THE OFFICIAL PAPER OF LATAH COUNTY

VOLUME 36

KENDRICK, LATAH COUNTY, IDAHO, FRIDAY, NOVEMBER 5, 1926

No. 45

## NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

### Fine Turnips

The fine turnip on display in the News office window was brought in by N. R. Shepherd. He planted the seed August 15, it did not sprout until the fall rains began, and on October 23rd the turnip had reached a circumference of 22 inches. We wonder if Mr. Finney's turnip that was made so famous by the poet, may have been raised at Troy. — Troy News.

### Expects Heavy Federal Docket

The fall term of the federal court, under Judge F. S. Deitrich, which was originally set for November 2, will convene at the Moscow court room in the federal building, beginning Monday morning, November 8, according to announcement received from the judge last week.

Extensiveness of the docket, and the number of new cases which will face the second term of the court this year, will be determined upon the arrival of the court here.

Ned Weaver and W. B. McDonald are being held in the county jail awaiting federal trial, and two others are released on bond. Other cases are expected from other counties in the district and many cases have been held over from the spring term. — Star-Mirror.

### Violets in Bloom

Frank Harris, who happened to "hoof" it in from the farm Tuesday afternoon, was exhibiting several violets that he said he picked along the road near the Flomer farm, west of town, and that there are plenty of them blooming there.

Frank has made several trips to California within the past few years, but he says that is now unnecessary for climatic conditions seem to be about the proper thing right here in "God's country." — Genesee News.

## NEZ PERCE COUNTY MIXES TICKET

Democrats Capture Majority of Court House Offices.

Although Nez Perce county gave a big vote for the republican state ticket, the county offices were divided, with a majority going to the democrats. The unofficial county footings below are complete except for the returns from Myrtle and Rimrock:

Com. 1st. Dist.—Shafer, 2587, Muench, 1432.  
Com. 2nd Dist.—Talbot, 2012, Brand, 1812.  
Com. 3rd Dist.—Smith, 1068, Whitman, 2203; Cleveland, 260.  
Auditor—Barton, 2761; Melby, 1059.  
Attorney—Phillips, 1215; Babcock, 2394; Zureher, 787.  
Sheriff—Code, 2368; Dent 1956.  
Treasurer—Ford, 1457; Thompson, 1767; Adkison, 419.  
Probate Judge—Parker, 1946; Livingstone, 1535; Sorey, 317.  
School Superintendent—Buckles, 2714; Leeper, 1420.  
Assessor—Armstrong, 2448; Ruddell, 1637.  
Coroner—Stoddard, 1500; Brower, 2458.  
Surveyor—Carrick, 1183; Hughes, 2366.

### Evenly Matched

A grinning crowd stood around the two unconscious men lying on the sidewalk. "What's the matter here?" demanded a policeman who had rushed up, attracted by the crowd. "Oh nothing," replied one of the bystanders. "A real estate man was trying to sell Florida lots to the motor car salesman who was trying to sell him a car. They were pretty evenly matched, for they both dropped from exhaustion at the same moment." — Tacoma News Herald.

## KENDRICK DISTRICT ENGINEER'S ESTIMATE

Submits Report on Cost of Highway Construction.

A matter that is of interest to every citizen residing in Kendrick highway district, is the estimate of Engineer Van Arsdol of the cost of improving the Brady gulch road and the construction of a new Bear Ridge grade. The estimate was given to the highway commissioners last week and covers both projects.

The estimates will be received at the meeting of the Kendrick Commercial Club, to be held next Tuesday evening, at which time the various phases of the question will be brought up for discussion. Everybody is cordially invited to attend this meeting.

A profile of the Bear ridge grade is on file with G. F. Walker, clerk of the board. It gives the projected location, showing estimates of quantities, together with an approximate estimate of cost of construction on a five per cent grade with roadway 18 feet in width, including ditch two feet in width, on upper side only, leaving a 16-foot driveway. The surfacing would be 12 feet in width, 6 inches thick with crushed rock 1 inch crusher run, laid in two layers with 1 inch of earth or clay binder between layers. The estimate also provides for fencing both sides of right-of-way with four strands barbed wire fence and 2,000 feet of Page Woven wire guard fence to be used at most dangerous points.

The total estimate of cost of the 5.25 miles of grade, including engineering but not cost of right-of-way, is \$68,034.03. As a general rule the contractors' bids are very materially under the engineer's estimate, so that it is safe to say that the total cost including everything, would be less than \$65,000.

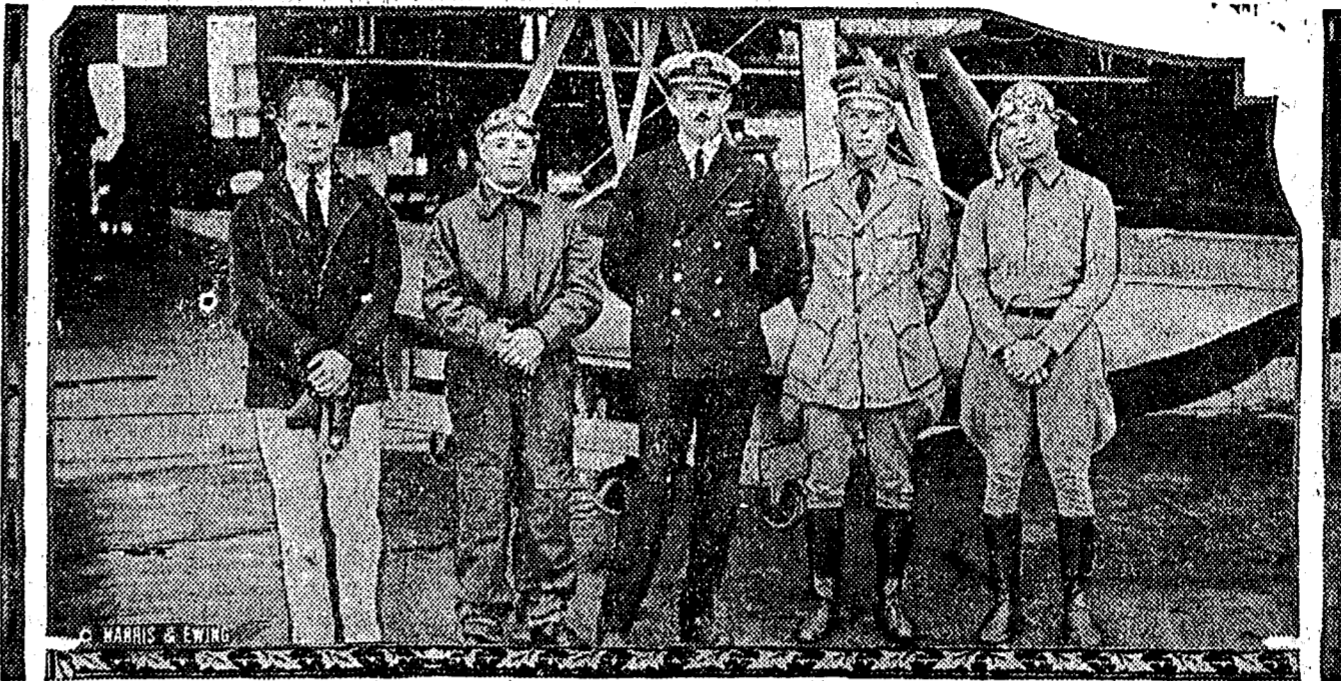

The Brady gulch grade, which serves American ridge, was given a reconnaissance survey by Engineer Van Arsdol and a profile was made together with a rough estimate of cost. The improvement of the 2 1/4 miles of grade would include cutting down the bumps, filling in sags and generally relieving the steep pitches without attempting to bring the whole to a continuous uniform grade. The estimate includes corrugated pipe culverts, renewal of wooden bridges with similar structures and surfacing 12 feet in width, 4 inches thick, which is considered ample as the roadbed is rocky practically the entire distance. The roadbed would be 18 feet wide, including the two-foot ditch on the upper side.

The average grade for the 2 1/4 miles is near 8 per cent, but on mile 2 the lower half is about 6 per cent, while the upper half is near 10 per cent. To reduce the grade on upper half of mile 2 to a maximum of 8 per cent would require reconstruction of mile 2 above the half mile point, which is not included in the estimate. The approximate estimate is \$17,446.00.

### This Boy Used His Head

Paul Schulze, Jr. knows his onions. Last Saturday afternoon he went to the Grant place south of Kendrick in an old Ford car to haul Mr. Grant's car to the garage in town. When he had pulled the car as far as the Housley place his Ford began to show signs of weakening, so he left the Grant car and came to town. There was no other car at the garage available to use for service work. Paul took advantage of the Halloween season and that evening told a gang of his pals that a car was stalled just below Kendrick and it would be a good joke on the owner to push it up town and leave it. The boys entered into the scheme with enthusiasm and the car was pushed as far as the Main Street Garage and left there. It was a regular Tom Sawyer trick.

