THE OFFICIAL PAPER OF LATAH COUNTY

VOLUME 36

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, JUNE 18, 1926

NUMBER 25

Schupfer-Hedlar

On Sunday evening June 6th, Miss Fanny Schupfer of Juliaetta, was quietly married to Mr. Mike Hedlar of Fix ridge and recently of Juliaetta.

The ceremony took place at the home of the bride and was performed by Rev. E. A. Rein of Cameron in the presence of the bride's parents, and Mr. and Mrs. Chas. Noble, sister and brother-in-law of the bride, who acted as witnesses.

Master Charles and Miss Susie Noble and the Rein family were also present.

After the ceremony refreshments of ice cream and cake were served.

While the marriage was kept a secret for nearly two weeks, it did not come as a surprise to the many friends of the young people. Several weeks ago the fact was published that a license was issued to them and friends surmised that the wedding had taken place immediately.

Mr. and Mrs. Hedlar will make their home in Juliaetta, where Mr. Hedlar is located in business.

Entertain at "500"

Wednesday evening Mr. and Mrs. L. J. Herres entertained at four tables of "500", in compliment to their house guests, Mr. and Mrs. Peter Herres of Detroit, Mich. Lights of shaded rose, combined with bowls of pink roses furnished the tasteful decorations. After several hours at cards the high scores were awarded Mrs. Newton and Mr. Knepper, with the clever consolations to Mrs. Seeley and Mr. Wilmot. Mrs. Seeley received an egg bearing this inscription: "It just breaks me all up to be beaten", while Mr. Wilmot received a box of "Pep."

Dainty refreshments of ice cream and assorted cakes were served at the card tables.

The guests bidden were: Messrs. and Mesdames Peter Herres, H. Thomas, Newton, A. Long, Knepper, and Messrs. Wilmot and McGregor.

Invents Tractor Cultivator

Wm. Behrens of Leland has invented a cultivator for his Cletrac tractor that he says enables him to cultivate six times as many beans in a day as an ordinary two-horse cultivator can be made to accomplish. The cultivator takes four rows at a time and the tractor travels at a speed of 3 to 4 miles per hour, covering practically 50 acres a day.

Mr. Behrens has made this cultivator himself. It is pushed ahead of the tractor and in this way the operator can see what he is doing. He has tried the new invention on his own place and says it works in a most satisfactory manner.

He is also working on a bean cutter to attach to his tractor which will cut and rake four rows at one operation.

Mr. Behrens will be glad to have anyone interested to see the cultivator at work on his farm at any time during the next few weeks.

More Auto Accidents

Charles W. Johnson of Lewiston and Charles Moore of St. Maries were killed Sunday night when their car went over the bank into Orofino creek between Orofino and Pierce City. The accident happened about 11 o'clock at night. Both men died instantly, their necks being broken when the car overturned. The bodies were found under the car in about two feet of water.

Wednesday afternoon Ivan Bershaw, 6 year old son of Mr. and Mrs. Eugene Bershaw of Lewiston, was instantly killed at Uniontown when an auto struck him while he was crossing the street. There was a large crowd in town attending the stock show and the streets were badly congested. It is said the driver of the car was blameless in the matter.

Recital Next Wednesday

The pupils of Mrs. Robert Brown will give a recital, followed by an operetta, Wednesday evening, June 23, at the New Kendrick Theater. The recital will start promptly at 8 o'clock. The operetta entitled "The Golden Whistle" will be put on by 20 young people. A nominal charge will be made to defray expenses.

NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

Will Locate New Grade

Ole Lien, of lower Bear Ridge, was in town last Friday visiting relatives. Mr. Lien is one of the commissioners of the Kendrick Highway District and is much interested in the improvement of our roads. He states that Engineer Van Arsdol has been employed to survey a practicable road from Kendrick toward Deary. The whole matter will be turned over to Mr. Van Arsdol with instructions to look the ground over thoroughly and then run out a line that will be the most feasible to build. Grading from Arrow Junction to the Latah county line has been completed and it is stated that this road is one of the finest canyon highways that can be found. The proposed road north from Kendrick will give this section a water grade to Lewiston.—Deary Press.

Wrote Prize Story

Miss Claire Bennett, a sophomore in our local high school took first prize for the state of Idaho in the third national meat story contest, according to announcement made by the National Live Stock and Meat Board at Chicago. Miss Bennett's story was entitled "The Story of Beef." This speaks well for Troy and the Troy schools as Miss Bennett placed seventh for the Western district of the United States. There were more than ten thousand contestants.—Troy News.

Heavy June Rainfall

Twenty-four hour's rainfall Monday brought a greater precipitation than normally occurs during the entire month of June, according to the measurements made by L. F. Burkhardt, co-operative weather observer here. During the period 1.35 inches fell, while the normal June fall is only 1.32 inches.

A total of .73 inches fell up to noon Monday, and with the drizzle increasing toward the middle of the afternoon, the total mounted to 1.35 inches shortly before midnight, when it ceased.

The fall Monday was one of the heaviest during a 24-hour period on record here during the past year, and as far as reports received from the Associated Press, the heaviest of any district in the northwest visited by the storm. Spokane had only .03 inches up to Monday afternoon compared to nearly three-quarters of an inch here, half an inch in Lewiston, and lesser amounts at other Palouse towns.—Star-Mirror.

Found Buried Treasure

Wm. Deobald uncovered buried treasure last Tuesday morning while digging a ditch for a gasoline pipeline near the rear corner of the garage building. The treasure was buried a few inches under the ground and had evidently been put there several years ago by some one who had robbed a store somewhere in this vicinity. The treasure consisted of several watches, watch chains, spectacle chains and other jewelry specialties. The whole lot in its present state of decomposition is worth probably 15c.

Mrs. E. E. Bechtol of Moscow visited at the home of her mother, Mrs. M. A. Deobald, on American ridge the first of the week.

MRS. HOOVER TURNS BRICKLAYER

Mrs. Herbert Hoover, wife of the Secretary of Commerce in President Coolidge's cabinet, is shown laying the cornerstone for the model home being erected by Better Homes in America organization at the Sesqui-Centennial International Exposition, in Philadelphia, June 1 to December 1 to celebrate 150 years of American Independence. Opposite Mrs. Hoover stands Mrs. Vance McCormick of Harrisburg. The Girl Scouts grouped around the women will operate the house.

Won Pontiac Car

John and Kester Dammarrell won the Pontiac car which was fifth prize in the Spokane Chronicle subscription contest which closed recently. The announcement of the winners was made last Saturday in the Chronicle. The Pontiac coach regularly retails at \$995. John and Kester were ably assisted during the contest by their wives. Their many friends are delighted at their success.

Withdrawn From Race

Mark Means, former commissioner of agriculture, announced the first of the week that he would not be a candidate for governor on the republican ticket. On account of the ill health of his wife it will be necessary for him to be out of the state for the ensuing year. His withdrawal now leaves the race between M. A. Kiger of Harrison and Lieutenant Governor Baldrige of Parma.

Culdesac Wins

Kendrick lost to Culdesac last Sunday by a score of 12 to 8. A return game will be played here Sunday afternoon.

The Dog

Heard a man say the other day that he had "worked like a dog." Did any one ever see a dog work particularly hard? His wife said she had been "sick as a dog." Do dogs get sicker than folks do? Then the man's son contended that he was "leading a dog's life." He came nearest the truth, for he was in the habit of lying around doing little but scratching himself. To call a man a "sad dog" is to give the impression that he is a rather jolly fellow who is living somewhat fast. This he considers a compliment. But just try calling him a "dirty dog" if you want to insult him. The dog is man's most faithful friend and of all the beasts he is the one best loved by men. Why then should he so often be taken as a symbol of that which is to be despised?—Ex.

Forgot The Dressing

In a Kansas town they had a fancy dress ball in connection with a pure food show. One woman represented a salad but the police sent her home. She had forgotten the dressing.—Ex.

Ralph Fenton is Married

The following account of the wedding of Ralph Fenton, nephew of A. E. Wilcox, and a former resident of Whiskey creek country, is taken from the Forest Hills-Kew Gardens Post of Long Island:

"One of the most beautiful weddings of the season was solemnized at the Church-in-the-Gardens on Monday evening when Miss Ellen Robinson, daughter of Mr. and Mrs. Harry Hunt Robinson, of the Tennis Apartments, was married to Mr. Ralph Hubert Fenton, also of Forest Hills. The Reverend Albert Sheppard, of the First Presbyterian Church, officiated. The church was attractively decorated with palms and hydrangeas."

