THE OFFICIAL PAPER OF LATAH COUNTY

VOLUME 36

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, MARCH 19, 1926

NUMBER 12

IDAHO UNIVERSITY FARM CALENDAR

Specialists Write on Subjects of Interest

Poultry

Sour skimmilk in addition to clean, cool water, should be before chicks all the time during the growing period. Both should be given in clean containers. When only a limited amount of milk is available, the chicks may be given sour milk half the day and water the other half. If skimmilk is not available, semi-solid buttermilk curd may be used.—R. T. Parkhurst.

Dairying

Successful dairying depends on two factors, the cow and the man who takes care of her. Neither can do much without the hearty cooperation of the other. The cow must have inherent ability to produce large amounts of milk. The man must provide feed in abundance and must care for the cow in such a way that she can utilize it to best advantage. Good dairymen with good cows make good money. Don't keep bad cows. Be sure, however, that it isn't your fault instead of the cow's that you send her to the bologna factory.—F. W. Atkeson.

Plant Disease

After application of wet seed treatments do not allow the grain to come in contact with floors, machinery, or sacks which have not been disinfected with the disinfecting solution. Sow as soon after treatment as possible, as grain which stands after treatment is liable to be injured unless thoroughly dried.—C. W. Klingerford.

Entomology

The few moments necessary to examine cattle and treat ox warble infections, will bring greatly multiplied returns. Ox warbles not only injure the hide and cause irritation but they are the larvae of the gad or heel flies that terrify the cattle later on. By getting rid of the grubs right now the fly annoyance may also be eliminated. Squeezing the grubs out of the backs of cattle will destroy them. Place the thumb on one side of the lump caused, the fingers on the other side three or four inches apart. Grasp a deep fold in the hides, bringing the thumb and fingers beneath the grub, and apply pressure.

His First Birthday Party

Mrs. Kester Dammarell entertained at a party in honor of Master Neil Stanton Dammarell's first birthday, Saturday afternoon from three to five. The little guests enjoyed games and toys after which refreshments of ice cream and birthday cake were served. Each child received a dainty basket of home-made candy. The guests were little Misses Betty Boyd, Marian Pearson, Helen Gardner, Marilyn Newton, Barbara Long, Betty Louise Asplund, Lois Deobald and Masters Quentin, Paul and Keith Dammarell, Dale Miller and Billy Deobald.

Campfire Girls Met

The Campfire girls met at the Knepper home Wednesday evening. Two new members, Rowena Ramey and Enda Bolon were initiated into the organization. Marjorie Davidson was elected president and Jaunita Stanton, secretary, to fill vacancies left by the resignation of two of the older girls. Light refreshments were served after the regular business meeting. Mrs. Edgar Long, guardian, and Mrs. G. W. McKeever, assistant, were present at the meeting.

Reports come from the various ridges tributary to Kendrick that the winter wheat is in a most flourishing condition. The acreage is large throughout the Potlatch and the crop looks very promising.

Obituary

Charles Winston Lowe was born at Hatmont, Illinois, September 11, 1915. He died March 12, 1926 after a brief illness from congestion of the lungs. He is survived by his mother and father, two sisters and two brothers.

Funeral services were held at the Southwick Methodist church, Sunday afternoon at 2 o'clock, Rev. Geore Calvert officiating. Interment was made in the Southwick cemetery.

NEWS FROM THE KENDRICK SCHOOLS

Written by High School Student Correspondents

The Senior Class has started practicing on their play that they are going to give in April. Miss Seeley is coaching the play. Those taking part in it are Maude Compton, Ernestine Callison, Hazel Stanton, Alberta Walker, Grace Plummer, Clarice Leith, Herbert Schwartz, Buster Brown and Claude Cook.

The biology class went on an observation trip Monday. In their class work Wednesday they classified the flowers and insects they found.

The Girls' Glee club is progressing rapidly. They are using new books this semester.

The boys have started playing baseball every evening. They have formed their team and scheduled a game with Juliaetta for Friday on the local diamond. The lineup is: Pitcher, Roy Sparber; catcher, Don Broeke; 1st base, Bus Brown; 2nd base, Carl Sparber; 3rd base, Harley Eichner; short-stop, Bob Dammarell; left field, Elbert Long; right field, Herbert Schwartz; center, Claude Cook; Subs, Jerry Ingle, Gus Wegner and Bernard Jones.

JOKES

Herman Hartung: "If I was born in an aeroplane, what nationality would I be?"

Carl Sparber: "Why, you would be an Airedale."

Hester Knepper: "Mr. Kerns would you tell me what a vacuum is?"

Mr. Kerns, Sr.: "I have it here in my head but I can't think of it just now."

Father: "Young man I distinctly saw my daughter sitting on your lap. What explanation have you to make?"

Don Broeke: "I got here early, sir, before the others."

He who puts off studying until tomorrow, is going to have a good time to-night.

Elbert Long (thoughtfully): "There's one consolation in being bow-legged."

Clarice Leith: "What's that?"

Elbert: "No one will ever accuse me of being knock-kneed."

Good Old Days

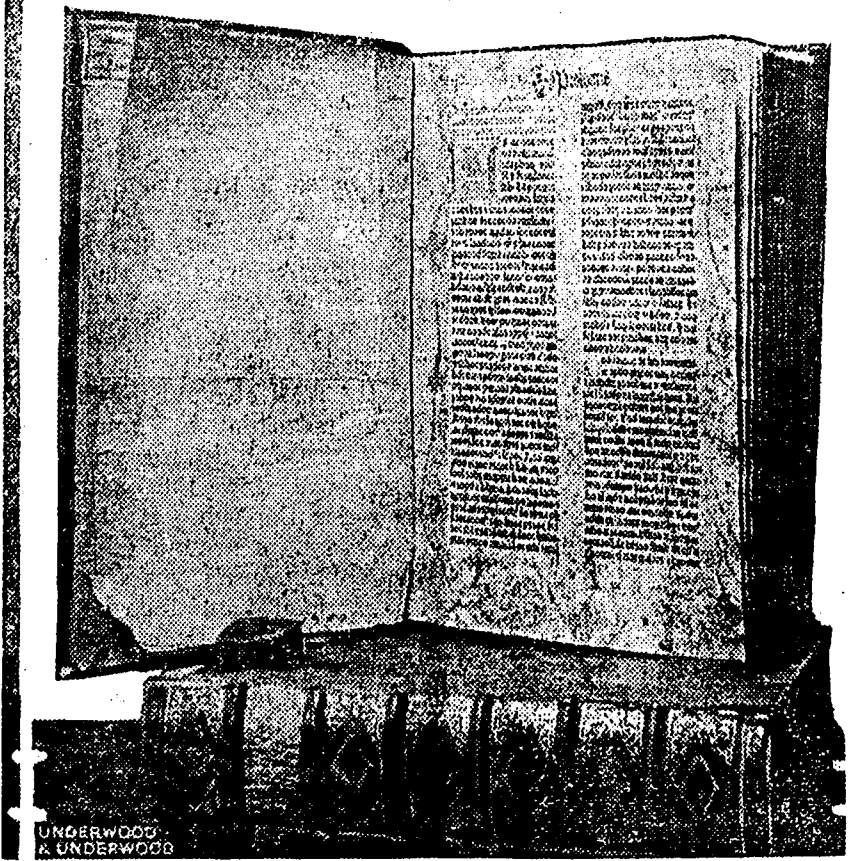

Here are some of the features of the good (?) old days: Bustles, euhre, bartenders, money musk, rag carpets, sleigh bells, frozen pumps, fly blankets, shaving mugs, bean catchers, quilting bees, mustache cups, kerosene lamps, livery stables, oyster suppers, the schottische, the quadrille, home-baked bread, the bull-in-the-ring, J. L. Sullivan, white undershirts, 5c see-gars, McGuffeys readers, soapstone bed warmers, red flannel underwear, torchlight processions, muzzle loading shotguns.

