NUMBER 9

KENDRICK NEWS 20 YEARS AGO

Taken From Copy of Gazette
Published in 1905

J. I. Mitcham was a Moscow visitor this week on tax title business. Naturally he talked politics—couldn't keep from it and it seems there is going to be warm times this summer.

Jess Collins has the roof of Mrs. Duncan's house just about finished and in a few weeks the neat and attractive residence will be completed.

Ed Stovall, a prosperous farmer of Bedrock has purchased a combined harvester, we believe the first in this section, and will this year prove its worth.

The Kendrick band is practicing steadily three times a week and the marked improvement in the music shows the result. Geo. P. Barnum is now the band instructor and is enthusiastic over the prospects for the coming year. The band made its first appearance last week.

Every Wednesday night is militia practice and the "boys in blue" are expecting to be expert by the time of encampment. Two neat gun racks have been built to hold both gun and side arms.

The Leland and Kendrick baseball teams crossed bats on the local diamond Sunday for the first game of the season, which resulted in a score of 12 to 5 in favor of Leland.

Kendrick has long maintained the lead as a merchandising center of the Potlatch and we think we would remind our readers that she still holds it.

Henry Wessels leaves the first of the week for the Alberta country and will take a number of local people with him, who have an idea of investing there.

Reports of a good sized cut from one tree, made by Van Horn & Son, was noticed and a better one comes to hand as made by Geo. Cleon on the Sutton timber at Teakean. Out of one tree five 14-foot logs were made of 1500 feet each, with considerable of the tree left. It was estimated the logs would easily cut a total of 8,000 feet. Sutton & Hall have over a million feet which they will begin cutting next month.

She Had Speed

"The stenographer we require," ran the ad, "must be fast, absolutely accurate, and must have human intelligence. If you are not a crackerjack, don't bother us."

One of the answers wrote that she noted their requirements and went on: "Your advertisement appeals to me strongly—stronger than prepared mustard—as I have searched Eurpe, Airope, Irope and Hoboken, in quest of someone who could use my talents to advantage. When it comes to this chin-music proposition, I have never found man, woman or dictaphone who could get first base on me, either fancy or catch-as-catch-can. I write shorthand so fast that I have to use a specially prepared pencil with a platinum point and a water cooling attachment, a note pad made of asbestos, ruled with sulphuric acid and stitched with catgut. I run with my cutout open at all speeds, and am, in fact, a guaranteed, double hydraulic welded, drop-forged and oil-tempered specimen of human lightning on a perfect thirty-six frame, ground to one-thousandth of an inch.

"If you would avail yourself of the opportunity of a lifetime, wire me, but unless you are fully prepared to pay the triff for such service don't bother me, as I am so nervous I can't stand still long enough to have my dresses fitted."

She got the job.

—Wall Street Journal.

Assessor E. J. Gemmill of Moscow was in Kendrick this week on business concerning the duties of his office.

Welker School Burned

The Welker school house, located on Potlatch ridge, was destroyed by fire Wednesday night, according to a report received here yesterday. It is not definitely known how the fire originated, but it is believed it caught from fire that was left in the stove after school.

IDAHO UNIVERSITY FARM CALENDAR

Specialists Write on Subjects of Interest

In The Home

If there is a question with anyone as to the safety of canning greens, such as spinach, beet tops, etc., they can be brined satisfactorily. One pound of brined vegetables serves seven. —Marion E. Hepworth.

Agricultural Economics

To help farmers in planning their production program the U. S. Department of Agriculture issues The Agricultural Outlook in February and the Intention of Farmers to Plant in March, each year. It is hoped that many more farmers will make use of these valuable publications, so that they may be enabled to arrive at more intelligent decisions in adjusting their production plans to changing conditions. —G. L. Sulerud.

Real Estate Changes

Juliaetta—Real estate seems to be changing hands at a lively rate lately.

Among the more recent transfers the following are included: S. S. Taber, a farmer of Fix Ridge, sold a residence in Juliaetta, together with several lots and about twenty acres of steep hillside land, to J. J. Groseclose and wife for a consideration of \$25,000. This was a cash deal.

Isham Morgan of Juliaetta, traded a dwelling and two acres of land to Martin Loo for house and about 70 acres of pasture land. This was an even exchange.

Isham Morgan sold his newly-acquired property to James Baker, of Juliaetta. The consideration was not made public.

Leland Honck has bought the lot abutting his garage property on the west, and now has a crew of men at work cutting down the embankment at the rear of this lot so as to provide more light for his repair shop.

Poultry

The incubator should be placed where there is an even temperature, satisfactory ventilation, and an abundance of moisture. An incubator cellar built two-thirds below the ground is best as it is less susceptible to changes. Kitchens or rooms that are hot in the daytime and cold at night, should be avoided. The best temperature for an incubator cellar is around 65 degrees F. —R. T. Parkhurst.

Agronomy

Data secured over a period of eight years on the University farm show that early seeding of field peas has double the value of late seeding. Peas seeded just as soon as the seed bed can be prepared in the spring have always produced the highest yields. —H. W. Hulbert.

Plant Disease

It is very important that all grain be treated, whether sown in the spring or in the fall. It is not possible to tell whether grain is smutty by the appearance of the seed. Seed from a crop free from smut may become infected in threshing or by other means. The safest method is to treat all seed before planting. —C. W. Hungerford.

LATAH SHERIFF A VERY BUSY MAN

Rounds Up Moonshiners all Over County.

Arrests on three different liquor cases were made by the Latah county sheriff's office in the past two days, says the Star-Mirror. On a raid made early Tuesday morning a complete 15-gallon still, three mash barrels and three gallons of moonshine liquor were confiscated. Four arrests were made on these cases.

Deputies Roy Garrison, George Moody and Edgar Marston raided the property of A. M. Wardrobe, six miles northeast of Genesee and near the Pine Grove school house, where they found the still and mash barrels. Bill Wardrobe and Charles Northern were arrested on charges of manufacture of intoxicating liquor and brought to Moscow and arraigned. They entered pleas of not guilty and their bonds were fixed at \$1,000 each. The date for their preliminary hearing has not been set.

Following an alleged "party" at the Wardrobe ranch house, the raid was made early Tuesday morning. The liquor was found in the house while the still and mash barrels were found in a cellar a short distance from the house.