Ralph Fenton is a nephew of A. E. Wilcox and a brother of Richard Fenton of Sunnyside, Wash. He is the son of Mr. and Mrs. Edward Fenton, who lived here about twenty years ago. Mr. Fenton is bond salesman for S. W. Strauss & Co., N. Y. C. and after his discharge from the war he was employed in the Fifth Avenue branch of the Guarantee Trust Co. of N. Y.

Mr. Fenton made his home with A. E. Wilcox at Kendrick and attended school there. He acquired his early business training in the N. P. office with his uncle, A. E. Wilcox.—Clearwater Tribune.

As Father Sermonized

John and George, two sons of a Baptist minister, after listening to one of their father's sermons, decided that they must baptize their family of cats.

The kittens made no objection. One by one they were put in a big tub of water.

But when it came to the mother cat, she rebelled and fought and scratched until at last John remarked:

"Just sprinkle her, George, and let her go to h—ll!"—Baptist Young Peoples' Union.

An Englishman died and in his will left a request that each of three good friends deposit \$500 in his coffin before it was finally sealed. They did so. An Irishman deposited \$500 in gold, a Welchman \$500 in currency and a Scotchman took out the \$1,000 and left his check for \$1,500. A few days later the Scotchman was surprised to find that his check had been cashed. The undertaker was a Jew.

Returns From California

Mrs. D. Ziglar of Fairview community returned home last week from Los Angeles, Cal., where she spent the winter with her son, F. J. Eller. She left Los Angeles June 3 and took the coast trip by stage as far as Portland. Mrs. Ziglar says she likes California very much but was glad to see Potlatch soil again.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mrs. Hugdahl and sister, Mrs. Gehre of Sildex, Montana, are here visiting with relatives this week.

Roy Southwick and wife, Howard Southwick and family and Grandma Thornton went to Frazer, Saturday, to visit at the Owen Thornton home, returning home Sunday evening.

Jake Berriman and family spent Sunday with his father, Wm. Berriman and wife.

Mr. and Mrs. Fred Whiting and children spent Sunday at the home of Clarence Hewitt.

Mrs. Hatley of Pomeroy spent a few days of last week with her sister, Mrs. Nels Longteig. Cards are out announcing the marriage of Miss Effie Shelby of Moscow to Mr. Edwin Joyce of Moscow, last Tuesday, June the 8th. Mrs. Joyce is the daughter of Mrs. George Jones of Elk River and she spent several years in Southwick where she has many friends, who wish her many years of happiness.

Roy Blankenship and family spent Sunday at the home of John Hewitt.

Mr. and Mrs. Fred Weyen visited at the home of Russell Rodgers, Sunday.

Ray Blankenship and family spent Sunday with the Harland Hewitt family.

John Phillips and Clarence Hewitt went to Lewiston last Thursday, returning home Saturday. Clyde Hewitt and Cecil Phillips, who have been picking cherries in Lewiston returned home with them.

Miss Minnie Bunker and her brother, Wayne, left for Tacoma last Thursday to spend a couple of months with their sister, Mrs. Sherman Worth.

Mr. Hendricks and wife of Tekoa visited with his sister, Mrs. Harland Hewitt last week.

Miss Dollie Jones of Elk River and Mr. Mahaffy were married at Elk River last Friday, June 12th. Mrs. Mahaffy is the daughter of Mr. and Mrs. Geo. Jones. Her many friends of Southwick and vicinity wish them a long and happy life.

The Sunday school picnic which was held last Sunday was largely attended. The Sunday school of Cream ridge attended and helped with the program. At noon luncheon was spread after which Rev. Calvert delivered a sermon to the crowd. A good time was reported.

The rain which fell the first of the week was greatly appreciated by all the farmers, as it was badly needed.

Mr. and Mrs. Fairley returned last Wednesday from Lewiston where they spent the past two weeks.

The families of Grant and Walter Bateman and mother, Mrs. Flora Bateman enjoyed a picnic in the woods last Sunday.

Mr. and Mrs. Zoel Fairley spent Sunday with relatives in Leland.

Mrs. John McIver went to Leland last Wednesday, where she was the guest of Mrs. Harry Smith, returning home Saturday evening.

Cavendish Will Celebrate

Advertising posters were printed at the Gazette office this week for the big celebration to be held at Cavendish, Monday, July 5th. The celebration will be held in the grove as usual. A good program of sports and entertainment has been outlined for the day, including ball game, patriotic program, racing, dancing and other sports.

Big Bear Ridge

Mr. and Mrs. James S. Nelson were recently visiting Mrs. Nelson's sister, Mrs. D. Stevens, who is still seriously ill at the home of her sister in Spokane.

The O. E. MacPherson and R. H. Ramey families of Kendrick were Sunday guests at the N. E. Ware home.

Miss Mildred Kleth is visiting her sister, Mrs. J. C. Bowers in Lewiston.

Nels Nelson and children of Little Bear ridge spent Sunday at the home of his brother, Anton Nelson.

Miss Emelia Askvik returned to Spokane last week having spent the past two months at the home of Mrs. Carrie Hooker.

Miss Agnes Jones has gone to Lewiston to enter the summer term of the State Normal.

Mrs. A. Kleth entertained the Lutheran Ladies Aid at her home Thursday afternoon.

The Lutheran Ladies Aid will give their basket and ice cream social Saturday evening, June 19, at the Community hall.

W. R. Johnston, Union Sunday School Missionary, of Lewiston, conducted Bible school for the younger children at the U. B. church last week. A large attendance was had and great interest was shown by the entire class.

An interesting Childrens Day program was given at the U. B. church, Sunday morning, following Union Sunday school.

Mrs. Mary Halseth is spending the week with her son, Pete and family near Deary.

Miss Opal Jones has gone to American ridge to spend some time with Mrs. Frank Benscoter. Mrs. E. H. Dammarrell of Kendrick spent last week with her daughter, Mrs. Philip Asplund.

The million-dollar rain was welcomed by the farmers throughout the entire Potlatch country. A large acreage of beans has just been planted and the spring sown grain was also in need of moisture, so we all agree that taken as a whole, the Potlatch country and soil is hard to beat.

Mr. and Mrs. Hollingsworth of Clarkston were recently visiting friends here. Mrs. Hollingsworth is well known here as Mrs. Flora Harrison.

A union Sunday school program was given for Childrens Day, last Sunday at the U. B. church, as follows:

Open Door for the Children, Audience.

Child's Prayer, Instrumental, by Audrey Clemenhagen

Recitation: "Welcome" by Fern Bramblett.

Song by the school.

Recitation by Billy and Udell Bailey

Motion Exercise, Seven children

Recitation Ronald Ingle Solo, Lizzie Jones Exercise, Johnny Jones, Everett and Lyle Bramblett.

Recitation Gail Ingle Solo, Audrey Clemenhagen Motion Song, Ten children

Fishing Party Returns

A fishing party composed of Ben Callison and son, Norla, Ernest Roberts and Harry Ameling returned Wednesday evening from a trip to the Bungalow on the North Fork of the Clearwater. They brought some fine trout home with them but report the fishing rather below par, as the recent rains brought the river up too high for good fishing.

Will Surface Link

It is reported that at a meeting of the commissioners of Good Road District No. 2, held last Saturday, at Juliaetta, it was decided to surface the short stretch of road near the Latah county line. Seven inches of crushed rock will be put on. This is the short link that connects up the surfaced road below Juliaetta with the highway work being done by the Lewiston district.

Troy boosters were in Kendrick yesterday morning billing the town for the celebration to be held in Troy July 2 and 3.

THE KENDRICK GAZETTE
"The Pulse of The Potlatch"

Published every Friday at Kendrick, Idaho, by Ralph B. Knepper
Subscription Price - \$1.50
Entered at the Post Office at Kendrick as second class mail matter.

Cameron News

Sunday dinner guests at the Frank Wilken home were: Mr. and Mrs. Lundt and son, Clifford of Genesee, Mr. and Mrs. George Wilken and son, Kenneth; Alfred Becker and Mr. and Mrs. Chas. Schultz and family.

Mr. and Mrs. George Wilken and son, Kenneth; Alfred Becker and Mrs. Herman Wilken, Sr. visited at the Jeff Buckles home Sunday afternoon. They went after cherries.

Albert Brammer, Walter and Eddie Wegner motored to Portland, Thursday evening. They will return Tuesday or Wednesday.

