

Essential Fall Factors for Success With Pigs

A special effort should be made at this season to keep the fall litters growing and thrifty. The sows and pigs should be furnished with shelter from the cold rains and the cold nights. Experience has shown purebred breeders that they cannot rely on the temperate winters and that shelter will prevent pneumonia, bad colds, and general unthriftiness. A moderate quantity of straw or leaves should be used for bedding—not so much that the pigs will not be able to get out of the sow's way.

When the pigs are old enough to eat feed them in a creep. A little shelled corn or skim milk is a good feed to start them on. Extra feed pays at this time, the animal husbandry men at Clemson college say, because the pigs are making a cheap gain and will be in good condition for

swearing. Forage can be supplied at this time by rye and rape. It is especially desirable to have enough forage to carry the sows and pigs until freezing weather. If forage is not available, a more liberal use of a good protein supplement is necessary at this time because the hogs are depending upon the feeder for their supply. Don't feed lice. A little time and trouble will rid the house and hogs of these parasites. Crude oil or a good coal-tar dip will give results.

In feeding for egg production, the poultryman must first supply the feeds for body maintenance. He must furnish repair material for the renewal of worn-out tissue in the fowl's body.

When birds crowd together in the corners of the houses they become overheated and are chilled on the range the next morning. This is a common cause of colds.

CLARENCE AGAIN

"This is great," said Clarence, the wart-hog. "I've been asked to tell more about myself and also of the days when I was being brought to the zoo. There has been a special request for hearing of that time again, and of hearing whatever other news I have to tell. It seems they like me, yes, ugly though I am, old Clarence is popular!"

"Indeed," said Master Collared Peccary who was one of his next door neighbors in the zoo.

"Now, young Collared Peccary," said Clarence, "I don't want any nonsense from you. Just because you belong to the Wild Swine family and because you are rare doesn't mean that you can be rude. No creature can be rude who has a snout like yours."

"I never knew my cousins, the pigs, were noted for their good manners," said the Collared Peccary.

"That is true," said Clarence, "I shouldn't have said that you couldn't be rude because of your snout, but I should have said that you need not put on any airs because of your snout. It's a real snout and so—no airs and graces, please."

"You talk about airs and graces, Clarence, as though I were a fairy or an elf and danced my way around the zoo instead of digging the ground and sleeping and eating as I do."

"You talk too much," said Clarence, "and it is high time you stopped."

"There is no such thing as high time," said the Collared Peccary. "There is day-time and night-time and twilight-time and early morning time, and noon time and midnight time, but there is no such thing as high time."

"Don't talk so much," said Clarence. "I am becoming angry."

"Of course that is a fine reason for me to stop talking," said the Collared Peccary, wiggling his snout.

"I used to be led about the streets of Rome, which, my dear Peccary, is a famous city over in Europe. I was led about on a leash such as a dog might be led about on. I used to be stared at for I was interesting. Ah yes, I

"I Don't Want Any Nonsense."

was as fine as any dog and I came to the zoo to be shown off because I was so interesting. They certainly did stare at me when I walked about the streets of Rome!"

"Because you were so ugly," muttered the Collared Peccary to himself, but he didn't say it aloud, for he was filled with envy that Clarence had had such an interesting experience when he was such an ugly animal.

"They've got to show me respect, too."

"What do you mean by respect?"

"I mean that they have to be respectful to me, treat me politely and handle me carefully," said Clarence.

"And whom do you mean when you say 'they'?" asked the Collared Peccary.

"I mean the keeper," said Clarence.

"How can you say 'they' when you're speaking of one person?"

"I can do such a thing, but you can't. It wouldn't be correct for you, or for any one else, but for Clarence, the wart hog, it is all right."

"I suppose," said the Collared Peccary, "that it doesn't matter whether you speak correctly or not, is that it?"

"It is not," grunted Clarence. "I can say what I want because I am a wart hog, and I say that wart hogs should be given rights and, in short, given their own way."

"Oh," grinned the Collared Peccary, "so that is what you mean?"

"It is," said Clarence, his eyes watering, not because he was sad, but because his eyes had a watery look and often made Clarence look as though he might be crying.

