

IDAHO UNIVERSITY FARM CALENDAR

Specialists Write on Subjects of Interest

Poultry

In feeding chicks the earlier in the morning and the later in the evening the feeds can be given, the more satisfactory will be the results. Chicks kept a little hungry during the day may be given all they will eat at night. They will normally get all they want in 10 or 15 minutes at each feeding during the day. For the first week tin pie plates or feed boards that can be thoroughly cleaned after each feeding should be used. After the first week, the scratch feed may be thrown in the litter to induce exercises.—R. T. Parkhurst.

Agronomy

Weeds start early. Now is a good time to make a trip of inspection over the farm to get a line on weed problems that will have to be faced this season. Look for unusual plants. Among the weeds that are already above ground are quack grass, hoary cress, bull thistles, wild oats, and winter vetch. It will be profitable to hoe out winter vetch right now in spare moments.—J. D. Remsburg.

Dairying

Every farmer should check up on his separator at least every other month. Take a sample of skim milk from the separator and test it. Good separators should skim within at least .05 of one per cent.—F. W. Atkeson.

In The Home

Eggs are a complete product containing all the elements necessary for growth. It is therefore important that they be included in the meals of the preschool age child, and of the child going to school. They are also a valuable part of a diet for elderly people.

The egg yolk is especially high in vitamin A which is necessary for the growth and development of the young. The yolk also contains some of vitamins B and C.—Marion E. Hepworth.

Plant Disease

When treating wheat with copper carbonate the following precautions should be observed: Avoid inhaling the dust—treat where there is free circulation of air; avoid feeding treated grain to livestock; and use as clean seed as can be obtained.—C. W. Hungerford.

Fiddlers Warming Up

Much interest is being shown in the Old Time Fiddlers Contest which is to be held at the New Kendrick Theatre, Friday night, April 9th. Many of the old fiddlers are warming up for the contest and it is expected that there will be at least a dozen entries. A prize of \$10.00 will be given the winner and \$2.50 to the fiddler holding second place. The following have already entered their names:

Amiel Peters of Leland, Idaho. Frank Day of Juliaetta, Idaho. N. E. Ware of Big Bear Ridge. E. O. McAllister of Juliaetta. B. J. Davis, Southwick, Idaho. Frank LaBolle, Kendrick, Ida.

Receives French Poultry

Bob Brown of Bear ridge received a shipment of fancy poultry last Saturday. They have feathers around their faces that resemble full beards. The hens are buff with light spots and the rooster dark with silver and yellow lacings on his neck. These chickens have 5 toes instead of the usual 4. They are a French breed and supposed to be prolific layers.

Notice Bandsmen!

The regular rehearsal will be held in the town hall Monday night of next week instead of Tuesday night, on account of the regular monthly meeting of the town council.

OFFICERS LIFE NEARLY FORFEITED

Bomb Attempt on Federal Officer J. F. Rice.

An attempt to assassinate James F. Rice, federal prohibition agent, was made at 10:45 o'clock Tuesday night when a dynamite bomb was exploded at the corner of the window of his sleeping room. Mr. Rice was only partially stunned and was immediately able to dress himself and summon Chief of Police Eugene Gasser, who joined in an investigation of the case. A great hole was torn in the side of the house, plaster and pieces of the window frame were thrown over the room and windows on the one side of the house were broken out. Mr. Rice was asleep in the room at the time and his head was resting within 18 inches of the point where the bomb was placed.

Those familiar with the character of high explosives, attribute the escape of Mr. Rice to the fact that his window was up and the force of the explosion was not confined above the window sill. This allowed much of the dynamite to spend its force without rendering damage but the window sill and the entire corner of the window as well as the adjoining part of the house, were blown in. Plaster was blown from much of the wall on the side of the explosion and was hurled across the room.

Officer Rice has been engaged in prohibition work in the central Idaho country for many years. He was a federal prohibition officer assigned to the Indian department to suppress liquor traffic on Indian reservations for a good many years before the Volstead act became effective. For the past several years he has been engaged in the enforcement of the Volstead act and his duties have taken him over much of Idaho, Washington and Montana. During his service in the cause of prohibition, he has made a great many arrests in the Lewiston country and he stated he presumed the attempt upon his life was the result of his activities in the cause of law enforcement and prohibition.—Tribune.

Latah County Spelling Match

At the county spelling match held at Moscow last Saturday the Kendrick schools took second in the eighth grade, Doris Emery winning that place. She tied for first but finally lost to Patricia Kennard of Moscow. The winners in the county contest were:

Third grade — Roderis Hearn, Potatch, first; Barnard Hobbs, Bovill, second.

Fourth grade — Mable Grayson, Potatch, first; Verla Leith, Moscow, second.

Fifth grade—Gail Ingle, Steele school, first; Mary Jean Humphrey, Lenville school, second.

Sixth grade—Francis Crystal, Bovill, first; Lois Horton, Potatch, second.

Seventh grade — Fern Alice Eide, Blaine school, first; Merrill Hart Evergreen school, second.

Eighth grade — Patricia Kennard, Moscow, first; and Doris Emery, Kendrick, second.

Oral judges were: Mrs. D. A. Darton and Lola Gamble, Moscow, and Orville Miller, Deary; judges of written spelling, Audrey Stapleton, Moscow, Ethel Anderson, Genesee, and Fae Bucher, Troy. Pronouncer for oral spelling was June Cole, Moscow, and pronouncer for written spelling, Amie Carlson, Moscow.

"Is the world round?" the school teacher asked the little boy.

"No'm."

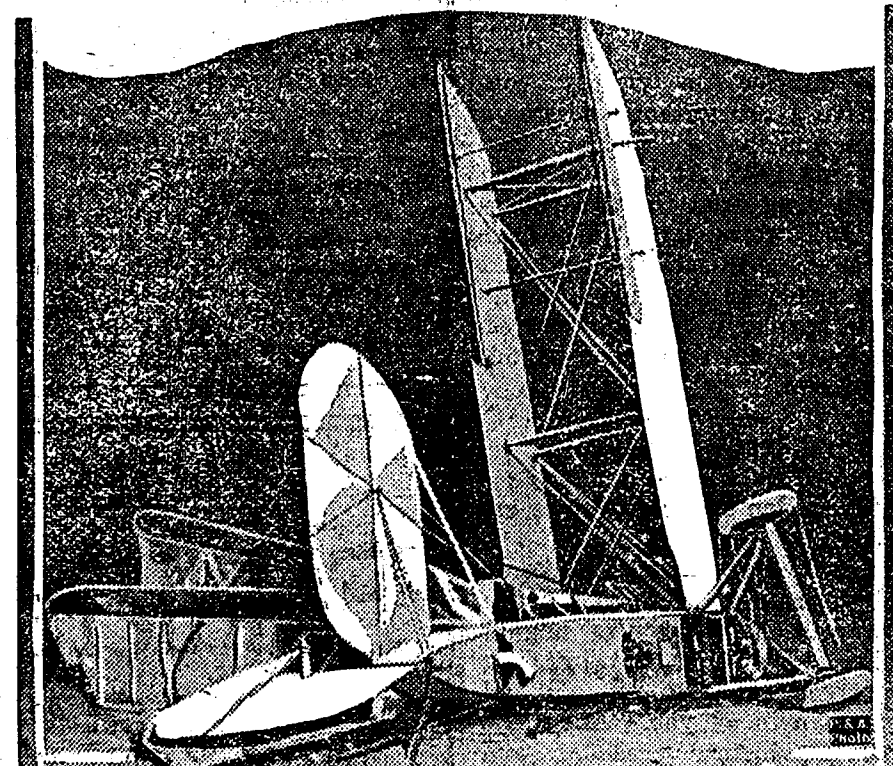

"It isn't eh? Is it flat, then?"

