

NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

All "Livable" Houses Taken

Genesee is suffering from a house shortage of the better kind. Every house that is in a livable condition has either been sold or rented and more could be rented to desirable parties were they even in fair condition. There are still quite a few farmers, who have been in the habit of spending the winter in town to take advantage of the public schools, who have not as yet secured living quarters.

There are several houses in town that have been standing idle for several years for the reason that they are not in a condition to be occupied. A few dollars properly applied to them would bring in big returns for the investment. A modern house in good condition always rents for enough to pay big interest on the investment. — Genesee News.

Change Pastors

Rev. Forbis and daughter, Vera, and Rev. Metcalf returned Tuesday from Conference. Rev. Metcalf remains at Juliaetta and has also the charges at Gilbert, Arrow Junction, and Sweetwater. Rev. Forbis remains at Troy, and has the Bethel charge also. Rev. Kincaid, who has served the Bethel church with such marked success for the past ten years, asked to be retired from the ministry as superannuated. He and his wife will make their home at Long View, Washington. It is with deepest regret that we chronicle the intended departure of these estimable people from the Troy community. — Troy News.

Violating Game Laws

"People have so violated state game laws in the Little Bear Ridge district during the past six weeks in their attacks on grouse and pheasants as to make it impossible for law-abiding citizens to hunt successfully," L. A. Kerr and Harry Thatcher, who returned from the region after a day's hunting, said Monday afternoon.

"We were unable to get a successful shot and the birds were too frightened to stay in the regions which formerly abounded with game. Shells, which had been fired more than a month ago, were to be found lying on the ground and citizens of the district admitted that men had been hunting for the past six weeks, merely because game laws are not enforced in those regions," Mr. Kerr said upon his return. — Star-Mirror.

Walker For Game Warden

Petitions are being circulated asking that G. F. Walker, of Kendrick, be appointed as game warden for Latah county. Mr. Walker would make a good official. He is familiar with the game laws of the state and would see that they are observed. There has been complaint that this section has been neglected by the game warden, and that game birds have been killed at any and all times, while the violators of the law have gone unpunished.

Mr. Walker was a candidate in the primaries to succeed himself as county commissioner from the third district. He was not defeated because of any act of his while a member of the board — in fact he was an able and competent official. His defeat was the result of a four cornered fight in his district, with a candidate from each corner of the district, thus splitting the vote. Walker will make a good game warden. — Deary Press.

Mr. and Mrs. D. J. Ingle and son, Dwight, plan to leave today for Payette, Idaho, for a brief visit. They will make the trip in their car over the state highway.

Big Bear Ridge

Ingvald Kleth and sisters, Misses Esther and Othella, returned Sunday from a motor trip to Spokane.

Word reached here of the death of the 5-months-old son of Mr. and Mrs. Thomas Van Moulkin at Tekoa, Wash. Mrs. Van Moulkin was formerly Miss Lydia Blendin.

Mr. and Mrs. Andy Hanson motored up from Aberdeen, Idaho, Sunday, to visit old time friends. The Hanson family were pioneer residents of this community and Andy was raised on the home now owned by Wade Keene.

Miss Opal Jones has gone to Farmington, Wash., where she will teach school this year.

Mr. and Mrs. Forest Peters motored down from Spokane to spend the week end with her grandmother, Mrs. Marie Slind.

Rimrock and Taney schools opened Monday with the Misses Jessie Butler and Weaver in charge.

Miss Dorothy Jones will teach the Fern Hill school beginning September 13th.

Miss Mary Baack of Lewiston was recently a guest of Miss Vina Hecht.

Miss Alva Lee of Spokane was the guest of Miss Esther Kleth the first of the week.

Mr. and Mrs. Ole Lien and son, Anton, were Moscow visitors Thursday.

Everett and Lyle Bramblett left Saturday for Craigmont, where they will stay with their grandmother, Mrs. Kittrell and will attend school there.

Wallace Emmett received a letter from his sister, Miss Cordelia Emmett, stating that she had arrived at the Hawaiian Islands, where she has accepted a position to teach in the schools there.

Mr. and Mrs. Otis Gentry and little daughter, Doris, were Troy visitors Tuesday.

The Lutheran Ladies Aid was entertained at the home of Mrs. Hjalmer Dalberg in Deary, Wednesday afternoon.

Mr. and Mrs. N. E. Ware and family motored to Garfield, Saturday, to attend the Whitman-Latah Fair and to visit at the Fred Black home.

Mr. and Mrs. Gabriel Forest were Sunday visitors at the home of Mr. and Mrs. Newt Heath on Fix ridge.

Miss Weaver is staying with Mrs. Zack Aas.

Misses Neva Ware and Lizzie Jones, and Lloyd Ware have entered the Kendrick high school.

Mr. and Mrs. Lief Field and little daughter of Colton, Wash., spent the week end at the Bernhart Nelson home.

Mrs. Florence Hupp of Little Bear ridge was a recent visitor at the home of her daughter, Mrs. K. D. Ingle.

Announcements were received of the marriage of Miss Carol Sternberg of Moscow to Mr. B. Lafferty of Kellogg at Moscow, on September 1st.

Unfavorable Bean Weather

The frequent showers that have visited the Potlatch section recently have delayed the bean harvest considerably and causing much extra work to the growers. Beans that were cut prior to the last rain will have to be turned before they will be dry enough to stack or to be threshed from the field. The late beans will not be first quality as there are too many green pods mixed in with those that are matured. It will make them rather difficult to handle unless there is a prolonged period of dry weather during the balance of this month and next. Some of the late beans will yield fairly well if they can be saved.

Commercial Club Tuesday Night

Next Tuesday evening is the date for the regular monthly meeting of the commercial club. This promises to be a very important session and everyone is urged to make a special effort to be present.

The Philadelphia of Our Ancestors

Here is shown a section of "High Street," a reproduction of Philadelphia's famous Market street in the days of 1776. It is one of the outstanding features of the Sesqui-Centennial International Exposition now being held in Philadelphia to commemorate the 150th anniversary of the signing of the Declaration of Independence. Every building has been built to actual size and in actual architectural detail. The furnishings of each building are exact reproductions of those used in the Revolutionary days. Many of the pieces on display are the originals and today are worth thousands of dollars because of their historic value. The Exposition continues until December 1.

How Highways Help

Lewiston people who have traveled over any of the highways through garden, farm and orchard district have been much impressed with the great number of roadside markets that have sprung up on such highways, says the Tribune.

In such districts, about every farmer living on the highway has a stand for the sale of butter, eggs, poultry, fruits, vegetables and other products direct to the people who come by and stop long enough to get a supply of such things. Some of these are tourists who want merely something for the day's use, but many are city and country people who are buying for regular home use and prefer to get it fresh, direct from the producer.