Mrs. Gustav Kruger, Mr. and Mrs. Aug. O. Wegner and family, Mr. and Mrs. A. H. Blum and daughter, Laura; Miss Esther Gardner, Mr. and Mrs. Fred Silflow and family, Mr. and Mrs. Otto Silflow and sons, motored to Princeton, Sunday, to visit Gus Blum and Herman and Paul Silflow.

Erick Becker and Walter Silflow went to Lewiston Saturday.

Mrs. Fred Newman returned home Sunday from Spokane. Complications set in from having a tooth pulled and were very serious. We all hope she will recover rapidly. As soon as she is well the Cameron home talent play will be given at the New Kendrick Theater.

Mrs. Carl L. Wegner was on the sick list this week.

Mrs. F. A. Wilken spent Tuesday afternoon with Mrs. George Wilken.

(Too late for last week)
Mrs. A. E. Carper and son, Jimmie; Mrs. George Schultz and son, Robert, left for their homes in Spokane, Tuesday.

Bill Wilken left for his home in Walla Walla, Wash., recently. Mr. and Mrs. George Wilken and son, Kenneth; Mr. and Mrs. Herman Wilken, Sr. motored to Lewiston, Friday.

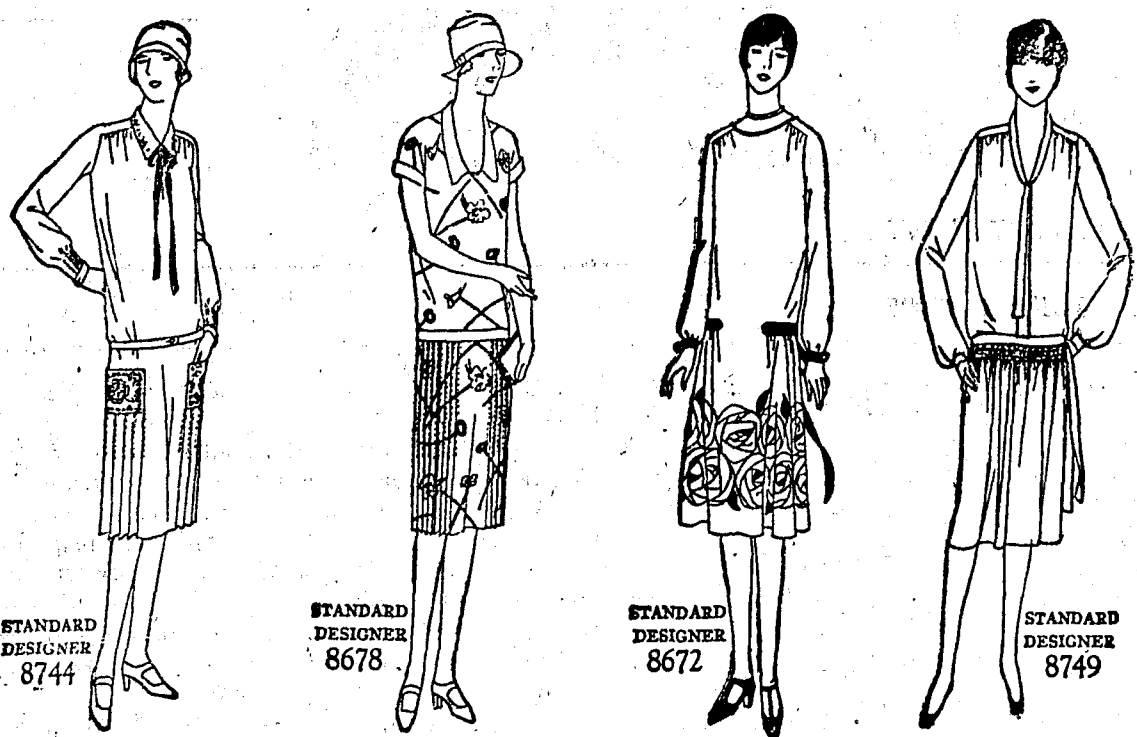

Hot Springs Froze

Lady (to guide in Yellowstone Park): "Do these hot springs ever freeze over?" Guide: "Oh yes. Once last winter a lady stepped through the ice here and burned her foot."

Moscow, Idaho

Crescent Clippings

Sunday guests at the Robeson home were: Mr. and Mrs. Ezra Follet and children of Orofino, Mr. and Mrs. Art Anderson and sons of Agatha, Mr. and Mrs. O. Craig and daughters and Mr. and Mrs. Ralph Robeson of Leland, Mr. and Mrs. Vester Evans and son and Fay Abrams of Texas ridge. Jim and Zeb Robeson returned home also Sunday after helping in the haying around Agatha for the past two weeks.

John Darby left Saturday for Spokane. He will visit relatives there and in Couer 'd Alene a few days before returning with his Ford truck—the main object of the trip.

The fine rains the first of the week, caused the farmers hereabouts to wear extra large grins. Mr. Freburg and Mr. Cummings are staying at the Axel Ekman home now, and cutting cedar poles.

(Too late for last week)
Mrs. I. T. Kimbley and children visited at the Wm. Dorendorf home, Sunday.

Mr. and Mrs. George Souders spent Sunday at the Frank Souders home.

Mrs. Louise Taylor and children and Dick Cuddy were Sunday visitors at the A. Cuddy home.

Walter and Wm. Dorendorf helped Gus Farrington do some sawing at his mill in Lindeh this week.

Mr. and Mrs. Mike Forest and children and Walter and Adaline Dorendorf had fine luck fishing at Three Bear, Sunday.

"The Ten Commandments" Here Tonight and Saturday.

The people of Kendrick and surrounding communities will have the opportunity, tonight and Saturday, of witnessing the greatest motion picture in the world, "The Ten Commandments" which plays two days only at the New Kendrick Theater.

This is a picture that every man, woman and child should see, as great good can be derived from it. It is truly a marvelous piece of photography as well as a very interesting story.

Much of this picture is in natural colors and that surpasses anything ever attempted in this line for beauty and realism.

It is praised by leaders of every religious organization of the United States and Canada as being one of the finest productions ever brought to the screen.

Stony Point Items

Everybody happy and smiling because of the nice rain the first of the week.

John Scott and family of Spokane spent last week visiting at the Will Schetzle home. Mr. Scott is a brother of Mrs. Wm. Schetzle.

Will Heimgartner helped Albert Heimgartner haul alfalfa hay last week.

Bill Zumhofs made a business trip to the Ralph Corkill home near Leland, Tuesday.

Mrs. Jake Eckman and daughter, Mrs. Frazer of Asotin, Wash. visited last week at the Lloyd Eckman home. They were accompanied home by Lester and Lawrence Eckman, who will stay awhile with their grandparents, Mr. and Mrs. Jake Eckman.

Mr. and Mrs. George Dygert and family and Clarence Dygert spent Sunday with friends in

Clarkston.

Harvey Fairfield visits in our locality quite often lately. There seems to be something attracting him greatly.

Bessie Zumhofs spent Tuesday with Lillie Heimgartner, Virgil Baldwin of Clarkston is working for Dygert Bros.

METHODIST CHURCH NOTICE

Ball Bearings in a Cream Separator are as Necessary as Jewels in a Fine Watch? Demand this Proved Feature in Your New Cream Separator.

See This Machine - Turn It - Skim With It - Then You'll Know Why We Sell So Many!

WHEN Chas. Gall, Primrose owner of Garner, Ia., said, "I would rather pay the price for a Primrose than to have any of the other makes, even though they were given to me," he spoke out of experience. Once you see and try the McCormick-Deering Primrose you'll probably feel the same way about it. You can't get around the fact that old-fashioned "rub"

bearings are inadequate for the high-speed parts of a cream separator. Several years ago Primrose engineers discarded them and gave dairymen a separator running on friction-free ball bearings. The tremendous growth of Primrose popularity proves positively that dairymen appreciate this improved design.

Say the word and we'll stop at your farm and show you the easiest-turning, closest-skimming cream separator you ever saw. No obligation. Just call us on the phone.

The DAIRY

COWS ON PASTURE NEED SOME GRAIN

Farmers feeding dairy cows during the spring and summer should be sure to use plenty of properly mixed grain feeds with the legumes or grasses to get best and cheapest milk returns, according to the national dairy council. Leading college dairymen have made a study of this important problem, and agree that dairy cows cannot possibly consume enough grass to maintain milk flow and their body requirements, too.

