Entered at the Post Office at Kendrick as second class mail matter.

**LINDEN LOCALS**

The Topeka Capital is of the opinion that about the only rights the pedestrian has in these days of reckless driving are the last sad rites.

**Some Good Advice**

Keep busy if you want to keep healthy. Keep working if you want to keep well. 20 minutes of quiet meditation and prayer daily, will reduce the blood pressure 20 millimeters. Be generous of time, talent and money, and put your heart in giving. The more you give the more you will get. These are some rules for life, good health and prosperity, as submitted by Dr. R. T. Campbell, president of Sterling college. "It's the busy man and active woman who keeps well," remarked Dr. Campbell. My home town, Sterling, is full of widows whose husbands had retired and moved to town. The women had to keep busy. They had not time for retiring. They are now spending their old age living on their husbands life insurance. The men had cut short their lives by quitting work."

**FARM HOME NEAR LINDEN HAS FIRE**

**Other News Items of Interest**

The E. L. Whisler home caught on fire about six o'clock Thursday morning. Some of the family were still in bed while others were at the barn milking, when the fire was discovered. Help was called on the phone and soon neighbors arrived, who finally got the fire out. A spark from the front of the stove is thought to have started a fire in the woodbox, which spread to the wall and floor.

Mrs. Louisa Fry came down from Moscow, Monday, for a short visit.

Mrs. Annie Morrison spent Thursday with Mrs. Susan Carr. Miss Ellen Peterson, county superintendent of schools, visited the Gold Hill school, Thursday.

Mrs. D. McPhee and Mrs. Geo. Garner visited with Miss Eva Smith, Thursday.

The much needed rain of the last few days put a broad grin on every farmer's face in this community.

Mr. and Mrs. Ernest Goodnight of Nampa arrived Monday to visit her mother, Mrs. E. L. Longfellow.

Miss Eva Smith and brother, Ben, and Mr. and Mrs. E. L. Mitchell spent Sunday at the Fry home.

Mr. and Mrs. A. Alexander spent Sunday afternoon at the Fouburg home.

Mr. and Mrs. Claud Pippenger and children of Cavendish, Mr. and Mrs. D. McPhee and son, Cleve, Mr. and Mrs. C. Dahl of Park, and Charlie Garner spent Sunday with Mr. and Mrs. E. Bohn.

Mr. and Mrs. W. Weyen and children and Mrs. J. Travis visited at the Fry home Sunday afternoon.

Born to Mr. and Mrs. Ray Weaver, May 8, a seven pound boy.

Mrs. Arthur Bohn went to Elk River, Wednesday, where she has employment with the P. T. P. A. headquarters for the summer. She was accompanied as far as Elk River by her sister, Miss Mae Inger.

**Tractor Demonstration a Success**

Keen interest was shown at the tractor demonstration held at the Wm. Behrens ranch near Leland last Saturday. The Cletrae crawler tractor, operated by Mr. Wm. Behrens, did its stuff and came up to expectations in every way. It performed on hills approximating 50 per cent taking a full load. A three bottom plow is handled with ease by both the Model K and W, the latter only being rated for a two-bottom, but it handle a three-bottom with ease plowing at a depth of 9 inches.

Either one of these machines have proven their strength. On a 25 per cent hill climb the Model K was hitched to a 3 inch wagon and a one-ton International truck with chains on

wheels with both wagon and truck brakes set tight and 37 men riding on the truck and wagon. This load was handled with ease and the Model W pulled the same load with 17 men riding and all brakes set on both truck and wagon.

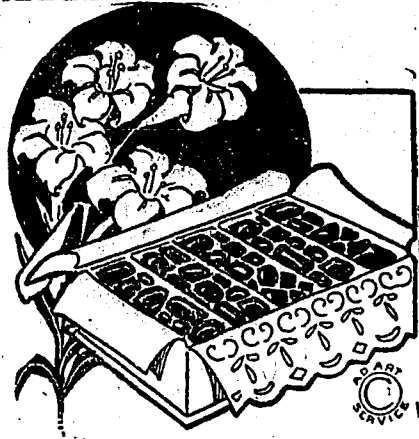

Harrowing the loose plowed land is as easy for the crawler as on hard soil.