## Navy's Team in the Schneider Cup Seaplane Races

These crack racing flyers will attempt to uphold the United States navy's supremacy of the air against Italy's best in the Schneider cup races which will be held at Hampton Roads, Va., in October. Left to right: Lieut. F. H. Conant, Lieut. H. J. Norton, Lieut. Com. H. C. Wick, Lieut. G. T. Cuddihy and Lieut. W. G. Tomlinson.

## LATAH REPUBLICANS SWEEP THE COUNTY

In Nearly Every Office Secure Big Majority.

The complete returns from Latah county show that all republican candidates were elected in the county offices by substantial majorities. It was reported before the election that there would be a close contest in the sheriff's race, but Summerfield won by over 500 majority.

The complete returns for the state and county candidates are as follows:

- Senator—Gooding 2752, Nugent 943, Samuels 844.
- Congressman—French 3532, Burtenshaw 755.
- Governor—Baldrige 2903, Wilson 796, Hall 629.
- Lieut. governor—Hailey 2785, Hitchcock 729, Reed 524.
- Supreme court—Lee 2989, Taylor 2874, Gwinn 756, Reed 381.
- Secretary—Lukens 2930, Pemberton 738, Booth 478.
- Treasurer—Defenbach 2794, Cruikshank 763, Earley 473.
- Auditor—Gallet 2692, Smith 943, Reineke 466.
- Attorney general—Stephen 2731, Holden 840, Morrison 482.
- Superintendent schools—Lyman 2521, Walter 1462.
- Mine Inspector—Campbell 2511, Snow 1219, Hansen 395.
- Senator—Hagan 2530, Mix 1628.
- Representatives—Harsh 3051, Oversmith 3112, Forney 1385.
- Com. 1st. Dist.—Cone 2594, Lienhard 1660.
- Com. 2nd Dist.—Paulson 2755, Miller 1441.
- Com. 3rd Dist.—Woody 2678, Christie 1536.
- Sheriff—Summerfield 2632, Robbins 2052.
- Assessor—Gemmill 3224, Mushlitz 1031.
- Coroner—Short 3241, Pickerd 933.

## Choral Society

"The Helpless Man" is the title of the one-act comedy, which will be given Wednesday, December 1st, in conjunction with the musical numbers. Following is the cast of characters: Mrs. Pinchbeck, Mrs. Roy Ramey Ole, O. E. MacPherson Raymond Osgood, Roy Ramey Helen Dawson, Mrs. MacPherson Mrs. Harold Thomas played a flute solo, "Non E Ver," at the meeting held last Wednesday. It was much enjoyed by everyone. There will be but three more practice meetings before the entertainment, and every member is urged to be present next Wednesday, November 10, at the home of Mrs. George Anderson.

### "All to My Wife"

"To my wife: I leave my house with its first and second mortgages; my player piano on which there is only a matter of \$220 more to pay; my automobile and the privilege of making the rest of the 'easy payments'; my life insurance policy of \$1,000 on which there is a policy loan." — Judge.

## Hope Chest Contest

A comparison of the present standing of the candidates in the Hope Chest Contest over that of last week shows a big gain on the part of a number of the contestants. Miss Henrietta Blum still leads and Mrs. Eddie Galloway has jumped from third to second place with Miss Bonnie Craig a close third. Interest in the contest is gaining rapidly and the outcome is still an unknown quantity as the contest has seven more weeks to run. Many changes may take place in that time.

Following is the standing of the candidates up to six o'clock Thursday, Nov. 4:

- Mrs. Walter Benscoter ..... 1415
- Miss Corrine Snyder ..... 580
- Miss Clarice Leith ..... 445
- Mrs. Eddie Galloway ..... 3170
- Miss Edna Southwick ..... 875
- Miss Amy Tupper ..... 720
- Miss Bonnie Craig ..... 2315
- Mrs. Leland Houck ..... 370
- Miss Leora Aiken ..... 465
- Miss Henrietta Blum ..... 7165
- Miss Beryl Harrison ..... 540
- Miss Thelma Perryman ..... 840

## Home Products Week

Practically every community in Idaho during the month of November will observe Home Products and Home Buying Week according to news reaching the office of the Idaho Home Industries Association. The commercial bodies of Lewiston, Idaho Falls, Burley, Twin Falls, Shoshone, Boise and many other towns are uniting with the special home products committees of the women's clubs in an effort to bring the campaign before every retailer as well as consumers in their towns.

These joint community committees are arranging displays by merchants, special publicity and advertising, dinners with Idaho products menus, special meetings with speakers on home pay-rolls, Idaho products, home printing and the mail order and peddler nuisances. Kiwanis and Rotary clubs are joining in the movement with special talks and menus for their meetings.

The chamber of commerce in Boise is combining with the women of the Columbian Club and the Golden Rod club in a very energetic campaign suggested by Mrs. Robert S. Adams, the Columbian Club chairman, for the second week in November. The entire city will be districted and more than 100 workers will visit the housewives, distributing literature and actually taking orders for Idaho products to be delivered through the local retailers. Retailers will co-operate by making displays and special offerings for the week and the club women will get a commission on sales for the club endowment fund. Other clubs are adopting the same plan.

The Idaho Home Industries Association is emphasizing the building of Idaho by building each individual community and there appears to be greater interest than for many years in giving better support to the home industries and institutions.

## DEMOCRATS THIRD IN STATE TICKET

Baldrige Gets Majority of Votes Tuesday.

Idaho went solidly republican in both state and national administrations, according to a report with more than 75 per cent of the state returns in. Baldrige for governor received more than a majority of all votes cast. The entire republican state ticket was elected by heavy majorities, with the progressives second and the democratic ticket a close third.

According to rather an incomplete report the defeat of the constitutional amendment increasing the pay of legislators from \$5 to \$10 a day, was probable.

## METHODIST CHURCH SUMMITS REPORT

Committee Shows Financial Condition at This Time.

For the information of our many citizens and friends who have so liberally subscribed to pay the indebtedness on the Kendrick Methodist church and to those who have not yet made their subscription but are waiting that they may be listed with the many loyal citizens who are making it possible for this community to have a church free of indebtedness, that is a credit to any place several times the size of Kendrick, we submit the following financial report for the year 1926:

Total indebtedness at beginning of drive Nov. 1, 1925	\$3511.61
Interest and taxes for year 1926	216.52
Total Indebtedness	\$3728.13
Amount paid on indebtedness during year 1925 and 1926	\$1624.88
Balance due Nov. 1926	\$2103.25
Amount subscribed and due Nov. 1926	\$1462.50
Balance to be raised	\$ 640.75
N. B. Long, Chairman.	
Hugh Stanton, Treasurer.	

## Death of Mrs. Bond

Word was received here yesterday of the death of Mrs. W. H. Bond of near Leland, who passed away at her home Thursday morning following a long illness. No arrangements had been made for the funeral at the time the report was received.

## Visited Lewiston Circle

A number of members of Kendrick Circle, Neighbors of Woodcraft, visited Moss Rose Circle at Lewiston, Wednesday evening, where they were royally entertained. The evening program consisted of initiation, entertainment followed by a nice lunch. Next week the Lewiston Circle will visit the lodge here on the regular meeting night.

Ole Licr made a business trip to Troy, yesterday morning.

## KENDRICK PRECINCT SOLIDLY REPUBLICAN

Republican Candidate For Sheriff Leads Ticket.

A light vote was cast in Kendrick precinct last Tuesday, there being but 140 ballots from over 280 registered. Charlie Summerfield, republican candidate for sheriff, led the ticket in this precinct by a vote of 113 to 23. Following is the comparative vote for each candidate, being reported in the following order; Republican, Democratic and Progressive:

- Gemmill ..... 92
- Mushlitz ..... 37

For County Surveyor

- Smith ..... 95

For County Coroner

- Short ..... 69
- Pickerd ..... 59

For Justice of the Peace Kendrick Precinct

- G. F. Walker and H. P. Hull.

## Raised The Price

In a Jew clothing store the owner had price of suits marked a dot for each \$5. He explained the marks to his son. Frinstance 7 marks meant \$35. While he was out the son sold a suit for \$55. When he returned the son told him of the sale. "We have no \$55 suits," he said. "Yes," said the son, "the price on the suit was 11 dots." "Well," said the father, "let us unite in saying God bless our flies—they added 4 dots to the price." — Ex.