"Well," said the Collared Peccary, "now that I know that you mean one person, and the keeper is the one person, when you say 'they,' will you kindly tell me why he has to show you respect?"

"It's this way," said Clarence. "You see people ask the keeper if he can come in my yard or in my cage with safety. And the keeper always answers."

"Well, I can go in, but I've got to be careful."

"That means that he has to show me respect, and that I am the boss in my own yard or home. It's a great comfort to me, and a great pride to me that I can do as I like in my own zoo home," ended Clarence, blinking his ugly eyes.

Another Sensation

Beatrice—They say Miss Van Gay plays golf just like a man.
Milliecent—Goodness gracious! Say, wouldn't you love to hear her!

"MR. AMERICA"

Contests to select a "Miss America" have been so popular that the New York Arts club determined to try to find a man with perfect physique. Out of 300 contestants Winford S. Turner of Nashua, N. H., was picked as a perfect specimen. He is twenty-six years old, 5 feet 7 inches tall and weighs 153 pounds. He is a painter, is married and has posed for leading sculptors. He is an ardent athlete and a basket ball player.

Russia Is Encouraging Appreciation for Art

Moscow.—While the horny-handed son of toil and talk is told that he is of the aristocracy of Soviet Russia, schools are bringing a new intelligent into the country.

Persons who cannot read and write are regarded as defective—a great change in a few years. The reception of the Russian art exhibit in the United States and Canada has pleased

Russians. The government newspapers, in expressing their satisfaction, show requisite spirit by explaining that this is the new school of Russian art—proletarian and not bourgeois.

I. E. Grabar, who has returned from the United States, says that the exhibition of 600 articles has had such a great success that it will be continued through the winter in various cities in North America.

POULTRY

EARLY MATURITY IS A VALUABLE ASSET

There is a large difference in the type and maturity of different birds of the same age and general breeding. This should be taken into consideration when selecting birds for winter laying or for breeding purposes. The slow-maturing birds will show long, slender heads, lack of fleshing, be light in weight and show general signs of lack of vigor. The slow-developing birds will also lack in body capacity and development.

A test which was run by the Iowa experiment station shows that the early maturing birds are the best for winter egg production and that they also continue to be the heaviest layers during the following summer. The pullets in the test were divided into four groups, the early maturing, medium maturing, late maturing and very late maturing.

The results for the four winter months of November, December, January and February showed an average of 51.42 eggs for the first group, 38.85 for the second, 15.89 for the third, and only 3.28 for the very late-maturing group.

In the following four spring months the difference was still marked, but not so great. The average for the different groups were 90.65 for the first group, 73.93 for the second, 67.82 for the third, and 35.44 for the fourth.

In the four months of July, August, September and October, which completed the year's test, the results were again decidedly in favor of the early maturing birds. The averages were 75.43 for the first group, 60.89 for the

second, 36.62 for the third, and 15.04 for the fourth.

The total for the year showed an average of 217.5 eggs for the first group or the early maturing fowls.

Cholera Is Contagious and Is Spread by Hens

Cholera is a highly contagious disease conveyed by bacillus which are found in the discharges and in the blood. The rapid spread of the contagion is accounted for by the fowls eating grass or other food contaminated by excretions of diseased birds, and through spilled blood of diseased birds. Probably the first sign of this trouble is shown through the urates—that part of the excrement of the fowl which is excreted by the kidneys and voided with the droppings. Normally this is white, but it becomes tinged with yellow, and then bright yellow when the bird is infected with cholera. In cholera the solid part of the droppings also changes color, becoming bright emerald green instead of dark green approaching black, as it appears when normal.

Changes in color of the droppings, together with frequent voiding of excrement with mucus and froth are danger signals. It is important to examine the dropping boards daily when cholera is reported in the neighborhood.

Fowls that show this trouble will usually stand with drooping wings, roughened feathers and distended crop.

Birds should be killed without spilling blood by pulling the neck. All carcasses should be promptly burned. Keep the flock in as small groups as possible. Disinfect frequently; keep the dust down and discourage stray dogs and visitors in the chicken yard.

