

## IDAHO UNIVERSITY FARM CALENDAR

### Specialists Write on Subjects of Interest

#### Dairying

One of the most important benefits to be derived from testing is that the farmer can tell which cows to select heifers from. Raising calves costs money and the average farmer doesn't have any more money to throw away raising poor calves than he has to put into buying poor cows. The herd sire's value is measured by the way his daughters produce. An athletic coach picks his team by testing out his candidates. The wise dairyman picks his herd by testing out each individual in it and he has one on the athletic coach as he can determine what sort of candidates he is going to have in the future.—G. C. Anderson.

#### Plant Disease

To secure best results from any wet seed treatment careful attention should first be given to thorough cleaning of the seed to remove smut balls. If the seed is practically free from these balls it can safely be treated in a sack. If there are a noticeable number of smut balls present, the seed should be poured loose into the treating solution and the balls skimmed off.—C. W. Hungerford.

#### Poultry

There is more danger of lack of ventilation in the incubator in warm weather than in cold. The reason is that the greater the difference in temperature inside and outside, the more circulation. Ventilators should be gradually opened wider from the start of the hatch to hatching time when they are wide open.—R. T. Parkhurst.

#### Horticulture

As little pruning as possible during early years of growth is shown in recent experiments to be advisable. The results show not only that larger trees are developed in a given time but that the trees will bear larger crops. Heading back new growth on young trees is detrimental in direct ratio to the severity of the pruning. Experiments conducted in several states show that heavy pruning of young trees reduces the total amount of fruit produced.—C. C. Vincent.

#### Obituary

Ella Brown was born in the State of New York, March 12, 1857 and died at Clarkston, Wash., March 3, 1926, at the age of 68 years, 11 months and 21 days. She moved with her parents to Ionia County, Michigan, where she was married to Miles Parks in October, 1876. To this union were born seven children, five of whom survive her. They are Rutherford B. of Leland, Idaho, Miles M., Raymond and Mrs. E. E. Fairley of Peck, Idaho and Mrs. J. H. Lents of Clarkston, Wash. Eighteen grandchildren and two great grandchildren also survive.

They moved West in September, 1889 and lived in various places in Washington and Idaho, finally settling in Alberta, Canada. Following her husband's death some 15 years ago, she moved to Peck, Idaho, where she has since resided. She joined the Methodist Church early in life and was a faithful Christian worker until Jesus called her home.

Funeral services were held at Merchant's Chapel, Clarkston, Wash., March 5th at 10:30 a. m. Burial was made in the Normal Hill cemetery, Lewiston, Idaho.

It was dusk as she stopped at the roadside filling station. "I want a quart of red oil," she said to the service man. The man gasped, hesitated. "Give me a quart of red oil," she repeated. "A quart of r-r-red oil," he stammered. "Certainly," she said, "my tail-light has gone out."—Ex.

## COMMITTEE WANTS COUNTY AGENT

### Moscow Commercial Club Wants Farm Bureau Work

"Why is Latah County failing to take advantage of the opportunity afforded to employ a county agent?" is the very natural inquiry of the committee appointed to interview the county commissioners with reference to an appropriation for an agent. "It appears to the committee that Latah County is standing on the sidelines and watching the procession pass by. Other counties are going ahead in agricultural improvement work and are taking advantage of special federal and state service available for farmers, while our own county is showing no interest. The committee feels that every day that an agricultural agent is not employed in this county means a loss to its farmers and business interests.

"We have been wondering whether Latah County is to get any of the government explosive. Upon inquiry of the College authorities we find that already thru the activities of the county agent, Kootenai County has ordered and has delivered or on the road 3 carloads totaling some 95,500 pounds; Bonner County, thru the cooperation of the county agent with leading farmers and farm organizations, has ordered 4 carloads or a total of 86,300 pounds. These two counties, where aggressive county agents are employed, have ordered a total of 181,800 pounds of pyrotol. In these counties, at the conservative estimated saving of 8c a pound, there has been saved a total of \$14,544.00, or about three times the annual cost of county agent work for these two counties. It was further found at the College that numerous requests for the powder have been received from various parts of Latah County and information has been freely supplied to the farmers as to the method of getting it. It seems that there is no public agent to take the leadership in assembling the orders and going thru the necessary detailed operations to get the powder brought into the county on a carload basis. There seems to be little probability, therefore, that Latah County will get any of the cheap powder this year.

"We also regret the fact that there was no one to take the leadership in organizing the squirrel control campaign to get county-wide destruction of squirrels. Furthermore, the savings to the farmers of from \$1.00 to \$1.50 an ounce on strychnine made where there is a county agent who is able to secure the poison directly from representatives of the federal government at manufacturers' cost is going to cost the farmers of this county a considerable sum of money, so long as a county agent is not employed.

"The committee is wondering who is to take the leadership in standardizing our varieties of grains, destroying bindweed and other noxious weeds, in building up the dairy, poultry and general livestock industry, and in getting the people of the entire county interested in the latest things of interest to the farmers in connection with their production and marketing problems. The committee is wondering whether the county commissioners of this county are willing to let our county, one of the richest agricultural sections of the state, become a standpat rather than a progressive agricultural region. The matter has been presented to the county commissioners and is now up to them. We urge that those people who believe that a county agent can be of material service and value to the farmers of the county make their wants known in a positive way so that the progressive sentiment of the county may be translated into action. Your committee believes that a county agent can be of very great ser-

### Wins Fiddlers' Contest

Prof. Bonnie, of Pomeroy, Wash., age 83, won the old time fiddlers contest staged at Pullman last week, according to announcement received over the radio Wednesday evening. He was 1500 to 2000 votes in the lead.

### TWENTY YEARS AGO

The farmers telephone line to Leland will soon be completed. The poles have all been raised and the wire will be strung immediately. This will give the people of Cameron telephone connection with Kendrick and the outside world.

A social dance was held at the home of C. G. Compton last Friday night and reports are that a thoroughly enjoyable time was had by the participants.

The storm which broke thru the barricade of nature, the main range of the Rocky mountains, meant business and began to show us a sample of real goods like Montana handles. We state right here that we don't want any more and our sister state can keep the whole outfit and also keep her storms in her own fences.

From a mild spring day, a harbinger of spring, we suddenly confronted a Montana blizzard, which started with a high wind traveling at the rate of 40 miles per hour. This was Friday evening and Saturday it kept it up with a steadily falling temperature. Snow was added Sunday night and since that time we have had wind, cold, snow and all the other disagreeable elements thrown in. The first moderation was observed on Wednesday and since that time we have been gradually regaining our normal climate.

### Juliaetta Realty Sales

There seems to be considerable activity in real estate in Juliaetta. A. W. Behrens, cashier of the Bank of Juliaetta, reports the following sales made since the last report published in the Gazette a few weeks ago.

The Frank Dygert property on Water street, formerly owned by Miles Pierce, consisting of a small dwelling and three lots, was sold to Thomas Stinson, of the Fraser, Idaho, country, between Greer and Weippe, for \$500.

Mrs. A. M. Pickens, now residing in California, sold her residence and a small acreage in Juliaetta for \$1,100, the purchaser being Sam Gruell, of Juliaetta.

Mrs. Clara Dygert, of Fix Ridge, sold her residence and 5 lots in Juliaetta to Booker Dyer, who had been living in Big Potlatch canyon, a few miles below Juliaetta, for \$1,200.

The estate property of the late Henry Kennedy, consisting of a small cottage and a small lot on Water street, was sold to Fred Rathbun, of the Juliaetta section. The consideration was not made public.

### Visits Son in Seattle

Dr. Bump left the first of the week for a visit with his son in Seattle. He and Mrs. Bump have not been well this winter and at their advanced age it has been beyond their strength to care for each other. They are a devoted couple and have kept house until their strength failed them. Mrs. Bump will stay at the home of her son, Frank Crocker, until she has regained her strength.

The Campfire girls met at the home of Thelma Perryman, Wednesday evening. There was a good attendance and a most enjoyable evening was spent by the young people. Dainty refreshments were served.

vice to the farmers of the county and that his work will pay for itself many times over during the year.

Ross Able,  
Geo. N. Lamphere,  
J. S. Heckathorn, Committee.