"No'm."

"Are you crazy, child? If the world isn't round and isn't flat, what is it?"

"Pop says it's crooked."—Ex.

This Mail Plane Hit a Horse

Old Dobbin was held responsible for the wrecking of one of Uncle Sam's air-mail planes while he was grazing on the Des Moines field when the west-bound ship from Chicago was landing. Pilot John Bittle escaped unharmed, but there was not much left of the plane, and not enough of the horse to photograph after the propeller hit him.

SPELLING CONTESTANTS MAKE SHOWING

Many Districts Participate and Struggle is Very Close.

What is generally agreed by those who witnessed it, to have been the best spelling contest ever held in the county was that which took place Saturday afternoon, at the courthouse, says the Tribune. There were more school districts represented than ever before, more interest, better attendance of patrons, and better spelling done. There was great difficulty in getting down some of the contestants, resort being had to words beyond the grade of the participants, some of whom showed a perfect record.

The third, fourth, fifth, sixth, seventh and eighth grades were represented, each district being entitled to one contestant in each grade, and three prizes were awarded in each grade. The first and second prizes were in cash of \$3 and \$2, respectively, provided by the county, while the third prize for each grade was provided by the two bookstores of the city, Kling's and Schiek & Howe's, who donated fountain pens, Eversharp pencils and other articles. Between the contests, readings were interspersed by C. T. Stranahan. Easter eggs were distributed to all participants, by the county superintendent's office.

Next Saturday, the winners of first places in each of the four counties of Nezperce, Lewis, Latah and Clearwater, will take part in an inter-county contest to be held in Lewiston. The winners last Saturday were as follows:

Third grade — First, Archie Walters, Sweetwater; second, Carol Whitlock, Spalding; third, Wilbur Larkam, North Tom Beall.

Fourth grade — First, Russell Smith, Peck; second, Ada Vincent, Rosetta; third, Helen White, Hatwai.

Fifth grade — First, Evelyn Manden, Gifford; 2nd, Marjorie Greer, Hatwai; third, Edna Riggers, Gifford.

Sixth grade—Bobby Chambers, Chesley; second, Frances Steele, Spalding; third, Opal Gillespie, Peck.

Seventh grade — First, Elaine Canter, Summit; Second, Mary Bulen, Cildesac, third, Neil Davis, Welker school.

Eighth grade — First, Addie Chambers, Chesley; second, Hazel Greer, Hatwai; third, Willie Tschantz, Grinolds school.

Bought Cameron Store

Gus Kruger has taken over the store and postmastership at Cameron and is now conducting the business, which he purchased recently from Chas. Boemeke, who has been running the business there or several years. Mr. Kruger recently moved from Lewiston to Cameron to engage in business.

DEATH TAKES CHARLES MCKEEVER

Former Kendrick Business Man Dies at Coeur d'Alene.

Charles W. McKeever, for many years a prominent business man of Kendrick, but for the past three years a resident of Coeur d'Alene, died at the Coeur d'Alene hospital, Tuesday, following an operation for ruptured appendix. He was taken ill Thursday of last week and the operation was performed Sunday.

Mr. McKeever was 62 years of age. For 33 years he was a resident of Kendrick, being engaged in the hardware business a greater part of the time. During the past three years he was foreman on the Ramsey Walker ranch at Wolf Lodge Bay. He was born at Baltimore, Md., and from there went to Missouri and then to Idaho. He was a member of the Kendrick Woodmen lodge and also of the Presbyterian church of this place.

Mr. McKeever is survived by two sons, Harry of Pocatello and Dr. G. W. of Kendrick; a daughter, Miss Mabel of Coeur d'Alene.

Funeral services were held Wednesday at the Hazen & Jaeger chapel. Rev. Thompson of the Presbyterian church conducted the service. Interment was made at the Riverside cemetery, by the grave of his wife.

Erratic Easter Dates

Prompted by a reference to the proposed fixing of a world-wide Easter date, an industrious correspondent supplies us with a table of dates on which Easter will fall for the next 30 years.

1926, April 4	1941, April 13
1927, April-17	1942, April 5
1928, April 8	1943, April 25
1929, March 31	1944, April 9
1930, April 20	1945, April 1
1931, April 5	1946, April 21
1932, March 27	1947, April 6
1933, April 16	1948, March 28
1934, April 1	1949, April 17
1935, April 21	1950, April 9
1936, April 12	1951, March 25
1937, March 28	1952, April 13
1938, April 17	1953, April 5
1939, April 9	1954, April 8
1940, March 24	1955, April 10

The following table is sufficient to go on with in the meantime, but if any reader might require an extension of the list let him wait until these dates are exhausted, and we are sure the correspondent of 1955, whoever he may be would then be quite happy to oblige us with another list of dates. Meantime, the Easter of 1926 is of more concern to all of us now, and we trust that our kind correspondent and all readers of the Gazette will have a bright and bracing holiday.

Merton Pierce of Deary was in Kendrick on business the first of the week.

LATAH COUNTY NEWS PARAGRAPHS

Items of Interest Taken From Neighboring Papers

Fire Destroys House

The residence building of J. B. Watson at the Idaho Fire Brick Co's yard just at the edge of town, was burned to the ground early Wednesday morning. As was his usual custom, night watchman Walker built a fire in the kitchen range at the house before leaving at six o'clock. Soon afterward Mr. Watson hearing sounds above the kitchen rose and went to investigate and found fire in the attic burning through the ceiling. The yard whistle was blown but as many thought at first that the factory has returned to a former custom of blowing a six o'clock whistle, it was several minutes before help arrived. Practically all of the contents of the house were saved.—Troy News.

Is Tearing Down Landmark

Geo. Mochel has been quite busy for the past ten days tearing down one of the large old barns that was for so many years used as a livery stable by W. R. Hickman and others. They were built of real lumber and are mortised and pinned and would stand for many years yet. The lumber will be salvaged and sold.—Genesee News.

Jeff Hendron of Kooskia purchased five mules of Same Nye last Saturday. Mr. Hendron is gathering up a bunch of mules for a pack train to carry supplies to the government fire patrol on the head of the Selway—Juliaetta Record.

Farming Under Way

Plowing and seeding are the order of the day in this section now. Fine weather for this work, and at least ten days earlier than usual. The farmers say fall wheat has not been damaged by frost and is looking fine. Some fear a dry season, but that's as it may be. Right now everything is lovely.—Deary Press.

Court House Being Painted

Final work of remodeling the Latah county courthouse, in the painting of the bricks of the outside, is being done by the painters this week. A coat of red paint is being applied to the building giving it more the appearance of new brick. During the winter months considerable work was done on the interior of the court house. A central heating system was installed, putting radiators in each of the rooms and doing away with the old use of the stoves. Tinting and recovering of the floors was also done.—Star-Mirror.

Crescent Clippings

F. Reiche moved to Leland the first of the week. He will farm some of the Wm. Behrens bean land this year.

Mr. and Mrs. Dick Winegardner and children visited at the Wm. Kauder home Sunday afternoon.

Ernest Loeser has been working for Geo. Christensen lately.

H. H. Pogue left Monday for his new home near Spokane.

School was closed Friday, owing to the sickness of the teacher, Miss Alice Winegardner. She is staying this week at the Wm. Kauder home and is again "on the job."