Increase of Cows

Milk cows increased in number in Ohio by 2 per cent during 1924. The total now stands at 1,101,000 head.

"An animal infested with parasites," says Paul Gerlaugh, live stock extension specialist at Ohio State university, "cannot produce the best results any more than an automobile can run its best when handicapped by a flat tire."

Remarkable Spider

A spider with a body as large as the thumb, and luminous like a glowing bug, has been found in Burma.

Mountain Really Overlooked
It depends on where a thing is
when it is important. Between San
Francisco and Honolulu there is a
mountain 8,000 feet high, but it does
not attract any attention, because
there are 2,000 feet of water covering
its peak. It has been discovered in
charting the bed of the Pacific ocean.

**Christmas
Eve**

**Device That Gets
Stronger Signals**

**Important Improvement in
Tuned Radio Frequency
Circuits.**

When all of the better grade models of receiving sets are brought out this fall by the leading manufacturers it will be found that one of the principal improvements in the tuned radio frequency circuits will be the introduction of a 200,000-ohm variable resistance such as the centralab radiohm. Orders for more than a million of these radiohms from set manufacturers indicates the extent to which this method of controlling oscillation in radio frequency sets will be used.

With this improvement being made in the manufactured sets, there is no reason why the home set builder shouldn't take the same advantage. The accompanying diagram shows how the radiohm can be connected in series with the "B" battery lead to the plates of the radio frequency tubes. A bypass condenser of from one-half to one mfd., indicated by "C," is necessary between the negative filament lead and the primary of the radio frequency transformer.

Perfect Control of Tubes.
The purpose of making this change is to give perfect control of the tubes on all wave lengths. This tube con-

Diagram Shows How the Connections Are Made.

Control is vitally important. It has long been known that a set which will not whistle or squeal under certain conditions will not produce volume or distance.

This whistle is actually caused by the carrier wave of an incoming signal combining with the high frequency wave generated in the set when the tubes are operated in a state of oscillation. For clear reception the tubes should be just below this point. In addition to causing whistles and squeals, the music or speech received will be mushy and distorted when the tubes are oscillating.

Control of Receiver.
Many types of receivers, of which the neutrodyne and tuned radio frequency types predominate, oscillate readily and require some means of control. Attempts to make receivers nonoscillating by means of small fixed condensers or by reducing the number of turns in the transformer pri-

maries, are successful only at a sacrifice of volume and range. Over certain portions of the dial the set may operate satisfactorily, but over the whole range additional control of the tubes is necessary.

The majority of receiving sets are improperly neutralized or balanced. Faint signals can be brought in by turning up the rheostats, a poor and critical method of control, at best. By the use of a radiohm the receiver can be controlled on all wave lengths with the noiseless variable resistance.

**Homemade Wire Scraper
With Safety Razor Blade**

The sketch shows how a handy wire scraper can be made from an old blade. The screws through the hole in blade

should be as tight as possible so that the blade will be rigidly clamped between the two strips of wood. When the blade becomes dull, it can be easily replaced by another.—Radio Digest.

HINTS FOR BEGINNERS

Rubber tape is better than friction tape for aerial work.

Glass awning rings are tough and will stand enough strain to make them good aerial insulators.

Place the battery on frequent charge, rather than to allow it to reach the danger point of discharge.

Oil poured on the solution in the cells of your rechargeable "B" batteries will keep it from evaporating.

ALIVE STOCK

PREVENT CHOLERA AMONG SWINE HERD

Approximately 4 per cent of the hogs on farms in the United States died of cholera last year, says the United States Department of Agriculture. In round numbers the loss amounted to 2,250,000 hogs valued at approximately \$29,303,000. Nine states each lost more than 100,000 head of hogs from the disease.

While the disease is highly contagious and is difficult to control, the losses have been much higher than they should be, since a preventive serum is available, say department experts. This serum, used before animals get sick, combined with strict sanitation and thorough disinfection after outbreaks, is the most effective known control measure.