### Held Good Rehearsal

Last Tuesday night the band held an unusually good rehearsal. There was a larger attendance than for many weeks and everyone showed the proper spirit to start the band with renewed vigor for the spring and summer concerts. Rehearsals will begin next Tuesday night with special reference to music for the open air concert to be given in the park some time next month. It is desired that the full quota of members will be present to take part next Tuesday night.

### Legion Dance

Canyon Post No. 66, A. L., will give a dance at the Fraternal Temple next Friday evening, March 19. Chase's orchestra of Lewiston will furnish music and everyone is most cordially invited to keep the date in mind and be there.

### Had Mastoid Operation

Mrs. Hugh Stanton was taken to Lewiston, Tuesday afternoon, where she underwent a mastoid operation. Last reports are that she is getting along as well as could be expected.

### Finish Surfacing This Week

Engineer E. M. Booth came up from Juliaetta Wednesday of this week on business. He stated that the surfacing of the Juliaetta streets would be finished by the last of this week.

### Joint Lodge Session

The Oddfellows and Rebekahs held a joint session last Saturday. The Rebekahs held a business meeting during the afternoon, at which the Assembly President, Beulah Hattabaugh, presided. Many of the Juliaetta Rebekahs were present.

The Ladies Aid served a lovely dinner to the Oddfellows and their wives at the Methodist church.

At eight o'clock in the evening an entertainment was given in the hall, consisting of an address by Past Grand Master Judge Hattabaugh and by Mrs. Hattabaugh; flute solos by Harold Thomas, accompanied by Mrs. Harold Thomas; two vocal solos by Mrs. Hattabaugh, accompanied by Mrs. Ramey, and several numbers by the Kendrick trio.

Leland and Juliaetta lodges were well represented at this meeting. Everybody reported a fine time.

### Leland Items

Messrs. R. B. Parks, Herman Meyer, Clifford Powell, Howard Smith, Len Yenni, Hugh Parks, Herman Koepf, Wm. Behrens, and C. J. Taber, all attended the sale near Southwick, Wednesday.

R. B. Parks and Herman Meyer are tuning up their threshing machines the last few days.

Mrs. Robert Smith and little daughter, Martha, were Moscow visitors last week, returning home Saturday.

Wm. Bond has been doctoring in Spokane for the past week or two. We hope he can soon come home, well and strong again.

Mrs. Walter Hoffman, who has been very sick at a Lewiston hospital, for the past month, is recovering very rapidly at present.

Revival meetings will commence in the Leland M. E. church, Tuesday night. All are invited to come and bring some one with you. The Rev. A. J. Stammer will be the evangelist, from Baker, Oregon.

The Leland community has been invited to attend a program and social time, at the Fairview school house, Friday night. Please bring light lunch.

The Ladies missionary society met at the home of Mrs. Emil Larson, Thursday, for their regular monthly business meeting.

Wm. Behrens went to Genesee Thursday morning, where he made delivery of a Cletrac tractor.

## LATAH COUNTY NEWS PARAGRAPHS

### Items of Interest Taken From Neighboring Papers

#### Rock Contract Let

At a meeting of the commissioners of Genesee Highway district Wednesday the contract for crushing rock for surfacing four miles of highway was let to A. G. Kester of Lewiston for a price of \$1.21 a yard, in the bins, the district to furnish all machinery and do the spreading.

The road to be surfaced is known as the Blaine road and some four miles of rock will be spread, starting at a point some six miles north of Genesee and extending almost to the foot of Paradise hill. This road has been graded for more than two years and should have been surfaced long ago.—Genesee News.

#### Squirrel Poison

Here is Farmer Andrew. Olson's squirrel poison formula. He has used it for years with success:

Put 2½ gallons of water and 1 gallon of oats in a 5-gallon can and set on stove and boil ten minutes. Empty into a zinc tub, then add 1½ gallons of dry oats and stir with a hoe. Then add 3 quarts of fine wheat chop, 2 glasses of sugar and one-half glass of salt and again stir with a hoe. Next add one-fourth of a pound of phosphorus and stir thoroughly. Add enough dry oats to take up the water. This will make about eight gallons and is all ready to put out at once or will keep for days.—Deary Press.

#### Manufacture Joy Toys

Countless hundreds of objects, including automobiles, trucks, cranes and derricks of various descriptions, airplanes, wagons, river boats and trains can be duplicated by Joy Toys, a new invention which soon will be placed on the market by a Moscow corporation. Joy Toys is the invention of G. G. Oldfield and E. E. Bechtol, both of Moscow. Mr. Bechtol is a cabinet-maker by trade and had been experimenting several years to bring out this toy. Articles of incorporation have been filed with the secretary of state and manufacture of the patented toy will be started about May 1, according to Mr. Bechtol, who has been named general manager of the new corporation.

The toy is one of the simplest of construction toys yet introduced. All the objects can be made with pieces of wood in three different patterns, including wood rods, square blocks and flat boards of two or three different sizes. An illustrated booklet contained in each box of the toys gives prints of plans for 64 different models and specifications and descriptions of hundreds more.

"The number of models which may be duplicated with this toy," said Mr. Bechtol, one of the inventors, "is limited only by the ingenuity of the person doing the work. The wood pieces are so built that any conceivable object can be duplicated by the outfit."

The corporation is financed mainly by Moscow persons at present, said Mr. Bechtol. Capital stock has been placed in the articles at \$15,000; but more will be added when the demand for the manufactured product warrants an increase. First efforts at construction will be centered upon the northwest markets, and as the demand grows a larger field will be covered. Machinery for the manufacture of the articles has been ordered and will be installed in the Moscow factory by May 1, which date has been set for the start of manufacturing operations.

That the toy has a future is testified by the rapid financial support which has been given it by Moscow business men and a few others in the Inland Empire. All of the capital stock has been subscribed, said Mr. Bechtol. Officers of the corporation are all

## COMMERCIAL CLUB MET LAST TUESDAY

### Very Good Attendance and Much Interest Shown.

The commercial club met last Tuesday evening at the Commercial Hotel at the dinner hour. There were forty present and the meeting proved to be a profitable one from every standpoint. It was generally understood beforehand that the meeting would start promptly and be carried on without waste of time and the idea was followed out to the letter.

After hearing the reports of standing committees, new business was taken up. Dr. Seeley brought up the question of stocking the upper waters of Potlatch creek with trout from the state hatcheries. He asked that the commercial club make application to the state this spring for trout and see to it that they were planted in the creek. Chairman Long appointed a committee consisting of Dr. Seeley, Ralph Knepper and A. H. Daubenberg to take the matter up with the state fish and game department.

The report of last season's baseball activities was furnished by the members of the finance committee, G. P. Barnum, Tom Blevins and Tom Long. The report showed a small balance in the treasury. A resume of the games played last year shows 10 won and 2 lost, which is a very good average.

The plan adopted last season of appointing a board of three members from the commercial club to handle the finances of the team and a playing manager to have charge of the team, was very successful and was again adopted for this season. Chairman Long appointed the following committee: J. G. Gardner, Marvin Long and Tom Blevins. George Barnum was unanimously elected playing manager. He has had years of experience in baseball and it is generally conceded he was the man for the job. The commercial club is looking forward to a very successful baseball season. A goodly string of players is available and it is believed there will be considerable competition for places on the team.

Prof. Strach brought up the question of forming an organization to raise a permanent revolving fund to be loaned to worthy high school students to help them secure a normal or college education, the students to repay the amount when they had reached an earning capacity. The matter was referred to the education committee by the chairman.

Dr. Seeley brought up the subject of a public swimming pool or natatorium for Kendrick. He moved that a committee of five be selected to investigate the feasibility of the proposition and report at the next meeting. The Chairman appointed the following committee: Dr. Seeley, E. H. Emery, A. H. Daubenberg, G. P. Anderson, E. H. Dammarell. It was suggested that the club might profitably put forth an effort to secure a furniture store to fill up the vacant room in the fraternal temple building. The Chairman instructed the industrial committee to advertise the opening here in the Spokesman-Review. The meeting then adjourned.

### Stockholders Meeting

At an adjourned meeting of the Kendrick Theater Co., held Tuesday morning, the stockholders elected the following directors for the ensuing year: Jody Long, A. Wilmot, E. E. Bechtol, Harold Thomas and Ralph Knepper. The directors met immediately after the stockholders' meeting. The theater was leased to Mr. MacPherson for another year.

