

### NEWS FROM THE NEIGHBORING TOWNS

Clipped From Papers Published in Latah County.

#### A Business Change

As we stated last week, the Pollett closing out sale had come to an end and the store is closed—and it is still closed, but will be opened again for business about the middle of this month.

The firm has been reorganized and Harry Hanson has taken over the interest of W. E. English and will be actively engaged in the store.

The interior of the store is being remodeled and a meat market is being installed, which will be in charge of an experienced butcher, a Mr. Lukin from Potlatch. A large cooling room is being installed and they will be prepared to handle all kinds of meat and vegetables, according to Mr. Pollett.

Mr. English has been connected with the Pollett store for the past eight and a half years and the family has made many friends here who will be sorry that they are leaving Genesee. Just where Mr. English has decided to locate, if he has done so, has not been learned by the News.—Genesee News.

#### Skagg's Buy Safeway Stores

Confirmation of rumors involving the consolidation of the Skagg's stores and interests of the Safeway Stores in Pacific coast and Pacific northwest territory, was made Thursday by L. L. Skaggs, president of the former concern, the Moscow manager having been advised, as carried in Associated Press dispatches.

Assets of the concerns involved are more than five million dollars, and the deal includes 784 retail grocery stores, 122 meat markets, 6 bakeries and similar activities operating in 10 western states. Estimated total annual sales of the units involved are approximately \$60,000,000.

No changes in personnel of the concerns is contemplated, the Moscow store has been advised.—Star-Mirror.

#### Ships Two Cars of Spuds

Two cars of potatoes were loaded and shipped Tuesday from Deary; one to New Orleans, La., and the other to Nashville, Tenn. They were bot by Wm. Duthie of the Duthie Seed House of Lewiston at \$1.25 a hundred. Retail prices on Idaho spuds in the east are around five cents a pound.

#### Women of Woodcraft Elect

The Women of Woodcraft held their regular meeting Wednesday night of this week. The following officers were elected: Past Guardian Neighbor, Lillian Bolon; Guardian Neighbor, Helen Boyd; Advisor, Violet LaHatt; Clerk, Grace Helpman; Banker, Minnie McDowell; Attendant, Freddie Schulze; Magician, Nellie Deeter; Captain of Guards, Jessie Callison; Inside Sentinel, Amy Aiken; Outside Sentinel, Flora Davis; Managers, Paul Schulze, Frank Chamberlain and Thos. McDowell.

After completing the regular business of the lodge, all present enjoyed a splendid program. This was followed by a delightful social hour. Then came the delicious refreshments—the kind for which the ladies of Kendrick are noted. This ended one of the most profitable and pleasant lodge meetings. About twenty guests from Lewiston and a number of others from Orofino and St. Maries were present.

#### Undergoes Another Operation

Mrs. Beulah Seeley, who is in the St. Lukes hospital at Spokane, and who recently underwent two major operations, was operated upon for the third time, last Saturday morning. Reports are that she has suffered a great deal, but is getting along as well as could be hoped for at this time.

### JULIAETTA BOY NOW IN MOVIES

Glenn Tryon Now Comedy Star.

Mr. Tryon, representative for a collection agency, was in town Monday. Mr. Tryon is a former resident of Juliaetta. His son, Glenn Tryon, who was born at Juliaetta 28 years ago, is now a comedy star for Hal Roach, comedy producer, and his pictures are released thru the Pathe Exchanges, Inc. One of Glenn's two-reel comedies was shown at the Liberty Theatre, Lewiston Tuesday of this week.

### NORTH AND SOUTH HIGHWAY CLOSED

Passage Thru Salmon River Canyon Cut Off For Some Time.

The North and South highway will be closed thru the Salmon river canyon for most of the time until the highway contract of 8.75 miles in the Pollock sector is completed, it was announced Tuesday at the district highway office, says the Tribune.

Beginning Tuesday and lasting for a period of two weeks, the Pollock sector will be entirely closed to travel, and after that date the highway department and contractors cannot promise as to just when the road will be open.

Lloyd Terteling, of the firm of Terteling & Sons, Moscow contractors who are building the Pollock sector, was in Lewiston, Monday, enroute from Moscow to Pollock and he said that his firm was using a large steam shovel on the job and that the road would be subject to being closed without notice from now on, just as it has been closed for hours at a time up until now.

The old grade is very narrow most of the way in the Pollock sector and when the shovel is working along the old grade it is impossible for cars to get by. At the present time the shovel is approaching a particularly bad sector, where it will be necessary for the shovel to remain on the grade all the time. It is expected to take two weeks or more to get by this point. Mr. Terteling says that cars should not plan to get by during that time, and after that it will be difficult for the contractors to say just when the road will be open.

Progress on the Pollock sector has been good, Mr. Terteling says. Team crews have been at work at several places and most of the easy work has been finished. The remaining work is to be done by steam shovel and lies through rough country and where the road is narrow.

#### Fairfield-Jones

Miss Wilma Fairfield and Dan Jones were quietly married at the Christian church in Lewiston on September 3rd. Rev. Chas. H. Adleman, officiating. They were attended by Miss Verna Fairfield, sister of the bride and Mr. James L. Eccles of Lewiston.

The bride is the daughter of Mr. and Mrs. W. H. Fairfield, and has resided on Big Bear ridge until the past two years, since which time she has made her home in Lewiston where she studied music.

The groom also grew to manhood on Big Bear ridge, where he farmed for many years. He always took an active part in community affairs.

Mr. and Mrs. Jones were popular young people and have a large host of friends here who join in wishing them much happiness thru life.

#### Married at Moscow

Paul Neil of Potlatch and Faye Jones of Leland were united in marriage, at Moscow, Saturday evening at 5 o'clock, at the First Lutheran parsonage, Rev. Roger P. Oliver officiating.

### Marie Gets First Glimpse of Gotham

Queen Marie of Rumania in the pilot house of the S. S. Macom getting her first glimpse of lower New York.

#### Hope Chest Contest

The standing of the candidates in the Hope Chest Contest compared with last week shows little relative change. Can we blame this onto the Weather Man? Or are all the contestants and their individual friends working equally hard? However that may be we have observed from other similar contests that quite often those who were near the bottom the first part of the contest proved to be the final winners.

Will it turn out in this case that "The last shall be first and the first shall be last?" At any ate there is still a good opportunity for any one of the contestants to win either first, second or third prize. The standing of the candidates up to six o'clock Thursday, November 11, is as follows:

- Mrs. Walter Benscoter ..... 1415
- Miss Leora Aiken ..... 555
- Mrs. Leland Houck ..... 415
- Miss Edna Southwick ..... 875
- Miss Henrietta Blum ..... 7355
- Miss Thelma Perryman ..... 870
- Miss Bonnie Craig ..... 2755
- Miss Amy Tupper ..... 750
- Mrs. Eddie Galloway ..... 3350
- Miss Corrine Snyder ..... 745
- Miss Clarice Leith ..... 450
- Miss Beryl Harrison ..... 540

#### Senior Epworth League

The Senior Epworth League held a meeting Monday with Mrs. Kester Dammarell, president of the league, in charge.

They decided to have a contest to make the meetings more interesting. Hester Knepper and Mabel Taber were elected captains and each chose their sides of members of the league. Points will be allowed as follows: 25 points will be given for leading, 20 points for special entertainment, 5 for a reference, 10 for a clipping and 10 for a talk or answer to a question. The losing side will give a party on New Year's Eve.

#### Entertained Okoke Club

Last Saturday night Dr. and Mrs. McKeever entertained the Okoke Kloothman club at a 6:30 bridge supper. The tables were attractive in the color scheme of orange and black, with corresponding place and tally cards. Large clusters of grapes were used to center the supper tables. An appetizing two-course supper was served, followed by an hour of chat for the ladies and smoking for the men, after which several hours were devoted to bridge. High honors for the evening went to Mrs. H. Thomas and Mr. A. H. Daubenberg. Dr. Moorehead was a guest of the club.

Arlos Crocker took a hunting party, in his father's truck, into the Selway country, last Saturday. The members of the party were: George Barnum, O. C. Aiken, Bob Brown, George Crocker and Harley Perryman.

#### Entertained by Lewiston Chapter

Kendrick Chapter of Eastern Star was most pleasantly entertained by the Lewiston Chapter on Tuesday night. The Vineland Chapter from Clarkston was also invited. Those attending from Kendrick were: Messrs. and Mesdames Hull, Woody, Houck and Mesdames Green, Taylor, Alexander, Adams and Nutt of Juliaetta, and Anderson, MacPherson, Newton, Raby, McKeever, Callison, H. Thomas and Shulze of Kendrick. Most of the members of the local chapter took supper in Lewiston, after which they met in session at 7:30 and put on lodge work for some time, followed by a banquet and program given by the Lewiston Chapter. A number of jolly stunts and toasts were given during the program and banquet, one of which created much amusement as each one present, who ate with the right hand, was required to give a speech.

The meeting was declared to have been a decided success in every way, by the visiting members.

