

NEWS NOTES FROM THE KENDRICK SCHOOLS

What The Students Are Doing This Week.

Little Jean Taylor's mother surprised the primary room last Friday afternoon by sending up a lovely cake with seven candles on it, ice cream and cookies. The occasion was Jean's birthday. Everyone of the children had a wonderful time and certainly enjoyed the refreshments.

The primary room is all decorated and waiting the approach of Easter, for the room decorations this month are as follows: Blackboard scene: Two children feeding lettuce to rabbits. Window decorations: Each window has two rabbits about 19 inches high, dressed in bright colored suits. Sandtable: Easter parade. A clever duck pulling an Easter cart. Following this is the rooster, hen and nine little chicks. Watching the parade is an Easter bunny. Lantern decoration: Easter bunnies, chicks, ducks and tulips. On the side wall is quite an exhibit of the children's work, puppy dogs of all colors, cats with ribbons around their necks, clown jumping jacks, bunny rabbits dressed in many colors and bunny posters.

The first graders are doing two figure adding in number work.

The Friday afternoon visitor was little Bobby Taylor.

There have been only three absences in the primary room this month.

The sixth graders have started studying the Constitution.

The Freshman Assembly program was: Bible reading, Howard Dammarell; Jokes, Arthur Foster and Robert Dammarell; Doll show, Freshman girls; Song, Freshman girls; Song, Mixed quartet.

The high school students are reviewing for the six week's exams. There will be some exemptions.

The play is progressing very rapidly. Those in it practice nearly every night. They will put it on as soon as possible.

The English IV class has been having a review of grammar. This includes a great deal of spelling, which the students seem to need.

The Ancient History class has only a few more pages of their book to finish. This shows good work on the part of the students.

The boys have been practicing baseball very faithfully lately. The girls are also interested in their team.

The girls and boys decided on what style letter they wanted for basket ball. The girls got the old English style "K" and the boys got the script style "K". Those on the girls team who will receive letters are: Margarita Gertje, Mabel Taber, Lizzie Jones, Leora Aiken, Mae Freytag and Margaret McDowell.

The boys who will receive letters are: Roy Sparber, Gerald Ingle, Elbert Long, Walter Sparber and Claude Cook.

An error was made in last week's school notes in the grades made by the high school. The average number of errors made was 69.7 out of a possible 200, instead of 69.7 per cent errors. The highest percentage made by any pupil was 84 and the average for the school was 65. Had it been possible to supply each pupil with printed questions, which called for indicating right or wrong, for the most part, the average, no doubt, would have been much higher.

Stand Back

"Mr. Becker," announced the German farmer entering the formers store, "I haf de schmall pox unt I—" "You have what? Smallpox?" exclaimed the store-keeper backing away while his clerks disappeared into the back room. "Stand back there, don't come a step nearer. Don't you know any better than to—" "Sny," broke in the farmer, "Vot's da matter mit you fellers anyway? Vot I triedto say was I haf dot schmall pox mit putter outside in my vagon vot Mrs. Becker ordered last veek."—Ex.

Nez Perce County Spellers

Elimination contests for the county spelling match to be held in Lewiston tomorrow were held in 13 centers in Nez Perce county last Friday. Winners of first and second places in each grade from the third to the eighth are eligible to participate in the county meet. The winners of first and second places in the various grades of the Southwick and Leland districts are as follows:

Southwick Center

Third grade—Naomi Armitage, Southwick, first; Harry Stump, Southwick, second

Fourth grade—Ruby McCoy, Southwick, first; Edwardine Wegner, Grinolds, second.

Fifth grade—Ruth Isaman, Southwick, first; Lucile Whiting, Southwick, second.

Sixth grade—Esther Whiting, Southwick, first; Frank Triplett, Southwick, second.

Seventh grade—Myrtle Gertje, Grinolds, first; Thelma Mill, Grinolds, second.

Eighth grade—Emma Wegner, first; Orla Rungar, Southwick, second.

Leland Center

Third grade—Wayne Wegner, Cameron, first; Joy Fleshman, Leland, second.

Fourth grade—Blanche Cole, and Wayne Yenni, Leland, tied for first.

Fifth grade—Evelyn Hartinger, Welker, first; Adrian DeWinter, Leland, second.

Sixth grade—Maxine, Fleshman, Leland, first; Irene Meyer, Cameron, second.