# Corticelli Silk HOSIERY

Every lady appreciates fine silk hose and you will be pleased with Corticelli quality. Pure thread silk, full fashioned. The colors are pompadour, bisque, melba, nude, nickle, gunmetal and black, per pair

**\$1.95**

### THE KENDRICK GAZETTE "The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by  
Ralph B. Knepper

Subscription Price **\$1.50**

Entered at the Post Office at Kendrick as second class mail matter.

The extremes to which this country is going in order to entertain Queen Marie, ought to make visiting America a popular past-time for the crowned heads of Europe. Their visits will probably be so frequent in the future that it will become monotonous and won't cause any more comment than if the president of the United States were making a tour of this country.

What a mean man said: "Adam underwent the first surgical operation. It was a failure."

#### Defining The Middlebrow

He used to be "the man in the street." Now he is "the middle-brow." He doesn't double his negatives nor eat with his knife, but neither does he care much for Ibsen or rush from his business to spend the hour before dinner in the Metropolitan museum. He creates a demand for best sellers by buying and reading them and asking when the next one will be out, according to the efficiency expert of the New York Herald. He is not a snappy dresser nor slovenly one. He wears "what they are wearing" and pays good money for it. Now and then a politician probes his innermost thots and gets elected four or five times hand-running in consequence. Once or twice in a season a theatrical manager gives him what he wants and the ticket speculators do a thriving business for a year or so afterward. Outspoken enuf as an individual, he is singularly inarticulate in the mass. You must poll a million or two of him before you can find out what he really thinks about legislation or religion or the Volstead act, and then he may be dissembling. His claim to his title is not based on education or heredity.

He may have begun as a news-boy and progressed by keeping his eyes and ears open. He may be a college graduate. He may have a mortgage on his own house or a far bigger mortgage on somebody else's house. He is not to be distinguished by his speech nor by his appearance, save that his neck is not abraded and that he pronounces no words with a broad "a." If he has any rule of life it is expressed in the phrase, "I'll try anything once." He is the customer of the merchant, the patron of the politician, the director of the destinies of the nation. Occasionally he may be wrong, but he is quick to set himself right again. The car of liberty will never go far off the road while he is at the steering wheel.

#### Texar Ridge News Too Late for Last Week

Fred Brown of Lewiston has been spending the week at the Arthur Mounce home.

Wayne and Lafayette Randall and Wilford Simpkins of Clarkston were week end visitors at the Martin Frantzick home.

Mr. and Mrs. L. Stewart of Anatone, Wash., made a week's visit with her father, C. O. Carlson and with the L. K. Dahlgren family.

Gus Birchmier will soon be moving to Moscow from his farm to be with his family. The Misses Elvira and Katherine are attending school there.

The potato crop has been harvested in this district and a good yield has been reported.

We received word from Mr. and Mrs. Gus Dahlgren from Salt Lake City, that they arrived there safely and are enjoying the wonderful climate there.

Miss Emma Gibson is staying with Mrs. Irvn Baker in Deary and attending school.

#### She Stopped Her Paper

One of our good subscribers, who enjoys reading the O. H. P. stopped her paper this week, and she did not hesitate in telling us why she was having the paper stopped. She said: "You know I enjoy reading your paper but it no sooner comes, until the neighbors across the road come right in and borrow it, and that is the last I see of it whether I have read it or not, and I am getting tired buying the paper for them—I will let them subscribe for the paper for a while. —Severyite. Which puts us in mind of a similar experience we had a few years ago, only the woman had a different attitude in the matter. She called and copies of the local newspaper, and then explained that she had a neighbor who borrowed her paper almost immediately after she got it home from the post office, and therefore she would subscribe for another copy.—Ex.

#### ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

R. M. Wright made a business trip to Moscow returning home next day.

School closed last week on account of scarlet fever having broken out in the neighborhood. The families of Chas. Hayward, Floyd Russell, Leslie Triplett and Mrs. Bunger being quarantined with it.

Edgar Lincoln and family and Fred Hassinger and family of Gifford and Doc. Betts and family spent Sunday with Mr. and Mrs. Wm. Berriman.

Wm. Henderson, wife and daughter, and Nadine McCoy spent Sunday at the home of Elton McCoy.

Claud King of Marshfield, Oregon, arrived Monday for a visit with his parents, Mr. and Mrs. J. R. King and other relatives and friends.

A party consisting of John Stalnaker, Zoel Fairley, George Isaman and two of the Armitage boys left Tuesday for a few days hunt.

Mrs. Clinton Wright and son left last week for Potlatch where Mr. Wright has employment. Darl Wright took a truck load of their household goods to Potlatch for them.

Harry Wright started his saw-mill Monday morning.

Richard Jones is spending this week at the home of George Ferguson on Freeman Creek.

Mrs. Mary Stump left last week for Oakland and other California points where she expects to spend the winter.

Mr. Davis moved his family to the property he recently purchased in the east end of town. Mrs. Sackett moved to her property the first of the month, which was recently vacated by Ben Davis.

Walter Harris and family of Lewiston spent Sunday in town at the home of his mother.

Mr. Schuessler, our post master, returned home Sunday from Lewiston where he underwent an operation, and is much improved in health.

Mrs. Wm. Jones is helping care for Mrs. Leslie Triplett, who is ill with scarlet fever.

Grandma Thornton has moved to her residence in town where she will spend the winter.

Miss Penney left for her home in Walla Walla until school begins again.

Miss Hartung is visiting with her parents in Clarkston, during the time the school is closed.

#### His Treatment Effective

A Cobb story: Mr. Smith was speaking very frankly to his family physician. "You know, doctor," he said, "perhaps I ought not to say it, but it seems to me that the members of the medical profession are often very much in the dark about the true condition of their patients. Why, here only the other day I heard of a doctor who was actually treating a patient for pneumonia and the patient died of typhoid fever." The physician

was touched to his professional pride. "Well, I'll tell you one thing," he answered with emphasis, "when I treat a patient for pneumonia, he dies of pneumonia!"—Ex.

#### Ladies Aid Sale

The Cameron Ladies Aid will hold their Annual Sale and Supper, Next Wednesday, November 10. Chicken supper will be served from 5 o'clock until 7:30 p. m. Immediately after supper the auction sale will begin. The ladies have worked diligently during the past year, and a large variety of fine and beautiful fancy work is offered for sale. This sale is an annual event of much interest to the Potlatch ridge and has attracted many people. A good attendance is also expected this year. The sale and supper will be held in the Olday building. The prices of the supper are 30c and 10c. The ladies extend a friendly invitation to the public. 45-1.

#### First And Only

"Sir, I would like to marry your daughter."  
"What's your occupation?"  
"Radio announcer."  
"Take her. You're the first man who ever said good night and meant it."— American Legion Weekly.

Get your job printing done at the Gazette office.

## A Christmas Present

We will give to the customer who purchases the largest amount of merchandise from our store, from Nov. 1 to Dec. 24 inclusive, a beautiful 26 piece set of silverware as a Christmas present.

**GUS KRUGER**  
Cameron, Idaho

#### FRESH FLOWERS

Chrysanthemums \$2.50 to \$6.00 per dozen  
Pom Poms \$1.50 to \$2.00 per dozen  
Roses \$3.00 per dozen. Carnations \$1.50 per dozen  
Hill's Flower Store, Lewiston, Idaho

# Coming!

To The

- Potatoes, 100 pounds - \$1.20

Due to the fact that we have been so well patronized, we now deliver all orders in Juliaetta and Kendrick.

Phone 582 for Prices and Deliveries.

## Making Success of Whole Farm

Balanced Farming Is Secret of Continuous High Crop Profits.

Success with one particular phase of the farm business counts little toward the success of the whole farm. If profits are lost on some other enterprise, H. C. M. Gase, in charge of the farm organization and management department, college of agriculture, University of Illinois, points out. If the greatest continuous profit is to be secured from the farm, many things must be well done and a system of balanced farming based on good farm management must be followed, he added.

A well-balanced farm requires that first there be a good plan of the farm business, or in other words, that the farm be well organized. In the second place, the farm must be operated successfully from day to day. The study of individual farms convinces one that many men are so planning and operating their farms that they are uniformly more profitable than other farms in the same community. Our question then is, What principles are followed on these farms which make for profitable farming?

**Success of Any System.**  
In the first place, the success of any system of farming depends upon the crops which the land will grow, whether the products are sold directly or fed to live stock. The object to be sought in the cropping system is first to select those crops which will maintain or improve the soil and produce good yields of profitable crop and then secure a combination of crops which will provide for the efficient use of man labor, horse labor and equipment. The value of any crop or combination of crops is determined not by the value of the total production but by the net value above the cost of production. Our investigations indicate that after a man has once selected a good cropping system little is to be gained from changing that crop rotation as prices change. The adjustment of the farming system to price conditions can best be obtained at another point.