#### Mrs. William Bond

Grace Edith Woodruff was born in Edgar County, Illinois, May 15, 1880. She lived there until nine years of age when the family moved to Cheney, Wash., where they resided for two years after which they moved to Troy, Idaho.

She was united in marriage to William H. Bond, New Year's eve, 1894. To this union was born one child, Mrs. Archie May, of Leland Idaho.

Mr. and Mrs. Bond, made their home on their farm north of Troy, until January 1, 1918, when they moved to their present home at Leland.

Mrs. Bond passed away November 4, 1926, after an illness of one month, at the home of her daughter. Her age being 46 years, 5 month and 20 days.

She leaves to mourn her departure, her husband, Wm. H. Bond, and daughter, Mrs. Archie May of Leland, her father and mother, Mr. and Mrs. George W. Woodruff of Lewiston and one brother, R. C. Woodruff of Juliaetta, besides a host of friends.

Rev. Gibbs of Leland officiated at the funeral and interment was made in the Leland cemetery.

Pallbearers were ladies of the Rebekah Lodge and Missionary Society of Leland.

#### In The Federal Court

Kenneth May and Fines Newell May of Lewiston, charged with possession and transportation of liquor, were given trial Wednesday morning, says the Star-Mirror. The verdict was returned before noon, and found Kenneth May not guilty on the first count but guilty on the second. Fines May was found guilty on both counts, and sentence will be made soon.

### TYPHOON CAUSES DEATH OF 300

Philippines Has Triple Disaster, Sunday.

Manila, P.I.—300 persons were drowned and millions of dollars worth of property was destroyed, when a triple disaster, a tidal wave, a typhoon, and a flood struck the Philippine Islands, Sunday.

The small island of Bauan was entirely covered by the tidal wave, and wire service of the whole group of islands was practically destroyed.

### COMMERCIAL CLUB TAKES UP ROAD MATTERS

Prominent Men From Various Ridges Attend Meeting.

A well attended meeting of the Kendrick Commercial club was held at the Commercial Hotel last Tuesday evening. Several farmers from the surrounding country attended the meeting, the principal subject of which was the discussion of good roads.

The meeting was called to order by president of the club, Joday Long, immediately after a sumptuous dinner that was served by Mrs. Thos. McDowell, in the hotel dining room.

The first speaker of the evening was N. E. Walker, chairman of the committee on good roads. He read the report of the survey made by Engineer Van Arsdol, covering the proposed highways up Big Bear ridge and American ridge.

George Davidson of American ridge expressed his views regarding the inadvisability of improving the American ridge road in its present location. He emphasized the importance of raising the present road in several places thereby eliminating the danger of occasional washouts. His remarks were well received and showed that he had given the subject due consideration.

N. E. Ware addressed the gathering and outlined the proposed road up Big Bear ridge. He spoke highly in favor of immediate action by the tax payers of this community in building good roads of a permanent nature. His remarks were well received and showed that he is a booster for good roads in this Potlatch country.

Wm. Cox, chairman of the Kendrick Highway District outlined his views on the proposed roads and stated that the commissioners would do their share in formulating plans for good roads.

Several other members of the club gave short talks as well as their invited guests. Those expressing themselves were heartily in favor of the proposed roads.

A committee was appointed from each of the two interested ridges to work in connection with the present committee of the commercial club to work out the remaining details.

It is planned to hold another road meeting a very early date at which time it is expected the committee appointed will have all the details worked out.

#### Cameron Ladies Aid Sale

Last week's Gazette announced that the Cameron Ladies Aid would hold their Annual Sale and Supper on November 10th. Judging from the large crowd of people present, nearly everybody for miles around must have found out about the good cats that were to be served and rare bargains offered for sale. Not only was the crowd large, but it was well entertained because everybody reports a jolly good time. From a financial standpoint the ladies felt well repaid for their work as they took in \$234.00.

The trustees of the Presbyterian church held a business meeting at the H. P. Hull home Thursday evening.

### NEWS NOTES FROM THE KENDRICK SCHOOLS

Good Attendance Shown in All Grades.

The first graders are progressing rapidly in their reading. Every morning and afternoon they seem eager to read out of their primers.

Last week the first graders learned to write and spell their own names. In arithmetic, the children can read numbers up to twenty-five, count by 2's and 10's. For language they are learning the poem: "The Land of Counterpane."

Monday the children dramatized the story of "The Three Little Kittens."

The second graders are reading out of their supplementary reader "Jack and the Beanstalk."

New books have been ordered for the Girl's Glee Club, but they do not know how soon they will arrive. As they have practiced nearly all of the songs in the old books, it was considered necessary to get some new ones. The Glee club this year is exceptionally good, and therefore it was necessary to give them good material, from which they could practice. These books will also be used for the General Assembly songs. The old books will be given to the grades.

The students in American History and English IV have been having a review, lately. The General Science students have been spending most of the past two weeks on note-book work. This is mainly drawings of the experiments which they have studied.

The General Assembly, last Friday, was given by the Sophomores. The program was as follows:

- Bible Reading ..... Mae Blevins
- General song; "O'er the River" Reading ..... Margorita Gertje
- Song ..... "There are Others"
- Mabel Taber and Lloyd Ware
- Talk ..... by Rev. Taber

The high school students have taken a sudden interest in music. Last Monday, nearly all of the students came to school early, and had a song practice in the noon hour. The boys deserve credit for the original idea, as they gave a series of songs last Friday. Monday they were joined by the girls.

The Ancient History class has been studying Greece. It is more interesting than the previous work, and also easier.

#### Trapped Two Coyotes

"Do you want a good bird dog?" asked Ben Calison in the Gazette Office recently. "I have a couple of pups here in this sack." He then laid the sack on the floor and pulled out two beautiful, perfectly matched coyotte pelts. "About four o'clock Monday afternoon," he continued, "I set two coyotte traps on my ranch on American Ridge. The next morning, I had these two. This was the quickest action I ever had in coyotte trapping."

Ben phoned yesterday morning that he had just caught two more coyottes.

#### The "Kendrick Bear Kats"

Rev. Taber has organized a boy's club for the young boys of the community. They meet every Saturday morning for "hikes" in fair weather and for games in the church during rainy weather. The organization is known as the "Kendrick Bear Kats". They will meet at the Methodist parsonage tomorrow (Saturday) morning at 10 o'clock and march to their camp on Bear Creek.

Any boy from six to twelve years of age is entitled to membership, providing he can undergo the initiation which is very severe indeed.

The Potlatch Campfire group held a work meeting at the home of May Freytag, Wednesday evening. Refreshments of jello, cake and cocoa were served.

"The Pulse of The Potlatch"

Published every Friday at Kendrick Idaho, by Ralph B. Knepper

Subscription Price \$1.50

Entered at the Post Office at Kendrick as second class mail matter.

### THE GOVERNOR ELECT

Without entering into discussion of politics, it is interesting to note the personal character of our new Governor elect. He is a real man. As elder in the Community Presbyterian church in his home town, he has done much welfare work for the good of his community. For a number of years, he has been Superintendent of and active worker in his local Sunday school. During the past year he has been president of the Parma Chamber of Commerce which has been active in boosting that section of Idaho. In business, he has been actively engaged as implement dealer and as president of the First National Bank. At the Hardware and Implement Dealers conventions in Boise and elsewhere, his advice is eagerly sought. In public life, he has an enviable record as legislator and Lieutenant Governor. All Idaho joins in wishing success to the next governor, the Honorable H. C. Baldrige.

### NOW, LET'S GET DOWN TO BUSINESS

Now that the election is over and history written, if the people of Canyon county will give as much attention to industrial matters appertaining to the common good as they gave to the choosing of officials great progress will be made during the next two years. May we, the people, start right by pledging to every official-elect, state and county, our hearty well wishes for a successful administration and resolve to place no unfair or unfriendly straw in the road of any public servant. It is only through unity that we may progress. If after a public official has been given a fair opportunity, subject to fair and impartial criticism, he or she proves to be unsatisfactory there will be ample time after the next campaign is put under way to strive for

betterment. During at least the next twelve months let's think of cows and hogs and hens and grain and fruits and the possibilities of increasing the output and bettering the prices to producers thereof.—The Caldwell News.

### Linden Items

Mr. and Mr. Vance Pendland and family of Lewiston were guests of Mrs. Pendland's parents, Mr. and Mrs. J. H. Hunt, last week.

F. C. Lyons and son, Dan, returned Tuesday from a hunting trip in the Selway country. They brought home a fine deer.

Ben and George Smith were transacting business in Elk River Sunday and Monday.

Arthur Bohn, who has been working at Three Bear, returned home Friday.

Mrs. A. G. Wilson of Kendrick visited at the C. H. Fry home several days last week.

Mrs. Edgar Bohn and daughter, and Mrs. McPhee, spent Tuesday with Mrs. George Garner.

Mrs. Selma Welch and brother, Raymond Torgerson, called at the Smith home, Saturday afternoon. They were enroute to Juliaetta where Mrs. Welch will spend the winter with her mother, Mrs. Torgerson.

Mr. and Mrs. Clem Israel and children spent Sunday with Mr. and Mrs. F. C. Lyons.