It is estimated that this new market for fresh produce has grown to a total volume of over \$2,000,000 a month or \$25,000,000 annually in the United States. Some put it as high as \$50,000,000, when butter and eggs and all products are included.

The new market source has made the farm a place of business, and afforded a very important source of revenue that has been the salvation of many producers. In some cases, the sale of roadside products amounts to several thousand dollars at a single farm, during the season. All members of the family can assist in this home market and it brings an element of new interest to the rural home.

Council Met Tuesday

The town council met in regular session at the city hall last Tuesday night with Chairman Long, Trustees Dammarell, Deobald and Newton present. After the disposal of routine business several matters were brought up for consideration.

The board instructed the clerk to write to the Standard Lumber Co. and ask that some action be taken to remedy the dangerous condition of the street between the corner of the company's lumber shed and the N. P. depot. A number of accidents have been narrowly averted as it is a "blind" corner and the passage way too narrow for two cars.

Several changes were made in the standing committees which are now as follows: Water, Newton and Deobald; Street and alley, Newton and Deobald; Fire and building, Chamberlain, Dammarell; Cemetery and Park, Deobald and Newton; Finance, Dammarell and Newton; Sewer, Deobald and Chamberlain.

After a general discussion of affairs concerning the welfare of the town, the meeting was adjourned.

Hanson-Null

A very pretty wedding was solemnized at the home of Mr. and Mrs. Theo Hanson of Troy, Idaho, Tuesday, September 7, at high noon, when their daughter, Manila Mae, became the bride of Edwin A. Null of Cody Wyoming.

The living room where the ceremony was performed was decorated with palms, and fall flowers in tones of gold, bronze and white, with dahlias, gladiolias and marigolds.

The Rev. Father Carey officiated. Miss Alice Kennedy, a sorority sister of the bride, played and sang "Oh Promise Me". The bride entered the room leaning on the arm of her father, to the strains of "Mendelssohn" played by Miss Kennedy.

Miss Hanson wore a lovely gown of tan georgette trimmed with hand made ecru lace, embroidered in blue and rose, and carried a shower bouquet of bridal roses. The bride was attended by her sister, Miss Evelyn Hanson, who wore a pencil blue satin frock. She carried a corsage bouquet of pink rosebuds and blue larkspur.

A four course wedding breakfast was served immediately following the wedding, at the Harry M. Driscoll home which was beautifully decorated.

The bride lived for a number of years in Kendrick and was very popular with the younger set. She attended the University of Idaho, where she is affiliated with the Alpha Chi Omega Sorority. For the past three years she has been teaching in the public schools of Cody, Wyoming.

After the wedding trip through Southern Idaho, Utah, Colorado and Yellowstone Park, Mr. and Mrs. Null will be at home in Cody, Wyoming.

School Opened Monday

The Kendrick schools opened Monday with a good attendance in every grade, with prospects for a most successful year. This week considerable time has been used to get the classes adjusted, particularly in high school, but by next week everything will be running smoothly. It is expected that a number of students will be enrolled in high school within a short time, as some of the larger boys are busy in the country assisting with the bean harvest.

Canyon Chapter O. E. S.

The Worthwhile Matron of Canyon Chapter O. E. S. announces that the regular meeting of the lodge will be held Tuesday evening, September 14 at the usual hour. A full attendance is desired as it is an important meeting.

Twenty Years Ago

Leon Ingle is erecting a neat cottage on his place on Bear ridge and the neighbors say is preparing a cage for the occupancy by some fair damsel.

A heavy frost was noted on the ridges Tuesday evening which resulted in the blackening of all the vines. It is said that the loss of the late planted beans will result.

What might have proved a fatal fire among John Woody's grain sacks was averted by the prompt attention of G. H. Dougharty assisted by George Barnett who put the fire out before the entire pile was ruined. The loss was 200 sacks.

Word from Spokane is to the effect that Bob Brown, son of J. F. Brown of this place, is in the hospital suffering from a cut of four and one half inches on the top of his head and almost thru the skull. The injury was received while he was at work for the Spokane Lumber Co. While taking off the bottom saw in some way the machinery was started and the top saw made the gash.

We place at the head of our columns this week the emblem of the democratic party of Idaho "the Home" and would ask our readers to think of its significance ere throwing the paper down.

The Frantzich Bros. are working a full force at their sawmill on top of the Pine creek divide and are hard pushed to keep within hauling distance of the orders at their different offices.

Karl Karlson is a new addition to the Bear ridge rural route, making 76 boxes.

Owing to a rumor that J. I. Miteham was identifying himself too closely with political matters to be agreeable with or comply with the strict rules of the civil service laws under which he holds his position of mail carrier, we understand that he has resigned his position of republican committeeman of this precinct and has abstained from taking any part, either active or passive, in this campaign. The resignation was accepted last week and J. B. Helpman, one of the able members of the party, was appointed to fill the vacancy.

Millions in Pearls

This pagoda, a part of the Japanese exhibit at the Sesqui-Centennial International Exposition in Philadelphia, celebrating the 150th anniversary of the signing of the Declaration of Independence, is made entirely of pearls and its value exceeds \$1,000,000. The exposition continues until December 1.

Morgan Declines Nomination

William M. Morgan, at one time chief justice of the Idaho supreme court, has refused the nomination on the democratic ticket for governor and will not be a candidate this fall at the general election. The democratic candidate for governor is Asher B. Wilson, of Twin Falls.

The delegates from Kendrick lodge to the grand lodge of Odd-fellows at Pocatello, which meets October 16, were elected recently. John Kite and N. E. Walker will represent the local lodge.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Homer Hayward has purchased the George Hayward farm and Mr. and Mrs. George Hayward left Tuesday for Oregon, where they expect to make their home.

H. A. Russell and wife left last Friday for Clarkston, where they will make their home this winter.

Mrs. Minnie Bunker, daughter and two sons, and Grandma Bunker spent Sunday at the home of Mr. and Mrs. H. D. Hayward.

Chas. Thornton and wife spent Sunday at the home of her sister, Mrs. Russell Rodgers.

Sunday guests at the Wm. Henderson home were: Vester Whiting and family, William Whiting and wife, and Nadine McCoy.

Elton McCoy and wife spent Sunday with Mr. and Mrs. Frank Wilmot.

R. Wetmore of Clarkston came up Friday, returning home, Sunday.

Wm. Welker and wife of Clarkston came up Friday returning home Sunday.

C. E. Hewitt and family and Wm. Welker and wife spent Sunday at the home of John Phillips.

Mrs. Britells of Seattle and Wm. Sheets and daughter of La-Pine, Oregon, are here visiting their sister, Mrs. John Hewitt. This is the first time that they have all been together for thirty five years.

