

Open Air Band Concert Saturday Night at 7:30

Latah County News Paragraphs

Items of Interest Taken From Neighboring Papers

Idaho's economy program has played hob with the highway department's finances. The department has but \$185 per mile available for all purposes, building and upkeep, while faced with the necessity of building hundreds of miles of highways in sparsely settled sections, through deserts and across mountain ranges. Gasoline tax is its only source of revenue. Oregon has \$300 per mile, Washington \$400 and California \$600.—Daily Press.

The cannery has been running steady this week taking care of tomatoes which are now ripening in splendid shape with no signs of a let up in sight.

F. W. Dustan, manager of the cannery, says that he is now receiving some of the finest tomatoes that he has ever received since being engaged in the business here, and that he doesn't believe the quality can be beaten in any tomato growing section of the United States.

If the killing frosts will just hold off as late as they did last year, (Nov. 11) those who have a few acres of tomatoes will find that they have cleared more money, per acre, than they would have at any other kind of farming.—Julietta Record.

When an Iowa farmer complained that the pheasants were eating his corn, the game department killed two of the birds, examined their crops, and found 200 cut worms—and no corn. Almost without exception, when the scientists investigate such cases they find the same result. The farmer owes his crop to the feathered police that keep down the bugs, insects and worms. With continuing slaughter of every form of bird life, the insect loss will be heavier and farm work harder. The nation could train an army of riflemen in a comparatively short time, but it couldn't in a century restore the bird armies that are the farmers' allies in raising food to feed the country.—Troy News.

Seventy-five high school students enrolled Monday at the local schools, four more have entered since, bringing the total to 79. Many more are expected the next few days and the prediction is that the enrollment will reach 95 or 100. Of the number enrolled, 26 are freshmen and 18 are registered as seniors.—Genesee News

Changes made by the state board of equalization in the valuations returned from Latah county were received in a certified copy by Harry Thatcher, auditor, from E. G. Gallett, state auditor. Such valuations are placed upon the operating property of railroad, telephone, telegraph and electric transmission lines and car companies, and the general and special taxes found to be due the state from this county on its real property assessment roll of 1925, as equalized by the state board.

Net equalized valuation for taxation in the county shows slight decrease as compared to that for 1924. The valuation for last year was set at \$18,316,300 as compared to \$18,020,493 for this year. Real property assessment roll for 1925, reported to the state auditor at \$15,943,633, was not changed by the board. This amount does not include the exemptions allowed.

Taxes due to the state from the county show a decrease of

Kendrick News 20 Years Ago

Items Taken from Gazette Published in 1905

The agent for the Bernheim Distilling Co. of Louisville, Ky., J. R. Hiller, was in Kendrick, Monday of this week and placed an order with Judge Terry of the California Wine House for the large quantity of 25 barrels of their Harper whiskey, which order gives this firm the exclusive use of the Harper brand in this section.

Postmaster Hamley has installed six letter boxes at the most convenient points in the town for the delivery of outgoing mail. The mail will be gathered from these three times a day, 7 a. m. and 12 and 6 p. m. Thus the march of progress.

The eldest boy of N. B. Long left Tuesday night for Milton where he will attend college for the winter.

J. I. Mitcham returned Friday from his visit to the Lewis & Clark fair, much impressed with the sights and displays, which, in themselves, are worth a man's leaving to see.

Martin Thomas pulled his threshing machine home, Wednesday, after a steady run of 40 days, during which time he managed to roll out 35,000 sacks of the golden wheat.

R. F. Bigham and wife left Sunday night on the Owl train for a visit to the old home place in the East. The doctor told R. F. that he would have to take a rest after his hurt and we hope they have a fine trip.

We note a change in the proprietorship of the Lee delivery meat wagon, N. B. Long & Son have purchased Mr. Lee's interest and will continue the business this winter, carrying the same stock of fine meats and making the same prompt delivery.

Grangeville was devastated by a great fire yesterday. We of Kendrick know how to appreciate their condition. Total loss about \$210,000.

Had Narrow Escape

It isn't always speed that causes accidents on the highways. Harry Langdon was hauling a load of hay down the American ridge grade that passes the old Wilcox place, Wednesday, when the "shoe" on the rear wheels struck a rock and caused the rear wheel to go over the edge of the grade. The wagon turned upside down and Mr. Langdon was thrown 30 feet down the bank. Believe it or not, but a pitchfork that was sticking on top of the load landed "straddle" of Mr. Langdon's neck, a time on each side. One time slightly scratched his neck, but otherwise he was uninjured.

Commissioners Make Levy

The Latah county commissioners made the levy for the fiscal year, while in session at Moscow, Wednesday. The levy is as follows: Current expense fund 4 mills, state 4.8, school 4.7, road 1/2, bridges 1/2, or a total of 14 1/2 mills.