"Cows can't make milk on air and water," writes Prof. A. R. Merrill, dairy specialist of the Connecticut experiment station. "They need some feed. Pasture grass is one of the best forms of succulent green feed that we have, but as a rule there is not enough of it. Cows that are dependent on pasture alone cannot get the amount of feed they need. When we stop to consider that the average cow needs 100 to 150 pounds of pasture grass per day for maintenance and production, we can easily see why it is necessary to furnish some additional feed."

"The feeding of grain on pasture is so important," states Prof. E. L. Savage of Cornell university in Dairy-men's League News, "That I am going to take the time and space to emphasize it again. A mixed grain feed containing 17.5 per cent to 20 per cent protein should be fed on pasture."

For farmers who do not raise sufficient grains, there are many balanced ration feeds on the market, use of which will bring profit in increased milk flow. Most of them contain corn, oat and wheat products and other grain raised cheaply in the corn belt states. These eventually find their way into the enormous milk supply of cities such as New York, Philadelphia or Boston, according to the National Dairy Council. Dairymen in New York use large amounts of feed produced in the West, and have learned that they cannot produce milk profitably and maintain their herds without adding a grain ration to spring and summer pastures.

Big Value of Soy Beans for Production of Milk

In some of the recent experiments reported from the South Dakota experiment station, ground soy beans were found to be similar in effect in the ration to linseed meal, and of somewhat greater value for milk production. Soy-bean hay was found to be more valuable for milk production than alfalfa hay. The ground soy beans do not appear to have any effect on the quality of butter when fed in reasonable quantities, although with some cows they tended to increase the percentage of butter fat. Since the development of oil factories in Illinois, the feeding of soy bean cake from which the oil has been extracted is likely to be considered more practicable than the feeding of the whole ground soy bean.

Dairy Houses Separate From Other Structures

Every farm should have a suitable place in which to handle and care for milk. Milk ordinances and sanitary regulations of boards of health in many communities require that milk houses or spring houses be part of the regular dairy equipment. Milk or dairy houses separate from other buildings give the best satisfaction. Extension Circular 107, which tells how to build them, will be mailed free by the Pennsylvania State college, if you send your request to the agricultural publications office of that institution at State College, Pa.

Grain for Cows on Grass

Many feeders fail to observe that cattle are not receiving an adequate ration when running on pasture. Even those who do comprehend that the pasture is too short, often fail to supply extra feed because it is not prepared and the pressure of the season's work causes them to neglect their cows. It would seem that when the pastures are dry, the weather hot, and flies pestering the cows, silage supplemented with some good legume hay is quite as essential as it is in the dead of winter.

Substitutes for Calves

While milk is the natural and the best food for calves, good ones can be raised on milk substitutes, especially if whole milk is fed for a few days and the calves are then gradually shifted over to the substitute during several weeks—that is given a little less milk each day with it. Even when plenty of skim milk is fed, these commercial meals are very good as the grain ration that a skim milk calf should always have.

Feed for the Heifer

From weaning time until freshening time, dairy heifers require little grain if they have available plenty of alfalfa or other legume hay and good silage. To assist in the development of the foetus and to get them in good condition for calving, heifers should be given some grain for three or four months before freshening and rather a generous grain ration the last six or eight weeks. Of course, the grain ration should be reduced the last ten days of the gestation period.

Plans to Increase Soil Productivity

Crop Rotation as Good as Manure and Fertilizers.

(Prepared by the United States Department of Agriculture.)

In the practice of crop rotation a farmer has at his command a means whereby he can materially reduce acre costs or increase the output of his land, says W. W. Weir, associate soil technologist of the United States Department of Agriculture. Perhaps that fact is not news to many farmers who have been using rotation in their crop system; they know it is a beneficial practice.

They may be surprised, however, says Mr. Weir, to learn that crop rotation is nearly as effective in increasing soil productivity as the use of manure and commercial fertilizers. Furthermore, crop rotation can be practiced usually with no outlay of money, whereas the use of commercial fertilizers requires an expenditure of money.

A study of the long-continued soil fertility experiments of this country and of England, made by the Department of Agriculture, has brought out some important facts about crop rotation in its relation to soil productivity. In general, says Mr. Weir, they show that rotation without the use of manure or commercial fertilizers is nearly as efficient in effecting crop increases as the use of fertilizers without rotation. The beneficial effects of crop rotation are different from the benefits derived from the use of fertilizers; so that when these two farm practices are combined the one practice adds to the benefits of the other, making the resultant increase almost twice that secured by either practice used alone.

On soils long under cultivation highest yields are possible only when rotation and the use of fertilizers are practiced together.

Dairy Cow Has Financed Farmers When Needed

Farmers realized nearly as much from dairy cows during 1925 as from their corn and wheat crops combined, according to figures issued by the National Dairy Council.

According to careful estimates based on investigation, the farm value of all dairy products for the year 1925, is \$2,700,000,000. This is only about \$200,000,000 less than the total farm value of wheat and corn, the government estimate of the combined farm value of the latter being \$2,904,269,000.

"But the important fact," states M. D. Munn, president of the National Dairy Council, "is that American farmers have marketed their dairy products day by day throughout the year without any accumulated surplus on their hands and have thus received funds with which they have been able to live and help finance their other farm operations, while they still have much of their corn and wheat on hand."

"This vast sum of nearly two and three-fourths billions has financed diversified farming in this country and relieved agriculture from what would otherwise have been insurmountable difficulties, especially in view of the accumulated surplus of grains together with the low prices that now prevail. In addition to the cash return to the farmer through the dairy cow he has also been supplied with dairy products for his own family use, which have materially assisted in reducing living expenses."

Sweet Clover Requires Firm, Moist Seed Bed

Sweet clover seed, being very small, should be planted shallow. In order that it may grow when planted shallow, the soil must be quite firm and full of moisture. Perhaps most of the failures with sweet clover are due to plowing, or otherwise loosening up the seed bed before planting the crop in the spring. Early spring plowing loosens and permits the top soil to dry out and so prevent a good stand of sweet clover.

Land to be planted to this crop should be fall plowed, or, even better, summer followed the year preceding. Where such land is not available, cornstalk land, millet or cane land is suitable, giving it only a light disking as preparation before seeding sweet clover. As much of the stubble as possible should be left standing to catch snow and prevent soil blowing.

Sweet clover should be planted as early in the spring as possible. Use eight to ten pounds of clean, scarified seed per acre. Where possible, drill in the seed, planting at the depth of one inch. Where one cannot drill so shallow, he should broadcast and harrow in the seed. No nurse crop should be used.—Waldo Kidder, Extension Agronomist, Colorado College of Agriculture.

Hens Used for Hatching Purposes Need Dusting

All hens used for egg-hatching purposes should be dusted with a good louse powder when they are placed on the eggs. The only preparation known to kill lice with one application is sodium fluoride. Put a piece of sod in the bottom of the nest to prevent excessive evaporation. Set two hens at a time so that the chicks may be given to one hen later. Feed cracked or whole grains to the hiddies, being careful to avoid feeds that stimulate egg production or cause digestive disorders, say poultry extension specialists of the Pennsylvania State college.

Tonight and Saturday

The World's Greatest Picture

"THE TEN Commandments"

Some books are read, and then thrown away. Some pictures are seen, and then forgotten. But "The Ten Commandments" has a theme so great, a sweep so large, and is so elaborately produced that it is one of the small group of motion pictures which will never die. It is a mammoth picture with an eternal message. It is the greatest sermon ever preached. It has the endorsement of every religious organization. It is God's own word brought to life. No man, woman or child can witness this picture without deriving great good from it. Don't fail to see it. It's an opportunity that comes once in a life time and you owe it to yourself to see this play.

A large part of this picture is in natural colors and is truly a marvelous piece of photography.

POULTRY

WASHED EGGS ARE BEST IN HATCHING

That the old-fashioned practice of regularly turning eggs that are being accumulated for setting apparently has very little effect upon the hatchability of the eggs has been demonstrated by experiments at South Dakota State college, according to G. L. Stevenson, head of the department of poultry husbandry. Experiments have also demonstrated the importance of using only clean eggs for hatching, and that even if clean eggs are used they should not be held more than ten or twelve days before being set.

These results were obtained in an experiment carried on for the first time last spring. The experiments were made to test out the old theory that the eggs saved to set had to be turned each day.

In the tests to determine how long eggs could be held for setting, Stevenson found that those not more than twelve days old hatched about equally well. Some eggs held even as long as

eighteen days, hatched chicks, but in most cases those held longer than twelve days did not do well. In fact, the longer they were held past the twelve-day maximum, the lower the percentage recorded.

