THE KENDRICK GAZETTE

Published every Friday at Kendrick, Idaho, by

Ralph B. Knepper

Subscription price.....\$1.50

Entered at the post office at Kendrick as second class mail matter.

An editor says that a flapper is like a lily. She toils not—but spins some in an auto.

This town hasn't many orators but we'll venture to say there are ladies here who could make speeches.

The things you see in other towns and do not like are the things others will see in your town and not like. Weedy, unkept parkings, vacant lots filled with weeds and trash, unpainted, dilapidated buildings all help to detract from the beauty of the town.

A salesman with a line of ladies' ready to wear garments canvassed Kendrick Tuesday of this week. Late in the afternoon he called at one home and failing to make a sale reported that he hadn't received an order in the whole town. That sounds like 100 percent loyalty to the home town but it is too good to be true: At least it indicates that a comparatively small amount of business is being done here by house-to-house merchants.

Walt Mason: It doesn't greatly matter just where one may abide if he's inclined to splutter his tears on every side. He'd shed his tears in Boston, he'd weep in Buffalo; all things will have a frost on, wherever he may go. His grief would be terrific upon the eastern shore, by the blue Pacific he'd wring his hands, and roar. But if a human being is built the other way, in Punktown he'll be seeing much reason to be gay. No matter where he's dwelling he'll wear a cheerful face, men will hear him telling the beauties of the place. It isn't where we're living that makes our lives worth while; the punkiest town is giving all men a chance to smile. The man who doesn't want to put up a smile at all will beef in fair Toronto, knock in blithe St. Paul. I hear the bitter railings of knockers as they go, they talk of Punktown failings, she's shabby, gray, slow; they'll seek a town more-snappy, where pep, racket blend; but they will not be happy, wherever they may wend.

Papers are always looking for something new. They recently announced that an heiress gave an elaborate entertainment celebrating her father's death and her coming into a fortune. Readers shouldn't find fault with that kind of an item—it's something new.

The word "jail" is too harsh for the average editor to handle with any degree of comfort. If the county commissioners would only give this forbidding spot a more respectable name! When writing about one of our citizens how much more dignified it would sound if we could that he is "sojourning at Resthaven," rather than that he is "languishing in jail."

The men who judged the nationwide beauty contest at Atlantic City, New Jersey, recently, say that a majority of young women who took part in the contest are "beautiful but dumb". This is another place where the law of compensation rules. Probably any observing instructor in a college will tell you that while some of the girls who are beautiful in form and figure are studious and capable, the tendency is for the less beautiful to make the best showing in their studies. The Kansas City Star, commenting on the Atlantic City contest remarks: "Still, there is a measure of justice in it all. Compensation, as Emerson long ago pointed out, seems to be a law of nature. The dumadoras ought to have some recompense." —Star-Mirror.

THE LAST STRAW

"Why did you break off your engagement?" "Oh, my dear, Jacky became simply impossible. He criticized the way I dressed, objected to my friends, always wanted me at his call. Then on top of all that he suddenly went off, married another girl, so I made up my mind to have nothing more to do with him."—Ex.

HE MADE THE BOAT

The steamer was only a few feet from the wharf at Nantucket when a man came running madly from the dock gates, shouting to the officials to wait a minute. Without pausing in his stride he flung his bag on the boat, leaped desperately, and landed on the deck with a crash. "Good!" he gasped. "A few seconds later and I should have missed it." "Missed it!" exclaimed a passenger. "This boat is just coming in."—Ex.

PROFITABLE FOR SON

A group of farmers were talking at the village store and one of them asked: "Do you think it pays to keep poultry?" "Well, no, I can't say that I do," was the answer, "but I'm sure it pays my son Jim." "How's that?" asked another man. "Well, you see, I bought him the fowls; I have to furnish their food; I buy the eggs from him and he eats them."—Farm Life.

AMERICAN FARM LIFE

The doctor was examining school children. One youngster was under weight. "You don't drink milk?" "Nope." "Live on a farm and don't drink milk at all?" "Nope, we ain't got hardly enough milk for the hogs."—Everybody's.

BIG BEAR RIDGE

The Ladies Guild wishes to thank you one and all for your help in making their sale and supper a success. The proceeds from the sale and supper amounted to about eighty dollars. Miss Neva Ware drew the lucky number 13, which won the quilt.

Adolph Forest returned home Saturday evening from Agawam, Montana, where he has spent the summer.