Robert Hites of Moscow was sentenced to serve ninety days in the Latah county jail on a charge of possession of intoxicating liquor. The sentence was pronounced Tuesday afternoon by Judge Adrian Nelson in probate court. Hites was arrested Saturday evening by Sheriff Charles Summerfield and deputies here and three pints of moonshine liquor found in his possession. Hites plead guilty to the charge when arraigned Tuesday morning.

Edward Baker of Princeton was arraigned Tuesday morning on a charge of possession of intoxicating liquor, before Judge Nelson and entered a plea of not guilty. His bond was fixed at \$300, which he has not posted.

Halliday Boy Injured

Little "Pat" Haliday, 5 year old son of Mr. and Mrs. Dick Haliday of this place, fell from the cliff east of the school house, last Friday afternoon and was seriously injured. The fall was estimated to be from 25 to 30 feet. The boy was rendered unconscious. He was taken to Dr. McKeever's dental office and in the absence of Dr. Seeley a phone call was sent to Dr. Faulkner of Troy, who came down on the spurter He administered first aid and the following day Mr. and Mrs. Haliday took the boy to Lewiston to the hospital. An x-ray examination showed the skull to be fractured in two places. He remained unconscious until Tuesday after which his condition began to improve. Last reports are to the effect that he will recover.

THREE MONTHS IN COUNTY JAIL

For Driving Car While Under Influence of Liquor

Blain May was taken to Moscow, Tuesday afternoon by Constable Gardner where he was arraigned before Probate Judge Nelson on a charge of driving a car while in an intoxicated condition.

It appears that a young man by the name of Mark Rowland, in company with Fred Van Wert and two young ladies, was returning from a party at the Malnarich place near Juliaetta, about 2 o'clock Tuesday morning. He was driving a Star car and when opposite the hotel in Kendrick, pulled to the curb and stopped his car to make an adjustment on the front wheel.

Blaine May was coming behind him in a Ford runabout, owned by Clarence Perryman. Witnesses state that he was coming up the street at a rapid rate of speed and smashed into the rear of the Star car. Blain had two front teeth knocked out on the steering wheel of the car he was driving, but none of the occupants of the other car were injured. Both cars were badly damaged.

Marshal Gardner was called and he in turn called Dr. McKeever and Dr. Seeley, who administered first aid after which Blain was taken to the local hospital for the night.

Blain was sentenced by Judge Nelson, Wednesday morning, to serve three months in the county jail.

W. W. Bowker Drops Dead

W. W. Bowker, who was proprietor of the Juliaetta pool hall, dropped dead from heart trouble Tuesday morning. He was in his place of business, waiting on a customer when he was suddenly stricken and died immediately. He had been in poor health for some time. All of his near relatives live in England. His wife passed away 12 years ago. Funeral services were held Wednesday afternoon at 1 o'clock, Mr. Janes officiating. Burial was made in the Juliaetta cemetery.

The Winning Way

"He didn't have a dollar; he didn't have a dime. His clothes and shoes were looking as if they'd served their time. He didn't try to kill himself to dodge misfortune's whacks. Instead, he got some ashes and he filled five dozen sacks. Then next he begged a dollar. In the paper in the morn he advertised tin polish that would put the sun to scorn. He kept on advertising, and just now, suffice to say, he's down in California at his cottage on the bay."

Albert Westendahl visited relatives in Moscow this week.

Coyotes Will Broadcast

The "Coyotes of Spokane," a radio frolic fraternity sponsored by the Advertising Club of Spokane, will stage their next frolic session between the hours of eleven and twelve o'clock the night of Monday, March 1. The entire program will be broadcast over station KHQ on 394.5 meters.

LATAH COUNTY NEWS PARAGRAPHS

Items of Interest Taken From Neighboring Papers

Friends of Victor Shawe will be pleased to learn that he has received the appointment of secretary to Governor C. C. Moore of Idaho and has entered upon his duties. Mr. Shawe recently purchased a home in Boise and he and his family are now living there.

Readers of the Saturday evening Post are familiar with Mr. Shawe's stories, which appear in that publication from time to time. —Genesee News.

The Troy Telephone company held a hearing last Thursday on the matter of raising telephone rentals. Commissioner Frank E. Smith and Chief Engineer John Copeland of the Idaho State public utility commission were present and conducted the hearing, taking the testimony of a number of witnesses. Attorneys Oversmith and Moore of Moscow were also present. The case will be decided and the decision given from Boise in the near future. —Troy News.

Ed Baker left here Monday with his family in a Ford truck for McCleary, Wash. On account of the road being closed between here and Arrow, he had to go over Potlatch ridge and the road was so soft that they were all day getting as far as Arrow. —Juliaetta Record.

Even though the local creamery was a failure from a business standpoint, it has helped the community in that it promoted the dairy industry. Many farmers who started to keep cows when the creamery was first built found them so profitable that they have kept at it. There is always a good market for cream. —Deary Press.

Fingre Nearly Severed

Mrs. Thos. McDowell almost severed the little finger from one of her hands Wednesday afternoon. She was gathering some chips in the yard and received the injury on a piece of broken glass that was partly buried in the ground. It was necessary for Dr. Seeley to take several stitches to close the wound.

STUDENT ACTIVITIES KENDRICK SCHOOLS

Written For Gazette by Student Reporters

The Kendrick high school basketball team lost both games on its trip down the river last week. The Genesee team easily won the first game, played last Thursday night at the Lewiston high school gymnasium. This game was to decide which one of the two teams was to enter the district tournament. At the end of the contest the score stood 23 to 9 in favor of Genesee, which eliminates the Kendrick team from the tournament.

The lineup of the two teams follows:

Genesee (23) Pos. (9) Kendrick Doyle (15) RF (2) Cook Hollman LF (5) Brown Weber C (2) R. Sparber Cameron (5) RG W. Sparber Mallailey (3) LG C. Sparber Referee, Bushman. Lewiston.

Friday night the locals tackled the Lapwai high school on the Lapwai floor. It was a one-sided game, Lapwai easily winning by the score of 18 to 8.

Lapwai (18) Pos. Kendrick (8) McCornick (6) RF (2) Cook T. Allman (2) LF (3) Brown Stewart (7) C (3) R. Sparber Maxwell (7) RG C. Sparber Eneas LG W. Sparber

Subs: Lapwai, Crawford for McCornick; Eller for Maxwell.

Referee, Johnson, Lapwai.