Concert Tomorrow Night

Another one of the popular band concerts will be held in the town park tomorrow night (Saturday). Everyone is most cordially invited to be present. The concert will start promptly at 7:30.

\$5,283.19 over the amount for last year, this report shows. Taxes for this year total \$85,573.11 while in 1924 the county paid the state \$90,856.30.—Star-Mirror.

Beebe's Expedition Home Again

Dr. William Beebe and his party have returned to New York from their trip on the Arcturus after five months of studying the ocean bed and life in the Sargasso sea and at the Galapagos Islands. Here Donald Cady, member of the expedition, is shown on the deck of the vessel with a peculiar shark which was one of the many specimens brought back.

Investigate Before Investing

When a farmer buys a mowing machine he demands and secures guarantees that the contraption will run, and when the city man buys a suit of clothes he requires the dealer to make good if the garments prove faulty. But it seems that when the farmer and the city man buy stocks or bonds with their surplus funds they rely on their own judgment or stake their earnings on the word of a salesman.

This careless method of investment has resulted in so much distress among farmers of the Inland Empire that the banks have agreed to cooperate to drive home a warning. Farmers, the report says, have signed notes for oil stocks aggregating hundreds of thousands of dollars. The notes are then offered the banks at a fourth off, with the obligation of collection after harvest. The salesman are clever enough to represent that the permit to sell stock, issued by the secretary of state, is an official paper indorsing their wares.

The same sort of salesmanship is catching the city man. The purpose of the bankers is to cry a warning and offer such preventive means as is possible. Once having invested his funds in a speculative issue the buyer has only hope and experience to show, but for the man about to entrust his money to others there is offered a service of investigation which might remove any wool which had been placed over his eyes.

The market contains hundreds of legitimate investments as well as scores of doubtful value. A man must make a business of studying these matters to be expert enough to differentiate between good and bad. The banker does not pretend to be an expert, but he has at hand or can easily obtain information tending to show the reliability of any stock or bond. He offers, even encourages, the person about to invest to make use of this service. The aim is not to discourage investment, but to promote it by proper guidance.

The slogan of this campaign is a good one, "Investigate before you invest."—Spokesman-Review.

Otto Schoeffler of Cameron had a runaway in the field while discing, Wednesday. He was driving 6 horses when a flock of quail flew up in front of them, causing them to run away. Otto tried to stop them but before he could get them under control they plunged over a 30 foot embankment, dragging the disc with them. Otto was not injured and none of the horses were badly hurt.

Received Fine Hogs

The University of Idaho received from Mrs. Minnie Miller, proprietor of the Thousand Springs Farm, Wendell, Idaho, a gift of the two senior Duroc Jersey boars which have made an enviable reputation for her Duroc herd, Sensation High Boy and Long Colonel. Both are show boars and sires of show animals and are among the finest specimens that have ever been brought to the west.

The University Duroc herd was further strengthened by the addition, from the Thousand Springs Farm herd, of five aged sows and four senior gilts. Among them are individuals that have won grand champion honors at the largest livestock shows in the west.

Fight Butter Substitutes

The fight against butter substitutes in Idaho has received a new impetu through the organization and support of the Idaho Home Industries Association, according to Norman B. Adkison, managing secretary of that body of boosters for home products. Farm bureaus, the grange and several dairymen's associations have been leading the fight against substitutes of both butter and lard and some concerted action is promised for the rest of the time up until the next legislative meets.

At a recent address at a meeting of the grange of Ada and Canyon county Mr. Adkison outlined the stand of the Idaho Home Industries Association as being back of all Idaho agricultural products as well as its manufactured articles. He called attention to the lack of support of beet sugar in some sections regardless of the fact that hundreds of Idaho homes depends upon the raising of beets. He spoke especially of the futility of paying freight on hogs from Idaho back to Omaha and other points and then paying freight on the cured meat back to Idaho when Idaho-cured meats could be secured here at a lower price with quality guaranteed by the home packer.

Attention has also been called to Idaho canned goods which have in the past few years made a reputation second to none in the entire nation. Idaho canned corn, peas, tomatoes have a solid pack and a wonderful quality. Idaho cider and vinegar, Idaho pickles and honey also have a most enviable reputation. It is evident that the demand for Idaho's agricultural products will make more permanent this most important industry which develops more wealth than all other industries combined in Idaho.

Commercial Club Met Tuesday

Time Taken Up Largely with Road Program

A very profitable meeting of the Kendrick commercial club was held at the Commercial Hotel last Tuesday evening, with an attendance of 34 members. It was the first meeting held since early in the summer, as the busy harvest season makes it difficult to get a crowd to attend during the harvest rush.

The meeting Tuesday night was devoted largely to a discussion and finally the adoption of a road boosting program. Much enthusiasm was displayed and it was the unanimous verdict of the meeting that the time has come when better roads must be built. The assurance of the construction of the unfinished portion of the highway between Kendrick and Lewiston, has awakened a keen interest in highways in this section of the country and it is believed it will be the beginning of a very substantial road building program throughout the Potlatch section.