Baseball Practice Sunday

Manager Barnum desires a big turnout of all the baseball men in this section next Sunday afternoon, weather conditions permitting. Regular practice will be held Wednesday afternoon at 4 o'clock and Sunday afternoons.

Wickliffe R. Smith, of Southwick published an issue of the Potlatch Star last week, under date of March 12. It is in magazine form and presents a neat appearance.

Highest Price Paid for This Book

This is the famous Melk copy of the Gutenberg Bible, the first book printed from movable type, which was sold the other day for \$100,000, the highest price ever paid for any book in the world, to Dr. A. S. W. Rosenbach of New York and Philadelphia. It came from the Benedictine monastery in Melk, Austria, where it had reposed for centuries. It is printed in Latin and bears the title "Biblia Latina," and the line "Mafnz, Johann Gutenberg and Johann Fust, 1455," at the foot of the title page.

May Lower Light Rates

A. Wilmot, proprietor of the Potlatch Consolidated Electric Co., went to Boise recently to take up the matter of light and power rates with the public utilities commission. He writes this week that he has met with the full board of commissioners to try to get at a rate that will please the users of "juice" from his line. He says that the rate expert or engineer will be in the northern part of the state soon and will go over his books and base the rates on his findings.

He states that he told the commissioners what had been done by the citizens of Kendrick and that he was willing to leave rate making to their judgment. Mr. Wilmot said "I feel that some kind of a change can be made to lower the light rate but not the demand charge and power. I am anxious to have my property invoiced and passed upon to insure prices in the light and power business."

Young Folks Entertained

Saturday night the Misses Margaret McDowell, Hazel Stanton, and Clarice Leith entertained a number of young friends at a jolly party at the Commercial Hotel. Games and dancing were enjoyed from eight to eleven after which the hostesses served refreshments of sandwiches, pickles, cake and coffee. Those present were the Misses Margaret Broeke, Shirley Clem, Ernestine Callison, Hester Knepper, the three hostesses, and Messrs. A. Hartung, Wm. Brown, Donald Broeke, Harley Eichner, Roy Sparber, Carl Sparber, Egnaz Flaig and Lloyd Ware.

Will Sing Over Radio Monday

Arthur Rogustad and his sister, former residents of Bear ridge but now living at Clarkston, will sing over the radio from Washington State College, at Pullman, Monday night, March 22. The Clarkston Commercial club will broadcast a program that evening.

Legion Dance Tonight

Remember the American Legion dance to be held at the Fraternal Temple tonight (Friday). Chase's orchestra from Lewiston will furnish jazz for the occasion. You are all invited to attend.

So There!

"My goodness, your tie is so sloppy," a young woman told a young business man this morning. "Good gracious, if you had been hanging around my neck as long as this tie, you'd be a wreck," replied the man.—Emporia Gazette.

Manufacture Batteries

The Kendrick Garage Co. this week received the balance of the equipment necessary to manufacture automobile batteries. Most of the battery parts are being molded here. Aside from the plates, boxes and insulating plates, the balance of the batteries will be made in Kendrick. Deobald Bros. believe that by manufacturing their own batteries they can compete with mail order products. They will build a better battery at a competitive price.

LATAH COUNTY NEWS PARAGRAPHS

Items of Interest Taken From Neighboring Papers

A bill has been introduced in congress which, if it is passed, will make it unlawful to send unsolicited merchandise through the mail. It certainly is a good measure, we are for its adoption. Hosiery, neckties, necklaces and beads are common articles to be sent out. If you are satisfied or a "sucker" you remit the price they ask, if not you will return the goods, thus causing more or less unnecessary inconvenience. Legitimate business suffers from this sort of thing, besides the annoyance it inflicts upon the people who are picked as victims by the merchandise pirates.—Troy News.

After ten years of handling the transfer business of this town, during which time he has loaded and unloaded several thousand tons of every conceivable sort of merchandise and then some, Lewis Aas this week sold the Deary Dray and Transfer to Albert Swanson. When we asked Mr. Aas how come, he said he had suddenly realized that ten years without a vacation was a long time, and he saw the only way to get one was to sell out. Meeting trains and bucking freight has become second nature to him and he expects to feel lost for a while. He has no definite plans for the future except that he will again take up auctioneering.—Deary Press.

Makes Money Raising Hogs

Henry Lorang is among the few ranchers in this section of the country who claims he makes money raising hogs. He raises Chester Whites crossed with Big Boned Type Poland Chinas and he says he gets excellent results. Just recently three of his sows brought him 44 pigs, one produced 19 pigs, another 13 and another 12, all of which he says were strong and lively. A very good increase, to say the least.—Genesee News.

What Men Are

A little girl wrote this composition on men, says the Altoona Tribune: "Men are what women marry. They drink smoke, swear, but don't go to church. Perhaps if they wore bonnets, they would. They are more logical than women, also more zoological. Both men and women sprung from monkeys, but the women sprung further than the men."

If You Are Wise

If you think you are wise and well informed, answer these. You have seen hundreds of white horses, why did you never see a white colt? Why does a horse eat grass backward and a cow forward? Why does a hop vine twine to the right and a pea vine to the left? Why does a horse when staked out by a rope unwind the rope while a cow winds it up into kinks? And why does a dog turn around 3 times before lying down?—Swiped.

E. A. Deobald went to Lewiston on business yesterday afternoon.

WEEK'S EVENTS FROM SOUTHWICK

Written For Gazette by Special Correspondent

Given Mustoe and wife went to Lewiston last Friday, returning home Sunday.

Mrs. Jim Crutcher of Ahsahka is spending a few days at the home of her parents, Mr. and Mrs. Graham.

Wm. Winters and wife of Myrtle came up Monday for a couple of days visit with relatives.

Roy and Raymond Blankenship and families of Bed Rock spent Sunday at the home of Fred Whiting.

Harry Welker returned last Thursday from Clarkston, where he has been for a couple weeks. His father, Wm. Welker accompanied him home.

Vester Whiting moved his family from Leland to Southwick, Tuesday, where they expect to make their home.

Floyd May, who is working for Wm. Ehlert spent the week end at the home of his aunt, Mrs. Clarence Hewitt.

The little son of Mr. and Mrs. Edwin Wetmore is quite ill.

Dr. Seeley was called Tuesday morning to attend the little daughter of Press Shoemaker, who is sick with rheumatic fever.

Mr. and Mrs. John Hewitt spent Sunday at the home of their son, Clarence.

Mrs. Floyd Russell and Mrs. Elton McCoy were guests of Mrs. Ben McCoy, Monday.

Harry Smith and Jim Cook of Leland were business visitors in Southwick, Monday.

Leslie Triplett and wife motored to Lewiston last Monday, returning the following Wednesday. They reported the roads as being very bad after the recent rains.

Elton McCoy and wife, Nadine McCoy, Minnie Bunker and Milton Benjamin and wife were guests of Wm. Henderson and family, Sunday.

Mrs. Fred Gehre returned to her home Sunday after a three weeks visit in Lewiston with relatives.

Atlee Mustoe and wife went to Lewiston, Sunday, returning to their home Tuesday. Mrs. Mustoe reports her sister, Opal, as being much better and that she may be able to return to her home by the end of this week.

County Officials Visit Kendrick

County Commissioners Elmer Paulson, John Cone and G. F. Walker, in company with County Auditor Harry Thatcher, were in Kendrick, Tuesday. They drove from here to view the strip of road extending from the western boundary of Kendrick Highway District to the town limits of Juliaetta. This road was graded by the county commissioners last summer. There is also a short strip below Juliaetta near the Latah county line that was graded last fall. The commissioners plan to surface these two strips of road in the near future, probably early this spring. They will meet tomorrow at Moscow to definitely decide the matter.

