

## Market Assured Seed Growers

### Imported Seed Causes Big Losses to Growers

The opportunity which fulfillment of high standards of quality and strict certification requirements may realize for the Idaho small seed industry are shown clearly in government figures collected and issued by the Agronomy Department here in connection with the recent tour of the producing regions by representatives of the Federated Seed Service.

The loss to farmers in the corn belt and in the northern and eastern states thru the use of unadapted seed, makes, when set down in black and white, a startling figure.

During the last five years 12,000,000 pounds of red clover seed imported from Italy, enough to plant 1,000,000 acres, has been distributed in these regions causing a total loss of \$20,000,000—in other words a tax of \$4,000,000 a year on farmers who planted it.

During this same period 24,000,000 pounds of Argentine alfalfa seed have been imported to the United States and largely distributed in the northeastern quarter of the United States causing a loss in excess of \$30,000,000 or \$6,000,000 per year.

The Federated Seed Service is incorporated for the purpose of insuring distribution of seeds of known origin, variety and quality to its members and of maintaining inspection and supervisory regulatory powers. In addition to supplies assembled and cleaned by members arrangements have been made for additional supplies from reliable commercial service under the inspection of the federated seed service.

A good market is thus assured Idaho growers who are able to furnish seed of known origin in sealed bags, properly labeled as to purity and germination. At present approximately 18,000,000 pounds of adapted northwestern Canadian alfalfa seed is available for sale in the corn belt and in the northern and eastern states. On the same market 15,000,000 pounds of unadapted imported alfalfa seed from mild regions is being offered for sale.

To protect northern growers as well as our home grown seed it is the general opinion of the Federated Seed Service that imported seed should either be eliminated by legislation or branded so that the purchaser can identify it. A law requiring staining of imported seed would eliminate the blending of foreign seed with native grown seed or the sale of foreign seed for native seed. Thus it would not only protect the eastern buyers but also would stimulate the use of desirable western grown seed.

Incidentally the representatives of the various organizations composing the service warmly commend the way in which Idaho's small seed industry has been developed and organized. The members of the party who with Prof. W. W. Hulbert, agronomist of the Experiment Station, and C. B. Ahlson, extension agronomist, visited Twin Falls, Buhl, Pocatello, Aberdeen, American Falls, and Blackfoot, were greatly impressed according to their own statements, both by the present development and the future possibilities of the industry. They commend particularly the standards of quality and certification requirements set up by the Extension Service.

Who was the fastest man with a 6-shooter in the west during the roaring days of cattle drives, the road agent? Hundreds of men were shot down struggling for this honor. The names of a dozen who were deadly enough to be known from the Pecos to the Canadian border come to mind, but of them all the fastest man

## John J. Slind

John J. Slind, one of the most highly respected residents of this section, passed away at his home on Bear Ridge, Thursday, October 15, after an illness of several months. Although he had every attention during his illness, there was little hope for his recovery on account of his advanced age.

Mr. Slind was born in Selbo, Norway, September 11, 1843. He was married in 1867 and came to this country the same year, settling in Jackson County, Minnesota where he lived for 15 years. In 1902 he moved to the Kendrick section where he engaged in farming until recent years when the active work of farming his place was taken over by his sons. He owned a fine farm on Bear Ridge, which was the family home.

In reaching the age of 82 years Mr. Slind passed the average life of man by a number of years. He led the life of a good citizen and a good neighbor and was loved by a host of friends for his kindly ways.

He is survived by his wife, Marie Walborg, six daughters, five sons and two half brothers.

The funeral service was held at the Lutheran church on Bear Ridge Sunday afternoon at 2 o'clock. The service was in charge of Rev. Peter Hesby of Deary and Rev. Bodine of Troy. The pall bearers were A. Kleth, Andrew Lien, Ole Lien, N. E. Ware, Jens Wiggin and John Baken.

A very large crowd was present at the funeral to pay their last respects to their departed neighbor and friend.

## Pay 8 Per Cent Interest

The stockholders of the Kendrick Rochdale Co. recently received interest payments of 8 per cent per year covering a period of the last two years, making a total of 16 per cent on the stock. This is the first payment received by stockholders of the company for a number of years past. Due credit should be given to the present management for the good showing. The company is in splendid condition and with better financial conditions and improved agricultural conditions there is no reason why the company should not continue to flourish.