One of the first essentials of a good farming system, then, is a field system which makes it easy to follow a definite rotation and provide about the same distribution of crop labor each year in order to use both man labor, horse labor and equipment to the best advantage. There is a wide latitude as to the cropping system which may be employed. However, usually the cropping plan will provide for a four to six-year rotation. Some thought should be given to a selection of the rotation which will give as high a percentage of high profit crops as possible. We have, then, in planning the rotation, these points to keep in mind: a well developed field system, productive soil, a selection of high profit crops and good distribution of labor, power and use of equipment throughout the growing season.

**Live Stock Plan Important.**  
The planning of the live stock to be handled on the farm is equally important and should be considered, especially in planning for the use of available labor and equipment. Live stock frequently fits in with the crops to distribute the productive labor throughout the entire season. Cost investigations indicate that there is more latitude in choosing the amount of live stock to be produced from year to year. This is the point where the farmer can take advantage of price conditions. The man who has a well diversified farm system, including a good high-profit crop combination and productive live stock, has more flexibility in his farming plan than the man who plans to sell only certain live stock products. The farmer in the corn belt has more latitude in choosing his farm plan than farmers in most sections of the country.

The man who follows a well diversified farming system may feed more or less of his crops to live stock, depending upon whether crop products or live stock products are in best demand on the market. No section of the country offers a better opportunity of studying the most profitable system of farming and of choosing those systems and adjusting production from year to year in a way which will prove profitable through a period of years.

**Killing Lice on Cattle**  
Rarely do lice live on cattle when the hair is short in the hot summer months. But in winter and spring, when the hair or coat is long, lice may be found on cattle. Dipping the cattle in the standard tick-killing arsenical dip once every fourteen days for two or three dipplings will get rid of lice on the cattle. It is also best to change the cattle to new, clean pens, barns, sheds or pastures. If the weather is hot one application of crude petroleum will kill the lice.

**Salt Not Poisonous**  
Salt is not nearly so poisonous to chickens as has been generally believed, according to recent researches at the University of Illinois. Chickens nine weeks old were fed on a ration containing four pounds of salt to each one hundred pounds of feed, and no ill effects were noticed. Even where twice that amount of salt was fed, no actual poisonous effect was noted except that the appetite of the chickens was not up to normal.

## DAIRY

SUCCULENT FEEDS FOR DAIRY COWS

In many states the problem of supplying the dairy herd throughout the summer with adequate quantities of succulent feeds at a low cost is one that puzzles many dairymen.

This problem is of special significance to the man having a small farm with a limited acreage of pasture and with a herd too small to afford a silo. That cows decline in production and often in condition during the summer is a general observation throughout the chief dairy sections. This decline may be attributed to several causes, chief of which is underfeeding both as to quantity and quality particularly of roughage. Pastures become short and unpalatable and frequently nothing has been done to supply the deficiency caused thereby.

The different methods available for solving this difficulty are: (1) larger pastures; (2) better cultural methods for pastures; (3) more concentrates; (4) summer silage; and (5) soiling crops.

The man with a small farm, a small herd, and a limited acreage of pasture has a very limited choice of these methods. If his herd is too small to make the use of a silo advisable he may improve what pasture he has and supplement this with soiling crops.

Some work done by the dairy husbandry section of the Iowa station and reported in Bulletin 231 shows what can be done in reducing the acreage and cost of feeding cows throughout the summer on a pasture supplemented with soiling crops. With this method it was possible to carry cows through the summer on .70 acre per cow.

The data include eight years' work. During this time an average of 42 cows were pastured on 20 acres supplemented by 12 acres of soiling crops. The cows were pastured an average of 162 days and received soiling crops along with pasture 105 days. The average amount of soiling crops needed per cow was 1.02 tons; the total acreage needed for each cow was .70 acre.

The season's cost for soiling crops for each cow was \$5.20; the average cost of pasture for each cow was \$3.18, making a total cost for roughage for each cow for 162 days, \$8.38.

### Advanced Registry Test Reveals Ability of Cow

Many dairymen realize an increase of value in their herds through the discovery of cows of exceptional productive ability, while other dairymen continually lose money through keeping low producers.

The advanced registry test, says W. R. Robbers, superintendent of that service at the New Jersey agricultural experiment station, New Brunswick, is in high standing among our leading dairymen for measuring the true value of the cows in the herd. Records just completed show, for instance, that a well known dairy company in Caldwell has discovered by means of the advanced registry test three grade cows of excellent productive capacity.

One called Polly produced this past year 15,087 pounds of milk containing 747 pounds of butterfat, while another, called Noble Peers Nora, produced 14,209 pounds of milk containing 842 pounds of butterfat. A third, only one year and three hundred days old at the beginning of her test, produced 10,853 of milk containing 492 pounds of butterfat.

These cows were sired by Noble Peer, No. 33,030, a son of New Jersey's foremost Guernsey bull, Ne Plus Ultra, and were, therefore, expected to be better than average producers. Without some accurate, official test such as that of the advanced registry, however, their true value would have remained unknown and of no service in helping the dairy company to decide whether or not to keep them in the herd.

### Dairy Hints

Nobody has more poor relations than a scrub bull.

Many a good dairy herd has been set back materially in only one generation by a poor bull.

Soy beans in the silage increase its protein content by about one-half of 1 per cent.

When a calf is born find some identifying mark and describe it in writing. Something like: "Irene's calf, irregular round spot on left shoulder." It is easy to forget them if you are as busy as a farmer usually is.

There is seldom distressful overproduction of farm crops when good dairy cows are depended upon as the market, and they always pay a good price.

It will pay to milk heavy producers three times daily. This gives from 15 to 20 per cent more milk and it is far more humane.

Bovine tuberculosis is especially dangerous for babies. Hence all cattle supplying milk or milk products to the public should be free from tuberculosis.

## POULTRY

SELECTING FEEDS FOR LAYING HENS

In choosing a feed for the hen flock four things should be considered: First, the digestibility; that is, how much of it may be used to suit the purposes for which it is intended, or how much of it will actually be of value in supplying body needs and building eggs. Second, the composition; that is, the amount of protein, carbohydrates, fats, ash and water which are the real food materials used by the body. Of these, protein is the most valuable, and protein feeds are usually more expensive. Carbohydrates and fats rank second in food value. Third, the palatability; whether or not the bird likes the feed and will eat readily. Fourth, the wholesomeness or cleanliness of the feed; moldy, musty or dirty feed should not be fed. Hence good feed for the hen is easily digested, contains protein, carbohydrates, fat, ash and some water and is palatable.

The ration which is to be used should depend largely upon the material which you have at hand, but you should see that the hen has what feed she needs for the manufacture of eggs. Unless your hens have all the milk they can drink do not leave out the meat scraps in your dry mash and expect them to lay well. A good ration for many flocks is:

**Dry Mash.**  
One part corn meal by weight, 1 part ground oats, 1 part bran, 1 part shorts, 1 part meat scrap or tankage, 1 pound fine table salt to 100 pounds mash.

**Scratch Feed.**  
Two parts cracked corn by weight, 1 part wheat, 1 part oats, barley, cane or kafir corn or a mixture of these feeds.

Aside from the dry mash and scratch feed, the hen should always have access to green feed and minerals, if expected to do her best. Sprouted oats, mangels, cabbage or beets make exceptionally good green feeds. Oyster shells mixed with charcoal are very good to keep before the hens at all times. This mixture should be kept in a small hopper where litter will not be scratched into it. Always see that your dry mash is well mixed, and that it is before the hens at all times in a self-feeder or container which is high enough to prevent litter getting into the container. The scratch feed for chickens that are confined should always be placed in litter so they will have to work to get it.

The study of veterinary medicine started in France in 1702, for the purpose of training men to save horses injured in battle.

To have the laying nests full of broody hens is a fine way to reduce the labor of carrying a full egg basket.

Getting rid of the hens now that are through laying will save labor and feed, and the others will do better because of being less crowded.

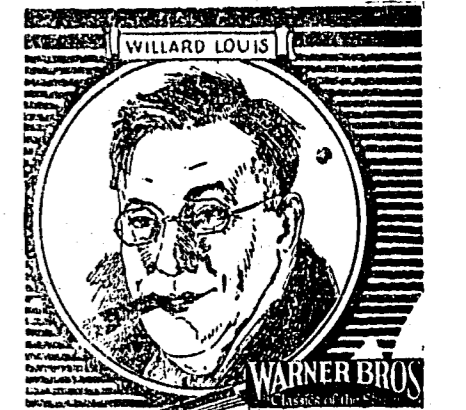

Bone meal, preferably from 2 to 4 per cent of the mash, is one of the "big three" minerals for chickens, the Ohio experiment station has found.