Bill Dorendorf, who has been helping Gus Farrington of Linden in the sawmill, is again at home.

Mr. and Mrs. Pete Stump and children visited Sunday at the Geo. Christensen home.

A marriage license was issued Wednesday by Thos. D. Barton, county recorder of Lewiston, to Fred Ferguson and Addie Marie Boenake, both of Potlatch ridge.

WEEK'S EVENTS FROM SOUTHWICK

Written For Gazette by Special Correspondent

Harry Wright and C. A. Cuddy made a trip to Lewiston, Monday.

Mr. and Mrs. John McEver and Chester McEver and family spent Sunday with Mr. and Mrs. Alec Lawrence.

A son was born, Monday the 29th to Mr. and Mrs. C. G. Davis.

Mr. and Mrs. Ray Southwick spent the week end at the home of J. R. King.

Mrs. Floyd Russell spent Monday in town visiting friends.

John Lettenmaier and family John Stalnaker and family and Miss Joy Bell were guests of Mr. and Mrs. Frank Wilmot.

The rock crusher started up last Saturday with a large force of men. They will start spreading rock from Brammers to the school section, where there are some bad mud holes.

Mr. and Mrs. Harland Hewitt and Raymond Rodgers spent Sunday at Clarence Hewitts.

Homer Betts and wife spent Sunday with his brother and family, C. A. Betts.

Mr. and Mrs. Russel Rodgers went to Lewiston last Wednesday day, returning home Friday. Mrs. Rodgers visited with her sisters, Mrs. Chas. Thornton and Mrs. Jack Bechtol, while there.

Jake Berriman and family spent Sunday at the Wm. Berriman home.

Mr. and Mrs. Fred Hassinger and family of Gifford came over Sunday and spent the day with her mother, Mrs. Wm. Berriman. A surprise party was given Miss Nellie Henderson last Friday evening. A large crowd was present and a good time was reported.

Mrs. Pete Stump has been enjoying a visit from her parents, Mr. and Mrs. Nichols of Montana. They left for their home last Saturday.

Mrs. Wm. Henderson and Miss Nellie were the guests of friends in town last Friday.

Mr. and Mrs. Ralph Wright and Mr. and Mrs. Clinton Wright spent Sunday with Mr. and Mrs. Austin McCoy.

Leslie Triplett and wife drove to Lewiston last Friday evening, taking Miss Hartung and her pupils to the spelling contest held there Saturday. They returned home Sunday evening.

Miss Annie Triplett left Tuesday for Marshfield, where she expects to make her home with her sisters, Mrs. Clay King and Miss Ivy Triplett of that place. She was accompanied as far as Lewiston by her uncle, Walter Triplett.

H. A. Russell and son Floyd, were business visitors in Kendrick, Monday.

Mr. and Mrs. J. E. Hoppe spent Sunday with C. A. Cuddy and family.

Just Lazy, That's All

I am a simple, gentle soul. My daily mood is cheerful. I love the things that each day brings. I'm lazy, too, I'm fearful. I love the fragrant garden plot, if someone else will grow it; the sweet bouquet of new-mown hay, if someone else will mow it. I'd love to have all evil squashed, if someone else would squash it. That ear of mine would always shine, if someone else would wash it. I like to see men had at work, if someone else will pay 'em. I like the rough, hard games where bluff won't count, if others play 'em. I do not love the thought of crime; in fact I quite abhor it. If some brave guy would fight it I would be most strongly for it; for I do love a righteous fight, if someone else will fight it. I'd have this song a column long, if someone else would write it.—Ex.

H. E. Brammer of Potlatch ridge bought a Chevrolet car from the Kendrick Garage Co. last Saturday.

Presidential Abode

Following the attack upon the executive mansion in 1814, it was painted white, to obliterate the damage done by fire. In popular parlance it was soon called by its now familiar name, although officially it was known as the executive mansion until Theodore Roosevelt put the stamp of his approval on the name "the White House."

Hello, Central! Give us heaven. But if you can't find the number the little town of Clear Lake, S. D., will do. We read that in that town, which has a population of 835, one local store has carried a page advertisement, changed weekly, in the Clear Lake Courier for twenty consecutive years without missing a week—and has a similar contract for 1926. At the conclusion of this long trial the firm—English & Towers—say: "We have proven to our satisfaction that large space in the local newspaper regularly brings correspondingly big results."—Caldwell News.

Don't Worry

If you don't worry, you're exceptional.

If you worry, as most folks do and you're not trying to kill this pernicious habit, you're mighty foolish. For, bye and bye, the thing you ought to kill will get a death grip on you. And then, enter the doctor, preacher and undertaker.

We might all be infinitely more happy, healthy and prosperous if we would only take hold of ourselves and stop the silly, insane useless, strength-robbing habit of harassing ourselves with worry.

The weather won't change and the landlord will remember you anyhow despite your worrying. The doctor's bills will be higher and the imaginary troubles will be changed into real ones in proportion as you persist in worrying.

Get rid of it, student. Kill it, business man. Junk it, madam. Crush it, everybody!

It's all in your head, anyway, and if you don't clean up inside you'll literally think yourself into a hole in the ground before your time comes.—Ex.

METHODIST CHURCH NOTICE

Sunday, March 21

Kendrick

At 6:30 a.m. Easter Sunrise prayer meeting. Every person, old or young, in Kendrick is cordially invited to attend. Leader, Georgia Bell.
Sunday School 10 a. m.

Cameron, Idaho
Sunday School 9:30 a.m.
Church Service 10:30 a.m.
Church Council first Monday in the month.

Ladies Aid first Wednesday in the month.

Come and worship with us.

Seed Potatoes Need Treating

Farmers Agree That Is Thing to Do, Even With "Certified Spuds."

What is going to be done about treating seed potatoes for the coming season? There is no doubt as to the advisability of using "certified seed." Practically every farmer who has used such seed in the past will agree that it is the thing to do in the future. However we have too many farmers who buy "certified seed" and do not treat them before planting. Regardless of what kind of seed

you buy or where the tubers come from it is well worth the time and money expended to treat before planting. Although the seed are certified, it is still possible that scab, Sclerotium wilt, and powdery scab can come in unnoticed. Seed treatment will control these troubles, says Dr. W. D. Moore, extension plant pathologist at Clemson college, who adds that the control of a small amount of disease now may prevent a large amount of loss in subsequent years.

Corrosive Sublimate.

Use corrosive sublimate for treating your seed. It can be had at any drug store in tablet form, or can be bought in the crystalline form. Make up a 1 to 1,000 (one part corrosive sublimate to 1,000 parts of water) solution, which is equivalent to four ounces of corrosive sublimate to 30 gallons of water. Use wooden barrels or cement tanks for this work. This material is deadly poison, so keep children and all animals away from the solution.

Method Used.—Treat each batch of potatoes for one and one-half hours. The potatoes may be treated in bags or crates. After treating a batch of

four bushels, add enough water to the barrel to make up the original volume and then add one-half ounce of corrosive sublimate to keep up the strength. This can be repeated about four times, each time after treating a batch of seed. Because of the dirt that gets into the solution a new barrel should be made up after this. After treatment the potatoes may be dried and stored or else planted immediately.

Grease is better than oil for protecting plowshares from rust when they are stored for the winter, as the grease stays where it is put.

Soy beans should be planted either with the corn planter in rows three feet apart at the rate of about 20 pounds of seed an acre, or with a grain drill at the rate of about 50 to 60 pounds an acre.