Mr. and Mrs. J. Weyen and Carl Carlson of Moscow spent Monday with Mr. J. J. Slind, who was very low at his home here.

J. M. Bramblett and two children were visiting his mother and sister in Spokane the first of the week.

Mr. and Mrs. Isaac Lien departed for their home in Los Angeles, California, Wednesday, having spent the summer with home folks. They are making the trip in their car and were accompanied by Mrs. Lien's mother and sister, Mrs. C. J. Munson and Miss Carrie Munson of Avon.

Mr. and Mrs. Newt Heath and children moved to Mrs. Will Elliott's house near the Steele school house, Saturday.

John and Peter Baken came down from Moscow, Saturday, to see their old time friend, J. J. Slind.

Mr. and Mrs. A. M. Johnson and daughters, Misses Inez and Gladys of Bear Creek were Sunday visitors at the home of Mr. and Mrs. D. J. Ingle.

Mr. and Mrs. Gabriel Forest, Mr. and Mrs. Bernheart Nelson and daughter, Miss Imergene, spent Sunday with relatives in Colton, Wash.

Mr. and Mrs. N. E. Ware and children were Sunday guests at the O. E. MacPherson home in Kendrick.

Mrs. Ed Lien entertained the Lutheran Ladies Aid at her home Tuesday afternoon.

The Lutheran Ladies Aid will hold their annual fancy work sale and will serve dinner on Thanksgiving Day. Further announcement and details will be published later.

Baby's Power to Cling

For about two hours after birth a baby can be swung from a lead pencil, to which it would cling naturally, but it loses its power of clinging after that time, declared Dr. J. D. Leeson, a British evolutionist, recently.

Travel by Caravan

The word "caravan" has special reference to a company of travelers, merchants or pilgrims associated together for mutual security. It used to be especially used in reference to such companies when traveling through deserts or regions infested by robbers.

To Bring Back Color

A very simple process will restore carvings that have become discolored. Paint them with spirits of turpentine and expose them to the sunshine for a few days. This treatment will also prove beneficial to ivory piano keys when they begin to turn yellow.

We Don't Understand

why people will go to Spokane, Lewiston or Moscow and buy merchandise, particularly furniture and house furnishings, when they can buy exactly the same goods here in Kendrick for less money.

Our regular prices are lower than their special cut prices.

Last Sundays Spokesman-Review carried a big advertisement and here are some of the items:

Their Cut Price	Our Regular Price
Folding card tables \$3.40	\$ 3.25
9x12 Axminster rugs \$29.75	27.50
Hardwood dresser, mirror 22x28, \$27.75	27.25
50 lb. felted cotton mattress, \$18.50	16.50
Simmons "Ace" springs \$21.50	18.00

These are only a few of the savings you can make by trading in Kendrick.

Cruising Around the Spanish Main

GOOD-BYE TO NEW YORK AND THE STATUE

THE MONTRONAL

BACK WITH HER PET FROM THE WEST INDIES

Romance still lurks in the fascinating shores of the West Indies, even though buried treasure, pirates and dare devils like Henry Morgan are mere memories of a stirring past. The seas are as shining, the coral isles as tempting as when the Spanish galleons anchored there. Each winter, adventurous spirits from cruising steamers such as the Montronal spend their free moments gazing at the swallows of Morro Castle, in Havana, or wandering through the silent streets of St. Pierre, or, like Ponce de Leon, trying to find the fountain of youth.

Little bits of Spain, Holland, France and England are these tempting cities scattered about

through the West Indies. English customs govern in the 3000 odd islands known as the Bahamas, where many of the cruise ships make their first port of call Nassau, the capital, the city built on coral, with its white walls gleaming through groves of silk cotton trees and cocoa-nut palms. Strolling down the Prado, the finest street in Havana, one might almost imagine oneself in Paris, so fine are the buildings, so beautiful and extensive the parks. Haiti, the "Black Republic," discovered by Columbus on his first voyage, remained a Spanish possession for 200 years; it was then ceded to France, and in 1806 became a republic. Ships usually call at Port au Prince, the capital, a city of magnificent pub-

lic buildings, and of special interest industrially. Port Royal, at the entrance to Kingston Harbor, Jamaica, used to be one of the richest places in the world, for it was there that the pirates, in the good old days, used to bring their treasures. England now owns Jamaica, which is the largest island in the West Indies, and the most popular among tourists. Its mountains are high, almost as high as the snow-capped Canadian Rockies, with foamy waterfalls cascading down their green slopes. Then there is Panama, the most southerly point reached by cruise ships. At Porto Rico, all the feminine members on the cruisers start directly for the embroidery shops, for their fame has spread round the world. Trinidad, off the coast of Venezuela, is the garden of the West Indies, with flowers and fruit growing in profusion. Here, and in La Guayra, the port for Venezuela, some of the cruisers anchor to allow passengers glimpses of life in South American cities.