When the county commissioners have surfaced their part of the road, all of the road construction work from Kendrick to Lewiston will have been provided for. There is every prospect that within the next few months it will be possible to drive from the Wandeher gulch bridge, a mile east of Kendrick, to Lewiston without getting off of surfaced highway.

One At a Time

A young lawyer was making a plea, a donkey brayed outside. "One at a time please," remarked the judge. A few minutes later when the judge was instructing the jury the animal broke forth again. "Beg pardon, judge," said the lawyer, "the echoes are so loud in this room I did not catch what you were saying."—Ex.

THE KENDRICK GAZETTE
"The Pulse of The Potlatch"

Published every Friday at Kendrick, Idaho, by Ralph B. Knepper
Subscription Price - \$1.50
Entered at the Post Office at Kendrick as second class mail matter.

This Potlatch country grows the best crops in the world—and has the worst roads.

A woman just recently returned from Paris, says that all the women there have their hair bobbed. There are women in Kendrick who will never bob their hair—they haven't any to spare.

In the old days if a man couldn't make a go of anything else, he tried farming. Now it takes a smart man to make farming pay.

Why should any woman be afraid of some other woman stealing her husband? If he is that kind of a man she ought to be tickled to death to get rid of him.

Walt Mason: The tempest batters at the door, the wind wails a dismal tune, but in three shakes or maybe four, we shall be knee-deep in June.

An Oklahoma girl advertised for a husband at a cost of \$3; wedding \$6. In less than a year he left her \$11,500 life insurance. It pays to advertise.

An exchange says that it costs twelve million dollars a year to half clothe American women.

Selected: I had rather be an ape climbing the ladder to destiny with the thrill of God in my heart, the light of the morning on my upturned brow, than be coming down the ladder a son of all that was once aspiring but now only proud of the dead weight of what my ancestors did.

From now on there will be politics mixed up in most everything. Until after the campaign is over it will be a good plan to put into effect the old Chinese saying: "Think no evil, hear no evil, speak no evil." There will be people with axes to grind who will endeavor to use the campaign to further their own personal ends. Politics is the most inconsistent game in the world. During the campaign it will be the proper time to use your own good, common sense.

One of the most successful farmers in this section gives it as his opinion that constant raising of beans on Potlatch land will eventually impoverish the soil. According to the book, beans are supposed to enrich the soil and are believed by some to be a fertilizer crop. It stands to reason, however, that a bean crop leaves nothing in the soil that will keep it from baking or from washing. In the fall when the beans are harvested the "enter" pulls them up by the roots so that nothing is left of the plant in the soil. Fields that have been constantly planted to beans are beginning to show the effect. Some of the soil from these fields flows past Kendrick in Potlatch creek. Rotating beans and wheat with alfalfa and clover has proved to be a good combination.

In an eastern state last week a man was criminally prosecuted because he was alleged to have declared that he believed neither in God, heaven nor hell. The action was brought under a state blue law enacted more than a century ago. The man was acquitted. To have punished him because of his unfortunate mental attitude would have been neither constitutional nor fitting to our time. Surely, one who is so lacking in spiritual development that he concedes himself to be a mere bit of animated flesh, bone and hair, with no hope beyond the grave, is to be pitied rather than punished. Persons who prefer to believe that they have the same final destiny as a mindless, soulless earthworm are entirely within their legal rights, although little can be said for their breadth of vision. One thus cheated by nature has been punished enough without invoking laws against him.—Caldwell News.

John James Ingals: In the democracy of the dead all men at least are equal. There is neither

rank nor station nor prerogative in the republic of the grave. At this fatal threshold the philosopher ceases to be wise, and the song of the poet is silent. Dives relinquishes his millions and Lazarus his rags. The poor man is as rich as the richest, the rich man as poor as the pauper. The creditor loses his usury, the debtor is acquitted of his obligation. There the proud man surrenders his dignities, the politician his honors, the worldlings his pleasures; the invalid needs no physician, and the laborer rests from unrequited toil.

Does It Pay?

Does it pay to advertise? Well, listen to this from the Kansas City Club News: Advertising has made the Victrola dog famous. It has put Castoria down your throat, left bristles in your gums, then came along Rubberset took them out. It has put a Gillette against your hayfield. It has put Murine in your eyes, sold you Cuticura for your pimples, Pears for the bath and Ivory for the tub. It has put Arrow collars around your neck, Ingersolls around your wrist. It has jammed your feet in hole-proof socks, put Paris garters on your legs, Tiffany rings on your fingers. It has even worn out your jaws on Wrigleys, posted you on what to buy to cure your corns, warts, bunions ingrowing toenails, too. Go anywhere you want to, do anything you wish, advertising has a hand in it—absolutely. Then some people ask "Does advertising pay?"

Lost—A Boy!

Not kidnapped by bandits, hidden in a cave to weep, starve, raise a nation to frenzied searching. Were that the case, 100 thousand men would rush to the rescue if need be. Unfortunately the losing of the lad is without dramatic excitement, tho very sad, very real. The fact is, his father lost him. Being too busy to sit with him at the fire side, answer his trivial questions during the years that fathers are the only real heroes of the boys, he let go of his hold upon him. Yes, his mother lost him. Being much engrossed in her teas, dinners, club programs, she let the maid hear the boy say his pray-

ers, thus her grip slipped, the boy was lost to his home. Aye, the church lost him, being so much occupied with sermons for the wise, elderly who pay the bills, having good care for dignity, the minister elders were un mindful of the human feelings of the boy in the pew, made no provisions in sermon or song or manly sport for his boyishness, so the church and many sad hearted parents are now looking earnestly for the lost boy.—Author unknown.

Homely Advice

What tho you have found no treasure, nor has any rich relation left you a legacy. Diligence is the mother of good luck. God gives all things to industry. Then plough deep while slugs sleep, you shall have corn to sell, to keep. Work while it is called today, for you know not how much you may be hindered tomorrow. One today is worth 2 tomorrows, as Poor Richard says; further: Never leave that till tomorrow which you can do today.—Benjamin Franklin.

"The Shooting of Dan McGrew" will be shown at the New Kendrick Theatre, tonight and Saturday. Don't miss it. 12-1

Card of Thanks

We wish to thank the kind neighbors and friends for their help and sympathy during the illness and death of our dearly beloved son.
Mr. and Mrs. C. W. Lowe and family.

Don't Buy From Peddlers

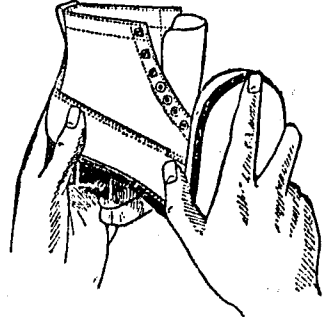

A school principal taking up a collection for flowers from the faculty walked into the kindergarten of the school. The principal had just successfully solicited a donation from the kindergarten teacher and was passing out, when Johnny piped: "Teacher, I wouldn't buy anything from that man. Mother always says to buy in the stores and not from those peddlers."

First English Almanac

The first almanac printed in England was "The Kalendar of Shepherdes," which appeared in 1497, and from that time forward almanacs were numerous, "omens and prognostications" being added in most cases to calendar information.

KENDRICK PRESBYTERIAN CHURCH

Prof. Goss of the University of Idaho is scheduled to speak at the Presbyterian church Sunday morning. Sunday school at the usual hour. Everybody is cordially invited to attend.

It's a "Star Brand"

"SOFT and GOOD"

YES, folks, the name of this shoe is "Soft and Good," and it is true to its name.

The soles are flexible oak, Goodyear welt sewed. There's no tacks or threads to hurt your feet. The uppers are soft and pliable, yet strong and sturdy, and will stand lots of hard service.