Most of the cereal crop insects confine their activities to crops belonging to the grass family. The practice of crop rotation in which a leguminous crop is used is therefore a good method of reducing insect damage.

OLD TIME Fiddlers Contest

At The NEW KENDRICK THEATRE
Friday Night, April 9

Rules of Contest

Each fiddler must be over 40 years of age.

Each fiddler must have his own fiddle and provide his own accompanist.

All contestants will be required to draw for their place in the contest.

Each fiddler will be allowed 5 minutes to play and may select any old time tune he desires.

The winner will be selected by vote of the audience.

1st Prize - \$10.00

2nd Prize - \$2.50

Come early if you want a seat.

The picture "SMOULDERING FIRES" will be shown in connection with the contest.

Admission - 10c - 35c

This admits you to both show and contest.

McCormick-Deering Primrose

Ball-Bearing Cream Separators

When you consider that a cream separator bowl turns approximately 9,000 revolutions a minute, you realize that THE BEARINGS AND THE BOWL SPINDLE MUST BE RIGHT. The slightest wobble, vibration, or friction in these parts makes the machine turn hard and lowers its skimming efficiency. That's why the builders of the McCormick-Deering Primrose use a bowl spindle heavier than any other and mount it on friction-free ball bearings. McCormick-Deering engineers take no chances—they make your satisfaction certain!

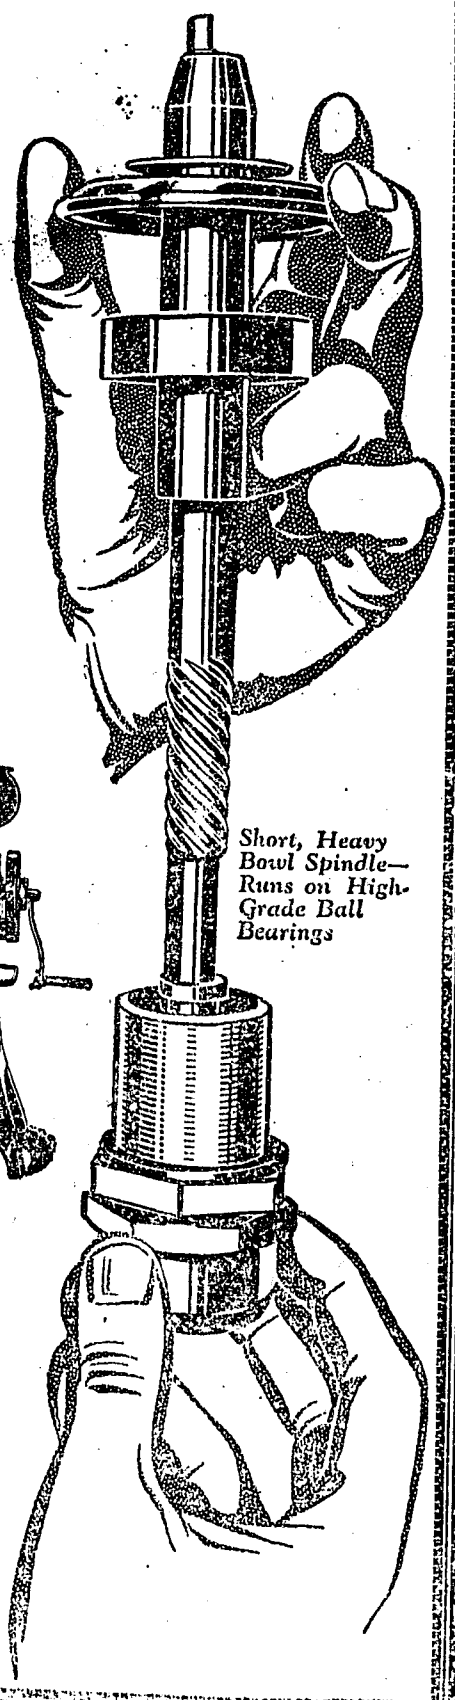

Don't think lightly of the turning question. It is vital. You'll turn your machine twice each day, or 730 times a year. Isn't it worth while to save seven or eight thousand backaches during the life of your machine? Let us demonstrate the Primrose on your farm. No obligation.

A SMALL Down Payment Puts a New McCormick-Deering Primrose on Your Farm

Short, Heavy Bowl Spindle—Runs on High-Grade Ball Bearings

Heavy Infestation of Ox Warbles

F. E. Whitehead, extension entomologist, reports that in looking over cattle in the vicinity of Moscow, he has found an unusually heavy infestation of ox warbles, the grub or worms that are found in the backs of cattle in the early spring. The ox warbles cause large bumps or swellings to appear on the back, the greater number being found from the groin to just back of the shoulder.

The grubs are the source of considerable loss to any herd of cattle. They greatly reduce the value of hides and in many cases inflammation results causing large quantities of pus to be formed and resulting in absorption of a great deal of poisonous material in the animal's system. In addition a great deal of irritation is caused and this reduces the flow of milk in dairy herds.

These grubs are the larvae of flies that terrify the cattle in late spring and early summer. They are commonly called heel or gad flies and often cause stampedes of cattle. The flies deposit eggs on the hairs of the heels of cattle. The eggs hatch into tiny worms that get into

the cattle either by boring directly through the skin or by entering at the mouth as the cattle lick themselves or each other. Inside the animal they grow and bore their way to the back, appearing there at this time of the year. The hide is then punctured and after the worms reach maturity they crawl out of these holes, fall to the ground, and a few weeks later have transformed into flies that again annoy the cattle and deposit eggs on them.

At this time the grubs may easily be destroyed by squeezing them out of the backs of the cattle. The thumb is placed on one side of the bump, the fingers on the other side, three or four inches apart. Then by grasping a deep fold in the hide the tips of the thumb and fingers will be brought beneath the grub and as pressure is applied it may easily be squeezed out.

Poles Vary in Attraction

While the north magnetic pole attracts the north end of the needle and repels the south end, the south pole repels the north end and attracts the south end. This is true no matter in what part of the earth the needle is placed, and there is no reversal of the needle when the magnetic equator is crossed.

Ventilation in Chicken House Quite Important

Chickens need more fresh air for their size than any other farm animal. This is because the moisture other animals exude through the skin and kidneys is in poultry almost entirely given off in breathing. The air of an overcrowded, under-ventilated house quickly becomes foul. The chickens get off the roost in the mornings dull and drugged from bad air. Even open front houses with three sides closed and open on the south may not provide enough fresh air. A narrow board's width opening along the south side immediately under the

rafters improves the circulation without draft. The curtained openings should be from 30 to 36 inches from the floor. All openings should be arranged for closing if necessary.

Changed in Meaning

"Rival" originally meant "one who lives on the opposite bank of the stream." The word is taken from the Latin "rivulus" and is related to our "rivulet."

Wheat and Oats as Clover Nurse Crops

Tests Show There Is No Marked Difference.

Tests made for many years by the experiment station of the University of Illinois show that there is no marked difference between winter wheat and oats as nurse crops for clover, according to H. J. Snider, assistant chief of the soil experiment fields. Farmers who plan to sow red clover this spring can seed it in either of these grains and get about the same results, provided other conditions are equal and favorable for growing of clover.

In a rotation of corn, oats, wheat and clover on the McNabb experiment field in Putnam county, red clover had been seeded in winter wheat for 17 consecutive years, from 1908 to 1924, and out of these 17 seedlings more than 76 per cent of them have been successful. On the Rockford field, Winnebago county, in a rotation of corn, corn, oats and clover, red clover has been seeded in oats for 15 consecutive years, 1905 to 1919, and out of these 15 seedlings almost 88 per cent of them have been successful. On the Davenport plots in Champaign county clover has been seeded in oats for 22 consecutive years, 1903 to 1924, and more than 77 per cent of these seedlings have been successful.