The weather and roads prevented other tractors from taking part in the demonstration but Mr. Behrens states that he hopes to get all tractors together at the next demonstration.

Mr. Behrens stated that Ernest Schmdt of Leland bought the Model W which was used in the demonstration. He put on a pair of lines the next morning, hitched it to 4-section spring tooth harrow, got on the harrow an the next stop was for dinner.

**His Dilemma**

A beaten candidate in politics never knows whether he has a defeat to live down or a moral victory to live up to.

**Rather a Different Candy**

Aside from always being fresh—there is a different kind of deliciousness about our candy—this seems to have created the wide popularity it enjoys.

**LAMINEX DOORS**

*Will not shrink, swell or warp*

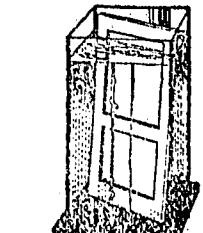

**Laminex doors withstand a flood!**

A LARGE sash and door warehouse was gripped in the clutches of the great Cumberland flood.

All doors in the basement and a great number on the ground floor were under water for several days. Doors of many manufacturers were represented there.

The water receded. Doors of other makes were corrugated. But—*not a Laminex door had a peeled face—not one had open joints—not one had buckled or blistered panels!*

Here is a new, scientific wonder door that will not shrink, swell or warp. Each Laminex door bears a guarantee label. Costs very little more than an ordinary wooden door. Ask us about it.

What do you think of a door that can be soaked in water for 24 hours without warping or coming apart? This is the famous Laminex test!

**Barnum Lumber & Mill Co.**

**Artistic Errors**

Oh, these artists again! They picture Cupid as bearing a weapon that wouldn't make an abrasion on a canary bird, even if he could hit one—which he couldn't—and everybody knows, who knows anything about love at all, that Cupid's weapon is a high velocity pump gun of outrageous caliber that scores 20 hits out of 30.—Buffalo Evening Times.

**Her Ambition**

I know a very nice woman, and what do you think her greatest ambition is? "I have heard her say this is it. In her town lives a man named Tuttle, who thinks he is very good looking, and this nice woman longs to approach him, and say: 'What I don't think you are so good looking.'—W. Howe's

*Here's Why All Eyes Are On McCormick-Deering Primrose*

**12 Distinctive Features**

1. Ball Bearings
2. Easy Turning
3. Slow Crank Speed
4. Greater Capacity with Less Labor
5. Long Life
6. Steady Running
7. Visible Oiling System
8. Improved Oiling
9. Easy Bowl Adjustment
10. Supply Can Locked in Position
11. Spun Metal Anti-Splash Supply Can
12. Improved Tinware

**I**n the McCormick-Deering Primrose the power is carried from the slowly turned crank over well-lubricated shafts and carefully cut gears to a bowl that runs on high-grade ball bearings. Friction has been reduced to the absolute minimum. A combination force-feed and splash oiling system oils every part. An efficient oil clarifier insures clean oil for all wearing surfaces. A short, sturdy bowl spindle prevents wobbling and vibration. And finally, the easy-turning bowl whirls the cream out of the milk with startling efficiency. You can't find a closer skimmer anywhere, nor one that does its work so easily. We're proud of the McCormick-Deering Primrose, and we'd like to have you come in and see these parts in the actual machine. It's a mechanical masterpiece, and a real money-maker, into the bargain.