UNEARNED CRITICISM

By FRANCIS H. SISSON
 Chairman, Public Relations Commission American Bankers Association

There has been some disposition to criticize the administration of the country's banking system for the sudden collapse of prices and curtailment of credits in 1920 and 1921, and the subsequent financial difficulties of the farmers. As a matter of fact, whatever blame may attach to bankers must be for the too generous financing, in many cases, of speculative investment in farm property during the period of inflation. If any just criticism could be directed at the manner in which the Federal Reserve System functioned in this situation in the opinion of many it would be that the Reserve banks delayed too long in raising the rediscount rates. An earlier effort might have stayed the process of inflation.

The collapse of 1920 was by no means confined to agriculture, and was the inevitable sequel to the inflation period. All branches of business suffered in this period of reaction and perhaps none more than banking, against which this criticism has been levelled. The financial situation of the farmers was greatly aggravated by the fact that the high land values and high prices of agricultural products had led many farmers to incur obligations based on the inflated values. If the farmer was victimized at all, indeed, he was the victim of too much rather than too little consideration. The real progress which has been achieved in agricultural finance in recent years lies more in the intelligent distribution of farm credit than in volume.

With agencies now functioning for the provision of ample credits for the American farmer, his enduring success depends upon the wisdom and foresight with which he meets the problems of production and marketing. More than ever before, his activities must be regulated with reference to world conditions, and his profits, like those of the manufacturer or merchant, will reflect the measure of his success in adjusting his activities to these conditions.

Whitewash Still Is Oldest of Paints

No New Material Found to Supersede It.

Though whitewash is one of the oldest paints used in American agriculture for the interiors of barns and other buildings, no new material has ever threatened to supersede it.

"This is largely because whitewash is cheap, easy to prepare, and has undergone a process of improvement," says E. R. Gross, rural engineer, New Jersey College of Agriculture. White-

wash cleans and disinfects in addition to giving buildings a wholesome, pleasing appearance.

Quicklime is still the basic substance used in making whitewash, but years of experience have resulted in a formula that includes a few cheap substances which greatly improve the disinfecting qualities and durability of the mixture. What is commonly known as the government formula is excellent:

Half bushel (31 lbs.) of quick-lime or lump lime slaked in 7 gallons of hot water.

One peck (16 lbs.) of salt dissolved in 4 gallons of hot water.

Three pounds of ground rice boiled to a thin paste.

One pound of casein glue dissolved in one gallon of warm water.

Half pound of Spanish whiting dissolved with the glue.

The lime is slaked in a barrel or tub. The salt water is then added, followed by the glue and whiting mixture and, finally, the rice paste. The entire batch requires thorough stirring. Twelve ounces of alum added to this mixture acts as a hardener and makes it stick better. To increase the gloss two or three bars of laundry soap may be added. There is an advantage in applying whitewash while it is hot. Care should be taken not to apply it too thick, as it will then crack and scale.

Hill Selection of Seed Potatoes Is Satisfactory

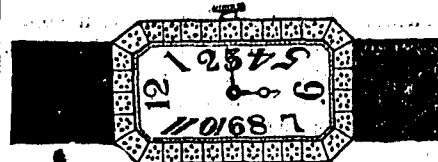

A large number of pairs of plants from similar halves of the same seed tubers were grown under as nearly the same conditions as possible and were compared for yield at the Geneva experiment station. Wide differences were found in the yields, ranging from nothing to 141.8 per cent of the average yield of the two plants of the pair, with an average difference of 23.4 per cent. This rather unexpected result is said to indicate that there are probably important factors affecting the yield of potatoes, which are unknown or which are not now fully appreciated. An unequal number of stalks per plant is known to have been an important cause of the differences in yield noted in the station experiments.

It is believed that these wide differences in yield of plants from halves of the same seed tuber which would ordinarily be expected to be quite uniform, show that the improvement of potatoes by the hill selection method cannot be carried to full perfection.