Mrs. W. M. Sadler has been, quite sick with the flu the past week, but is better at this writing. Her daughter, Mrs. Joe Perry of Troy, is nursing her.

Mrs. A. G. Wilson and Mrs. C. H. Fry were guests of Miss Eva Smith, Monday.

Those who were neither tardy nor absent during the past school month were: Walter Carmin, Marvin Garner, Phelix and James Holt, Earl, Blanch and Zella Harris, Iris Keeler, Doris Garontte, Della and Donald Rustin, Inez Sadler, Lois, Jean and Dick Fry, Lucile Darby and Franklin Abrams. There were six cases of tardiness last month. There are now forty-eight pupils enrolled in our school.

### CARD OF THANKS

We wish to express our most

heartfelt thanks to the friends, neighbors and lodge, who have been so kind to us in our recent bereavement.

Wm. H. Bond,  
Mr. and Mrs. Archie May.

### FINDS OCEAN FLOOR SHIFTED OFF ALASKA

### Sponges and Coral Discovered in Warm Current.

Seattle, Wash.—Discovery of tropical sponges and coral growths on the ocean floor off the southeastern Alaska coast has convinced Capt. Charles S. Huckins, veteran deep-sea diver of Seattle, that the climate of Alaska has undergone a marked change within the last year.

Captain Huckins' theory is that there has been a violent disturbance in the Gulf of Alaska, probably of a volcanic nature—possibly caused by a series of earthquake shocks—which has diverted warm currents of water into new channels.

Prior to this year Captain Huckins wore thick mittens and heavy woolen clothing under his diving suit while exploring that mysterious world below the surface of the sea. In the season just closed he wore much lighter clothing and discarded mittens altogether.

### Means Record Mild Winter.

The increase in the temperature of the water set Captain Huckins to thinking. Then came the discovery of the sponges and coral and the conclusion that southeastern Alaska's coastline, despite its northern latitude, probably will enjoy the mildest winter in its history.

Every summer Captain Huckins goes north to survey underwater locations for the big wire-walled traps in which the fish canneries capture salmon. He also repairs the breaks in these traps. He works in depths ranging from 70 to 120 feet day after day and has an opportunity to explore the bottom of the ocean such as is given to few men.

It was in Yes bay, not far from Ketchikan, center of the fishing industry, that Captain Huckins first saw sponges. Plodding along in his lead-soled diving suit, 100 feet below the surface, he saw a "beautiful red flower."

"The color of the marine plant first attracted my attention," said Captain

Huckins. "From a stalk about three and a half feet high and resembling a Mexican cactus in some respects, blood-red fingerlike appendages were growing. I picked several of them to show to my companions on the surface. Upon close examination they looked so much like sponges that I brought some down to Seattle. Here I learned that indeed they were sponges."

"I was not so fortunate in collecting specimens of what I believed was coral. The growth crumbled in my hand and I was unable to bring any material amount to the surface. Next season I am going to try again."

Captain Huckins had some stirring experiences in northern waters last summer. One day—minus the knife he usually carried to protect himself—he came face to face with a giant wolf fish, more than eight feet long and with rows of teeth like those of the animal from which he obtains his name.

**Wolf Fish Dangerous Foe.**  
"The wolf fish is a hideous-looking creature," said Captain Huckins. "He coils up like a snake and has a fin along his back about six feet long on which he could easily impale a man. This was the first one I had ever seen."

"I looked at the wolf fish and he looked at me. If he had attacked me I never would have seen the surface again. He remained motionless, fortunately, and I slowly backed away, and then promptly gave the signal which brought me to the surface and safety."

"Deep-sea diving is hazardous, to say the least. Sometimes a devilfish or octopus will come out of a cavern and twine his tentacles around my legs. Then I wield my knife. Mud sharks are another enemy of divers. Giant ling cods, with mouths fourteen inches wide and three rows of teeth like carpet tacks, frequently show fight."

"My leaden shoes are covered with marks made by these teeth. Of course the real danger lies in the chance that your diving suit may be punctured. That would mean a watery grave."

### Hairs on Human Head

Instruments recently invented are capable of counting the hairs on the head and giving other data of interest to hairdressers. It has been shown that the number of hairs growing on the average head is from 100,000 to 250,000, varying with the texture of the hair. Human hair grows at the rate of half an inch a month.

### LEWISTON GROWN FLOWERS

Violets, per bunch 25c Sweet Peas, per bunch \$1.00  
Carnations, doz. \$1.50 Chrysanthemums \$1.50 to \$9.00  
Roses (Spokane grown) per dozen ..... \$3.00 to 4.00  
Hill's Flower Store, Lewiston, Idaho

**Oddly Named Resort**  
Mount Desert is the name of an island off the coast of Maine, so called by its discoverer, Champlain. A ridge of hills extends across the southern portion of the island, several of the peaks rising somewhat above 1,000 feet. It is one of the most famous and attractive summer resorts on the Atlantic coast.

**Once Pirate Stronghold**  
Lafitte, a colorful buccaneer, made his stronghold on Galveston island in 1771 and buried much of his pirate treasure on the shores there. The island was then known as "Campechey." Like the pirates of the story books, he dressed in a green uniform and possessed a polite and easy manner.

R. D. Newton, Prop.

### SEEKS "LOST LEAD" FOR HALF CENTURY

Taylor One of Last of Old-Time Prospectors.

Hillsboro, N. M.—After 50 years of search for a "lost lead" of red ore said to have assayed \$2,100 gold to the ton, Manuel Taylor, aged but active American-Mexican, who says he is a descendant of Gen. Zachary Taylor, still pokes about this section of the Southwest with two burros, confident that he yet will "strike 'er rich."

His life and the faith that goes with it stamp him as one of the last of that picturesque type—the old-west gold prospector.

Taylor now is eking out a living and saving toward one more grubstake by prospecting and placer mining near Gold Dust, N. M., with a primitive machine he calls "the poor man's concentrator." But he is reputed to have mined on a vast scale at various times in his life and to have made at least six big mineral strikes and spent as many fortunes.

For instance, in 1903-07, when an epidemic of influenza struck this part of the country, Taylor is credited with having bought 155 coffins and paid the funeral expenses of as many of the poor of his community.

Early in the '70's an Indian friend told young Taylor he could lead him to "heap much gold." They outfitted and penetrated the wild San Matillo mountainous country. Finally they reached a spot from where the Red-

skin pointed to a streak of red earth, much like brick dust and grunted dramatically.

"Here heap much gold!" Taylor was disappointed to see no trace of gold in it. He was then ignorant of metallurgy. However, he wrapped some of the stuff in a handkerchief and threw it into one of his pack bags. They returned to Silver City, N. M.

One day, months later, Taylor was cleaning his bags and found some of the red dust. Idly rubbing it between his palms he suddenly noticed many particles of fine gold appearing as the coarser grains broke away. He went to an assayer to learn that the dust tested \$2,100 gold to the ton.

In the meantime his Indian guide had died. And for 50 years Taylor has failed to relocate the treasure spot again.

### Kentish Hop Crop

Not all the hops grown in the fields of Kent go to the British brewers, for it is said that the dyers take most of the hops grown in all England. The harvesting of the crop is uncertain business, for picking cannot begin until the hops are ripe and they soon spoil. The pods must go to the oasts, or drying kilns, as soon as they are picked, and if the pickers are too energetic there is waste.

### British Tea Consumption

More than a million pounds of tea is required to supply the people of Great Britain with each day's beverage.

## TINY ANIMAL QUICK-CHANGE SENSATION

Can Transform Into Another Animal and Back.

Philadelphia.—The result of two years of intensive research, Dr. Martha Bunting, working in the zoological laboratory of the University of Pennsylvania, has discovered a rare form of unicellular animal which can change into another animal and then change back again, it was revealed at the laboratory recently.

It resembles a minute drop of jelly and has a body only one 1,500th of an inch in length, but to the trained protozoologist with a microscope it presents some unusual and extremely interesting features.

The animal belongs to the amoeba, one of the most familiar types of protozoa, or unicellular animals, and claims attention through its ability to transform itself into a complicated flagellate and then effect a retransformation which again makes it an amoeba.

The transformation of tadpoles into frogs, caterpillars into butterflies and other similar transformations among the lower animals are well known. None of these animals, however, can reverse the transformation process as can the rare amoeba which Doctor Bunting has found, and it is this ability which makes it distinctive.

Found in Rat Intestine. According to Doctor Bunting, the animal was first seen as a flagellate in a culture which had been taken from the intestine of a rat and in which there had been nothing but simple amoeba. The appearance of the flagellate was entirely unexpected, and it was at first thought to have gotten into the culture accidentally.

Its presence, however, was sufficient to awaken the curiosity of Doctor Bunting, and when evidence tended to show that the appearance of the flagellate stage was not accidental but the result of an unusual transformation, she began the two years of tedious research work that has now ended with a definite contribution to biological knowledge.

The flagellate stage of the amoeba studied by Doctor Bunting was discovered by Perty in 1852 and called by him tetramitus rostratus. It has a top-shaped body, only one 1,500th of an inch in length, from the broad end of which project four of the whip-like lashes of flagella which provide the animal with means of locomotion.