While it is always unpleasant to offer an alibi in case of defeat, nevertheless, in justice to the local high school boys it is no more than right to take into consideration the fact that two of Kendrick's best men, the Sparber boys, were both convalescing from the flu and were in no shape to play. The local team was weakened to a great extent by their illness.

The game played at Lewiston was disastrous financially as Kendrick's share of the gate receipts was \$1.50.

Following is a brief summary of the Kendrick high school basketball season. Out of 10 games played, Kendrick won 6. Total score for the season for the locals was 166 to their opponents 172. The highest score made by Kendrick in any game was 32. The highest by any opposing team was 32. These two games were the only ones in which the score for either team reached 30. The points made by each member of the team follows: Buster Brown 73, Roy Sparber 65, Don Miller 11, Claud Cook 11, Carl Sparber 3, Bob Dammarell 3.

Campfire Girls Meet

The Campfire Girls were entertained by Marjorie Davidson last Wednesday evening. Mrs. Edgar Long, guardian of the Campfire, was present and assisted the girls during the business session. Applications for new memberships were received and initiations will be held in the near future.

The girls spent a very pleasant evening after which dainty refreshments were served. These social evenings are becoming more and more popular with the members of the Campfire.

Entertains at Pinochle

Mr. and Mrs. George Leith entertained a group of friends at cards Wednesday evening. Six tables were arranged for pinochle and after several hours play high scores were announced and prizes awarded to Mrs. Frank Boyd and Harold Thomas.

Dainty refreshments consisting of pressed chicken sandwiches, fruit salad, cake and coffee were served by the hostess assisted by her daughter, Mrs. Robert Spencer. Those present were Messrs. and Mesdames, F. M. Long, Boyd, Thomas, Ramey, MacPherson, Daubenberg, Rolon, Edgar Long, Emery, Spencer, Carl Carlson, Miss Esther Gardner and Clarice Leith.

"College of the Air" Is Latest in Education

Lectures by members of the "College of the Air" of the University of Iowa, are now being broadcast from WSUI. Full college credit will be given for the lecture course, equivalent to one-half year's work and the cost to the student is only \$5. Above is the faculty. Left to right: Edward B. Reuter, Frank Luther Mott, Bruce E. Mahan, Christian A. Rackmick, Helen Williams, Millington F. Carpenter, Kirk H. Porter, Bohumil Slesacek and Edward H. Lauer.

Published every Friday at Kendrick, Idaho, by Ralph B. Knepper

Subscription Price **\$1.50**

Entered at the Post Office at Kendrick as second class mail matter.

A Missouri editor says that matrimony isn't a word—it's a sentence.

Politics in Nez Perce county are already beginning to show signs of life. A number of candidates have already made their announcement that they will be in the race during the approaching elections. In this county there is a lethargic condition that signifies either a lack of interest or might be taken as the calm before the storm. On the surface there seems to be no issue pending that would warrant much of a disturbance during the campaign.

The proposition of enforcing the prohibition laws is causing nation-wide interest and comment. If there were enough Charlie Summerfields to go round, so that each county in every state in the union might have one, the situation would automatically take care of itself. As a sheriff, Charlie is a howling success. The way he is raiding the bootleggers in this county is causing even the bootleggers themselves to howl in abject admiration. His raids are becoming so frequent and are of such every-day occurrence that they almost cease to have news value. He is so entirely impartial in his attentions—high or low, rich or poor—all look alike to him. He is making a record as a law-enforcement officer that stands alone. We know that this corner of the county is for him, politically and otherwise, higher than a house.

LELAND LOCALS

The high school is giving a play Friday night, Feb. 26. Good music and a pie social after the play, given by the Oddfellows.

R. B. Parks was called to Clarkston, Saturday, on account of the illness of his mother. She is reported to be much improved at this writing.

The Jones family are up and around after quite a siege of the flu.

The Porter family are much improved after all of them having a turn at the flu.
The second quarterly conference will be held March 21.

A revival meeting is being planned for March. Rev. A. J. Stanner of Baker, Oregon will assist.

Claud Craig attended the Miller sale Thursday.

Studies in English
By Wickliffe R. Smith

Every well constructed sentence, no matter how long, contains unity of thought. All the less important parts must be properly subordinated to the principal thought or idea. Long complex sentences should be periodic and should always be relieved by a succession of short, clear sentences, each containing but one independent assertion. Study carefully the works of such authors as Macaulay, Benjamin Franklin Taylor, Thomas Moore, and other great masters of sentential structure.
Synonyms
Continual, Continuous; Continual denotes that which often

intermits, but regularly begins again. Continuous denotes that which has no pause. The beat of the waves was continual. The continuous flow of the river washes away the hardest stone.

Adjacent, Adjoining, Contiguous: Adjacent denotes nearness of two objects, but does not necessarily imply that they touch each other. Adjoining implies that objects meet at some point or place. Contiguous may be used for adjoining or adjacent. Incorrect Sentences.

There is no doubt but what he did it.
He went around the world.
All of the students attended school regularly.

Columbus discovered that the earth was round.

Mr. Jones and myself are going to town.

It was no one else but John.

Correct Forms.
There is no doubt that he did it.

He went round the world.

All the students attended school regularly.

Columbus discovered that the earth is round.

Mr. Jones and I are going to town.

It was no one else than John.

Pronounce: Respite, sergeant, squalor, refutable precedence, reparable, reveille.

STONY POINT

Mr. and Mrs. Cletis Hoisington were Sunday visitors at the R. Heimgartner home.

Mr. and Mrs. Brett of Cottonwood were Sunday afternoon visitors at the Dygert Bros. home.

John Schetzle went to Spokane this week to visit his brother, Ralph.

Mr. Bissel of Clarkston spent Sunday at the Fairfield home.

George Dygert returned to his work, Tuesday, after a few days vacation from an attack of flu.

Mr. and Mrs. Zumbhofe and Art Wodleman were visitors at the Fairfield home, Sunday.

Clarence Dygert and Alvin Steigers are repairing adjoining fences this week.

Marie Dygert is absent from high school this week on account of being ill with the flu.
Mr. and Mrs. Lester Hill spent

the week end visiting at the John Kite home on American ridge.

Frank Hoisington is on the sick list this week having contracted a very bad cold.

LINDEN LOCALS

Mr. and Mrs. Weyen went to Lewiston, Thursday and brought back a tractor. When they reached home Saturday evening they were pleasantly surprised to find the neighbors gathering for dance. A most enjoyable time was had by all. Refreshments were served at midnight.