Moscow men: Robert J. Moore, president; John T. Baken, secretary-treasurer and Mr. Bechtol, general manager.—Star-Mirror.

# McKibbin Hats for Men

The new styles are now on display including the New Snap Brims for the young men priced at

**\$3.50 to \$5.50**

Leland, Idaho

### THE KENDRICK GAZETTE

"The Pulse of The Potlatch"

Published every Friday at Kendrick, Idaho, by Ralph B. Knepper

Subscription Price - \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

They say that knock knees are highly prized by girls who dance the Charleston.

An Indiana man recently paid \$500 for a bee. The general consensus of opinion is that he got stung.

Local radio fans have been puzzled because it is difficult at times to get California stations. The solution seems simple. Hot air has a tendency to go up, so anything from California would be likely to pass over this Potlatch canyon.

We learn that a girl who marries at 18 and lives with her husband until after they celebrate their golden wedding, has had the privilege, or the opportunity, to prepare 50,000 meals. A bright prospect, girls! But not so bad as it was in the old days—you can now prepare most the meals with a can opener.

Commercial club meetings, like the one held here last Tuesday evening, are of inestimable value to a town. The business transacted at the meeting is not the only benefit derived. The social hours that these meetings afford, will do much toward promoting good fellowship among the business men of the town.

The meeting Tuesday night was started on time, carried on without delay and brought to an end shortly after eight o'clock. There was ample time to transact all business in a most satisfactory manner. There will be another good meeting the second Tuesday in April.

#### THE COUNTY AGENT

An article, published elsewhere in this issue, concerning the lack of a county agent in Latah county, brings up a matter that has caused considerable dissension for several years. Most of the agitation favoring the return of this county office comes from the townspeople. The farmer, the man most concerned, is apparently indifferent.

The Gazette has, in the past, favored a county agent and has always done everything in its power to further the work of the agents of both Nez Perce and Latah counties. With the proper cooperation from the farmers, there is no question but that the county agent can earn his salary many times over. Without this cooperation his work is of little value.

Are farmers of Latah county sufficiently interested in farm bureau work to get behind an agent? We do not believe this is a matter for the towns of the county to decide, neither should it be left up to the county commissioners. Let the farmers themselves decide the question.

Today, if the matter were put to a vote in this corner of the county, we doubt very much whether the farmer would favor a county agent. It is their affair and the decision might well be left to them.

#### Studies in English

By Wickliffe R. Smith

**Synonyms**  
Error, Mistake, Illusion, Delusion. These words are frequently used incorrectly by careless writers and speakers. Error is a general term, and is applied to an deviation from what is right. It is the direct antithesis of truth. We speak of errors of the head and errors of the heart. The other terms are particular kinds of error, and are therefore more specific. Ignorant and careless people frequently make mistakes. Errors creep in thru lack of knowledge; mistakes thru lack of care. A delusion is a mental error. An illusion usually belongs wholly to the senses. The delusions of the insane are many and varied. In optical illusions we sometimes see beautiful lakes and springs in the desert, the distant oases are near. We correct an error and rectify a mistake.

**Proclamation, Edict, Decree.**  
A proclamation is a published order coming from one supreme or high in authority and refers to some specific occasion. An edict is the will of an absolute ruler publicly expressed. A de-

ree is an order coming from an individual or a body of men high in authority. Its nature is not permanent, but specific and occasional.

Lincoln issued the Emancipation Proclamation in 1863.

Henry of Navarre secured toleration to the French Protestants in 1598 by issuing the Edict of Nantes.

In 1807 Napoleon issued his Berlin and Milan Decrees, thus closing all European ports to English ships.

Delightful, Delicious, Charming. These three words are frequently misused. Delightful is applied to that which produces gladness or joy. We speak of a delightful country, delightful music, delightful news—such things as cause pleasurable excitement of the mind. Delicious is concerned chiefly with objects of taste or smell, as, The apple is delicious. The food smells delicious. Charming has a much wider use than either of the other two words, and denotes a state of mental enjoyment produced thru the senses. That which is charming has many attractions. A charming woman; a charming landscape.

Select from the great masters of literary style some of the most beautiful, rhythmic sentences. Note the author's fine discrimination in his choice of words, and the graceful arrangement of these words in sentences.

**Incorrect Sentences**  
He studies that he might learn.

He is taller than me.  
I and John will bring the books.

Lay down and rest.  
She sung a beautiful song.  
I have wrote you three letters.

Correct  
He studies that he may learn.  
He is taller than I.  
John and I will bring the books.

Lie down and rest.  
She sang a beautiful song.  
I have written you three letters.

Pronounce: psychic, bade, ally, bayou, chirography, archipelago, combatants, disputable, divan.

Form the plural of, Oasis, analysis, phenomenon, beau.

When you want good printing at reasonable prices call at the Gazette office.

## WEEK'S EVENTS FROM SOUTHWICK

Written For Gazette by Special Correspondent

Wm. Henderson and family, Mr. and Mrs. Wm. Whiting, Harold Whiting and family, pleasantly surprised Fred Whiting at his home Monday evening, the occasion being his birthday. Refreshments of ice cream and cake were served.

The ladies aid will give a chicken supper and an Irish program at their hall, Wednesday, the 17th of this month.

Given Mustoe and family and Harold Whiting and family were Sunday guests of Mr. and Mrs. Wm. Whiting.

Roy Southwick and wife, Mr. and Mrs. Gordon Harris, Howard Southwick and family and Miss Gladys Dagget spent Sunday at the home of Grandpa and Grandma Southwick.

Mr. Schuessler, the postmaster, owing to ill health, left for Lewiston, Monday, where he has gone to consult a doctor. While he is away, Jake Peterson will care for the post office.

Miss Hartung spent the week end with her parents in Clarkston, returning Sunday.

Wednesday of last week, Zoel Fairley received word of the death of his grandmother in Clarkston. He immediately dismissed his school and he and his wife left for Clarkston to attend the funeral. They returned the following Sunday.

Leslie Triplett and family, Doc Triplett, Miss Anna Triplett and Charles Greenwood drove down to Lewiston, Thursday. While there Leslie purchased a Dodge car, returning home with it the same evening. They reported the roads as being quite rough.

Fred Whiting moved his family to the ranch formerly occupied by Pete Stump.

Wm. Henderson and family and Mr. and Mrs. Milton Benjamin drove to Potlatch, Sunday, to visit with Mr. and Mrs. Clarence Henderson. They returned home the same evening.

Thursday of last week, Harve Southwick received word that their daughter, Opal of Lewiston was very ill with appendi-

titis. She was taken to one of the hospitals, where she underwent an operation. Last reports are that she is getting along nicely.

Arnold Cuddy moved from Wright's mill where he has been logging all winter, to his home place, Monday.

A. W. McCoy left Sunday for Wm. Ehlerts, where he has work for the summer. He expects to move his family there later.

Mrs. Belle Cuddy left for Nezperce last Wednesday.

Mr. and Mrs. J. R. King and son, Ray, returned last Wednesday from Marshfield, Ore., where they spent the winter with their sons, Claud and Clay of that place.

Clarence Hewitt and family spent Sunday at the home of John Phillips.

Services were held at the U. B. church both morning and evening by Rev. Calvert of Cream ridge.

Mrs. Ray Southwick of Cream ridge spent the week end with her parents, J. R. King and wife.

Mrs. Harry Smith and Elma Moton of Leland spent Saturday at the home of Ben McCoy.

Ray Triplett of Southwick and Beulah Funkhouser of Mohler, Oregon, were married at Caven-dish last Thursday.

#### Another Good Picture

Mary Philbin, the young lady who starred in "The Phantom of The Opera", will take the leading role in "The Rose of Paris", to be shown at the New Kendrick Theater, tonight and Saturday. This is another picture that we can recommend to all movie fans as being a hundred per cent She will capture your heart in this play and you will be more than pleased that you had the pleasure of seeing it. 11-1

#### Tough on Willie

New York.—Willie Kallista, sixteen, and six feet three inches, has been unable to stand the children laughing at him and the teachers being scared of him, so he has been confined indefinitely for truancy.

#### Cheat on Mushrooms

Worcester, Mass.—Mushrooms from Russia have been found weighted, in order to defraud purchasers, with copper jackets from bullets fired during the war.