Seventh grade—Dwight Hoffman, Leland, first; and Bernice Schwartz, Cameron, second.

Campfire Notes

Monday night the Potlatch Campfire Girls held a ceremonial meeting at the home of Hester Knepper, where candidates were awarded their honor beads. The candle lighting ceremony was very pretty and all members were present to take part, also a number of guests were there to witness their first ceremonial. The girls gave the first act of the play they are working on to give in the near future. Those in the first act were: Eleanor Herres, Edna Stanton, Lillian Long, Marjorie Davidson, Nettie Mae McDowell and Bessie Blevis. The group then practiced a new song which is also for the play. Light refreshments of fruit cocktail and drop cakes were served.

Saturday afternoon, Campfire Girls had a hike and picnic supper from 2 to 7, at the 'Rockies'. Mrs. Ramey accompanied the girls.

Monday night of next week the Campfire Girls will meet with Lillian Long for a business meeting and song practice. Mrs. Anderson is helping the girls with their music and Mrs. Harold Thomas will direct the Oriental dances. The girls expect to have their play ready to present the latter part of April or the first of May. The play is a Japanese comedy drama of three acts interspersed with Oriental costume songs, chorus and folk dances.

Mrs. Edgar Long resigned, after a year's service as guardian of the Campfire and Mrs. McKeever became guardian, while her place of assistant guardian has not yet been filled.

Mistakes

When a plumber makes a mistake, he charges twice for it.

When a lawyer makes a mistake, it's just what he wanted, because he has a chance to try the case again.

When a doctor makes a mistake he buries it.