"The usual farm practice of selecting seed potatoes from the best yielding hills should not be affected by these findings," says the experts, "as they are of interest primarily to the expert or to those attempting to develop improved strains of potatoes. Selecting seed potatoes from high-yielding hills has been thoroughly demonstrated as a satisfactory method for maintaining high yields."

Test of Goodness

A good man not only forbears those gratifications which are forbidden by reason and conscience, but ever restrains himself in unforbidden instances.

The New Shapes

In our display of wrist watches are the new shapes so popular this season. Their development and designers show an expert skill that is most entrancing.

Sanitation Plays Important Part

Despite Progress Already Made There Is Room for Improvement.

(Prepared by the United States Department of Agriculture.)

Though the influence of sanitary surroundings in preventing disease is widely recognized, the very direct part it plays is illustrated almost daily in federal veterinary activities. One of the most important lines of this work is the eradication of tuberculosis from live stock. Owing to the systematic manner in which the testing is conducted, together with retests of infected herds, definite records now take the place of casual observations.

In one herd tested annually for a period of three years, each test disclosed at least two tuberculous animals. The premises and stable were in such condition that thorough disinfection was virtually impossible, and rather than improve conditions the owner finally quit the dairy business. In contrast to this experience are scores of cases in which infected herds, kept in sanitary barns, are soon freed of tuberculosis and kept so for long periods.

Striking Example.

One of the most striking examples reported to the bureau of animal industry, United States Department of Agriculture, was that of an Eastern dairyman who had an excellent herd which he kept in a very old dank barn. The herd numbered between 30 and 40 animals, mostly pure bred, and the owner paid several thousand dollars apiece for some of his sires. This was some years ago when public enlightenment concerning tuberculosis was just beginning. Frequent deaths occurred in the herd and finally the dairyman decided to have his cattle tuberculin tested. The first test showed a large proportion of reactors, and later tests took still more, indicating that infection was still on the premises. Ultimately his herd, representing years of breeding work and a large investment, was practically wiped out. The cost of a few good cows used in the construction of a modern, sanitary barn would have protected the large investment in the herd and prevented the inroads of the disease.

So important is the sanitary condition under which cattle are kept, with relation to their health, that the United States Department of Agriculture now pays federal indemnity for tuberculous stock only after the premises have been properly disinfected. This is a new ruling based on an interpretation of federal laws and regulations and on many of the state laws. A thorough clean-up is necessary, of course, before disinfection can be properly performed.

The ruling is expected to be helpful in reducing the number of reactors found on retests of infected herds. Unless disinfection is promptly and thoroughly done following the removal of tuberculous cattle from a farm, there is serious danger of continued lurking infection which may mean reactors to pay for at a later time. Such a practice is contrary to good business methods and the program of federal economy.

Room for Improvement.

Practical live stock sanitation includes such matters as good drainage, removal of manure at frequent intervals, foundations of concrete or other material that does not rot or harbor infection, good light and ventilation, and smooth walls, floors and ceilings that can be easily cleaned and disinfected. The trend of progress is plainly in the direction of better care and housing of farm live stock, since sanitation pays both in a business way and

from a health standpoint. But in spite of the excellent progress already made, department officials point out that there is abundant opportunity for more attention to this important subject.

Commercial Fertilizer Helps to Keep Up Humus

If you are short of stable manure and are using vegetable refuse of various kinds, and green manure, to keep up the humus supply in your soil, you will need a commercial fertilizer.

A 5-10-5 fertilizer is recommended. It should be used at the rate of a pound to every 30 square feet. If you cannot get the above formula, get a 4-8-4 or some other high in the middle and lower at the ends.

The numbers, which sound like a football signal, refer, in alphabetical order, to the percentage of fertilizing material—ammonia, phosphoric acid, and potash.

Where poultry manure is available, it may be used on the garden at the rate of a pound to 10 square feet. Acid phosphate at the rate of a pound to 50 square feet helps to balance it.

Wood ashes are good fertilizer but coal ashes are worthless except to loosen heavy soil. They should be sifted before being used for that purpose.

Nitrogen in Oak Leaves

Oak leaves contain but a little less nitrogen than stable manure, but this nitrogen is not very available, and the leaves are quite sour. They should be mixed with lime and well worked over. Then a combination of three parts by weight of fine bone and one part of muriate of potash mixed with the leaves will give a fair substitute for manure. If you have but a few tomato plants use one of the mixed goods. If the acreage is large it may pay to buy the chemicals and mix at home.