Kendrick highway district has unusually difficult highway problems on account of the high cost of construction. But the very fact that the roads are expensive to build indicates to some degree the necessity for better highways.

The road building program that will be fostered by the commercial club is all within the boundaries of the Kendrick highway district. It presents many difficulties, all of which may easily be overcome provided the task is entered upon with the proper booster spirit. It includes the construction of a grade over Bear ridge, American ridge and up Potlatch creek to meet the Cedar creek road.

The unanimous opinion of the members of the club was to the effect that the only possible method of constructing this road was by means of a bond issue. While a bond issue is not, as a rule, looked upon with any too much favor by the taxpayers of a community, nevertheless it is often the commercial salvation of the community.

About 8 years ago the town of Kendrick floated two bond issues for sewer and sidewalk construction, that totaled approximately \$50,000. It was said by many at that time that it would wreck the community. The bonds are now almost paid and it is safe to say that the improvements made possible by their issue have been largely responsible for keeping the town up to its present standard.

Other business transacted at the meeting was of a general routine nature. The list of standing committees appointed by the chairman since the last regular meeting, was read by the secretary. A report of the receipts and expenditures for the celebration held here July 4th, was read and a balance of \$27.00 was shown.

Chairman Wilmot brought up the matter of a lyceum course for the coming winter and submitted the question to the club for decision. The vote was unanimous against the lyceum with the exception of one, Hugh Stanton, who voted "yes" out of sympathy for this lost cause.

The question of organizing a volunteer fire company was brought up for consideration. It was finally decided to elect a fire chief and instruct him to organize the company. E. A. Deobald, who has proved in the past that he is "on the job" at a fire, was unanimously elected chief.

A number of new faces, all prospective members, were present at the meeting. They included Messrs. Giles R. Kerns, Luther C. Kerns, Charles G. Pool. The next meeting of the club is

Potlatch Road Key to Situation

Opens Up Big Highway Program Here

Kendrick and the country lying beyond Kendrick are entering an era of road building and the movement will not be halted until the entire region is served by surfaced highways, says the Tribune. This is the report made last night by Contractor E. M. Booth, who is completing a contract in good roads district No. 1, Latah county, the improvement beginning on Potlatch creek about five miles from Kendrick. The good roads district is building over six miles of surfaced highway from a point on Potlatch creek to the highlands at the town of Linden. The old grade replaced by the modern highway had stretches where the grade was 20 percent and at times in the spring and fall the roads could not be traveled. Mr. Booth will complete his contract this week and the residents of the good roads district are well pleased with the improvement.

"The key to the entire situation in the Kendrick section is the building of the link between Arrow Junction and the Latah county line on Potlatch creek," said Mr. Booth. "The people of the upper Potlatch sections now know they will have an outlet to Lewiston and they intend losing no time in getting their own roads improved so that they can take advantage of the good roads to the outside.

"The Kendrick Commercial club placed itself behind a large and important program at its meeting this week and I know the people will carry to completion the improvements suggested at the Kendrick meeting. The link between Kendrick and the improvement I am now completing will be included in the program undertaken by the Kendrick Commercial club and this is a unit in the highway that will bring the Elk River, Bovill and other Latah county communities to Lewiston.

"These people have wanted an outlet to Lewiston for years and they now see the beginning of construction on the Lewiston end and they are proposing to get their own roads in good condition as early as possible. There is no doubt but Lewiston will become the trading point for a large territory beyond Kendrick. The road building program will be of much benefit to both Kendrick and Lewiston. Kendrick has a large and productive territory tributary and with better highways, the Kendrick markets will be more accessible and home trade will be generally stimulated. Lewiston will secure a good share of the regular business of a great region that is now doing much of its outside trading out of the state."

Wheeler-Wright Marriage

George W. Wright, well known resident of Kendrick, was married Thursday, September 10, to Katherine Fitzgerald Wheeler of Spokane. The ceremony was performed in Kendrick by Judge H. P. Hull, the only witnesses to the wedding being Mr. and Mrs. Harry Stanton. The couple have the best wishes of their many Kendrick friends.

Ernest Schmidt was one of the first to get his beans threshed in the Leland community. From 100 acres he received 495 sacks, which is considered a very good average this season.

cheduled to take place the second Tuesday in October. It is believed that at this meeting there will be a whole volume of "road history" made.

THE KENDRICK GAZETTE

Entered at the post office at Kendrick as second class mail matter.

When you hear a man criticizing the local newspaper you can safely bet that he does not spend any of his wealth assisting to make it bigger, better that generally the paper has done more for him than he has done for it. The man who cannot see the benefits arising from a local paper is about as much value to a town as a delinquent tax list.—Ex.