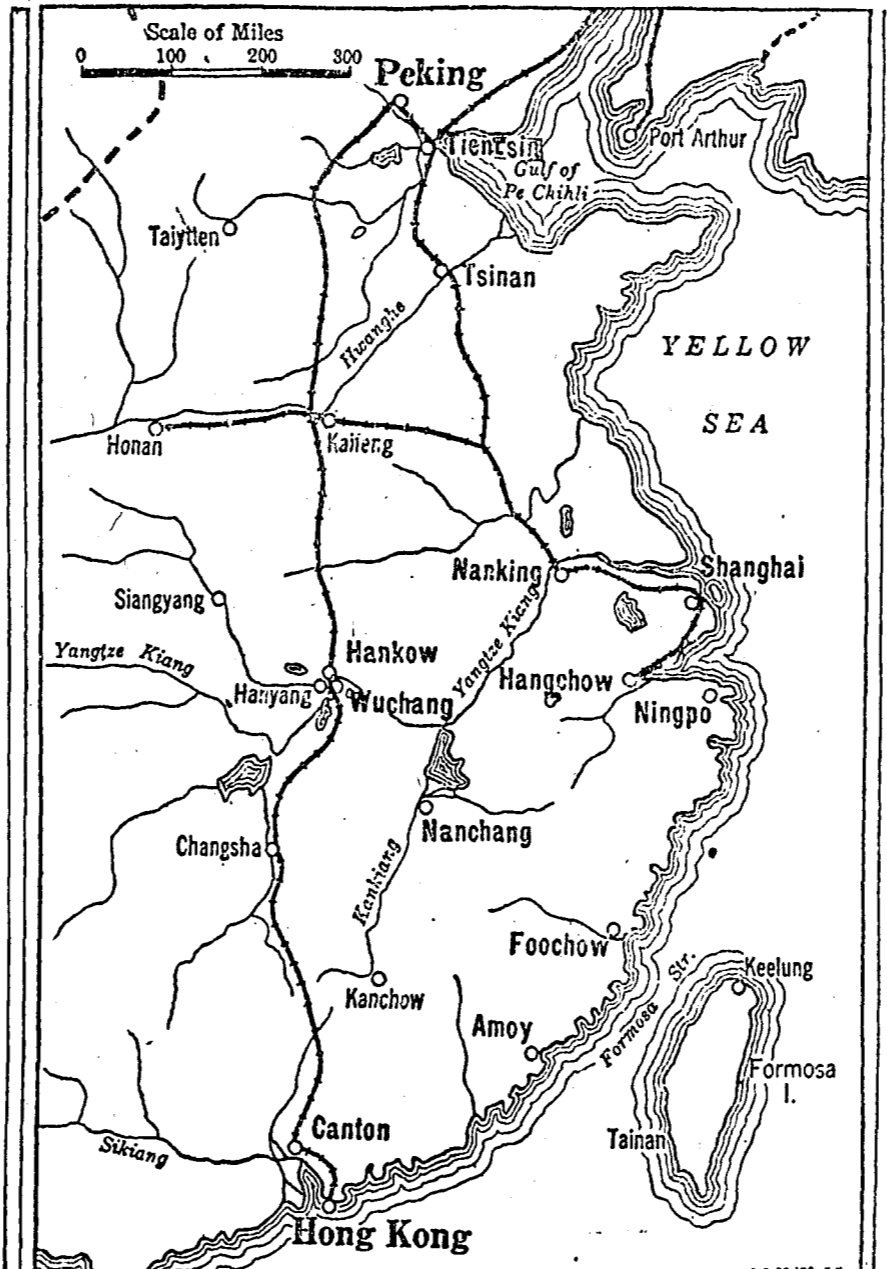

When a judge makes a mistake, it becomes a law of the land.

When a preacher makes a mistake, nobody knows the difference.

When an electrician makes a mistake, he blames it on induction; nobody knows what that means.

When an editor makes a mistake, it's unpardonable.—Select.

Where the Chinese Are Fighting

This map of the part of China involved in the warfare between the Cantonese and the northern Chinese will be useful for reference when reading the news dispatches from the Orient.

The Farmers Institute

While the crowd in attendance at the various lectures of the Farmers Institute held here last Saturday, were not as large as expected, the program generally was very successful. In the morning session R. T. Parkhurst, head of the poultry department of the university of Idaho, gave a very fine talk on "Production Problems of the Farm Flock." This was a meeting for both men and ladies. Those who attended were well repaid for the time spent.

The afternoon session were devoted to talks on farm topics at the New Kendrick Theatre for the men. C. C. Vincent, head of the department of Horticulture of the university and J. M. Reader, assistant plant pathologist and County Agent Taylor each took part in this program. Geo. Davidson presided at the men's meeting.

The afternoon session for the ladies was in charge of Miss Marion Hepworth. She is a splendid speaker and her subjects were intensely interesting and instructive. Mrs. G. P. Anderson presided.

The institute was put on under the auspices of the Kendrick Commercial Club and handled by the agricultural committee of the club.

Entertained at Bridge

Mr. and Mrs. A. K. Carlson entertained the Okoke Bridge Club last Saturday evening. The guests assembled at eight o'clock and spent several pleasant hours at bridge, after which refreshments of ice cream, cake and coffee were served. The scores were tallied and the hostess announced that the usual order was to be reversed and the low scores received the prizes. Mrs. H. Thomas won the ladies' prize and Mr. Emery, who filled Mr. Newton's place, won the men's prize.

Birthday Party

Saturday afternoon, Mrs. R. D. Newton entertained several little folks at a birthday party for Marylin. The afternoon was enjoyed in games and dainty refreshments were served. The little guests were: Barbara Long, Joyce and Marian Anderson, Dickie Carlson and Marylin Newton.

Joint W. O. W. Rally

Julietta Camp No. 203 and Kendrick Camp No. 204 of the Woodmen of the World will fire their opening gun of a spring campaign with a big rally and entertainment in the Fraternal Temple at Kendrick, Wednesday, April 6th at 8 p. m.

The officers of these camps have secured for the occasion Neighbor Capt. T. Jones, Jr., a traveling entertainer of the W. O. W. Capt. Jones is a magician of world wide fame having circled the globe three times on the legitimate stage at which time he mastered many of the astounding illusions of Europe. He is also a veteran of the World War and a member of the American Legion.

The show which Capt. Jones will run in Kendrick will last about 2 hours and twenty minutes, every minute of which the spectators will be held spell-bound.

The members of these two W. O. W. camps are extending invitations to every man and prospective candidates within a radius of ten miles of their camps, and from all indications the Fraternal Temple will be filled to overflowing.

Court Convenes Next Monday

Judge E. C. Steele of the second Judicial district court, Wednesday notified attorneys that the jury in the Latah district court, spring term, would be called to report on April 11, at 9 a. m.

He also notified attorneys that he would call the criminal and civil calendar Thursday morning at 9:30 o'clock to make issues in all cases and for the purpose of setting the civil jury calendar for trial.