**Kendrick Hardware Co.**

**Value of Liming in Improvement of Soil**

**Productivity Greatly Increased by Application.**

(Prepared by the United States Department of Agriculture.)  
The productivity of many soils can be greatly increased by the application of lime. Lime acts various ways; it helps to break down organic matter, it corrects acidity, and it improves the physical condition of the soil. By hastening decomposition of the organic matter, lime helps to make such matter available as plant food for whatever crops may be grown. Lime should not be applied to soils deficient in organic matter, however, especially in warm humid climates, without taking steps to maintain or increase the supply of this essential ingredient, as otherwise the outcome will be a decline in yields. The best way to in-

crease the amount of organic matter in the soil is to apply manure or turn under green crops, such as crimson clover, cowpeas, soy beans, red clover, and hairy vetch. On some low-yielding land the turning under of a good growth of crimson clover has doubled the yield of the succeeding crop.  
Lime is frequently used to correct acidity, a condition widely found in the eastern part of the United States, and detrimental to the growth of certain crops.  
Another result accomplished by liming is an improvement in the physical condition of the soil. Soils of a compact nature are rendered more permeable, in consequence of which they become more retentive of moisture, less likely to wash, and more friable. Sandy soils also are benefited, being made more retentive of moisture. Application of lime is particularly beneficial in the case of leguminous crops, such as clover and alfalfa. Liming may also increase the availability of other minerals, such as potash, by rendering them more soluble.  
Detailed information relative to liming soils may be obtained from state agricultural colleges or the United States Department of Agriculture.

Those best-looking ears of corn may not be any good after all, for a germination test may show but 60 per cent. It is not too late yet to test them.  
Birds are always our greatest garden friends. Shrubs and trees which attract them may be selected for planting on the home grounds. Bird houses and bird baths that will be ornamental as well as useful can be provided for them.

**AID TO BEAUTY**

Under this young woman's skillful hands the front of the Administration Building of the Sesqui-Centennial International Exposition Association quickly takes on a delightful aspect. She directs gardeners where to place the small trees and shrubs about the great stucco building. She is doing her share to make the big celebration of the 150th anniversary of the signing of the Declaration of Independence a success.

**RULER IS IN SCHOOL**

Bao Dal, who recently succeeded his father as the emperor of Annam and who is now twelve years old, has returned to Paris where he is studying in a French high school.

**DAIRY**

**FEED DAIRY COWS LIBERALLY PAYS**

Many dairymen are finding that it is more profitable to feed good cows liberally than to feed a larger number of cows poorly or only fairly well. It is a common observation among dairymen that good cows will return a profit on all the feed they will eat if the ration is well balanced.  
Cow-test association records repeatedly show that the greatest returns over feed costs are made by the cows which consume the largest amount of feed.  
Tests made by the dairy department at the Ohio experiment station show that good cows fed more liberally than is the general practice not only produce more milk and butterfat than the same cows on the ordinary ration, but produce a larger amount at a lower cost per pound.  
The average annual butterfat production of these cows fed a ration ordinarily considered ample was 330 pounds. On the more generous ration the average production of the same cows was 508 pounds.  
As the amount of feed used for maintaining the animals was practically the same in both cases, the greater part of the additional feed in the liberal ration was available for production.  
Not all cows will use the extra feed for milk production; some of limited productive capacity will not permit liberal feeding or will turn the extra feed into bodily fat. In neither of these cases is liberal feeding profitable and with such cows ordinary feeding will likely prove unprofitable.

**Dairy Cows Need Plenty of Water to Make Milk**

Water in the dairy cow's ration cannot be overemphasized, because it represents seven-eighths of the contents which go in the milk pail. A shortage of water will cut down the milk supply more quickly than will a shortage of any particular feed.  
Tests at experiment stations show that a cow will consume from 3 to 4 pounds of water to each pound of dry matter. If the cow is producing 4 to 5 gallons of milk she will need more than that quantity of water.  
The average animal in the herd will consume 12 gallons or 100 pounds of water each day. One cow on test at the Missouri station giving 110 pounds of milk daily consumed 550 pounds or 65 gallons of water in a day.  
Water is more often the limiting factor in production during cold snaps. The two things which affect the quantity a cow can drink are the temperature of the water and the number of times she drinks. No digestive system, even a cow's, can take 100 pounds of ice water at one time and not be disturbed.