"Soft and Good" shoes are put out by the makers of "Star Brand" shoes—and that means they are solid leather and cost you less per month.

This moccasin blucher shoe is one of our best sellers. All leather thru out. Priced at

\$5.50

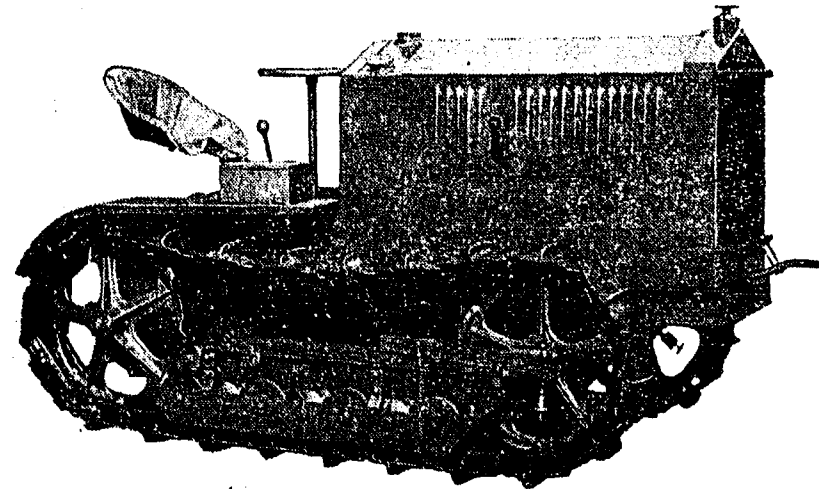

Others at \$4.50 and \$5.00

Men's 8 inch blucher solid leather moccasin toe. A real value at

\$4.50

Foreign Advertising Representative
THE AMERICAN PRESS ASSOCIATION

Paris Press Pokes Fun at American Women
Paris.—American women are the subject of many sarcastic comments in the French press. Here are two from daily papers:
"An American woman enters a grocery and orders a well known pick-me-up of high alcoholic strength. 'Yes, madame, a bottle?' 'No, twenty-five bottles!' 'Ah, then, it is for a bar?' 'Oh, no! For myself. I am going away for twenty-five days this month.'"
The scene of the second was a cabaret in which was a matinee idol with some woman friends, when an American woman thrust a 500-franc bill at the young actor because he refused to dance with her. This annoyed the girls with him, the story goes, and it was not merely the bill that was thrown into the undiscerning American's face.

Well 127 Years Old Unearthed in Gotham
New York.—Believed to be one hundred and twenty-seven years old, a well, part of New York's first water system installed by Aaron Burr, was discovered by workmen digging the foundations for the new Court Square building at Lafayette street.
The well is 35 feet below the street surface and is filled with litter and the accumulated rubbish of more than a century and a quarter. On a high level the workmen found a mass of metal junk with a huge flywheel, believed to have been part of the machinery used in pumping the water from the well to a reservoir near Chambers street before the establishment of the Croton water system in 1842.

"The Shooting of Dan McGrew" will be shown at New Kendrick Theatre, tonight and Saturday. Don't miss it. 12-1

DO YOUR ANKLES TURN?
If they do, nine chances out of ten, it's because the heels of your shoes are worn down to the danger point.
It won't take us long to put your shoes in safe condition. Bring 'em in now.

How to Get Rid of All Weevils
Heavy Damage Wrought to Beans and Peas by Many Little Insects.

(Prepared by the United States Department of Agriculture.)
The annual board bill of the bean and pea weevils reaches a total of many millions. Furthermore, on account of heavy damages wrought by these insects, farmers have sharply reduced the acreage devoted to beans and peas, in numerous cases abandoning the commercial production of those crops for others.
Contrary to a widely current belief, bean and pea weevils do not develop spontaneously from the germ of the seed. As the bean and pea pods grow, the mother weevil, which flies from the storage house where infested seed are kept to the growing crop in the field, lays eggs either on the outside of the pods or within them. From these eggs, which appear as mere white specks, there hatch white grubs that bore through the pod into the soft developing beans or peas. The holes through which the grubs enter the seeds are too small to be seen without a microscope. Thus many seeds that appear outwardly sound in reality harbor weevil grubs. Their presence is usually not discovered until as adult weevils they burrow their way to freedom, leaving a hole about one-sixteenth of an inch in diameter.
Leguminous Crops Injured.
Injury to leguminous crops is caused by a number of insects. Those commonly found in supplies of beans, peas, cowpeas, or lentils in this country include the pea weevil, the common bean weevil, the four-spotted bean weevil, and the lentil weevil. With the exception of the pea weevil and the lentil weevil the weevils attacking beans and cow peas produce generation after generation in dried seeds in storage as well as on the growing plants.
Since the pea weevil, which attacks peas, cannot breed in dried seeds, peas intended for planting may be held over for one year in tight paper bags so that the weevils that emerge cannot live but will die before the second spring.
If weevils are found in peas, cowpeas, or beans, they can be readily killed by fumigation with carbon disulphid. Water-tight barrels make convenient receptacles in which to store and fumigate small quantities of these crops. Fill the barrels to within a few inches of the top with seeds, pour one cup or more of carbon disulphid on the seeds in each barrel, and then cover with a double thickness of heavy wrapping paper tied tight around the top, or with several sacks weighted down with boards. A wooden cover is also useful in keeping in the fumes. The carbon disulphid when poured over the seeds quickly vaporizes, and the gas, being heavier than air, sinks to the bottom of the container, filling all the air spaces. Fumigation requires from 24 to 48 hours. It is better to use too much carbon disulphid than not enough. Well dried seeds properly fumigated with carbon disulphid are not damaged either as food or as seed to be planted.
Temperature for Fumigating.
A favorable temperature for fumigating with this chemical is 75 degrees Fahrenheit or higher. In fumigating with carbon disulphid care must be taken to make sure that there is no fire in the room or nearby, even lighted cigars, lighted lanterns, or the spark from an electric fixture, as the gas is explosive and inflammable, when coming into contact with fire in any form. Carbon disulphid is purchased as a liquid in iron drums or tin cans and weighs about 10½ pounds per gallon. When fumigating large quantities of seeds, use from 8 to 20 pounds of carbon disulphid per 1,000 cubic feet of space to be fumigated, the amount varying with the tightness of the container and the temperature.

Kansas Uses Mexican Quail as Farm Labor
Topeka, Kan.—Kansas has found a way to import farm labor without running afoul of the immigration authorities.
The state has just imported 5,000 quail from Mexico to help out the Kansas farmers. They are expected to eat up 125,000 insects during the next summer, and, with their brood of young "bobby whites," to destroy at least 250,000,000 weed seeds by autumn.
The Mexican quail is slightly smaller than the native bob white of Kansas, but the state game warden is assured that the two will interbreed. He estimates conservatively that the purchase of 5,000 birds will bring Kansas 25,000 young quail next summer.

