Will Erect New Dormitory

Plans for the financing and erection of the new \$100,000 women's dormitory to be built here this summer, were approved by the University of Idaho Build-association at a meeting held here Tuesday afternoon. These plans will be submitted to the university board of regents at the next meeting for its approval, according to L. F. Parsons, secretary and treasurer, and the sale of bonds will then be started.

"It is hoped that work on the proposed building can be rushed this summer so it may be completed in time for the opening of school next fall," Mr. Parsons stated.

Plans are being drawn and specifications worked out by David C. Lange, University of Idaho architect, to build a dormitory that will house 150 girls, it was announced. The plans and specifications should be ready to be submitted for approval at the next meeting of the board of regents.

The proposed building will be erected on land which was purchased by the association at the time of building Porney hall, in 1924, it was announced. The exact location, however, has not been decided upon.—Star-Mirror.

Elect Troy Teachers

The school board announces the following elections: principal of the high school, Mr. Max Garred, who formerly taught here and is now teaching at Deer Park, Washington. Commercial department, Miss Barton of the University of Idaho. S. S. Sears was re-elected to the position of athletic director that he filled with marked success the past year. Mrs. Taylor was re-elected for the 7th and 8th grades. The remainder of the present staff declined re-election.—Troy News.

The Two-legged Kind

James d'Esposito ate two dozen oranges in 20 minutes, February 24, 1926, according to the "Believe it or not" pictures in the Spokesman-Review. Now comes word from an eastern college of high standing that one of its seniors ate 48 eggs in 41 minutes.

He should be styled a human egg crate or a walking omelette—not caring to call him what we really think he is.—Genesee News.

See Big Searchlight

Some time ago the Press published an item which was submitted by Ted Reid, stating that the beam from the big searchlight on the Old National Bank building in Spokane was plainly visible here when weather conditions were favorable.

Among those interested in the item was Margaret Lien, and she wrote to the bank about it. Her letter was promptly answered by President Kommers, who told Margaret that she has the distinction of reporting the greatest distance, so far, which the light has been seen. The light, Mr. Kommers says, has a beam intensity three hundred million candle power, and has a probable visible range of 100 to 150 miles. It stands twelve feet in height on the top of the bank building and weighs 3,000 lbs. It is said to be the largest light on any office building in the world.—Deary Press.

Commercial Club Tuesday

There will be a meeting of the Kendrick Commercial Club in the dining room of the Commercial Hotel, next Tuesday evening at 6.30. All members are expected to be present.

WEEK'S EVENTS FROM SOUTHWICK

Written For Gazette by Special
Correspondent

Chas. Harris left Wednesday for Oakland, Oregon, where he will visit at the home of his uncle, Lewis Harris, for some time.

Alice Winegardner of Crescent spent the week end with Miss Ardella Hartung.

Mrs. Lee Mathews and Mrs. R. R. Wright spent Tuesday at the home of Mrs. R. G. Paris.

Mr. and Mrs. Fairley went to Peek, Friday evening, for a visit with their parents. They returned home Sunday, accompanied by Mrs. Fairley's mother, Mrs. Gill, who will visit them at their home for some time.

Tilden Ferguson and family of Deary were guests of Mr. and Mrs. Gordon Harris last Saturday night.

Miss Edna Jones and Francis Paris went to Peek last Friday evening for a short visit with Miss Edna's uncle, Albert Guernsey. Miss Guernsey brot them back home Sunday.

Leslie Triplett and wife motored to Lewiston, Saturday, where they were guests of her parents, Mr. and Mrs. Mel McFadden. They returned home Sunday evening.

Grandma Harris left for Lewiston last Saturday for a visit with her son, Walter and family.

The baseball team of Southwick went to Leland last Friday afternoon to play the boys of the high school there. The score was seven to twelve in favor of Leland.

Mr. and Mrs. Floyd Russell were business visitors in Kendrick Monday.

Mrs. Allie Foster of Kendrick was the week end guest of her sister, Mrs. Grant Bateman. She returned home Sunday evening.

Mrs. George Jones and family of Elk River spent Sunday at her old home here with Mr. Jones. They returned home the same evening.

A number from around Southwick attended the old fiddler's contest in Kendrick last Friday. They pronounced it as being fine.

Roy Southwick left Sunday for Lewiston to attend a session of the county commissioners. He expects to be gone several days.

Mrs. Gus Ziemann and son, Warner left Sunday for Lewiston after spending a week in Southwick.

Miss Clara Hayward and Elbert Armitage, who are attending school in Moscow, spent a few days of last week with their parents, returning to school Monday.

Murray Benjamin of Potlatch was visiting with friends here Saturday evening and Sunday, returning home Sunday evening.

Mr. and Mrs. N. E. Ware, Mr. and Mrs. Percy Ware, and Miss Neva Ware of Big Bear ridge and Mr. and Mrs. MacPherson of Kendrick spent Sunday at the home of Jake Berriman.

Wm. Cowger and family spent Sunday at the home of Doc Betts.

Harland Hewitt and family spent Sunday at the home of Mr. and Mrs. Ed Wetmore.

Charlie Kazda had the bad luck of falling and fracturing some of his ribs last week. He was taken to Dr. Seeley for treatment.

Mrs. R. A. Goans attended the teachers meeting in Spokane last week.

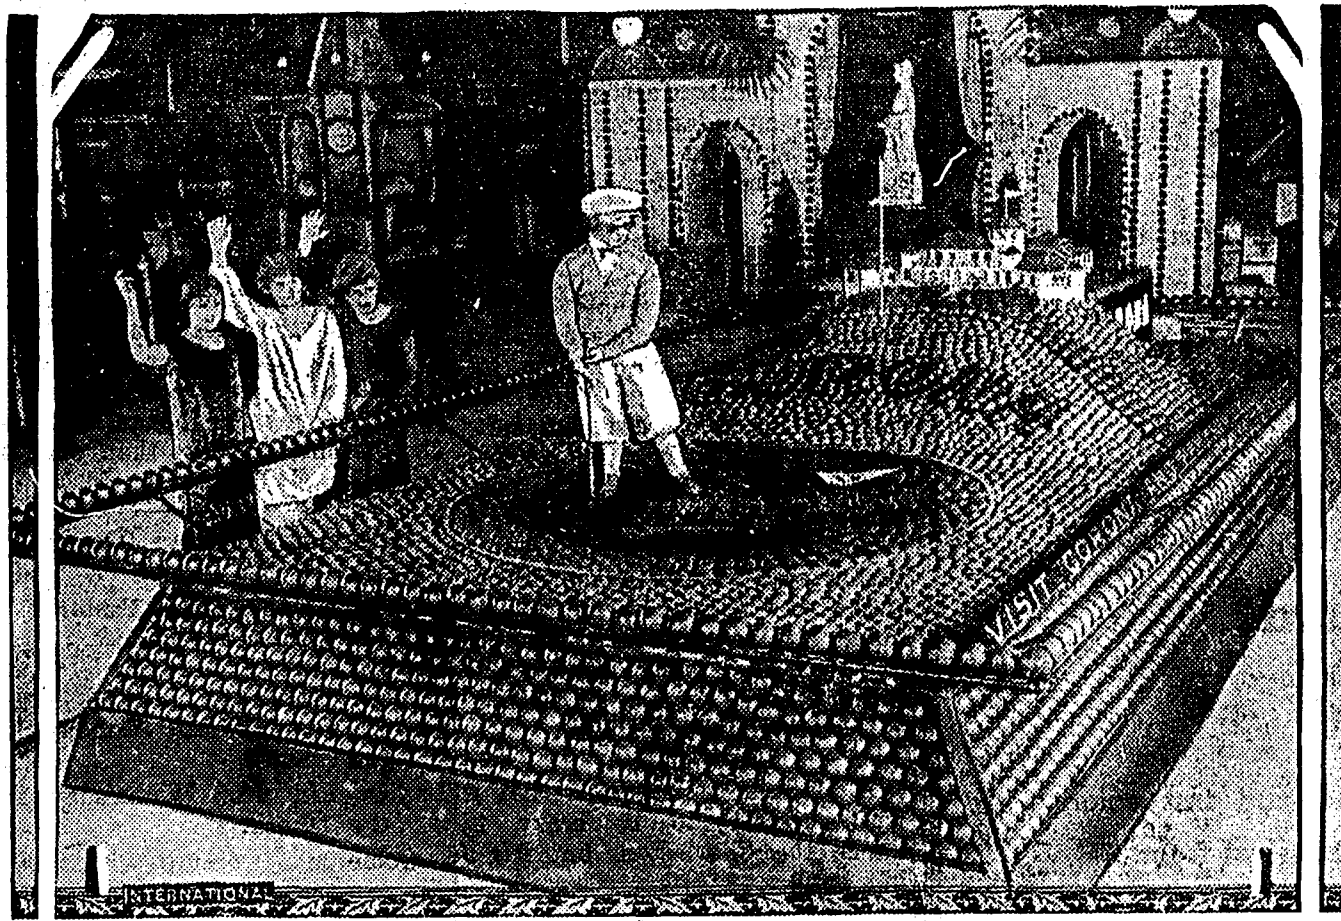

Ben Baker of near Teakean is visiting with friends a few days this week.

Mrs. Frank Carey and daughter, Mrs. Huffman, spent Wednesday of last week with Mrs. Wells.

Grandma Wells was the dinner guest of Mrs. Ben McCoy, Tuesday.

County Commissioner G. F. Walker is in Moscow this week attending the regular quarterly meeting of commissioners of Latah county.

Seen in National Orange Show in California

This is the novel exhibit of the city of Corona, Cal., in the Sixteenth Annual National Orange show held in San Bernardino, Cal.

Lapwai vs. Kendrick, Sunday

A fast ball game is in prospect for next Sunday afternoon April 18, when the Lapwai Indians meet the locals on the Kendrick diamond. The Indians defeated Lewiston Red Sox by a wide margin last Sunday and have thereby demonstrated that they have a real aggregation of ball players.