Dr. C. C. Lipp, a South Dakota veterinarian, urges a thorough cleanup if it has not already been done. All accumulations of cobs must be buried. Then remove the manure to fields where no hogs are allowed. If possible, the lots should stand vacant during the winter. Plow all yards early in the spring and give the hogs new temporary pastures for a time. Sprinkle the yards as soon as they are clear with air-slaked lime.

After yards have been cleaned and disinfected, the pens must get similar treatment. Scrape out all manure, feed and dried accumulations with a hoe or spade. Then spray floors, troughs, walls and partitions with a solution of sheep dip made by adding twelve tablespoons of dip to each

Kendrick Hardware Co.

gallon of water. Use a spray pump if possible because it drives the disinfectant into the cracks and corners. Repeat the process at frequent intervals, allowing free circulation of air and plenty of sunshine. After completing the disinfecting the entire interior of the house should be thoroughly whitewashed.

Such a cleaning is not expensive and greatly reduces the probability of cholera next year. Even though no disease has been present on the place during the past season such a process is well worth while.

Keeping Poultry Well Is Secret of Good Business

Keeping the poultry well is an absolute essential to successful poultry husbandry and efficient egg production. It is the main corner stone to the success of all poultry operations and the poultryman should strive throughout the year to keep his flock in the best of health, advise poultry specialists at the Kansas State Agricultural college.

One method to build up the flock's health is to cull all fowls from the flock which show indications of not being as strong and healthy as they should be. Old birds should be culled, considering lack of vitality and poor egg production. Late hatched chicks usually are not successful. No pullets should go into the winter quarters that have colds or discharge from the nostrils.

Chickens should be cleaned both inside and outside, the poultrymen advocate. All parasites should be removed before the beginning of winter. Lice and internal parasites should not be permitted to sap the vitality of the flock.

Hens should be fed a complete ration consisting of grain, ground feed, meat food, minerals and vitamins. Yellow corn is better than white corn. It is wise to feed a surplus of good tender green food throughout the winter season.

Next winter's fuel should come from dead and down trees, and from crooked trees and weed trees. Thus will the woodlot be improved.

New standing of alfalfa should be cut along toward the full-bloom stage and old alfalfa about the same stage, except for the first cutting, which should be about tenth-bloom stage for good average results.

Don't Overdo It
Be a thorough housekeeper, but not a fussy one. The wise woman is the one who says "I do all I can and I refuse to worry over the things that are not got done."

BUILDING

This Bank desires to do its part in the development of Kendrick and the country tributary thereto. We furnish every kind of banking facility required having due regard for the stability of the institution. Safety is our first consideration.

Good English Idea
In England there are small lights on the front fenders of all motor cars to indicate the extreme width of the car.

GLEANINGS

D. L. McClain, principal of the Kendrick high school last year, writes from Palo Alto, Cal., that in addition to his regular studies at Stanford University, where he is taking work for a Master's degree, he is supervising the instruction of typewriting in the Palo Alto high school in the night classes. He sends his best regards to the people of the community and hopes Kendrick will have a bigger and better year than ever.

Mrs. Walter Thomas came up from Lewiston, Tuesday, to attend the concert given by the Kendrick band.

Born to Mr. and Mrs. Roy Florence of Clarkston, Monday, a son.

Mitch Blackburn of Cavendish went to Lewiston on business Wednesday afternoon.

John L. Woody went to Moscow last Saturday afternoon on business.

Mrs. H. P. Hull received word last Friday that her sister, Mrs. J. H. Fisher, had passed away at her home in Lewiston, Maine.

In a letter to friends in Juliaetta, R. F. Pepple writes that his son, Lloyd, had a very painful accident while hunting near their home in southern Oregon. He pulled a shotgun through the fence by the muzzle. The gun was discharged and blew part of his hand off. An Oregon paper stated that his arm had been blown off, but Mr. Pepple says the report was exaggerated.

John Roos, formerly proprietor of the Gifford Store, was visiting E. H. Dammarell in Kendrick, Wednesday.

Mr. and Mrs. Robert Spencer and little son, Donald, returned to their home in Moscow, Sunday, after visiting Mrs. Spencer's parents, Mr. and Mrs. Geo. Leith.