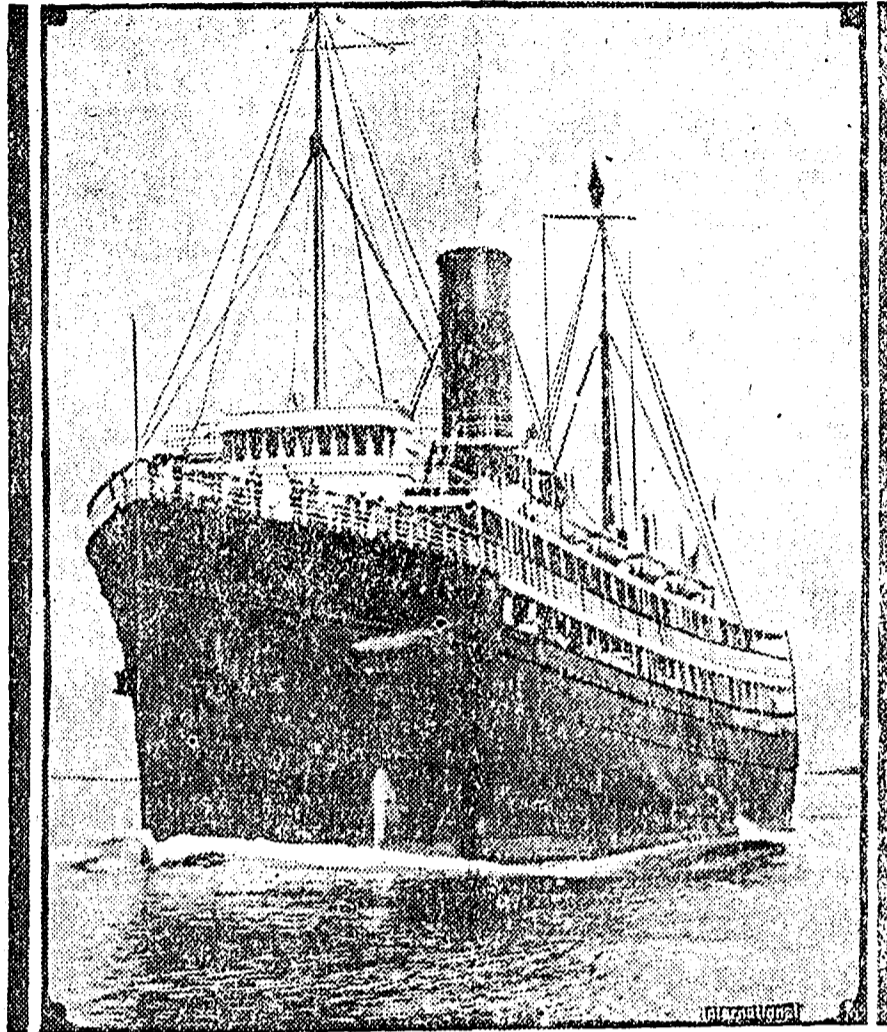

## County Will Not Surface

At the meeting of the Latah county commissioners, held Monday and Tuesday of this week, it was decided to allow the surfacing of the short strip of road between Kendrick and Juliaetta to be postponed indefinitely on account of lack of available finances.

on the draw was Wild Bill Hickok, marshal of Abilene, who attained his reputation fighting on the side of law order. His conversation was free from profanity, vulgarity. He said it was useless. He never picked a quarrel—but, as he once explained, "When I'm 'put upon' it seems everything gets cloudy. I lose all control over myself." Hence the name Wild Bill; tho' it should be added his fits of temper never affected his shooting. Hickok was a famous scout during the Civil War, but his renowned exploit was the wiping out of the McCaules gang. Wild Bill was alone in a cabin, the McCaules, thinking their chance to get their old enemy had come, went in after him. There were not less than 10 in the gang. Wild Bill was armed only with a 6-shooter. Nevertheless he killed at least 4—some say all 10—drove away the rest with a bowie knife. Wild Bill, himself, was wounded with buckshot in 11 places, slashed in 13, any of these wounds might have killed an ordinary man, but Wild Bill recovered, only to be shot at last—from behind—while playing poker in Deadwood, S. D.—

## Leland School Notes

The two Haight children enrolled in the Primary room this week bringing the enrollment for the entire school up to sixty-five.

The intermediate room reports fourteen pupils neither absent nor tardy for the past month.

Last Friday was an interesting day with the scholars. In the afternoon eighteen pupils from the Grinoids school accompanied by their teacher, Mrs. Goans, came in for a spelling match with the intermediate room. The contest was interesting and showed that many pupils had been giving considerable attention to spelling. The visitors carried off the honors. On Friday evening about forty enthusiastic people consisting of scholars, teachers and parents accompanied the high school spelling team, made up of Edith Taber, Minnie Craig and Jack McCall, to Southwick where they had been challenged for a spelling match. The one thousand word scale by Avers with the Buckingham extension had been agreed upon and studied as a basis. The Leland team won the match. Edith Taber won the highest honors by not missing a word during the entire contest.

The high school boys have ordered a football and expect to begin playing in the near future. In the meantime Mr. Calvert is having an opportunity to size up the prospects for a spring base ball team. The twice-a-week general assemblies have proven quite interesting. On Wednesday mornings the program consists largely of singing, while on Friday each of the three rooms alternately puts on a program, the teachers putting on one the fourth Friday. Last Friday sixteen parents were present. Others are invited.

A school fair is being planned for Friday afternoon, October 30. A course in book keeping has been added to the high school curriculum. Several scholars have taken advantage of the opportunity to learn something about business. Some extra work is also being given. The boys will take up something along the line of Farm Shop. The first subject will be cement and its uses. Mrs. Calvert will give the high school girls a course in millinery, while Miss Ottosen will teach sewing to the intermediate girls.

The Glee Club held their first rehearsal Tuesday evening. Miss Powell, Miss Ottosen and Mrs. Calvert are assisting with the music.

Miss Thelma Blackburn of Cavendish, daughter of Mr. and Mrs. Mitch Blackburn, spent the week end at the home of Mr. and Mrs. M. O. Raby.

## Had Thrilling Experience

Wade Keene, Walter Bigham, George and Byard Davidson returned late Sunday morning from a very successful hunting trip in the Selway country. They each shot an elk and got three deer besides. They had ideal weather for the trip.

On the return home Wade Keene had a thrilling experience while crossing the ferry on the Clearwater. His car was loaded to the guards with wild meat and elk horns. As the ferryman was landing the boat, in order to hold it to the shore he sat on the cable to keep it taut. Unfortunately he fell back wards into the river. Wade started to drive his car off the boat but was so interested in watching the floundering ferryman that he didn't notice the ferry was receding from shore until he had driven the front wheels off the boat into the river.

It looked like a serious predicament for a time but the car hung to the end of the boat, which was tipped almost on end by the weight. The engine was entirely underwater.

The ferry was finally landed and after getting the surplus water out of the motor the car was started and the journey resumed.

## Potlatch Bean King

Claud Craig still holds the crown as the bean king of the Potlatch. This year he had 280 acres in beans and harvested 1636 sacks. His brother, Orval, was probably second high man with a yield of over 1200 sacks.

Claud planted a number of varieties of beans and in this way his harvest operations were spread over a considerable period. By the time one field was harvested another would be ready to start on. His lowest average yield was 4 3-4 sacks per acre and his highest was 10 1-2 sacks per acre, which is an exceptionally heavy yield.

He expects to increase his bean crop next year to 500 acres. This will be a record breaker for any one man's bean crop.

## Legion Dance October 30

The second dance given by Canyon Post No. 66, American Legion will be given at the Fraternal Temple next Friday, October 30. The Harvest dance given several weeks ago was a huge success and the one next Friday is expected to be a repetition of the first, from the standpoint of a good time, good music and a big crowd.