Velvet Beans Good Ration for Steers
May Be Substituted for Cottonseed Meal.
(Prepared by the United States Department of Agriculture.)
Velvet beans and corn silage in equal quantities form a satisfactory

ration for fattening steers. In such a ration velvet beans may be economically substituted for cottonseed meal, provided they do not cost more than half as much per pound (in the pod) as that product. These facts were established in feeding experiments conducted in Mississippi by the United States Department of Agriculture in co-operation with the state agricultural experiment station, and in similar investigations carried on by the department at its experimental farm at Beltsville, Md. In one of the experiments native steers showing no evidence of improved blood were used. In all the others, high-grade feeder steers were employed. The experiments were undertaken primarily to determine the value of velvet beans when fed with corn silage or sorgo silage as compared with cottonseed meal when similarly fed, and also whether velvet beans should be fed whole or ground, dry or soaked.
Two pounds of velvet beans (in the pod) were found to be about equal in feeding value to one pound of cottonseed meal. When the whole velvet beans were substituted for cottonseed meal in the ration for the steers, only about two-thirds as much silage was eaten, the large amount of roughage formed by the bean hulls being responsible for the reduced consumption of silage.
Whole velvet beans when soaked are more palatable than the dry beans, but the latter are more economical when the labor required for soaking them is considered.
Grinding of velvet beans is not advisable, since it renders them less palatable and impairs their keeping quality. While from 5 to 10 per cent less of ground velvet beans than of dry whole velvet beans are required to produce 100 pounds of gain, this saving does not compensate for the cost of grinding. Furthermore, ground velvet beans are so unpalatable that steers will not eat enough of them to make good gains.
In the course of the experiments it was found that cottonseed meal is more palatable than velvet beans in any form, and that it produces more rapid, though not more economical gains than velvet beans. The palatability of velvet beans may be improved by the addition of a small quantity of cottonseed meal to the beans. The most economical form in which to feed velvet beans is in the pod without soaking. Velvet beans of the thin-podded, speckled variety are much higher in feeding value and more palatable than several varieties which have a very thick pod, and consequently a low shelling percentage. Velvet beans of this variety are, moreover, a valuable protein concentrate.

ROUND THE FESTIVE BOARD
When one good-sized chicken will not serve the family if increased by unexpected company, try serving it this way—it will go nearly twice as far:
Chicken Warmein.—Stew the chicken with one onion, having plenty of broth. Remove the chicken and onion when cooked and add to the

broth three bunches of celery cut into small pieces; cook the celery until tender but not soft. Meanwhile remove the chicken from the bones and shred and cut into small pieces; keep hot in a double boiler or dish set into hot water. Remove the cooked celery to another dish, keeping it hot, and add noodles to the broth, cook them and what broth is left thickened, adding cream, and the dish is ready to serve. Place a nest of noodles on the serving plate, then a spoonful or two of the seasoned celery, then on top the minced chicken, adding a bit of gravy, or sprinkle with a few croutons. A good-sized chicken, with plenty of celery and noodles and broth, will serve eighteen or twenty for a ladies' luncheon. The seasoning is important in this dish as in all cookery. Taste it often to be sure it has enough.
French Macaroon Cream.—Soak one tablespoonful of gelatin in three tablespoonfuls of water. Scald two cupfuls of milk with one square of chocolate, add the yolks of three eggs beaten with one-half cupful of sugar. Stir constantly until the mixture thickens, then add the stiffly beaten whites, two-thirds of a cupful of macaroons rolled, one teaspoonful of vanilla. Turn into individual molds and chill. Serve with whipped cream.
Veal Cutlets.—Wipe a slice of veal and cut into serving-sized pieces. Cover with boiling water and simmer until the meat is tender. Drain and sprinkle with salt, dip into egg and crumbs and fry in deep fat. For sauce melt two tablespoonfuls of butter, add one tablespoonful of flour and one cupful of veal broth. Season with salt, pepper, onion juice and a teaspoonful of grated horseradish, with a cupful of cream.

PERRYMAN'S

Forest Profits in Short Period

Not Necessary to Wait Lifetime to Realize Returns From Trees.

Contrary to the current belief one does not have to wait a lifetime to realize returns from forest plantations.

In fact, continues E. L. Scovell, specialist in farm forestry at Rutgers university, trees established on idle lands next spring will yield the owner a very substantial profit in six to ten years.

Interplanting Favored. Interplanting of pine and Norway spruce or Douglas fir is the answer. In a plantation of this sort Norway spruce is planted at intervals of six feet in rows six feet apart. Pine, preferably white or red pine, is then planted in the alternate intervals. As the pine grows much more rapidly than the spruce during the first few years, it is best to postpone the plant-

ing of the pine at least two years from the time the spruce is set. This allows the spruce trees sufficient time to become firmly established and to assure their not being crowded too quickly by the pine. When planted at this spacing, 1,200 trees of each species are required on an acre.

Under ordinary conditions the spruce will be suitable for Christmas trees when six to ten years old. Trees of this size are now bringing 50 cents to \$1.50 per tree delivered at the market. If two-thirds (800) of the planted trees reach maturity—the mortality is generally much lower—the harvested crop per acre at present market prices would be worth from \$400 to \$1,200 delivered.

Profit From Thinning. The pine is left to grow to timber size. When harvested at forty years of age it will yield 20,000 to 25,000 board feet of lumber per acre, worth \$150 to \$250 at present market prices standing in the field. In addition it will yield a small profit when the first thinning is made, usually fifteen to twenty-five years after planting, and substantial returns from thinnings at regular intervals thereafter. The total investment, including taxes and compound interest for a ten-year period, when the Christmas trees are harvested, will not exceed \$85 an acre. The additional cost of carrying the pine to maturity is practically negligible.

Winter Green Feed Very Important for the Hens

If one has cabbages or mangels stored in a cellar where they may freeze, it often pays to keep a thermometer in the cellar and give it additional protection, or use a lantern to bring up the temperature if the mercury begins to stand close to 32 degrees. Frozen green feed is not good for hens, and constant freezing and thawing is not good for the keeping qualities of the feed.

Hens do not like rye grain, but they will eat sprouted rye, and it seems to be a satisfactory green feed. Sprouted oats are generally used. If you make a homemade grain sprouter with wooden trays, heated with a kerosene incubator lamp, be sure the fire risk is not greater than the value of the sprouted oats. In most cases, I think the metal sprouters are a good investment, because the fire risk is greatly reduced.

When mangels are sliced and thrown in the litter, they pick up more or less dirt and straw. Cutting them in halves and laying them in wooden troughs may be a better way. Then the hens can peck out the succulent feed more readily than when the pieces are half-buried in the litter.

Make Garden Plans

Plan your garden for this year. Use as a basis the amount of vegetables needed by your family for a healthful diet. Plan for the greatest quantity of the vegetables your family particularly likes. Make the location and size of plot fit the garden you want, whenever possible, rather than plan the garden to fit a space that may be too cramped or inconveniently located.

Aggravates Insect Damage

The continuous cropping of land to the same crop frequently aggravates insect damage. Where corn is grown year after year in the same fields, the yields may show considerable reduction. Much of this loss may be due to insect activities. To practice the rotation of crops as a means of lessening insect damage is a good plan.

Best Quality of Cream

It should be the aim of every farmer selling cream to produce the best quality of product possible. The day is coming when cream will be paid for on the basis of its grade. Good butter cannot be made from poor cream, and the market is demanding more and better butter each year. Cleanliness of the farm separator and all utensils coming in contact with the milk and cream are vitally important. Freshly skimmed, sweet cream should be immediately placed in scalded cans and cooled to a temperature of 50 degrees Fahrenheit.

POULTRY

GUINEAS ARE BEST PEST DESTROYERS

The guinea is a native of Africa and is best suited to a warm country, though they will do well in the latitude of West Virginia and Indiana, writes A. J. Legg of West Virginia in the Rural New Yorker. There are two breeds of guineas in this country, the pearl and the white guinea. Both are about the same nature, the main difference being that of color.

Both breeds are of a wild, nervous nature and enjoy traveling all over the farm in search of bugs and worms. They can be taught to return home at night and to roost in the poultry house.

Guineas are about the best insect destroyers that I have ever tried; they prefer worms and bugs to grain, though they will eat some grain. I have seen them eating currant worms and Colorado beetles, two pests that chickens pass by without molesting. I have also seen guineas killing field mice. To anyone who wants to turn crop pests into a valuable product I would recommend a flock of guineas for the purpose.

The guinea is a good summer egg producer, begins laying in April and if kept from sitting she will continue to produce eggs until late in the fall. The hens lay an egg every day while they do lay and an average of about 100 eggs to the hen may be expected from a flock in a season. The eggs are not as large as the chicken eggs, but are of a better flavor and have a harder shell.