The game will start at 2:30 and you are expected to be there. The game will be worth the money so bring 25c for your admission and two-bits for your lady. Everybody pays this season because it costs money to run a ball team. The admission is small, so it takes more of them to pay expenses. Most towns are charging 50c straight this season.

Band Concert Saturday, April 24

The first open-air concert of the season will be held in the park here Saturday evening, April 24. The members of the band have been practicing all winter and have some splendid music for the occasion. The concert will be free to the general public and it is hoped that the people of the Potlatch country will take advantage of the opportunity to come to Kendrick and have a good visit and general good time in the park. The band boys will feel encouraged if you show your appreciation of their efforts to the extent of lending your attendance. You will enjoy the concert.

Aurora Borealis Display

Much interest was aroused here Wednesday night over a beautiful display of the aurora borealis, commonly called northern lights. The first appearance was a big streak of white that extended clear across the sky from east to west. It had the appearance of white smoke and telephone calls came to the local exchange asking where the fire was. Later in the night the light shifted to the north and the sky was beautifully lighted with pink and white streaks.

Fiddlers' Finals Tonight

Mr. Durbin, winner of the fiddlers' contest at Troy, has challenged Barton J. Davis of Southwick, who won the Kendrick fiddlers contest here last week, and will meet at the New Kendrick Theater tonight, for the championship of the Inland Empire.

Three Trustees Filed

The names of three candidates for the local school board will appear on the election ballot tomorrow as follows: For one year term, E. H. Emery; two year term, N. E. Walker three year term, A. K. Carlson.

ORGANIZE VALLEY BASEBALL LEAGUE

The Board of Directors Met Last Monday Afternoon

The organization of the Valley baseball league was completed Monday at a meeting of the board of directors and the president to include the following six teams: Lapwai, Cuddezac, Kendrick, Juliaetta, C. & H. Red Sox and Clarkston, says the Tribune. The season will begin Sunday, April 25, and end June 27, with a ten-game schedule.

Manager Morscheck of the Genesee team was present at the meeting to ask admittance for his team, but upon the agreement of Lapwai to provide a home grounds and play their home games at Lapwai, the Indian team was included in the league and the Genesee offer deferred. There was some talk of trying to secure Uniontown along with Genesee and form an eight-team circuit to play a 14-game schedule, but it was the consensus of opinion that the country teams could not play after the Fourth of July and the board decided to hold the league to the original six teams.

The constitution and by-laws, as submitted by vice-president George Barnum of Kendrick, was adopted with only a few changes and Mr. Barnum was appointed a committee of one to complete the playing schedule. The player list, 15 members for each team, is to be submitted not later than Thursday of this week and the complete list, together with the schedule and a copy of the constitution and by-laws be mailed to each director on Friday. Players will be investigated for eligibility only when protested by the manager of one of the teams.

Home-town players only will be used in the league, except that college boys may play when they return from school, if their home is in this district. No player residing outside of the general area of the towns of the league may be signed to play. A player may sign with another team of the league when released by his manager.

Each team will pay its own expenses on the road and take all receipts on home games, the league schedule providing for two games between each team and every other team. Two umpires will be used in each game, one to be furnished by each team.

The directors present and who signed the articles of agreement were Charles C. Crabb, for the Red Sox; M. E. Turner, Clarkston; George P. Barnum of Kendrick; Eben Adams, Juliaetta; William Stevens, Lapwai; George Gagnard, Cuddezac.

Kendrick 2, Lewiston Giants 1

The game last Sunday afternoon played here between the locals and the Lewiston Giants, was a hard fought battle, resulting in a 2 to 1 victory for Kendrick. It was the first game of the season for the home team and disclosed the fact that Manager Barnum has a long string of good material.

For the first seven innings Ulery, Giants' pitcher backed by fast work on the part of his infield, held the locals to a blank. In the last of the eighth with Kendrick up, Blum on first, Clark on second, Davis hit clean for 2 bases, scoring Clark. In the ninth with Boyd on first, Glen Flesham second, Brown hit for 2 bases, scoring Flesham for the winning run. Kendrick's battery, G. Flesham pitching and Claus Clark behind the bat, did good work. Flesham held his usual steady pace. Clark got a 2-base hit and also made two spectacular catches on high fouls. Eichner played his first game with Kendrick and held down second base with a perfect record. He was also good at the bat. Brown in the field made his initial appearance with a good showing at the bat.

The weather was rather disagreeable, too cold for baseball, so the crowd was not up to standard. The game next Sunday against the Indians will no doubt draw a big attendance as the Lapwai team is always a drawing card.

Wins Fiddlers' Contest

B. J. Davis of Southwick won the old time fiddlers' contest held at the New Kendrick Theater last Friday evening. A. G. Peters of Leland received the next largest number of votes and was awarded second prize.

The contest drew a big crowd from all over the Potlatch country and quite a number had to be turned away as there wasn't standing room in the theater.

Those who took part in the contest were: B. J. Davis, A. G. Peters, Frank Day, N. E. Ware, E. O. McCallister, Frank LaBolle.

Will Not File For Office

Roy Southwick, commissioner from third district, and G. W. King of the second district have announced that they would not be candidates for re-election. Mr. Southwick, who is chairman of the board, is serving his sixth term, a total of 12 years in office. C. Whitman of Peek has announced his candidacy for the office now held by Mr. Southwick.

N. B. Long & Sons shipped a carload of fat cattle to market the first of the week.

NEWS FROM THE KENDRICK SCHOOLS

Written by High School Student
Correspondents

The members of the Senior Class of '26 were delightfully entertained at a banquet given at the Commercial Hotel by their class advisor, Mr. Strauch. After the dinner each person that was present gave a short talk about their appreciation of the things our teachers have done for us this year. Those who attended are: Elsie Morey, Alberta Walker, Hazel Stanton, Claribel Moore, Maude Compton, Minnie Blum, Buster Brown, Herbert Schwartz, Mr. and Mrs. Strauch, Miss Seeley and Mr. Kerns.

Wednesday night of last week the Seniors went up on the East hill to put up their '26. After they had eaten lunch and the '26 was up they decided to remain until the lower class had one home. At 4 o'clock the following morning the Seniors started home when they noticed the Juniors were tearing the '26 up and placing their '27 to take its place. Some of the Seniors returned to the hill and replaced their '26, which was still there till school was out that afternoon. The same evening the Juniors went back and tore up the '26 and put up their number. After awhile they decided not to let the Seniors have the chance to tear up their class number so it resulted in throwing all the whitewashed rocks over the bluff. To date neither class has replaced its number.

JOKES

Mr. Kerns: "Karl have you ever done any research work in geology?"

Karl: "Well, yes, I wash my little brother's neck every morning."

Hazel Stanton: "That girl is the ugliest person I ever saw."

Donald B.: "Not so loud, Hazel, you're forgetting yourself."

Mr. Strauch: "Give me an example of like attracting like."

Pupil: "Dad drank some wood alcohol and it went to his head."

Pupil: "Aye want to take das book der library from."

Maude: "This one, Ben Hur?"

Pupil: "Yah, das ben she."

Bus: "I am troubled with insomnia these days."

Thelma: "How's that?"

Bus: "I woke up twice in geometry class yesterday."

Here's an example of interest shown in the high school baseball.

Elbert Long, after having practiced baseball for about an hour and a half, walked almost up town before he remembered his horse that he had ridden down to practice.

Made Idaho Asylum Head

Boise, Idaho—Governor Moore today announced appointment of Dr. John Irvine McKelway as head of the northern Idaho sanitarium at Orofino. Dr. McKelway, for several years, has been assistant superintendent of the western state hospital at Steilacoom, Wash., and was previously in similar work in Oregon, New York and Pennsylvania.

Dr. McKelway served during 1918 as a first lieutenant in the medical corps of the United States army and is a member of the American Psychiatric association and two medical societies in Washington. He succeeds Dr. John Givens, resigned.

Big Sale Starts Tomorrow

The big spring sale at the Kendrick Store Co. will start tomorrow morning. A sales expert is in charge and has the store dressed up in gala attire for the event. The double page spread in this issue of the Gazette will tell you all about it.

Miss Dorothy Stanton returned Monday morning from Lewiston where she spent the week end with relatives.

Safety or Sorrow?

A certain committee was criticised for not looking after railroad crossings that needed repair. The chairman made the mild retort that the rougher a crossing the safer it is. There is meat in the thought. A few years ago the talk went round that automobile manufacturers were seriously considering the make of car that would run only 20 miles per hour. If any such cars were made we have never yet seen any of them in Idaho County.

Recklessness, of whatever nature, ought to be placed in the category of sin, along with immorality, debauchery and the host of ills that beset humanity from depraved minds and warped souls. Indifference to human consequences must become both unpopular and immoral before the desired results are even approached. Safety ought to be made synonymous with morality as well as with intelligence. Safety before sorrow, ALWAYS! —Grangeville Free Press.

A Missouri editor says that it isn't necessary to be crazy to dance the Charleston, but it's a big help.

Growing Pullets Need Range

Growing pullets need a free range on uncontaminated soil to give them the vitality and stamina necessary to withstand the forced feeding at maturity, says Prof. R. T. Parkhurst, University of Idaho poultry husbandman.

Alfalfa or clover pastures are best, Mr. Parkhurst advises, but corn or grain fields or orchards with an abundance of green and succulent feeds and lots of insects are excellent.

"If a good shade is not available it should be supplied by artificial means, either by constructing shelters of branches or stretching canvas or sacks over frames a few feet from the ground. Corn or sunflowers in small patches afford a desirable shade as well as a valuable source of green feed.

"It is hardly possible to overestimate the value of giving unlimited sour skim milk, buttermilk or some similar milk by-product during the growing period. Liberal feedings of scratch feed should be given 3 times a day and the growing mash should be available at all times in the self-feeding hoppers. In general, chickens should be hungry at each feeding and should be kept growing continuously. Changes in rations should be made only when absolutely necessary and then very gradually. "Thorough spraying with two parts of kerosene and one part stock disinfectant will keep the mites down. If lice become prevalent on the growing pullets it may be necessary to dust the entire flock with sodium fluoride."