Mr. and Mrs. Ralph Knepper transacted business in Spokane last Saturday.

## Idaho Products Week

With the endorsement of the Idaho Products week by the Idaho Federation of Women's Clubs at Blackfoot last week the observance will be a great success, in the opinion of the officers and directors of the Idaho Home Industries Association. Letters have been sent to all commercial bodies in the state asking that committees be appointed to cooperate with the committees from the women's clubs to emphasize during one week the necessity of supporting the home merchants and of buying products grown and made in Idaho. Information concerning the Idaho products have been sent to all of the federated clubs in the state and already the office of the Association reports much activity toward featuring Idaho—made products for that week.

In Boise the week will be stretched into three weeks beginning with the Home Coming Week of the chamber of commerce there Oct. 23 to 30. Much activity is also reported at Pocatello, Blackfoot, Idaho Falls, Wallace, Lewiston, Shoshone, Twin Falls and other communities where programs, exhibits, demonstrations and mass meetings have been scheduled to impress the public with the necessity of supporting home industries.

Special emphasis is made during the week on the stocking up by retailers and consumers of Idaho products for the entire winter. If the consumer becomes acquainted with Idaho quality goods it is felt that they will not easily drop back to a policy of hit-or-miss buying. Idaho goods are guaranteed by our neighbors and the buying of the same supports home institutions and builds up taxable wealth.

Newspapers have assured many columns of publicity including write-ups of the local industries. This is essential and local people are urged to show their appreciation for the newspapers by getting their printing done at home. Several papers are already conducting "Buy At Home" campaigns for the good of the community. Special numbers are being issued by these loyal community boosters in many towns.

## New President Pullman Bank

George H. Watt was elected president of the Pullman State bank by the board of directors in session Wednesday night, succeeding J. N. Scott, who died suddenly last week. Mr. Watt is the fourth president of the pioneer banking institution, those preceding him having been J. J. Staley, Senator R. C. McCroskey and J. N. Scott, in order named. George H. Gannon, cashier of the bank, was elected to the board of directors in place of Mr. Scott and was assigned to the active management of the bank's affairs. G. G. Oldfield, assistant cashier, was advanced to the first cage and will assume many of the duties formerly performed by Mr. Gannon.

There will be no change in the policy of the bank, according to the officers.—Pullman Herald.

## Missionary Here Sunday

John W. Hoyt, the S. S. Missionary will address the Sunday school and fill the pulpit in the Presbyterian church next Sunday, October 25th.

## Held District Convention

The Methodist ministers of the Moscow district held a district convention at Kendrick, the first of this week, Monday and Tuesday.

The commercial club of Kendrick is wide awake and is boosting. They made a present of a small bag of beans to each preacher present.

There is a great bean growing district around Kendrick—Culdesac Enterprise.

## Latah County News Paragraphs

### Items of interest Taken From Neighboring Papers

Frank Ray sold 4,000 pounds of strawberries off 1 acre and the vines are still bearing. Frank showed us a handful of berries Saturday which he picked that morning. He sold 12,000 plants this spring. We've said before that this section produces the finest plants for setting that can be found anywhere. They grow a great mass of fine roots—the roots on a single plant nearly heavy enough for a set of Santa Claus whiskers.—Deary Press.

Since bean harvest is over the farmers are making delivery to the warehouses. Some report a large yield and some not so good, but all agree that the yield was better than expected and that a normal crop has been gathered.

Mrs. Jas. Hutchinson claims the championship of Fix ridge as her 40-acre field produced better than 8 sacks per acre. Walter Clark had 50 acres that returned him 5 one-half sacks per acre, and some report yields of as low as 500 lbs. per acre.—Juliaetta Record.

Ole Bahnyun received a telegram yesterday saying the searchers had given up all hope of finding his son Ernest. He was returning from Siberia on the ship Ariel, which was wrecked on the coast of Alaska. After the wreck Ernest left alone to procure help. Another left later for the same purpose, and reached Nome the third day. Ernest has not been heard from since the time he left the party. He was one of a Siberian mission of which Dr. Hoyer is the head, and which had been in Siberia distributing food and clothes.—Troy News.

## For Children's Home

Mrs. Laura Schroeder of Lewiston was in Kendrick, Wednesday, in the interest of the Idaho Home Finding Society. She stated that finances were needed badly at this time as the demands upon the home are increasing every year. A substantial addition has been recently completed to furnish more rooms for the children. Many of the rooms are unfurnished and a system of getting donations for securing furniture has been adopted. The sum of \$100 will furnish a room. Anyone donating this amount may have his name engraved on a plate to be placed on the door of the room. For \$35 a bed may be purchased. The name of the donor of this amount will be placed on the bed etc.

Two days have been set aside as gift days for the home, at which time donations of canned fruit, potatoes, meat or any staple food stuffs may be brought in to N. B. Leng's store, which will be the receiving station for the produce. The days are Saturday and Monday, October 31 and November 2. This is a worthy cause and a generous response is expected.

## Bovill Store Robbed

Robbers broke into the Groh Bros. store at Bovill last Monday night and stole merchandise to the value of \$1500. Stuff from all over the store was taken and the stock shows heavy losses. No clues were left and the robbery was not discovered until the store was opened at 7 o'clock Tuesday morning.

Sheriff Charles Summerfield was called and he in turn notified officers all over this section. It is believed the job was done by an organized gang as a number of such robberies have been reported over the northwest one being done at Sandpoint last Saturday night.

## Just The Shirts You've Wanted

Perhaps you have thought at some-time or other, when slipping on a clean shirt, of the kind of a shirt you would like if you could make one yourself. Well, here they are. Just right in every particular—and a big lot of new colors and patterns to choose from.

Banded and collar attached styles.  
Flannel and blazers.

"The Home of Good Things to Eat and Wear"

### THE KENDRICK GAZETTE

Published every Friday at Kendrick, Idaho, by

Ralph B. Knepper

Subscription price.....\$1.50

Entered at the post office at Kendrick as second class mail matter.