# Field Seeds

We are especially fortunate in having large quantities of pure home-grown White Blossom Sweet Clover and Alfalfa to offer.

This seed in the highest test we have ever had and prices are below the market.

## GARDEN SEEDS

The finest selection of Garden Seeds that we have ever handled either in bulk or packages. Come in and get yours now.

**Students Shave in Class, Fighting Co-Eds' "Dolling"**  
Berkeley, Cal.—The principle of equal rights for men has been established at the University of California. Prof. Ira B. Cross recently expressed annoyance at the time taken from studies by feminine students powdering their noses and freshening their countenances. He said boys had an equal privilege and rights if they desired them.  
Two men appeared one day with shaving equipment and when Professor Cross started his lecture they lathered and shaved. Professor Cross led the applause, saying that if they would make their names known to him—he was unable to recognize them under the lather—he would see that they received a grade of "A" for the term.

**AMERICANS UNCOVER THEATER OF 600 B. C.**  
Excavations at Corinth Reveal Rich Finds.  
Washington.—Among the more important archeological "finds" made recently are the discoveries of an American expedition which, under the leadership of Dr. T. Leslie Shear of Princeton is digging up the ruins of the ancient city of Corinth. The objective of the excavation was the great theater built in the sixth century B. C.  
A large part of this has already been uncovered and at the same time a totally unexpected piece of good fortune was the discovery of a magnificent Roman villa, which must have been one of the city's leading residences at the dawn of the Christian era.  
Doctor Shear, who is enthusiastic about this latter "find," describes it as follows:  
"While the main excavation was in progress it became necessary to dispatch several workmen to a spot about a mile west of the theater beside the Sicyon road to clear and protect a bit of mosaic pavement that was in danger of being washed away by a rivulet from a fountain close by. This led to the discovery of a sumptuous Roman villa, of which five rooms were uncovered, all with mosaic floors of beautiful and intricate patterns.  
In Pleasant Location.  
"The villa stands in a pleasant location, with the rich plain sloping in front toward the Corinthian gulf, while in the distance behind rises the citadel of Acro-Corinth. It was supplied with excellent water from an abundant spring. At one end of the house the atrium, a large room 23½ feet square, has a square impluvium in its center, at each corner of which is a column base. The impluvium is a cement-lined pool about a foot deep that was open to the sky, while a roof, supported by the four columns, protected the rest of the room.  
"Opening from the southwest side of the atrium is a small room, 11 by 10½ feet, which has a mosaic gem on the floor. The center of the design is an upright panel with a standing figure of Bacchus, who holds a thyrsus in his hand and has an ivy wreath in the hair. This panel is framed by the wavy circular design that is used around all the pictures of the villa.  
"Northwest of the atrium a doorway leads down to the large triclinium or dining room, 23 feet square. In the center of this room is a panel picture of Europa on the bull, four feet square, framed by a series of decorative hands.  
"From the southwest corner of the triclinium a doorway leads to a small room, 14½ by 11 feet in size, of which the mosaic floor is intact, and part of the frescoed wall is preserved to a height of one and a half feet. This room is the finest discovered in the villa, but the patterns are so complex that a brief discussion can give only an inadequate idea of the beauty of the designs. Bordered by decorative bands of intricate circular, crescent and diamond points is a square panel, about seven feet square, in each corner of which a cantharus is represented with ivy or other vines extending from it.  
"The west wall of this room is cut by a doorway, with its marble threshold in place, through which one passes into a larger room to the west. The mosaic pattern of this floor is entirely geometrical, with designs arranged in complex squares."  
Theater of Known Importance.  
Of course, the greatest work of the year was that done on the theater, of which Doctor Shear says:  
"In some passages of classic literature reference is made to the date, size and importance of this building. It was here that the murderers of the poet Ibycus in the sixth century B. C. are reported to have been apprehended when they betrayed themselves by astonishment at a passing flock of cranes. Here, according to preserved records, large public assemblies were held at crucial times in the history of the city.  
"Preparatory work at the theater was begun early in March of the present year. A suitable place for dumping the excavated earth existed at a distance of about 450 yards to the northwest. Here is a cliff along the top of which run the medieval fortifications and, perhaps, the ancient wall of the city. There is a sufficient space below and beyond this cliff for the disposal of all the earth from the theater area. From here a narrow-gauge track for the dump cars was begun above a section of the site included within the west entrance of the orchestra."  
The excavation of Corinth, like all other similar work in Greece, is conducted under the auspices of the American School of Classical Studies at Athens. In the maintenance of this school 44 of the leading universities and other educational institutions of the United States co-operate.

**GREECE RESTRICTS RADIO TO CITIZENS**  
Only Country Denying Privilege to Foreigners.  
Washington.—Few countries place a ban on radio reception by foreigners; licenses are usually issued to all nationalities, except that four countries require reciprocal privileges for their nationals and one country permits only citizens to listen in. The ownership of broadcasting stations and permits to broadcast, however, are often reserved to citizens of each country.  
According to recent advices from the bureau of the International Telegraph union at Berne, Argentina, Union of South Africa, Australia, Belgium, Canada, Denmark, Great Britain, Hungary, Ireland, Japan, Norway, New Zealand, Netherlands and Sweden follow the custom of the United States in permitting all to listen in; most of these countries, however, charge fees for the privileges.  
Egypt and the Dutch East Indies have no broadcasting yet and consequently no regulations, while Germany, Italy, Switzerland and Czechoslovakia require reciprocity from the home governments of nations seeking receiving licenses.  
Greece seems to be the only country reporting to Berne that does not permit foreigners to listen in under any circumstances, issuing such privileges only to Greek subjects.  
Licenses to transmit in the United States are denied other than citizens, and this rule is followed in Germany, unless reciprocity is permitted, while New Zealand and Czechoslovakia deny the right to transmit to foreigners except in very special instances.

**TINIEST OF MEN**  
This midget, said to be the smallest in the world, is a member of a troupe appearing in Vienna and is only 18 inches tall.

**32-MILE TUNNEL THROUGH CASCADES**  
National, State and Railway Money to Aid.  
Seattle, Wash.—Survey of a proposed 32-mile automobile and railroad tunnel through the Cascade mountains has been undertaken by the state of Washington, and a committee authorized by the last legislature will report next January on the feasibility of the plan.  
The tunnel would be financed with national, state and railway money. The Simplon tunnel through the Alps, for trains only, now is the longest, with a length of 12½ miles. The Moffat tunnel in Colorado being dug under the main range of the continental divide is six miles long. It will be used by both trains and automobiles and also is designed for carrying water from the western to the eastern slope of the Rocky mountains.  
Gen. H. M. Cliftenden, who died here in 1917, conceived the idea of the 32-mile Cascade project. He was the originator, too, of the idea for the ship canal which now links Lake Union, within Seattle, and Lake Washington, on the city's inland margin, with Puget sound and the Pacific ocean.  
The Great Northern railway already is starting an eight-mile tunnel through the Cascades to eliminate grade difficulties, cut operating costs and reduce operating time of trains several hours.  
**Tomb of Crusaders Who Died in 1236 Is Found**  
New York.—News was announced here of the discovery in Jerusalem of the intact tomb of Sir Phillip d'Aubeny, who went to Jerusalem with the Fifth Crusade and died there in 1236.  
Sir Phillip d'Aubeny was the tutor of Henry III of England during the monarch's infancy. He left England in 1222 to embark on the Fifth Crusade under the leadership of the German Emperor Frederick II. The Christians had been expelled by Saladin in 1187, but in 1220 Frederick obtained possession of the city by treaty with Sultan Kameel. The city was in the hands of the Crusaders in 1236, when d'Aubeny died and was buried there. It was recaptured by the Moslems eight years later.  
This historical fact of the burial of Sir Phillip d'Aubeny had been preserved and it was confirmed about eighty years ago, when a slab was discovered in the courtyard of the Church of the Sepulchre with the epithet of Sir Phillip, a Norman shield and the d'Aubeny armorial bearings. It has always been supposed, however, until a few weeks ago that this slab had been removed from the vault of the Crusader and had been placed in the courtyard of the church merely as paving material.  
**Cremation Process**  
In ancient times the cremated corpse was partially consumed, the bones and ashes being preserved. Today the body is reduced entirely to ashes in an oven or retort through the action of heated air and combustible gases.