Fattening Turkeys Market Requires Grain

The marketing season for turkeys is very short. The best market usually runs from the middle of November to the latter part of December.

Turkeys should be started by feeding night and morning, just enough feed at a time so that they will go away still a little hungry. The feed may be gradually increased in quantity until they are given all they will clean up three times a day during the week before they are to be marketed.

A good feed, and one that most turkey feeders find satisfactory, is equal parts of wheat and oats during the first part of the fattening season, gradually changing to corn as the weather becomes cooler. It is a common mistake made by most raisers to begin feeding about November 1 with corn only. But since no preliminary feeding has made the birds accustomed to such heavy feeding, scours often result, especially if new corn is used. Old corn, which is free from mustiness, is a much better feed than new corn.

The wild turkeys put themselves in prime condition on a diet of nuts and acorns, and where these feeds are available, as they frequently are, they may be used. Best results, however, are obtained when a grain ration of oats, wheat and corn is fed.

Flushing Ewes Previous to Breeding Is Favored

As breeding time approaches for the ewe flock it is well to consider the practice of "flushing." This consists simply in increasing the feed to a point sufficient to insure liberal gains in weight throughout the breeding season. It matters not whether the increase be fresh, rich pasturage, or a light grain ration, the important point is that they be gaining, and in a normal, healthy condition. The advantages of putting the ewes in vigorous

A BIG BOX of SWEETMEATS

When you take home a box of Liggett's, Davenport's, Krauses or Imperial Candies, you know that there will be sufficient for every member of the family. No fancy boxes or packings—just a great big heaping measure of pure candies.

The Red Cross Pharmacy
Kendrick, Idaho

condition before mating—"flushing," as it is commonly termed—are so well recognized by successful shepherds that they cannot be ignored. It invariably results in a larger and more vigorous lamb crop. It may safely be depended upon to increase the percentage of twins born at least 10 per cent and the number of lambs raised 20 per cent or better. This means pretty good returns on a little extra feed. Experience shows that the ewes should not be in high flesh, but gaining. This practice of "flushing" will not give so satisfactory results with ewes that are in high flesh to start with, as with those that are in thin or moderate condition.

Look Into Value of Unknown Materials

Farmer Should Go Slow Before Buying Marl.

"Farmers should go slow and compare prices before investing in 'lime marl' and other questionable values in lime and fertilizers," says the New York State College of Agriculture at Ithaca.

During the past few months salesmen have been offering farmers "lime marl" at prices approximately \$12 a ton, and claims have been made that it is at least half again as good as limestone.

Marl is unsoftened limestone. The marl and limestone both contain lime in the same chemical form; both are of satisfactory fineness; both correct

soil acidity, and make soil conditions favorable for growing red clover.

This marl, says the college, is a good liming material when sold at a fair price, as analyses show it to have practically the same amount of calcium carbonate as good limestones, with practically no difference in "availability." Experiments at Cornell show marl, on the whole, to be slightly less valuable than a good, fine limestone.

Difference in price must be the deciding factor in choosing between the two products, say soils men, and compared on that basis, the marl loses. In one locality the marl costs \$12 a ton delivered, when good limestone costs \$5 to \$7 a ton delivered to the same station.

The local farm bureau or the agronomy department of the State College of Agriculture at Ithaca is always ready to help farmers on soil, fertilizer, and lime problems.

BANKERS HELP

The banks of Linn County Oregon, are showing more enthusiasm than ever this year in behalf of a county corn exhibit similar to that held last year at the Linn County Fair. Last year's exhibit was the result of a contest for a prize offered by a number of local banks. This was so successful that this year ten out of the eleven banks in the county will subscribe to the effort.

The Agricultural Committee of the Alabama Bankers Association has recommended that a scholarship fund be established for the education of

worthy young men and women along agricultural and home economics lines. It is estimated that if each bank in the state were to contribute 25 cents per thousand capital, five to six thousand dollars per annum would be realized.

The Agricultural Committee of the Oklahoma Bankers Association, in its report, recommends that the bankers see that a competent agent is appointed in each county and that he has a degree from some agricultural college. They believe that the agricultural possibilities of the state should be better advertised and that each county bankers association should do some work along that line.