Herman Travis had a very narrow escape from death, last Thursday, when an axe flew up from the log he was sawing wood on and as it came down struck him above the temple and ear, cutting a gash over three inches long. Virginia Allen was called and under Dr. Seeley's instructions, dressed the wound, which is healing nicely at this writing.

Clem Israel received a telegram stating that his father had passed away. Clem left Saturday for Flora, Illinois.

Mr. and Mrs. Elmer Hudson are rejoicing over the arrival of a new daughter, born Feb. 19. Miss Virginia Allen is taking care of Mrs. Hudson and Mrs. Dick Cuddy is doing the housework.

Bud Harris had the misfortune to crack a bone in his leg while logging, Friday.

Mrs. Arthur Bohn visited with Mrs. Jack Travis, Sunday afternoon.

Mr. and Mrs. Edgar Bohn visited with Mr. and Mrs. Bud Harris, Sunday afternoon.

Aunt Carrie and Arley Allen were callers at the Longfellow and Smith homes, Monday.

Mrs. Travis visited at the E. L. Whisler home, Monday.

Mrs. C. Harris and Miss Helen Keeler visited with Mrs. Forrest Combs, Friday.

Miss Lena Wegner spent the week end with her sister, Alice at Cedar Ridge.

Mrs. Addison Alexander and Miss Eva Smith went to Moscow, Tuesday, on business.

Stanley Sneye, who has been logging for Ben Smith, returned to his home on Bear ridge Tuesday.

Look around over your farm and see if you haven't a number of article that are useless to you. Maybe some other Potlatcher wants to buy them. Let the world know by putting a three or four line ad in the Gazette. These local ads sell stuff every week.

Important That Chicken House Be Disinfected

It is important that the chicken houses be properly cleaned and disinfected. In addition to the need, from a sanitary standpoint, the cleaning and disinfecting helps to destroy mites and other vermin. After the house is cleaned and disinfected whitewash is an important aid in helping to keep the house in a sanitary condition.

RADIO

The Wiring Diagram, Giving Directions for the Construction of a Laboratory-Type Three-Tube Receiver.

By R. C. HITCHCOCK, in New York
Herald-Tribune.

Three-tube sets are very popular today; a three-tube set may be said to occupy the middle position between inexpensive outfits, as, for instance, neutrodyne and superheterodynes. One of the reasons for the popularity of the three-tube set is its reasonable cost, and another is that most three-tube sets will operate a loud speaker. To do this the ordinary three-tube set uses a regenerative detector and two audio amplifiers. A more recent tendency, however, is toward radio-frequency amplifiers. The primary cause for this tendency is that there is no troublesome regenerative howl spread throughout the neighborhood of the receiving set, and a secondary cause is the theoretical knowledge that greater distance is possible with a radio than with an audio stage of amplification.

To be perfectly fair, it must be admitted that practical tests seem to show that audio amplification gives greater volume on the nearer stations but will not bring in the far ones; while on the other hand radio amplification gives consistent clearness and distance. The main difficulty with a one-step radio-frequency amplifier is to get power enough to operate a loud speaker with only two other tubes, after hearing the distant station. By using a suitable audio transformer it is possible to get satisfactory loud-speaker volume on the nearer stations with one stage of audio amplification, though it often seems to be rather weak on other stations. The greatest advantage is that much less noise will come through a set which is equipped with a radio amplifier, and at the same time the distance is undeniably greater. If clear reception is wanted at all times, the loud speaker should be used for the nearest stations, and phones for distance; this is a good type of three-tube set to build. Of course, another tube may be added later, but the main part of the set remains unaltered. The following description is that of the three-tube set. This set, then, uses a radio amplifier for distance, a regenerative detector for maximum volume from the detector, and a six-to-one high-quality audio transformer for loud-speaker operation.

Eliminates Interference.

Having the radio amplifier connected to the antenna circuit eliminates the troublesome local interference which is associated with most regenerative receivers. A further improvement over the single regenerative set is noticed in regard to the amount of static received when a radio amplifier is used. This may be explained by saying that there are two separate tuned circuits; first the radio amplifier; and second, the detector circuit. Static, a more or less untuned ether disturbance, is forced to travel through two tuned circuits before being audible, and a great deal of it is thereby filtered out, because tuned circuits respond poorly to waves to which they are not tuned. It is distinctly noticeable that static is less bothersome with this set than with a regular regenerative detector.

Regeneration is used on nearly all stations but some local stations come in with such volume that regeneration is not needed, and this control is then merely left unused—or the regeneration dial may be rotated backward so as to oppose the field of the coil from which it feeds, thereby making a smooth volume control for nearby powerful stations.

The set mounted on a board, which in addition to being less expensive, eliminates the dielectric losses of a long panel and its inclosing cabinet. Bare tinned copper wire is used for wiring—the tin protects the wire from oxidation and corrosion which eventually make poor connections of bare copper wire. As the wire is bare it is air insulated, and this reduces the dielectric losses which are always present with covered wires. The "A" battery leads, not carrying critical radio currents, are heavy rubber-covered stranded wires tacked down to the board out of the way.

The individual panels on which the condensers and other instruments are fastened are "L" sections cut from old storage-battery containers. These containers are of hard rubber, and make excellent panel material. Cut them with an old wood saw, the coarse teeth make a better-looking job than if a hacksaw is used. In finishing, the edges should be squared with a file, and the sides smoothed with fine sandpaper, finally polishing with oil.

The wiring diagram shows the three tubes used in parallel, so that they are run from a single six-ohm rheostat. This set uses the regular five-volt

(storage battery) tubes. The type 200 detector is a very sensitive tube, and the 201A amplifiers are among the best on the market at present. Clarity is secured by using only 45 volts on the radio amplifier, and the loud speaker power is obtained by loading the audio tube to its full capacity—as much as 120 volts of "B" battery may safely be used with a corresponding "C" battery of proper size; for 120 volts of "B" use a 4½-volt "C" battery.

To Add Fourth Tube.

As already mentioned, this set was designed mainly for clarity on all stations using headphones. If loud-speaker volume is wanted for all stations, another audio amplifier can be added. The transformer should have a lower ratio than the one suggested for the first audio stage—a four to one is a good ratio for the second audio amplifier. By the addition of this audio amplifier loud speaker operation should be possible at all times. The separate working of all tubes tends to make it easier to operate than a reflexed four-tube set.