It is said that in China there are no chicken farms and that no family is permitted to own more than 10 hens, some only 6 hens, but China ships eggs all over the world. It is probably intended that we should take a lesson in thrift and frugality from China, but who would want to be a Chinaman!

### Newsy Notes From Southwick

Written for the Gazette by  
Special Correspondent

Mr. and Mrs. Delber Farris left late Thursday for their home in Boise after a visit with his parents, Mr. and Mrs. R. G. Farris.

Mrs. Betts and son, Russell, were Sunday guests of Mr. and Mrs. Wm. McClelland.

Mrs. Clarence Hewitt went to Clarkston last Thursday to visit her parents, Mr. and Mrs. Thomas Phillips, returning home Sunday.

Tom Armitage and Grant Bateman went to Lewiston, Sunday, returning home Monday.

Mr. and Mrs. John Hewitt spent the week end with their daughter, Mrs. Roy Blankenship of Bed Rock.

J. R. King and Mr. Hoppe drove to Orofino, Monday.

Darl Wright was a business visitor in Kendrick, Monday.

Mr. and Mrs. John Phillips and Harland Hewitt and family spent Sunday evening at the home of C. E. Hewitt.

Mrs. Rozelle and son, Herman Smith of Seattle and Mrs. Doff of Spokane, came Monday to visit at the Claud Kimes home. They left Thursday for Spokane.

Aaron Wells of Moscow made a brief visit with his mother, Mrs. Wells, Monday evening, on his way home from a hunting trip.

Mr. and Mrs. Floyd Russell were business visitors in Kendrick, Tuesday.

Ben Davis and Elton McCoy drove to Lewiston, last Wednesday, returning home Thursday.

The spelling contest held Friday night between Leland and Southwick was won by the Leland school.

Mrs. E. M. Locke of Leland is spending this week with her daughter.

Grandma Wells was the dinner guest of Mrs. Ben McCoy, Monday.

Rev. George Calvert of Cream ridge held services both morning and evening at the U. B. church.

Fred Whittinger and family spent Sunday at the home of his father, Wm. Whittinger.

Mrs. George Jones and son, Albert of Elk River, spent Saturday night and Sunday with Mr. Jones of Southwick, returning to Elk River Sunday evening.

### CAMERON NEWS

Gus Blum returned home from Princeton last Wednesday after working five months in the forest service.

Mrs. Otto Silflow and little son returned home from Spokaue Saturday.

Mrs. Silflow is in Lewiston for an extended time taking treatments. She is with her daughter, Mrs. Gus Kruger, who recently located in Lewiston.

Mr. and Mrs. Blum, Gus and Henrietta motored to Genesee, Sunday.

Henrietta Blum is visiting her sister at Kendrick for the week.

Miss Bertha Hartung was visiting at the home of Mr. and Mrs. Glen Betts, Monday.

Mrs. Frank Wilken spent Tuesday at the home of Mrs. Fred Schoeffler.

### CRESCENT CLIPPINGS

Mrs. Leroy Southwick, who has been visiting with her mother, Mrs. Wm. Kauder, left for her home near Lenore, Sunday.

School started again, Monday, after a week's vacation.

Miss Tillie Dorendorf came home Sunday evening to stay a few days.

Jim Rice was in the neighborhood on business, Monday.

Mr. and Mrs. Roy Drury and children and Mrs. D. J. Hammond of Spokane, spent Saturday night and Sunday at the John Darby

home.

R. H. Reed of Colfax was in this part of the country last week on business.

Mr. and Mrs. Fred Darby, Elsie and Gladys Darby and Warren Trail motored down from Moscow, Sunday. Miss Elsie will stay awhile with her brother, John, but the rest returned home, Sunday evening.

### STONY POINT NEWS

Mrs. Lester Hill left Saturday for Pocatello to attend the Rebekah grand lodge.

W. M. Evans and Mr. and Mrs. Alfred Evans of Texas ridge were visitors at the Ike Steensma home, Sunday.

Alvin Steigers had dental work done at Kendrick last week.

Mr. and Mrs. Albert Heimgartner and Mrs. Frank Housington went to Lewiston, Tuesday, where Mrs. Heimgartner had dental work done.

Lloyd Eckman made a business trip to Lewiston the first of the week.

Mr. and Mrs. Wodleman visited Sunday at the Leonard Fairfield home.

Mr. and Mrs. Will Zumhofs are moving this week to their new home.

Mr. and Mrs. Ike Steensma were callers at the Dygert Bros. home, Monday evening.

Mr. and Mrs. Groseclose of Juliaetta were visitors at the Ike Steensma home, Tuesday.

### CARD OF THANKS

We wish to express our heartfelt thanks to our many friends who so kindly assisted us during the illness and after the death of our beloved husband and father; also to those who so kindly contributed the beautiful floral offerings.

Mrs. Marie Slind and Family.

### CARD OF THANKS

We wish to thank our friends and neighbors for their kind assistance during the illness and after the death of our husband and father.

Mrs. Emma Betts and Family.

### CARD OF THANKS

We wish to express our sincere thanks to Rev. Bell and family and the many others who so kindly showed their sympathy in our late bereavement in the loss of our husband and father.

Mrs. John Christensen, Mr. and Mrs. W. S. Christensen,

Mr. and Mrs. Geo. Christensen and family,

Mrs. May Eagen,

Mr. and Mrs. E. E. Craddock.

### Value of Cowpea Hay

A ton of cowpea hay contains as much food value as does a ton of wheat bran. Still, the bran finds a ready market among farmers at from \$30 to \$40 per ton. Soy beans are very rich in nitrogen and consequently in protein since all protein must contain 16 per cent of nitrogen. Cowpeas and soy beans do not leave so much nitrogen in the soil as clover, but a considerable part of the nitrogen is left in the soil in the roots.

### Time to Cut Alfalfa

A good time to cut the alfalfa is in late afternoon because the sun will not wilt the leaves too quickly and cause them to shatter. Hay cut in the morning will not cure right because the leaves will be quickly wilted by the hot sun; the stems will also be full of juice; and the leaves will be dry and may blow away before the stems are ready to stack.