Kathleen Norris: It is the duty of every mother to pick out her daughter-in-law, if not by name, at least by type. If a girl has been trained to appreciate the decent sort of a man the chances of her making a fatal mistake are somewhat lessened. Gentleness is the first thing for which I would look in the woman my son was to marry, honesty second. Here are some perfectly visible shoals that may help some man or girl to wiser choice: If a girl isn't popular with her own family she won't make a good wife. If a man spends more money than he earns, doesn't like to talk about it, he won't make a good husband.

The fear is often expressed that the hard surfaced roads will sound the death knell of the small towns. We are not prepared to say whether this is true or not. We do not believe it will affect the small towns the citizen who is loyal to his community only because he has not means of transportation to a neighboring city has no loyalty to boast of. The small towns that are equipped to furnish the comforts, necessities, modern improvements will not we believe, suffer greatly. Good paved streets, well kept parkings, good lights water provide most of the needs of the average citizen. The big town can give little more. There is no better place to live, raise, educate a family of boys, girls than the small modern towns of the land. They have something that the big city cannot buy, can never instill into its life. The small town of today should spend every dollar it judiciously can, in the purchase of improvements, modern conveniences. It is its only insurance against decadence.—Ex.

BIG BEAR RIDGE

Miss Onal and Dorothy Jones and Ida Morey have gone to Lewiston to attend the State Normal.

Mr. and Mrs. L. Keene of Moscow spent Friday at the Wade Keene home.

Mr. and Mrs. J. C. Bowers have moved to Lewiston where they will make their home.

J. J. Slind is quite ill at this writing.

Miss Maragret Gorseth of Kendrick is spending the week with Miss Johanna Hooker.

Mr. and Mrs. George Larson and little son, Harold, will soon move to Kellogg, Idaho, where Mr. Larson has employment in the mines.

Miss Maragret Lien is attending school in Deary.

Oscar and Milo Slud are driving a new Ford touring car.

Ed Lien returned to the Giant Ledge mine at Murray, Idaho, the first of the week.

Dwight Ingle has gone to Moscow to enter the University of Idaho.

The Lutheran Ladies Aid of Deary and the local Lutheran Aid were delightfully entertained by Mrs. A. Kleth at her home Thursday afternoon. There were about fifty present.

Miss Alma Aas came home from Deary to spend the week end.

Mr. and Mrs. Frances Antonson of Bovill spent the week end at the Oscar Huffman home.

Miss Lizzie Jones has entered the Kendrick High school. Mr. and Mrs. Clyde Ralstin and family have moved near Deary.

Miss Johanna Hooker entertained the Girls' Sewing Club at a picnic at Atwater Lake, Saturday afternoon.

Miss Agnes Jones began teaching on lower American ridge, Monday. Miss Jones taught the same school successfully last year.

"Why Men Leave Home" See this picture at the New Kendrick Theatre tonight and Saturday. 33-11

SOUTHWICK ITEMS

Albert and Stella Cuddy of Mohler, spent last week with relatives here.

School started Monday with a large attendance in all the rooms.

Earl Fairley and wife of Peck have moved into the bungalow across the street from the telephone office. Mr. Fairley is one of the teachers in the school.

Clinton Wright was on the sick list a few days last week but is now able to attend to his work.

Mr. and Mrs. Mel McFadden and daughter of Lewiston spent the week end with their daughter, Mrs. Leslie Triplett.

John Stalnaker and Edwin Wetmore have returned home from their work with the fire patrol.

Miss Lotie Wright and Clarence Whiting were united in marriage at Orofino last Friday. They left the next morning for Camas, Wash. where they expect to spend the winter.

Mrs. Julius Candler of Teakean left Monday for Kendrick to care for Mr. and Mrs. Candler of Kendrick who are sick.

Roy Southwick went to Lewiston last week on business.

Mrs. Fred Gehre returned from Sildix, Montana, where she has been visiting her sister, Mrs. Huzdahl.

A large number of people from Southwick and vicinity attended the Waite Hunt sale at Linden, Tuesday.

John Draper is moving his family to Juliaetta, where the children will attend school.

Mrs. Belle Cuddy left Sunday for Nezperce, where she expects to remain for about three months.

Mrs. Goan and her mother, Mrs. Calvert, of Clarkston, arrived last Thursday. They have moved into the residence recently vacated by Asa Calvert. Mrs. Goan will teach the Grinolds school this winter.

Fred Whiting and Frank Thornton made a trip to Orofino, Sunday.

J. R. King and son, Ray; Mitch Blackburn and Ben McCoy went to Elk River last Friday on a fishing trip, returning home Sunday.

Mrs. Charlie Kime of Teakean is spending a few days with Mrs. Kime of Southwick.