This midget, said to be the smallest in the world, is a member of a troupe appearing in Vienna and is only 18 inches tall.

**Disks Keep Screen Dark Half of Time at Movie**  
New York.—Charles Van Enger, who has photographed many film plays, has ascertained the screen is dark nearly half the time a picture is being shown, but the eye of the camera is so fast the average spectator never notices the darkness.  
He estimated in "Lady Windermere's Fan," the last photoplay he filmed, 120,000 "pictures" are thrown on the screen and that each of these is seen three times.  
"There are 16 pictures in every foot of film," he says. "The photoplay is approximately 7,500 feet long."  
"In front of the lens on the projection machine is a revolving disk divided into six parts. There are three black sections through which the light is allowed to travel to the screen.  
"By means of an intricate synchronizing device, this disk revolves once each time one of the minute pictures stops before the opening. Therefore, each picture is shown three times before it passes on and the next takes its place.  
**Hatpin Is Back**  
London.—The hatpin is back. With a jeweled head, it is to be used to keep strips of felt and velvet on spring millinery.

**All Kinds of Relics in "Courting" Couch**  
Ottawa, Can.—An old sofa which had been the courting place for seven daughters in the family yielded all kinds of relics when it was torn apart recently. The sofa belonged to George Blake of this city.  
Blake, taking it apart for repairing, found 47 hairpins, 3 mustache combs, 46 buttons, 13 needles, 8 cigarrettes, 5 photographs, 217 pins, some grains of coffee, 6 pocket knives, 15 poker chips, a bottle of headache tablets, 34 lumps of chewing gum, 9 toothpicks and 4 buttonhooks.

**Doctor Parading as Man for 25 Years Is Woman**  
Mena, Ark.—Serious illness of Dr. M. V. Mayfield, seventy-four, well-known physician of Mena, has revealed that although Doctor Mayfield has been practicing here for 25 years as a man, the doctor was a woman. When her secret became known, Doctor Mayfield told friends her parents in England needed a son to meet legal requirements to protect property rights. They dressed her as a boy and as time wore on the habit became her own.

**LOOK!**  
Where You Always See Good Pictures.  
**Tonight and Saturday**  
The **Rose of Paris**  
Starring **MARY PHILBIN**  
The modern Cinderella romance of a lovely little convent rose, transplanted to mingle with the hot-house blooms of the gay world. A story of simple love and faith in human beings that will win a bigger corner in your heart for this beautiful little star. A romance of two worlds. Flowers of Love and Thorns of Sorrow.  
It's a picture that will appeal to the most critical movie fan. A play that you will not forget over night.  
Again we say to you "Do not miss this picture", for if you do you are missing something worth while.

**THE FARMERS BANK**  
Kendrick, Idaho  
This Bank was organized in 1907, by the late John P. Vollmer. For nearly nineteen years this institution has been of service to the people of Kendrick and the surrounding territory. During all these years this bank has been a safe depository for the thousands of dollars entrusted with it by the public.  
We are today in a better position than ever to serve the needs of our patrons. At all times we are glad to discuss your business problems with you. We invite the farmers of this vicinity to make this Bank their headquarters when coming to Kendrick on business.

**The BULL'S EYE**

Editor and General Manager  
WILL ROGERS

Another "Bull" Durham advertisement by Will Rogers, Ziegfeld Folies and screen star, and leading American humorist. More coming. Watch for them.

**News Taken from the Daily Papers**

A headline in the paper says "In their war China won't fight on rainy days." They don't mind getting shot, but they won't get wet.

Imagine a sign as you start to enter China: "RAIN. NO WAR TODAY." If that was the custom in this country, we could prevent all wars by announcing that all the fighting must be done in Portland, Oregon.

Another paper asks, "Where does a Florida Real Estate man go in the summer?" He goes to California to his all-the-year-round home.

A newspaper asks "Why does a President of a concern always talk at the Company's banquets?" It's an incentive to the workers, who say, "If that's all he knows I may be President some day."

Another paper suggests, "The cheapest way to enforce Prohibition is to have everyone that drinks watched." Who is going to do the watching?

An article in a Business Man's magazine inquires, "What business in this country has the largest turnover?" Cucumbers for supper have the largest turnover, with Fords a close second.

The Congressional Record speaking editorially, says, "Bull' Durham is the best Tobacco that ever entered these Stately Halls."

*Will Rogers*  
P.S. There will be another piece in this paper soon. Watch for it.

**FIGHTING AGAINST BUTTER SUBSTITUTES**

**Copra Said To Be Full of Maggot Holes.**

The fight against butter counterfeits, which was started in Moscow recently by dairymen and others interested in promoting the dairy industry, is being carried on with renewed vigor, says the Star-Mirror. J. E. Nessly, field editor of The Idaho Farmer, which paper started and has led the fight against substitutes for or counterfeits of butter in Idaho, has supplied the Moscow committee with samples of copra from which coconut oil is made, and with literature, government reports and other data showing the extent to which consumption of butter substitutes has grown, and the injury they are doing to the dairy industry.

J. E. Wilson, of the Moscow Creamery, has samples of the copra and statements showing the unsanitary conditions under which it is gathered and prepared for use in the manufacture of oleomargarine. These statements set forth that copra, which is the dried meat of coconuts, is prepared by drying the hulled coconuts in the sun, in the Philippine Islands, where the coconuts are gathered, hulled, and dried by natives that are

**Rather a Different Candy**

Aside from always being fresh—there is a different kind of deliciousness about our candy—this seems to have created the wide popularity it enjoys.

Once you try our candy you become a permanent customer.

**PERRYMAN'S**

little better than savages and slaves, and those who are not actual slaves are paid 17 cents a day. The statement declares that the coconut meat is dried in the sun with no protection from flies and that these "blow" the coconuts which become filled with maggots. These are driven out by smoke and the half dried coconut meat is loaded into vessels and sent to the mill where it is crushed and the oil extracted. The statement says that whole families of natives live on top of these cargoes of half dried coconuts during the voyage from the islands where it is gathered, to the mills, and that "coconuts arrive at the mills in a half rotten and stinking condition."

Here the coconut meat is crushed and the oil extracted and loaded into tankers that have carried crude oil, kerosene or gasoline to the Philippine Islands, and shipped to the United States where it is made into oleomargarine. Mr. Nessly gave the contents of the most popular brands of oleomargarine used on the coast, as "76 per cent coconut oil; 5 per cent peanut oil; 2 1/2 per cent milk; 2 1/2 per cent salt and 14 per cent water." This has been repeatedly published in The Idaho Farmer, Washington Farmer and Oregon Farmer and in other publications and has never been denied. Advertisements of popular brands of oleomargarine carry the statement that it "contains coconuts, peanuts, milk, salt and NOTHING ELSE," but the advertisements do not tell how the "coconuts" used in its manufacture are prepared.

A statement taken from a government bulletin is contained in the pamphlets supplied the Moscow committee and this statement says that "of the 1750 tons of copra used daily in the manufacture of coconut oil, not to exceed one or two per cent is clean or white copra" and the statement says further that the Tapahan copra used in the Philippines is "about the worst in the entire world."

Mr. Wilson has given samples of the copra supplied to the committee to a number of interested persons to show those who sell or use oleomargarine what they are selling or getting. The samples he received are filled with maggot holes from which the maggots were driven by smoke and show the ravages of these worms in every piece of the copra, which was supplied to the Idaho committee from the Pure Dairy Products committee of Washington (state) which carried on a fight to prohibit the sale of oleomargarine in Washington. It is said to have come from one of the oleomargarine factories on the coast.

Mr. Nessly has supplied the committee with fact and figures taken from the federal agricultural year books for the fiscal

years 1922-23 and 1923-24, showing the vast amount of oleomargarine used and how it is displacing dairy cows. It is estimated this counterfeit of butter already replaces the product of 10,000 dairy cows in Idaho. 25,000 to 30,000 in Washington, and from 15,000 to 20,000 in Oregon. The statistics show that 16,000,000 pounds of oleomargarine were made and sold in California in 1925. In 1923 the consumption in the United States was 1.88 pounds per capita and in 1924 it had increased to 2.14 pounds per capita. The production of oleomargarine in the United States in 1924, according to the year book, was 238,000,000 pounds or more than enough to supply the spreads for bread for more than 11 per cent of the population.