### Singeing Hair Harmful

Singeing of the hair is both harmful and useless. Curling and waving also are detrimental to healthy hair growth. —Hvzeia.

### SOUTHWICK CHURCH NOTES

Saturday evening at 8 o'clock the 1st quarterly conference will be held at the church, Rev. C. E. Miller, district superintendent, presiding. On Sunday morning at 10 o'clock Sunday school. Preaching at 11 by Rev. Miller. A full attendance is desired to both services. Joy Bell, Pastor.

### METHODIST CHURCH

**The Great Pacific International Exposition  
Portland, Oct. 31 to Nov. 7 — Let's Go!**

A. C. RUBY OF PORTLAND AND HIS "BIG SIX." THERE ARE EIGHT ENTRIES FOR THE IMPERIAL HOTEL \$1,000 SIX-IN-HAND DRIVING CONTEST

THE Pacific International Livestock Exposition opens Saturday, October 31st, running until and including Saturday, November 7th. The building covering over ten acres of ground under one roof is the annual gathering place of livestock which constitutes the greatest affair of its kind in the world, all of the best in the West competing against the champions of Eastern shows that come to the Coast by a special train made up

of freight, express and Pullman cars for whose swift passage even the crack passenger trains are side-tracked. The Horse Show which is held in connection with the Exposition is in itself of international importance and its record offering of \$28,000 in prize money attracts the best horses from all portions of the continent, more than a dozen carloads coming from east of the Missouri River. There are 85 events on the

1925 program, of which 13 are stakes averaging in value \$1500 each, which have been subscribed by enterprising business men and institutions of Portland and Seattle. A. P. Fleming, who has managed the horse show since its first year in 1919, has been the great factor in its upbuilding and is considered to deserve more credit than any other one person for the remarkable comeback of the horse show game on the Pacific Coast.

**Lime and Legumes  
Build Up Fertility**

**Immediate Profits Result  
When Properly Used.**

Lime and legumes used properly will help to build up the fertility of the land and will give immediate profits to the crop following the treatment, finds R. T. Lenoir of the Yadkin Valley (N. C.) section, who conducted a demonstration with County Agent D. W. Roberts this past year. "This year Mr. Lenoir had 110 acres in wheat. Part was grown on an alfalfa sod, part on a plot where a crop of soy beans had been turned under, part on a clover sod and another part on old wheat stubble land," says Mr. Roberts. "Previous to this year all of the land was thought to be of the same fertility. The land was prepared for wheat alike. Each plot received the same amount and kind of fertilizers, the same amount and kind of seed and was sown practically on the same day. The only difference was that lime and alfalfa had been used on one plot; lime and soybeans on another; lime and clover on the third and wheat stubble alone on the fourth. "When the crop was harvested the

alfalfa plot yielded at the rate of 34 1/2 bushels of wheat per acre; the soy-bean plot at the rate of 27 1/2; the clover plot at the rate of 25, and the wheat stubble plot yielded at the rate of 6 1/2 bushels per acre. "The crop cost Mr. Lenoir \$15 per acre including marketing and was sold on the local market for \$2 per bushel. "To make a long story short, Mr. Lenoir made a net profit of \$54 per acre from the alfalfa sod plot, \$40 per acre from the soy-bean plot, and \$35 per acre from the clover sod plot. Where no lime and legumes were used but only the wheat sod planted, he lost \$2 per acre on the venture."

**Good Proof That Silage  
Not Injurious to Cows**

The fact that silos have been used in this country for more than 30 years, and have increased in popularity each year, especially in the dairy districts, is abundant proof that silage is not injurious to cows. Corn, the giant of the grass family, produces more food per acre for live stock than any other known plant. Its nature is such that it cannot be economically harvested at that stage of its growth when it contains the largest per cent of digestible nutrients and stored like other members of the grass family. If allowed to mature it, like

other grasses, develops a large amount of indigestible matter—cellulose tissue which is unpalatable as well as indigestible. Then, too, it is very bulky, requires a large amount of storage, and is bothersome to feed. Harvested after it becomes ripe, and handled in the very best known way, more than 30 per cent of its food value is lost. But if harvested when green, at the proper time, and stored in a good silo, much more of it is digestible and there need not be a loss to exceed 5 per cent in food value.

**Small Amount of Iodine  
Needed in Cow's Ration**

A small amount of iodine is needed in the ration of dairy cattle for the proper functioning of the thyroid gland. A deficiency of this element results in goitre or "big neck" in calves. Iodine is often lacking in soils distant from the sea, and consequently goitre is more prevalent in such regions than near the sea coast. Decaying sea weeds liberate this element, which is carried by the wind over the land and taken up from the soil by the crops. The addition of one-tenth of a pound of either sodium or potassium iodide, finely pulverized, to 100 pounds of salt and this mixture fed to meet the salt requirement, is sufficient, as only a little more than a trace of iodine is needed. Since milk and butter are very good natural sources of iodine in the human diet, it is important that the cows producing milk for human food receive iodine in their ration.—Michigan Experiment Station.

**POULTRY**

**RIGHT ATTENTION  
TO MOLTING HENS**

One of two things should be done with hens around molting time, says a rulsler in an exchange. One is to let the older hens go before they fairly get to the time for shedding their feathers. They have now laid out their litter and must have some time to get through their "sick" period, during which they bring in nothing and keep eating. Every hen that is getting along in years should walk the plank, right now, unless she is specially valuable as a breeder. If we would sort our flocks over and do this early, we would be a good deal better off at the end of the season.

For the younger birds a different course must be followed. The one great thing is to get the hens back to laying after the molt as soon as we can, and have them in good physical condition. For that reason our treatment must not be so radical, as some advise, but natural and steady. If you watch a molting hen you will see that she is inclined to be weak and less vigorous than formerly. If she is not really sick, still she is "under the weather." This is because of the drain while losing the old plumage and growing a new crop of feathers.