Mrs. Betsy Olson of near Troy is visiting friends in Kendrick this week. She was ill for two months this fall but is very much improved in health.

Mrs. Ralph Knepper received word Tuesday afternoon of the death of her brother, Frank Calkins, at his home in Nampa, Idaho. Mr. Calkins was one of the pioneer residents of Nampa and was engaged in the hardware business there for many years. He was apparently in the best of health but died fifteen minutes after being stricken with apoplexy. He and his wife visited his sister here last fall.

Mr. Westover of Clarkston arrived Tuesday morning to look after business affairs here.

Harry Hupp arrived last Saturday from Sandpoint to look after business matters here. He has been associated with his father-in-law in the garage business at Sandpoint but they recently sold out their interests.

George Dougharty of Juliaetta was transacting business in Kendrick last Monday.

Arlene May of Leland left Tuesday afternoon on a business trip to Spokane.

Sam Bigham of American ridge was a Lewiston visitor, returning last Saturday.

John F. Brown went to Lewiston on business, Wednesday afternoon.

Geo. P. Barnum went to Lewiston yesterday afternoon on business.

Miss Georgia Bell will be home tomorrow afternoon from Moscow to spend her Christmas vacation which will last seventeen days.

Mrs. J. W. Davis and daughter went to Lewiston, Thursday afternoon to visit Joe Davis, Sr., who is ill at a hospital there.

Mrs. Dottie Stanton and daughter, Dorothy, went to Lewiston yesterday on the afternoon train.

Crescent Clippings

(Too late for last week)
Charley Trail returned home Wednesday, from St. Maries, where he has been working for some time.

The I. T. Kimbley family spent Sunday at the A. Dorendorf home.

Mike Forest went to Kendrick, Friday and returned, Sunday.

Mr. and Mrs. Wm. Kauder

visited with Mr. and Mrs. Axel Ekman, Sunday.

Mr. and Mrs. Dan Whybark and Tillie Dorendorf were Sunday visitors at the Mike Forest home.

Mrs. John Darby burned her feet quite badly while making lard last Friday, but is able to be around again now.

Christmas Entertainment

A Christmas entertainment composed of musical numbers, playettes, dances, and other numbers will be given by Mrs. Brown's music pupils, assisted by local talent at the New Kendrick Theater, Wednesday evening, December 23, at 8:00 o'clock sharp. All school children including high school students admitted free.

Leland Items

(Too late for last week)

The rock crusher was moved to the west of town and a large force of men and teams from Leland and Fairview are busy keeping the crusher in rocks and spreading it on the new piece of road near the Woodward farm.

Rev. J. H. Dills preached to large congregation here Sunday. After the service the quarterly conference was held, the first one to be held in the new conference year.

Alva Craig left for Seattle, Wednesday morning, where he has employment in a garage.

The Ladies Missionary Society is doing much work this fall and winter. During their spare time they are quilting for different ones.

Mr. and Mrs. Asa Calvert took dinner at the Ed Fleshman home, Sunday. George Shull and Dale Turner were also visitors at the Ed Fleshman home, Sunday.

Emil Larson and family visited their daughter, Mrs. Silflow, Sunday, at Cameron.

School Notes

(Too late for last week)

County School Superintendent Miss Buckles, paid a visit to all the school, Tuesday afternoon. She commended the interest being taken in athletics and music and expressed especial approval of the class in millinery. She said she was much interested in Leland as she had attended her first term of school at this place under one of the well known superintendents of the County, Professor Gillespie, of Peck.

About forty friends and members of the Glee Club spent an enjoyable evening, Tuesday, at the home of Mr. and Mrs. Clifford Powell. The club spent considerable time practicing an anthem for Christmas. Laughable games and stunts occupied the balance of the evening.

The millinery class completed their first hats Wednesday afternoon. Some were combinations of velvet and with feathers and ornaments. Mrs. Calvert says the class is doing splendid work.

The boys of the high school found that they had time for a little extra work, so Mr. Calvert is allowing them to take short-hand in connection with book-keeping.