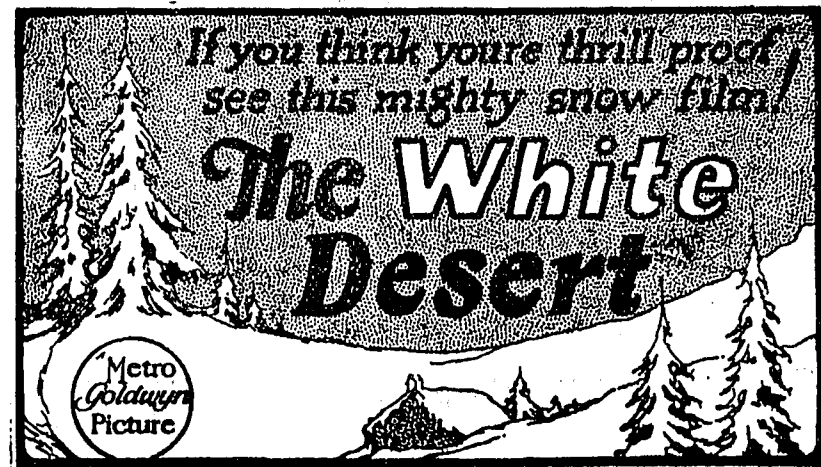

**Age to Breed Heifer Is Important to Dairyman**

The age to breed the dairy heifer will depend somewhat upon the development of the particular animal in question. If the individual is well grown and has a tendency to lay on fat, she should be bred at an earlier age than one not so well grown and showing less tendency to condition readily. The well-developed Jersey should be bred to drop her first calf when not more than 28 months of age, better yet 24 months if possible. The heifer of slower growth and less vigor should be allowed about 4 months longer.  
The aim among dairymen is to put the young heifer on the paying list early in life without permanently injuring the individual. If bred too young the energies of the heifer are devoted to the foetus, later milk yielding, with the result that the growth is greatly hindered and often stunted. The breeding time for young heifers is very important and should be considered if you expect the animal to do her best.

**Dairy Facts**

A gallon of milk weighs about eight and a half pounds.  
All grains or concentrates make better feed if they are ground.  
A cow ordinarily eats from 30 to 40 pounds of silage per day and from 10 to 20 pounds of hay.  
In most cases at present, it is poor economy to try to get along with farm-grown feeds exclusively.  
Feeds can be mixed in lots of several hundred pounds by shoveling back and forth on a tight floor.  
Improperly ventilated barns are not only harmful to the cows, but often cause odors to get into the milk during the milking process.  
One of the biggest difficulties in balancing up the dairy ration is that most of the feeds are high in carbohydrates and fat but lacking in protein.  
The dairymen who overlooks legumes for his dairy cattle is decreasing his efficiency and increasing his costs in the production of dairy products.

**TONIGHT And Saturday**

If you think you're thrill proof see this mighty snow film!  
**The White Desert**  
Metro Goldwyn Picture  
Here is the greatest snow picture ever made! It is the thrilling story of a love that flowered in the untracked wastes where there is no law!  
If you think you are thrill-proof, see the raging Blizzard that cuts off the world outside—the awful Avalanche that wipes out the camp—the fight for life on the edge of the precipice—the arrival of the rescue train that battles its way through the terrible blizzard.  
These are only a few of the hundreds of thrill that will make you hang on to your seat in suspense.

**The BULL'S EYE**

Editor and General Manager WILL ROGERS

Another "Bull" Durham advertisement by Will Rogers, Ziegfeld Folies and screen star, and leading American humorist. More coming. Watch for them.