To anyone who is thinking of raising guineas I would recommend that they buy eggs and hatch them under chicken hens rather than buy old guineas, as the old guineas are liable to range away and not come back to their new home. The best season for the young guineas to be hatched is June and July, as they delight in warm, dry weather but cannot stand a cold, wet season.

A good-sized hen can cover twelve eggs very well. As soon as they hatch they should be enclosed in a close box or coop for a few days until they learn their adopted mother's call, else they may stray away in the weeds and grass and get lost. A young guinea is like the grouse or quail and will hide when scared.

After the guineas are a few days old they become very much attached to their adopted mother and will follow her until grown. They should have free range with shelter only when it is raining.

Only a few male birds should be kept about, one for eight or ten hens. In this way they will go in flocks and several hens will lay in the same nest.

Poultry Diseases Cause Heavy Losses to Farmer

Heavy losses of poultry are being caused by a form of cold known as bronchitis or cold in the windpipe. D. C. Kennard, associate in animal industry, Ohio experiment station, who is receiving numerous reports of reduced egg production and losses from disease, attributes these losses largely to closing the poultry houses too tight and to overcrowding.

In bronchitis, apparently healthy birds die suddenly from strangulation caused by a thick mucus which fills the windpipe. This can be detected by opening the trachea, or windpipe from end to end with a pair of small scissors.

The disorder responds to preventive measures better than to treatment. Prompt relief may result from admitting an abundance of fresh air without drafts, providing ample floor and roost space, and replacing old litter with fresh, clean material. Epsom salts may be given to aid birds in overcoming the disease.

Ducks Demand Plenty of Water With Their Feed

A duck is contented so long as it has plenty of water with its feed, and a dry place to roost in; if water is not supplied, and if the roosting shed is damp and cold, the ducks first drowse, then roll over on their backs and die much as ducklings die from "fits" when they encounter digestive difficulties of any sort.

Give the ducks animal food of some kind—buttermilk, or beef scraps. Give them also mineral feed in the way of bone meal, and of course most ground grain and green food. Keep water in deep pans before them at every meal.

Lamon's ration for ducks is good for either breeders or laying stock: One bushel bran, one bushel low-grade flour, one bushel corn meal, one bushel green feed, one-half bushel either ray or cooked vegetables, one bushel in ten of beef scraps, one-half bushel in ten of cooked fish.

Fresh Ground for Chicks

Did you ever keep chicks in a small run, and after they were eight or ten weeks old notice that they begin to droop their wings and make a slow growth? If you had plowed or spaded the run it would have helped. When chicks have only a small range they soon contaminate the soil. No other cause does more to promote tuberculosis among fowls than growing chicks on the same ground, year after year. Many cases of gaps may also be traced to this cause.

Early Seeded Oats Give Larger Yields

Seven-Year Test Made by Nebraska Station.

While there is such a thing as seeding oats too early in the spring, there is no doubt but many farmers are inclined to defer seeding more than seems advisable. Oats are a cool-weather plant, and for that reason the more its growing period can be stretched while the weather is cool the larger will be the yield. The Nebraska experiment station has accumulated some valuable data on this subject in recent years that should be generally known.

In a seven-year test, for example, oats seeded on March 31 averaged 58 bushels per acre; those seeded April 12, 49 bushels; and those seeded April 20, 38 bushels. At the North Platte (Neb.) experiment station in a 14-year test, oats seeded April 8 yielded 28 bushels per acre; those seeded April 18, 25 bushels, and those seeded April 20, 21 bushels.

Average yields of a given crop for periods of seven to fourteen years are pretty reliable and the figures presented above certainly point to early seeding as being very desirable for oats. What may be said about oats in this respect applies equally to barley and spring wheat. It is important, therefore, to have the ground intended for oats or other small grains in shape to rush seeding operations as much as possible after the season for spring work opens.

Farm Inventory Is Very Simple Form of Record

"An inventory can be taken on the average farm in less than half a day, and for the time spent it shows the farmer the most about his business of any records he can keep." This statement is made by Prof. V. B. Hart of the farm management department at the New York State College of Agriculture.

"A farm inventory is the simplest form of farm financial record that can be kept," he says. "The inventory shows the farmer his net worth above debts, and a comparison of two successive annual inventories will show him whether he got ahead during the year. This is the first step to take in putting a farm on a good business basis, and from such an inventory a credit statement can be made to be filed with the bank where the farmer does business.

"Any farmer borrowing money from a bank should file a credit statement with his bank once a year. The banker is a custodian of the funds of his depositors and should not make loans to any but responsible persons. He is entitled to and should have the information which a credit statement gives and this statement also generally gives a farmer a better credit standing at the bank."

The state college at Ithaca has copies of a form for taking an inventory, with spaces provided for all the items. It also contains complete directions for taking the inventory and for making a credit statement, with blanks for two such statements. This can be had free from the college by writing for it.

Public Land Sale

Department of The Interior U. S. Land Office at Coeur d' Alene, Idaho, February 17, 1926. Notice is hereby given that, as directed by the Commissioner of the General Land office, under provisions of Sec. 2455, R. S., pursuant to the application of Joseph P. Cook, Serial No. 012386, we will offer at public sale, to the highest bidder, but at not less than \$3.75 per acre, at 10 o'clock a. m., on the 29th day of March, 1926, next, at this office, the following tract of land: Lot 8 of section 14, T. 37 N., R. 2 W., B. M. The sale will not be kept open but will be declared closed when those present at the hour named have ceased bidding. The person making the highest bid will be required to immediately pay to the Receiver the amount thereof. Any person claiming adversely the above-described land are advised to file their claim, or objections, on or before the time designated for sale. William Ashley, Register. Non-Coal Lands. 9-5

Farm Hints

Many chinch bugs may be harbored in those old fence rows and roadsides. Manure that is thrown out in the weather in a barn yard pile will lose half its plant food in six months. Crop rotation systems, manuring, fertilizing, are some of the ways that the natural fertility of the soil may be restored. Half the pleasure of a garden is in planning it before hand—and half the work may thus be saved. It is winter-evening fun that will pay juicy dividends all next season.

Look around over your farm and see if you haven't a number of article that are useless to you. Maybe some other Potlatcher wants to buy them. Let the world know by putting a three or four line ad in the Gazette. These local ads sell stuff every week. 8-1

NOTICE OF FORECLOSURE SALE

Order of Sale and Decree of Foreclosure and Sale. Mary Alford, Plaintiff, vs. Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased. Defendants. Under and by virtue of an order of sale and decree of foreclosure and sale issued out of the District Court of the County of Latah and State of Idaho, on the 13th day of February A. D., 1926, in the above entitled action wherein Mary Alford, the above named Plaintiff obtained a judgment and decree of foreclosure and sale against Mrs. W. J. Griffith, formerly Sammie Finnette Dudley and Mrs. A. Olson, administratrix of the estate of A. Olson, deceased, defendants, on the 13th day of February A. D., 1926, for the sum of \$1035.50 in United States gold coin, besides accruing interest, cost and attorney's fees, which said decree was on the day of A. D., 1926, recorded in judgement book of aid court, at page I am commanded to sell all that certain lot, piece or parcel of land situated, lying and being in West Moscow precinct, County of Latah, State of Idaho, and bounded and described as follows: Lot Five in Block Two of Lieuaillen's Fourth Addition to Moscow, as shown by the recorded plat thereof. Public notice is hereby given that on Monday the 15th day of March A. D., 1926, at 2 o'clock P. M. of that day, in front of the Court House door of the County of Latah, I will, in obedience to an order of sale and decree of foreclosure and sale, sell the above described property or so much thereof as may be necessary to satisfy said judgment, with interest and costs, etc., to the highest and best bidder, for gold coin of the United States. Dated this 13th day of February, 1926. Charlie Summerfield, Sheriff. By Geo. K. Moody, Deputy.