Well-drained land—sandy, if possible—but in any case, a sloping location, should be selected for the poultry houses and yard. Damp, wet ground breeds disease.

Poultry

Call

B. N. EMMETT & CO.

If you are interested in both eggs and market poultry it will be more satisfactory to get some of the general-purpose varieties like the Plymouth Rocks, Wyandottes, Rhode Island Reds or Orpingtons.

The surplus cockerels should go to market as fast as they reach marketable size.

It pays to keep the different size chicks separate. The larger ones will hog the feed, and delay the development of the smaller ones.

For Sale: 1 Edison phonograph, oak finish, value \$145.00. Just like new. Special this week \$75.00. Red Cross Pharmacy.

In selecting the pullets you are going to keep, do not make the mistake of choosing simply the ones that are largest. Size is an important consideration, but it is not the only thing by any means.

## "North Coast Limited" Equipment Selected for Queen Marie's "Traveling Palace" in America

For thirty-nine days Queen Marie and her royal entourage are living, traveling and receiving guests in Northern Pacific cars. The Queen's parlor or reception room is one of the new observation cars running regularly in the "North Coast Limited". The lounge or reception hall resembles the living room of a modern home, with deep, comfortable divans, restful chairs and library lamps. The car has a broad sight-seeing platform with a searchlight for "night-seeing". The searchlight has the same power as the locomotive headlight. In addition to the main lounge, the car has two card rooms, a large boudoir and bath, a barber and beauty shop, a second bath and a buffet. The windows of this car are the largest

windows ever built in an observation car. The Queen and Princess Helena are living in the "Yellowstone", the business car of the president of the Northern Pacific. A "North Coast Limited" dining car is serving members of the royal party. The Northern Pacific dining car department has arranged to serve typical Northwest foods, such as fruit and dairy products, wild duck, wild rice, elk, bear, buffalo and salmon. The train reached Minneapolis and St. Paul from Winnipeg October 31 and left November 1 over the Northern Pacific for the trip through the American Northwest. Brief stops will be made at Bismarck, the capital of North Dakota, and Helena, capital of Montana, be-

cause of invitation from Governor A. J. Sorlie of North Dakota, and Governor J. E. Erickson of Montana. At the Queen's request a stop will be made at Mandan, N. D., where she will meet Indians of the Sioux tribe. One member of the reception committee is expected to be Red Tomahawk, who killed Sitting Bull. The Indians are planning to honor the Queen in their own way by making her a member of their historic tribe, and presenting her with a tribal gift, according to an ancient custom. A real western rodeo will be conducted at Medora, N. D., in the Badlands of North Dakota, the ranch home of the late President Roosevelt. This has been arranged by

the cowboys of the Little Missouri River country. Plans for the rodeo have been in progress for weeks. The train will follow closely the trail of Lewis and Clark on their 1803-06 historic expedition of the Northwest through the Red River Valley, through the Yellowstone Rockies into the Inland Empire, to Spokane and to the Columbia River and Cascade Mountains. Queen Marie will dedicate the new Maryhill Fine Arts museum, Maryhill, Wash. This museum, which is located between Spokane and Portland, was built by Samuel Hill, son-in-law of the late James J. Hill. The Queen is bringing a baggage car of Rumanian treasures to this museum.

### FIGHT LICE AND MITES IN SUMMER

Kerosene has been used probably more than any other one thing on the average farm for fighting the lice and mites found in the poultry house. It is sudden death and very satisfactory except for one thing: evaporation is rather rapid and a new spraying or other method of treatment is required in a short time. It being always on hand is a real advantage. Mixed half and half waste machine oil or crank-case oil, kerosene is much superior to use alone and will remain effective much longer. Some people report extremely satisfactory results by mixing kerosene and commercial fly spray for poultry use. This will often last two or three months. Crude oil such as is burned in the furnaces of many people and also used for hog dip, is very effective in combating lice and mites. Probably the most effective of all the spray preparations that can be used is a coal-tar wood preservative that can be purchased at most lumber yards and drug stores. A poultry house sprayed with this should not be further troubled with mites or lice for another year. It is highly desirable in using this spray to be very careful to get every part covered. Also care should be used to put it on rather thinly, especially around the nests and perches. It will stick to the feet of the hens and when carried to the nests get on the eggs and injure their quality both for market and for hatching. The season of rapid multiplication of lice and mites comes with the warmer weather of spring and effective eradication is more easily accomplished then than later, as well as saving the drain upon the flock.

### Build Complete Machine for Production of Eggs

Don't omit feeding because the fowls are on the range or running through the feed lots. No matter how fine the breeding, how careful the brooding, how long the pedigree, unless the chicks and young stock are kept growing uniformly and continuously through the growing season, they cannot develop to the fullest extent of which they are capable. Only well-grown hens lay their best; only well-grown males make the best breeders. It is not so much a question of getting maturity for the fall and early winter shows as securing a complete machine for the egg factory. Both young and old should have access to the feed hopper all the time: the old stock for feather-making material, the young for frame, meat and feathers.

### Various Mixtures Used for Feeding the Ducks

Where only a few ducks are raised it is satisfactory to use the same feed for the ducks as is used for the chickens. On commercial duck farms various mixtures are used. A common one for use during the first three weeks is made of equal parts of corn meal, bran, low-grade flour, with 5 per cent meat scrap and a little oyster shell and grit. This is fed five times a day in amounts so that the ducklings will clean it up rapidly. After the ducks are three weeks old a mixture of two parts corn meal, one part bran, one part middlings and 10 per cent meat scraps, with some oyster shell and

oats during the first part of the fattening season, gradually changing to corn as the weather becomes cooler. The majority, however, begin feeding heavily on corn about November 1; and, since turkeys are not accustomed to such heavy feeding, scours often result, especially if new corn is used. New corn can be fed safely if the turkeys are gradually accustomed to it by feeding lightly at first and more heavily afterward. Confining turkeys during the fattening season to prevent their using so much energy in ranging has been tried to some extent, but with very little success.

### Provide Good Mash Feed to Increase Egg Laying

The average hen would lay 20 eggs more per year if she was supplied with a good dry mash all year round, according to the poultrymen. Most of the eggs would be laid during the period of the year eggs are highest in price and the income from them would more than repay the cost of the extra feed consumed. Many farm flocks are permitted to scavenge for their feed at this time of year. Their ability along this line is not nearly as great as is often thought. If all hens were provided with a good mash throughout the year they would molt later in the year and the new feathers would develop rapidly. The rest period would therefore be reduced considerably. Dry mash given in the summer months is a good insurance of higher egg production during the early winter months.

### RAISING CAPONS AND COCKERELS

With a view to obtaining definite figures showing the relative size and rate of growth of capons and cockerels, the author carried out experiments in 1919, at the Maryland agricultural experiment station. Forty-two White Plymouth Rock cockerels, all hatched on May 28 in the same incubator, were divided into two groups as nearly equal as possible, as regard health and vigor. On May 30, one of the groups were caponized. The two groups were kept entirely separate, and their gain in weight and the food they consumed were recorded.

### Poultry Notes

Chickens need sunlight to prevent rickets. All diseased birds should be burned. Clean drinking water is essential. For details or suggestions as to poultry-house construction or fixtures apply to your county agricultural agent. If you want good egg production next winter, see that your pullets are properly fed and cared for during the summer months. One-half pound of fine table salt added to every hundred pounds of mash will be good for your hens. Chicks making a normal rate of growth will, at the end of 12 weeks, weigh 25 times as much as they did at hatching time. Sodium fluoride or blue ointment have proven effective when applied to the birds for lice. Painting the roosts and nests or spraying the coops with a mixture of waste crank-case oil and kerosene will "get" the mites. Eggs being porous quickly absorb bad odors and therefore should always be stored in clean places. The real reason why the man who milks a few cows makes money is because he works harder. Thrift is almost always rewarded. The smut odor and tiny smut specks cannot be removed from flour made from smutted wheat. The millers are, therefore, justified in docking for smut. The farmer's remedy is to treat his seed wheat. TURKEYS REQUIRE PLENTY OF RANGE. Once upon a time every farm family had its flock of turkeys, which supplied plenty of birds for the home table and some for the tables of those who lived in the towns. Turkey raising in recent years, however, has decreased, one of the main reasons for this decline being that as the population of the country increased farming became more intensive and the area suitable for turkey raising was reduced. Turkeys require plenty of range in order to thrive. Many farmers, however, still consider turkeys a profitable side line on the farm, and about the first of October begin to consider how to put more flesh on their turkey flock. During the summer and early fall turkeys can find an abundance of feed on the average farm. Grasshoppers and other insects, weed and grass seeds, green vegetation, berries and grain picked up in the fields all go to make up the turkey's daily ration. When this natural feed is plentiful, very little need be added until fattening time, except for the purpose of bringing the turkeys every night to roost and to keep them from straying from home. For this purpose one feed of grain every night just before roosting time is sufficient. In fattening turkeys for the market an excellent plan is to begin about October 1 to feed night and morning, feeding only so much at a time that the birds go away a little hungry, and gradually increasing the quantity until they are given all they will clean up three times a day during the week before marketing. By the latter feeding is meant that they are fed until they leave the feed and walk away. Some turkey raisers feed wheat and