Begin the treatment by cutting down on the food, especially the heavy, hearty food, for a few days. Meanwhile give the hens all possible chance to roam around at will. It may take some coaxing to get them to do this, but it is better for them than to dump about in the houses. The more the hen stirs around, the healthier she will be.

About the same ration may be given during the period of molting that is used when the hen is laying eggs regularly. But as the molt goes on, it is a good plan to add some oil meal.

which enters into feather construction quite largely. Ten per cent of oil meal in a mash mixture, increasing to twice that, will do nicely. Watch the droppings and act accordingly. Don't give drugs; they are dangerous and may lead to trouble. Sunflower seeds are better than medicine. Be kind and patient with the molting birds.

ingly at first and gradually increasing the amount until the birds are getting all they will eat along with all of the sour milk or buttermilk the birds will drink, it will be found that the "finish" put on, as well as the weight added, will more than pay for the extra effort required.

Before deciding upon which birds are to be selected for fattening, select and mark those that are to be kept for breeding stock. To sell the biggest and best is sure to result in a falling off in the vigor of the flock and consequent losses.

**Market Demands Plump,  
Well-Fattened Turkeys**

The market demands plump, well-fattened turkeys and prime birds bring the best prices. In order to get the benefit of this extra price it is necessary that the turkeys intended for market be fattened by generous feeding for a period of three weeks to a month before marketing them. Experiments with confining turkeys at fattening time have not proven very satisfactory. By feeding the flock on good, sound, preferably old, corn spar-

**Sun-Dried Oysters Eaten**

In Mongolia sun-dried oysters are a common article of food and are sold in the market places. They are sold loose, in a wreath form, spitted on sticks of rattan or circled after being dried for hanging in stores. They are not so palatable as fresh oysters, but they are eaten either dried or stewed.

# DAIRY FACTS

## SANITARY FLOORS FOR DAIRY BARN

Sanitary floors are a first requirement to a cleanly dairy. Non-absorbent material and without crevices where dirt and filth can lodge is recommended. It should be easily washed and disinfected.

In building a dairy barn floor, all rubbish and refuse within the enclosure should be removed and the floor area graded to the required level, allowing, of course, for the thickness of the floor. The soil should be thoroughly compacted. If it is possible for water to get under the floor at any time, this possibility should be reduced by using a fill of clean gravel, cinders or crushed stone and providing suitable drainage. The gravel or cinder sub-base, if used, must be thoroughly compacted and consolidated by tamping or rolling.

Forms for defining floor slabs, alleyways or other areas to be concreted should be of smooth lumber, rigidly braced in line and carefully set to proper grade. The manger curb is usually placed first. It should be not less than four inches thick and is usually made about six inches high on the stall side. Uprights supporting stanchions are of several types. Some are attached to anchors which are set in the curb and others are embedded in the concrete. Feed and litter alleys are usually placed after the curb, then the stall platform and manger are placed.

The length of stall platform, that is, the distance from manger curb to gutter, will depend upon the breed of cattle kept. For Jerseys or Guernseys the average length is about four feet eight inches; for Holsteins about five feet is necessary. The platform should be pitched about one inch from the curb toward the gutter.

The surface of the manger should be finished smooth, with corners carefully rounded to make cleaning out easy and to provide a comfortable surface for the animals to eat from. Litter and feed alleys should be finished with a wood float to secure an even but gritty surface, thus providing secure footing for the animals.

### Good Appearing Cows Not Always Most Profitable

In dairying it is entirely possible to get nothing for something. This is the conclusion of the New Jersey state dairy specialist after reviewing records of dairy herds in the Mercer County Cow-Testing association. It was found that though some cows had unsatisfactory appetites and good appearance they were miserably in their milk output, whereas other cows eating but little more would give four and one-half times as much milk.

Three cows ate \$70 worth of feed apiece in one year and returned their owners 3,292 pounds of milk each. Two other cows each ate \$168 worth of feed and gave their owners 14,817 pounds of milk each. Thus, for 2.1 times as much feed the good cows gave four and one-half times as much milk.

By calculating further, the specialist found that it cost the owners of the poor cows \$2.40 in feed for each 100 pounds of milk, against \$1.13 for an equal amount of milk from the good cows. When labor, housing and haulage expenses were added, it was found that the cost of producing 100 pounds of milk with the poor cows was greater than prevailing sale prices. Hence, these low-yielding ani-

mals were eating up the profits made on the high-producers.

This is a clear case, concludes the state specialist, of wasting feed, labor and barn space on worthless cows, or of getting nothing for something.

### Save Young Live Stock to Increase Net Profit

Cutting down the high and costly death rate among infant live stock is one of the farm problems for which the farmer must apply the solution himself. The causes of early deaths in live stock fall into three general classes:

1. Conditions little influenced by treatment: Malformation, extreme feebleness or extreme prematurity, certain accidents during birth.

2. Conditions capable of considerable reduction, chiefly through proper hygiene sanitary isolation, and medical treatment: Tuberculosis, acute respiratory diseases, certain acute contagious diseases, some forms of animal parasitism.

3. Conditions capable of a very great reduction through proper feeding, care, and sanitation: Acute gastrointestinal diseases, colic troubles, prematurity (if not extreme), many forms of animal parasitism.

### Failure to Breed

Failure of cows to breed may be due to one of many causes. The chief cause, however, is infection with contagious abortion. This disease brings about changes in the maternal organs which make conception either uncertain or entirely impossible. The treatment consists of manual manipulation of the uterus and ovaries and regular irrigation. A cure can be brought about only by a prolonged course of treatment at a considerable expense to the owner.

### Poultry Characteristics

Physical strength:

Head—Short, broad and deep.

Beak—Short, stout, broad and well curved.

Eyes—Bright, alert and prominent.

Comb—Red in color, well developed in size.

Body—Broad, uniform in width, especially across the back.

Breast—Full and well developed.

Legs—Stout, placed directly beneath the bird, knee or hock joints wide apart.

Toes—Straight and toenails well worn.

Physical weaknesses:

Head—Long, narrow and lacking depth from tip to base of beak; nostrils small and elongated.

Beak—Long, straight and pointed.

Eyes—Dull and sunken.