Like most of the protozoa, this changeable animal in its amoeba phase can round itself up and surround itself with a protective membrane within which it can rest but remain alive even if the water surrounding it dries up.

Divide into Others. In a typical life history, as worked out by Doctor Bunting, some of these cysts, if placed in the proper culture medium, will hatch out into the simple amoebae which move about, feed, grow, and divide into other amoebae. After a few hours or days, however, if the culture medium is sufficiently fluid, some of these amoebae will change into a typical tetramitus flagellate by growing four flagella, developing a mouth and a gullet and assuming the typical top-shaped form.

These flagellates will swim about rapidly, feed on other organisms smaller than themselves, and divide into others. Evidently, they change back into amoebae, and the amoebae can then move, feed, and divide in their turn, until, after a time, they round themselves up and assume the resting stage.

Owing to the minute size of the amoebae and the necessity of actually observing at first hand the successive stages through which the animals passed, Doctor Bunting was frequently forced to sit many hours at the microscope without relaxing her vigil either for food or rest.

### Boy, 11, Worries Along on \$85,250 a Year

Poughkeepsie, N. Y.—After Joel W. Thorne, Jr., pays what he owes for taxes each year his annual income is whittled down to a mere \$85,250, it was revealed, but as Joel is only eleven years old, he manages somehow to make this suffice.

The revelation attended application by the boy's guardians to County Judge Arnold for an order permitting them to sell thirty-one acres he owns in Washington township, Dutchess county.

Young Thorne is the son of the late Joel Wolfe Thorne, banker, who was killed in an automobile accident in 1924, a few hours after obtaining a divorce from the boy's mother, Mary Casey Thorne.

### Floridan, 111, Seeks to Prove He's Monroe's Son

New York.—A locket said to contain a copy of a painting of Mrs. James Monroe, wife of the fifth president of the United States, may establish the claim of Maj. James Edward Monroe, one hundred and eleven years old, of Jacksonville, Fla., that he is the son of President Monroe. History shows that President Monroe had only two children, both girls, Eliza and Maria. Major Monroe asserts all the papers to prove his claim were lost or stolen from him in 1914 in Jacksonville. All he has left is the small locket which contains a copy of a painting of Mrs. Monroe by Benjamin West, which is reproduced in several biographies of the President.

## INHERITS FORTUNE AS GIRL SAYS YES

Youth Needed Bride to Collect Inheritance.

Chicago.—There is romance in Chicago—traffic cops included.

A tiny, three-letter word, spoken by a pretty Chicago model, not only sealed the fate of \$12,500,000 and a fortune in Texas ranchland, but so altered the duties of a squad of motorcycle policemen that they escorted the girl and her sweetheart to and from the altar into wealth and happiness.

Martha Marcusson O'Hara, 4615 Magnolia avenue, is the heroine of this fantastic chapter out of real life. Her husband, Pat F. O'Hara, Chicago's newest multi-millionaire, is now in Texas, where he awaits the final word that will make him the master of a veritable kingdom of wealth in the Lone Star state.

O'Hara is heir to the estate of his foster mother, the late Mrs. Maude King of Kingsville, Texas, valued at more than \$12,500,000.

It was in a Niles Center cafe that O'Hara made his last proposal to the girl who is now his wife.

Within six months he must be married or lose the estate. That was one of the conditions of the inheritance.

Once more he asked the girl. "Yes," came the gleaming reply. O'Hara blinked. It was hard to believe.

The clock struck eleven. A hurried consultation of the assembled friends followed—a borrowed ring—a whispered word to a motorcycle cop, and soon O'Hara, his Finnish bride-to-be and their friends were sailing over the roads of Niles Center.

In a tiny, gable-roofed building that serves Niles Center both as firehouse and courtroom, the pair were married at midnight by Judge Pat J. Collins. O'Hara had obtained the license two days previous.

It was the magistrate's first ceremony. Mrs. O'Hara smiled, and, while the wedding group beamed, the magistrate, with a gracious gesture, ordered a police escort for the couple out of Niles Center.

Four policemen responded. Leading the way, the police soon brought the party to Tessville. There, with Judge Collins as host, the wedding was celebrated.

O'Hara will not come into ownership of the estate until his next birthday, November 30. On that date he will be twenty-five years old. His bride is twenty-four.

### Swiss "Cowgirl," Chic Dresser, Likes Pipe

Geneva.—Miss Heloise Cottin is a Swiss "cowboy" who rides the valley and mountains of the canton of Valais looking after her numerous head of cattle.

But what the cattle see, if they look her way, is not the chaps and bright shirts of the Western cowboy, but the smartness of a chic young woman dressed in the swaggar things in riding togs, smart boots and tailored blouses. Just by way of a romantic flair she knots her bobbed hair into the confines of a bright-red handkerchief and sometimes she smokes a pipe.

Miss Cottin prefers the tailored cigarette that fits her costume, but when cigarettes dwindle away, as they will on the range, out comes her pipe.

Many suitors seek out Miss Cottin in the seclusion of her Swiss valley, but Miss Cottin is a particular young lady, and until recently was riding her range alone.

### Acquit Berlin Savant Who "Stole in Trance"

Berlin.—Professor Schumacher, who stole thousands of insect specimens, microscopic slides and books and entomological paraphernalia while "in a state of trance," was acquitted recently. A court found that at times he was not responsible for his actions.

Professor Schumacher was so intensely absorbed in his work that he lost his mental balance. The curator of the zoological museum of Berlin university testified that Schumacher was the most learned entomologist in the world. The missing insect specimens and books were found in Schumacher's rooms.

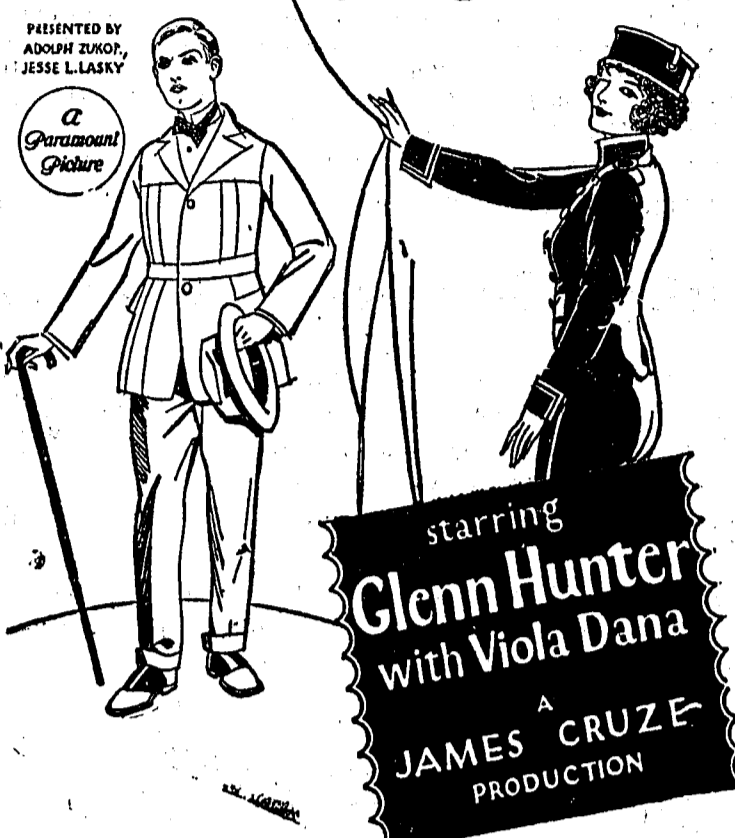

### Girl Held for Keeping Bracelet She Found

New York.—After refusing to surrender a bracelet which she had found because she had not been paid a reward, Miss Salena Fasolt, twenty-two years old, a purchasing agent for the Henry street settlement house, was held in \$1,000 bail for the grand jury by Magistrate Simpson in West Side court. Magistrate Simpson said that under a section of the penal code a finder of lost property must endeavor to return it to the loser.

Miss Fasolt found the bracelet, valued at \$150, after it had been lost by Miss May Treanor, a telephone operator at Forty-fifth street and Broadway. Miss Treanor advertised her loss. She received a telephone call from Miss Fasolt, who said she had found the bracelet. They later met at a hotel, but Miss Fasolt would not return the bracelet without a reward of \$75 she said was promised.

## Deadly Sins

According to the latest dictionaries and sources of information, the seven deadly sins are listed as pride, covetousness, lust, anger, gluttony, envy, sloth. The seven chief virtues are faith, hope, charity, prudence, temperance, chastity and fortitude.

## Origin of "Money"

The term "money" is derived from "moneta," a term applied to Juno, in whose temple at Rome money was coined, the said term being from "monere," to warn.

Good Shot Bingham, Mass.—Mrs. William A. Wagner is a good shot. One touch at her shotgun and down came a big eagle that was swooping down on her puppy in her back yard. The bird measured nine feet from wing tip to wing tip.