Growth of Hair

Hair grows much faster in the summer than in any other season of the year. This is due partly to the heat of the sun and partly to the opening of the pores of the skin, and the escape, in the form of perspiration, of body poisons which, unexpelled, arrest the growth of the hair. It has been noticed that those whose work induces perspiration nearly always have luxuriant hair.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

Alven Zumbro, Plaintiff, vs. The unknown heirs and unknown devisees of Florence H. Lanker, deceased, and all unknown owners of and all unknown claimants to any right or title to or interest in or lien or claim upon Lots Two (2) and Three (3) in Section Eighteen (18) in Township Thirty-nine (39) North of Range Four (4) W. B. M. and the Northeast Quarter of the Southeast Quarter (NE 1/4 SE 1/4) and the Southeast Quarter of the Northeast Quarter (SE 1/4 NE 1/4) of Section Thirteen (13) in Township Thirty-nine (39) North, Range Five (5) W. B. M., Defendants. THE STATE OF IDAHO SENDS GREETING To the above named defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows:

To quiet title to the above described lands and premises in plaintiff.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the State of Idaho, in and for Latah County, this 8th day of March A. D. 1926.

Aldrich, Charles Noble and Minnie Noble, his wife, Oscar H. Dasch, Isabel Dasch, J. L. McClanahan and Sarah C. McClanahan, his wife, and all unknown owners of and all unknown claimants to the following described real estate situated in Latah County, State of Idaho, to-wit: All of Block 3 of Aldrich's Addition to the Town of Juliaetta according to the recorded Plat thereof; Also the following tract of land to-wit: Commencing at the Southeast corner of said Block 3 of Aldrich's Addition to the Town of Juliaetta, running thence in a Northwesterly direction along the Southwesterly boundary line of said Aldrich's Addition to the Town of Juliaetta 272 feet, more or less, to the West line of the Southeast quarter of section 4 in Township 37 North, Range 3 West of the Boise Meridian, running thence South on said West line 400 feet, running thence at right angles East 208 feet, more or less, to the County Road, running thence at right angles North 256 feet, more or less, to the said Southeast corner of said Block 3, or to the point of beginning; Also the perpetual water right as given and granted in a certain deed of record in book 32 of Deeds at page 102 of the records of Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETING To the above named defendants: You are hereby notified that a Complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature and general terms of which is to require each and all of the above named defendants to appear in the above entitled cause and to set forth any right, title or interest that said defendants or either of them may have or pretend to have in and to the above described real estate, and to quiet the title thereto in the name of the plaintiff.

And you are hereby directed to appear and answer the said Complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said Complaint within the time herein specified, the plaintiff will take judgement against you as prayed in said Complaint.

Witness my hand and seal of said District Court, this 20th day of February, 1926. HARRY A. THATCHER, Clerk of said District Court,

By Adrian Nelson, Deputy Clerk. (Seal of Court Affixed) A. H. Oversmith, Attorney for plaintiff, residing at Moscow, Idaho. 9-6

"The Shooting of Dan McGrew" will be shown at the New Kendrick Theatre, tonight and Saturday. Don't miss it. 12-1

Studies in English By Wickliffe R. Smith

In writing and speaking we should strive to attain a clear, easy and elegant style, to master a grammatical correctness in sentence building, and rhetorical precision in the choice of words. A well written composition, one without harsh words or clumsy sentences—may be likened unto a graceful, smooth-flowing river with no boulders or other impediments to mar its beauty.

Synonyms

Majority, Plurality: Majority denotes the amount by which one number exceeds all others combined. Plurality means that one of three or more numbers is greater than any of the others. A candidate has a majority of votes when he receives more than the combined votes of all his opponents; he has a plurality when he receives more votes than any one of his opponents.

Begin, Commence: These words are very closely related to each other. To begin is used either with persons or things. To commence is used only with persons. Begin frequently refers only to time or order, while commence signifies action. Begin is the opposite of end, while commence is oppose to complete. Every sentence begins with a capital letter. The inaugural ball commences at eight. The alphabet begins with A. The speaker commences his oration.

Incorrect Sentences

The wounded man laid in the dust all day.

She set on the bench five hours.

The bird has flew from its nest.

He done the work well.

I could have did that more easily.

He has not came.

Correct The wounded man lay in the dust all day.

She sat on the bench five hours.

The bird has flown from its nest.

He did the work well.

I could have done that more easily.

He has not come.

Pronounce: Emui, enervate, equipage, exEMPLARY, exquisite, falcon, gondola, finale, fiancé.

"The Shooting of Dan McGrew" will be shown at the New Kendrick Theatre, tonight and Saturday. Don't miss it. 12-1

LELAND LOCALS

Walter Hoffman was a Leland visitor last Tuesday afternoon. He came up and took John Shriner to Moscow for treatment for his eyes. They were accompanied to Moscow by Mr. and Mrs. B. F. Flesham.

Mrs. Herman Koepf and son and Mrs. C. J. Taber went to Lewiston last Monday.

Fred Reil who spent the winter in Lewiston is at home again. His nephew is also home from Iowa.

Ed Flesham went to Weippe last Monday.

The revival which started at the Methodist church last Tuesday has been very well attended considering the rainy weather. The evangelist, Rev. Starmer, is a forceful speaker and the interest increases each night. He uses methods all his own. Come and hear him each evening and remember the prayer meetings each day.

Mrs. Emil Larson was pleasantly surprised last Wednesday afternoon when a number of her friends and their families surprised her with gifts. They stayed and served supper after which all attended the evening services at the church. The occasion was Mrs. Larson's birthday and many of her friends expressed the wish for many repeated occasions.

Mrs. Russell Smith and Mrs. Goudzward with their little daughters, visited in Leland last Tuesday from Moscow, where they live while the children are attending school.

Mrs. Wm. Block went to Kendrick Wednesday and had her teeth pulled. She has been ill for the greater part of the

winter and hopes to find improvement now.

Quarterly conference will be held at the church next Sunday. Rev. J. H. Dills, presiding. Don't forget but be sure to attend.

Virgil Flesham hauled the lumber for the new porch at the parsonage and it will soon be built.

Mr. and Mrs. Vester Whiting moved to Southwick last week.

Mr. and Mrs. Emert Lien were charivariated at the Ole Lien home. Everyone was given a generous treat.

About forty neighbors and friends gathered at the home of Anton Nelson, Saturday evening to give Mr. and Mrs. Bernheart Nelson a pleasant surprise. Refreshments were served by the guests and a social good time was enjoyed by all.

Albert Nelson departed for Sunburst, Montana, Tuesday of this week, where he has a position in the oil fields.

You are cordially invited to attend the St. Patrick's program to be given by the Stag Club and others at the Community Hall, Saturday evening, March 20th at 7:30. Following this will be a basket social and lunch will be served by the Ladies Guild. The proceeds derived will be used to paint the Community hall.

"Shooting of Dan McGrew"

The Metro production "The Shooting of Dan McGrew" which plays at the New Kendrick Theatre, tonight and Saturday, is probably the best known poem in American literary history. It is safe to say that millions of persons have read it, and a good portion of those can recite it from memory. The picture tells for the first time the real story behind the shooting, explaining the incidents that led up to the tragedy. 12-1

Inventory Is Big Aid

The farm inventory is an aid in keeping a record of property that has been lent or misplaced. This is often sufficient justification for taking the inventory, although the information it furnishes concerning the progress made in accumulating farm property is of far greater importance. Many farmers who are keeping a close record of their farm business never fail to take their farm inventory.

Economical Rations

Stock keepers must know the cost of their feeds in order to determine the best and most economical rations. For this reason it is necessary to investigate the cost of making silage. The Missouri Agricultural college last year showed a cost of \$5.90 per ton for corn silage. They based this on 26 1/2-bushel yield, crediting the corn with 94 cents per bushel and charging actual costs, which were liberal on all items.