Comb—Undeveloped and often pale.

Body—Narrow, especially through back; lacking in depth.

Breast—Undeveloped and sharp.

Legs—Long and still-like or bending.—Professor Bittenbender, Iowa Agricultural College.

### Tell Sex of Guineas

The male and the female guinea fowls differ so little in appearance that many persons have considerable difficulty in making a distinction. Usually the males can be distinguished by their larger helmet (comb) and wattles, also by a coarser head; but to be positive one should listen to the cry made by each bird. That of the female resembles "buckwheat," and is decidedly different from the one-syllable shriek of the male.

# PUBLIC SALE

I will sell at public auction at my place three and one half miles Southwest of Southwick, the following described property; sale commences at 10 o'clock

## Monday, Oct. 26

### Horses

- Mare 5 years old, weight 1300
- Mare 9 years old, weight 1100
- Mare 9 years old, weight 1100
- Mare 10 years old, weight 1350
- Mare 12 years old, weight 1150
- Horse 9 years old, weight 1000

### Cattle

Holstein, 8 years old, fresh Feb. 2 yearling heifers

### Machinery

- 2 3-8 Milborn wagon
- 2 7-8 John Deere wagon
- 8 foot Milwaukee binder

- Van Brunt drill
- Velie hack with top
- 6 foot John Deere disc
- 12 in. Moline gang plow
- 12 in. Oliver gang plow
- 3 section steel harrow
- John Deere riding cultivator
- Avery riding cultivator
- Avery bean planter
- Little Giant bean cutter
- Bobsled, in good shape
- California grain rack
- Bundle rack
- 3 sets harness
- 20 sacks chop feed
- 4 1-2 tons good wheat hay
- 25 loads bean straw
- 100 bushels corn in field
- Fanning mill

LUNCH WILL BE SERVED AT NOON

TERMS: All sums of \$20 or under, cash; over that amount bankable note due Oct. 1, 1926, 10 per cent interest.

Consider Who Makes It!

### In The Selection of a Radio Set Today

Consider who makes it, as well as what the set is. Anybody can start in the radio business on 10 minutes notice, and anybody can prepare an elaborate prospectus of what they are going to do, visualizing futures and making a whale of a lot of noise with nothing more than a sample laboratory set. So, we would say offhand, what it is, may be all right, but who makes it, is more important.

The Red Cross Pharmacy

Kendrick, Idaho

### Diseases Harm Alfalfa Fields

Plants Attacked by Crown or Root Rot Have Died Out in Some Areas.

As a result of last year's attack of crown or root rot, many alfalfa fields are showing areas where the plants have died out entirely. The old crowns remain brown and no new growth appears to be starting although the main root may be sound.

If the tap root is cut across, a yellowish-brown discoloration of the ducts which supply the plant with water can usually be observed, and when examined under the microscope, these ducts are found to be either partially or wholly plugged with a gum-like substance. This material prevents the passage of water from the soil, and the characteristic wilting noticed during the growing season last summer results.

**Bacterial Infection Blamed.** Present studies indicate that the disease is due to a bacterial infection which may enter the crowns through the cut stems following the first cutting. Animal parasites in the soil may play a part in infecting the plants, but the alfalfa nematode, thought to be responsible for so much of the killing last season, probably has little to do with this disease. Three-year-old stands and older seem to be the worst affected. This

suggests that the disease is cumulative, and that possibly three or four years are required to bring about a sufficient plugging of the water ducts to interfere seriously with the growth of the plants.

The very wet season of 1923 may have given an abnormal stimulus to the development of the disease which was not felt until 1924, a dry year, when the soil moisture was short, and the plant's ability to utilize what moisture was present was greatly reduced by the plugging of the water ducts.

Alfalfa and sweet clover are both subject to this disease, and neither should be sown for at least five years on land that has had the crown or root rot. In the meantime, rotate the soil with other crops, and if experience has shown that red clover can be grown successfully as a hay crop, substitute it temporarily for alfalfa. The bacteriological and botanical sections of the Colorado Agricultural Experiment station have experiments under way at the present time which should throw more light upon the cause, nature and control of the disease.—Walter G. Sackett, Bacteriologist, and L. W. Durrell, Botanist, Colorado Experiment Station.

### Four Important Factors Governing Alfalfa Crop

There are about four factors which usually govern the growth of alfalfa—drainage, inoculation, limestone and phosphate. Without deep drainage, alfalfa cannot extend its roots deep enough to make heavy growth or to

continue its growth through a dry season. Without inoculation, the alfalfa cannot secure enough nitrogen to make a maximum growth. On soils which are rich in organic matter more nitrogen can be taken from the soil, but there is almost no soil rich enough in humus and nitrogen for alfalfa to make a heavy growth without being able to secure some air nitrogen by means of inoculation.

**Socialist of Noble Blood** Peter Krapotkin, the world-famous Russian socialist, sprang from the oldest Russian nobility, was a page at the czar's court and later was chamberlain to the czarina. He was arrested in 1873, but escaped in 1876.

# AMAIZO

**GLEANINGS**

John L. Woody, Dr. Moser and Ralph Knepper left yesterday afternoon for the Selway country for a big game hunt.

Wilbur Kennedy, formerly of Juliaetta, but now of Sandpoint, was visiting at the M. V. Thomas home last Friday.

Found: Pair of gold rimmed glasses. Name of Lewis the Jeweler on the case. Owner call at Gazette office. 43-1t

J. G. Gardner, E. A. Deobald, Ernest Clem and son, Will, left Monday afternoon for a big game hunt in the Selway country. They left here with two automobiles and will drive as far as the end of the road and pack the rest of the way.

Mr. and Mrs. R. B. Parks of Leland drove to Lewiston on business Tuesday.

Mrs. Frank Boyd and daughter, Betty, went to Lewiston Tuesday to visit relatives.

Mr. Woody of Tekoa was visiting his brother, John, on American ridge the first of the week.

Martin Thomas visited his brother, Wesley, at Clarkston, Tuesday of this week. Wesley and his son returned the first of the week from a hunting trip in the Selway country, bringing back two elk and a deer.