Although the question as to whether or not winter wheat or oats afford the best nurse crop and seed bed for red clover is a point open to argument, the results of these long-continued experiments indicate that there is little difference between the two.

When only oats are used as a small grain crop, as is the common corn-belt practice, the only choice in the matter of a nurse crop for clover is the selection of a variety of oats which may give the greatest advantage to the young clover.

Mottling of Soy Beans Controlled by Breeding

Mottling, an undesirable character of soy beans which has attracted a good deal of attention from growers during recent years, seems to be largely the result of environmental conditions, but there also are indications that it may be controlled to some extent by breeding, according to the Illinois College of Agriculture. This mottling, which consists of irregular patches, blotches or bands of black or brown on yellow or green soy beans, is undesirable because, for one thing, it arouses the suspicion that the mottled variety is not true. It also interferes with the correct identification of varieties and is particularly objectionable in seed certification because it brings up the question of purity and trueness to variety type.

That breeding may be a means of controlling mottling is indicated by the fact that certain varieties show a greater tendency to mottle than others, although they are all grown under the same conditions. Midwest, Ito San, Manchu and Hongkong all mottle considerably when grown on the college farm, while Dunfield and certain selections of the A. K. variety show little or no mottling.

Angleworms Are Great Improvers of the Soil

Angleworms are great improvers of the soil. The holes they make in it admit air, and, especially in heavy clay, are followed down by roots deeper than the roots would otherwise go.

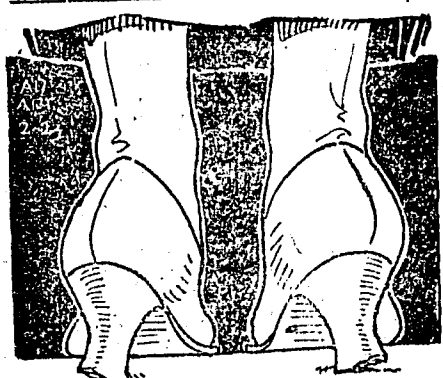

But the chief good done by angleworms is in pulverizing much soil which passes through them as food—the vegetable matter in it serving this purpose. Charles Darwin estimated that an average of ten tons to the acre was thus annually treated—enough to cover the land a fifth of an inch deep. This is rich manure. It sounds extravagant until you think how plentiful angleworms are. Mr. Darwin figured that they number 50,000 to the acre of garden soil and 25,000 to the acre of meadow land. Poor soil has few angleworms. One of the benefits of plowing vegetable matter into it is that the humus thus made attracts them. Only give 'em humus and they move right in and go to work free to help you build a bang-up good farm.

Use of Alfalfa Favored for Fattening the Pigs

The usual ration of corn and tankage for fattening pigs can be greatly improved in efficiency if the pigs are given some alfalfa hay. This fact was recently established by the South Dakota Agricultural college. An analysis of the feed records show that the largest amount of hay was consumed by the pigs when they were under 150 pounds in weight. The experiment included two lots of six pigs each, averaging 64 pounds each at the start. One lot received corn and tankage, self-fed, and made a daily gain of 1.33 pounds per pig. One hundred twenty-one days were required to reach an average weight of 225 pounds.

The second lot received alfalfa in addition to the corn and tankage. The average daily gain per pig was 1.65 pounds, and an average of 225 pounds was reached in 98 days, which was 23 days earlier than the first lot fed only corn and tankage. The alfalfa lots showed a marked advantage in thriftiness and in economy of gains.

DO YOUR ANKLES TURN?

If they do, nine chances out of ten, it's because the heels of your shoes are worn down to the danger point.

It won't take us long to put your shoes in safe condition. Bring 'em in now.

Soy Beans Best Planted in Rows

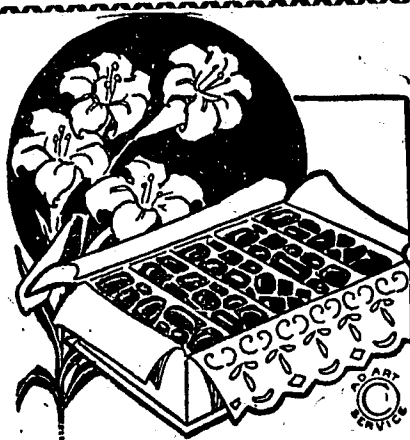

Make More Seed and Hay Per Acre Than Drilled or Broadcast.

In many sections where soy beans are not well known and are not grown extensively, many farmers have asked for information about how to plant the beans for best results. E. C. Blair, extension agronomist at the North Carolina State college, states that the beans will do better if planted in rows. Grown this way, the beans make more seed and more hay per acre than when drilled or broadcast.

Control Much Weed Seed.

At the Mountain Branch station near Swannanoa, the hay from soy beans planted broadcast contained 50 per cent or more of weeds, while there were no weeds in the hay where the beans were cultivated in rows. Planting in rows also requires only half as much seed.

"Land to be planted in soy beans should be well broken and worked into a good seed bed," says Mr. Blair. "This careful preparation will pay better for soy beans than for most other crops. Run the rows three feet apart and place the fertilizer in the rows. The best fertilizer is 300 to 400 pounds per acre of 12-0-4 or the same amount of a 12-2-4 on poor soils. Mix the fertilizer in the soil to avoid burn-

Rather a Different Candy

Aside from always being fresh—there is a different kind of deliciousness about our candy—this seems to have created the wide popularity it enjoys.

Once you try our candy you become a permanent customer.

PERRYMAN'S

ing the seed. Forty pounds of Mammoth Yellow, 15 pounds of Virginia or ten pounds of Luredo beans will plant an acre in rows three feet apart. Plant the beans with a corn planter, using a plate that drops a seed every six inches. For the small seeded varieties, use a plate with small holes. Plant the beans level and cover lightly. They will not come up if covered deeply, nor will they come through a hard crust."

Three Cultivations.

Mr. Blair states that cultivation should begin when the plants are from five to six inches high. Three cultivations are usually enough but more should be given if necessary to control grass and weeds. By following these suggestions, Mr. Blair believes that the grower can have success with the soy bean crop.

Orchardists Prepare to Fight Armies of Pests

Farmers are making ready for the annual defense against the onslaught of great armies of pests which attack fruit trees.

In their preparation they are heeding the two mistakes which heretofore have been most commonly made in spraying, that of failing to spray at the proper time and lack of thorough work. They are planning to do the job up right this year.

While it is difficult to lay down any hard and fast rules with regard to spraying, James G. Moore, horticulturist of the Wisconsin College of Agriculture points out a few fundamental facts which can be followed. The spray commonly used for general work is made up by mixing five quarts of lime sulphur and one pound of arsenate of lead in fifty gallons of water.

The first spray is commonly called "pink spray" and should be used just before the blossom buds open. Care should be taken not to spray with poison when the blossoms are open.

The second spray, called "calyx spray," should be applied just as soon as the petals fall and before the calyx cup closes. A third spray should be applied fifteen or eighteen days later, and the fourth application about the middle of August on late varieties.

Disease Control

Disease control and sanitation are most important in poultry management. Lack of knowledge of the presence of disease and the method of combating it or the non-application of this knowledge has caused many flocks to be destroyed in a very short time. The loss is enormous and yet is preventable.

