local barber shop this week. He will continue here as long as the patronage justifies a two-man shop.

Mr. and Mrs. M. B. McConnell and daughter, Jane, went to Lewiston, Tuesday morning. Mr. McConnell attended the bankers' convention which was in session there Tuesday and Wednesday.

Picking and packing cherries has started in Juliaetta this week. While the crop is light there will be a number of carloads shipped from that point this season.

Sheriff's Sale Wednesday

Notices have been posted advertising a sheriff's sale of the personal property of Earl Langdon on Cedar Creek ridge, Wednesday, June 24. This property was advertised to be sold at public auction last March, but the sale was stopped by the Kendrick State Bank. The personal property consists of the usual farm equipment—livestock, farm implements and household goods.

CAMERON ITEMS

The following took dinner at the Wm. McClelland home at Southwick, Sunday: Mr. and Mrs. Frank Wilken and children, Bertna, Walter and Emma Hartung, Mrs. Ida Stoneburner, Wm. Mielke and Walter McCall.

John Wilken and son, Harold, arrived Sunday from Walla Walla. Mr. Wilken will visit a few days before returning, while Harold will spend the vacation months with his uncle, George Wilken.

Mrs. George Ehlers and children were the Sunday dinner guests of Mr. and Mrs. C. Wegner. In the afternoon they motored to Texas ridge to pick strawberries.

Mr. and Mrs. Carl Wegner, Sr. returned from Portland last week, where they attended the commencement exercises at the Dental College. Their son, Arthur was a member of the graduating class.

Gus Blum and Glenn Pikwood of Princeton were the Sunday dinner guests at the Blum home. They came down on Mr. Pikwood's motorcycle, making the trip in three hours. Gus says he likes the job of smoke-chaser real well, especially when there isn't very much smoke to chase.

Rev. and Mrs. Rein, Mrs. Blum and daughter, Minnie, motored to Lewiston, Tuesday afternoon.

Mr. and Mrs. Albert Schultz, Jr., and Mrs. and Mrs. Gus Kruger were

REASON

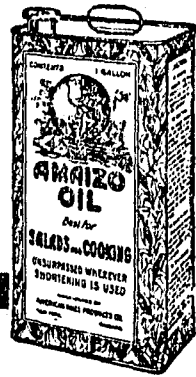

No. One —

Food fried in Amaizo has a crisp, even brown.

AMAIZO

is not a grease—therefore it doesn't make fried foods greasy. That's why

mothers so greatly prefer it.

Lewiston visitors one day last week.

Mr. and Mrs. Aug. O. Wegner and children returned from Mullan, Idaho, Tuesday afternoon.

Mrs. H. E. Brammer and children of Southwick were visiting in Cameron, Friday afternoon.

Mr. and Mrs. Amos Spekker were callers at the Blum home, Sunday evening.

Quite a number of the Cameron people attended the Leland Sunday school picnic held at Peter's Grove, Thursday of last week.

The farmers are all busy making hay. The old proverb or saying "make hay while the sun shines" is evidently true—anyway we believe in it here.

Mrs. Bruniek and Mrs. Bieck returned home, Monday evening after having spent two weeks with Mrs. Bruniek's daughter, Mrs. Aug. Brammer.

Mr. and Mrs. Herman Meyer and daughter, and Margaret Schmidt, motored to Lewiston, Monday, to get some cherries.

FORD TRUCK CARAVAN TO ARRIVE AT LEWISTON SOON

According to the Jeffreys-Murphy Auto Company, Ford Dealers, the Ford Truck caravan, which has been visiting the dealers in this state since April 20th, will arrive in Lewiston on June 24th, to remain there for 12 hours, or until June 25th.

In view of the fact that this caravan, which consists of 14 units manufactured by the Ford Motor Company, together with equipment especially designed for use with Ford products, will have covered more than 4,000 miles before its itinerary has been completed, it presents a picture highly reminiscent of pioneer days, it when the problems of transportation were far more puzzling and difficult than now and merchants made a practice of presenting their wares by calling in person.

The arrival of the Ford Truck Caravan will afford an excellent opportunity to study the equipment suitable for various haulage purposes; and many will no doubt be glad to take advantage of this occasion to familiarize themselves with the type of equipment adapted to their individual requirements, not only for their present needs but also for future reference and application to their business. 251-t

Norma Talmadge

Who will appear at the New Kendrick Theatre, Tonight and Saturday in "Secrets," which is rated as the most beautiful picture ever made. See advertisement on third page of this issue.

New Arrivals

A beautiful array of summery voiles in the prettiest of colors, in dotted effects, plain and printed patterns. Tiberia crepes in the new stripes.

Printed satin stripes are new and a wonderful buy 98c