No provision was made on the board for a meter, but the use of either a voltmeter or ammeter is strongly recommended. The detector tube is especially critical, and it will be most sensitive when five volts are supplied to it. If a 200-tube is used as suggested, experiment with the "B" battery voltage; sometimes a lower value may be better than 22½. The writer had one new 200-tube that became paralyzed with any voltage over 18, and worked best at 16½ volts. After this tube had been in use for several months the gas content changed, and an increased output of satisfactory quality could be obtained by using 19½ volts. To be sure the correct "B" detector voltage is being used, tune in on some station and try several "B" values on that one station—returning if necessary each time a change is made—and use the "B" voltage that seems best.

Winding the Coils.

Four of the five coils are wound in the well-known "basket" type, around 11 splices set evenly spaced on a 3¼-inch circle. Two coils of 80 turns used with low loss .00035 mfd. condensers form the two main tuning units. An untuned antenna circuit coil of 30 turns is wound in the same fashion, and a plate coil of 20 turns feeds the radio energy into the detector tube circuit. If a long antenna is used, it may prove advisable to use an antenna coil of 15 turns. A complete list of coils and condensers, lettered the same as

the wiring diagram, together with other apparatus, is given below:

- Coil and circuit Turns, wire, wind'g
- L1 Antenna 30 20 DSC Basket
- L2 Radio ampl. grid 60 20 DSC Basket
- L3 Detector grid 60 20 DSC Basket
- L4 Radio ampl. plate 20 20 DSC Basket
- L5 Pickler 40 30 DSC 2¼" th.
- Condens'r & circuit. Kind & capacity
- C1 Rad. ampl. t'ng. Cardwell .00035 mfd.
- C2 Detector tun'g. Cardwell .00035 mfd.
- C3 Grid Mica fixed .00025 mfd.
- C4 Bypass Mica fixed .0001 mfd.

Other Apparatus

- Audio transf. 6:1 ratio Gen. radio
- Grid leak 2.5 megohms
- Rheostat 6 ohms
- Sockets Porcelain Hvy. springs

Useful Equipment for Fans Who Build Sets

Amateurs who build and repair sets will find the following tools and supplies helpful in the workshop: Long-nosed pliers, short-nosed pliers, long screwdriver and a small one such as jewelers use, flashlight, soldering iron, wrenches for tightening nuts and an assortment of brass machine screws and nuts. A few small spools of magnet wire of 20 and 18 gauge, and a supply of spaghetti insulating tubing are valuable parts of the kit. A few testing instruments also are needed, including a voltmeter for testing the "A" and "B" batteries, and also a hydrometer, for testing the storage battery fluid.

Disconnect Battery to Prevent Short Circuit

The instruction sheets which accompany many types of chargers for use on storage "A" and "B" batteries direct that the battery be disconnected from the receiving set while the charger is in use. This is because there is a chance that a short circuit may occur through the grounded circuits of the receiver. The antenna circuit is, of course, insulated from the ground and if you connect a .5 mfd. condenser in series with the ground lead, your whole set will be insulated so that you will not have to disconnect the batteries while you are charging them. The condenser will not affect your reception.

Storing Unsound Fruit Will Result in Rotting

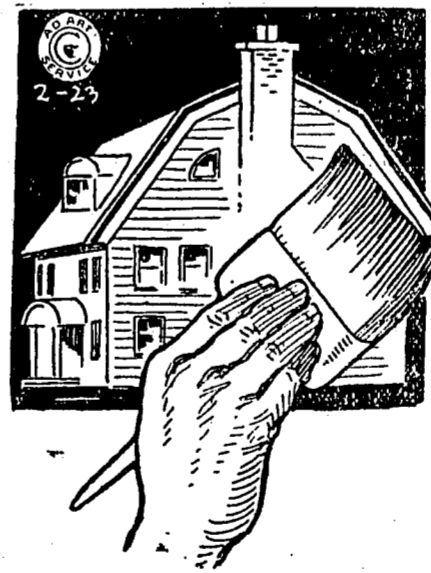

Most of the loss that results from the rotting of fruit in storage can be traced to two causes. The first, and probably the most important of these, is the storing of unsound fruit. No fruit that is attacked by insects or disease or which has been bruised during the process of picking and packing should be stored. The second cause of loss is the failure to get fruit into storage promptly after it is harvested. Experiments have shown that exposure to warm weather for a few days will shorten several weeks the life of the fruit in storage. It pays to store only sound mature fruit which has been cooled soon after it was harvested.

Amazing Appetite

Large animals have the advantage in water. A man coming out of his bath carries one pound of water with him. A mouse coming out would carry its own weight, while a fly in similar circumstances would be loaded with 50 times its weight. Small animals have to have more food because the heart has to do relatively more work. A mouse thus eats one-third of its own weight every day.

First National Road

The old National pike was the first to be built by funds taken from the national treasury.

REMOVE WINTER'S FROWN FROM YOUR HOUSE

While old man Winter has layed off from nipping our noses and dealing shivers from his cold deck—and given Brother Sol a chance to thaw us out—yet he did leave some wrinkles of his frown on your house.

But—you'll be surprised how a brush, a can or two of paint and varnish or enamel will turn the scowl of your home into springtime smiles.

Then, too, paint will protect and ward off the rantings and ravages of Old Pop Winter when he comes next year.

Stop in and get your paint supplies of us. We carry a full line of W. P. Fuller & Co. Pure Prepared Paints and Varnishes.

Notice of Sale of Estray Animal

The following described estray animal will be sold to the highest bidder at auction, on the 27th day of February, 1926 at 10 o'clock a. m., for cost of feed and as allowed by law:

Light red heifer, age 2 years, no horns, dim brand on right hip, taken up by Martin Frantzych about December 1, 1925. Sale will take place on the Frantzych place about 9 miles northeast of Kendrick.

J. G. Gardner, Constable Village of Kendrick. 6-4

FARMERS ADVISED TO RAISE COLTS

Farmers will either have to use more tractors five years from now or else start raising more colts, and the wise farmer is the one who will make the decision now, according to H. C. M. Case, in charge of the farm organization and management department at the University of Illinois. Undoubtedly, the time is fast approaching when there will be a shortage of horses, and the price of work stock is bound to rise in the face of these conditions, he said.

Figures collected by the college from 125 farms in DuPage, Knox, Stephenson, Whiteside and Winnebago counties show that the colts now being raised on these farms will replace only about one-fourth of the horses that may be expected to be lost annually. That this situation is not a local one but that it exists throughout the country is shown by data collected by the federal Department of Agriculture through its 26,000 crop reporters, who for the most part are farmers scattered over the whole country. According to this information, there are only about half as many horses under three years old on farms of the country as will be needed to maintain the present number of horses.