### Young Poultry Especially Susceptible to Disease

Turkeys, like other fowls, are subject to roup, but when the greater part of a half-grown flock dies there is a strong suspicion of something else than roup to be entertained, says the Rural New Yorker. Young poult are especially subject to blackhead and coccidiosis, two diseases which have made it almost impossible to raise any large number of turkeys on farms where good-sized flocks were formerly reared without trouble. These diseases show themselves by drooping, weakness in walking, gradual loss of flesh, more or less diarrhea, and finally death. They attack young poult from a few weeks of age until maturity. Usually a few survive out of any flock, but mature birds may also show these troubles and die after having become full grown. There are two preventives that have gained some reputation in the treatment of these diseases, but nothing can be said to be anything like a certain cure. Powdered catechu may be given in the drinking water of the flock, one teaspoonful being added to each three gallons of water, this being done for three days at a time, with an interval of a day or two between the three-day periods. This is for coccidiosis. For blackhead, powdered ipecac, one teaspoonful in the mash for each twenty birds, old and young, may be given at intervals, beginning early. The symptoms of these two diseases are much alike.

### Poultry Facts

The importance of strong, vigorous chicks cannot be overestimated. One of the costs of running a poultry business is the death rate among laying stock. Nothing is more discouraging than to start with a bunch of small, weak, puny chickens. The poultry house need not be expensive or elaborate but must be roomy, well ventilated and convenient. There are general rules for feeding, but sudden changes in weather, extreme cold or heat, or wind will make some change in the needs of the chickens. The age and breed of the laying flock also has its influence on feeding. Some people cull their flocks quite successfully by selling those that are the last to leave the roost in the morning. Blackhead is the most fatal turkey disease. Parasites causing it are carried by chickens, therefore keep the young "turks" and the chicks apart. Male chicks grow faster than the females, and as early as two weeks of age there is a significant difference in the rate of growth between the sexes. The man who believes in signs says that the hen that blunts her nails scratching is the grandmother of the 200-egg hen.

**Chute and Stanchion Are Favored for Dehorning**

A strong chute and stanchion is recommended by the Missouri dairy department for ringing and dehorning, and for any other work with mature animals in the herd. This chute is 28 inches wide, 5 feet high and 7 feet long with flaring wings to make it easier to get animals into it. A stanchion is made at the end of 4 by 4's, 8 inches apart when closed. In the absence of a chute the bull should be thrown and securely tied when ringing or dehorning. Most farmers know how to throw an animal with ropes. One of the simplest ways is to use three ropes, one to tie the animal to a post or tree, using a knot around the neck that will not draw. The second rope should be longer and is tied with a slipless knot loosely about the neck back of the first rope. It is then run between the forelegs and looped about the chest with another loop around the flank and the loose end passed back between the hind legs. By pulling on this rope the bull may be thrown and the third rope used to tie his legs. Both ropes should be tightened and securely tied to a tree or post.

**DAIRY FACTS**

**SCANT PASTURES IN LATE SUMMER**

The condition of the pastures during late summer makes necessary certain changes in feeding dairy cows, says the New York State College of Agriculture in a statement issued recently. At this time the pastures are usually rather scant, which makes grazing more difficult.

The different pasture plants are also more mature. This means that they contain more dry matter but less protein. These conditions are, in turn, accompanied by severe hot weather and by a host of flies which bring much discomfort to the animals. Because of these things the dairyman must use all his knowledge and skill to the best possible advantage in order to maintain the milk flow.

First of all, heavier feeding is needed. The deficient pastures must be helped out with more feed, either through sillage crops, or grain, or both. More protein must be provided in the grain mixture not only because of a lack of it in the pasturage, but also because grain will make up a larger proportion of the daily ration. A simple yet suitable combination of feeds is as follows: 300 pounds wheat bran, 300 pounds hominy or corn meal, 300 pounds gluten feed, 100 pounds linseed oil meal.

This mixture contains 40 per cent of high protein feeds. This is just about the right proportion to make a balanced ration with late summer pasture grass.

For the man who wants greater variety the following mixture is suggested: 200 pounds wheat bran, 100 pounds standard wheat middlings or ground oats, 300 pounds hominy or corn meal, 200 pounds gluten feed, 100 pounds linseed oil meal, 100 pounds cottonseed meal; 43 per cent.

This combination is similar in composition to the first, but is somewhat more expensive under present market conditions.

**Bovine Tuberculosis Is Fast Being Eradicated**

Bovine tuberculosis is now being eradicated from the herds in the United States. In some states this infection of bovine tuberculosis is found in 10 per cent of all the cattle. This is the case in the state of New York. Most of the Southern states have less than 1 per cent and some have less than one-half of 1 per cent. It will require many millions of dollars, however, to eradicate the disease. Some four million dollars are being spent annually and the work has just started. In New York state trainloads of infected cattle are shipped and slaughtered where many of them are condemned and tanked. The South is exceedingly fortunate, because this disease has been kept out of the various Southern states by live stock sanitary laws. Also many states have been testing most of the milk cows and pure-bred cattle and destroying all of the reactors.

**Bull Is Most Important Animal in a Dairy Herd**

The most important animal in a dairy herd is the bull. As he is the sire of all the calves, he alone is responsible for half of the individuality and milking ability of the future dairy herd. The cow is important, but she can exert her influence on only one calf each year.

This important animal at the head of a dairy herd should by all means be a pure bred. It is not so much the registration papers that make the superior individual, but with the registration papers the owner knows exactly what breeding and performance records are behind his herd sire.

A good pure-bred bull is one with high production among his ancestors. The dam of the bull and the dam of the bull's sire should both have records which are far above the average of the cows to which the bull will be mated.

**Dairy Facts**

Keep the calf pails really clean if you want healthy calves.

Legumes will always lower the feed cost on a herd of dairy cows.

In testing cows it is important that they be tested for several milkings before they are condemned or praised for high-testing milk.

Good dairy cows are becoming scarce and prices are advancing. Heifer calves from all good cows should be raised. All indications point to a ready market at profitable prices.

To produce good quality cream use only clean separators; cans and milking utensils. Cool cream immediately after it is skimmed to near 50 degrees Fahrenheit.

Supply water daily while the calf meal or milk is being fed. A good time to supply the water is during the middle of the day.

Using a milk stool on a cow's back. It has been found by actual experiment, improves the cow exactly as much as the milk stool.

**POULTRY**

**CARE OF PULLETS VERY IMPORTANT**

Poultrymen are coming more and more to the conclusion that summer care of the young stock cannot be overemphasized. Observation throughout the state has shown that the success of a poultryman with a flock of laying birds is usually the reflection of his success in rearing the pullets.

It is generally acknowledged by the leading poultrymen that one does not have to raise poultry for very many years before the importance of clean, steady, and well-grown pullets is recognized. In nine cases out of ten the flocks which experience trouble during the winter months are the flocks in which trouble was prevalent while they were on the range, according to L. M. Black, extension specialist in poultry at Rutgers university.

Growing a clean profitable pullet includes a great number of small steps which when put together assure success, says Mr. Black. As with the mature birds, the houses must be comfortable and clean. Overcrowding and overheating have their effect in stunting the growth of the birds, and so a square foot of floor space should be allowed to each growing pullet and, in addition, sufficient roosting space. On hot days the houses should be cool and comfortable.

Frequent house cleaning is practiced by the most successful poultrymen to help prevent a rapid spread of disease during warm, moist weather. This, says Mr. Black, is particularly effective against coccidiosis.

Alternate ranges which supply an abundance of green feed and some shade are the rule on the best farms in the state. The birds are never without a daily supply of green feed. Shade is considered essential during the hot days. The ground, now believed to be the source of many of our most troublesome diseases, is frequently cropped and cultivated so that the direct rays of the sun may act as a germicide.

**Culled Poultry Flocks Are Earmark of Success**

Exceptionally successful poultrymen who do not cull their flocks periodically are in the minority in New Jersey, according to the state poultry specialist. The practice is becoming universally recognized as essential for greatest profits.