There is one absolute rule in poultry sanitation and disease control.

Grapevines Thrive in a Wide Variety of Soils

Grapevines thrive in a wide variety of soils. Those that are too shallow, wet or excessively dry should be avoided. Sandy loams, loams and gravelly loams grow vigorous vines that carry productive crops, says a writer in the Rural New Yorker. In commercial practice the vineyard is plowed early in the spring, then the soil is worked into a fine texture through cultivation and thus kept until the latter part of July. At this time a seeding of clover, millet, rape or rye and hairy vetch should be made. The crop thus put in is allowed to occupy the ground until the following spring, when it is plowed under. The home vineyard should be plowed or the soil spaded about the vines, and all weed growth suppressed during the active growing season. Usually frequent hand hoeing will suffice to accomplish this end.

Grapevines over a wide range of country are responding with increased growth and productiveness through the use of nitrate of soda scattered about the vines in early spring just as leaf growth is starting. The usual treatment per vine is six ounces of the material. Some commercial growers use twice this quantity per vine with good results. It might be well to begin with the smaller amount and gradually increase it if occasion requires.

Milk-Producing Cow Is Entitled to Good Feed

In order to be most profitable, all live stock must be fed for a definite purpose: For instance, a dry beef cow can be maintained very successfully and very cheaply on coarse, cheap feed such as corn fodder, corn silage, hay and straw. It would be a waste of money to feed such a cow any considerable amount of grain. A cow producing milk through the winter months, however, requires a good grain ration liberally fed in addition to a liberal supply of good roughage and it would be just as much a waste of money not to give this grain to the cow in milk as it would be to give it to the dry cow that doesn't need it. Likewise there are proper feeds and proper amounts of feed required by every type of live stock and the most economical and profitable feeding practice is to give each type of animal the kind and amount of feed needed by that type of animal.

FARM NOTES

Plan to take an inventory this year. It gives the most returns for the time spent on it of any record the farmer can keep.

Dark brown or black spots in potatoes may result from piling them too deeply in bins, from lack of ventilation, or too much warmth.

Propagate Currants and Gooseberries

Cuttings May Be Made From Vigorous Bushes.

For those who would like to plant a few currant or gooseberry bushes, but do not wish to go to the trouble of getting them from a nursery, propagation by cuttings is suggested by the New Jersey State College of Agriculture as a very easy and economical method.

Cuttings may be made from vigorous healthy bushes any time during fall, winter or early spring. If made during the spring, care must be taken to see that the plants from which cuttings are taken are still perfectly dormant. The lower and middle portions of vigorous, one-year-old wood should be cut into lengths of six or eight inches. The cuttings are then tied in bundles of 50 with the bases of the cuttings all pointing the same way. These bundles should then be buried upside down in light, well drained soil, and completely covered in such a way that there will be two or three inches of soil over the ends of the bundles. The base of the cuttings will begin to callous over two or three weeks after they are buried. If the ground is frozen, the cuttings may be stored in a cool place in sand or soil which must be kept moist until they can be buried outside.

As soon as the soil is in a tillable condition in spring the cuttings may be planted six inches apart in the nursery row. The depth of planting should be such that only one or two buds are above the surface of the ground.

Where only one or two additional plants are desired, they may easily be secured by layering, which consists of bending some of the side branches down to the ground, and covering them with a small mound of soil until roots are formed.

Cuttings From Canes to Obtain Desired Grapes

Grape varieties do not as a rule come true from seed, although some of the young plants may closely resemble the parent. The only sure way to obtain plants just like the desired variety is to make cuttings from the canes of the past season's growth. These are taken some time after leaf-fall, and preferable after several hard freezes. The cuttings are usually made in 10 to 12-inch lengths. The lower cut is made very closely to the lower bud, and sometimes even through the node. The upper cut is made an inch or more above the upper bud. The cuttings thus made are then placed in bundles with the butt or lower ends all at the same level and buried in a trench or pit with the butt ends up and with the cuttings in a vertical position. Three or four inches of soil is sufficient over the ends. The soil in which the heeling is done should be open and well drained. When the soil has warmed sufficiently in the spring so that the cuttings may be planted out they are placed almost vertically in a trench with the butt ends down and to a depth so that the upper bud is just even with the soil when the trench is filled. The cuttings are usually spaced 2 or 3 inches in the trench.

Corn Silage Found Best Substitute for Pasture

Pasture grass is the ideal dairy ration because of its succulent and appetizing qualities. In Northern states the short pasture season makes it necessary to provide a substitute. Experiments at the Indiana station show very definitely that corn silage is the best substitute available.

A ration containing a moderate amount of silage was compared with one containing no silage, but double the ordinary amount of hay. When silage was withheld, milk production decreased markedly and the milk and fat costs were considerably increased. The most economical production occurred when silage made up part of the ration. Body weights were more uniformly maintained when silage formed a part of the feed.

Those interested in a more detailed account of this experiment may obtain it from the Purdue experiment station, Lafayette, Ind., by asking for bulletin No. 297.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

Alven Zumbro, Plaintiff, vs.

The unknown heirs and unknown devisees of Florence H. Lanker, deceased, and all unknown owners of and all unknown claimants to any right or title to or interest in or lien or claim upon Lots Two (2) and Three (3) in Section Eighteen (18) in Township Thirty-nine (39) North of Range Four (4) W. B. M. and the Northeast Quarter of the Southeast Quarter (NE $\frac{1}{4}$ SE $\frac{1}{4}$) and the Southeast Quarter of the Northeast Quarter (SE $\frac{1}{4}$ NE $\frac{1}{4}$) of Section Thirteen (13) in Township Thirty-nine (39) North, Range Five (5) W. B. M., Defendants.

THE STATE OF IDAHO SENDS GREETING TO THE ABOVE NAMED DEFENDANTS.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows:

To quiet title to the above described lands and premises in plaintiff.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere.

Witness my hand and the seal of the District Court of the State of Idaho, in and for Latah County, this 8th day of March A. D., 1926.

HARRY A. THATCHER, Clerk. By Adrian Nelson, Deputy. Frank L. Moore and Latham D. Moore, Attorneys for Plaintiff. 11-6

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in aid for the County of Latah

R. D. Newton, Plaintiff, vs.

J. C. Lawrence and Jessie M. Lawrence, his wife, Greenville Holbrook and N. J. Holbrook, his wife, Jacob H. Belling and Hannah A. Belling, his wife, Gilbert E. Potter and Mary E. Potter, his wife, P. W. Lawrence and Katie Lawrence, his wife, H. S. Hollingsworth and Josephine Hollingsworth, his wife, George W. Sutherland and Mary E. Sutherland, his wife, Geo. W. Sutherland, trustee, alias George W. Sutherland, trustee, F. H. Sutherland, Frank H. Sutherland, Wm. P. Nichols, Wm. Laird, and Eurette Laird, his wife, H. M. Casey, O. Ranhske, Mitilda E. Call For Warrants

Notice is hereby given that I am prepared to pay the following REGISTERED WARRANTS of the series 1926 issued on SPECIAL SCHOOL FUND of School District No. 31.

Warrants Nos. 81, 82, 108, 123, 124, 125, 126, 127, 128, 129, 130, 131 and 132.

Leola R. King, County Treasurer. Dated at Moscow, Idaho, this 29th day of March, 1926. Three issues of the Kendrick Gazette, April 2nd., April 9th., and April 16th. 14-3

Pasturage in Marsh

Romney marsh in Kent, England, is protected by a seawall of great thickness and the guardianship and drainage of the swamp is in the hands of a special ancient corporation. The level lands afford pasturage for vast flocks of sheep which form the principal industry of this section.