Naturally, a shortage of horses has not been felt in recent years because tractors have been introduced to replace part of the horses. Consequently, even if no colts were raised and horses were not shipped in from the outside for a few years, the shortage would not be noticeable. However, this condition cannot exist indefinitely and the time undoubtedly is fast approaching when the shortage will be upon us.

While the present price of horses will scarcely pay the cost of production, this condition is certain to change. Colts should be looked upon as a kind of by-product on corn-belt farms. A colt can be raised while its mother helps care for the peak load of labor in the spring, while it can be fed largely on roughage feeds which are not well utilized on many farms.

A Little Kerosene

When the windows are very soiled and particularly hopeless looking, add a little kerosene to the water for washing. It will cut the dirt and clean them in very short order.

Public Land Sale

Department of The Interior U. S. Land Office at Coeur d'Alene, Idaho, February 17, 1926.

Notice is hereby given that, as directed by the Commissioner of the General Land Office, under provisions of Sec. 2455, R. S., pursuant to the application of Joseph F. Cook, Serial No. 012386, we will offer at public sale, to the highest bidder, but at not less than \$3.75 per acre, at 10 o'clock a. m., on the 29th day of March, 1926, next, at this office, the following tract of land: Lot 8 of section 14, T. 37 N., R. 2 W., B. M.

The sale will not be kept open but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof.

Any person claiming adversely the above-described land are advised to file their claim, or objections, on or before the time designated for sale.

William Ashley, Register. Non-Coal Lands. 9-5

Remarkable Growth

In 1828 all the real estate on Fifth avenue, New York, from the Washington arch to Thirteenth street, was valued at the small sum of \$14,600. In 1924 this same land was estimated at \$8,128,000.

NOTICE OF FORECLOSURE SALE

Order of Sale and Decree of Foreclosure and Sale.

Mary Alford, Plaintiff, vs. Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased, Defendants.

Under and by virtue of an order of sale and decree of foreclosure and sale issued out of the District Court of the Second Judicial District in and for the County of Latah and State of Idaho, on the 13th day of February A. D., 1926, in the above entitled action wherein Mary Alford, the above named Plaintiff obtained a judgment and decree of foreclosure and sale against Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased, defendants, on the 13th day of February A. D., 1926, for the sum of \$1035.50 in United States gold coin, besides accruing interest, cost and attorney's fees, which said decree was on the day of A. D., 19... recorded in judgement book... of said court, at page... I am commanded to sell all that certain lot, piece or parcel of land situated, lying and being in West Moscow precinct, County of Latah, State of Idaho, and bounded and described as follows: Lot Five in Block Two of Lieutenant's Fourth Addition to Moscow, as shown by the recorded plat thereof.

Public notice is hereby given that on Monday the 15th day of March A. D., 1926, at 2 o'clock P. M. of that day, in front of the Court House door of the County of Latah, I will, in obedience to an order of sale and decree of foreclosure and sale, sell the above described property or so much thereof as may be necessary to satisfy said judgement, with interest and costs, etc., to the highest and best bidder, for gold coin of the United States.

Dated this 13th day of February, 1926. Charlie Sumnerfield, Sheriff. By Geo. K. Moody, Deputy. 8-4

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah

A. W. Behrens, Plaintiff,

vs.

Benjamin F. Aldrich, and Almira Aldrich, his wife, Thos. H. Peirce and Anna M. Peirce, his wife, Frank Housal, Lucy J. Aldridge, Chas. G. Aldridge, C. Hopf, Allen F. Aldrich, Charles Noble and Minnie Noble, his wife, Oscar H. Dasch, Isabel Dasch, J. L. McClanahan and Sarah C. McClanahan, his wife, and all unknown owners of and all unknown claimants to the following described real estate situated in Latah County, State of Idaho, to-wit: All of Block 3 of Aldrich's Addition to the Town of Juliaetta according to the recorded Plat thereof; Also the following tract of land to-wit: Commencing at the Southeastly corner of said Block 3 of Aldrich's Addition to the Town of Juliaetta, running thence in a Northwesterly direction along the Southwestly boundary line of said Aldrich's Addition to the Town of Juliaetta 272 feet, more or less, to the West line of the Southeast quarter of section 4 in Township 37 North, Range 3 West of the Boise Meridian, running thence South on said West line 400 feet, more or less, to the East 208 feet, more or less, to the County Road, running thence at right angles North 256 feet, more or less, to the said Southeast corner of said Block 3, or to the point of beginning; Also the perpetual water right as given and granted in a certain deed of record in book 32 of Deeds at page 102 of the records of Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETING To the above named defendants:

You are hereby notified that a Complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, the nature and general terms of which is to require each and all of the above named defendants to appear in the above entitled cause and to set forth any right, title or interest that said defendants or either of them may have or pretend to have in and to the above described real estate, and to quiet the title thereto in the name of the plaintiff.

And you are hereby directed to appear and answer the said Complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said Complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said Complaint.

Witness my hand and seal of said District Court, this 20th day of February, 1926.

HARRY A. THATCHER, Clerk of said District Court. By Adrian Nelson, Deputy Clerk. (Seal of Court Affixed) A. H. Oversmith, Attorney for plaintiff, residing at Moscow, Idaho. 9-6

Rupture Shield Expert Coming to

Moscow, Idaho, on Thursday and Friday March 11th and 12th at the Moscow Hotel from 10 a. m. to 4 p. m. Evenings by Appointment

TWO DAYS ONLY

Returning every six months.

No charge for Consultation

Mr. C. F. Redlich, the successful expert says:

The "Perfect Retention Shields" hold the rupture perfectly no matter what position the body assumes or how heavy a weight you lift. They give instant relief, contract the opening on the average case in ten days and strengthen the weak tissues (the real cause of rupture) so that they frequently recover their previous natural retaining power needing no further outside support.

While providing safety and comfort to all old and aggravated cases, the results are most favorable when the rupture is just discovered and still small; it will save you no end of trouble, pain and expense in the future if you now take advantage of this opportunity. No leg straps or elastic bandages are used. Can be worn while bathing.

Letters from highly satisfied clients available.