Professor Stevenson also tried the hatching quality of clean eggs, washed with water, and dirty eggs. The clean eggs hatched much better than the others. Washing the eggs seemed to fill the pores of the shell, thereby preventing air from entering. Slightly dirty eggs hatched fairly well, but those covered with manure or broken egg yolk were not in condition for air to penetrate through the shell and did not hatch well.

Just wiping eggs without really washing them may be all right, but clean eggs do best.

Feeding Cod Liver Oil to Quite Young Chicks

Cod liver oil may be fed to young chicks in the amount of 1 per cent of the mash, or one pint of oil to each 100 pounds of mash, and given until they are from four to six weeks of age, when, if they are out upon a grass range, they will not need it longer. It may be fed, however, as long as the poultryman desires. If you desire to mix the oil with the mash in small quantities, you can follow the Cornell rule, viz.: two teaspoonfuls of oil daily to each 100 chicks. In-

creasing the amount by one teaspoonful each two weeks until four teaspoonfuls are given, and feeding it up to six or eight weeks. If large quantities of mash are to be prepared, the oil may be sprinkled or sprayed upon it while it is spread upon the floor. In small quantities, the oil may be mixed with a little of the mash by hand, and this may then be distributed through the entire amount that it is desired to use. As the oil loses something of its value upon standing, it is best not to prepare the mash for more than a few days ahead. The crude-pressed Norwegian product is best for this use.

Three Important Items in Production of Eggs

A good ration can do but three things—first, build up and replace worn-down tissues of the hen's body; second, furnish the body with heat and energy; and third, manufacture eggs.

No ration can make a hen lay that is naturally unfit or poorly developed for laying. Immature or sickly birds cannot be made to produce eggs by simply giving them an egg-producing ration. First of all, the body and health of the fowl must be in the proper condition. Then, with care and proper food, best results will be obtained; but good care and proper feeding will not make a naturally poor layer a high producer. This is a ques-

tion of breeding and not one of feeding. These three things are of equal importance in the production of eggs—the breeding of the hen, ration of the hen, and the care of the hen. Two poultrymen may get entirely different results from the same flock and with the same ration. It is a question of their care and skill in feeding the birds and in keeping them comfortable and contented.

Fowls Need Grit

The baby chick is, at its best, a very stupid little thing and, if allowed to wander away from the brooder, will huddle up in a corner away from the heat. Some will then be smothered in their desire to crowd together and keep warm. A fence around the brooder will keep them close to the heat. One side of this may be opened to let them get at the mash hopper. Then when their feeding time is over, drive them in near the brooder and shut them in.

Look around over your farm and see if you haven't a number of article that are useless to you. Maybe some other Poultryman wants to buy them. Let the world know by putting a three or four line ad in the Gazette. These local ads sell stuff every week. 8-1

Balance Ration of Cows to Need of Individual

Because feed prices are lower than last year and butterfat prices somewhat higher, many dairymen are feeding more grain and purchased feeds than a year ago. Dairy division men at University Farm, St. Paul, Minn., say that the grain ration gives best results when fed according to the individual milk production of the cow. When a good grade of roughage is available—and the cows should have all they can clean up—one pound of grain to each three to four pounds of milk produced will be sufficient. In a ration without clover or alfalfa hay, goodly quantities of feed rich in protein, such as linseed meal, cottonseed meal or bran, must be added in order to balance the ration to the needs of the animal.

Great Activity of Associations

Render Some Essential Service Connected With Farmers' Enterprises.

(Prepared by the United States Department of Agriculture.)
There are now more than 12,000 active farmers' business organizations in the United States, the Department of Agriculture estimates on the basis of a recent survey. This number is more than twice that in 1915, when the first national-wide survey of co-operative associations was made by the department.

Included in Associations. The associations include those selling farm products, buying farm supplies, operating creameries, cheese factories, canning plants, grain elevators, stockyards, warehouses, or rendering some one or more of the essential services connected with the conduct of farmers' enterprises. The figures do not include farmers' co-operative banks, credit associations, nor insurance companies.

Fifty-four of the associations listed are federations with local units, 49 are sales agencies operating in central markets, 35 are bargaining associations, and 98 are large-scale organizations of the centralized type. Of the total number of associations listed by the department, 3,325 are primarily engaged in marketing grain, 2,197 handle dairy products, 1,770 ship live stock, 1,250 market fruits and vegetables, 121 perform various functions in the marketing of cotton, 91 in marketing wool, 71 in marketing poultry or poultry products, and 24 in marketing tobacco.

In North Central States. More than 70 per cent of all the associations are in the 12 North Central states. Approximately 6 per cent are in the three Pacific Coast states, and less than 3 per cent in the six New England states. The largest number of associations reporting from any one state is 1,383 from Minnesota. Iowa is credited with 1,094 associations, Wisconsin 1,092, and Illinois 822. Missouri has 537 associations; Nebraska, 488; Kansas, 466; California, 350, and New York, 286.

The grain marketing associations are largely in the 12 North Central states, as are also the greater number of the live-stock shipping associations. The organizations engaged in marketing dairy products are scattered through the country with a fair percentage of the total number in Minnesota and Wisconsin.

Possibilities Open for Farm Storage of Grain

The farmer has the choice of three places for storing his grain in order to hold it for a favorable market. It is explained by L. F. Ricey, grain marketing specialist of the college of agriculture, University of Illinois. These three places are: (1) in cribs or granaries on his own farm, (2) elevators or cribs at his shipping point, or

(3) at the terminal elevators. In order to hold his grain, it is often necessary for the farmer to borrow money upon it as collateral.

When it is in public elevators at the terminal markets he can readily borrow on the warehouse certificates, but the cost of such storage is rather high. Storage in the local elevator has advantages, but these houses are not large enough to actually store; very much grain and many elevators refuse this class of business or limit the time of storage to a comparatively short period.

Farm cattle and granaries offer the cheapest storage for grain crops and this method has several other apparent advantages. However, no one would care to loan money on grain so located. Iowa has solved this part of the problem by its unbonded agricultural warehouse law. Under its provisions cribs or granaries are officially sealed and storage certificates issued which are acceptable to local bankers as collateral for loans. The grain thereby finances its holding for a favorable market.

FARM FACTS

Clean out the cistern and catch cool spring rains.

Look into bee hives and see how colonies have stood the winter.

Little potatoes make good seed only when they come from high yielding and disease-free hills.

Dry skim milk, as 40 per cent of the mash mixture, is one of the best ways to check coccidiosis of chickens.

Get early vegetables started. Onions, radishes, lettuce, peas and beets flourish in the cool damp weather of early spring.

Plow up the sod-bound orchard, and cultivate it. This loosens the soil, kills weeds and makes re-seeding more valuable.

A balance sheet is really a systematized inventory of everything a business owns and owes, and shows the health of the whole enterprise.

How many farmers know whether they lost or made money last year? And how many know on what crop or kind of live stock they lost or made the most? Farm account books come in handy for just such information.

Boston's Original Name

The English name first given to Boston was Trimountain, which was changed to the present one at a town meeting of the early settlers who gathered at Charles town, across the river, on September 7, 1630.

Buy New Husbands

Among a certain tribe in the district of Ahmedabad, in India, there is a custom permitting women to discard their husbands and to marry again on payment of money compensation to the first husband.

POULTRY

FEEDING TURKEYS IMPORTANT PHASE

(Prepared by the United States Department of Agriculture.)

Feeding the young birds is one of the most important phases of turkey raising. Unwholesome feeds and improper methods of feeding, especially in the case of turkeys closely confined, have resulted in many failures.

For the first two days after hatching the poult require no feed, access to clean drinking water and a little coarse sand and green feed to peck at being sufficient. Beginning with the third day they should be fed, the amount given them varying with the quantity of natural feed they are able to pick up outside the coop. It is best to keep them more or less hungry.

When the range provides an abundance of green feed and insects, the growing poult require but little extra feeding. More losses are attributable to overfeeding, perhaps, than to all other causes. One harmful effect of overfeeding is that it removes the necessity for hunting food, with the result that little exercise is taken and indigestion develops. Sanitary feeding places are also very important and, above all, the soil should be kept sweet and clean.