IDAHO UNIVERSITY FARM CALENDAR

Specialists Write on Subjects of Interest

Poultry

It is necessary to use land for growing the young stock that has not had poultry on it recently, or has been completely freshed by plowing and cultivation, to insure healthy birds. It is an excellent practice during the growing season to spade up around the brooder house and fill in any puddles in which water might stand and become stale. Cleanliness in feeding and the constant use of reliable disinfectants also are good precautions. —R. T. Parkhurst.

Agronomy

The department of agronomy has Markton oats for distribution to a few farmers who have clean soil so that a good seed crop can be grown. Farmers who are interested should have five acres available for seeding to this variety. The variety is adapted only to northern Idaho. It is entirely smut resistant and is the high yielding variety for

the north part of the state, out-yielding Idamine about twelve bushels per acre.—H. W. Hulbert.

Dairying

If a separator is wasting 3 of one per cent more than it should and the owner has 10 cows that average 20 pounds of milk, the inefficiency causes a loss of 18 pounds of fat within a month. At 45 cents a pound this loss would mean \$8.10 in money. In a year's time it could more than equal the profit above feed costs of the average high grade cow. With this relatively small waste the entire profit from one cow in a herd of 10 is practically eliminated.—F. W. Atkeson.

In the Home

Learn to like a variety of vegetables and then plan to serve them. Serve tomatoes two or three times a week. Don't forget that the tomato is a food suited to the infant as well as to the adult. Serve a green vegetable, such as green beans, asparagus, peas, cabbage, carrots and onions, not less than once a day.—M. E. Hepworth.

Studies in English

By Wickliffe R. Smith

The Sentence

Thru the study of the well-constructed sentence we arrive at an intelligent knowledge of the parts of speech, a correct use of grammatical forms, and discover the laws of discourse in general. We find there the law of unity, continuity, of proportion, and order. All literature worthy of the name is made up of good sentences properly joined together. And since the sentence is the unit or foundation of all discourse it is essential that we know the sentence, know it as the skillful engineer knows his engine, or the violinist his violin. The student who has acquired a thoro knowledge of the English sentence finds his work in the translation of foreign lan-

guages much easier, because the laws of thought are the same for all nations, and the logical analysis of the sentence is similar in all tongues. Every element of the sentence and its proper relation to every other part and to the entire sentence should be studied carefully as a means of mental discipline; for to know the sentence is to know how to think.

In stating a comparison do not compare a thing with itself. Incorrect Sentences

New York is larger than any city in America.

Iron is more useful than any metal.

I like this novel better than any novel I ever read.

All the metals are less useful than iron.

Of all the other flowers I have seen, the rose is the prettiest.

Every person has their faults.

Correct

New York is larger than any other city in America.

Iron is more useful than any other metal.

I like this novel better than any other novel I ever read.

All other metals are less useful than iron.

Of all the flowers I have seen, the rose is the prettiest.

Every person has his faults.

Pronounce: Ere, error, against, err, patron, executor, infantile.

Best to Be Sure About Seed Corn

Corn Not Out of Field Before Frost Should Be Tested for Germination.

(Prepared by the United States Department of Agriculture.)

Seed corn for 1926 planting offers an interesting contrast to that for last year, says the United States Department of Agriculture. From the standpoint of maturing corn, the summer of 1924 was one of the poorest in many years. As a consequence there was every indication that there would not be enough seed corn to go around in the spring of 1925. An active campaign by the agricultural experiment station and the federal Department of Agriculture, aided by realization of the very evident danger, resulted in more seed corn being field selected and dried than ever before. Finally, unusually favorable weather during September and October permitted much corn to dry in the field without being damaged for seed purposes. Therefore an abundance of good seed corn was available for planting in

1925.

Seed Corn Situation.

In contrast, the summer of 1925 was unusually favorable for the rapid development of corn. The crop went into September in excellent condition and the prospects for seed corn were the best. Field selection of seed corn was put off in many cases because of these facts and early freezes occurred before many farmers had selected their seed. These conditions have contributed to a prospective seed corn situation next spring which, while not serious, may be unfavorable.

In Iowa, for example, the temperature during the last week in October was low, zero weather occurring over more than half of the state. Corn containing more than 20 per cent of moisture is ruined for seed purposes when subjected to such temperatures. Conditions similar to those in Iowa occurred over much of the corn belt.

Test for Germination.

Farmers who did not have their seed corn out of the field before the first freeze should test it for germination as soon as possible. Directions for conducting such tests may be had from their state agricultural experiment station or the United States Department of Agriculture. A preliminary test of two kernels from each of 100 ears of the kind to be planted will show whether the seed can be used or whether other arrangements must be made.

How to Fail in Dairying

Told by Iowa Specialist

A sure way to avoid having a lot of milking to do is to follow the suggestions offered below, according to Burt Okerkirk, dairy production extension specialist, Iowa State college.

Keep the milking cows in the corn stalks to dry them up before winter—it is difficult to milk by lantern light.

Feed timothy hay, straw or corn stalks because these are low in protein, a muscle builder—the cows can be handled easier.

Don't use balanced rations. Don't use a silo—silage stimulates production.

Have a pitchfork ready at all times to teach cows their places. Always get them with a milk stool.

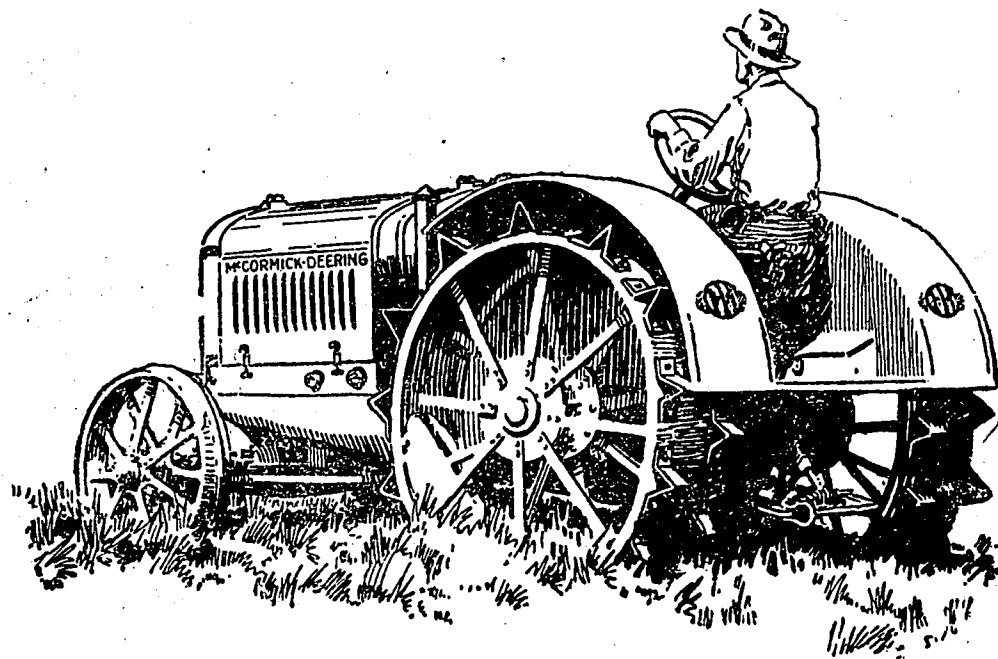

Keep 30 cows that produce 150 pounds of fat each rather than 15 that average 300 pounds of fat. Keep a scrub bull or cow freshener.

FARM FACTS

Have the weed trees all been taken from your woodlot?

Jabbing the reins or continued tapping with the whip soon will teach the young colt to be an old loafer.

Keep calves and young stock growing in a thrifty condition. Their future usefulness depends largely upon present care.

This Year, Win with Power --- and Machines to Match!

From the standpoint of effort the tractor owner has an easy time compared with the other fellow. He does not have to crack the whip over tired and weary horses. He has no chores to do. He has full power and full efficiency at his command at all times, regardless of heat and dust and flies. His tractor and tools may be made to work thru twenty-four hours a day, if the season demands such extra speed, with utmost efficiency.

Remember, your earnings come from what you actually do and not from the amount of time you spend plodding behind unwieldy teams. Hired labor costs you the same for inefficient outfits as for money-making tractor outfits. The difference shows up in your profits at the end of the year. That is one important reason why so many farmers are discarding their ungainly, inefficient teams and adopting McCormick-Deering tractors and power farming equipment.

McCormick-Deering tractors and machines are built to work together. You can choose your machines and plan your work so as to keep your tractor busy practically every day, accomplishing from two to four times as much as is possible with hores drawn tools.

This Bank was organized in 1907, by the late John P. Vollmer. For nearly nineteen years this institution has been of service to the people of Kendrick and the surrounding territory. During all these years this bank has been a safe depository for the thousands of dollars entrusted with it by the public.

We are today in a better position than ever to serve the needs of our patrons. At all times we are glad to discuss your business problems with you. We invite the farmers of this vicinity to make this Bank their headquarters when coming to Kendrick on business.

Rapid bodily maturity is, therefore, as essential as rapid sexual maturity, as indicated by the laying of the first egg.

No correlation was found to exist between the size of the pullet and her yearly production. The large pullet laying a large egg would seem desirable. The large pullet, however, matures too slowly and is a less efficient egg producer. Efficient management calls for pullets of medium size, matured normally, both bodily and sexually. The indications are that such pullets have the best chance of being producers of standard eggs as well as an equal chance of being high producers.

Wisconsin Experts Give Rations for the Chicks

For chicks the first ten days Wisconsin experts recommend this corn cake: Finely ground corn, 1 pint; wheat bran, 1 teaspoonful; soda, 1 teaspoonful; sour milk, 1 teaspoonful. Bake one hour and feed four times a day. Mix a little dry grain chick feed into the litter to induce exercise.