Several advantages of culling, or slacker elimination, are mentioned by the specialist and first among them is simplicity and ease. Not a cent of outlay is necessary and the benefits are almost immediately received. Some hens are poor layers but great feeders. To wait for them to lay is to wait for something that will amount to little even if it does finally occur, for these birds soon quit.

Various characteristics distinguishing the slacker from the layer are used by poultrymen in clearing from their flocks all of the boarders. Appearance of the tail feathers, color of the comb and wattles, and shape of the body both to visual and manual examination, are among the signs read by poultrymen. Newcomers in the business are supplied, on request, with helpful bulletins by the New Jersey College of Agriculture, New Brunswick.

In addition to requiring no outlay, culling causes no loss. The eliminated birds are sold at good prices on the poultry meat market.

Because of the influence of heredity, the general laying average of a flock is materially raised over a period of years by persistent culling and the use of good cockerels. This factor is considered particularly important by leading poultrymen.

**Fix Flavor of Eggs**

In investigations made some years ago, by feeding nitrogenous and carbonaceous feeds, it was found that hens fed a ration of wheat, middlings, cottonseed meal and skim milk, produced eggs with a disagreeable flavor and odor, small yolks, and poor keeping qualities. On the other hand, hens fed largely on cracked corn and corn dough laid larger eggs with richer yolks and better flavor. When there was a proper blending of both nitrogenous and carbonaceous materials, there was improved flavor.

**Poultry Facts**

The well-fed, well-housed hen certainly knows her eggs.

Whitewash looks good on the outside of poultry houses, but on the inside it does good.

In ancient times capon meat was highly prized by epicures. It is growing in popularity in this country.

Deep cultivation of corn is not desirable and usually is detrimental especially at the time of the last cultivation.

Disease usually gets into a flock through the weak fowls, which it attacks first. Keep these culled out and you'll have a healthier flock.

Roup may be caused by dampness or drafts in roosting quarters, or poorly ventilated roosting quarters. Underlying causes may be poor nutrition, lice, mites or other parasites.

**DAIRY**

**WHEN TO CUT FOR SUCCULENT SILAGE**

(Prepared by the United States Department of Agriculture.)

Almost any forage crop has all the chemical requirements to make a good silage. The only requirement, therefore, says the United States Department of Agriculture, for a palatable forage crop to make succulent silage is that it be cut when the moisture content is right. If cut when the moisture content is too high the silage will be water-logged or the soluble feed materials will be lost by drainage. If the moisture content is too low and water is not added, the silage will not be succulent and will not pack well enough to prevent the inflow of air and the growth of molds.

This general conclusion is the result of experiments conducted in the laboratory by chemists of the bureau of dairying in which corn, sunflowers and sudan grass, all cut at various periods of growth, were ensiled in tubs 2 feet in diameter and 4 feet deep. The investigations included a study of the chemical composition, keeping quality, changes during fermentation, and losses in feed materials while in the laboratory silos.

Corn for the test was cut at four different stages of maturity—(1) when 20 per cent of the ears were in the dough stage and 80 per cent in the milk stage, (2) when 40 per cent were in dough and 60 per cent in milk, (3) when 60 per cent were in dough and 40 per cent in milk, and (4) when 80 per cent were in dough and 20 per cent in milk. Study of the resulting silage showed the fourth stage to be the best time to cut corn for silage. At this stage there was the least loss of feed constituents in the test silos. This fact, coupled with the good score made when the fourth-stage silage was opened, indicated that the best corn silage results if cut when the ears are 80 per cent in the dough stage and 20 per cent in the milk stage.

Sunflowers are generally cut when too immature, according to the results of this study. These tests indicated that any stage between the time when all plants are in flower and before the petals fall is equally good for this crop.

A study of the growing plant and the resulting silage showed that sudan grass cut either at the early blooming stage or at the middle to late blooming stage makes very satisfactory silage.

**COMING! United Doctors**

The Doctor who has charge of the State of Washington is

**A SPECIALIST**

in Chronic Diseases and Clinical Medicine

Will be at

**Davenport Hotel, Spokane**  
Wednesday, Thursday, Friday  
November 10, 11 and 12.

**Cosy Nook Hotel, Palouse,**  
Saturday, November 13.

Office hours 9 a. m. to 3 p. m.

No Charge for Consultation

The doctor is a graduate in medicine and surgery, licensed in the State of Washington. He visits professionally the important towns and cities, and offers free consultation to all, except the expense of treatment when desired.

He treats Chronic Diseases of long standing and has to his credit many wonderful results in catarrh, ulcers of the stomach, diseases of gall bladder, bowels, blood and skin, nervous disorders and diseases of heart, kidney and bladder, bed wetting, rheumatism, sciatica, leg ulcers, varicose veins, rectal ailments and chronic constipation.

If you have been ill for any length of time and do not get better, call on the doctor, as improper measures rather than disease are often the cause of your long standing illness.

Special attention is given to each case, and an earnest effort made to attain the best possible results.

Remember above dates and that the doctor specializes in Chronic Diseases.

Laboratory: 335-336-337 Boston Block, Minneapolis, Minn.—Adv.

**NEWS NOTES FROM THE KENDRICK SCHOOLS**

**Good Attendance Shown in All Grades.**

The Thanksgiving decorations were put up in the primary room this week. Turkeys cut from crepe paper adorn the windows, and appropriate pictures, which were mounted, are on the walls. The black board border consists of groups of the "Three Bear Family", the mother bear, father bear, and baby bear, all cleverly dressed.

The first graders are dramatizing a Mother Goose story from their Primer.

A good crowd was present at the play given by the primary room. Sixteen dollars and ten cents were received from the entertainment. The two best ticket sellers are Bill Schulze and Roy Johnson. Bill Schulze received the first prize, and Roy Johnson, the second prize.

The fifth and sixth grades have made a very good record in attendance for the month of October. Twenty, out of the enrollment of twenty-nine, have a perfect attendance record. There were three cases of tardiness in the two grades.

Lois Johnson and Helen Emmett gave a party in the high school auditorium, last Saturday night. All of the high school students and a few outsiders were invited. Mr. and Mrs. Taber, and Mr. McGregor chaperoned the party.

The party was in the form of a Halowen masquerade, and a great variety of clever costumes were worn. The decorations, also, were black and orange. Black witches, cats, etc., adorned the walls, and streamers of black and orange crepe paper extended across the room.

The refreshments were brought by the high school students, and they were as follows: pumpkin and apple pie, cider, pickles, sandwiches and doughnuts.

The parties given in the high school this year have all been very interesting, and surely well worth attending.

A meeting of the Athletic Association was held Monday. Shirley Clem was elected treasurer. It was decided that if the dues were paid for the entire year, at one time, they would be reduced to a total of seventy-five cents.

The General Assembly program given by the juniors, last Friday, was:

Bible Reading ..... Lizzie Jones  
General Song ..... "Duty's Call"  
Reading "An Auction Wedding"

Harold Parks

Song ..... "The Mumps"

Mabel Taber

Song, ..... "Pal of My Dreams"

The Johnson Sisters. ....

General Song ..... "Janita"

Mr. Lynch gave a series of tests, Tuesday. The unlucky classes were: English IV, American History, General Science.

These tests covered nearly the whole book, as far as so far studied, and the results, although not yet announced, will probably be fair, considering that the students were given no time for preparation.

**Chronometry**

"I'm fast," the little flapper said,

"And her wrist watch she eyed.

"I'm slow," said he, consulting his.

"You're right," said she — and sighed.—Ex.

"Your husband," said an attorney at Pittsburg to a widow, "desired to be cremated." "Just like him," moaned the bereaved, "he was always leaving his ashes around."—Ex.

**Our Fifth Annual**

**TURKEY SHOOT**

In the City Park  
**KENDRICK, IDAHO**

**SATURDAY NOV. 20, 1926**

40 yds. off hand, 10 yds. resting. Starting at 6 o'clock.

**EXTRA**

The Kendrick Hardware Co. offers a special prize to the shooter, under 17 years of age, making the best 3 shot score. Entry 5c, one re-entry permitted.

Manly & Roberts

**GLEANINGS**

Miss Elberta Walker underwent an operation for appendicitis last Friday. She is reported to be getting along very nicely at the Inland hospital in Moscow.

Elmer M. Paulson, a member of the board of county commissioners of Latah county, was a Kendrick visitor last Monday afternoon.

N. E. Ware purchased the George Leith residence the first of the week. The Ware family will move in this week from the ranch on Bear ridge, although Mr. Ware will continue to farm his land. The Leith family has rented the McDowell residence across from the hotel.

The Idaho-W. S. C. game is to be played at Moscow tomorrow afternoon. A number of Kendrick people have signified their intention of attending the game.