When natural feed is scarce or when the poult have to be kept from ranging outside, it is advisable to feed them about five times a day. If allowed to run outside the coop where they can find insects, seeds, and green feed, two or three feedings a day will be enough. If the poult are fed regularly every night, in a short time they will return nightly to their proper roosting quarters. Never allow the feed to become moldy. A good plan is to feed the poult on boards, cleaning off any feed that may remain after feeding, and standing the boards in the sun to dry.

Buttermilk has been found very beneficial in bringing poult successfully through the early stages. A good practice is to keep the milk in front of the young birds during the morning and water during the afternoon. If grit and green feed cannot be picked up outside the coop, they must be provided in some other way.

Loss on Bad Eggs

The United States Department of Agriculture estimates that the total loss of eggs in the United States each year due to spoilage, breakage and inefficient handling from the time the egg is produced on the farm until it reaches the consumer is \$45,000,000. In the final analysis this loss is a farm loss, since a smaller price is paid for eggs to provide for the poor and broken eggs that go to the consumer.

Baby Chick Is Stupid

In addition to grain, mash and water, birds need some grit to help grind their food. Crushed stone, oyster shell or coarsely ground dry bone will serve the purpose. Such things should always be kept before the fowls in proper boxes. Since the birds have no teeth, these substances must be provided to help prepare the food for digestion.

Leghorns Economical Layers

Recent figures released by the Michigan State Poultry Improvement association, and obtained from the International Egg Laying Contest, show that the Leghorns are the most economical layers. The cost of Leghorn eggs was 14 cents per dozen; the Rocks came next with a cost of 21 cents per dozen.

Poultry Facts

Don't feed too much at a time.

More chickens are killed by feeding too soon than by starving.

Feed five times a day for first two weeks.

There are several good methods. Use one.

Keep rats, skunks, etc., away from chicks.

The cause of so many ducklings dying is the way they are fed.

Chicks must have greens, grit, grubs, grain, gumption, ground, and direct sunlight.

Keeping small sized hens is folly. There isn't any too much meat on chicken bones, anyway.

Cabbage is rich in the green material needed for laying hens. About six pounds of cabbage may be fed per 100 birds per day.

Early hatched chicks can be most easily obtained by using a reliable incubator.

Watch your layers and don't feed the slacker hen. It is always time to cull when the indications call for it.

More than 250 chicks in one brood is an expensive and harmful risk to take by anyone who has a desire to produce a lot with small equipment. As the chicks grow, give them more space. Chicks of different sizes and ages do better with their own classes.

LAMINEX DOORS

Will not shrink, swell or warp

Wet plaster can't warp Laminex!

SOONER or later you will be building or remodeling—then the door question will come up.

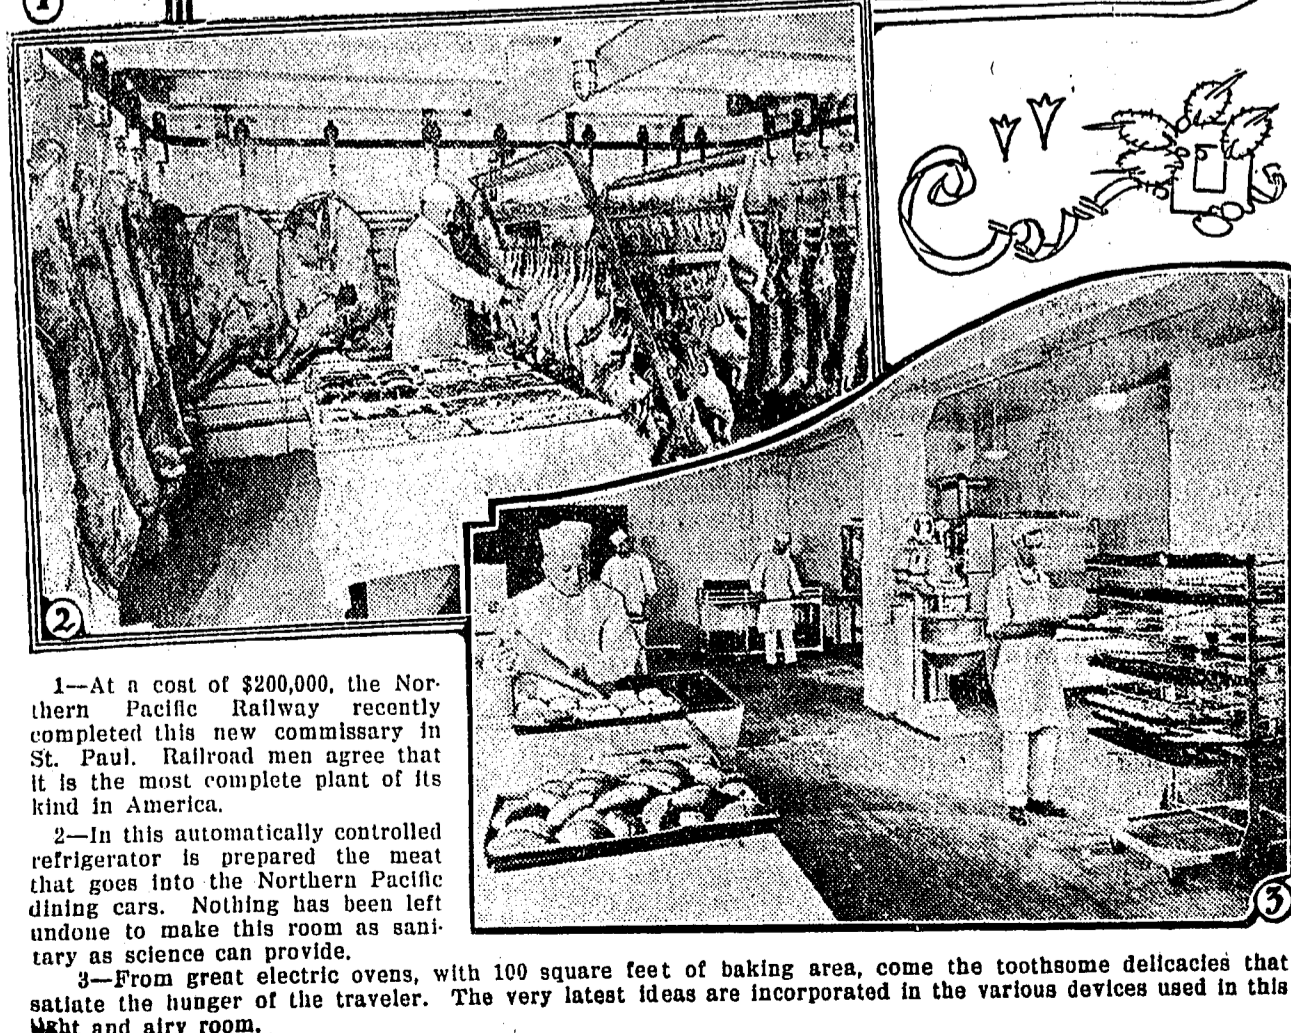

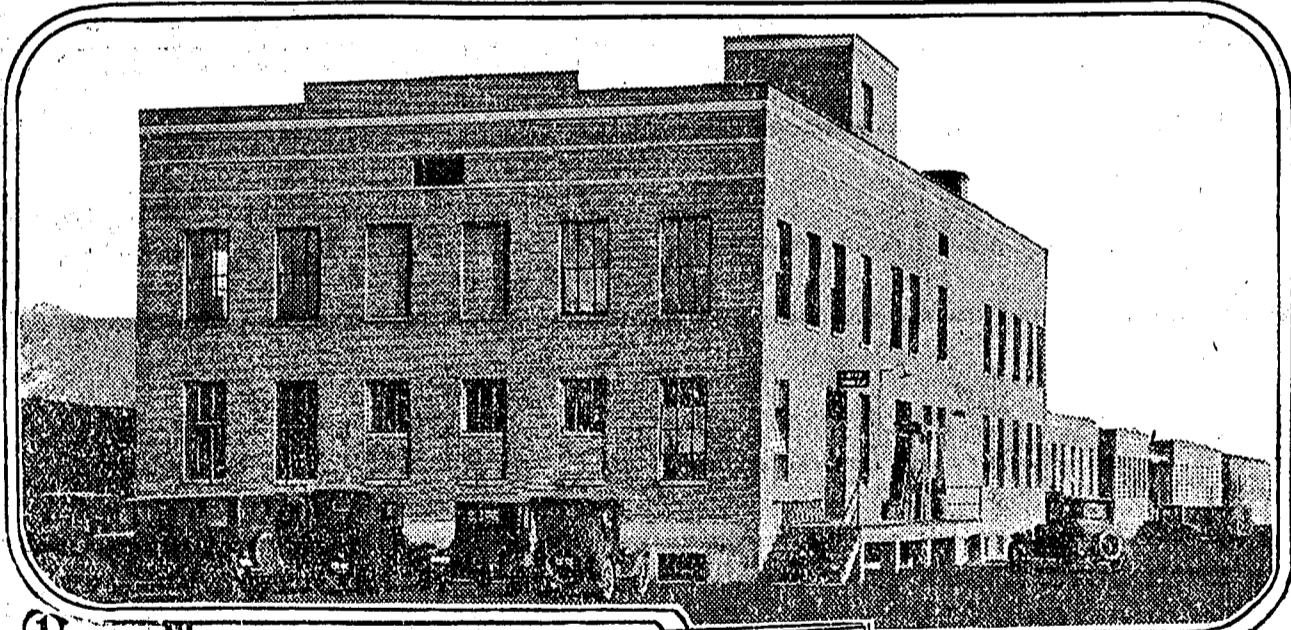

You will want a door that does not warp.