Land of Little Value

Bad lands is a name applied to various arid regions of the West. The Big Bad lands of western South Dakota embrace an area of about 2,000 square miles.

NOTICE OF FORECLOSURE SALE

Order of Sale and Decree of Foreclosure and Sale.

William J. Tierney, Executor of the Estate of Thomas Tierney, deceased, Plaintiff vs.

Lillian M. Jones and George L. Jones, her husband, Defendants. Under and by virtue of an order of sale and decree of foreclosure and sale issued out of the District Court of the Second Judicial District in and for the County of Latah and State of Idaho, on the 17th day of March A. D., 1926, in the above entitled action wherein William J. Tierney, Executor of the Estate of Thomas Tierney, deceased, the above named Plaintiff obtained a judgment and decree of foreclosure and sale against Lillian M. Jones and George L. Jones, her husband, Defendants, on the 17th day of March A. D., 1926, for the sum of \$1474.05 in United States gold coin, besides interest, cost and attorney's fees, which said decree was on the day of A. D., 1926, recorded in judgment book of said court, at page I am commanded to sell all that certain lot, piece or parcel of land situated, lying and being in East Moscow precinct, County of Latah, State of Idaho, and bounded and described as follows:

South half of the Northeast quarter of Section Thirty-two (32) in Township Forty (40) North of Range Four (4) West of the Boise Meridian.

Public notice is hereby given that on

Monday the 19th day of April A. D., 1926, at 2 o'clock P. M. of that day, in front of the Court House door of the County of Latah, I will, in obedience to an order of sale and decree of foreclosure and sale, sell the above described property or so much thereof as may be necessary to satisfy said judgment, with interest and costs, etc., to the highest and best bidder, for gold coin of the United States.

Dated this 20th day of March, 1926. Charlie Summerfield, Sheriff. By Geo. K. Moody, Deputy. 13-4

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho.

Notice is hereby given, That the Annual School Meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 17th day of April, 1926, and the said meeting shall convene at 1 o'clock P. M. on said day and continue uninterrupted until the business properly coming before said meeting is disposed of, at the school house in said district; that at said meeting the following business will be transacted:

1. One trustee to serve a term of three (3) years; one trustee to serve a term of two (2) years; one trustee to serve a term of one (1) year, will be elected.
2. The length of time school shall be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.
3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy

for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.

4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot. Dated this 22nd day of March, 1926.

A. K. Carlson, Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

C. S. Bennett, Carl Bennett and Edna E. Hopper, Plaintiffs, vs.

The Unknown Heirs and Unknown Devisees of H. W. Bilyeu, deceased, the Unknown Heirs and Unknown Devisees of Julia Ann Bilyeu, deceased, the Unknown Heirs and Unknown Devisees of David Delaney, deceased, the Unknown Heirs and Unknown Devisees of Matilda J. Delaney, deceased, the Unknown Heirs and Unknown Devisees of Ella E. Bennett, deceased, and All Unknown

Owners of and All Unknown Claimants to any right or title to or interest in or lien or claim upon the East One-half (E $\frac{1}{2}$) of the Southwest Quarter (SW $\frac{1}{4}$) and the Southeast Quarter of the Northwest Quarter (SE $\frac{1}{4}$ NW $\frac{1}{4}$) and Lots Two (2) Three (3) and Four (4) of Section Twelve (12) in Township Forty-three (43) North, of Range Six (6) W. B. M., in Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETINGS TO THE ABOVE NAMED DEFENDANTS:

You and each of you are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, by the above named plaintiffs, of the nature in general terms as follows: To quiet title to the above described lands and premises in plaintiff.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, for Latah County, this 20th day of March, A. D., 1926.

HARRY A. THATCHER, Clerk. By Adrian Nelson, Deputy. Hanna, Miller & Hanna, Colfax, Wash. Frank L. and Latham D. Moore, Moscow, Idaho, Attorneys for Plaintiffs. 13-6

Ventilation Necessary

In providing a warm barn care must be taken to furnish good ventilation. While there must be no drafts in the barn, circulation of air must be provided for. A cow utilizes a very large amount of air and also exhales large quantities of moisture. She cannot properly digest the large amount of feed she must consume in order to produce a large quantity of milk in the absence of an abundant supply of pure air.

Care Before Calving

The cow, due to calve at this season of the year, should be confined nights in a clean warm shed or box stall. During the day it is best for the cow to run with the herd. Normal conditions should be maintained as far as possible, but the safety of the calf and the health of the cow must be insured. Just prior to calving the cow should be receiving only light luxative feeds such as bran, oats and oil meal. Alfalfa hay is always a suitable feed.

As to Resolutions

Salve for someone's conscience from the Whitsett (Ga.) Courier: "The editor is persuaded that the man who never broke a New Year's resolution never made one."

Love Attracts Love

Love and you shall be loved. All love is mathematically just, as much as the two sides of an algebraic equation.—Emerson.

HORSE SALE

GLEANINGS

Mrs. Roy Florence of Clarkston was visiting friends in Kendrick last Saturday.

Mrs. A. N. Roberts of American ridge was a Moscow visitor the first of the week.

L. E. Pearson came down from Garfield last Saturday afternoon to spend the week end with his family.

G. F. Walker is making substantial improvements to his brick block in Kendrick. He is excavating to build a concrete garage and on the second floor a large screened in porch. It will add materially to the value of the property.

Carl Porter, former cashier of the Bank of Juliaetta, will assume the position of manager of the investment and loan department of the Mackey-Thiessen Investment Co. of Lewiston. He has recently been engaged in the insurance business.

Jody Long went to Spokane the first of the week on business.

Mrs. Leah Bigham went to Troy, Tuesday morning to visit relatives.

Mr. and Mrs. John Waide and family spent Sunday in Kendrick visiting relatives and friends.

Martin Thomas was transacting business in Moscow, Tuesday of this week.

D. F. Waltz was a Lewiston visitor last Saturday.

The Kendrick high school baseball team played at Juliaetta last Friday afternoon against the high school of that place. The score see-sawed back and forth but finally resulted in a victory for Juliaetta 16 to 13.

W. B. Deobald was transacting business in Lewiston last Saturday afternoon.

L. J. Herres, who has been ill for the greater part of the winter, underwent an operation at the Winchester hospital the first of the week. It is thought his condition is somewhat improved at this time. He has been having a mighty tough time of it and his many friends hope that his recovery will soon take place.

The first band concert of the season will be given in the park Saturday evening, April 17.

E. A. Deobald was a passenger on the afternoon train yesterday for Lewiston.

C. G. Compton went to Orofino, Thursday, to visit his son, Stuart.

Wm. Behrens of Leland, went to Clarkston yesterday afternoon on business.

Shipped in Carload of Horses

George Holbrook arrived Tuesday morning from Montana with a carload of young work horses. He and Gordon Harris will hold a public auction next Wednesday afternoon in Kendrick, starting at 1 o'clock. The horses will be sold to the highest bidder. There are 21 head in the shipment.

LELAND LOCALS

Mrs. Virgil Flesham was pleasantly surprised last Tuesday afternoon, the occasion being her birthday. About 50 guests were present and everyone enjoyed themselves.

Mr. Schu is hauling material to build a blacksmith shop which will stand on the Chas. Johnson property, on the corner next to the Oral Craig property.

Assessor Ward and wife were in Leland last week renewing acquaintances with old friends while taking assessments.