Searcy County Bankers Association, Arkansas, entertained as its guests recently some seventy-five farmers and business men. The result was the organization of the North Central Arkansas Agricultural Association. Its purpose will be to co-ordinate the efforts of the farmers and business men in promoting a better agriculture. Searcy County bankers are giving 100 settings of purebred eggs for distribution to the boys' and girls' clubs in the county.

H. S. Mowrer, chairman of the Agricultural Committee of the New Jersey Bankers Association, together with H. J. Baker, director of extension work in the College of Agriculture, made a complete tour of the state this spring, calling on the county agents and agricultural committees of the various county organizations to get a definite line-up on the work done and

the plans for the coming year. Ways and means for furthering the program of the state committee were considered at these conferences.

FARM FACTS

A word of warning should be given about cutting alfalfa too late in the fall.

Good judgment is necessary in deciding on this question of the proper time of cutting alfalfa.

A well-fed horse will produce about fifty pounds of manure a day, about one-fourth of which is urine.

Heavy Egg Consumption
Canned frozen eggs used in cooking in this country each year have a total weight of 50,000,000 pounds.

LINDEN LOCALS
 Mr. and Mrs. Edgar Bohn have moved to their new home which they purchased from I. E. Foster some time ago.
 Mr. and Mrs. Perry returned to their home at Spokane after visiting with Mrs. Perry's parents, Mr. and Mrs. W. Zimmerman.
 Mr. and Mrs. Ray Weaver arrived Thursday from Pennsylvania to visit at the H. S. Weaver home. They made the trip in their car.
 Frank Starr returned to his home in South Idaho, Monday, after spending a week with his parents, Mr. and Mrs. H. J. Starr.
 Mr. and Mrs. John Darby and daughter spent Sunday with Mr. and Mrs. Clem Israel.
 Mr. and Mrs. George Garner are the proud parents of a 7 pound baby girl who arrived Sunday evening.
 F. C. Lyons and family and Aunt Carrie Allen spent Sunday with Mrs. Longfellow.
 Mr. and Mrs. Vester Daniels who farmed the Jim Langdon place the past season moved to Leland, Tuesday. A family from Juliaetta will farm the place next year and are moving up this week.
 Steward Wilson, Bert Shove and Clem Israel are hauling hay to Long Meadow.
 Mr. and Mrs. George Lockhart of Long Meadow visited at the McPhee home, Monday.
 Ben Smith and Arley Allen made a trip to Lewiston, Saturday.
 Mr. and Mrs. Walter Hunt and family left last Wednesday for their new home in Texas. They made the trip overland.
 Bill Benner went to Spokane, Tuesday to have an operation on his eye. He was accompanied by Jim Ball.
 Mr. McPhee and son, Cleve, were transacting business in Lewiston, Saturday.

Alfalfa and Silage for Dairy Cows Without Grain
 Some experiment station has been conducting a long-time experiment in feeding dairy cows on alfalfa hay and corn silage without grain feed. The test has been running now some ten years and the records show an average production per cow of something over 200 pounds of butterfat a year. That is good.
 Alfalfa hay and corn silage make up a perfectly balanced ration and provide ample substance for cows of average production. Cows of high production, of course, require grain, but it might be said that the production of average cows kept for dairying in Minnesota could be increased a third if they were fed all the alfalfa hay and corn silage they required without grain. Too many farms are without an acre of alfalfa and without a silo.
 A ton of good alfalfa hay is worth pretty close to a ton of bran for milk production. From two to three tons per acre is a reasonable yield. It can be seeded as late as June 31st and a start this season.
Mean Remark
 Says an old bachelor: "Before taking the leap through the wedding ring a man should be sure the net of conjugal bliss is properly stretched on the other side."