Mrs. Ben McCoy and daughter, Eva, went to Leland last Thursday to visit with relatives, returning home the following Tuesday.

Walter Triplett and wife of Lewiston spent Sunday at the home of his parents, Mr. and Mrs. D. B. Triplett.

Harve Southwick and family and Ray Southwick and family of Cream ridge spent Sunday at the home of Attlee Mustoe.

Harold Whiting and family drove to Juliaetta, Sunday, and were the guests of Mr. and Mrs. John Draper. Bernice and Bernard Snyder returned home with them and will visit here for a few days.

Mrs. George Jones went to Leland and back Tuesday.

John Stalnaker and Edwin Wetmore have returned from Mason Meadows where they were stationed on the fire patrol this summer.

Cameron Mission Festival

One of the most enjoyable gatherings held in the Cameron community for years took place last Sunday when the Lutheran church held its annual mission festival. The day was ideal for the occasion and a large crowd was in attendance.

At 10 o'clock in the morning a special service was held, at which time Rev. A. K. Bethman of Endicott preached a German sermon.

During the noon hour a basket lunch, or rather feast, was served. Such a dinner as this can be found at no other place except Cameron. It was a wonderful affair and everyone enjoyed it to the fullest.

English services were held at 2 o'clock the sermon being delivered by Rev. E. C. Knorr of Colfax, Wash. Liturgical services were conducted by Rev. G. K. Burzlaff of Gifford, Idaho.

A number of people from Kendrick attended the Festival, and were very greatly pleased with the hospitality of the Cameron people.

Declines Nomination

Frank L. Moore, who was nominated on the democratic ticket for prosecuting attorney of Latah county, has asked the county auditor to strike his name from the election ballot as he will not be a candidate. He was nominated without his consent. Abe Goff, republican nominee, will have no opposition at the general election this fall.

Prepare for Fall and Winter

We have made preparations for your needs in fall and winter merchandise. Pay this store a visit and you will be surprised at the many new things that we have received lately, and of course you will find our usual low prices in evidence.

New Wool and Rayon Dress Materials

54 inches wide, \$1.75 a yard

Wool Dress Materials

For sport dresses 54 inches wide \$1.95 yard.

Outing Flannel

86 inch light and dark outing flannel, yard wide at 25c per yard

Blankets!

If you are in need of blankets be sure and get our prices. You will say that they are low as we purchased them in case lots shipped direct from factory.

A headline in a daily paper says "Skeleton found by tracks tells tale of foul play". Most of us have heard of "walking skeletons" but a talking skeleton is a new one.

A man, particularly a property owner, who opposes the construction of good roads, has lost all sense of values. Good roads have now become a necessity. It is impossible to keep up with the times without them.

And now a "most beautiful hands" contest is to be conducted in the east. As the young ladies present their hands for inspection how interesting it would be to have them bring their mothers with them to determine whether the parental knuckles have been enlarged as a result of laboring for a useless daughter. No doubt, feminine hands can be well kept in spite of labor, but the tall-tale fact remains that the hand, whether of man or woman, that is "too pretty" is apt to be a useless appendage to a bundle of nothingness.—Caldwell News.

A headline in a daily paper says "County official shoots self before undertaker arrives." Now, really, there is nothing unusual about that, is there? But the report goes on to say that the official had posted a check to the undertaker to pay his funeral expenses before committing suicide. The undertaker hastened to the man's home but was a few minutes too late. The question arises, just how fast did he hasten.

A woman novelist in defending "Miss 1926" says that she "just wants to be left alone for a while to find her feet." They ought to be easy to find, there's nothing to hide them.

One mile of road on the Moscow end of the highway between Moscow and Pullman is to be put in first class shape, according to an announcement made at the Moscow Chamber of Commerce lately. One mile will be that much to the good, but it leaves 8 miles or so of the most atrocious highway in the Inland Empire between these two prosperous towns.

It has been prophesied for the past ten years or more that the automobile was ruining the country. Regardless of this dire condition people are living better and living longer than ever before; earning more and spending more and having a better time in general than they used to, in spite of the talk about "the good old days". Such condition shows progress, and there must be progress to bring about better things.

Modern Statistics

- One car for every six persons.
- One radio for every eight families.
- One phonograph for every seven families.
- One washing machine for every five families.
- One vacuum sweeper for every four families.
- Five installment accounts for each family.—Ex.

CERTIFIED STOCK BEST FOR CHICKS

Persons who buy baby chicks should see to it that they are from tested stock, which affords protection against bacillary white diarrhea, advises the New Jersey Agricultural Experiment station. Otherwise a great many of the chicks are likely either to be dead on arrival or to begin to die soon afterwards. Many times the loss of shipped chicks is said to be caused by chilling, over-eating, or early feeding, when in reality it is due to bacillary white diarrhea.

The station has already tested over 45,000 breeding birds this season and there are still some to be tested. These birds will probably produce over a million chicks, or nearly enough to supply the state. Furthermore, they have been culled for type and egg production, which also makes for better chicks.

Bacillary white diarrhea is transmitted to the young chick through the egg produced by infected breeding stock. Little can be done if the disease makes its appearance, as the

losses usually continue until the chicks have outgrown the most susceptible period. If only one chick has been infected through the egg this chick may serve to infect the others in the brood. Strict regard for sanitary measures and the feeding of milk products may keep the loss down somewhat. The disease is prevented by using hatching eggs produced by breeding stock that is free of this infection. Infected birds are detected by means of a blood test.

Those who are interested in buying chicks from tested flocks may obtain the names of owners of various breeds by writing to the Experiment Station, New Brunswick, N. J., or the State Bureau of Markets at Trenton, N. J. Such chicks may, in some cases, cost a few cents more than the regular price, but they are worth it.

Chicks Prompted to Eat Dirt by Abnormal Taste

It may be an abnormal taste in chicks which prompts them to eat dirt, but clean dirt will do them no harm and seems to satisfy a craving. Give them a sod every day, roots up, and see how the little things love their miniature jungle.

Dirt which is taken up with food is another thing. If the practice is to feed on the ground the food quickly becomes foul and may be poisonous to the chicks. The modern method with baby chicks is to give all feed from clean boards and water in vessels that cannot be polluted, and are chick proof. A chick has the faculty of drowning in a very little water, accessible through a very small hole.

In Dean's Office

Dean—"Where are your parents?"
 Girl—"I have none."
 "Then where are your guardians?"
 "I have none."
 "Then where are your supporters?"
 "Sir, You are forgetting yourself."—Ex.

Left Fire for Parade

All good New Yorkers love a fire—but they love a parade better. This was demonstrated when police, called to hold in check a dense crowd gathered to view a small basement fire suddenly had their problem solved by a band and 120 brilliantly uniformed Cossacks, who crossed Fifth avenue a block away. The crowd, with a single impulse, deserted the firemen to follow the parade.