Why Is Found Excellent as Skim Milk Substitute

Dairy farmers who have a supply of whey available will also be interested in the tests at the Wisconsin station in which calves were fed whey as a substitute for skim milk. A grain mixture of three parts ground corn, three parts standard middlings and four parts linseed meal was fed in addition and hay, salt and water were provided as in the other lots. Calves thus fed gained 1.49 pounds per head daily as an average, or practically as much as the calves fed ten pounds of skim milk daily. The average feed cost to six months of age was \$21.68 per calf. It was necessary to take a little more care in changing over from whole milk to whey than from whole milk to skim milk. The whey was fed in a sanitary condition and was never allowed to stand in a filthy tank or can. The results show that when a little care is taken calves can be raised satisfactorily on whey supplemented with grain and hay.

FARM NOTES

About 10 per cent of the land area of the United States produces crops.

Whitewash is one of the old reliable substances that have held their own against all newcomers.

"Hello, Dr. Bunyan? Yes? Come right away. My husband has another one of his spells."

"Why didn't you send for me sooner?" said the doctor, half an hour later. "You should not have waited till your husband was unconscious."

"Well," replied the wife, "as long as he had his senses he wouldn't let me send for you."—Ex.

Fur Chinese Product
Tibet or Tibet lamb is a fur obtained from an animal of the sheep family found in China. The skins are white, fine, silky, and are of long and curly hair. When combed and ironed straight, this fur is improperly named Iceland fox.

Town Has Decayed
Enkuisen, a seaport of the Netherlands on the Zuider zee in the Seventeenth century, had a population of more than 40,000, and sent a fleet of 400 vessels to the herring fisheries. The herring trade has now died away and the population is only 7,748.

By having your old stove or range worked over

You Can Save Good Money

We can repair, reline or rebuild your old burnt out stoves and ranges and make them good as new at a fraction of the cost of a new one. Give us a trial and be convinced.

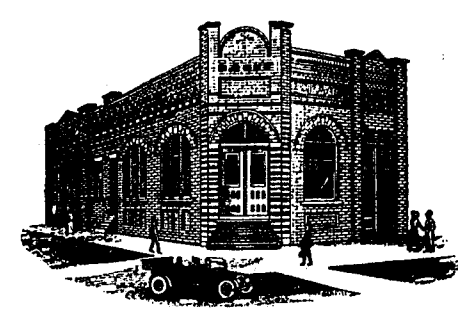

All work guaranteed.

We will appreciate your patronage

Only Good Alfalfa Seed Is Profitable

Use Hardy Seeds Where Winter-Killing Is Likely.

Alfalfa growers should purchase their seed with care.

"There are several things to consider in seed selection," says L. F. Graber, alfalfa specialist at the Wisconsin College of Agriculture. Where winter-killing is known to occur, hardy strains such as Grimm and Cosack should be sown, as the extra cost is returned in better yield. Where winter-killing is not serious and short rotations are practiced, good common strains have proved successful.

Strange as it may seem there is less winter-killing in the northern half of the state because of the better covering of snow which they have in that section.

Another advantage of Grimm alfalfa is in seed production which may occur every other year or so. The higher price received for the seed makes this strain much more profitable. Some growers have realized as high as \$60 an acre from this source. A crop can be expected only when the season is dry at blossoming time. In regard to a seed crop, alfalfa does not differ so much from clover, as seed from that crop is not a certainty. "The safest Grimm seed to buy is that which has had a field inspection and certification by the officials of the western states where it is produced," Graber states. Of this there is an enormous quantity, much of which is in bags, branded or sealed, or both, by these officials, which certifies its purity. This seed is available through regular commercial channels of dealers and seed companies.

The strains which Graber has found best because of the resistance to winter-killing are those from South Dakota, Montana, and Kansas.

DAIRY FACTS

FEEDING GRAIN TO COWS ON PASTURE

Does it pay to feed grain to cows on pasture? The answer is that it depends largely upon how much milk the cow gives and how good the pasture is.

If a cow is producing less than a pound of butterfat each day, the necessary food can be obtained from a good pasture. If she produces more than this, some grain can be fed with profit. This means that a Holstein should be able to get food enough from grass alone to make 25 to 30 pounds of milk daily, and a Guernsey or Jersey about 20 pounds. It will pay to feed grain to all giving above this amount as it is impossible for the animal to gather sufficient feed in the form of grass.

To produce a pound of butterfat daily requires at least 25 pounds of dry material. Fresh pasture grass contains only ten to twelve pounds of dry matter in a hundred pounds, making it necessary for a cow to gather and digest from 200 to 250 pounds of grass to produce from 20 to 30 pounds of milk. It is clear from this that it is impossible for a really high-producing cow giving 40 to 50 pounds daily to do so long on grass alone.

A cow yielding a pound and a half of fat daily should receive about five pounds of grain, and about seven or eight pounds of grain for two pounds of fat. When not more than five pounds of grain is needed, it may be corn, barley, oats, or any combination of grain that is cheapest. The grass supplies a good amount of protein so the danger of a shortage of this necessary material is not serious. With a high-producing cow requiring more than five pounds of grain daily, a small amount of bran, linseed meal, or other high protein feed should be added.