Start Bee Year With New Queen
Proper Time to Prepare for Next Year's Crop and Supply of Stores.
 Strong colonies of bees produce the bigger crops of better honey, according to V. G. Milum, apiarist at the Wisconsin College of Agriculture. He suggests that this is the proper time to prepare for next year's honey crop.
 The first step in this march to success, according to Mr. Milum, is to see that every colony is supplied with a vigorous Italian queen immediately. This young queen may be purchased from a reliable queen breeder or may be reared by some method in the apiary. A young queen, Milum points out, will produce a strong colony of young vigorous bees which will winter successfully and still be young and vigorous in the spring, provided they are given proper winter and spring protection and plenty of stores.
Saves Winter Stores.
 Milum maintains that the successful beekeeper is the one who saves the first surplus of stores for winter feeding and spring development of brood rearing. In addition it saves a lot of work in extraction of this surplus, but especially it insures the colony against starvation in winter and during unfavorable spring weather.
 Another suggestion of Milum is that with the honey flow now coming to a close, all hives should be inspected to see that they are bee-tight, except the entrance, in order to prevent robbing. He warns against leaving honey exposed when examining colonies if any manipulations are necessary. Once robbing is started in a bee yard, it is practically impossible to do any work with the bees.
Don't Remove Frames.
 In connection with the extraction of the honey crop Milum advises that frames should not be removed for extraction until they are well capped over, or not until after a week or more following the close of the honey flow, depending upon the locality and the type of weather conditions. Unripe honey will granulate readily and fermentation will cause all kinds of trouble and inconvenience besides giving an unmarketable product.
 With the approach of honey harvesting time, Milum suggests that an inventory be taken of labels and containers. Attractive labels and containers aid in the sale of the product. A quality product is always more valuable; therefore beekeepers are urged to prepare their honey carefully.
 A well-ripened honey is the first step in the production of a quality product and the second step is clean, well-strained honey. If it is then packed and displayed in a neat attractive container the chances for profit are greater.

Ground Corncobs Have Definite Feeding Value
 Chemists' analyses indicate that corncobs and out straw contain about the same amount of food material. Many practical farmers who have looked on out straw as having but little feeding value have felt that corncobs were even more worthless. Now, however, the Minnesota station finds that ground corncobs are worth considerably more than straw. They have been experimenting with corn and cob meal and have found that it gave somewhat better results than shelled corn. Then they wondered how it would be to substitute finely ground out straw for the corncobs and so they mixed straw, cornmeal with finely ground straw. This did not do nearly so well as the corncob meal. Next they wondered what results would be obtained if the cornmeal and the ground cobs were fed separately. It was discovered that when the corn and cobs were fed separately that just as good results were obtained. This seemed to prove that ground corncobs have a definite feeding value.
 These Minnesota experiments are not sufficiently extensive to be at all conclusive. Nevertheless they suggest that corncobs probably have a feeding value much greater than most farmers have thought.

UNCLE HANK

 A horse weighing 1,600 pounds is about right for farm work. It is not advisable to have him heavier.
 Leather belts run with the grain side to the pulley will drive 30 per cent more than if run with the flesh side toward the pulley.
 It is easier to teach a colt when six months old than when two years old, and everything has to be crammed in at once. Encourage the boys to play with the colt, to put a halter on him, and even to hitch him up to a sled or cart.

GLEANINGS

Mrs. Hansfurther of Genesee returned home last Saturday after visiting at the home of her sister, Mrs. N. Brocke.

J. C. Bibb of Lewiston arrived the first of the week to visit his daughter, Mrs. J. G. Gardner.

J. R. Haizlip left last Saturday for Spokane where he spent the week end with friends.

Mr. and Mrs. R. W. Bigham and family moved to Bovill the first of the week to make their home. Mr. Bigham has steady employment at one of the camps and will probably be there all winter.

Mr. and Mrs. F. A. Varo and baby of Leavenworth, Washington, arrived last Saturday to visit at the home of Mr. and Mrs. N. B. Long.

Miss Alice Garretts arrived last Saturday for a brief visit at the home of her sister, Mrs. A. E. Janes. She is teaching school at Washitucna, Wash. Her mother accompanied her home Monday afternoon.

Martin Thomas went to Lewiston last Saturday on business.

Mrs. George Davidson and Miss Winifred were Spokane visitors the first of the week.

Mr. and Mrs. Walter Thomas of Lewiston spent Sunday in Kendrick with relatives. They are driving a new Chevrolet coupe.

Ira Foster, who has been working at Elk river during the summer months, returned to his home here the first of the week where he will spend the winter.

Mrs. R. M. Walker returned to her home in Peck last week after visiting her sons, Norris and Floyd.

The Kerns families spent the week end in Tekoa with friends.

Clifford Davidson will hold a public sale at his place on American ridge, Thursday, October 22. He will sell his household goods and farm equipment, as he expects to leave soon for Cali-

fornia where he has a position as manager of a big stock ranch.

Arthur Janes and Homer Bell are expected home the last of this week from Wenatchee where they have been picking apples. They drove over in a Ford truck and expect to work their way home by the same method. Homer has a position in the local office here as assistant postmaster.