Grub Out Dead Trees

Midwinter is the best time to grub out dead trees in the orchard and saw off large dead branches. These should be at once worked up into stove wood. Apple or cherry wood makes excellent fuel for the fireplace or kitchen stove. If removed from the orchard at this time the hazard of their dropping in winter or being blown to pieces is avoided.

Fruit Auctions Grow Rapidly

Provide Quick Sales Medium and Are Used by Large Organizations.

(Prepared by the United States Department of Agriculture)

American fruit auctions now occupy an important place in the machinery of distribution. Approximately \$150,000,000 worth of farm products were sold in 1923 by these auctions, compared with less than \$50,000,000 in 1912. The auctions provide a rapid sales medium, and are used particularly by the large private and co-operative organizations which must keep their large volume of production moving in a continuous stream.

These facts are brought out by the United States Department of Agriculture which has been making an extensive study of the fruit auctions. Twenty-four companies were engaged in the business in 14 leading distributing centers in 1923. The principle of auction selling, the department points out, is predicated upon the necessity for assembling in one place a sufficient proportion of the market supplies to attract a large body of the buying trade.

Numerous Changes.

"Numerous changes have taken place in the auction business in recent years," the department says. "Reorganizations, consolidations, and the establishment of new companies have occurred in several cities. Most of the changes have resulted from the demand of the trade for impartiality in the services rendered and the charges imposed, and from their desire to participate in the profits earned by the auctions. The tendency is toward greater uniformity in methods and practices.

"Auctions in the receiving markets occupy a position in the channels of distribution between the shippers and the retailers. On the one hand the functions of the auction are identical with those of the carlot wholesaler of the commission merchant, while on the other the auction operates in much the same manner as the jobber and other less-than-car-lot wholesalers.

Sales Are Open.

"A great variety of commodities are sold at the auctions, but most of the supplies consist of citrus and deciduous fruits. The sales are open to the public, and anyone may buy. Charges and commission rates by the various companies lack uniformity, but in most cases are less than the cost of selling by private sale. Another factor appreciated by growers is that the companies customarily forward net returns to the shipper within 24 to 48 hours after the sale is made."

Detailed results of the department's study have been printed in Department Bulletin No. 1362, entitled "American Fruit and Produce Auctions," copies of which may be obtained upon request to the Department of Agriculture, Washington, D. C.

Sudan Grass as Forage

Crop for Pigs Is Good

Sudan grass is a forage crop that has not been experimented with very much as a pasture for hogs. At the Iowa station Professor Evvard did some work with it as a maintenance pasture for brood sows and found it nearly equal to alfalfa as a pasture for carrying brood sows through the summer. The Nebraska experiment station has perhaps done the most with sudan grass, as a pasture for shotes and the results of their work show it up in a very favorable position as compared to alfalfa as a grain savor. Professor Loeffel reports that where corn and tankage was selfed to shotes on alfalfa, it took 361 pounds corn and 29 pounds tankage for 100 pounds grain, while on the sudan grass it required 338 pounds corn plus 27 pounds tankage, or 23 pounds less corn and 2 pounds less tankage for each 100 pounds gain, and furthermore the pigs on sudan grass weighed 213 pounds against 210 for the alfalfa pastured pigs. These results are striking and it may be we have been overlooking a good "bet" in sudan grass as a pasture for pigs. It will bear trying out on a small scale, especially in the drier sections of the country.

White Navy Bean Is the

Variety Most Favored

The small white navy bean is the variety generally planted, rather than the larger ones. They do best on soil that is not too rich; in other words, a rather thin soil. When the land is fertile enough to produce large yields of corn, the plants produce too much foliage.

Beans should be planted after the soil is well warmed up, or about June 20 or 25. They may be planted a month later than this, but in that event there is always some doubt as to their maturing before frost, or of being caught by late rains that interfere with the curing of the crop.

Beans should be planted far enough apart so that a cultivator can be used, or about 30 inches between rows. If you are planning to use a wheel hoe the rows may be spaced 18 inches apart. You can use a grain drill by closing some of the spouts or a common garden drill if your plantation is not going to be too large. Do not put the beans too thickly in the row, but have plants three to six in best space. It will take from 25 to 30 pounds of seed to the acre. When the beans are up continue to frequently water them. If the soil is wet,

GLEANINGS

The big Yuba tractor belonging to the Kendrick Highway District is undergoing a thorough overhauling at the Main Street Garage in Kendrick. As soon as it is in shape for business Ben Cummings will have charge of operating it this season.

R. Haizlip returned the first of the week from Lewiston where he spent several weeks at the hospital. He is somewhat improved in health.

Frank Crocker recently finished putting a black walnut stock on one of his sporting rifles. The stock is far ahead of the ordinary factory job.

Fred Albright was in Kendrick Tuesday on business. He is driving a handsome new Nash touring car.

Ben Shay returned from Lewiston this week where he visited relatives for several weeks.

Charles Lewis of Clarkston was a Kendrick visitor last Sunday.

Wallace Emmett and son attended the tractor demonstration at Moscow last Saturday.

Mrs. Silvie Cook returned home Monday morning from a visit with her mother, Mrs. Dean Wright, at Agatha.

Mr. and Mrs. Hugh Helpman of Lewiston spent the week end here with relatives.

Marjorie Davidson returned Monday morning from a visit with her sister at Lewiston.

L. E. Pearson arrived Thursday afternoon from Spokane to visit his family.

Harry Fowler came up from Lewiston last Saturday to look after business interests here.

Wm. Deobald went to Moscow last Saturday to attend the tractor demonstration.

Merton Pierce of Deary returned home last Saturday after transacting business in this community.

Mrs. Stewart Compton and two children of Orofino arrived yesterday afternoon to visit relatives here.

Mrs. Julius Petrick returned Wednesday from Seattle where she made an extended visit with her children.

Rev. and Mrs. Bell have both been quite ill for some time. They are reported to be improving considerably at this time.

In The Last Ten Years

Sales of electrical washing machines have increased from 13,000 to 612,000. Bathtubs from 510,000 to 1,500,000. Autos from 569,000 to 3,638,000, or 540 per cent. Our factories produce 60 per cent more goods with only 25 per cent more workers. Our railroads carry 22 per cent more freight with the same number of men. Our farms produce 12 per cent more (some years, most years) with fewer farmers. Our steel mills produce 86 per cent more tonnage with only 56 per cent more workers. Our foreign trade is 30 per cent larger in volume. Instead of being \$3,000,000,000 in debt to other nations, our net credit balance is \$19,000,000,000. We hold 45 per cent of the world's monetary gold. That's all there is wrong with this country.

LINDEN LOCALS

Mrs. Susan Carr visited at the Martin Thomas home in Kendrick last Wednesday.

A number of the young folks from here attended the dance at Pine Creek, Friday night.

We pay market price for your butter and eggs.

Kendrick Store Co.
"The Quality Store"

Mansfield Heavy Duty Cords

Built to Over-Serve

Built by an old tire manufacturer who has made a record for himself by operating at full factory capacity continuously since 1912.

The first tires sold by the Carlson Hardware Company in Kendrick, were Mansfields, which were sold to Dr. Hoyt in 1916.

This tire has been distributed thru hardware trade exclusively for 18 months, all factory branch houses being eliminated. This method of distribution costs 30 per cent less than old branch house method and this saving in distribution is put back in the tire in the form of a larger, heavier and better built tire.

We sold more tires in 1925 than we did for many years prior. During the year 1925 we were not asked to make an adjustment on a Mansfield tire or tube, which speaks volumes for quality of this super-tire.

Prices no higher than other tires so buy the tire that gives you most miles in service

The Carlson Hardware Company

THE WINCHESTER STORE