Action Follows Hempstead, N. Y.—A hand organ and a monkey rudely awoke W. Tay-

### New Black Walnut Found Splits Like English Type

New York.—A native American black walnut, whose nuts split like those of the so-called English walnut, allowing the meat to come out in two even halves, is the promising find of Prof. J. Russell Smith of the Columbia university school of business, who reports that he has several grafted specimens growing on his farm near Round Hill, Va. The hard, woody partitions in the shell that make so much work for the nut-pick in ordinary black walnuts are lacking in the new variety, which probably arose as a chance mutant or "sport" in the natural timber.

It is pointed out that native walnut trees of this kind offer considerable promise for the development of an American nut-growing industry. "English" walnuts, which in point of fact came to this country from Spain and

southern France, are too tender to grow profitably north of California, Florida and other Southern states, whereas the native black walnut thrives in the woods clear up to the Canadian border and beyond.

The Northern Nut Growers' association, of which Professor Smith is a member, is offering a prize of \$50 for the discovery of the best black walnut trees in America.

### Safer Than

Grand Rapids, Mich.—The police found by a survey that the percentage of automobile accidents among men drops 85 per cent when they marry.

### Futility of Lying

Lying is like trying to hide in a fog. If you move about you are in danger of bumping your head against the truth. And as soon as the fog blows away you are gone anyhow.—Hazlitt.

### BLESSING OF WATERS AN ANCIENT CUSTOM

English Ceremony Dates Back to Days of Romans.

London.—Large numbers of invalids and convalescents come every year to the noted medicinal springs at Buxton, in Derbyshire, England, where the blessing of the waters was recently celebrated. This blessing of the waters is accompanied by the ceremony of well-dressing, an ancient practice common all over Derbyshire, which certainly goes back to the Roman period.

The Romans were very skilled in finding healing waters, and it is quite possible that a tradition of their celebration of the festival fontinalia, the festival of the springs, may have lingered on after they left Britain.

The custom of blessing the waters in spring is still kept up in the Mediterranean area and in the Balkans. It is performed regularly by the Greek church over the waters of the Bosphorus, in Rumania at Bucharest, and it was an important part of south Russian spring ritual.

### May Predate Roman Days.

It is possible, however, that in Britain it goes much farther back than Roman times. Holy wells are common in Britain and in the west and they are very frequent in Ireland. If they have any personal association it is usually with some saint, but there is no doubt that this saint is a pagan deity or spirit which has been Christianized.

Offerings are still made at these wells to obtain the fulfillment of a wish, and it is common to find pins and other small objects lying at the bottom of the well or spring, while rags and bits of ribbon or lace are to be seen fastened to bushes growing around or near.

The well-dressing practiced annually at Buxton and in other parts of Derbyshire is more elaborate now that it is performed under the patronage of the church and the municipal authorities. Elaborate pictures are constructed in a colored mosaic of mosses, lichens and flower petals, representing some Biblical subject such as Christ and the woman of Samaria at the well, with the legend, "Give me to drink," which was one of the subjects this year.

Elaboration of Ancient Practice. But it is clear that the whole practice is only an elaboration of the earlier primitive offering to the spirit of the waters and it is very significant that the construction of the pictures is in the hands of a few exponents of hereditary skill in design and execution who were rapidly dying out until the art was revived. Were they the descendants of a long-forgotten primitive priesthood who once ministered to the spirits of the waters?

### GERMAN DIPLOMAT

Dr. Hans Heinrich Dieckhoff, charge d'affaires of the German embassy during the absence in Germany of the ambassador, Baron Ago von Maltzan.

### Elk Leads Man to Safety

After 5 Days in Forest

Port Angeles, Wash.—Lost for five days in the Olympic mountain wilderness, without food or shelter, W. B. Wilson, sixty-five, is safe, through the graces of a bull elk, which led him finally within sight of civilization. Hungry, tired, clothing torn by rocks and countless falls in a network of salal brush, he tramped wearily along. His only companion, the elk, kept within thirty feet of him, apparently unafraid, serving to frighten away cougars and wolves at night.

In fitful sleep the fourth night Wilson dreamed of his family, and awoke to write his will on the stock of the empty gun. The fifth day, following the browsing elk, he stumbled into a valley known as "The Forest of Famous Men." Here he read of the name "Roosevelt," and that of "Harding," which forestry officials had nailed up. This was a half mile from a highway and a tavern. The elk then left Wilson, seemingly satisfied with his escort work.

### Twelve Reasons

New York.—Louis Mutrux, St. Louis architect, and Mrs. Mutrux are back from a deferred honeymoon in Europe. The reasons for the postponement came with them—twelve children ranging in age from one and one-half to nineteen years.

### CORN AND OATS GOOD COW FEED

Current prices of feeds indicate that corn and oats should again be used as extensively as possible in mixing dairy rations this fall, says C. S. Rhode, dairy extension specialist of the college of agriculture, University of Illinois. He points out, however, that corn and oats alone do not furnish the required amount of protein. Unless this deficiency of protein is supplied by adding other feeds to the grain ration, milk and butterfat production will fall off and the returns will be lowered, he said. An adequate supply of protein, together with the cost of the ration, are the factors that should be considered by dairymen who are interested in producing efficiently, he added.

At present prices, cottonseed meal is the cheapest source of protein, according to Rhode. With corn at 70 cents a bushel, choice cottonseed meal will furnish a pound of digestible protein for 8.5 cents. Oil meal will do the same thing for 6.1 cents and wheat bran will do the job for 5.5 cents. Of course, the dairyman who is growing and feeding liberal amounts of legume hay will not have to buy as much high protein concentrates as the dairyman who is using non-legume roughages.

One good grain mixture to feed when silage and legume hay are being fed as roughage can be made from 500 pounds of ground corn, 200 pounds of ground oats and 100 pounds of cottonseed meal. A second grain mixture that makes a good one to feed with silage and legume hay can be mixed up at the rate of 500 pounds of ground corn, 300 pounds of ground oats, and 100 pounds each of wheat bran and cottonseed meal.

When no legume hay is being fed, a good grain mixture to use is composed of 100 pounds each of ground corn and ground oats, 125 pounds of cottonseed meal and 175 pounds of wheat bran. A second grain mixture that can be used when no legume hay is fed is composed of 100 pounds each of ground corn, wheat bran and oil meal and 50 pounds of cottonseed meal. If there is no silage in either of these two rations, the cottonseed meal should be replaced with oil meal at the rate of 150 pounds of oil meal for each 100 pounds of cottonseed meal.

When the roughage consists of legumes only a good grain mixture can be made by mixing 600 pounds of ground corn, 300 pounds of ground oats and 100 pounds of oil meal or ground soy beans. A second grain mixture that makes a good one to feed when the roughage consists only of legumes can be made from 200 pounds of ground corn and 100 pounds of wheat bran.

These grain mixtures should be fed at the rate of 2½ pounds for each gallon of milk produced daily. The amount should be increased to 3½ pounds for Jerseys and Guernseys producing more than 25 pounds daily.

### Comfortable Stable Is First Step in Dairying

About one-half of a cow's feed is used for the production of heat and energy. When she has to roam around on a bleak hillside or in a cold, barren pasture, she loses more heat from her body than if she were protected by buildings or kept in a sanitary, well ventilated barn. Milk production cannot be expected to keep up, no matter how well a cow is fed, unless she is also protected from the weather.

A comfortable barn is one of the first steps in successful and profitable dairying. Water supply is one of the first essentials in maintaining a good flow of milk in the dairy herd. Arrangements should be made so that the cows can drink frequently, and that the water will at least have the chill taken off from it instead of being only slightly above the freezing temperature.

### Make Choicest Veal by Allowing Calf With Dam

Probably the choicest veal is made by allowing the calf to run with its dam. This is nature's way, but for the dairyman it is not practical and absolutely not profitable. In fact this method is admissible only with the special beef breeds where cattle can be kept on the range or other land that it is not practical to till.

The dairyman must get more for the use of his cow than the growth of the calf. He cannot afford to allow the calf to suck the cow until it is fattened, because this method gets the cow into bad habits and she will not produce as much milk after the calf is fattened as she will if milked from the beginning.

### Feeding Dry Cows

Feed the dry cows liberally. Grain fed to cows before freshening will return more profit than at any other time. Especially is this true if the cow is in moderate to thin flesh. The Missouri station found a 30 per cent increase in the following year's milk flow with liberal feeding while dry, over no grain feeding while dry. Dry cows should get about the same ration as milking cows up until about a week before calving, when corn or heavy feeds should be left out.

### SEES INCREASE IN SUN'S VIOLET RAYS

Scientist Says 1927 Will Be Great Year for Tan.

Pasadena, Calif.—The ultra-violet rays of the sun, the part of sunlight that causes sunburn and cures some diseases, are more copious as the spots on the sun grow more numerous, and there are indications that when the eleventh-year maximum of spots is reached, within the next year or so, the sun will give off about two and a half times as much ultra-violet light as it did in 1923 when the spots were least numerous.

This is the conclusion of Dr. Edison Pettit of the Mount Wilson observatory here, who is conducting a study of this invisible, but important part of sunshine.