Mr. and Mrs. E. A. Deobald and children, Mr. and Mrs. Otto Schupfer and children drove to Craigmont, Sunday, to spend the day at the home of Mr. and Mrs. Roy Thompson.

A. M. Heindselman and Mrs. M. H. Pool of Spokane spent the week end at the home of Mr. and Mrs. Charles G. Pool in Kendrick.

It is becoming more evident every day that it is the "green" drivers who speed through Main Street. Those who have handled a car for any length of time realize there may be danger lurking around every corner. Speeding through town simply denotes the lack of a well balanced mind.

Mrs. Leonard England and two small daughters returned to Geldford, Montana, after spending the summer with her parents Mr. and Mrs. H. Murphy.

The Ben Cummings family have moved from the Raby residence to the two story house owned by W. T. Wright. The house has been recently repaired and makes a nice home. Mr. and Mrs. Deeter are living in the Raby house but as soon as they move to their newly purchased bungalow, the Raby family will move from their ranch to town.

Frank Bunger of Southwick will hold a public auction, Monday, October 26, at which time he will sell off his entire farming equipment. Bills for the sale are being printed this week in the Gazette shop.

Canyon Post No. 66, American Legion, have announced a dance for Friday night, October 30. They have engaged Chase's Tempo Teasers to furnish music for the occasion.

Wallace Kimberly, who is employed at N. B. Long & Sons store, lost the end of a finger while operating the meat grinder, Tuesday the 13th.

Grant Bateman, who is farming in Bed rock canyon, brought four ears of yellow dent corn to Kendrick, Monday, that weighed five pounds. Grant has 50 acres of corn

this season and he said the yield will be very good.

Adam Wagner of Farmington, Wash., was in Kendrick, Tuesday, looking after his property interests here.

Kendrick is well represented at the Lewiston normal this year with the following young ladies enrolled: Flossie Bradshaw, Edith Dammarell, Winifred Davidson, Iola Morey, Dorothy and Opal Jones. Only 34 are registered from Latah county.

Mr. and Mrs. K. M. Bibb and daughter returned to their home at Kelso, Wash., Saturday, after visiting at the home of Mr. and Mrs. J. G. Gardner.

CRESCENT CLIPPINGS

Mrs. Lucy Hoffman and Mr. and Mrs. John Darby and baby spent Sunday with the Clem Israel family.

Mr. and Mrs. Leroy Southwick and baby came in from their home near Lenore, Monday evening. Mr. Southwick returned Tuesday, but Mrs. Southwick and baby will visit a while with Mrs. Southwick's mother, Mrs. Wm. Kauder.

Adaline Dorenaorf visited with Helena Reiche, Sunday.

Wm. H. Loeser is doing some clearing for John Darby this week.

Wm. Kauder left for Moscow, Tuesday.

Burton Souders came home Monday evening to spend a few days with his mother, Mrs. Frank Souders.

Fred, Elsie and Gladys Darby visited with relatives in Crescent, Saturday.

Elmer Souders has been helping several Cedar Ridgers with their beans lately.

JONES WAS THERE

A pastor was announcing funeral services for one of the members of his congregation, the Hon. William Jones. "I want all of Brother Jones' old friends, pals to be here," said the pastor. "The lodge members will attend, the officers of the church will be here to do honor to Brother Jones. Brother Jones himself will be here for the first time in 24 years."—Ex.

Planters Control Lines

Nearly all railroads in Porto Rico are owned by sugar growers, who seldom use them except during the sugar manufacturing season.

Mother's Best Friend

With the widely diversified programs sent out over the air by broadcasting stations throughout the country and brought into the home by present-day receiving sets, Mother can and does find in the radio the greatest source of amusement, instruction and pleasure for herself and the family and guests. Radio gives the family home the best of music furnished by the playing and singing of the best and greatest artists of the world. It has solved the problem of entertaining others on any and all occasions. On Sunday the family enjoys religious services broadcast from various churches where voices of scholarly clergymen and splendidly trained choirs are put on the air.

New Prices on Crosley

Crosley gives more for the money. Crosley is firmly established. Crosley is nationally known and accepted. Crosley performance is greater.

\$9.75 to \$66.00

You CAN'T buy radios at lower prices and you'll have difficulty in finding radios at ANY price that are one bit better in quality of reception or the well-known D X, radio for distance.