The state language tests for all grades from the third to the eighth, were given last Friday. The tests were not difficult, but very practical. The teachers express their approval of these tests.

Leland School Notes

The pie social and spelling contest at the school house was well attended. The pies sold well, bringing in \$46.60 which is to pay for a Victrola and purchase new records. The spelling contest between Leland and Southwick eighth grades created much interest. The decision of the judges was in favor of Southwick by 1 point. The spellers from Leland were: Mildred Fleshman, Ruth Taber and Jennie Fleshman; those representing Southwick were: Francis Faris, Edna Jones and Lloyd Thornton. The spelling was unusually good considering the difficulty of the words.

The various rooms of the school are spending spare time practicing for a Christmas program to be given in the hall Wednesday evening. The primary pupils are practicing speeches, drills and songs, the intermediate room is putting on a cantata, while the high school will give a play and sing an anthem. All rooms will have a

NOW, WHAT SHALL I GIVE?

Bananas, sweet potatoes, lettuce, celery, Emperor grapes. Delicious apples for \$2.50 per box. Rome beauty \$1.00 per box. Dates, raisins, figs, candied peels all ready for Christmas. You are invited to come to the store where the Christmas spirit prevails.

Kendrick Store Company
"The Quality Store"

tree and a short program Wednesday afternoon. From that time school will take a vacation until January 4.

The Glee Club was entertained at the home of Mr. and Mrs. Gertje, near Cameron, Tuesday evening. The evening was spent in playing games, and in singing. The house was tastefully decorated in pink and blue, the high school colors. Just before adjournment an excellent lunch of chicken, sandwiches, pickles, doughnuts, cake and coffee was served. About forty young folks expressed their appreciation and returned home feeling fine, but just a little sleepy the next day.

The biggest \$1.25 box of fine chocolates in town, two and one half pound family size. The Red Cross Pharmacy. 51-1t

Cameron Items

Mr. and Mrs. Carl Hartung entertained the following dinner guests, Sunday: Mr. and Mrs. Walter McCall, Mr. and Mrs. F. Wilken and Josephine.

Marie Schwarz spent Sunday with Irene Meyer.

Mr. and Mrs. Herman Wilken, Sr., returned from Lewiston, Saturday.

Walter Hartung returned from Lewiston, Sunday.

Bill Mielke and Walter Silflow spent the week end at Lewiston. They returned Monday.

Hilga Ehlers was an overnight guest of Zelma Hartung, Tuesday evening.

The Glee Club of Leland met at the Ed Gertje home Tuesday night. Quite a number of the Cameron folks were present. The comedy drama entitled "The Trail Back Home," will be given Monday night, December 21st. The time is one hour and a small admission will be charged. Everybody invited.

One of Oldest Customs

The custom of drinking healths is of great antiquity. At an entertainment given by Hengist, in the Fifth century, to the British king, Vertigern, the daughter of the host, Rowena, knelt and presented the wine cup to the king, saying as she did so: "Dear king, your health," and this is generally quoted as the origin of the custom.

OTHERS may seek to make the cheapest Sets. Others may manufacture in the largest quantities. Others may set out to charge the highest prices.

Let those who wish, seek such distinctions. We prefer to be known by the results of Thompson Receivers—by their surpassingly beautiful, natural and enjoyable tone; by their power; by their ability to get distance. The Thompson symbol of achievement is your assurance that in design, manufacture and performance, you are buying demonstrated performance—the tangible result of 16 years' experience that has produced over 116 different types of Radio apparatus.

Quality is usually the result of experience.

THE GRANDETTE
A 5-tube Neutrodyne Model V-50

One Grandette user in Philadelphia has logged every Class B station in the United States (certified). This is unusual, but Thompson Grandette users are on friendly receiving terms with most stations throughout the land. The Grandette is not built to fit a price, but built to give uninterrupted satisfaction. This model, introduced last year, has won many, many friends. It performs with unflinching dependability; its tone is soothing, resonant, rich. The unobtrusive cabinet of beautiful mahogany is in good taste. List price \$125.

The Thompson Speaker with special cone diaphragm and seven other features lists at \$28.