The BULL'S EYE is a publication that goes to print. When does it go to print? It goes to print when ever there is something to print. A lot of papers, in fact to be exact, all of them, have a certain time to be issued, regardless of the news. If nothing has happened that day or that week they have to come out just the same. They want you to pay for them whether they are any good to you or not. Why should a paper be printed if there is nothing new to print?

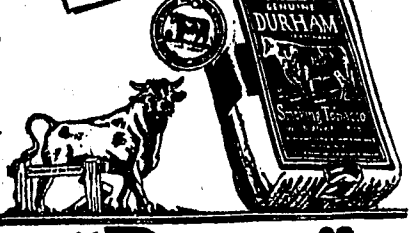

Sing Sing don't electrocute a man at a certain hour every day. They wait until they get a good man and then electrocute him. They don't have a set time or custom, and that is the way the BULL'S EYE is operated. We don't go to press at ten o'clock tonight just because we want to press at ten last night. No, sir! We wait until we have something that is worth while to our myriads of readers. We get them accustomed to the fact that when they see the BULL'S EYE, they say to themselves, "The BULL has seen something worth while," and that is why the Paper is out today. Because it has news for you.

We saw a man smoking a sack of "BULL" DURHAM and he was getting so much satisfaction out of it that we feel it our duty to tell those that never used "BULL" DURHAM just how they too can get satisfaction.

*Will Rogers*

P.S. Remember, you won't see us again until we have something worth while.  
P.P.S. There is going to be another piece in this paper soon. Look for it.

**GLEANINGS**

Roy Humphrey returned yesterday from Wawai where he had employment on a fruit ranch there.

Ross Chapple, at one time principal of the Kendrick High School, now located at Lincoln, Nebraska, was in Kendrick a short time in company with Mrs. Chapple, yesterday afternoon. They were on their way to Culesac to visit friends.

Frank Benseoter of American ridge went to Lewiston, Thursday, for a brief visit.

Jack Bailey went to Lewiston yesterday afternoon to visit his son in the orchard tract.

Mrs. Calista Grinolds left Tuesday evening for Lewiston to visit her daughters. From there she will go to Colfax to attend the graduating exercises of the high school. Her grandson is a member of the senior class.

Mr. and Mrs. Byard Davidson and family of Colton, Wash., were Kendrick visitors Tuesday. Byard was driving a new Buick sedan.

Halvor Nelson of Farmington, Wash., was a Kendrick visitor Tuesday of this week.

Mr. and Mrs. F. A. Varo and baby of Leavenworth, Wash., spent the week end in Kendrick visiting Mrs. Varo's parents, Mr. and Mrs. N. B. Long.

E. H. Dammarell received delivery this week of a beautiful new Chandler sedan. It is the latest model and has everything one could wish in the way of equipment.

James Calkins of Parma, Idaho, was in Kendrick Tuesday morning for a brief visit with his sister, Mrs. Ralph Knepper. Mr. Calkins is in the hardware business at Parma.

Mr. and Mrs. Clarence Dougherty returned home Tuesday evening after spending the winter on the coast and at Boise. They left here early in the winter for the coast and after visiting various points there went to South Idaho where they have relatives. They report a very pleasant trip.

The senior class of the Kendrick high school left Kendrick early Wednesday morning for their annual sneak day. They drove from here to the mouth of Elk Creek, a beautiful picnic spot, where they spent the day. Superintendent Strauch, the class advisor, accompanied the class.

Jim Cain returned to Butte, Mont., the first of the week after spending the week end at the A. W. Perryman home.

D. and Mrs. W. T. Seeley left Wednesday for South Idaho where they were called on account of the illness of Mrs. Seeley's mother.

Mr. and Mrs. R. D. Newton drove to Spokane the first of the week to visit at the home of Mr. Newton's sister for a few days.

W. B. Deobald was a business visitor in Lewiston, Wednesday, this week.

M. O. Raby left the first of the week for Spokane to consult a specialist. His health has not been up to standard for some time.