These recommendations hold good only when pastures are good. In mid-summer it will often be necessary to feed more grain to high-producing cows or to give some silage or green feeds to help out the pastures.—C. H. Eckles, chief of the division of dairy husbandry, University Farm, St. Paul.

Dairy Calves Need Right Feed to Make Best Growth

Dairy calves should be taken from their mothers when twenty-four hours old. They must have their dam's first milk in order to get started off right. Place them in a clean stall or pen and teach them to drink by letting them suck your finger until they get a taste of the milk. Feed two or three pounds of whole milk morning, noon, and night. Do not neglect the noon feed. If you do they will gulp down the night ration, and the result is scours and other intestinal trouble.

When a month old drop the noon feed and begin to add separated milk, about four pounds at a feed. After feeding the milk, put some bran and corn chops before them in a pan. This will keep them from sucking each other to some extent though when several calves are being fed it is better to tie them separately or put them in stanchions.

Keep plenty of pure water before the calves and nice bright hay or pasture grass. It is surprising how much water they will drink. Provide shade in summer, be kind and gentle in handling them, and if you have any foundation at all you will raise a real dairy cow.

Why Fifty-Dollar Scrub Is Most Expensive Bull

Usually they figure "What is a pure-bred sire worth?" That is fine, but just for variety let us figure what a scrub bull costs his owner. United States dairy bureau figures show that scrub bulls cost 13 dairymen a decrease of 56,848 pounds of butterfat, and \$29,762.42 in decrease in sales. This is a cost to each owner of the scrub bull of \$2,289.47. Wouldn't that money buy a dandy bull? The cost of these scrub bulls to the 13 dairymen, when computed on a cow's basis, was \$56.15 per cow. Is a \$200 pure-bred bull an expensive bull in a herd? Absolutely not. The expensive bull is the \$50 scrub sire that we pick up because he is cheap.—B. W. Fairbanks, Extension Service, Colorado Agricultural College.

Dairy Hints

Good cream is clean cream cooled.

Let the milk scales judge a cow's worth.

Milk and cream are in great demand and have always received good prices.

The successful dairyman is ever on the alert and keeps a close watch over his herd throughout the year.

No farm, however small, operated by the owner or a tenant, should be without a few milking cows properly cared for and fed.

A good high-producing cow has a tremendous capacity for feed and it is economical to give her the feed that she can handle. This means that she must have a balanced ration with a sufficient proportion of concentrates.

Watch Hen's Weight When Wanting Eggs

Strict Attention Should Be Given to Maintenance.

A hen's weight has more significance than indicating her desirability for the pot. It has been found that the number of eggs laid during the various seasons of the year by White Leghorns has a direct relation to the birds' weights.

In a study made by the New Jersey Agricultural Experiment station with 135 Leghorns entered in the first Vineyard egg laying contest, it was found that the birds weighing 4½ pounds produced the most eggs during the winter season, in both their pullet and their yearling years, while those weighing 5 pounds produced the most eggs during the spring season in their pullet year. Those weighing 4 pounds produced the most eggs in the spring season of their yearling year. For the summer-fall season, the most eggs were produced by the group of birds weighing 4 pounds in their pullet and their yearling years. This 4-pound group was found also to produce the greatest number of eggs during the entire pullet year, as well as the yearling year.

The tendency too often with poultry keepers, continues the report, is to force the birds for eggs during the fall and winter season and to neglect the weights of the birds. Strict attention should be given to the maintenance of weight as well as of egg production. Heavy feedings of grains when the pullets are coming into production will aid in this. Fifteen pounds of grain a day for 100 birds is none too much at this time.

A mash may be kept before the birds in order to sustain production and at the same time maintain body weight. If, however, there is not a sufficient consumption of grain, part of the mash may be removed.

Insects Cause Big Loss and Damage in Gardens

Insects are a great worry to gardeners and cause untold loss and damage. The best method of combating this evil is to prevent their appearance, if possible. Destroy the breeding haunts of these pests, at least in the immediate vicinity of the garden. Some insects hibernate in the stems of dead weeds that are left standing from the previous season. Destroy all the mummified remains of last year's garden plants. Milkweed and bull-nettle afford breeding places for the aphids or plant lice that attack cucumber and other garden plants.

Cabbage worms, potato beetles, striped cucumber beetle, tomato worms, etc., can usually be controlled by using commercial preparations. A spray of arsenate of lead or paris green is effective on the cucumber and potato beetles, but a contact poison is necessary to get results with the aphids or plant lice. Blackleaf 40 is very good.

There are two other methods of controlling insects in gardens. The first is by encouraging beneficial birds to make their home in or near the garden.