Linden News

Mr. and Mrs. C. E. Harris were Moscow visitors.

Mr. and Mrs. Roy Bohn were guests of Mr. and Mrs. Edgar Bohn over the week end.

Annie Morrison visited at the Smith home several days last week.

Mrs. Stone and daughter went to Lewiston, Saturday, where the children will attend school the coming year.

Mr. and Mrs. F. C. Lyons called on Mr. and Mrs. H. J. Starr Sunday afternoon.

Aunt Carrie Allen visited with the Crocker family in Kendrick Monday.

Mr. and Mrs. C. H. Fry and Mr. and Mrs. E. L. Whisler attended the show in Kendrick Saturday evening.

Mrs. E. L. Mitchell went to Newport, Wash., Tuesday to join her husband. She was accompanied by her brothers, Ben and George Smith and Cleve McPhee, Cleve making the trip in his truck.

Mr. and Mrs. James Farrington and Eddie Hunt returned Wednesday from several days visit on Russell ridge.

Mrs. Travis and Grandma Keeler returned Tuesday from the Hot Springs where they spent a couple of weeks.

Thrift

A Scotch farmer had agreed to deliver 20 hens to the local market. Only 19, however, were sent, and it was almost evening before the 20th bird was brot in by the farmer. "Man," said the butcher, "you're late with this one!" "Aye," agreed the other, "but ye see, she dinna' lay until this afternoon."—Ex.

Death of Judge Lee

William A. Lee, who for six years had been chief justice of the supreme court of Idaho, died, suddenly of heart failure, Tuesday night at Pocatello. He was a distinguished jurist of the state and at one time served Bing ham county as state senator.

Fog Extends Far

A fog in the Atlantic ocean is generally about 80 miles in diameter.

POULTRY

BALANCED RATIONS FOR LAYING HENS

In making up rations it is necessary to adhere to standards within certain limits, but some feeds may be substituted for others, as barley, wheat, and oats for corn. However, meat scrap and other animal-protein feeds cannot be replaced by high-vegetable-protein feeds. All changes should be made gradually, as sudden changes may decrease egg production.

A great many poultrymen and live-stock feeders now believe that if the animal has a free choice it will select the ration that is most suitable. At the government farm at Beltsville, Md., the following mash was made up by keeping account of the amounts of the different feeds a laying flock consumed:

- Mash.
 16 pounds corn meal
 6 1/2 pounds meat scrap
 1 pound bran
 1 pound middlings
 1 pound oats
 Scratch Mixture.
 1 pound cracked corn
 1 pound wheat
 1 pound oats

Here is a simple ration that has given very good results with Leghorns, but that has proved too fattening for Rocks and Wyandottes. Meat scrap, it will be seen, makes up over 25 per cent of the mash:

- Mash.
 3 pounds corn meal
 1 pound meat scrap
 Scratch Mixture.
 2 pounds cracked corn
 1 pound oats

For birds that are made too fat by the preceding ration, the following, containing only 16 per cent of meat scrap, but having considerable protein in other feeds, has been found a good one:

- Mash.
 1 pound corn meal
 1 pound bran
 1/4 pound meat scrap
 1 pound middlings
 1 pound ground oats
 Scratch Mixture.
 2 pounds cracked corn
 1 pound wheat
 1 pound oats
 1 pound barley

Poultrymen resort to every possible means to get their hens to eat a great deal of feed, especially in the winter when the days are short. One way is to cut the morning scratch feed to about half. The hungry bird then goes to the mash trough and gorges on the dry mash. Then to increase the consumption of mash, some of it is fed wet at noon and the hens will eat it when they would take no more of it dry.

Kill Cabbage Worm by Poison Sprays

Arsenic May Also Be Applied in Dust Form.

(Prepared by the United States Department of Agriculture.)

The common cabbage worm, the most destructive insect enemy of cabbage and related crops, is best controlled by spraying with lead arsenate or calcium arsenate, says the United States Department of Agriculture in a publication just issued, entitled "The Common Cabbage Worm and Its Control." This pest is a velvety-green caterpillar about one and one-quarter inches in length, and is the larva of a white butterfly known to most farmers.

The worm would cause much heavier losses, according to the bulletin, but for a number of natural enemies, among the most important being certain wasp-like parasites or four-winged flies, the immature forms of which feed within the body of the caterpillar.

Early in the season the worm attacks the cabbage, ridding the outer leaves as they form, frequently feeding within the immature heads, which are rendered unfit for food. Sometimes it cuts out the "bud" from the young plant, thus preventing development of the head.

Arsenic poisons may be applied in dust form rather than as a spray by mixing the powder with hydrated or air-slaked lime, and plaster, dusting sulphur or cheap, light, finely pulverized material which will adhere to the cabbage leaves. Although dusts are more easily and quickly applied than sprays, they do not always distribute the poison as evenly, and, unless the dusting is done when the plants are wet, they do not stick as well.

Farmers' Bulletin 1461-F, containing a description of the common cabbage worm together with information relative to control measures, necessary materials and equipment, may be obtained free, while the supply lasts, from the United States Department of Agriculture, Washington, D. C.

TONIGHT And SATURDAY

Another Big Comedy Hit

The COHENS Own the World The KELLYS Run the World

A remarkable funny picture about an Irish policeman and a Jewish merchant. And then something about a million dollars—imagine an Irish policeman getting a million dollars away from a Jewish merchant. The Irish boy marries the Jewish girl and the fun starts. Laugh—you'll laugh for a week after seeing it. It's a scream from start to finish. This picture has been brot here by the request of several who have saw it and who say they want to see it again.

Grain-Cleaning Device Described in Bulletin

Apparatus, called a Bates aspirator after its inventor, E. N. Bates, market specialist of the Department of Agriculture, automatically removed smut and light dockage from grain by suction as a part of the threshing operation.

In this attachment the grain as it is thrown from the thresher elevator is spread out into a thin, even stream by being directed onto a low inverted cone. The cone causes the grain to pile up and flow evenly over its edge. Suction from above draws a current of air through the thin sheet of falling grain and lifts out the light material.

Need for the removal of smut and dockage at threshing time is emphasized by the fact that there was approximately 1,239,000 bushels of dockage assessable against 118,665,000 bushels of wheat produced in Washington, Idaho, and Oregon during a recent year. Of this dockage total approximately 784,000 bushels were of smut dockage. The department says the question of dockage has become one of the outstanding problems of the wheat belt.

A description of the apparatus and detailed methods of using it have been published in Miscellaneous Circular 56-M, "Cleaning Grain With the Bates Aspirator," copies of which may be obtained upon request to the Department of Agriculture, Washington, D. C.