WARNING: Never wear old-fashioned trusses or elastic bandages with chafing, filthy leg straps, with worthless guarantees and medicine, sold by mail. They never hold the rupture at the right place, thereby making it worse and expose the wearer to often fatal strangulation necessitating immediate operation. Let me explain this personally: it costs you nothing.

95 per cent of all children, according to statistics, get rid of their raptures if fitted with the right kind of sanitary appliance. No children below 18 months nor ladies accepted on this trip.

MODERN BARNYARDS ARE NOW SANITARY

Unslightly mudholes once so common to barnyards are gradually giving way on modern farms to sanitary pavements of concrete. No matter how well an unpaved barnyard may be drained or otherwise cared for, there are times when it is not only muddy, but filthy. This results in dirty, ill-kept animals, and in dirty milk, because no matter how well milk cows may be cleaned they cannot be kept as clean if they must exercise in a muddy barnyard as when they have the advantages of a concrete pavement. In addition, the concrete-paved barnyard prevents waste of manure. Tests made at the Ohio experiment station to determine the relative value of manure removed from a concrete floor as compared with that taken from an unpaved yard proved that not only was more manure saved from the concrete paved floor, but that the quantity saved contained a higher percentage of phosphorus, potash and nitrogen.

Barnyard pavements are easy to make. Anyone who has had even a limited amount of experience can successfully undertake the work, and the man who has never had experience can acquire what is necessary in a short time by carefully following a few simple instructions obtained from the firm where he buys his cement. Not all of the pavements need be built at one time, but a strip at least twenty feet wide should be laid adjoining the barn. Additional strips can be added as desired.

Two types of construction may be used for barnyard pavements; one or two-course; the one-course construction being preferable and easier to build. A 1:2:3 mixture should be used, taking special care that the materials are well graded. The pavement should have a slope of one-fourth inch to the foot toward a gutter in one side of the pavement. This gutter will save liquid wastes dropped on the floor by draining them to a cistern or manure pit with which the floor should be connected. Slabs of a barnyard pavement should be limited to not more than ten feet square. Forms should be of two-inch lumber, four, five or six inches wide, depending upon thickness of the pavement. The top of the forms should be set to such a grade that a slope of one-fourth inch to the foot be secured for the floor for proper drainage.

While the barnyard pavement must have an even surface so that it will drain freely and be kept clean, it should not be finished so smooth as to make it slippery. If carefully and thoroughly finished by finishing a concrete floor in this manner and will thus provide a sure foothold for the animals.

Not all the area which it is intended to pave need be laid out with forms at the same time. Forms for one row of slabs can be provided just as though a stretch of concrete walk were being laid. Then after having marked this strip off into ten-foot squares with intermediate form strips, alternate areas can be concreted and when these have hardened sufficiently the crosspieces can be removed and the intermediate areas concreted. The operation is repeated for following strips, each of which serves as a form for one side of the strip laid next.

As all outdoor floors of which a concrete barnyard pavement is a type, expose a large surface to the atmosphere the concrete should be prevented from drying out so that it will harden uniformly and thoroughly. Just as soon as concreting has been finished and the concrete has hardened enough to prevent it from being marred by a protective covering of moist sand or earth, such covering should be kept in place and wet down during the first week or ten days so as to assist proper curing, as it is called. After the ten-day interval has elapsed, the covering may be removed and the pavement put to use, although heavy or loaded wagons should not be driven over the concrete until it is at least a month old. A barnyard pavement subjected to heavy loads should be at least six inches thick, otherwise four inches will be sufficient.

Notice of Sale

Notice is hereby given that on Monday, March 22, 1926, at 10 o'clock a. m., there will be offered for sale to the highest and best bidder at sheriff's sale, to be held at Blum's blacksmith shop, Cameron, Idaho: 1 3-bottom P. & O. gang plow; 1 John Deere wide tire 3/4 wagon with double grain tank; 1 Studebaker wagon 3/4 inch, the property of Dave Schoeffler, to satisfy a claim held against said personal property by the undersigned.

A. H. Blum. 8-3

GLEANINGS

G. F. Walker went to Lewiston Tuesday of this week on business.

Miss Nell Ameling of Orofino spent the week end with her folks on American ridge.

Miss Mable McKeever returned home Monday afternoon after visiting at the home of her brother, Dr. G. W. McKeever.

Wm. Behrens of Leland received delivery the first of the week of a new Cletrac tractor.

Mrs. Silvie Cook returned Tuesday morning from a visit with her mother, Mrs. Dean Wright at Agatha.

Mrs. R. D. Newton went to Moscow last Saturday to attend a bridge party given by her sister, Mrs. Harvey Smith, Saturday evening.

Claud Craig added another quarter section of land last week to his extensive Cedar creek holdings.

Gus Birchmier, who is spending the winter in Moscow, was transacting business in Kendrick the first of the week.

A. Onstott returned the first of the week from a business trip to Lewiston.

Ben Callison and daughter, Ernestine, were Moscow visitors over the week end.

Mr. and Mrs. L. J. Herres and daughter, Eleanor, spent the week end in Lewiston.

Tom Long was taken ill with the flu last Sunday and for a while was a pretty sick man. This is the first time he has been sick in bed for 21 years. It's a shame to spoil such a good record.

W. H. Weyen of Crescent received delivery of a 12-28 Samson tractor the first of the week. He will use the machine in his farming operations.

Joday Long was transacting business in Moscow, Tuesday of this week.

Mrs. Frank Roberts and her daughter, Mayme, of American ridge, returned Sunday afternoon from a visit at Moscow.

Al Roberts of American ridge was a Moscow visitor this week. He has been in rather poor health recently.

Miss Helen Eichers returned to her home in Spokane, Wednesday, after spending the week end at the home of Mr. and Mrs. Frank Ellis.

Mrs. Robert Spencer and son returned to their home in Moscow the first of the week after visiting at the Geo. Leith home for a few days.

E. H. Dammarell returned last Friday from a brief business trip to Lewiston.

Wade Keene went to Moscow the first of the week to visit his parents, Mr. and Mrs. Lafayette Keene, who recently returned from a trip to California.

Rev. C. D. Bell went to Moscow the first of the week where he was called as a witness in a case appearing before Judge Nelson in which the two competing taxi lines in Moscow were involved.

The capacity of the Nez Perce county jail is being taxed to the limit. It is said that there were 28 prisoners with room for but 16. The commissioners are making provisions to have some of the prisoners moved.