Another way to control insects and disease of plants is to change the different varieties from place to place in the garden or to shift the location of the garden altogether.

FARM FACTS

Have 50-pound pigs treated for cholera.

One gallon of paint will cover about 500 square feet of surface.

Don't withhold feed from young growing animals when they want it.

About 66 per cent of an egg is water. Do your hens get all they want?

Good farmers use pure seeds and pure breeds to underwrite respectable annual profits.

Sweet clover should not be cut or pastured so low that no branches are left on the main stem.

With good cattle and economical feeding, the dairy farmer can expect a good profit in his business.

Remember that the cows, pigs and chickens need shade during warm summer days as much as you do. And they need fresh water more.

Discarded crank case oil from the auto or tractor makes an excellent hog oil after a small amount of creosote dip is added. This liquid is effective in ridding hogs of lice.

Fine wool sheep that produce patches of black wool on any part of the body, also those producing kempy hairs should be culled. Kemp is usually found around the face, fore legs and thighs.

The "help-yourself" system of feeding swine has proved its value in thousands of cases where farmers find that their hogs make better returns in less time for the food consumed than when grain is fed in the old way.

Growing poultry require shade. If the trees surrounding the premises are not big enough to furnish this shade, furnish shade by stretching burlap or canvas from frames elevated three or four feet from the ground.

Poultry Notes

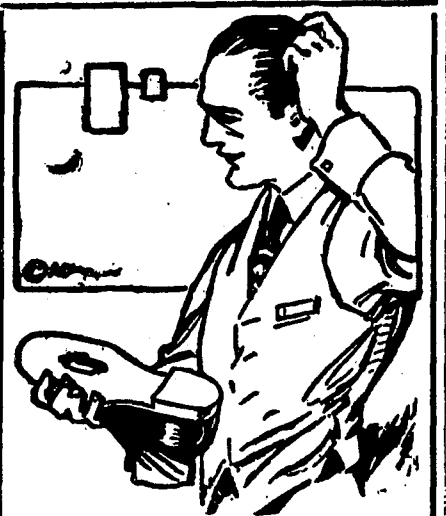

For some reason, not fully understood, thick, sour skimmed milk seems to have a greater value for hens than sweet milk.

Many farmers begrudge a hen every bite that goes down her neck, and numerous early risers on the farm get up to feed the hens before daylight to keep the hens from eating with them.

Poultrymen are finding out that hens will lay as freely without the company of males as with them. This fact permits the lessening of expenses by doing away with the roosters. It is also a fact that eggs that are infertile will keep much the longest.

GLEANINGS

Ed Deobald made a trip to Cream ridge, Monday, to do some car repairing for Frank Dygert.

Hugh Helpman and H. P. Wilcox of Lewiston were Kendrick visitors Tuesday.

Col. J. E. Knight, auctioneer of Moscow, was transacting business in Kendrick, Tuesday.

A. H. Worsley, a former resident of Cedar Creek ridge writes from Arcadia, Kansas, that they have had a very dry summer there and crops are light.

Clarence Bell and Arthur Janes returned the first of the week from a hunting and fishing trip to Big Island. They report birds and fish to be very plentiful in that locality.

E. A. Deobald and Otto Schupfer went to Spokane last Friday to attend the fair.

Mrs. Herman Busse returned last Saturday from a visit with her sister, Miss Margaret Knepper, at Honolulu. She visited her father and sister here and left yesterday for her home in Kuna, Idaho. Her little daughter, Bernhardine, accompanied her home.

S. A. Sutton, prominent farmer of the Cayendish section, was transacting business in Lewiston the first of the week.

Miss Josephine Deobald of Denver, Col., arrived Saturday to visit at the home of E. A. Deobald and other relatives in the vicinity of Kendrick.

The second carload of watermelons was shipped from Juliaetta to Calgary, Canada, last Saturday. The melons were of the yellow meated variety. This shipment made the seventh carload of melons shipped from that point and it is said that fully that many more were distributed throughout the nearby markets by trucks. It is estimated the total crop in the vicinity of Juliaetta will approximate 20 carloads.

Mrs. Herman Busse and daughter, Bernhardine, went to Lewiston, Tuesday, for a brief visit with the E. W. Lutz family.

Mrs. Anne Oylear and son, of Clarkston, were Kendrick visitors Monday of this week.

Mrs. George Leith returned the first of the week from Moscow where she spent a week with her daughter, Mrs. Robert Spencer.

Ben Callison and son, Norla, and Ernest Roberts returned Tuesday evening from a fishing and hunting trip to Big Island. They brought a number of fine trout back with them.

Mrs. A. K. Carlson returned from Spokane last Saturday where she spent a week with relatives.

Albert Westendahl visited relatives in Moscow this week.

T. H. Sparber returned Wednesday morning from a visit at Lewiston.

Mrs. Ray Snyder went to Troy, Wednesday afternoon, to visit her sister, Mrs. Tony Agrell.