Needs Pity Himself
Definition—An altruist is an American citizen who, after dodging bulletts, murder motorists and poison allday, still has time to worry about disorders in China.—San Diego Union.

Bird Champion Sprinter
The speed of the pheasant is computed to be in the neighborhood of 15 or 18 miles an hour. When the college sprinter runs the 100-yard dash in ten seconds, he exceeds but slightly the time the bird makes in the much shorter runs. Considering that the stride of the average good sprinter is about eight feet or nearly eleven times that of the bird, the pheasant's performance stands as remarkable.—Detroit News.

The DAIRY

DETERMINE VALUE OF DAIRY SIRE

(Prepared by the United States Department of Agriculture.)

Perhaps the best way to determine the true value of the dairy bull, says the United States Department of Agriculture, is through the production records of his daughters. If a dairy bull has many daughters, and all of these excel medium to low-producing dams, the sire has a certain value; if all the daughters excel medium to high-producing dams, the true value of the bull is comparatively high; but if all the daughters excel high-producing dams, the true value of that bull is very high.

For the first time in the history of this country figures are now becoming available, through the cow-testing associations, by which the true value of thousands of dairy bulls of each dairy breed may be determined through the production records of their unselected daughters.

Department Circular 368, just issued by the bureau of dairying, United States Department of Agriculture, shows how the true value of a dairy bull may be measured by comparing the yearly production records of his daughters with the records of their dams.

In a study that compared the yearly production records of 2,182 daughters with the records of their dams, it was found that the daughters excelled the dams by 377 pounds of milk and 19 pounds of butterfat. These gains are not considered phenomenal, but with the high-average production of the dams (8,635 pounds of milk and 342 pounds of butterfat) they are very satisfactory. The gains would have been excellent had it not been for a few inferior sires whose daughters kept the average production of all the daughters down. This is the kind of sire that should be eliminated from the dairy herds of the country.

In general, the study showed that most pure-bred sires will increase the production of the daughters above that of low-producing dams. However, as the production of dams increases, better and still better sires must be used or the daughters will not excel the production records of the dams. A small increase of the daughters over high-producing dams may be a greater credit to the sire than a much larger increase over low-producing dams.

A study of 58 pure-bred bulls in cow-testing associations, each having five or more tested daughters, showed that in some cases all the daughters excelled the dams; in other cases some of the daughters excelled and others did not; and in still other cases every daughter produced less than her dam. This shows the necessity of using great care in the selection of a dairy sire.

The fact that the daughters of any sire excel their dams in production of butterfat is a very important factor, but it is not the only factor to be considered. It makes a big difference whether the production of the dam is high or low. Some sires increased the records of the daughters over fairly high-producing dams more than 40 per cent; other sires lowered the production of the daughters almost as much below that of similar dams. That does not mean, however, that all sires whose daughters failed to produce, as much as their dams should be sent to the butcher; but it does mean that, if kept at all, they should be used to improve lower-producing dairy herds.

A copy of the circular may be obtained as long as the supply lasts by writing to the United States Department of Agriculture, Washington, D. C.

Best Dairy Farmers Try to Raise Winter Feeds

The dairy farmer who raises all or nearly all his feed on his own farm usually makes more profit per cow than does the neighbor who buys the feed for his dairy cattle, declares J. W. Linn, dairy specialist at the Kansas State Agricultural college.

Profitable dairying on the average farm includes the growing of most of the desired feeds for the winter months, according to Linn. Profit from the cow depends largely on growing enough of the right kind of feeds, he says.

If it is impossible to grow all of the feed on the place, substitutes of other feeds can be made. If a farmer has alfalfa or other roughage he needs also a grain supplement to feed the concentrated elements necessary. There is no grain, however, that can take the place of a bulky roughage as a source of carbohydrates or as a filler.

Not Good as Dairymen

The man who has been raising beef cattle or sheep or who has been spending most of his life in learning how to produce big crops of corn and oats does not naturally fit into a dairymen's scheme of work. There is no doubt that dairying pays when it is properly conducted, but the urging of many people of the above-mentioned type into the business does not make for satisfaction or profits, both of which are necessary if the business is to be permanent.

POULTRY FACTS

QUALITY IN EGGS QUITE ESSENTIAL

Eggs are still more or less plentiful at this season, and a little later on they will not be quite so plentiful. The result will be that there will appear the temptation to hold eggs before selling so that the price will go up some. Here is where the danger lies in that practice: on most farms, that is, general farms, and fruit farms too, where poultry is not given all the attention it should have, the males are permitted to run with the flock in summer as in the spring, when breeding is done. The eggs thus obtained are, therefore, fertile. With the hot weather of summer, these eggs are very likely to start developing if they are held very long before selling. Eggs should be disposed of twice a week at least, preferably three times a week.

This, then, is one factor that affects quality in table eggs. Another is the fact that quite often hens will steal their nests and lay a number of eggs before the nest is discovered. Many of these eggs will be unfit for use, but sometimes they are included in the lot that is to be sold. This should be watched carefully and avoided. It is a good plan to have a home-made egg candler handy and test all eggs before they are sold. Such a candler is not difficult to make; a piece of stove-pipe with a hole in it about the size of an egg will do very well. Set the pipe over the lamp so the hole comes opposite the flame, and by holding an egg up to this hole, a great deal can be determined about the inside of the egg. A normal egg that is fit for consumption will appear clear except for the orange colored yolk, and the air cell will be very, very small if it is a strictly fresh egg, that is, a trifle less than the size of a 10-cent piece in diameter. An egg that is dark or black shows that some embryo growth has taken place, and it is therefore unfit for food.

It is difficult under some circumstances to maintain quality in eggs during the summer months, but it can be done. Hold eggs at a temperature of not higher than 65 degrees, if possible; make sure that all eggs are gathered every night; sell eggs often—twice or three times a week; remove the males from the flock to produce infertile eggs; don't let the eggs set in the sun on the way to market.

Gapes Is Troublesome Disease of Chickens

Gapes is a disease of young chickens caused by a small reddish worm which attaches itself to the inner lining of the windpipe. It is often called a forked worm, for the reason that the male and female worm are often found attached to one another at an angle which gives the appearance of a single worm. The presence of the worms may be demonstrated by passing a loop of horsehair or small wire down the windpipe for a short distance and turning it to loosen the worms.

By stripping a feather of all its web except a small tuft at the end and dipping this in kerosene and inserting it into the windpipe where the worms are attached will often cause the worms to loosen their hold. However, the main remedy must lie in prevention. Badly infested stock should be killed and burned and all rubbish, runs and houses cleaned up and thoroughly disinfected. The ground should be spaded up or plowed and thoroughly limed. Rotation of runs for the chickens will do a great deal to stop the trouble.