Three thousand leading architects and contractors declared recently: "The most frequent cause of warping is hanging doors in new buildings near damp plaster. Even the most careful workmen may hang doors too soon after a building is plastered."

Here is a new, scientific wooden door that will not shrink, swell or warp. Each Laminex door bears a guarantee label. Costs very little more than an ordinary wooden door. Ask us about it.

Barnum Lumber & Mill Co.

Northern Pacific Opens Modern Commissary

1—At a cost of \$200,000, the Northern Pacific Railway recently completed this new commissary in St. Paul. Railroad men agree that it is the most complete plant of its kind in America.

2—In this automatically controlled refrigerator is prepared the meat that goes into the Northern Pacific dining cars. Nothing has been left undone to make this room as sanitary as science can provide.

3—From great electric ovens, with 100 square feet of baking area, come the toothsome delicacies that satiate the hunger of the traveler. The very latest ideas are incorporated in the various devices used in this light and airy room.

Pine poles which have been treated with coal-tar creosote for their entire length by the open cell pressure method give the longest service. Telephone companies have found, according to official report.

POULTRY FACTS

RAISING GEESSE IS DEPENDENT ON FEED

The goose is a careful and constant mother, but her love for the water must be restrained until the goslings are a few weeks old, for many dangers, in the form of muskrats, snakes, turtles, etc., lurk at the water's edge.

Goslings do not require much extra feed, if they can get all the fresh and tender grass they want, and unless this can be supplied, breeding geese is not profitable. For the first few weeks some food must be given; this should never be corn meal, for nine-tenths of the mortality among the various kinds of domestic fowls can readily be traced to feeding corn meal. Cottage cheese, or dry curds of sour milk in which red pepper (cayenne) has been sprinkled, is a very good food, and a quantity of fresh onion-top, chopped up fine, is relished by them. Stale bread soaked in fresh milk makes an excellent food for all young birds, and the way they develop when fed liberally with it will astonish anyone who has not before tried it with his fowls.

The greater part of the management of geese consists in keeping the goslings free from dampness while they are still "downy" guarding them from the attack of rats, cats, weasels, and other of their enemies, in housing them well at night, and in giving them fresh grass run as often as possible. When they become fully feathered, they are abundantly able to take care of themselves; many breeders then let geese find their own food, which they can readily do on a large farm, until fattening time, or when the grass begins to get short, when they are brought up, and liberally and regularly fed with corn, still being permitted to have their liberty until a week or two before they are to be killed, when they are penned up and fed all they can eat.

Suggestions to Follow to Raise Strong Chicks

Raising early hatches of baby chicks has long been one of the most difficult problems of the practical poultryman. Recent findings in feed and feeding, however, explain some of the trouble, and help to make it possible to raise chicks hatched at any time of the year. Another edition of a bulletin of the state's agricultural experiment station has been published to supply the poultrymen of Wisconsin with the results of these important investigations.

The ration recommended by the investigators at the University of Wisconsin consists of 80 parts of yellow corn, 20 parts of wheat middlings, 5 parts of raw bone, 5 parts of grit (calcium carbonate), and 1 part of common salt, and skim milk used freely. They warn poultry raisers against a very serious condition called "leg weakness," or rickets, common to young chicks hatched in northern climates during the winter. The most simple remedy, they find, is to expose the chicks to sunlight. The ration given above plus sunlight is a complete one for raising strong, healthy young chicks. It needs no further supplement, they declare.

Poultry Hints

A self-feeder for hens will prove profitable.

Have plenty of good fresh mash before the flocks at all times.

Chicks should not have coarse grains until they are nearly two weeks old.

Treat for lice if necessary, with powder on young chicks. Dipping is too severe.

Chilling of chicks often causes diarrhea, but bacillary white diarrhea is "something else again."

Follow some good method of feeding. Don't change your method after starting, at your neighbor's whim.

Feeding all the sour milk that little chicks will drink is oftentimes the best medicine and the best feed to provide for them.

Don't let chicks, poulters or even ducklings and goslings get wet and cold. They are seldom strong enough to stand that combination.

Many flocks of young stock are kept in the small brooder houses that were only large enough for them when they were small. This is a most serious mistake.

The poultry industry can never be overcrowded. As long as humanity eats, it will call for chicken.

Too-fat hens can no more lay eggs than too lean ones. Keep to the medium line.

It is a wise plan to provide a way of watering the ducklings which will permit them to get all the drink they want without spilling the water. Sometimes one side of the pen can be made of upright slats and the water trough placed just outside.

AMERICAN YOUTH

NOTICE OF SALE OF REAL ESTATE AT PRIVATE SALE
In the Probate Court of Latah County, State of Idaho.

In the matter of the Estate of W. W. Bowker, Deceased.

Notice is hereby given that A. W. Behrens, the administrator of the estate of W. W. Bowker, deceased, in pursuance to an order made by the Probate Court of Latah County, State of Idaho, will sell at private sale the real estate belonging to the said decedent at the time of his death, and which real estate is situated in Latah County, State of Idaho, and consists of two parcels of real estate, to-wit:-
PARCEL No. 1.
The Northwest quarter of the Southeast quarter, the West half of the Northeast quarter and the East half of the Northeast quarter of the Northwest quarter of Section 9, in Township 37 North, Range 3 West of the Boise Meridian, in Latah County State of Idaho.
PARCEL No. 2.
Also Lot 5 and the North 10 feet of Lot 6 in Block 2 of the Village of Juliaetta, Latah County State of Idaho, together with an undivided one-half interest in and to a certain cement wall located on the South side of the above described tract.
That bids will be received upon

each parcel of the above described real estate and such bids must be in writing and all bids may be left with the undersigned administrator at the Bank of Juliaetta, in Juliaetta, Latah County, State of Idaho, and that said premises will be sold on the 28th day of June, 1926, or within a period of six months thereafter, and said premises will be sold to the highest and best bidder on the following terms, to-wit:- 10 per cent of the amount bid must accompany each bid and the balance must be paid in cash on date of confirmation of sale.
Dated and signed this 7th day of June, 1926.
A. W. BEHRENS,
Administrator of the estate of W. W. Bowker, deceased.

NOTICE FOR PUBLICATION OF TIME APPOINTED FOR PROVING WILL, ETC.

In the Probate Court of the County of Latah, State of Idaho.

In the Matter of the Estate of R. Clare Maynard, deceased.

Pursuant to an order of said Probate Court, made on the 2nd day of June, 1926, notice is hereby given that Saturday the 26th day of June, 1926, at 11 o'clock A. M. of said day at court room of said Court, at the Court House in the County of Latah, has been appointed as the time and place for proving the Will of said R. Clare Maynard, deceased, and for hearing the application of First Trust & Savings Bank, a corporation of Moscow, Idaho, for the issuance to it of Letters Testamentary, when and where any person interested may appear and contest the same.
Dated this 2nd day of June, 1926.
ADRIAN NELSON,
24-3 Probate Judge.

Linden Items

The little daughter of Mr. and Mrs. Ray Weaver is suffering from inflammatory rheumatism. Dr. Faust of Deary was called to see her Saturday evening.

The farmers are rejoicing over the rain Sunday evening and Monday.

Jake Grinolds and son, of Lewiston Orchards, spent Sunday at the C. H. Fry home.

Gus Farrington finished sawing Thursday and is moving his sawmill to the Crescent neighborhood.

Clem Israel finished sawing last Saturday.