Doctor Pettit's method depends on the fact that the ultra-violet radiation passes through a thin layer of silver, but not of gold, while a similar layer of gold transmits visible green light. As glass is opaque to the ultra-violet, two lenses of quartz are used, one of which is silvered, and the other gilded. These lenses can form an image of the sun on a vacuum thermocouple, which gives an electric current when light falls on it.

This current is measured with a galvanometer, and from it can be determined the intensity of the ultra-violet or the green radiation, depending on whether the silvered or gilded lens is used. As the intensity of the green light remains relatively constant, it is used as a standard with which to compare the ultra-violet.

Doctor Pettit finds that when he plots the variation of the ultra-violet light, and the numbers of spots visible on the surface of the sun, the two curves show close agreement. Since October, 1925, he says, the ultra-violet light has been about 70 per cent greater than it was in June, 1924, when he began his researches.

As the spots are apparently still on the increase, he anticipates that the intensity of the ultra-violet at the

minimum in the summer of 1923 as a first magnitude star is brighter than one of second magnitude, or about two and a half times as great.

A supplementary research of Doctor Pettit's has shown that this change probably takes place in the sun itself, and is not due to variations in the amount of ozone in the air, as has been suggested. "This experiment shows," says Doctor Pettit, "that if the atmospheric ozone were increased 100 per cent, the ratio of ultra-violet to green radiation decreases only 5 per cent and if all the atmospheric ozone were eliminated the ratio would increase only 3 per cent."

### Hats Off!

Rome.—There are no hats at all in Mussolini's new classic styles; the girls simply wear bands across their long tresses.

### Father, 90, Son, 50, United at Prison Gate

Palermo, Sicily.—Father and son, aged respectively, ninety and fifty, who had never seen each other, have met for the first time. The meeting was coincident with their release from prison.

Fifty years ago a peasant from the interior of Sicily was sentenced to life imprisonment for murder. He was told that on the same day his wife had given birth to a son.

When the convict's son was twenty he learned his father had been convicted on the false testimony of two witnesses. These the son promptly waylaid and shot. For this crime the son was sentenced to 30 years' penal servitude. On the day of the son's release the father received a pardon.

**Identify Police Dog as Milk Bottle Thief**

Milwaukee.—A handsome police dog was arrested here and identified as the "milk bottle thief" who has been the despair of housewives. The animal languished today a prisoner in the kennels of the Wisconsin Humane society.

For many weeks women of one section of the city have dashed out to the back porch for the morning milk to be disappointed. Milk men were censured and dairy companies flooded with complaints.

Then the other morning a woman glanced out of the back window just as the thief arrived. The dog turned his head, grasped the bottle in his teeth and leaped away. The woman gave officers information that led to the dog's capture. Under a barn were a dozen empty milk bottles. The dog pliffed them from porches, tugged at the caps until they were loosened and then lapped up the milk as it flowed out.

**Water Before Cows Helps Milk Yield**

**Result of Experiments Conducted at Beltsville.**

(Prepared by the United States Department of Agriculture.)

Experiments conducted at the federal dairy farm at Beltsville, Md., on the drinking habits of dairy cows indicate that a greater quantity of water will be utilized when available at all times than when offered but once a day. Cows watered but once a day not only drank less but also produced less milk than when watered at will from watering cups. Cows watered twice a day drank as much as when watered at will, but did not produce so much milk.

The cows used in the tests were average producers, and the maximum difference found in production between watering once a day and at will, was only about 5 per cent. The higher the production, however, the greater the benefit to be derived from frequent watering.

Some low-producing cows fed silage, hay, and grain refused to drink more than once a day in cold weather. With cows of similar production and receiving the same kind of feed, water consumption was 80 per cent greater in hot summer than in cold winter weather. The demand for water was greatest after eating hay. In cold weather cows prefer water that has been warmed, and will drink more of it, though experiments at several stations show that the amount of production is influenced but little by warming the drinking water.

Less water is required when large quantities of such feeds as beets or mangels are fed.

**Remodel Henhouse Into Correct Type Is Urged**

Many of the old unsatisfactory poultry houses now to be found on farms could be remodeled at little expense and trouble in such a way as to provide a comfortable home for the flock, according to poultrymen at the college of agriculture, University of Illinois. The common type of house often is too narrow, allowing little chance for ventilation without drafts blowing directly on the birds. The narrow house, 10 to 14 feet in width and of shed type, can often be converted into a half-monitor type by building an 8 to 10-foot shed on the front, sloping it toward the south.

Houses of the gable-type of roof, especially those which are too high, usually will be made more comfortable for the hens if boards are laid across the plates and a layer of straw placed on top of these.

It will pay to study plans of a type of poultry house adapted to climatic conditions where the farm is located before one decides to build. Many expensively built poultry houses prove to be unsatisfactory because the requirements of a good poultry house are not kept in mind. Visiting farms where modern poultry houses have been built helps one to decide which type is most suitable for his purpose.

**Winter Stores for Bee. Quite Important Matter**

When honey in the hive is not of the best quality, it is unsafe for winter stores in any place where the bees do not have frequent flights during the winter, viz., almost every week. In the North, about ten or twelve pounds of slrup made from two parts granulated sugar to one part water should be fed as soon as the bees have ceased brood rearing, as an insurance against the danger of poor honey. It is wiser, however, to have an upper story or "food chamber" already filled with the finest honey of the season, ready to place just above the brood chamber when the section supers or other surplus arrangements are removed. This will do away with the need of fall or spring feeding.

**Lack of Paint Cause of Building Depreciation**

It is estimated that farm buildings depreciate 7.26 per cent yearly through lack of paint, and surely no farmer can afford such depreciation. The cost of white lead and linseed oil necessary to paint the farm dwelling with a few ounces of color pigment, if white isn't desirable, is less than the cost of depreciation which under neglect grows steadily year after year.

If the outbuildings are made of rough lumber and will not take paint or will require so much that the paint cannot be bought this year, a coat of whitewash will greatly improve their appearance.

**FARM FACTS**

Star boarders should get the gate—can the hen that won't lay.

No wise farmer objects to new ideas—he wants to see them tried.

Farming is generally free from the undesirable extremes of wealth and poverty.

Cleanliness is next to coyness in keeping food in a refrigerator from spoiling.

Follow the price movements when buying feed, fertilizers, and other articles that are large items of expense on the farm if you want to make the dollar do the most that it can.

**DAIRY FACTS**

**SCRUB BULL IS FOUND "GUILTY"**

(Prepared by the United States Department of Agriculture.)

Scrub-bull trials, as a means of creating interest in improved live stock, have acquired many diversified features, according to reports received by the United States Department of Agriculture. Such a trial, recently held in Portage county, Wisconsin, as described by County Agent H. R. Noble, attracted an attendance of 3,500 persons. The trial occurred in connection with a dairy field day, a dairy bull being the prisoner before the bar. The judge pronounced the verdict of "guilty" following the presentation of evidence in which purebred and scrub sires were compared. But, contrary to the customary sentence of execution in such cases, the prisoner received a reprieve in the form of sale to officials of an adjoining county for a second trial, the sale price of the inferior animal being \$17.50. Thus the bull has begun to acquire a "court" record as a local undesirable. A band which furnished music for the trial "drummed" him out of the county.

The bureau of animal industry, United States Department of Agriculture, has fostered such educational scrub-sire trials and on request furnishes an outline and guide for conducting them. In the outline the bureau recommends that persons who really desire to defend the scrub sire be given plenty of time and opportunity to do so. This stimulates the prosecuting attorney to his best efforts and greatly increases the educational value of the event.

**Feeding Fresh Silage to Dairy Cow in Fall**

With the emphasis, this fall, on more and better milk from the same number or fewer cows, most dairymen cannot afford to let any green feed go to waste at silo filling time, according to the animal husbandry department at the State College of Agriculture at Ithaca, N. Y.

When the silo is filled and allowed to seal itself by the heating and fermenting of the top layer, there is an appreciable loss of feed. If the silo is filled early in the fall while there is yet plenty of pasture or other green feed, it may not be practicable to avoid this waste. However, if the silo is filled later, when all the available green feed is needed, feeding from it should begin immediately. When this is done, the labor and unpleasantness of removing the surface layer is avoided also.

For a number of years, the men in the department say, the dairy cows at the college have been fed the green corn as it came from the machine when the silo is being filled and then fed the silage when it is heating and settling. So far as is known, no bad effects from this method have been noticed in the herd.

**Dairy Notes**

The "off-again-on-again" dairy farmer will never succeed.

In summer milk should be heavily watered—through the cow.

A cow cannot eat enough pasture grass to supply nutrients for 25 pounds of milk.

Most cream separators will do a much better job of skimming the milk when it is warm.

The feeding of hay to calves can be started at the same time that they are being taught to eat grain.

Most dairymen who own as many as a dozen cows should build a silo. It will pay for itself before long.

The University of Wisconsin has found through experimentation that sweet clover will not taint milk.

The organism that produces the tallowy flavor in milk, cream, and other dairy products has been discovered by the University of Illinois.