Save Market Eggs

A detail of the poultry business which means a good deal in the final figuring of profits is the packing of eggs which are sent to market. This may seem like a small thing at first thought, but the loss of even a few eggs in each case may amount to a total of respectable size at the end of the year. Eggs should be packed in a manner which will assure the minimum of loss. Observation of a few simple rules will cut losses very largely, and it is just as easy to pack the eggs right as wrong.

Trained Eye Is Asset

A trained eye is one of the most valuable assets that the poultry man can develop. Through it he may forestall serious epidemics; through it he may turn loss into profit. The trained eye will tell him when the chicks are not making proper growth which experience or reliable advice will teach him to correct. Again, the trained eye will detect the slightest variation in the reaction of the fowls to a change in their surroundings. It will be a constant guide.

Ducks for Market

Ducks are one form of poultry that can be adjusted to commercial or factory-like methods. On the larger plants one will find the incubator rather close to the dwelling. The ducklings are moved from here to the first house when heat is supplied and then by regular stages to other buildings that differ in construction according to their needs until they end up at the killing room. This, in most instances, is a plant where they are turned as green ducks.

Some Visible Signs of Binder Troubles

Nebraska Experts Give Few Good Pointers.

According to farm machinery experts at the Nebraska Agricultural college, a careful observation of the following "ifs" will secure better operation and less trouble:

1. If the machine travels with a jerky motion, main drive chain is too loose or it may be dry. Try a little oil on it.
2. If the slats rip off the canvas, the elevators are not square.
3. If the knotted hook is rusty and rough, it will not work properly. Polish it with fine emery paper.
4. If the binder attachment is not timed properly, it will not work. Some binders are timed in as many as five places.
5. If the knotted hook does not turn far enough to close the fingers on the twine, no knot will be tied. Look at the knotted pinion. It should not be worn.
6. If the twine slips through the cord holder, the twine will be pulled out before the knot is tied. Adjust the cord holder spring. It should take 40 pounds to pull the twine from the disk.
7. If the disk does not move far enough, the knotted hook grasps only one cord, hence a loose end band.
8. If the needle is bent or out of shape, there will be a loose end band.

The needle is of malleable iron and may be hammered back to shape.

9. If the twine is pulled from the hook before the knot is tied, try the knife, it may be dull.

10. If you wish to change the size of bundles, do it with the bundle-sizer spring, not the tension or compress spring.

Remedy for Leg Weakness

Leg weakness is not a disease but is usually a condition brought about by faulty feeding and lack of sunlight. The feeding of cod liver oil or the exposure of the growing chick to direct sunlight will usually prevent this trouble. Cod liver oil when fed to growing chicks, should be fed at the rate of about 4 per cent of the total ration, and there is very little danger of overfeeding cod liver oil. Many start feeding it when the chicks are two or three days old.

Pure-Bred Bulls Travel at Half Rate in South

Common carriers of the Southeastern Tariff association have granted a half-rate concession on the transportation of pure-bred bulls to be used for breeding purposes when their value does not exceed \$150.

This information received by the United States Department of Agriculture from the secretary of the Southern Cattlemen's association is expected to aid in developing the cattle industry in the southeast portion of the country. The increased recognition which the breeding of good live stock is receiving from commercial sources

is hastening progress in stock improvement, according to specialists in the United States Department of Agriculture.

PUBLIC AUCTION

I will sell at public auction at the Jessup place, 4 miles northwest of Kendrick on American ridge the following described property at 10 o'clock a. m.

Thursday, Sept. 16

HORSES

- Brown mare, age 9, wt. 1350
- Bay mare, age 8, wt. 1350
- Bay horse, age 10, wt. 1300
- Gray mare, age 11, wt. 1300
- One pony.

DAIRY CATTLE

- Jersey cow, to freshen Nov. 1.
- Jersey cow giving milk.
- Cow soon to come fresh.
- Two heifers.
- Cow giving milk.

IMPLEMENTS

- Wagon
- Hay rack
- 12 in. gang plow
- Bobsled
- 2 walking plows
- 8-ft disc

- New Acme Harrow
- 2-section harrow
- Bean planter
- Parker bean cutter
- 2 set breeching harness
- Single harness and several collars

HOUSEHOLD GOODS

- Blue enamel Quick Meal range
- Good kitchen range
- Dining table
- Wash table
- Kitchen cabinet
- Cupboard
- 2 rocking chairs and other articles
- 150 Egg Mandy Lee incubator
- 250 chick brooder
- 600 lb. cream separator
- 2 screen doors
- Some good Leghorn hens

TERMS: All sums of \$20 and under cash; all over that amount bankable note bearing 10 per cent interest and due October 1, 1927.

FOR SALE: Three purebred pointer pups, age 5 months. Call at the depot, Kendrick 37-1p

Power of Inertia
Inertia is a great and potent influence, the power of which is perhaps not fully realized. It has kept men in bondage, caused wars, prevented the triumph of justice and common sense over wrong and superstition. Sometimes it is called laziness.—Chicago News.

SHERIFF'S SALE

Notice of Sheriff's Sale of Real Estate Under Execution.
R. G. Wood, and Eva Wood, Plaintiffs.

vs.
N. Williamson and Caroline Williamson, Defendants.
BY VIRTUE OF AN EXECUTION, ISSUED OUT OF THE JUDICIAL COURT OF THE SECOND JUDICIAL DISTRICT in and for the County of Latah, wherein R. G. Wood, and Eva Wood were Plaintiffs, and N. Williamson and Caroline Williamson were Defendants, upon a judgement rendered the 5th day of August, 1926, for the sum of Four Hundred Ninety Eight and 20-100 Dollars in U. S. Gold Coin besides interest and costs, I have this day levied upon all right, title, claim and interest of said defendants, N. Williamson and Caroline Williamson, of, in and to, the following described real estate, to-wit:

Lot Six (6) except the North forty-two (42) feet thereof in Block one (1) of Cox's Addition to the Town of Moscow; and Lots Ten (10), Eleven (11), Twelve (12), Thirteen (13), Fourteen (14), Fifteen (15) and Sixteen (16) of Block Three of Misses A. A. Lieuellen's Addition to the Town of Moscow, as shown by the recorded plat thereof.

PUBLIC NOTICE IS HEREBY GIVEN that I will on Monday, the 4th day of October A. D. 1926, at 2 o'clock P.M., of that day in front of the Courthouse door, Moscow, Latah County, Idaho, I will sell at public auction, for the United States gold coin, all the right, title, claim and interest of said defendants, N. Williamson and Caroline Williamson, of, in and to the above described property or so much thereof as may be necessary to raise sufficient amount to satisfy said judgement, with interest and costs, etc., to the highest and best bidder.