Protection of the dairy industry is to be a campaign issue in Idaho this year, according to Mr. Nessly, who drew attention to the fact that the Grange, the Idaho State Dairymen's Association; The Idaho State Holstein association; the farm bureau, and practically every farm organization in the state, has gone on record by resolution as demanding the passage of legislation that will protect the dairy industry from this unfair competition and to secure this result will support for the legislature only men who are known to be in favor of such legislation.

The Moscow committee in charge of the campaign would be glad to meet all interested parties and show them the copra and the literature concerning this menace to the dairy industry of Idaho and the health of its citizens.

**SCIENTISTS CHANGE LEAD INTO MERCURY**

**Claim Success in Transmutation of Elements.**

New York.—The Scientific American publishes with its indorsement a report claiming the successful transmutation of elements.

Drs. A. Smits and A. Krassen of the University of Amsterdam have succeeded, the periodical says, in changing lead into mercury and thallium.

Emphasis is placed upon the minute care taken to obtain the purest form of lead, in order that no suggestion might be made of the presence of the transmuted metals as an alloy or impurity.

"The success of such experiments," say Orson D. Munn, editor of the Scientific American, "delights every physicist who is interested in the new science of atomic physics. Many scientists have been seeking to demonstrate that the only difference between the different elements lies in the number and arrangement of the electrons in their atoms. Transmutation is the best kind of evidence in support of the theory.

"There is no present intrinsic value in the achievement, but it opens up for the distant future possibilities we dare not even try to predict."

The Amsterdam experiments were made with a quartz mercury vapor lamp, similar to the one used by other scientists in their attempts to convert mercury into gold, the report says.

**Two Series of Experiments.**

Doctors Smits and Krassen describe two series of experiments—the first of which, owing to certain complications, were indecisive, "but the second series resulted in the transmutation of the element lead into mercury and thallium."

"Since in our experiments we were investigating the quartz transmutation into mercury," they added, "it was necessary from the first to avoid a mercury air pump and a mercury manometer. Therefore the lamp employed was evacuated by a carefully cleaned metallic pump with two 'V' tubes placed in liquid air, and finally by a large vessel filled with coconut carbon. It was also cooled in liquid air, a method by which a high vacuum could be obtained."

**Details of Experiment.**

The procedure by which mercury was obtained follows: The quartz lamp was filled with lead; the lead then was heated in a high vacuum until it was red-hot. The lead oxide coating being completely dissociated, the surface of the liquid lead became as brilliant as mercury.

The lamp was left to burn in vacuum. The lamp was also oscillated so as to make and break the current, thus increasing its intensity. After ten hours, the strongest characteristic lines of mercury and thallium appeared on a spectrograph. Again and again the process was repeated and each time with the same success.

In later runs, along the whole lead spectrum, the mercury lines were dominant, Doctors Smits and Krassen declared, adding:

"The striking result just given seems to justify the expectation that if the lamp had a long enough duration of life, the point could be reached

where the lead spectrum would have disappeared completely."

**1803 Tennessee "Blue Law" Perils Sunday Gas**

Nashville, Tenn.—Sunday "blue laws" more than 100 years old may be invoked in Tennessee to prevent operation of Sunday business.

This is seen by keen observers in the decision of the Supreme court recently in ruling that a person operating a gasoline filling station "is a merchant," and liable under the old statute.

The law invoked was passed by the state legislature in 1803. Violation carries a fine of \$3 for each offense, one-half of which goes to the state and the other half to the person making the complaint.

The old statute was revived by the Supreme court in making a decision in the case of a filling station operator who sought an injunction to restrain a constable from interfering with him in the operation of his business. The constable had arrested the filling station operator 56 times. The petition for the injunction was denied in Chancery court and the lower court sustained when appealed to the Supreme court.

**Japanese Lift Ban on Kiss in Movies**

Tokyo.—Not so long ago the Japanese motion-picture censors permitted no picture to be shown in which there was a kissing episode.

The osculatory scenes were removed bodily because in this country kissing has always been considered extremely immoral. Of late months, however, the censors, influenced by the public, have become more liberal. Now the hero and heroine are permitted to clinch in the western fashion and a brief kiss is allowable. But it must be brief, for if the scene becomes too ardent the censors will start using their scissors.

Home office figures show that the "love motive" in moving pictures is gaining in popularity among the Japanese fans. A report discloses that last year more of the "heart interest" pictures were imported into Japan than ever before.

More than 60 per cent of the moving pictures used in Japan are imported from Europe and America, the remaining 40 per cent being of domestic production. Japanese films have to do mostly with the historical drama; depicting brave deeds of the ancient Samurai—which may explain the 40 per cent.

**Bar Wedding Gifts**

Constantinople.—Wedding gifts have been abolished by the governor of Constantinople province. This is part of a program to encourage marriages and national economy.

**Gobs Like Movies**

Washington.—As contributing to the contentment of the navy's enlisted men movies are rated officially at 46.8 per cent, leading all other entertainments.

**The Elusive Horizon**

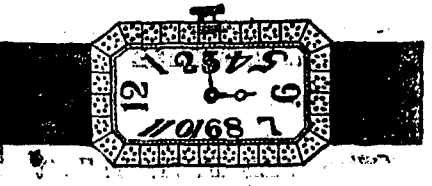

"How far off is the horizon when one looks out to sea?" The horizon is about three miles away from the ordinary person viewing it from the beach. From the top of a 1,000-foot mountain it would be over 41 miles.

Public Land Sale

Department of The Interior  
U. S. Land Office at Coeur d'Alene, Idaho, February 17, 1926.  
Notice is hereby given that, as directed by the Commissioner of the General Land office, under provisions of Sec. 2455, R. S., pursuant to the application of Joseph F. Cook, Serial No. 012386, we will offer at public sale, to the highest bidder, but at not less than \$3.75 per acre, at 10 o'clock a. m., on the 29th day of March, 1926, next, at this office, the following tract of land: Lot 8 of section 14, T. 37 N., R. 2 W., B. M.  
The sale will not be kept open but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof.  
Any person claiming adversely the above-described land are advised to file their claim, or objections, on or before the time designated for sale.  
William Ashley, Register.  
Non-Coal Lands. 9-5

Notice of Sale at Public Auction

Notice is hereby given that on Monday the 22nd day of March, 1926, at 10 o'clock a. m. of that day, in front of W. J. Departee's blacksmith shop, in the town of Kendrick, Latah County, State of Idaho, I will sell at public auction to the highest and best bidder, for cash, the following described personal property: 4 14-inch plow shears.  
The purpose of this sale is to satisfy the lien which I have on said property for work done by me in its altering or repair.  
Dated at Kendrick, Idaho, this 12th day of March, 1926.  
W. J. Departee. 11-1

Look around over your farm and see if you haven't a number of article that are useless to you. Maybe some other Potlatcher wants to buy them. Let the world know by putting a three or four line ad in the Gazette. These local ads sell stuff every week. 8-1

NOTICE OF FORECLOSURE SALE

Order of Sale and Decree of Foreclosure and Sale.  
Mary Alford, Plaintiff,  
vs.  
Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased, Defendants.  
Under and by virtue of an order of sale and decree of foreclosure and sale issued out of the District Court of the Second Judicial District in and for the County of Latah and State of Idaho, on the 13th day of February A. D. 1926, in the above entitled action wherein Mary Alford, the above named Plaintiff obtained a judgment and decree of foreclosure and sale against Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased, defendants, on the 13th day of February A. D. 1926, for the sum of \$1035.50 in United States gold coin, besides accruing interest, cost and attorney's fees, which said decree was on the day of A. D. 1926, recorded in judgement book of said court, at page of said court, I am commanded to sell all that certain lot, piece or parcel of land situated, lying and being in West Moscow precinct, County of Latah, State of Idaho, and bounded and described as follows:  
Lot Five in Block Two of Licuallen's Fourth Addition to Moscow, as shown by the recorded plat thereof.  
Public notice is hereby given that on Monday the 15th day of March A. D. 1926, at 2 o'clock P. M. of that day, in front of the Court House door of the County of Latah, I will, in obedience to an order of sale and decree of foreclosure and sale, sell the above described property or so much thereof as may be necessary to satisfy said judgment, with interest and costs, etc., to the highest and best bidder, for gold coin of the United States.  
Dated this 13th day of February, 1926.  
Charlie Summerfield, Sheriff.  
By Geo. K. Moody, Deputy.