Miss Eva Smith and brother, Ben, visited with Mr. and Mrs. E. L. Mitchell in Moscow, Sunday. Mr. Mitchell is recovering from his operation and he expects to leave the hospital this week.

Mr. and Mrs. C. E. Harris and family were Troy visitors, Sunday. Mrs. Harris and children remained for several days visit.

Mr. and Mrs. Addison Alexander were pleasantly surprised upon coming from church Sunday to find some of their neighbors, with well filled baskets, gathered at their home. Soon a large crowd was present and a very enjoyable day spent by all, the occasion being in honor of Addison's birthday.
Mrs. Myrtle Stone and daughter, Mrs. C. E. Fonburg, spent Friday evening with Mrs. Longfellow, listening to the radio.
Mr. and Mrs. George Garner and Charley Garner were shopping in Kendrick, Saturday.
Mrs. McPhee, Mrs. Edgar Bohn and Miss Fay Pippenger were callers at Park, Wednesday afternoon.
W. Weyen and H. J. Starr delivered porkers to the Kendrick market the last of the week.

Destroy Green Cabbage and Cauliflower Worms

The green cabbage and cauliflower worms that do so much damage to the leaves of these plants come from the eggs laid by the white cabbage butterflies. They are easily destroyed by spraying or dusting with an arsenical poison (arsenate of lime one ounce to two gallons of water), or pyrethrum powder may be dusted on the plants. It is difficult to get the spray to stick to the smooth glossy foliage of any of the cabbage family, but the spray may be greatly improved by adding one-half ounce of soap to each two gallons of the arsenical spray. Dusting early in the morning or after a rain with pyrethrum powder or any of the arsenical poisons is very satisfactory. A useful homemade duster is made by placing the dust material in a cheesecloth bag or sack or one made from any other thin, strong material, and then by going over the plants using a stick to beat the dust from the bag a very satisfactory job can be done.

Some Dairy Calf Dangers

The dairy calf cannot run with its mother on the clean pasture; the beef calf can. The dairy calf must be weaned within a day or so after birth. When sucking its dam, the cow's udder and teats should best be kept clean so that the calf will not become infected with germs that might produce indigestion and diarrhea. Therefore, the cow and the calf should be kept in a clean place—away from filth, manure and infection.

Calves Without Milk

A dairy expert of the Missouri station says that dairy calves after they are three or four weeks old can be raised successfully without milk. He considers the lack of skimmed milk on many farms the chief obstacle in raising calves by hand, and finds that calf meals, as substitutes for milk, are being sold extensively. "They are fairly satisfactory but are rather high in price as compared to home mixed feed which will give equal and often superior results."

GLEANINGS

Miss Evelyn Hanson of Troy was visiting friends here last Saturday. She said that her sister, Mailla, underwent an operation for appendicitis last week in Spokane and is getting along very well.

Mr. and Mrs. John Dammarell were Lewiston visitors Tuesday afternoon.

Miss Leone Leslie of Spokane arrived last Sunday to spend the week with her aunt, Mrs. H. P. Hull.

E. E. Bechtel of Moscow visited his mother here for a short time last Sunday.

Wm. Watts returned from Moscow last Saturday night with a used Dodge sedan which he picked up at a bargain. It is practically new—this year's model.

The latest thing out is a new breakfast food made from birdseed. They say it will make a man whistle all day long.

Geo. Davidson, Wade Keene and Geo. E. Knepper drove to Bovill last Saturday night to attend a session of the Masonic lodge at that place. John Waide of Deary took his third degree Saturday night, which was the attraction that took the Kendrick delegation to Bovill.

Mr. and Mrs. J. G. Gardner and daughter and Miss Esther Gardner drove to Winchester last Sunday to spend the day with relatives. Mr. Gardner says the catfish are biting in the lake near the mill and it is no trouble to catch a basket full.

Mrs. E. H. Emery underwent an operation at St. Lukes hospital one day last week. She is reported to be getting along very nicely.

Last week the Gazette received a list of names from the University of Idaho, of the students from Kendrick in this year's senior class. The name of Miss Margaret Cox should have been in this list but was omitted. The additional name makes the fourth senior registered from Kendrick.

Kenneth Hund, Claud Cook and Hugh Parks drove to the Ora Grand country last week on a fishing trip, returning Sunday evening. They had good luck and brought home quite a string of trout. Hugh says there was a long procession of cars headed for the Bungalow. The road to the Bungalow was opened one day last week.

Reports come from Juliaetta that the cherry harvest starts there this week. A fairly good crop with satisfactory prices is in prospect.

Born to Mr. and Mrs. Frank Bencoter, Jr., a son, Tuesday, June 15.

Frank Bencoter returned yesterday morning from a visit at Clarkston.

Mrs. R. H. Ramey and daughter, Rowena, were Spokane visitors Wednesday of this week.

Joday Long and Anton Lien left last Saturday in Mr. Long's car for the New Meadows country on a week's camping and fishing trip. They will make the trip over the state highway and probably return over the Blue Mountains by way of La Grande and Pendleton.

Bob Brown stated this week that he had taken a \$25,000 logging contract in the Three Bear country where a considerable quantity of white pine timber is being cut. He stated the contract would cover a period of a year or more.

Miss Esther Janes recently completed her third year teaching at Ione, Wash., where she has been very successful. Next year she will have charge of the fourth grade in the Wallace, Idaho, city schools at a very substantial advance in salary.

Mr. and Mrs. Laurel Boyd arrived here Monday evening from Seattle to visit at the home of Mr. Boyd's brother, Frank. They were on a two-week's vacation trip and it was also their honeymoon as they were married a short time ago.

Messrs. and Mesdames Newton Daubenberg, Knepper and Carlson and families spent the week end near Clarkia. It is a beautiful place to camp and while the fishing is not as good as it might be, it is possible to catch a few.

The papers have been talking about that million dollar rain, but that's rather a low estimate

in our opinion. It meant the difference between a short crop and a big crop and that counts up to more than a million.

Jaunita Stanton went to Lewiston, Tuesday afternoon to visit relatives.

Mrs. Bump returned Tuesday from a visit with friends in Spokane and Coeur d' Alene.

Miss Esther Gardner went to Winchester, Wednesday afternoon, to visit relatives.

The families of N. E. Walker and Roe Parks returned from their auto tour of the coast, Monday evening. They report a splendid trip. A distance of approximately 1500 miles was covered in the circle from here by way of Spokane, Seattle, Portland, Pendleton and return. Mr. Walker said that not even the traffic rules of Portland marred the pleasure of the trip.

Charles Crocker is burning up the highways with a brand new motorcycle, which he recently purchased.

Miss Johanna Hooker went to Moscow, Wednesday, to meet her aunt who is visiting at the Hooker home on Bear ridge.

An exchange says there are three reasons for auto accidents: Hooch, hugging and haste.

Campfire Picnic Supper

The Potlatch Campfire Girls met Wednesday evening for a picnic supper in the park. Honor reports were given around the supper table, after which games and stunts were enjoyed for a couple of hours. Eleven girls were present.

Times Do Change

Time was, so all the ancients say, When time made women old and gray, But now we're in another day, And women just grow old and gay.—Ex.

His Turn

During his first few days in camp, the recruit was the victim of so many practical jokes, that he doubted all men and their motives. One night, while he was on guard, the tall figure of one of the officers loomed up in the darkness.

"Who goes there?" challenged the sentry.

"Major Moses," replied the officer.

The recruit scented a new joke.

"Glad to meet you, Moses," he said. "Advance and give the

ten commandments."—Tips and Taps.

Spurned, She Persists; He Has Her Arrested

New York.—Peter Sinarney, twenty-two years old, caused the arrest, in Yonkers, of Miss Julia Bishara, charging that after she proposed to him and was rejected repeatedly, the young woman indulged in gossip about him through the neighborhood. Because of this gossip and her repeated telephone calls, Sinarney asked that she be held for disorderly conduct.

Judge Charles W. Boote, in the Yonkers City court, refused to uphold the charge, but cautioned Miss Bishara to keep away from Sinarney and not annoy him.

Use Ultra Violet Ray

The ultra violet ray, already employed profitably by medical men to heal human ills, is being used at the University of Wisconsin to produce "more and better" eggs and chickens. Nearly three times as many eggs can be produced by action of the ray, the departments of agricultural chemistry and poultry have found. Heavier shells in irradiated pens also increased marketability of eggs. The ultra violet light was found to cure fowls suffering from rickets.