One good way to get the boys back to the farm, says an exchange, is to convert the farm into a country club. But a better way is to keep the girls on the farm and the boys will never leave.

**Peck Pioneer Day**

F. B. Smith, formerly assistant cashier of the Farmers Bank of Kendrick, now cashier of the State Bank of Peck, writes that the annual Peck Pioneer Day will be held there June 18. Last year this annual celebration was a great success, many people from this locality being in attendance. A number of new features will be added this year.

**Mail Order Clothes**

I got me a suit of the Searbuck brand, they said it was tailored, sewed by hand; they said it was woven of finest wool, couldn't be torn by an angry bull; they said it was fine, would surely last, till Gabriel toothed the final blast. It was 10 cents cheaper than suits I got, from local dealers, who seemed quite hot, shed a bucket of briny tears, when I got my clothes of the Sawbuck Rears. I wore that suit when

the day was damp, it shrunk to the size of a postage stamp; the coat split up, the vest split down, I scared the horses all over town, for the buttons popped, the seams tore, the stitches gave with a sudden roar. I gave that suit to a maiden small, who found it handy to dress her doll. —Walt Mason.

**Horse Sale Thursday**

The horse sale, advertised in this issue of the Gazette, will take place on schedule time next Thursday afternoon. The horses were shipped here from Montana last week and will be put up at public auction. They are young horses and one carload consists of heavy stock while the other is light saddle horses.

**Good Picture at Local Theater**

"The White Desert" which is to be shown at the New Kendrick Theater, tonight and Saturday night, is said to surpass anything ever attempted in the line of thrills and beautiful scenery. This picture was taken in the beautiful Colorado mountains in the winter time and the snow scenes are said to be wonderful. The avalanche pictured in this film, and which sweeps off the side of a mountain taking with it giant trees, rocks, and everything that lies in its path, destroying the village that lies at the foot of the mountain, is without doubt one of the most thrilling scenes ever witnessed.—Ad.

**Wake Up**

There is a time in everyman's education when he arrives at the conviction that envy is ignorance; that imitation is suicide; that he must take himself for better or for worse as his portion; that tho the wide universe is full of good, no kernel of nourishing corn can come to him but thru his toil bestowed on that plot of ground which is given to him to till. The power which resides in him is new in nature, and none but he knows what that is which he can do, or does he know until he has tried.—Ralph Waldo Emerson.

**BEAR RIDGE SCHOOLS CLOSED LAST FRIDAY**

**News Items of Big Bear Ridge**

Misses Mildred Holt, Baack and Lola Halsey have completed their school terms at Fern Hill, Steel and Taney and have returned to their homes at Kendrick, Lewiston and Asotin.

Mr. and Mrs. Gabriel Forest, Mr. and Mrs. Bernheart Nelson were Moscow visitors Wednesday.

Born to Mr. and Mrs. Glenn Hadden at Moscow, April 30th, a 10 pound son. Mrs. Hadden will be remembered here as Miss Ruth Black.

Mrs. Carl Drury of Texas ridge has reorganized her music class and will give piano lessons every week during the summer months.

Miss Ida Carlson of Deary was a week end guest at the home of Miss Helen Slind.

Mrs. Wade Keene and children departed last week for a visit with friends in Spokane and near Portland, Oregon.

Miss Pearl May is visiting her sister, Mrs. Otis Gentry.

Mr. and Mrs. N. E. Ware and daughter, Miss Neva, spent last week end with Mrs. Ware's sister, Mrs. Annie Oylear in Moscow.

Miss Johanna Hooker spent last week with friends in Moscow.

A number from here attend the Lutheran church convention in Troy, Sunday.

**CAMERON PROGRAM WELL ATTENDED**

**News From Cameron District**

The program given at the Cameron school house last Friday evening was well attended and everyone present seemed to enjoy the entertainment. Fred Newman was the lucky one to get the prize in the harmonica contest, it being a fishing pole which is both useful and ornamental.