CAMERON ITEMS

Mrs. Bill Wolff and sons, Mrs. Mary McCall and Mrs. Walter McCall were visitors at the Carl Hartung home, Friday.

Mrs. C. L. Wegner and Mrs. Frank Wilken were visitors at the school, Thursday.

The many friends of Mrs. Albert Schultz, Jr., are very sorry to hear that she is not getting along as well as expected after her operation.

Dinner guests of Grandma Schultz, Friday, were: Mrs. Chas. Schultz and children, Grandma Oldag, Mrs. Frank Wilken, Mrs. Carl Hartung, Mrs. Mary McCall, Mrs. Wm. Wolff and Mrs. Walter McCall.

Frank LaBolle, who has been visiting at the Carl Hartung home, returned to Seattle, Wednesday. His family will join him later.

Mrs. Carl L. Wegner entertained the following at a dinner last Monday evening: Mr. and Mrs. Carl Hartung, Hannah and August Hartung, Mr. and Mrs. F. LaBolle and little daughter, Miss Emma Hartung, Mrs. Ida Stoneburner, Miss Stella McClelland, Bill Hartung of Spokane, Mr. and Mrs. Frank Wilken and family.

The choir held its rehearsal at the Herman Meyer home Thursday evening. After the rehearsal games were played until midnight when a delicious lunch was served in honor of Mrs. Meyer's birthday.

Miss Stella McClelland went to Palouse, Saturday, returning Sunday. She was accompanied by Mr. Benjamin.

Mr. and Mrs. Walter McCall were guests of Mrs. Carl Hartung, Saturday and Sunday.

Wm. Hartung returned to his home at Spokane, Thursday, after a short visit with friends and relatives.

Henry Bleck and Herbert Brunsiek spent Monday evening at the A. H. Blum home.

Sunday dinner guests at the August Meyer home were: Mr. and Mrs. Ed Gertje and family, Mr. and Mrs. Jake Newman and family, Mr. and Mrs. F. Schoeffler and son, Mr. and Mrs. Frank Wilken and Milton and Josephine, Homer Renfrew, Henry Bleck, Otto Rauschke, Ernest Schwarz and Marie Schwarz.

Miss Minnie and Laura Blum, and Miss Esther Gardner spent Sunday at the Blum home.

Miss Josephine Wilken spent Saturday with Mrs. George Wilkin.

Mr. and Mrs. Herman Wilken, Sr. and daughter, Mary, left for Lewiston, Sunday.

CRESCENT CLIPPINGS

Sunday visitors at the Wm. Dorendorf home were: Mr. and Mrs. I. T. Kimbley and children, Mr. and Mrs. Mike Forest and children, Adaline Dorendorf and Charlie and Bill Zimmerman.

Mrs. Wm. Kauder visited with Mrs. Frank Souders, Sunday.

Mr. and Mrs. Alex Lawrence visited with Mrs. Lawrence's parents, Mr. and Mrs. F. Reiche, Sunday.

The Dick Winegardner and John Darby families were Sunday afternoon visitors at the George Christensen home.

Emma Starr has been helping Mrs. Clem Israel, lately.

Mr. and Mrs. F. Reiche and daughter, Helena, spent Monday at the Andrew Dorendorf home.

Some of the neighbor girls had a surprise party for the Christensen girls, Saturday afternoon. After playing games until they were glad to rest, Mrs. Christensen served a delicious lunch. All had a very enjoyable time.

The Robinson family have all been sick with the flu lately but are up and around again.

Mrs. Wm. Kauder and Mrs. Frank Souders took Mrs. E. J. Wells, who has been visiting her daughter, Mrs. Souders, to her home in Southwick, Wednesday. They were all dinner guests of Mrs. Berriman.

"HELIUM EXPRESS" TO CARRY PRECIOUS GAS

Bureau of Mines Builds Car to Transport It.

Fort Worth, Texas.—The "Helium

express" will be a picturesque part of war machinery, if plans of both army and navy for handling the buoyant element used in lighter-than-air craft develop according to present indications.

Discarding the tedious laboratory-like equipment now in use, the once rare gas will be rushed from base to base in long black trains of ominous-looking cylindrical tank cars, the first of which was approved recently by the bureau of explosives and is due to arrive at the United States helium plant here within thirty days.

Drawn up far enough behind the lines to be safe from hostile shells—for they will be charged to high-explosive pressure—a battery of nine or ten such cars will be able to fill a dirigible the size of the ill-starred Shenandoah.

One Car Sufficient for Blimp.

One will carry more than enough helium to inflate a blimp of the TC type, and in a fraction of the time required with the present "bottle" system of handling the gas.

Great as this step appears, it is really not as remarkable as the advance shown in the production and the handling of the gas during and since the World war. When it is recalled that, prior to 1918, less than the content of one "bottle" of 178 cubic feet capacity had been produced anywhere, the construction of tank cars capable of transporting 210,000 cubic feet each becomes less of a feat by comparison.

The history of helium development in this country is another commercial romance, tinged with the grimness of national necessity. From a business enterprise operated by two private companies, it grew to a national monopoly, the present plant having been built jointly by the army and navy, later operated by the navy alone, and now under jurisdiction of the bureau of mines, with every governmental department privileged to requisition helium for legitimate needs.

Cost of Production Cut.

The cost, once prohibitive, has come down from \$1,500 a cubic foot for the first amount produced to less than \$27 a thousand cubic feet for the \$500,000 feet a month extracted at the plant at this time.

Should items allowed for helium development in the present budget before congress prove sufficient to double the supply of natural gas, from which helium is extracted, the cost can be brought down to \$17 a thousand cubic feet, it is pointed out by R. A. Cattel, Washington, engineer of the bureau of mines in charge of helium development, who was here recently for a conference with plant officials.

Production on this basis would be at the rate of 2,000,000 cubic feet a month, or enough to fill a ship of the Shenandoah's size every few weeks. The cost of producing this amount, after the expense of laying a new pipe line had been charged off, would be little more than that of extracting the present output, said C. F. Cook, engineer in charge of production at Fort Worth.

The volume of natural gas handled would be much greater, however, for the helium content of that now available is only 1 per cent, varying a few hundredths from day to day, so that 1,000,000,000 feet of natural gas would be required monthly.

Some idea of the saving in handling and transportation costs may be gained from the fact that one of the new tank cars will replace 1257 of the iron drums or "bottles" now in use.

Change Thames' Course, Briton Urges

London.—The contention of Sir Herbert Stephens, a noted member of Britain's legal world, that London has outgrown the Thames and his proposals for changing the course of the historic river have evoked a heated controversy. Sir Herbert cited the damage caused by recent floods to back up his case.

Sentimentalists are replying that the Thames is London. Just as the Parthenon is Athens, and that it might as well be said that Rome has outgrown its seven hills as to contend that London has outgrown its river.

Many schemes have been mooted for diverting the course of the Thames where it runs through the metropolis, these proposals including underground channels, a dam above the city to make the river provide water power and an enormous ditch to switch the Thames off to the sea through a course which Londoners would never see

without taking long trips into the country.

SCANS 50 YEARS OF FIGHT FOR FORESTS

Tree Association Reviews Results of Activity.

Syracuse, N. Y.—The semi-centennial of forestry occurs this year.

Charles L. Pack, president of the American Tree association, calls attention to this fact, and is celebrating the occasion by the publication of a book for free distribution, written in a popular vein, entitled "The Forestry Primer."

In 1876 a special agent was appointed by the Department of Agriculture to study forestry conditions in the United States. Since then the activities of private owners of forest land, the states and the nation have increased rapidly.

The necessity, for the preservation of timber for ship building was one of the first influences that brought federal action. In 1799 congress appropriated \$200,000 for this purpose. In 1886, a division of forestry was created in the Department of Agriculture.

The forest service did not come into existence until 1905. Until that time, appropriations for forest conservation were small. The appropriations for the forest service in 1924 amounted to more than \$12,000,000.

In 1908 an intensive system for the protection of the forests against fire was established in New York state. Many steps in rapid succession followed on the part of states in the East, all looking toward forest protection, growing more forests and more careful use in logging and manufacturing of wood products.