The Ladies Missionary Society met at the home of Mrs. Roy Morgan, Thursday, April 1. After the business meeting a program was given in which the members took part. The hostesses, Mrs. Morgan and Mrs. Virgil Flesham had a splendid dinner prepared and which was much appreciated.

The revival meetings will close on Sunday evening at the Methodist church. The meetings have been a time of refreshing to the souls of many. We are sorry to see them close. Interest has been good in spite of the farm work that is going on.

An Easter program will be given at the church Sunday morning at 10 o'clock. This hour is chosen because of the meeting that is being held and

it was thought best not to conflict with it. Everyone is invited to attend.

The boys and girls teams are playing baseball with the Juliaetta teams Friday afternoon.

LINDEN LOCALS

Mrs. Jim Garner and son, Charley, went to Bellingham, Wash., Friday to join her husband, who has employment at that place.

Mr. and Mrs. Whisler spent Wednesday evening at the Smith home.

Mrs. Louis Alexander and Mrs. Earl Dunham, spent Thursday with Mrs. C. P. Israel.

Ed Darby was called to Coeur d'Alene to see his sister, Mrs. Keller, who is quite ill.

Mrs. Abe Dorendorf and Mrs. Jim Farrinton spent Thursday afternoon with Mrs. Starr.

Arley Allen and sister, Virginia, were Sunday visitors with friends at Troy.

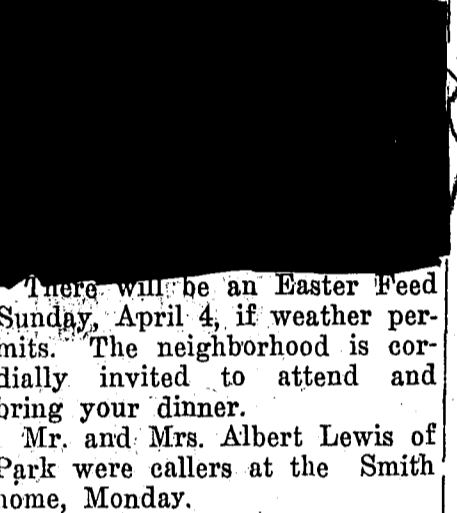

Mrs. Stone and daughters spent the week end with her brother, Louis Alexander and family.

Miss Emma Starr of Southwick is assisting Mrs. Clem Israel with her house work.

Gus Farrington finished sawing Monday evening and will move his sawmill to the Crescent neighborhood.

Axel Bohn has been visiting relatives and friends on the ridge the past few days. He went to Park Tuesday.

A good time was had by those who attended the dance at the hall Friday night. There will be another one April 9th.

will actually pull a 3-bottom plow anywhere and on any hill; will stay on any side hill which can be farmed, turn a sharp corner with a full load; turn straight up hill or otherwise, go anywhere you can drive horses. I have also demonstrated how it can be driven with a pair of lines just as easy as driving a horse. With it you do not need special tractor machinery such as tractor discs, tractor binders and so forth. Just use your horse machinery and tie two lines to the steering wheel and ride your binder.

"I can further demonstrate this on my place any day as I am now busy farming, using the tractor at all my spring work.

"Any wheel tractor will plow on fairly level ground but none of them have ever made a success on loose ground" and hilly ground, so the horse must do the harrowing, seeding, discing, etc.—the slow way—where the Cletrac Crawler Tractor will actually go over loose ground, do all your spring work up in a hurry and go any place a horse can go, and will not pack the ground as much as horses do.

"For the next week or more I will be discing and harrowing. Anyone who would like to see this crawler perform, I will glad show you. I will take it on the steepest hills with a full 12 horse load at 4 1/2 miles per hour. The load will consist of an 8 foot double disc and a 2 section 4 foot harrow, a big 12 horse load.

"If you are interested in this kind of farming I will show you any day you wish to see it. Call me by phone and tell me when you are coming so I can arrange to be home at that time. Bring your wife and stay for a big chicken dinner."

W. F. Behrens, Cletrac Dealer, Leland, Idaho. 14-1

Plan Crops on a Dairy Farm to Reduce Cost

Records in Illinois cow testing associations show that a good dairy cow consumes approximately 5,800 pounds of silage, 1,900 pounds of hay and 2,800 pounds of grain during the year. In addition, she is pastured five and one-half months. The dairy farmer would do well to keep those figures in mind when planning next year's crops.

Plenty of good roughage is of prime importance. The dairyman with a good supply of legume hay and silage available throughout the year has the major portion of his feeding problems solved. Good alfalfa hay heads the list of legume hays for dairy cattle. If alfalfa is not available, soy-bean, clover or cowpea hay should be fed.

A small amount of protein concentrate added to the farm-grown grains, such as corn, barley and oats, will make a good grain ration. Careful planning of crops on dairy farms will reduce the feed cost to a minimum.

TRACTOR FARMING BY LELAND FARMER

Writes to Those Who Are Interested in Gas Tractors.

"Having recently demonstrated my Model K Cletrac Tractor, in plowing on the Al. Heimgartner place, I convinced many

SPECIAL ON FLOUR

Now is the time to stock up on flour before the spring work starts in

- '400" per barrel - - \$7.80
- Princess per barrel - - \$7.60
- Asotin Best per barrel \$7.40

Chicken Feed Large Stock on Hand

We have a full line of chicken feed at very reasonable prices. Egg mash, O. K. Scratch, Bran and most anything you require in this line. Get our prices before you buy.

MILL FEED

All kinds of Mill Feed, Hay and Grain We are glad to serve you.

Home Sewing Week

An event to which all home seamstresses look forward to with a great deal of interest --- Home Sewing Week. Just now as the new materials are arriving and the new fashions being shown, we offer Home Sewing Week to help you plan and make your spring wardrobe. Take advantage of this event.

Notions and Trimmings to Fill Spring Sewing Needs

NEW FOOTWEAR
Advance showing of New Spring Footwear. Low price an attraction.

MEN'S GOODS
Men's good grade chambray shirts 85c

LADIES HOSE
Pure dyed Japan thread silk chiffon hose. A wonderful hose for \$1.00

DRESS PATTERNS
Just received, another large shipment of Rayos Dress Patterns in many pretty colors and designs.

MEN'S SUITS
Get your suit for Easter, here, Men! We have all the latest in styles and colors.

MEN'S TIES
The newest in ties for Men. The Duo-Bo, a two-in-one tie50c
Nu-Way Creations50c

GROCERY SPECIALS
Delicious picnic hams, per lb 24c
Green Nibs Tea, per lb35c
Full Cream Cheese, per lb35c
Zed Biscuits for health, pkg. 25c

We pay market price for your Butter and Eggs.

Another Large Shipment of Shoes Just in

Kendrick Store Co.
"The Quality Store"

Mansfield Heavy Duty Cords
Built to Over-Serve

Built by an old tire manufacturer who has made a record for himself by operating at full factory capacity continuously since 1912.

The first tires sold by the Carlson Hardware Company in Kendrick, were Mansfields, which were sold to Dr. Hoyt in 1916.

This tire has been distributed thru hardware trade exclusively for 18 months, all factory branch houses being eliminated. This method of distribution costs 30 per cent less than old branch house method and this saving in distribution is put

back in the tire in the form of a larger, heavier and better built tire.

We sold more tires in 1925 than we did for many years prior. During the year 1925 we were not asked to make an adjustment on a Mansfield tire or tube, which speaks volumes for quality of this super-tire.

Prices no higher than other tires so buy the tire that gives you most miles in service