After the first few days the following mash is recommended, either fed dry or mixed crumbly with water or sour milk: Corn meal, 150 pounds; wheat bran, 100 pounds; wheat middlings, 100 pounds; rolled oats, 25 pounds; meat scrap, 20 pounds; oil meal, 5 pounds; salt, 3 pounds.

The poultry department of Cornell university recommends this ration for fattening, with milk, and fed wet; Corn meal, 50 pounds; white wheat middlings, 20 pounds; ground heavy oats, 10 pounds. This is to be mixed to a batter, fresh at each feeding, with buttermilk or skim milk. It will require approximately two pounds of milk to one pound of mash.

Hatchability of Eggs

The hatchability of eggs depends mostly on the constitutional condition of the breeding stock that is to produce the eggs. Next it might be said that the constitutional vigor of the breeding stock greatly depends on the conditions under which they are kept, that is if they are properly housed and fed. Hens and well-matured pullets may both be used for breeding purposes with success, but great care should be taken that both hens and pullets are healthy.

DAIRY FACTS

HOME-GROWN FEEDS ARE THE CHEAPEST

Corn and oats, both home-grown feeds are still the cheapest source of digestible nutrients and should be used as extensively as possible in the dairy ration this winter; it is pointed out by C. S. Rhode, University of Illinois. Unfortunately, these two feeds do not put enough protein into the ration, unless the roughage that is being fed is good legume hay only, and consequently it is necessary in most cases to buy some feed that is high in protein to supplement the corn and oats. At present prices gluten meal and cottonseed meal are the two cheapest feeds for this purpose.

When silage and legume hays are being fed as roughage, a good grain mixture can be made of 500 pounds of ground corn, 250 pounds of ground oats and 100 pounds of ground soy beans. Another good grain mixture for use with silage and legume hays can be made from 500 pounds of ground corn, 500 pounds of ground oats, 50 pounds of cottonseed meal

and 50 pounds of gluten meal. Both of these grain mixtures should be fed at the rate of 2 1/2 pounds for each gallon of milk produced.

When no legumes are being fed, the grain mixture should be made of 100 pounds each of gluten meal, ground corn, ground oats and linseed oil meal. Another good grain mixture to use when no legumes are being fed can be made from 100 pounds each of ground corn, wheat bran and linseed oil meal and 50 pounds of cottonseed meal. These two should be fed at the rate of 2 1/2 to 3 pounds of grain for each gallon of milk produced.

When legume hays supply all the roughages, the grain mixture can be limited to 100 pounds of ground corn and 100 pounds of ground oats. A second grain mixture that can be used when legume hays supply all the roughages, can be made from 600 pounds of ground corn, 800 pounds of ground oats and 100 pounds of linseed oil meal. These two grain mixtures should be fed at the rate of 3 to 3 1/2 pounds for each gallon of milk produced.

Farm Societies Have Weaknesses

Every Director Must Feel That He Has Accepted Position of Trust.

(Prepared by the United States Department of Agriculture.)

One of the serious weaknesses of many agricultural co-operatives is the tendency of members of boards of directors to shirk responsibility in the matter of management.

"Too frequently," says the United States Department of Agriculture, "the individual member looks upon his elevation to the office of director merely as a recognition of his standing in the community. Such an attitude is unfortunate and until every director comes to feel that he has accepted a trusteeship for the successful conduct of the business, co-operative enterprises will fall of attaining the full measure of success they wish to achieve."

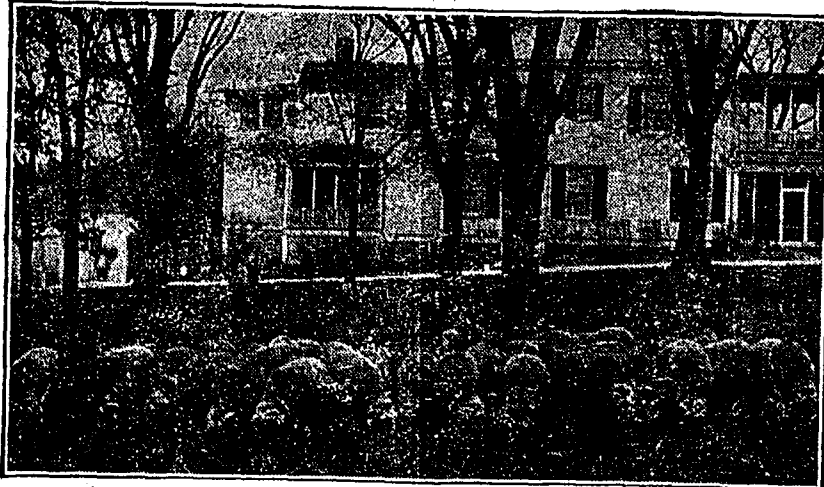

Every Director Obligated.
This trusteeship, say the department, obligates every director to inform himself thoroughly respecting the operations of the business with which he has become vitally connected. In addition he will need to understand fully the broader principles upon a thorough working knowledge of which depends, to a large extent, the degree of success and progress of the business.

"If lack of interest is a weakness," says a department economist, "the wrong kind of interest is equally bad. Too frequently one finds the board interfering instead of directing. It is the duty of the board to formulate policies and to see that these policies are carried out by the executives. Dictation by the board of the petty detail of day to day operation is not 'formulating policies. It is interference. Such interference can only result in unstable and unsatisfactory management."

Unwise Management.
Probably the most frequent cause of unwise management, he points out, is a lack of essential facts, or if these be at hand, an unwillingness to face the facts. To the extent that the board of directors makes a real effort to understand the demand for its products, and to formulate price and merchandising policies on the basis of all the facts, rather than on the basis of mere opinion, he says, will its activities contribute to whatever measure of success is achieved.

Unbridled Tongues
Many a publicist in the course of his career learns that free speech may be costly.

Your Sheep Deserve Attention

The farm flock of sheep give two crops each year—lamb and wool.

As time goes on, progressive farmers are placing a higher valuation on the variety of sheep they raise and the care they are given. It is generally realized that a sheep raiser secures two crops per year—the lambs and the wool. All indications point to a well sustained price for lamb and mutton due to the fact that consumption has at last overtaken production and prices being paid for wool, mutton and lambs are, even now, most inviting.

Compared with other live stock, sheep raising provides a profitable source of cash income. Early lambs can be made ready for market by June and when the wool is harvested and sold in June and July, this revenue is received at a season when most needed by the average farmer. There are many instances where farm flocks of sheep have kept farmers out of debt. In one instance, 50 ewes produced 65 lambs which when marketed averaged 66 pounds at 15c per pound or a total of \$443.37. The wool clipped from the 50 ewes averaged a trifle

over seven pounds per head and brought well over a \$100.00 or a total of almost \$800.00 from the flock of only 50 ewes.

Such a harvest, however, is not possible without a return by the owner. He must lay the foundation by securing a desirable ram and must have good basic value in the breed of sheep he is raising.

While there are more than 40,000,000 sheep in the United States, only 463,504 of these are pure bred. Annually the number of pure bred sheep increase in proportion to the total number of sheep, which is a favorable indication for a continuance of quality for years to come. The sheep owner realizes that only on quality may he build a permanently profitable business in sheep raising.

A close study of breeds most suitable to existing conditions and most advanced methods of feeding and care, always carries with it a large dividend in results obtained. Your sheep deserve good attention.

Farm Hints

Sheep drink little water at a time, but often, so that water should be convenient for them.

Merino is the wool sheep; Shropshire the all-purpose; and Southdown for the best mutton.

The value of milk as a feed for hens is often overlooked. It will prove a desirable addition to any laying ration.

A goat is a better protection for sheep than is any other animal. Dogs fear goats, but the goat has no fear of a dog.

Time and material spent in building a suitable poultry house or remodeling or refurbishing the old will draw good dividends.

Hard, sharp grit for grinding feed, and oyster shells to supply lime for egg shells are both necessary. Neither will replace the other.

Keep the body weight of pullets up during cold weather by feeding liberal amounts of scratch grain, say poultry specialists of the Pennsylvania State college.

The feeder who does not make sure of a sufficient supply of feed to carry the cattle purchased the desired time or to the desired condition often runs into grief.

Food and care given the dairy cow during the cold winter months will repay in increased milk production.

Cattle prices, especially those of beef cattle, should be somewhat higher this spring, so take good care of the beef cattle herd. The time of the cattlemen is approaching, it appears.

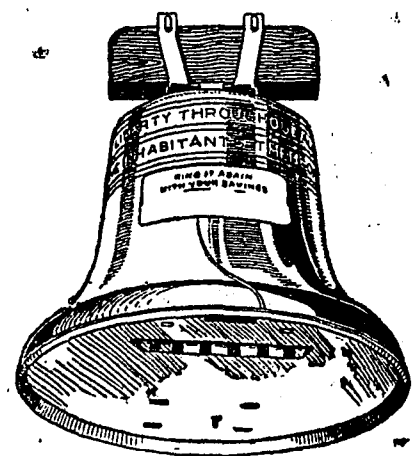

Maintenance of the proper speed and even pressure on the separator handle is an important factor in the separation of milk and cream.

Mangel-wurzels, stock beets and turnips are excellent root crops for succulent feed in winter, if you have not enough cows to make a silo pay.

One of the best ways to get dairying started in your county is to get an organized movement for dairy calf club work started among your farm boys and girls.

Power of Vibrations
A Boston violinist says he can put out a flame with the vibration of his fiddle. But that's nothing. A saxophone slightly off key can put out an entire orchestra.—Cleveland Plain Dealer.

Dry Mash Is Necessary for Production of Eggs

In order to obtain satisfactory egg production at this period of the year, it is necessary that dry mash be fed in open hoppers continuously. This may be a commercial mash, or it may be mixed at home. A fairly satisfactory home-made mash is one made up of equal parts by weight, of bran, middlings, corn meal, ground oats, and meat scrap, with one pound of salt, and two pounds of dried mari or ground limestone added to each one hundred pounds of mash.