Although the progress of forest conservation has been marked, the use and misuse of the forests has increased with greater rapidity. Records for 1924 show there were 29,000,000 acres of forest land burned over, and only about 35,000 acres planted with young trees. The disparity between construction and destruction is held to show the importance of the adoption of a complete plan for the conservation of this important resource.

MAKES NEW INSULIN

Dr. John Jacob Abel of the Johns Hopkins Medical school, Baltimore, who has just perfected the development of insulin in a pure crystalline form after years of experimental work.

Policeman: "Wot are you standing 'ere for?"

Loafer: "Nuffink."

Policeman: "Well, just move on. If everybody was to stand in one place 'ow would the rest get past?"—Ex.

Rubbing It In

"Was Jack heartbroken when you filled him?" "No. He was perfectly horrid." "What did he do?" "When I gave back the ring he took a little file out of his pocket and made a notch on the inside." "What was horrid about that?" "There were five notches in it already."—Winton Advance.

**Laminex Doors**

What do you think of a door that can be soaked in water for 244 hours without warping or coming apart? This is the famous Laminex test!

There is one door, however, that will not shrink, swell or warp—Laminex! It is the door you see advertised in the Saturday Evening Post.

We are local headquarters for Laminex—in all sizes and patterns. Learn how little extra it will cost to get permanent door satisfaction when you build or remodel. Let us quote you.

**Barnum Lumber & Mill Co.**  
Kendrick, Idaho

**GLEANINGS**

Mr. E. T. Lundt of Genesee spent the past week at the home of Mr. and Mrs. A. Onstott.

A. Wilnot left Monday afternoon for Boise on business. From there he will go to San Diego, Cal., where he will remain for probably six weeks. He says that by the time the roses are blooming in Kendrick he will be ready to come home.

Miss May Seals of Pullman spent the week end at the Joday Long home.

Kyle Anderson came down from Moscow, Monday on the night train, and will work for Sid Dieks this season.

Mr. and Mrs. J. G. Gardner and little daughter drove down to Clarkston, Sunday, where they spent the day at the home of Mr. and Mrs. Ray Snyder.

Homer Bell had a package returned to him the first of the week that he mailed some time ago to his brother. It was sent to Rangoon, Burma; from there it was forwarded to East India, then back to Rangoon and from there to London, then back to Kendrick and from here to Ohio. It was nearly covered up with postage stamps.

The Misses Davidson, Dammarell and Morey arrived on the morning train Saturday from Lewiston to spend the week end with home folks.

E. E. Bechtol of Moscow was in Kendrick the first of the week to attend the stockholders meeting of the Kendrick Theater Co.

Mrs. Robert Spencer and little son arrived the first of the week to visit at the Leith home.

Mrs. Frank Ellis returned on the afternoon train, Tuesday, from a trip to Lewiston.

Mr. and Mrs. Otto Schupfer and family spent Sunday in Moscow at the Bechtol home.

Mr. and Mrs. Otis Gentry and little son returned on the afternoon train from Lewiston, Tuesday.

N. B. Long went to Lewiston on business Wednesday afternoon.

Hugh Stanton went to Lewiston yesterday afternoon to visit his wife at the hospital.

James Emmett went to Lewiston on business Wednesday afternoon.

Mrs. Harold Thomas and little daughter, went to Lewiston, Wednesday afternoon, to visit at the home of Mrs. Thomas' parents, Mr. and Mrs. J. W. Phillips.

H. P. Hall was down town Wednesday afternoon, the first time for several weeks. He was quite ill with the flu but is recovering rapidly.

**PUPILS' OPINIONS OF BIBLE READING**

Express Widely Divergent Ideas on Question

In order to ascertain what his pupils think of the daily bible readings Mr. MacGregor, 7th and 8th grade teacher of the Kendrick schools, asked them to put their ideas in writing and without their signatures, drop the slips into a box on his desk. Following is a list of the answers:

1. I think that the reading of the Bible in Public Schools is a good thing.
2. I get a good deal of good out of Bible reading, but I would like to have other books read also.
3. I think that it is all right to read the Bible in school, but I would understand it better if it was explained.
4. I like the Bible, but would understand it better if you could explain.
5. I think it would be all right if it could be explained sometimes. We don't understand it, and sometimes we get the wrong ideas.
6. I think it is a good thing to have the Bible read in the schools. It won't hurt anyone to listen and it might help someone. I also think everybody should respect it and be quiet while it is being read.
7. I don't understand it. I think it should be obeyed, because it is a law. It may do good if it would be explained.

8. I think it is a good idea to read the Bible, because it shows respect to it. It also teaches the school children more things about the Bible.

9. I think it is all right to read the Bible in school, because it teaches us what is in the Bible and shows respect.

10. I believe it does us good to have the Bible read. We may not notice that it does now, but we are sure to remember a part of it in later years.

11. Don't do me any good, but hope it does the rest.

12. It's not bad.

13. It's all right to read the Bible. If it don't do any good, it don't do any harm.

14. All right.

15. I believe that reading the Bible each morning does me good. Especially when it is not explained, because it sets me thinking about the subject.

16. The Bible reading is good, but I can't understand part of it.

17. I think there is no harm in reading the Bible, and I think that it does some good to some of the pupils.

18. I would like it better if it were explained.

19. I think it is all right to read the Bible although it would be better if explained.

20. I think it is right to read the Bible and it should be obeyed, because it is law.

21. I think the reading of the Bible is just as necessary as the other studies. I would like it better if I understood some of it better.

22. I think that reading the Bible in the public school is fine, because it sets an example for us to go by.

23. I think the reading of the Bible is helpful to me and ought to be to the entire school. I think if no good is done no harm is either.

24. You will notice that number eleven gets no good but hopes others may be benefited.

**Linden Items**

Mrs. Arthur Bohn went to Park last Tuesday, returning home Saturday.

Mrs. Susan Carr visited at the McPhee home Wednesday.

The J. Travis, G. Garner, D. McPhee, Edgar Bohn, C. Fry, Charlie Harris families, Jim Ball, Charlie Garner, J. D. Perry, and Mrs. Carr enjoyed the old time fiddlers contest broadcast from Pullman last Wednesday evening by listening in on the radio at the home of Mr. and Mrs. H. J. Starr.

Frank Lyons and three sons, George Smith and Mr. and Mrs. E. Mitchell enjoyed the program from Pullman, Wednesday evening by listening in on Mrs. Longfellow's radio.

Bill Benner and Frank Farrington, who have been doctoring at the Nichol's Sanatorium at Savannah, Mo., returned home, Thursday.

Nels Matson attended the funeral of Mrs. Jelliburg at Park, Wednesday.

Mrs. E. L. Mitchell visited with Mrs. H. J. Starr, Thursday afternoon.

Mrs. E. L. Longfellow visited with Annt Carrie Allen, Friday afternoon.

Miss Virginia Allen returned from Kendrick, Friday, where Dr. Seeley had been treating her eyes for poison. We are glad to know her eyes are nearly well again.

Addison Alexander went to Moscow, Saturday, returning home Sunday, accompanied by his wife, who has been having medical treatment the last two weeks. She also had her tonsils removed.

The boys of the ridge met at the C. E. Fry place Sunday afternoon, where they played ball.

Annt Carrie Allen spent Sunday at the H. J. Starr home.

Ben Smith, who has been logging at Park, finished and moved home, Sunday.

The Misses Alice and Lena Wegner spent the week end with their parents in Southwick.

Their little sister, Emma, returned with them and will stay with Miss Alice while Mrs. Huffman is away.

Mrs. E. L. Mitchell visited at the home of Mr. George Garner, Saturday afternoon.

J. D. Perry, Charlie Garner and Herman Travis spent Sunday evening at the Smith home.

**Wood Used for Type**

Hard maple is used to a far greater extent than any other species for wood type. Maple is very hard and dense, and stands up well under severe treatment. It also "stays put" after being cut to final form. For electrotype backing and wood engravings cherry has in the past been very largely used, but due to the scarcity of this wood others are being substituted.

**Taylor Sold Residence**

Jack Taylor recently closed a deal whereby he sold his residence in the west end of town, to E. E. McDowell. Mr. Taylor expects to buy other property in Kendrick. The McDowell family expect to move to town from the farm some time the last of this month.

**SPECIAL ON FLOUR**

Now is the time to stock up on flour before the spring work starts in