Cow testing association members feeding grain rations to cows on test see the difference between pasture and no grain and pasture with grain, and the difference is decidedly in favor of pasture with grain.

It is said that milk keeps sweet longer if cows have access to salt at all times. At any rate, they need the salt, and if a block, or a salt trough, is kept under a shady tree, they will be found around it often.

Some dairymen who are unfortunate enough to have good cows that are hard to milk, or that are kickers, utilize these cows to raise veals.

Dairymen who live near a cider press may probably make use of apple pomace as feed, which is usually allowed to become a total loss.

Do not use the milk room as a junk room for the storage of all kinds of old equipment. Such things only accumulate dirt and encourage a general carelessness in handling the milk.

**FARM POULTRY**

**NARROW BUILDINGS NOT SATISFACTORY**

According to poultry experts at the Illinois College of Agriculture at Urbana, profitable winter egg production is hard to get on many farms because the chicken houses on such farms are so narrow from front to back they cannot be opened for the necessary ventilation without making them much too cold for the hens when they are on the roosts at night. Such houses often are high in front, which means that they frequently can be remodeled into a semi-monitor type by building a lean-to, or shed, on the front or south side of the old house. This will make it possible to leave the low front open most of the time, even in cold weather, because the hens will be from 18 to 20 feet back of the front opening instead of 8 to 12 feet, as in the case of many narrow houses.

Buildings which have been used for other purposes can be remodeled into satisfactory chicken houses at comparatively little expense. Usually this remodeling in a large building will involve the use of a straw loft to cut down the air space in the quarters used by the hens. The straw layer should be 12 to 15 inches deep and may be supported most readily by using woven wire fencing laid over 2 by 4 joists.

The straw loft will have the advantage not only of reducing the cubic air space, but also of equalizing the temperature and of absorbing moisture, so that the house will be warmer and drier during the winter months, as well as cooler in summer, than is likely to be the case when a large building is used without such a straw loft.

**Two Reasons Why Fowls Nibble at Each Other**

There are two reasons, at least, why chickens peck each other. One reason is that they get something to eat that way which they would not get in any other. If this is the cause the birds can be cured of this habit by feeding a complete or well-balanced ration including minerals, vitamins and protein. A satisfactory ration would be equal parts of cornmeal, bran, middlings, ground oats and meat scrups. To this should be added one pound of salt, one pound of bone meal, and one pound of agricultural limestone, or any lime product. To cure the habit, it might be well to feed the birds fresh meat such as liver. Care should be exercised in this connection that the meat is not spoiled.

Cod liver oil may be fed in the mash at the rate of one quart to 100 pounds of mash. This will supply the possible deficiency in vitamins.

The second cause is that the birds develop a bad habit at molting time, and I know of no remedy for this except to turn the birds out that are doing the picking so the ones that are being murdered can get away.

**Decline in Turkeys**

The turkey industry is on the decline. Popularity of other kinds of table poultry, and the many difficulties in raising poults, have influenced producers to reduce their flocks. Furthermore, the demand for turkeys, as compared with other poultry, is limited. Tradition has established the turkey as a holiday fowl and there is a heavy demand for it from the public only three times a year, at Thanksgiving, Christmas and New Year's.

**Poultry Notes**

If sexes are equal, geese pair.

The goose-laying season usually begins in February.

Young geese are ready for market when the tips of their wings reach the tail—which is about their tenth week.

It behooves every operator to cull most rigidly at the beginning of the laying year, carrying over winter only the most healthy and vigorous individuals.

Green ducks are marketed at from nine to twelve weeks and should weigh up to nine pounds the pair.

Don't keep surplus ducks or drakes around now to eat their heads off. Get them to market as soon as possible.

Direct sunlight prevents leg weakness or rickets. This condition is very serious to poultry raisers. It can be prevented by the use of egg yolks, cod liver oil, direct sunlight or ultra violet light.

Soy-bean meal from which the oil has been extracted is a desirable food for poultry. Raw soy beans are not liked by hens.

Do not forget that the hen must have grit in order to grind her food. She retains grit in the gizzard for a long time.

If your chicks get "off feed" in some way, try rice. It will sometimes work almost magical cures. Cook it just as you would for use on the table, rather dry instead of slushy.

**FEED IMPORTANT FOR THE HEIFER**

It is important that the young heifer be fed so that she will grow at her maximum. It is not necessary that she be fat but she should receive such feeds as will furnish nutrients for the building of bone and body tissue, and keep her system in the best of condition.

Good alfalfa hay will furnish a large portion of the nutrients necessary for growth, and good silage will do the rest. The undersized or otherwise unthrifty heifer should be given a little oats and corn, in addition to the alfalfa hay and silage. This same treatment is given the heifers the second year, until three or four months previous to calving, when oats and corn, bran and a little oilmeal is fed.

It is good herd management to have the heifer, and also the aged cow, in good flesh at the time of freshening. She will then have reserve material to draw upon after freshening. The heavy producing cow will lose in weight after freshening for a month or more, even with liberal feeding.

If the cow is being grain fed preparatory to calving, the ration should be reduced and more of the laxative feeds such as oilmeal and bran added four or five days before she is due to calve.

If the cow is in good physical condition, she will have less trouble in calving and will not be so subject to retention of the afterbirth. When the cow is in good physical condition the afterbirth is usually expelled within three to six hours. If it is not expelled it must be removed within the first 24 hours. When this becomes necessary the cow usually gets thin and decreases considerably in milk flow. It is, therefore, very necessary to watch the feeding and physical condition of the cow previous to calving.

**Clear That Clean Milk Is Paying Proposition**

In recent years dairymen, including farmers with just a few cows, have fast been learning that clean milk is a paying proposition and that this may be secured only by obtaining proper sanitary measures, such as providing their animals with clean bedding, regular clipping of flanks and udder, and the like. More recently, the Department of Agriculture has discovered, as the result of extensive tests, that another of the dairymen's problems—undesirable flavors and odors in milk produced by feeding green alfalfa, green corn, or turnips, may be prevented by giving these feeds at the proper time.

It has been found that green alfalfa produces much more pronounced "off" flavors and odors than does green corn. Even when 25 pounds of green corn are fed one hour before milking the milk is only slightly tainted, probably not to a sufficient extent to be detected by the average consumer; if fed after milking, nothing undesirable is noticed.

Feeding 30 pounds of green alfalfa one hour before milking, or as little as 15 pounds, produced objectionable flavors and odors. Increasing the time to three hours reduced the intensity, but did not eliminate the taints. However, when the time before milking was increased to five hours the off flavors and odors were practically eliminated.

**Develop Heifer's Stomach**

There is perhaps nothing more important than to encourage calves to eat hay as soon as possible. A heifer calf intended to be raised for the dairy needs to have its stomach developed as much as possible so that it may become able to consume a maximum amount of feed at maturity. Let us never lose sight of this fact, even while we are feeding the calf, that the dairy cow is a machine for converting feed into milk and butter-fat.

**First Clock?**

The earliest complete clock of which there is certain record was made by a Saracene mechanic in the Thirteenth century.

**Few in Politics**

"There are minds great beyond dreams of worldly riches," said Hi Ho, the sage of Chinatown. "There are men who patiently count the stars without hope of putting one of them into his purse."—Washington Star.

**Our Fifth Annual TURKEY SHOOT**

In the City Park  
KENDRICK, IDAHO

SATURDAY NOV. 20, 1926  
40 yds. off hand, 60 yds. resting.  
Starting at 10 o'clock.

**EXTRA**  
The Kendrick Hardware Co. offers a special prize to the shooter, under 17 years of age, making the best 3 shot score. Entry 5c, one re-entry permitted.

Manly & Roberts

**GLEANINGS**

Rev. Dale Lanphere made a trip to Spokane this week, to bring down his wife and son, and also their household goods. The living rooms in the Presbyterian church have been freshly papered and floors and wood-work varnished. The ladies aid made and hung attractive, new curtains in the three rooms. A church supper is planned for the near future.

A hunting party, consisting of Messrs. Ed Deobald, Joe Gardner, E. Clem and R. B. Knepper, left early this week for the Selway country, in search of big game.

Mr. and Mrs. Earl Crocker drove thru from Montana, arriving in Kendrick last Friday to visit Mr. Crocker's brothers, Frank and Fred. Mr. Crocker returned but Mrs. Crocker will spend some time with Mrs. Bump.

Mrs. R. D. Newton entertained the Presbyterian Ladies Aid, Friday afternoon. The afternoon was spent in sewing, after which a short business meeting was held. It was decided to hold an apron and cooked food sale in December. The women teachers were guests of the Aid. Light refreshments were served by Mrs. Newton, assisted by Mrs. Carl Carlson.

Louie Rognstad, formerly of Big Bear ridge, left last week for California to locate. He farmed for a number of years on Bear ridge.

Messrs. Botanelli and Warner of Kellogg hunted "chinks" in this vicinity last Friday and Saturday. They are friends of Art Dunkle, formerly of Kendrick, but now living at Kellogg. Art assured them that this part of the country had the world beaten for good hunting. Joe Gardner and Ira Bolon took them out Friday morning and they returned with six birds. Friday night they were guests of the R. B. Knepper family at supper, and Saturday they returned to Kellogg via Moscow, taking in the Idaho-W.S.C. game.