In addition to the dry mash fed in open hoppers continuously, the birds should be fed a scratch grain made of equal parts by weight of whole wheat and cracked corn, or if oats have been grown on the farm, oats may be added, feeding a scratch of two parts corn, one wheat, and one oats. If barley is obtainable, barley may be substituted for half of the corn, making a scratch grain of two parts wheat, one part corn, and one part barley. Buckwheat, sunflower and seed, kaffir milo, and other grains may be added in small quantities not to exceed 10 or 15 per cent of the ration.

Protection for Animals During Winter Weather

One of the reasons back of emaciated and thriftless live stock is the fact that it does not have good shelter during the period of winter storms—and especially is this true of cows, hogs and sheep, which so often are compelled to protect themselves as best they can. If during the fall months farmers would cut a few poles and build sheds that open to the south and then cover them over with old straw or fodder, a cheap protection of this kind can be provided at a cost that involves little more than the labor expended upon it. Wherever possible such makeshift sheds should be erected on the southern brow of a hillside, for this affords double protection against the wintry northern winds. There is something wrong with a farmer who can sit contentedly by the side of his warm stove on a cold winter's night and yet know that his live stock is exposed to its merciless rigors.

Turning Corn Into Dairy Feeds Urged

Surplus Crop Fed to Cows Will Relieve Farmer.

Farmers who are worrying about the surplus of corn and the relatively low price of their product just now can secure as much as \$1.25 a bushel by turning this corn into dairy feeds and market the dairy products.

"By marketing their surplus corn in the form of dairy products," says M. D. Munn, president of the National Dairy Council, who has been conferring with leaders in the dairy industry and bankers on the question, "this corn will return the farmer about \$1.25 a bushel based on the average price of dairy products in 1925. By so doing we will not upset the balance of grain produced by having corn consumed in the form of corn meal mush, bread or muffins in place of a bushel of wheat. At best we can only eat a given amount of bread and cereals, and an increased consumption of one form of bread necessarily decreases the consumption of another."

While corn meal mush and milk is palatable and healthful and should be freely eaten, it does not constitute an effective way of consuming the surplus corn. Milk and its products are the most healthful foods we have, and by consuming more of these people will have better health, be more efficient, and at the same time directly assist in relieving the farmer of his burden of surplus corn providing they will feed it to the dairy cows in a properly balanced ration.

"If the public is really willing and anxious to help in relieving the farmer of this corn surplus burden," says Mr. Munn, "he can best assist by increasing the consumption of milk, butter, ice cream and cheese and at the same time be more healthful and efficient. The properly balanced ration for the dairy cow includes corn meal, corn gluten feed, together with ground oats, barley, bran, cottonseed meal, beet pulp, etc. This corn gluten feed is a by-product from the manufacture of starch and sugar from corn. Therefore the consuming public can further assist by using more corn sugar and less imported cane sugar."

their own corn and oats are only paying about \$85 a ton for grain mixtures this winter. Alfalfa not only makes it possible to have a cheap grain mixture but helps cows give more milk than any other roughage will. If alfalfa is not already grown on the farm, get in touch with the county agent and have your soil tested for lime requirements; also obtain sources of good seed and inoculation.

FARM FACTS

Phosphated manure is much more valuable than untreated manure.

Painting the lowest cellar stairstep white reduces possibility of accident from missteps.

The most successful farmer is the one who incorporates into his mental capital lessons from experience of other farmers and investigators.

When it is inconvenient and often impossible for the farm family to make frequent visits to local markets during the winter months, the vegetables needed should come from the supply furnished by the farm garden.

EXTRA MILKING IS GAINING IN FAVOR

Is it profitable for the average dairy farmer to milk three times a day during the winter months if he can find the time to do it? The New Jersey College of Agriculture, Rutgers university, says it is and offers two recent experiences to support the statement.

A few weeks ago, when the herd at the college farm failed to supply the demand for Rutgers special milk, it was decided to milk nine of the cows three times a day, with the idea of making up the shortage. In spite of the fact that these animals had all been milking from three to six months, the average daily production per cow increased four quarts under the three milkings. If these cows had been fresh, the increase would have been greater, the college dairy specialist asserts.

The other example is that of D. Morton Davis, Marlboro, Cumberland county, a breeder of pure-bred Holsteins, who had the most productive herd in the Salem-Cumberland-Gloucester association last year by milking three times a day. The average of his cows was 12,421 pounds of milk, and 415 pounds of butterfat for the year. Mr. Davis states that by milking a group of ten cows three times a day, instead of twice, he can ship an extra 40-quart can of milk.

When Holstein cows give 60 or more pounds of milk a day, Jerseys and Guernseys 40 or more, they should, for humane reasons, be milked three times, continues the college of agriculture. When any cow is giving 40 pounds a day, a 15 to 20 per cent increase can be expected from the extra milking. It is also thought by many that milking a two-year-old heifer three times a day tends to increase her future as well as her present milking capacity. By feeding a balanced ration according to the amount of milk produced, the increase in feed cost will be very small.

Most dairy farmers now realize that the price of milk cannot be advanced very much without reducing the amount of milk consumed by the general public. With this idea in mind they realize that only through more efficient production can they get more profit per cow.

Factors on Which Money in Dairy Farm Depends

Profitable dairying is primarily dependent upon:

1. Good cows and the reproduction of better cows through the use of pure-bred dairy bulls.
2. Intelligent feeding of cows and calves.
3. Adequate care and attention to details.

The cow that cannot produce 175 pounds of butterfat a year in Colorado under average conditions, cannot make any income over feed cost for her owner. In other words, the cow that cannot average two gallons of milk a day, testing 3.5 per cent for 310 days in the year is not making the owner a labor income.

Intelligent feeding does not consist merely of balancing rations, but rather of balancing the feeds available in your locality and those feeds that can be obtained at a price which is not prohibitive.

Adequate care is not the shelter of a barbed wire fence, neither is it of necessity, a \$50,000 establishment, but dairying is like a lot of other things. Extremes are not what we need—we need a medium.—H. R. Lascelles, Field Man, Colorado State Dairy Commission.

Cows to Make Profit

If cream or other products are to be sold and a dairy herd maintained for profit, there should be from 10 to 15 dairy cows on the farm to put the enterprise on a business basis and make it of enough consequence to warrant the proper care and investment for equipment, according to farm management specialists at the South Dakota State college.

THE KITCHEN CABINET
(©, 1925, Western Newspaper Union.)
A few can make money by shrewd trading, or by improving some unusual opportunity, but the majority of men can hope to amass wealth only by self-denial and hard, persistent toil.—Clyde Davis.
SEASONABLE GOOD THINGS
A jar of good, well-seasoned salad dressing is always seasonable and always needed.
Fruit Salad Dressing.—Combine two beaten eggs, four tablespoons of sugar, one-half teaspoonful of salt and one-fourth teaspoonful of pepper; when well beaten add four table-spoonfuls of vinegar, one table-spoonful of mustard and a few dashes of cayenne. Cook over hot water until thick. Pour into a jar and set away in a cool place. When serving, mix one and one-half table-spoonfuls of this dressing with a cupful of cream.
Chestnut Croquettes.—Take one cupful of cooked mashed chestnuts, two table-spoonfuls of cream (thick), the yolks of two eggs, one table-spoonful of sugar. Mix, shape into balls, dip into egg and crumbs and fry in deep fat. Drain. Serve as a garnish for fowl.
Cadillac Chicken.—Wipe a chicken, dressed as for broiling. Sprinkle with

salt and pepper and place in a well-greased broiler; cook eight minutes. Remove to the pan and rub over with the following: Cream four table-spoonfuls of butter, add one table-spoonful of mustard, one-half table-spoonful of salt, one table-spoonful of vinegar and a few dashes of cayenne. Sprinkle with three-fourths of a cupful of soft buttered crumbs and bake until the chicken is tender and the crumbs are well browned.
Savory Pork.—Cut two pounds of fresh ham into one-half-inch slices. Trim off the extra fat and fry for ten minutes in a hot frying pan. Add two slices of onion, one cupful of tomatoes, one shredded green pepper, and cook five minutes. Add one-fourth of a cupful of flour, and just enough water to cover. Season and cook closely covered for twenty minutes. Just before serving add two cupfuls of cooked spaghetti. Arrange the ham on a platter with the spaghetti surrounding it.
If pork chops are parboiled in three or four table-spoonfuls of water, turning them until the water is evaporated then browned, they will be well cooked without being dry.

of making sweet cream buttermilk into a milk powder. The buttermilk from several plants was assembled at a plant equipped for making milk powder, and 550 pounds was made in a single day as a trial. Samples of the product were distributed among the bakers for the purpose of determining the relative quality of the product. If the plant is successful it will present another opportunity for bringing additional income to the milk producers.
Recent contracts have been made which increased the quantity of sweet cream sold at eastern markets to nine carloads a week.
Water Supply for Live Stock in Cold Weather
Live stock frequently suffer from lack of water during freezing weather. When the only water supply available is a stream or spring, daily attention is necessary to be sure that the ice is broken. Often the approach to such a water supply becomes so slippery that it is almost impossible for the cattle to get to and from water without falling and floundering around a great deal. After such an experience animals will avoid going to the water hole just as long as they can possibly get along without water. Live stock need plenty of water all the time.
Power of Love
If there is anything that keeps the mind open to angel visits, and repels the ministry of ill, it is human love.—N. P. Willis.

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

Alven Zumbro, Plaintiff,

vs.
The unknown heirs and unknown devisees of Florence H. Lanker, deceased, and all unknown owners of and all unknown claimants to any right or title to or interest in or lien or claim upon Lots Two (2) and Three (3) in Section Eighteen (18) in Township Thirty-nine (39) North of Range Four (4) W. B. M. and the Northeast Quarter of the Southeast Quarter (NE $\frac{1}{4}$ SE $\frac{1}{4}$) and the Southeast Quarter of the Northeast Quarter (SE $\frac{1}{4}$ NE $\frac{1}{4}$) of Section Thirteen (13) in Township Thirty-nine (39) North, Range Five (5) W. B. M., Defendants.