Merton Pierce of Texas ridge shipped a carload of potatoes to the Lewiston market last Saturday, receiving \$1.50 a sack for them.

Jack Pickerd of Troy was a Kendrick visitor Tuesday of this week.

Rufus May, who has farmed on Bear ridge for a number of years, is moving to his ranch near Troy this week.

Harold Thomas sprung this one the other day: One Scotchman said to another Scotchman, "I'll bet you fifty cents I can stay under water longer than you can." They put up their money. Both of them drowned.

County Commissioner John Cone of Princeton was a Kendrick visitor last Saturday.

A very delightful time was reported at the dance given at the Fraternal Temple last Friday evening by Mr. and Mrs. Harold Thomas. The hall was beautifully decorated, appropriate to the Halloween season.

The Women of Woodcraft surprised Mrs. Minnie McDowell at an informal party last Wednesday. A very pleasant time was spent.

Dave Waltz and son, Lloyd, returned from the Selway country the first of the week, each with a fine deer.

Elbert Kuykendall returned home last Sunday after taking a series of treatments at Spokane, where he has been the greater part of the summer. His many friends in this locality will be glad to learn that he is apparently very much improved in health. He is now able to get around the house on crutches.

Mrs. Calista Grinolds went to Lewiston Wednesday afternoon to visit her daughter, Miss Lucile.

Ed Taylor of Juliaetta was transacting business in Kendrick last Wednesday afternoon.

Jack Taylor of Juliaetta was a Kendrick visitor Thursday morning.

Mrs. Wilma McIntire returned to her home in Montana, yesterday after visiting her parents, Mr. and Mrs. Wm. McClelland near Southwick.

Charles Noble of Noble's store at Juliaetta has agreed to write Juliaetta news for the Gazette, beginning next week. Anyone having items of interest in that community please phone or hand them to Mr. Noble as it will assist him greatly. The Gazette hopes to serve the Juliaetta territory in every way possible and will be glad indeed to have the news to publish from that section.

S. D. White of Lewiston was in Kendrick on business yesterday.

L. J. Herres went to Moscow Thursday morning where he expected to undergo quite a serious operation.

The Watts and Knepper families of Kendrick enjoyed a very pleasant evening last Saturday at the Keene home on Bear ridge where they were dinner guests of Mrs. Keene and Miss Johanna Hooker.

Miss Thelma Perryman was taken to a Moscow hospital last Sunday where she is ill with heart trouble. Reports as to her condition are to the effect that she is improving.

Frank Brocke, who is working at the State Bank at Troy, spent the week end in Kendrick with his mother.

**Big Bear Ridge**

W. R. Johnston, Union Sunday school organizer, spent Friday with friends here.

Miss Helen Shind and Esther Kleth left Friday for Spokane. Mr. and Mrs. Gabriel Forest, Rev. and Mrs. Peter Hesby of Deary spent Monday in Lewiston.

Mr. and Mrs. Gust Lucken of Kendrick were Sunday visitors at the Hooker home.

James S. Nelson was a Moscow business visitor, Friday.

Miss Ida Morey came home from Little Bear ridge to spend the week end.

Mr. and Mrs. Wade Keene and Miss Johanna Hooker spent Thursday in Moscow.

Mr. and Mrs. Zack Aas were Deary visitors, Sunday.

Preaching services at the Lutheran church, Sunday, November 7th at 11:00 a. m.

J. C. Bean is enjoying a visit with his brother from the East.

Harry and Frank Fairfield have gone on a hunting trip.

T. H. Rognstad of Clarkston was a business visitor here last week.

Irvin Bean has rented the Al McKee farm.

Mrs. W. E. Hecht entertained the Ladies Guild at her home Wednesday afternoon.

A three-act comedy play will be given by home talent at the Community Hall, Saturday evening, November 13th. Remember the date and watch for further announcement.

The Lutheran Ladies Aid will hold their Annual Fancy Work sale at the Taney school house, Saturday, December 4. Dinner will also be served.

Miss Veal Whitcomb has returned home having spent the summer with Mrs. Leonard Davis near Leland.

Mrs. D. Stevens is visiting at the home of her sister at Moscow.

85 votes were cast at the general election in the Bear Creek precinct.

Mr. and Mrs. Leif Field and little daughter of Colton, spent Monday at the Anton Nelson home.

Miss Gertrude DeWinter spent the week end with home folks.

Mr. and Mrs. Walter Hoffman and family of Agatha were visitors, Saturday and Sunday at the Ed Johnson home.

Miss Amy Tupper of Agatha spent the week end with Mrs. Enoch Harrison.

Sunday dinner guests at the J. M. Woodward home were Mr. and Mrs. Russell Smith and family, Mr. and Mrs. Robert Smith and family, Mr. and Mrs. A. H. Smith, Mr. and Mrs. Harry Smith and family and Mr. and Mrs. Clyde McGhee and little daughter.

Jack Withrow, who has been working near here for the past year, has accepted a position in a store in Spokane.

Mr. and Mrs. Parsons spent Friday at the James Helton home.

Mrs. Grant and two children of Canada spent the past week at the home of her sister, Mrs. Harry Smith.

Mr. West, sales manager at the DeWinter & Goudward store sale for the past month, left Sunday for Everett, Wash. to conduct a sale there.

Mr. and Mrs. Virgil Fleshman and family were Sunday dinner guests at the J. E. Fleshman home.

Mr. and Mrs. Lloyd Schoeffler, who have been living here for some time have moved to Pomeroy to make their home.

Lillian and Marie DeWinter were callers Sunday afternoon at the L. L. Davis home.

Dinner guests Friday evening at the home of Mr. and Mrs. Calvert were: George Calvert and wife of Cream ridge, Miss Spalding, Anna Porter, Mr. Snyder, and Mr. Dickson.

SCHOOL NOTES

Prof. Iseman of Southwick called at the school house Friday morning, bringing with him, Miss Spalding, the State Anti-tuberculosis representative. Miss Spalding gave a talk to each room and weighed and measured the children.

The program and carnival was well attended and a good time enjoyed. Quite a little money was raised for permanent play ground equipment.

The vacant room at the school house has been arranged with a stage and curtains, and will be used for a general assembly room.

Jessie Huffel entered the 9th grade, Monday.

The boys of the school have ordered a soccer ball and hope to have a few games this season.

Mrs. Angus Fry spent the week end in Lewiston.

Miss Melva Walker spent the week end at the Roy Morgan home.

**WEEKLY CHRONICLE OF LELAND NEWS**

**Happenings in And Around This Potlatch Town.**

**REMARKABLE PICTURE AT KENDRICK THEATRE**

"Babbitt" by Sinclair Lewis is the Attraction This Week.

This picture has the stuff in it to appeal to every man, woman and child who loves to see

good, clean and yet throbbing stories that reflect their lives. This is the story of YOU, ME and the other fellow. It is the story that has rocked millions of Americans out of their apathy. You will see why on the screen. This picture is being shown at the New Kendrick Theatre, tonight and Saturday, and we ask all those who are in favor of pictures of the better kind to see "Babbitt", it is one you will be well pleased with and will thank us for bringing it here.—Adv.

**METHODIST CHURCH NOTICE**

Services at American Ridge church Sunday morning at 11:00 o'clock.

Services at Kendrick at 7:30, Subject: "Christian Fidelity." You are cordially invited.

L. E. Taber, Pastor.

**Presbyterian Church**

Sunday school ..... 10:00 a.m.  
Church service ..... 11:00 a.m.

We were glad to have the men with us last Sunday for Bible study. They enjoyed it too, and they are coming back. You better join them. The topic for the morning service is "100 Percent Christianity".

Dale Lanphere, Pastor.

**Emanuel Lutheran Church**

Rev. E. A. Rein, Pastor  
Cameron, Idaho

Sunday School ..... 9:30 a.m.  
Church Service ..... 10:30 a.m.

Church Council first Monday in the month.

Ladies Aid first Wednesday in the month.

Come and worship with us.

Send your job printing to the Kendrick Gazette. Good printing, good service.

**Average Fleece Weight**

The bureau of animal industry says that the average fleece weight for the United States is approximately seven and a half pounds. There is a great difference between the Southdown and the Rambouillet breeds, the wool production varying in Southdowns from six to seven pounds; in well-bred and well-fed Rambouillet, from twelve to fifteen pounds.

**MEN'S BOYS' AND LADIES' SWEATERS**

We have taken several lots from regular stocks and grouped them at one low price for this special selling. The values are truly exceptional. Included are Bradley and Jentzen sweaters. They come in coat or slipover styles and have popular shawl collars.

Slip into a **Bradley** and out-of-doors

Slip into a **Bradley** and out-of-doors