S. D. White of Lewiston was transacting business in Kendrick yesterday.

Good Roads

Now is a very excellent time to be preaching good, hard-surfaced roads. From "all around" come complaints of the condition of the roads, which, in many places, are almost impassable. When it was raining the Arkansas fiddler said it was too wet to put a roof on his house, when it wasn't raining it didn't need any. When it was raining was a mighty good time to show the inconvenience of a leaky old roof, a wiser man than the fiddler would prepare for wet when it was dry. Many of our people are like that fiddler. They groan over the condition of the roads when they are bad but when they dry up, are tinkered up a little, then these same people think they don't need fixing. The wise man will remember the inconvenience of bad

roads, will favor some form of improvement when it can be done.—Ex.

CAMERON ITEMS

Mrs. Carl Hartung had as dinner guests Sunday: Mr. and Mrs. William Wolf and children, Mrs. Herman Wolf and son, Leonard; Bill Mielke, Frank Wilken and daughter, Josephine; Mrs. Stoneburner and Emma Hartung, Miss Stella McClelland, Mr. and Mrs. Jake Berriman and children and Miss Marie Schwarz.

The Misses Viola and Marjorie Gertje were overnight guests of Josephine Wilken.

Sunday guests of the Carl Koepp home were: Mr. and Mrs. Henry Brammer and family, Mr. and Mrs. Carl L. Wegner and family, Mr. and Mrs. August Brammer and son, Rev. and Mrs. Rein and family, Mr. and Mrs. August Meyer and family, Mr. and Mrs. Henry Wendt and daughter, and Bill Brammer.

Choir practice was held at the Frank Wilken home Wednesday evening.

Mrs. Frank Wilken had as dinner guests Wednesday evening: Mr. and Mrs. A. H. Blum and son, Gustav; Rev. and Mrs. Rein and children, Mr. and Mrs. Fred Silflow and family.

A party was given at the Geo. Wilken home Saturday evening in honor of Mrs. Wilken's birthday. The evening was spent in games and dancing. At midnight a delicious lunch was served. About twenty-five or thirty were present.

Mr. and Mrs. John Schwarz left for Spokane, Monday.

A number of the Cameron young folks were present at the farewell party given for J. Miller at the Pine Creek school house. Everyone had a splendid time.

SOUTHWICK NEWS

A. W. McCoy and family arrived Wednesday from Mohler, Oregon. They expect to make their home here.

Leslie and Harve Triplett made a business trip to Lewiston, Friday, returning home, Saturday.

The community meeting held at the school house Friday evening was well attended.

The oyster supper given by the ladies aid Saturday evening, netted the sum of \$22.25.

Wm. Whiting and wife, Mr. and Mrs. Wm. Henderson, Mr. and Mrs. Fred Gehre and Fred Whiting and family spent Sunday at the home of Harold Whiting.

Mr. and Mrs. Elton McCoy moved to the Ben McCoy ranch last Thursday, where they will make their home.

John Stalnaker and family, John Lettenmaier and family, and Max Courtney were Sunday guests of Mr. and Mrs. Wm. Jones.

Mrs. Armitage and Mrs. Minnie Bunger will entertain the ladies aid at the hall next Thursday.

Mr. and Mrs. R. M. Wright went to Lewiston, Sunday, returning home Monday.

Mrs. Harry Wright went to Colfax, Saturday, where she will visit with her mother, Mrs. Banning.

Harry Wright drove through to Spokane, last Saturday.

A number of families in and around Cavendish are down with the flu.

Miss Nellie Henderson and Nadine McCoy spent Sunday at the home of Mr. and Mrs. Elton McCoy.

Mr. and Mrs. Hoppe and Geo. Calvert were the guests of Mr. and Mrs. Graham, Sunday.

Rev. Calvert held services at the U. B. church, both morning and evening.

Mrs. Harold Whiting, Mrs. Atlee Mustoe, Mr. and Mrs. H. Southwick and Cleo Southwick spent Tuesday at the home of Grandpa and Grandma Southwick.

Mrs. Arnold Cuddy has been quite ill. Dr. Seeley was called in attendance Sunday. She is reported as being much better at this writing.

Watch Out!
THE TORNADO
IS COMING!

TONIGHT
And Saturday

Don't fail to see this sensationally exciting melodrama crammed with thrills never attempted in any photoplay and climaxed by the most stupendous flood and tornado scenes ever recorded by the camera... See it seizing cities, railroad trains, bridges, automobiles and humanity in its terrifying jaws... The most devastating tornado and flood scenes ever shown on the screen since motion pictures were invented.

This is the motion picture which was made at St. Maries, Idaho, and it is said that there are many of the Bovill men in this picture. It is indeed a wonderful production and one that you should not fail to see.

GUESTS
Miss Claribel Moore
B. C. Custer, Juliaetta

TONIGHT
SATURDAY
Please call at Theatre and receive 2 free tickets each

Good Two-Reel Comedy entitled "Queen of Aces"

PAINT

Sherwin-Williams Prepared Paint

Sherwin-Williams Paints are the most durable and economical paints that can be made. It cost less per job and wears longer than any other paint, either ready prepared or mixed by hand. It is made in one quality only and that is the best.

The man who buys the raw material and prepares a paint himself, cannot possibly make a paint equal to Sherwin-Williams. It is a case of hand work against mechanical efficiency; human guess-work against exact scientific formulas: hand-stirring against fine machine grinding.

We carry a complete stock of the well known Sherwin-Williams paints and we will appreciate the opportunity to sell you your paint.

<p>Varnish</p> <p>Murphy Varnishes are made for many purposes. The expert users of varnish—Piano, Furniture, Railroad Car, Automobile, Fine Instruments and other large manufacturers have used Murphy Varnish for more than half a century.</p> <p>The Murphy Varnish Company make the following statement to their dealers: "We never lose sleep because some man may sell poor varnish for less money. But we should walk the floor o' nights if we suspected that any man make a better varnish."</p>	<p>Murphy Brushing Lacquer</p> <p>This is something new in an enamel finish.</p> <p>A beautiful velvet-gloss enamel which dries with great speed.</p> <p>Brushing Lacquer is easily applied like an enamel and dries in a few minutes. It may be recoated in half an hour.</p> <p>We carry a stock of this new varnish and enamel in ten beautiful colors.</p>
--	---

A complete stock of Kalsomine, Barn Paint Linseed Oil and Turpentine. We are showing a new line of Paint and Varnish Brushes this spring at popular prices.