Rev. an Mrs. Rein and children arrived home from the coast Thursday evening.

Mr. and Mrs. Carl Hartung, Sr., Hannah and August, motored to Lewiston on business Monday.

Mrs. W. R. Johnson returned to her home in Peck, Friday. Miss Viola Gertje left for

Lewiston last Monday to work.

Mr. and Mrs. William Wolf and sons, Warren and Kenneth, spent Sunday at the Carl Hartung home.

Malter Silflow spent Sunday with Albert Brammer.

**Lucky Accident**

Fred Johnson is driving another new car as the result of an accident. While on the way to Lewiston, accompanied by his sister, Albertina and Mrs. Herman Johnson, another car ran into Mr. Johnson's car, totally wrecking it. The occupants escaped with a few minor bruises and scratches, and strangely enough were not cut by the shattered glass. The driver of the other car at once traded in the damaged car and sent the wrecked party on their way in a new car.

**Not a Success**

The former attorney general of Toronto, Canada, testified that the legalized sale of non-intoxicating beer has not been a success in his country, but has served as a disguise for the sale of something stronger. Of course it has not been a success. No law putting any restrictions on liquor will ever be a success with people who have grown up under saloon habits. Any backward step would simply be an entering wedge for hard liquor. The only success is to stand pat as Kansas did until a generation comes on that has not been perverted by the saloon thirst.—Ex.

**Goodbye**

Bill and Joe were separating after an evening together when Bill said "Au revoir." "What's that?" asked Joe. "That's 'goodbye' in French." "Well," said Joe, "Carbolic acid." "What's that?" Bill asked. "That's 'goodbye' in any language."—Ex.

**A Meal in Return**

Victim (to barber who has been careless with his lather)—It's awfully good. You must have lunch with me sometime.—Boston Transcript.

**The Patient Consumer**

The pathetic thing about the consumer is not that he endures what is done to him but often cheers loudly at it.—Ohio State Journal.

**New Method Treating Oats**

A new and promising method for treating oats with concentrated formaldehyde has been used successfully for the last three years at the Idaho experi-

ment station. Prof. C. W. Hungerford, plant pathologist, describes the treatment as follows:

"One part of formaldehyde is used in ten parts of water. The grain is spread out on a clean floor, canvas, or wagon box. As it is shoveled from one pile to another, each shovelful is sprayed with a small quart handsprayer held close to the grain.—Three movements of the handle for each shovelful give

about the right amount. It is used in the proportion of one quart of the solution to five bushels of oats. Grain is covered with sacks or canvas which have been sprayed with the solution and left covered for four hours."

Because formaldehyde acts as an irritant upon the nose and eyes the following precautions

should be observed: (1) Hold the sprayer close to the grain, (2) shovel the seed onto the vapor, (3) work from one side of the pile, and (4) have circulation of air where grain is being treated. The advantage of the new method is that it does not wet the seed and therefore does not cause it to swell. Oats may be treated any time before planting.

**Summer Goods**

Ladies dainty silk underwear of Vests, French Bloomers and Combination Suits of very dainty colors and in all sizes.

Ladies silk gloves of the new novelty pattern of sterling quality, and they are priced at **\$1.10 and \$1.50**

When you buy John Deere implements you are sure of prompt repair service throughout their long life

**Its Easy Pull Will Convince You**

When you see the Light Running New John Deere in the field, you will be surprised and pleased with its light pull and steady work. You will be convinced that the binder you buy will be

**The Light Running New John Deere**

The use of roller- and ball-bearings at all main friction points, together with improvements in design, make this the lightest running binder ever built.

The oiling system has been greatly improved—there are fewer oil holes and each one is easy to reach and of large size—it is much easier to oil than other binders and you don't have to oil it as often.

We want to show you this better binder and explain its many real improvements. Drop in and see us the next time you are in town.

**Carlson Hardware Co.**