Dated this 6th day of September 1926.
Charlie Summerfield,
Sheriff of Latah County, Idaho.
By Geo. K. Moody, Deputy. 37-4

INFERTILE EGGS IN LATE SPRING

Many commercial chick hatcheries are complaining about the large percentage of infertile eggs, according to the directors of the International Baby Chick association who met with poultry specialists of the United States Department of Agriculture. Many of the hatches, they report, show that less than 75 or 80 per cent of the eggs available are fertile, whereas in normal years fertility runs as high as 90 per cent or more.

"Fertility is largely a management problem," says Dr. M. A. Jull, in charge of poultry investigations, United States Department of Agriculture, "and infertility is due largely to the cold and wet weather, which causes a deviation from normal handling of the average flock. The only way that hatcheries can be certain of securing a high percentage of fertile eggs from farmers or others is to buy only from flocks that are properly managed. There is no practical or scientific method known by which infertile eggs can be detected before incubation."

Backward weather has resulted in many flocks being confined to a greater extent than usual and a consequent lack of sufficient exercise to insure fertile eggs. Then, too, under confinement, too many males may be a cause of low fertility. They spend too much time in fighting each other. Under normal range or yard conditions one male to fifteen or twenty hens of the more active breeds, such as Leghorns, is about right. In the heavier breeds, one male to ten or twelve hens will be required. Fewer males than this would be better in each case when the birds are in close confinement.

Breeding stock should have a variety of feed, consisting of grains, meat, and green feed. The green feed is especially essential if the birds are confined. Free range or exercise helps materially in the production of hatchable eggs.

Famous Contortionists
The editor of the Lyons News maintained the other day that Captain Kidd was the greatest contortionist in history, because he sat on his chest. But a reader begs to differ, and presents Jacob, who lifted his eyes and fell on his neck.—Kansas City Star.

DAIRY FACTS

FEED DAIRY COWS GRAIN IN SUMMER

That it is false economy for dairy-men to depend on pasture alone for feed during the summer months is shown in the case of Dave Ehredt, an Illinois dairyman living near Elizabeth, Jo Daviess county, who last year lost just \$19.40 worth of milk and butterfat in saving \$7.72 worth of feed on each of his cows. This is shown in a report recently sent to the college of agriculture, University of Illinois, by Clyde Nichols, tester in the dairy herd improvement association of which Ehredt is a member.

During the year ending April 30, 1926, which included all the 1925 pasture season, eight representative cows in his herd gave an average of 5,880 pounds of milk containing 242.25 pounds butterfat. They ate an average of 1,523 pounds of grain during the year. The previous year the same eight cows each produced an average of 6,485 pounds of milk containing 278.5 pounds butterfat and ate 2,006 pounds of grain. They were fed grain as a supplement to pasture during the summer of 1924, whereas no grain was fed for this purpose during the 1925 pasture season.

In saving 483 pounds of grain a cow, Ehredt sacrificed 625 pounds of milk and butterfat. The grain was worth \$7.72, while the milk and butterfat were worth \$19.40, making a net loss of \$11.68 from not feeding grain.

This is a representative case of the herd reports sent in by dairy herd improvement association testers demonstrating the false economy of depending on pasture alone for feed during the summer months. H. E. Jamison, assistant in dairy extension, said. The ordinary pasture crop furnishes a cow with roughage only, and it is impossible for a high-producing cow to eat the volume of this relatively coarse material which is necessary to maintain both production and body condition.

It takes a good pasture even to provide the necessary nutrients for a cow giving a pound of butterfat a day. For cows producing more than this amount, some grain should be fed even with the best pasture, the amount depending on the production of the cows and the condition of the pasture. One pound of grain for each five pounds of milk is often recommended.

A suitable ration for early summer feeding consists of equal parts ground corn, ground oats and wheat bran. Another good ration consists of three parts each of ground corn and ground oats and one part linseed oil meal or cottonseed meal. As the season advances and the pasture becomes poorer, the amount of linseed or cottonseed meal should be increased to about one-fourth of the ration.

Profitable Cows Raised From Pure-Bred Sires

When scrub sires are directly compared to pure-bred sires the evidence is always greatly in favor of the pure breeds. Two cow testing associations in Wisconsin have recently published comparisons. In one association, cows sired by grade bulls averaged 144.8 pounds butterfat; those by pure-bred sires 230 pounds. In the second association the grade sire's daughters produced 215 pounds butterfat per year as compared to 295 pounds per cow for those sired by pure-bred sires. Eighty pounds more butter at 40 cents a pound means \$32.00 per cow per year; or \$320.00 for each ten heifer calves produced; which means \$640.00 to be credited to the pure-bred sire for two years use if he sired ten heifers per year. Since it requires about 200 pounds butter per cow to break even, no profit was made on the daughters of the grade sires; and the owners who used these sires had low wages, if any, for their labor.—Charles I. Bray, Colorado Agricultural college.

Room for Expansion in Dairying, Says A. Boss

Andrew Boss, vice director of the Minnesota experiment station, does not believe that the dairy business is likely to be overdone. There is nothing to fear, he says, in the moderate expansion of dairying in regions favorable to the industry.

"The probable increase in cows and in dairy production," he says, "will be met by the probable increase in population and by increased use of dairy products so long as business and industrial conditions remain as at present. With comparatively higher prices for beef stock, many of the general purpose-cattle raisers, who have been milking some of their cows, will go back to beef raising, thus reducing milk production somewhat, to the advantage of the dairymen."

Way for Better Sires

The average number of dairy animals kept on the Indiana farm is 4.4 cows, and the average yearly production of these cows is slightly over 4,000 pounds of milk, according to R. D. Cann, dairy extension specialist at Purdue university. This low production indicates a need for better breeding. How to provide high-class purebred bulls for the many small dairymen in the state, is one of the most important problems in improving the dairy condition.

'Twas Ever So
When Noah sailed the ocean blue
He had his troubles same as you—
For days and days he drove the ark
Before he found a place to park.

GLEANINGS

Mr. and Mrs. H. H. Sparber were very pleasantly surprised Sunday by their friends Mr. and Mrs. R. Miller and little daughter, Fay, and Mrs. McLeod and daughter of Clarkston, Wash., and Mr. and Mrs. H. Mutum of Asotin, Wash., who spent the day with them.

H. E. Haizlip went to Spokane Wednesday morning to attend the fair and the merchants' convention.

Ed Darby, who underwent an operation six weeks ago at a Moscow hospital, returned home Wednesday afternoon. He is slowly regaining his strength.

C. G. Compton was transacting business in Lewiston the first of the week.

Mrs. George Meyer arrived Sunday from Wisconsin. After a short visit here she and her husband left in their car for their home at Long Beach, Calif. Frank Meyer accompanied them as far as Seattle and returned on the train.