Manford Nutt of Juliaetta was transacting business in Kendrick Tuesday of this week.

Mrs. Dottie Stanton and daughter, Miss Dorothy, were Moscow visitors the first of the week.

A number of the school children in town have chickenpox but the malady seems to be in a very light form.

John and Dewey Galloway and the Fairfield boys left Tuesday afternoon for Big Island. They will hunt deer and fish and expect to have a good time generally. They took two Fords for transportation, with plenty of rope for a drag line. Their theory is that they can push one Ford to the top of a steep hill, hitch the line to it, fasten the other end to the Ford at the bottom and as the lead Ford starts down it will pull the other up. We will be glad to get a report on this method of making one car do the work of two when neither one will work.

The debate between the Troy high school and Kendrick will be held on Friday, October 23. It will be held in the high school auditorium and an admission of 25c and 10c will be charged. The debaters have very good material and a promising debate is guaranteed. The Goliath's of Troy will rail at the feet of the David's of Kendrick. Those for the negative side of Kendrick are: Hester Knepper and Arthur Wayland. The affirmative side is: Mauge Compton, Clarice Leith and Hazel Stanton.

Frank Meyer went to his home stead the first of the week to get everything in shape for the winter and to do some repair work on the Crescent phone line.

Mrs. James Satterheld and little grandson, who have been visiting at the Fred Crocker home, returned to Everett, Wash., Thursday.

**FEED PREACHERS ON BEANS**

The Methodist ministers of the Moscow district, met in a ministerial meeting in Kendrick last Monday and Tuesday, having a very enjoyable session, at which much important business was transacted. The Kendrick people may not have any aversion to feeding Methodist ministers on yellow-legged chicken, but before the ministers left for their homes, each gentleman was presented with a five-pound sack of Kendrick grown beans, being the compliments of the Kendrick Commercial Club. These beans not only were presented with the view of doing a bit of advertising, but also with the view of keeping the ministers from going hungry for a while. For along with a piece of salt pork or bacon, a most palatable meal can be prepared. However, a bad precedent has been set by Kendrick, for the ministers now want to hold all their meetings there.—Asotin Sentinel.

**MINISTERS "BEANED" AT KENDRICK**

Rev. Filbert of the Community church went to Kendrick Monday

to attend a Methodist Episcopal preachers' meeting. He reported that the people of Kendrick treated the ministers royally, there being quite a number in attendance, and at a banquet Monday evening, provided by the commercial club of that city, every minister present was presented a sack of beans representative of the community's favorite crop. Rev. Filbert says he will show his present to his congregation Sunday morning.—Nez Perce Herald.

**A BAG OF KENDRICK BEANS**

All the Methodist ministers of the Moscow district attending the fall convention at Kendrick last Monday and Tuesday, were presented with a five-pound sack of Kendrick beans with the compliments of the Kendrick Commercial club. The presentation took place in the fine basement of the Methodist Episcopal Church at the public dinner on Monday evening. A folder put out by the Kendrick Commercial Club says "Beans have proven to be a very profitable crop for many years. It is used for a summer fallow crop and cleans the land, at the same time showing good returns every year. The large and small white navy beans are the most popular varieties. Yields of over 1500 (fifteen hundred) pounds to the acre have been reported, while an average of five hundred pounds would be a conservative estimate." The Commercial Club did its work in such a thorough manner that ministers unable to be present were to receive their bag of beans by parcel post. Rev. Barber was a guest of Mr. Knepper, editor of the Kendrick paper.—Grangeville Free Press.

**Big Bear Ridge News Paragraphs**

Written for the Gazette by Special correspondent

Mrs. Ted Ranniger and Mrs. John Ranniger came down from Spokane to attend the funeral of their grandfather, Mr. J. J. Slind. They will be remembered here as Misses Georgia and Josie Slind.

Mr. and Mrs. Fred Black and children of Palouse spent Sunday at the N. E. Ware home and were greeting old friends here.

Miss Anna Lien has gone to Spokane to visit her sister.

Mrs. Hartwick Nelson and children, Virgil and Arline, arrived here Friday from Agawam, Montana, for an extended visit with her mother Mrs. J. J. Slind.

Mr. and Mrs. Otto Alber and little daughter, Bernadine, departed Sunday for Dinuba, California. They will make the trip overland and expect to locate there permanently. The well wishes of neighbors and a large host of friends will follow them to their new home.

Mr. and Mrs. Ed Galloway have moved to the Otto Alber farm.

Misses Agnes, Opal, Dorothy and Lizzie Jones spent the week end at home.

Mrs. Ed Lien and daughter, Margaret, moved to Deary, while Mr. and Mrs. Otis Gentry and little daughter have moved onto the Ed Lien place.

Mr. and Mrs. Gabriel Forest, Miss Bertina Forest, Mrs. Bernhart Nelson and Gustav Nelson motored to Lewiston, Friday.

Mrs. Clayton Mowery and sons, Clifford and Stanley of Ione, Wash., and John Slind of Portland, Oregon, arrived here to attend the funeral services of their father, Mr. J. J. Slind.

Mr. and Mrs. W. L. Hedge of Moscow spent Wednesday with friends here.

Mrs. N. E. Ware and daughter, Miss Neva, spent Saturday in Moscow with Mrs. Ware's sister, Mrs. Annie Oylear. Mrs. Oylear accompanied them home for a visit.

Preaching services at the Lutheran church, Sunday, October 25th at 3 p. m.

Miss Helen Roberts of American ridge spent last week with Mrs. Wade Keene.

Bean threshing will be completed this week. The average yield throughout the ridge was very good, which is another proof of the productivity of the good old Potlatch soil, regardless of the extreme dry weather during the summer. The weather has been ideal for threshing and grain hauling.

Mr. and Mrs. J. J. Wigen, Mrs. P. Wigen and daughters, John Baken and daughters, Misses Theresa and Gertrude, W. L. Hedge and Ed Collins came down from Moscow to attend the funeral of Mr. Slind.

Hundreds of other extraordinary values that we are unable to mention. Come and see!