THE STATE OF IDAHO SENDS GREETING To the above named defendants.

You are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for the County of Latah, by the above named plaintiff, of the nature in general terms as follows:

To quiet title to the above described lands and premises in plaintiff.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the State of Idaho, in and for Latah County, this 8th day of March A. D., 1926.

HARRY A. THATCHER, Clerk.
By Adrian Nelson, Deputy.
Frank L. Moore and Latham D. Moore, Attorneys for Plaintiff. 11-6

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

S. O. Gibbs, Plaintiff,

vs.
Samuel Geer, Reuben S. Cox, Jno. H. Evans, John M. Hill, H. C. Baker, Christen Nelson and Phebe Nelson, his wife, Sherman F. Town, Charles W. Town, Clarence M. Town, Harry O. Town, Nellie M. Jester, (nee Nellie M. Town) State of Idaho, and All Unknown Owners of and All Unknown Claimants to any right or title to or interest in or lien or claim upon the South One-Half (S $\frac{1}{2}$) of the Northeast Quarter (NE $\frac{1}{4}$) and the North One-Half (N $\frac{1}{2}$) of the Southeast Quarter (SE $\frac{1}{4}$) of Section Thirty-three (33) in Township Forty (40) North, of Range Five (5) W. B. M., in Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETING To the above named defendants:

You and each of you are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, by the above named plaintiff, of the nature in general terms as follows:

To quiet title to the above described lands and premises and each and every part and parcel thereof in plaintiff.

And you are hereby directed to appear and answer the said Complaint within twenty days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere; and you are further notified that unless you so appear and answer said Complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said Complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, for Latah County, this 15th day of April A. D., 1926.

HARRY A. THATCHER, Clerk of said District Court.
By Adrian Nelson, Deputy Clerk.
Frank L. Moore and Latham D. Moore, Residence and P. O. address, Moscow, Idaho, Attorneys for plaintiff. 16-6

Call For Warrants

Notice is hereby given that I am prepared to pay the following REGISTERED WARRANTS of the series 1926 issued on SPECIAL SCHOOL FUND of School District No. 31.

Warrants Nos. 81, 82, 108, 123, 124, 125, 126, 127, 128, 129, 130, 131 and 132.

Leola R. King, County Treasurer.

Dated at Moscow, Idaho, this 29th day of March, 1926.

Three issues of the Kendrick Gazette, April 2nd., April 9th., and April 16th. 14-3

NOTICE OF FORECLOSURE SALE

Order of Sale and Decree of Foreclosure and Sale.

William J. Tierney, Executor of the Estate of Thomas Tierney, deceased, Plaintiff

vs.
Lillian M. Jones and George L. Jones, her husband, Defendants

Under and by virtue of an order of sale and decree of foreclosure and sale issued out of the District Court of the Second Judicial District in and for the County of Latah and State of Idaho, on the 17th day of March A. D., 1926, in the above entitled action wherein, William J. Tierney, Executor of the Estate of Thomas Tierney, deceased, the above

named Plaintiff obtained a judgment and decree of foreclosure and sale against Lillian M. Jones and George L. Jones, her husband, Defendants, on the 17th day of March A. D., 1926, for the sum of \$1474.05 in United States gold coin, besides interest, cost and attorney's fees, which said decree was on the day of A. D., 19..... recorded in judgment book of said court, at page I am commanded to sell all that certain lot, piece or parcel of land situated, lying and being in East Moscow precinct, County of Latah, State of Idaho, and bounded and described as follows:

South half of the Northeast quarter of Section Thirty-two (32) in Township Forty (40) North of Range Four (4) West of the Boise Meridian.

Public notice is hereby given that on Monday the 19th day of April A. D., 1926, at 2 o'clock P. M. of that day, in front of the Court House door of the County of Latah, I will, in obedience to an order of sale and decree of foreclosure and sale, sell the above described property or so much thereof as may be necessary to satisfy said judgment, with interest and costs, etc., to the highest and best bidder, for gold coin of the United States.

Dated this 20th day of March, 1926.

Charlie Summerfield, Sheriff.
By Geo. K. Moody, Deputy. 13-4

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho.

Notice is hereby given, That the Annual School Meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 17th day of April, 1926, and the said meeting shall convene at 1 o'clock P. M. on said day and continue uninterrupted until the business properly coming before said meeting is disposed of; at the school house in said district; that at said meeting the following business will be transacted:

1. One trustee to serve a term of three (3) years; one trustee to serve a term of two (2) years; one trustee to serve a term of one (1) year, will be elected.

2. The length of time school shall be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.

3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.

4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot. Dated this 22nd day of March, 1926.

A. K. Carlson,
Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3

SUMMONS

In the District Court of the Second Judicial District of the State of Idaho, in and for Latah County.

C. S. Bennett, Carl Bennett and Edna E. Hopper, Plaintiffs,

vs.
The Unknown Heirs and Unknown Devisees of H. W. Bilyeu, deceased, the Unknown Heirs and Unknown Devisees of Julia Ann Bilyeu, deceased, the Unknown Heirs and Unknown Devisees of David Delaney, deceased, the Unknown Heirs and Unknown Devisees of Matilda J. Delaney, deceased, the Unknown Heirs and Unknown Devisees of Ella E. Bennett, deceased, and All Unknown Owners of and All Unknown Claimants to any right or title to or interest in or lien or claim upon the East One-half (E $\frac{1}{2}$) of the Southwest Quarter (SW $\frac{1}{4}$) and the Southeast Quarter of the Northwest Quarter (SE $\frac{1}{4}$ NW $\frac{1}{4}$) and Lots Two (2) Three (3) and Four (4) of Section Twelve (12) in Township Forty-three (43) North, of Range Six (6) W. B. M., in Latah County, State of Idaho, Defendants.

THE STATE OF IDAHO SENDS GREETINGS TO THE ABOVE NAMED DEFENDANTS:

You and each of you are hereby notified that a complaint has been filed against you in the District Court of the Second Judicial District of the State of Idaho, in and for Latah County, by the above named plaintiffs, of the nature in general terms as follows: To quiet title to the above described lands and premises in plaintiff.

And you are hereby directed to appear and answer the said complaint within 20 days of the service of this summons, if served within said Judicial District, and within forty days if served elsewhere. And you are further notified that unless you so appear and answer said complaint within the time herein specified, the plaintiff will take judgment against you as prayed in said complaint.

Witness my hand and the seal of the District Court of the Second Judicial District of the State of Idaho, for Latah County, this 20th day of March, A. D., 1926.

No radio aerials shall be strung over the high tension power lines within the limits of the Village of Kendrick, without first securing permission from the Potlatch Consolidated Electric Co.

By order of the Village Board.

Carefully Select Eggs for Hatching Purposes

"Don't blame all poor hatches on the incubator," says the poultry department of the New Jersey agricultural experiment station. Over 75 per cent of poor hatching is due to the egg and the hen that laid the egg. Some hens will continually lay eggs that will not hatch, while others will continually lay eggs nearly all of which will hatch strong healthy chicks.

The elimination from the breeding pen of hens whose eggs will not hatch, although fertile, will help greatly to increase the percentage of hatch of all eggs set.

Trap-nesting and pedigree hatching are the only sure ways of getting rid of poor hens, but these methods cannot always be used on the farm. By watching carefully at hatching time the shape and size of individual eggs, and also the texture of the shell, some of these troubles may be avoided in future hatches.

Abnormally large or small eggs, mis-shaped eggs, or eggs with thin shells or shells of poor texture will not hatch well, and therefore should not be set. It is also unwise to set tinted eggs, or eggs that weigh less than two ounces, not because they will not hatch, but in order to avoid breeding these characteristics into the flock.

Spread Manure Green

Manures can be spread so much more lightly when green, whether by hand or the spreader, that there is a great saving of material. The idea that land needs a heavy coat of manure is erroneous, most lands giving far better results with two light coverings than one heavy covering in a given number of years. As the course of nearly all decaying matter is downward, the longer it remains on or near the surface, the better results you will get.

Too Much Sauce

"Don't get saucy with me, big boy!" cried the woman as her husband threw a jar of apple-butter her way. —Denison Flamingo.

POULTRY

POULTRY HOUSE QUITE IMPORTANT

Chickens raised on grandfather's farm roosted in the apple tree or on the binder reel because these places were accessible, convenient and neither crowded nor stuffy. It is pointed out by W. A. Foster of the farm mechanics department, college of agriculture, University of Illinois. This choice of biddy's should be a valuable guide to the modern poultryman who is planning to build a new chicken house or remodel the old one, Foster says.

"Suitable housing is just as important as the care of the flock because it provides for the comfort of the birds at all seasons. Furthermore, it is convenient for the attendant. In addition, to be effective and efficient, the house should be simple in construction in order to keep the cost and upkeep low. A neat, attractive house adds to the appearance of the building group and value of the farm.

"The comfort of the birds is secured through freedom from dampness and drafts and provisions for ample floor space in feeding and roost space for night. An abundant supply of fresh air and sunlight promotes the health, vigor and comfort of the birds.

"A dry house requires a dry floor placed on a porous, well-drained site, a lead-proof roof, tight walls and close-fitted doors and windows. Proper ventilation supplies fresh air to the birds, removes the moisture from the breathed air and litter and minimizes drafts, which are disastrous to the flock when the birds are inactive on the roosts at night. This ventilation may be provided in several ways. The apple-tree roosts of a generation ago were well ventilated. The open machine shelter where the range flocks like to roost is also well ventilated. Biddy's choice, then, may require a little thought on our part. Why did she choose a perch on the harvester's reel? It was accessible, convenient and neither crowded nor stuffy as many roosts in the modern hen house.

"Open-front houses provide ventilation and sunlight, but must be used with common sense to avoid undesirable drafts. A southern exposure is desirable. Modern ventilation equipment has advanced many steps in recent years. It is not yet fool-proof, but will require further study and intelligent handling.

"A poultry house of simple construction is not only desirable but necessary to the success of the venture. Simple construction enables the attendant to build houses and install equipment which would be prohibitive if skilled labor was employed.