George Saad of Troy was a business visitor in Kendrick the latter part of last week.

Wm. Watts was most pleasantly surprised last week by a visit from his brother, Dr. Watts of Seattle. Dr. Watts had been in Cleveland, Ohio, doing medical work and returned to his home via Kendrick, thus enabling him to spend last Friday with his brother.

Today (Friday), N. B. Long & Sons begin their Seventh Annual Fall Sale. This is one of the big merchandising events of the year and draws large crowds from all over this part of the country.

Mr. and Mrs. Newton and Mr. McGregor had as week-end guests, Mr. and Mrs. H. J. Smith, son Dean, and daughter Anne of Moscow. Mrs. Smith is a sister of Mrs. Newton and daughter of Mr. McGregor.

Fred Bailey and family left last Friday for California, by car, with Los Angeles as his destination. Mr. Bailey is hunting a location in California. His brother, Curtis, is at Sawtelle.

Mr. and Mrs. Louie Westacott and son, of Lewiston, spent Sunday at the home of Mr. and Mrs. R. H. Ramey. Mr. Westacott is in the grain business at Lewiston and was formerly located at Creston, Wash.

Mr. and Mrs. Robert Spencer and son, Donald, spent the week end at the George Leith home in Kendrick.

Thanksgiving week the grades from the first to the eighth are planning a program. Next week we hope to be able to announce our program. It is to be held at the New Kendrick Theatre, on Tuesday evening, November 23. Plan to come. Your presence means our encouragement. We need it.

Mrs. Chas. Hoffman underwent a major operation at a Lewiston hospital, Sunday evening. Late reports are to the effect that she is doing as well as could be expected.

Mr. and Mrs. Fred Bolon and family of Greer arrived yesterday to visit at the home of his brother, Ira.

A large number from here attended the commercial club road meeting at Kendrick, Tuesday evening.

Mr. and Mrs. Ole Lien and son, Anton, were Moscow visitors Tuesday.

Mrs. C. Lundquist of Moscow spent Tuesday with her sister, Mrs. James S. Nelson.

A community Thanksgiving dinner is being planned to be given at the Community hall.

L. J. Herres has returned from the hospital in Moscow, and is getting along nicely, tho he will have to be in bed for two or three weeks longer.

Mrs. A. K. Carlson, who has been visiting her parents in Minneapolis for the past month, returned Wednesday.

Mrs. Katherine Kelly, recently operated on in Spokane, is recovering rapidly, according to a phone message received from her physician, Dr. Hoyt. Her many friends in this community will be glad to hear that she will soon be able to be about again.

Mr. and Mrs. Harry Emerson of Lewiston were Sunday guests at the G. P. Anderson home.

Miss Elberta Walker, who recently underwent an operation at the Inland hospital, Moscow, was able to return to her home in Kendrick, Tuesday.

Walter Thomas of Spokane, was in town for a short time last Sunday, visiting at the home of his brother, Harold.

**Big Bear Ridge**

Wm. Blendin and Amos Moore are serving on the federal jury at Moscow this week.

Louie Rognstad and sister, Mrs. Ella Henderson of Clarkston spent Thursday with friends here.

The J. M. Bramblett family have moved to Craigmont. Mr. and Mrs. Halvor Lien and Mrs. Marie Slind spent Tuesday with friends in Moscow.

Mrs. Zack Aas entertained the Lutheran Ladies Aid at her home Wednesday afternoon.

Mr. and Mrs. Will Hecht and daughter were recently visiting relatives in Clarkston.

Anton Nelson spent last week with his daughter, Mrs. Lief Field at Colton, Wash.

A three-act comedy entitled "Smith's Dilemma" will be given by home talent, at the Community hall on Bear ridge, Saturday evening, November 13th, beginning at 7:30. Come and bring your friends.

**Fairview Items**

Mr. and Mrs. James Helton, Mr. and Mrs. Milton Parsons and Jack Fleshman left by auto for a two week's visit at the home of Mr. Parson's parents at Ha-

german, Idaho. Doc Glenn attended the football game at Moscow, Saturday. Philip Dougherty and Elmer Knecht left for Spokane, Sunday.

Angus Fry and Richard Blankenship, left Tuesday morning for a hunting trip in the Big Island country.

Mr. and Mrs. Walter McCall spent Sunday at the Hartung home in Cameron.

Mr. and Mrs. Glen Fleshman from Nezperce are visiting at the T. J. Fleshman home.

Mr. and Mrs. Onay Walker and Miss Melva Walker visited Sunday at the Ray Morgan home.

Mr. and Mrs. John Glenn were business visitors in Lewiston, Monday.

Tom Dougherty is reported on the sick list.

Reginald McKay enrolled in the school this week.

Mr. and Mrs. Wm. Wolf have moved back to their farm at the top of the Kendrick grade.

Mrs. Albert Lindstrom returned to her home from Clarkston, Sunday.

**A BIG TREAT FOR LOCAL MOVIE FANS.**

Good Picture at New Kendrick This Week.

The picture "Merton of the Movies" which is being shown at the New Kendrick Theatre, tonight and Saturday, is a comedy drama made by the director of the "Covered Wagon". It is

VIOLA DANA

one of the most talked of stage plays that has ever been put on the screen. The stars of this picture are Viola Dana and Glen Hunter, two of the best comedy actors on screen. This feature played for 52 weeks in New York alone, and is a knock-out for laughing purposes and heart throbs.—Adv.

**SHOOTING MATCH**

In the town park, Kendrick, Friday, Nov. 19, given by Wayne Mathes. 46-1

**Bouncing Radio Wave Gives Military Secrecy**

San Pedro, Calif.—Development of a radio system for naval communication which eliminates the danger of enemy interception of signals and which has value in commercial work, was announced here by Maj. Francis E. Pierce, radio officer of the United States marine corps. Tests have demonstrated, he said, that a device invented by him is capable of transmitting radio signals so that they can be ricocheted over intervening spaces. In one test a ship transmitted radio signals to a sister ship, while a vessel which steamed between the two was unable to pick up the signals.

**Old English "Harvest Home"**

Bloomfield gives us a fine picture of Harvest Home in Suffolk, England where the foremost man in the field was honored with the title of "lord" and at the Horkey or Harvest home feast he collected money from farmers and visitors to make a frolic afterwards, which was termed the "largess spending." Even in Bloomfield's time this quaint custom was on the wane.

**METHODIST CHURCH NOTICE**

Morning worship at 11 o'clock, Subject: "Forward March." Evening service at 7:30. Subject: "Halt." League at 6:30 p. m. You are cordially invited. L. E. Taber, Pastor.

**Emanuel Lutheran Church**

Rev. E. A. Rein, Pastor  
Cameron, Idaho

Sunday School ..... 9:30 a.m.  
Church Service ..... 10:30 a.m.  
Church Council first Monday in the month.

Ladies Aid first Wednesday in the month.  
Come and worship with us.

Send your job printing to the Kendrick Gazette Good printing, good service.

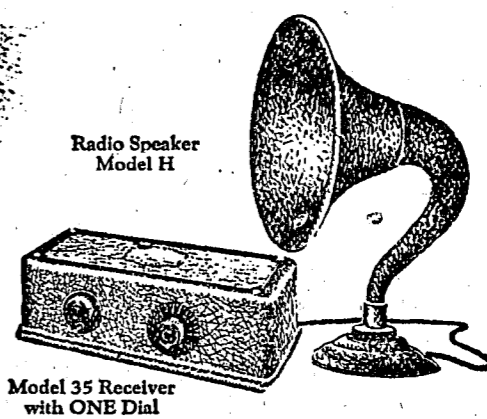

Ready to Serve You With Quality Merchandise at the Lowest Possible Price.

**KENDRICK STORE CO.**

"The Quality Store"

**ATWATER KENT RADIO**

You've heard about it—we have it

Let us show you the Model 35—the sensation of the year, everywhere.

No one but Atwater Kent could have produced such a set as this—

ONE Dial operation sockets for six tubes shielded, compact, gold-trimmed cabinet, with battery cable attached

for such a low price as this!

NOW you can have a first-class radio receiver—an Atwater Kent, with ONE Dial—at a price a one-tuber would have cost you not so very long ago.

Let us show you how it looks and what it does—and how easily you can place it in your home.

**\$140.00 Complete**

**ANNOUNCEMENT**

We have installed a large battery charger to take care of radio batteries. Special prices for charging batteries for the season.

**Carlson Hardware Company**

**Record Price for Rug**

An Isphahan of the Sixteenth century brought recently \$78,000, which is said to be the highest price paid for a rug in the United States and probably in the world. The Sixteenth century was the high period of Persian rug weaving.

**Lawyer Father of Kings**

Charles Bonaparte, a lawyer in a small town on the island of Corsica, was known as the "Father of Kings." He was the father of Napoleon I; Joseph, king of Naples; Louis, king of Holland, and Jerome, king of Westphalia.