Herman Wilson, who has been working for the Barium Lumber Co., left last Saturday for Leavenworth, Wash. He has employment with the same crew that G. W. Brown has been working with this summer; about 40 miles from Leavenworth.

Manford Nutt of Juliaetta was transacting business in Kendrick Wednesday of this week.

W. B. Helpman went to Spokane Wednesday morning to attend the fair.

A large number of people from this locality attended the Latah-Whitman county fair at Garfield last week. The exhibits were reported to be exceptionally fine.

Mrs. Henry Baker returned this week to her home at Lucile, Idaho, after spending several weeks at the home of Mrs. Baker's parents, Mr. and Mrs. Fred Crocker.

Mrs. Hugh Stanton returned yesterday morning from Greer, Idaho, where she visited her parents.

Frank Roberts has announced a public sale at his place for Monday, September 20. He has rented his land to Harry Ameling but will continue to live on the farm for at least another year.

Mr. and Mrs. Fred Flaig drove over from St. Maries, Sunday, to spend the day with relatives.

The dance given at the Fraternal Temple last Friday night by Wegner Bros. orchestra, drew a large crowd. It was well conducted. George Ehlers was floor manager and did a good job of it. Another dance, by this orchestra is being advertised for Friday, September 17 at the Fraternal Temple.

F. A. Holmes who has been farming the Jessup place on American ridge is advertising a public sale to take place September 16. He is going to quit farming and will dispose of his outfit.

Mrs. C. S. Westdahl and Mrs. R. Murphy visited their brother, Martin Sten at Moscow, several days last week.

Mr. and Mrs. Marvin Long drove to Spokane Wednesday to attend the merchants' convention and the fair.

Mr. and Mrs. G. P. Anderson and family left last Saturday for Portland for a visit with relatives. They made the trip in their car returning Wednesday.

Mr. and Mrs. Jordan and two children of Spokane visited at the home of Mr. and Mrs. Marvin Long over the week end. Mrs. Jordan is Mrs. Long's cousin.

Miss Edith Dammarell left Saturday for Kamiah where she has charge of the primary grades in the schools at that place.

Miss Louise Leslie of Spokane spent the week end with her uncle and aunt, Mr. and Mrs. H. P. Hull.

W. F. Behrens left Tuesday morning for Spokane on business.

Miss Winifred Davidson left last Saturday for Lapwai where she will teach in the schools, having charge of the seventh and eighth grades.

The Camp Fire Girls netted nearly \$15.00 from the benefit show Tuesday night, given by the New Kendrick Theater. Considering the unfavorable weather

the attendance was very good.

Mr. and Mrs. E. W. Lutz, Eleanor and Phil, Mr. and Mrs. Ralph Knepper and son, John, went to the Salmon river country near Zaza, last Saturday for a grouse hunt and a week end camping trip. The limit of birds was secured.

Mrs. Martin Frantzieh of Texas ridge returned Wednesday after visiting her mother, Mrs. Fannie Randall, at Clarkston. She left her son with her mother so that he may have the advantage of the Clarkston schools the ensuing year.

Herman Schupfer went to Spokane Wednesday morning to attend the fair.

Jim Mellison and a party of Lewiston friends were in this locality last Sunday hunting grouse. They went from here to the Three Bear country.

Born to Mr. and Mrs. Paul Manly, Thursday, September 2, a son.

Miss Ethel Custer, a former popular telephone operator on the local exchange, arrived last Saturday from San Francisco where she has a position with the Pacific-Telephone-Exchange. She is visiting her parents and other relatives at Juliaetta.

Mrs. Wade Keene, and the Misses Davidson, Gossett and Hooker were passengers on the excursion train last Saturday, to Seattle. They returned Tuesday.

Wesley Thomas of Clarkston arrived yesterday morning to visit at the home of his brother, M. V. Thomas.

Fred Newman of Cameron was a Lewiston visitor last Friday.

Mrs. Edgar Long and Mrs. Minnie McDowell were appointed representatives at a meeting of the local Rebekah lodge last Tuesday evening. They will go as delegates to the annual meeting of grand lodge to be held at Pocatello, Oct. 16. Mrs. Edgar Long was also elected district deputy.

Mr. and Mrs. Joe Davis were Lewiston visitors last Saturday.

Ben Callison and son, Norla, returned last week from a trip to the Salmon River country. They drove over in their Chevrolet truck and report the roads to be almost impassible in places. They camped in the country between the mouth of the Salmon and Snake river. Ben used to hunt big game there 25 years ago. He says the country has changed very little since that time and there is plenty of game left.

T. F. Sparber went to Lewiston

Thursday afternoon on business.

Mrs. A. Onstott and son, Manning, went to Lewiston yesterday afternoon to visit relatives.

235 Cars Seed Peas

Seed peas grown at Fairfield, Wash., this year amounted to 235 cars, valued at \$950,000, according to O. E. Moss, cashier of the Bank of Fairfield. To take care of the crop more than 100 men and women were required in the sorting factory at Fairfield. The seed is now grown by nearly every farmer near town and about 15,000 acres were in peas this year.

He Got It

Hubby was not exactly selfish, but he always gave his wife money with such an ingratiating manner that she decided to make him change his manner if not his habit.

"Here is ten dollars, dear," he said to her one morning. "Don't you think I deserve a little applause for giving it to you without being asked for it?" "Applause," she replied. "Why darling, I think you deserve an encore."—Ex.

NOTICE

Dr. A. E. Jones specialist of the Jones Optical Co. has just returned from a trip East with a large stock of new up-to-date optical goods. The doctor will make his trip to The Commercial Hotel, Kendrick a soon as possible after the fair is over at Spokane. Watch next issue of this paper for exact date. School days are here and winter is coming. See Dr. Jones for better glasses this trip. 37-1

BEAN RAKE

The Deere-Dain Rake—the Rake with the Inclined Frame.

Use either 1 or 2 rear Caster wheels.
Lever for raising and lowering reel.
Lever to adjust angle of teeth from drivers seat.
The convenient bean rake.

Every adjustment made from the seat—great convenience.
Solid tooth bar attachment—great strength.
Adjustment of mesh for the main drive gears—long life.
Inclined frame—good work clear to the end of the reel.
Independent lever connection to both caster wheels—either wheel can and will support the rear end of the rake.
Dust proof caster bearings—high grade construction.

No clutch—trouble proof.
Square pipe and angle frame—strength in torsion.
High, smooth arch—large clearance.
Set over main wheel—for turning windrows one-half over and raking beans.
Square shaft drive—no keys, pins, etc., to come loose.
Chilled bearing. Good oiling system. This means convenience and long life.

Use a Deere Rake and not only save money harvesting the beans but also save all the beans.