"A neat, attractive, well-kept poultry house surrounded by a healthy, vigorous flock should be the pride of every poultry raiser. It is not only encouraging to the owner but an asset in marketing the products."

Milk Powder Remedy for Little Chick Diseases

Milk powder is the remedy for the disease of coccidiosis, which for years has taken its annual toll of baby chicks, according to the results of experimental work conducted at the California agricultural experiment station. The results of the investigation recommend the feeding of a ration to baby chicks which contains 40 per cent of dry skim milk. The investigators say: "The fact that feeding chickens mash containing 40 per cent dry skim milk not only protected them against coccidial infection but also stimulated rapid growth, indicates that this would be a valuable practice in the prevention and control of outbreaks of the disease on poultry farms."

Two pens of chicks fed in the experiment were inoculated with the germ of coccidiosis. Of those which did not get dry milk in their mash 23.8 per cent died. Of those which did get dry milk only 2.3 per cent died.

It was found that chicks fed powdered dry milk produced 25 per cent faster growth than those which were not so fed.

Poultry Facts

It is much easier to keep hens healthy and happy than it is to "doctor" sick birds.

Chicks hatched early this spring will start laying in the fall and make good producers by winter.

Clean, fluffy hen feathers, well dried, make fine pillows and cushions; and, in fancy ticking, they might be sold.

By thoroughly disinfecting your incubator with a 5 per cent solution of cresote or carbolic acid, tubercular organisms can be destroyed, making incubation perfectly safe.

Sunlight and vitamins must be mixed in the ration fed to poultry these winter months if egg production is to keep up to normal.

Wheat or oats are rich in protein, but do not carry enough carbohydrates to balance up this most valuable of all the food-elements.

Incomplete rations are responsible for tremendous losses each year from failure of pullets to lay during the winter, and from heavy mortality to pullets, especially the following spring

Curry Comb and Brush

The thorough, yet gentle use of curry comb and brush does for an animal what a bath and clean shirt do for man. It gives the skin a better chance to perform its important functions; it makes the hair coat more adequate as a protection against inclement weather; it is an excellent preventive for certain external parasites; it makes for good health as well as good looks. At no time is it more essential to animal well-being than during winter.

Average Fleece Weight

The bureau of animal industry says that the average fleece weight for the United States is approximately seven and a half pounds. There is a great difference between the Southdown and the Rambouillet breeds, the wool production varying in Southdowns from six to seven pounds; in well-bred and well-fed Rambouillets, from twelve to fifteen pounds.

The BULL'S EYE

Editor and General Manager WILL ROGERS

Another "Bull" Durham advertisement by Will Rogers, Zigfield Folles and screen star, and leading American humorist. More coming. Watch for them.

Congress No. 1

I went to Washington the other day. I visited "The House of Representatives," they were in session. What I mean by being in session, the tax bill was up for debate and they were arguing on "Better Golf courses for the medium salaried man." I suppose if the World Court bill had been up, they would have been talking on "Shall America park oblong or parallel."

Well, then I went over to the Senate. They had adjourned, so I felt that America was not having such a bad day at that. We were only 50 percent inefficient THAT DAY.

You know we all joke and kid about Congress, but we can't improve on them. No matter who we elect, he is just as bad as the one he replaced. So with all their faults we love 'em. They are as good as the people who vote to put them there, and they are 10 times better than the ones who don't vote at all. They are like "Bull" Durham. they are not perfect, but they are the best in their line.

Will Rogers

P.S. There will be another piece in this paper soon. Look for it.

CRESCENT CLIPPINGS

Walter Dorendorf returned home Saturday from Kellogg where he has been working in the mines during the winter.

Ernest Loeser is working for John Darby a few days this week.

Mr. and Mrs. Wm. Kauder have both been sick lately with the "flu" but are better at this time.

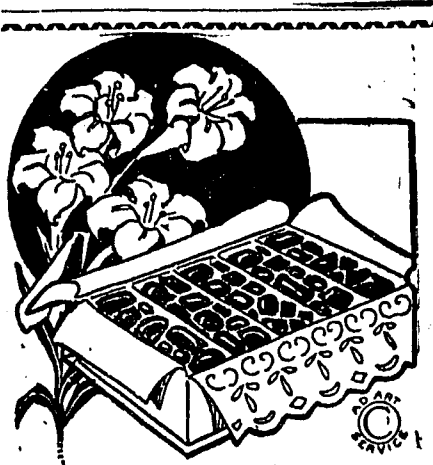

Jim and Sue Robeson visited with their sister, Mrs. Evans, on Texas ridge from Friday until Sunday.

The I. T. Kimbley family visited at the Bill Dorendorf home Saturday, and Mr. Kimbley helped Mr. Dorendorf with his farming.

Mr. and Mrs. Fred H. Darby of Moscow, had the misfortune to lose their baby daughter. The body was buried in the Southwick cemetery, April 12.

The Geo. Christensen family are enjoying "joyriding" since purchasing their car.

Ernest and Bertha Loeser visited at the Geo. Christensen home, Sunday.

GLEANINGS

Mr. and Mrs. Philip Asplund and baby of Deary spent Sunday in Kendrick with Mrs. Asplund's parents, Mr. and Mrs. E. H. Dammarell.

Perryman's Confectionery has installed a row of new booths in order to better accommodate the trade.

Dr. McKeever received delivery of a new Jewett two-door sedan last Sunday. The purchase was made through A. G. Peters of Leland, who is local agent for this territory.

John and Kester Dammarell have entered the Spokane Chronicle subscription contest and are among the leaders at this time. A number of automobiles are to be given away to the winners. If you are going to take the Chronicle now or in the near future, send our subscription to either John or Ket so that the Potlatch will be represented with one of these prize cars.

Al McKee of Lapwai was transacting business in Kendrick, Tuesday of this week. Mr. McKee is building a garage and service station at Lapwai.

Harry McKeever visited with his brother, Dr. McKeever the first of the week.

Mr. and Mrs. Byard Davidson and family of Colton, Wash., spent Sunday here with relatives.

Elmer Bechtol of Moscow was visiting his mother in Kendrick Friday of last week.

Mr. and Mrs. E. H. Emery and family drove to Spokane last Friday afternoon to spend the week end with relatives.

Mrs. R. H. Ramsey and daughter, Jean, went to Spokane the first of the week for a few days visit.

The phone directories for the local exchange will be ready for distribution the first of next week. The directories are being printed at the Gazette office. On account of a delay in securing the list of names on two of the party lines, the directories are a month or more late in making their appearance this year.

Mrs. Wm. McClelland and son, Marion and his wife returned Wednesday afternoon from Spokane where Marion has been taking medical treatment for rheumatism. His health is somewhat improved.

Glen Pleshman left yesterday afternoon for Nezperce where he will pitch for the baseball team of that place. Glen has pitched several seasons for Kendrick and is a good all round player. With a good team behind him he will win a goodly percentage of his games.

George Wilken of Cameron was transacting business in Kendrick yesterday.

Manager Barnum has put the ball grounds in fine condition for the season. Last Saturday evening the road grader was put on for several hours and the outfield leveled and put in first class shape. Most of the work was done after dark so a row of automobiles were requisitioned for the use of their headlights and the job completed by artificial light.

Herman Wilken of Lenore was transacting business in Kendrick, Wednesday morning.

Carl Kinzer of Lewiston was transacting business in Kendrick the first of the week.

Mrs. S. A. Bechtol is in Spokane visiting her daughter, Mrs. Riley. She will probably remain there for several weeks.

Dr. John E. Hoyt of Spokane, formerly of Kendrick, was offered the position of head of the North Idaho Sanitarium at Orofino, some time ago. The position was tendered him by Governor Moore but was not accepted on account of insufficient salary. A doctor with a good practice can make more money than the state is allowed to pay for the job.

Mr. and Mrs. E. A. Deobald and children spent Sunday in Moscow at the E. E. Bechtol home.

Paul Schulze went to Lewiston, Tuesday, where he bought a used Cadillac car which he will use as service car for the garage.

Mrs. Edwin Smith of Spokane arrived yesterday to visit her sister, Mrs. H. P. Hull. Mr.

Smith and Miss Edith will drive down Sunday to spend the day.

Mr. and Mrs. Leslie Roberts of Moscow were Kendrick visitors last Sunday afternoon.

L. E. Pearson went to Lewiston on business last Wednesday afternoon.

The eighth grade examinations were conducted here Wednesday, Thursday and Friday of this week, with Mrs. Knepper in charge.

Wm. Freytag bought a new Chevrolet touring car this week thru the Kendrick Garage Co.

Mr. and Mrs. Tom Long drove to Spokane the first of the week, returning Wednesday afternoon.

Harry Flaig and Geo. P. Barnum were transacting business in Moscow Wednesday.

Julietta played a fast game of baseball with the Clarkston team last Sunday at Clarkston, losing by the small margin of 3 to 2. Albright pitched for Julietta.

W. B. Deobald was transacting business in Lewiston, Wednesday of this week.

Henry Brammer traded his old Overland car in on a new Chevrolet last week. This old car is being wrecked by the Kendrick Garage Co. It has the unique record of going to the scrap pile with one of the original tires on the front wheel. If only tire manufacturers could guarantee their products for the life of the car, auto drivers would have more money to buy gas.

Word has been received this week that Rev. W. W. Bell, son of Rev. and Mrs. C. D. Bell has started west with his family. They will stop over Sunday, Apr. 18, at Dickinson, N. D., and will arrive in Kendrick, Thursday, April 22, at 1:25 p. m. It will be remembered that the first time William arrived in Kendrick, he was nine months old. He is now returning from Rangoon, Burma, where he and his wife have been in the missionary service of the Methodist Episcopal church for the past five years. Their report of their work in the foreign field and their trip around the world will be of interest to the people of this locality, which they will give in the near future.

Mr. and Mrs. Theo Hanson of Troy were Kendrick visitors yesterday.