One of the members of the Duffield Comedians, who played Kendrick last week and Wednesday night of this week, was born in Kendrick in the house now owned by N. E. Walker. Her name is Mrs. Rud-dack and her home is now in Spokane. She is a daughter of Lou Bradbury.

Dr. Ted Watts of Seattle passed through Kendrick, Tuesday, on his way to Juliaetta where he was called on account of the critical illness of his mother, Mrs. Charles Jessup.

Tom Felton of Lewiston suffered a bad cut in his leg Thursday night of last week, when a Ford which he was driving down Brady gulch from American ridge, turned turtle. The car was also badly damaged but was repaired at a local garage. Mr. Felton was advance man for the show troupe that was here last week.

There must be a reason "Why Men Leave Home"! See this remarkable picture at the New Kendrick Theatre, tonight and Saturday.

Hugh Stanton tells a true story that happened in the North Fork country during the days when timber claims were being homesteaded. His brother, Claud, with a party of timber cruisers stopped at a little store on the river to get supplies. The storekeeper had three pairs of loggers pants in the store. Claud told him they would take all three pairs. The storekeeper said: "I can't sell you all of them. It won't leave me any in stock."

The commissioners of Latah county, in session at Moscow the first of the week, let the contract for the installation of a heating plant in the court house. The contract included excavating for the basement. This is a badly needed improvement and will be appreciated by the county officers during the winter months. It will eliminate a stove in each room of the building and will eventually save its cost in the smaller amount of fuel consumed.

County Commissioners John Cone and Elmer Paulson and County Auditor, Harry Thatcher drove down from Moscow, Thursday, to meet with Commissioner Walker concerning a piece of road work between Kendrick and Juliaetta. The commissioners are making plans to surface the portion that was graded this summer and they hope to get this finished before the bad weather starts. This piece of highway, when finished, will be the last link in a standard, surfaced highway between Kendrick and Juliaetta.

Mrs. O. E. MacPherson and son, Donald, went to Orono, Thursday afternoon, to visit her sister, Mrs. Stuart Compton and attend the Clearwater County Fair.

Rev. and Mrs. C. D. Bell and daughters, the Misses Joy, Georgia and Alice, returned home Wednesday from attending the Methodist conference at Yakima. They made the trip tourist style, over the Columbia highway to Portland and Tacoma and then to Yakima, returning home by way of Spokane over the Sunset highway. They report a delightful trip.

Miss Mabel Echner went to Kooskia last Saturday where she will teach school.

Wayne Herres was a Lewiston visitor the first of the week.

How are your eyes? Do your glasses need changing or adjusting? Dr. A. E. Jones, specialist, will be at the Commercial Hotel, Wednesday, October 7th. We ask you when in Spokane to please call at the Jones Optical Co., 315 Exchange Bank Bldg. 38-2t

Mrs. Emma Longfellow and Eva Smith were dinner guests at the C. H. Harris home, Sunday.

F. C. Lyons delivered a load of fruit and vegetables to Elk River, Saturday.

Mr. Betts of Southwick is baling hay for the Daniel boys this week.

Mr. and Mrs. Clarence Harris visited with his parents, in Troy, Friday.

Mrs. Susan Carr spent the day Sunday with Annie Morrison.

Do you know "Why Men Leave Home?" You will see the answer at the New Kendrick Theatre tonight and Saturday. 38-1t

Named in Queen's Honor

Queenstown, Ireland, a port of call for transatlantic steamships, received its present name in commemoration of the visit of Queen Victoria in 1849. Previous to that time it was called the Cove of Cork.

Sartorial View

A "faux pas," Roger, is a "bad break" in a fashionable French r.g.—Boston Transcript.

"Daddy, why did mother marry you?"

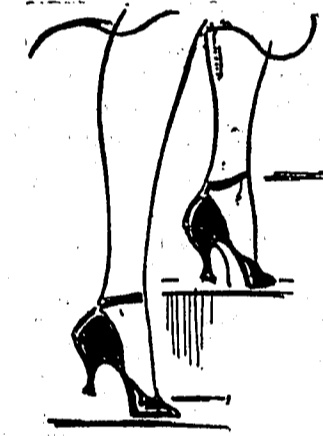

"You'd better ask her."

"I did."

"What did she say?"

"God knows."

Tonight and Saturday

WHY MEN LEAVE HOME

An amazing study of love and marriage that tells Wives and Sweethearts how they may avoid the pitfalls of marital discord.

One of the outstanding comedy dramas of the year! A drama that shows Sweethearts or Newlyweds how to be happy though engaged or married.

If it hurts you to laugh, don't come, because you will witness some of the most amusing situations ever heard of. No laughing matter but a picture full of laughs.

The show will start immediately after the Band Concert which will be held in the park at 7:30 tomorrow evening.

Different Comedy each Night also One News Reel