Legion Dance Tonight
Canyon Post No. 66 will give a dance at the Fraternal Temple tonight (Friday). Art Chase's orchestra of Lewiston will furnish music for the occasion. Everybody is cordially invited to attend.

BEAR RIDGE NEWS

Mr. and Mrs. H. Dalberg and children of Deary were week end visitors with Mrs. Dalberg's mother, Mrs. Marie Slind. Mrs. Wade Keene spent Saturday and Sunday with relatives in Peck.

Mrs. Zack Aas entertained the Lutheran Ladies Aid at her home Thursday afternoon.

Preaching services at the Lutheran church, Sunday, April 18th at 3 p. m.

Louie Pearson of Garfield spent Sunday with Ed Halseth.

Everett Frazer is delivering our mail in a brand new Ford touring car.

When you hear an item of interest kindly send or telephone it to your local paper.

Farming is now in full blast and the hum of tractors is heard from daylight until dark. There is sufficient moisture in the ground for the best results.

S. Hellerud and son of Park were visiting at the O. H. Forest home last week.

Those winning a Palmer Method button at the Steele School are: Vina Hecht, Floyd McGraw, Vivian McGraw, Yearl Whitcomb, Alvin Whitecomb and Roy Clemenhagen.

LINDEN LOCALS

Mrs. Oscar Torgerson returned to her home in Elk River, Friday, after a few days visit with her parents, Mr. and Mrs. Zimmerman.

Mrs. Lucy Huffman enjoyed a visit Sunday, with her daughter and family, Mr. and Mrs. R. C. Winegardner.

Mr. and Mrs. Claud Pippinger and family spent Sunday at the D. McPhee home.

Mr. and Mr. Arthur Bohn visited with relatives in Lewiston, Sunday, returning home Monday.

Mrs. E. L. Mitchell will conduct the State seventh and eighth grade examinations for Cedar Ridge and Gold Hill pupils, Wednesday, Thursday and Friday.

Mrs. Louis Alexander was a caller at the Smith home, Wednesday afternoon.

Several neighbors spent the evening at the Sarah Keeler home Wednesday. The occasion being her seventy-eighth birthday.

Miss Irene Travis of Lewiston is visiting at the home of her uncle, Jack Travis.

A good time was reported by those who attended the dance Friday night.

Jacob Michael visited with his brother, John, a few days last

week. Miss Virginia Allen is nursing at the Lester Hill home near Kendrick.

Miss Alice Wegner, Riley Long and Roberts had a narrow escape Friday evening. They were driving along the Benner road without lights, on their way to the dance and got too near the edge, causing the car to turn over three times before coming to a stop. No one was hurt.

Several people from here attended the dance at Cavendish Saturday night.

There are still quite a number of persons on the ridge ill with the "flu."

Fourteen of the young people spent a pleasant evening at the Lyons home, Friday, April 9th, the occasion being the fourteenth birthday of Dan Lyons. Games were played in the house and on the lawn. Sandwiches, pickles, cake and lemonade were served for refreshments. All reported a good time.

Bernice Whisler was pleasantly surprised, Monday night when 15 of her friends gave her a party, the occasion being her birthday.

Butterwrappers printed at the Gazette Office.

Diseases of Wheat Cause of Big Loss

"Foot-Rot" Ailments Are Widespread in America.

(Prepared by the United States Department of Agriculture.)

Among the various diseases of wheat which annually cause considerable loss to wheat growers is the class known as "foot-rot" diseases. These diseases are rather widespread in America, are caused by plant parasites or fungi, and under certain conditions are difficult to distinguish from each other. They are especially similar as regards general field appearances, such as spotting, yellowing, stunting, and other visible symptoms of disease. Some of the better understood foot-rot diseases are the take-all disease of wheat caused by the organism *Ophiobolus graminis*, and the foot-rot caused by *Helminthosporium sativum*. These two are discussed in Department Bulletin No. 1347, which has just been issued by the United States Department of Agriculture.

Although further study is required before these diseases are fully understood, it has been possible during the past five years to obtain data and make observations which assist considerably in the matter of clarifying some of the problems involved in the general problem of wheat foot-rots. On the basis of present knowledge it

is clear that the control of the foot-rots depends not on one method, but on several. Seed treatments and the selection of clean seed will tend to prevent the spread and increase of parasites.

A copy of the bulletin may be secured, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Treating Oats to Prevent Smut Is Very Easy Job

Treating oats to prevent smut often means the difference between a good crop and a poor one. Mix one pint of formaldehyde with one pint of water. This will treat 50 bushels of grain. Spray the solution on the grain as it is being shoveled over, taking care that the mist is well distributed. One stroke of a hand-sprayer gives enough mist for each shovelful of grain. When all the grain is treated shovel into a pile and carefully cover for five hours. Sow immediately or allow to air thoroughly before sacking or storing in bins. Disinfect sack, bins, or drills with the same strength solution.

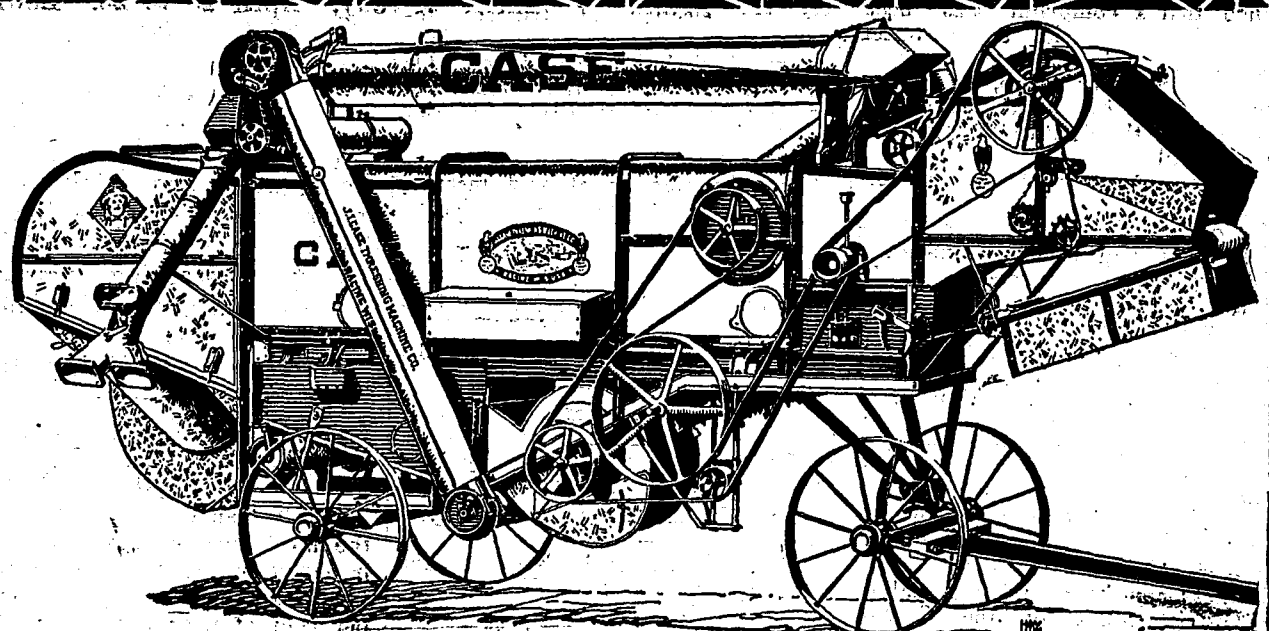

Books Not His Hobby

Samuel Butler, the famous author of the great satirical poem on Puritanism, "Hudibras," written between 1633 and 1634, is said to have owned the smallest library of any literary man in London of his time.

Result of Explosion of a Carload of TNT

A box car on the Nickel Plate railroad, laden with TNT, was thrown from the tracks near Valparaiso, Ind., and the resulting explosion was heard for miles around. Twelve loaded freight cars were demolished and others partly wrecked, and two hundred feet of roadbed was torn up. The remnants of the TNT car are shown above.

Thresh Your Own Grain

Thresh when you are ready—with much less labor. Thresh your grain early and sell on the early market. Pay yourself the profit you have formerly paid others for threshing your crops.

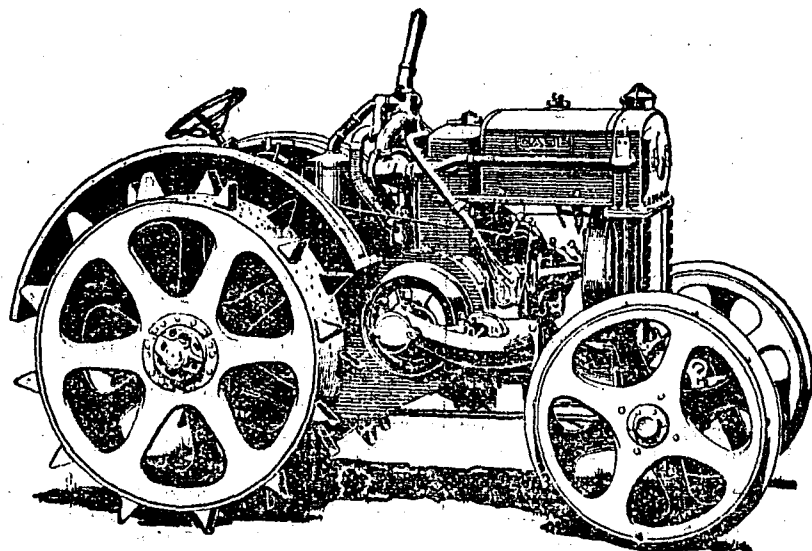

STEEL BUILT — FIRE PROOF

If you want a thresher that requires less labor to operate, runs lighter, saves more grain, and will earn you more money, the Case thresher is the machine you want and now is the time to place your order.

THE CASE 12-20 FARM TRACTOR

The amount of work this machine handles without laboring or overstrain, the little attention and few adjustments it requires, its day by day faithfulness under load, are matters of constant wonder to farmers whose previous experience has been limited to other machines.

12-20 Case Tractor Priced completely equipped \$985.00