It is believed that trial of jury cases will occupy about two weeks. The term is called to start Monday, April 4th.—Star-Mirror.

Arthur Bisbane, Harman Leob, of Chicago, 5 weeks old, walks without help and breaks all records. However, a chicken can walk when it is five seconds old. One child may walk at a year old, and do nothing but walk. Pope, who wrote the Essay on Man and left a fame worth while, was so feeble, even after he grew up, he had to be sewed up in a canvas jacket that he might sit up and write.

Death of Mrs. Charles Hill

Mrs. Charles Hill, one of the pioneer residents of the Potlatch country, passed away at her home in the Fairview community Thursday of last week. Death was due to a paralytic stroke which she suffered the fore part of the week. Her passing created profound sorrow in the community where she was so well known and had made so many warm friends.

Funeral services were held Saturday morning at the home and were conducted by her former pastor, Rev. C. D. Bell, assisted by Rev. Johns of Grants Pass, Oregon. Her body was laid to rest in the Mountain Gem Abby at Lewiston.

Hannah Rayburn was born in San Gamon County, Illinois, July 28, 1855. She was united in marriage to Charles Hill, May 28, 1885. To this union two sons were born, Sherman Lee, who died in infancy, and Norman Lester. She is survived by her husband and son.

Mrs. Hill was a devout Christian woman and a member of the Methodist church. She was a faithful, loving wife and mother and her kind, neighborly spirit made for her many deep friendships. Her passing is a loss to the entire community where she had spent so many years of a busy, useful life.

Obituary

Willie Nichols Jones was born February 20, 1876, at Abingdon, Knox county, Illinois. He died March 24, 1927, at his home near Southwick, Idaho at the age of 51 years 1 month and 4 days.

He came to Idaho with his parents when 12 years old. He was married to Ella Belle Guernsey, November 2, 1901, at Denver, Idaho. To this union two daughters and one son were born, Mrs. Bertha Tschantz and Miss Edna Jones. Emery Nichols died in infancy.

He leaves besides his wife and daughters, his aged mother, Mrs. Sadie Jones of Dayton, Wash., three sisters, Mrs. Elvia Coen of Lucile, Idaho; Mrs. Etta Greenwood of Pomeroy and Mrs. Mattie Forney of Dayton, Wash., three brothers, Fred of Dayton, Wash., Len and Glenn of Lewiston and other relatives, besides a host of friends and neighbors.

Funeral services were held from the M. E. Church of which he was a member for a number of years, Saturday, March 26, Rev. K. O. Pearson of Peck, officiating. A very large crowd was present. His body was laid to rest in the Southwick cemetery.

Mrs. Jones has the love and sympathy of the whole community in her bereavement.

A loving one from us is gone, A voice we loved is stilled, A place is vacant in our home Which never can be filled.

Shipping Certified Seed Spuds

Kleweno Brothers are this week shipping a carload of certified Nettle Gem seed potatoes to Yakima for planting in that section, thus emphasizing the fact that good potatoes can be grown here and that the Yakima people recognize Idaho non-irrigated potatoes as among the best, else they would not buy them.

The Klewenos will have some 2500 sacks of certified seed potatoes, most of which have been sold to outside parties, but they still have a few that they are selling locally.

The potato business in the Genesee section is gradually coming into its own and with the completion of the organization of the proposed sales association it will be one of the leading crops with farmers.—Genesee News.

John Soumar of Myrtle was a Kendrick visitor Wednesday morning. He brought a piece of petrified wood to the Gazette office. He found a stump of petrified wood, weighing about 50 pounds, on the hillside near his home. It is beautifully colored stone and plainly shows the grain of the wood.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Mrs. Glenn Betts and Mrs. C. A. Betts were Kendrick visitors Saturday.

R. King and family spent Sunday at the home of Floyd Russell.

Mr. and Mrs. Fairley, Mrs. Gill and Mr. and Mrs. Longteig spent Sunday at the home of Vester Whiting and wife.

Mr. and Mrs. Homer Betts were the Sunday guests of Mr. and Mrs. Harold Whiting.

A nine pound son was born Monday morning to Mr. and Mrs. Howard Southwick. Mrs. Bertha Fry is caring for her during her sickness.

Wm. Henderson and family, Mrs. Elton McCoy and Mrs. Fred Whiting drove to Clarkston, Sunday, to visit Wm. Whiting and wife. They report Mrs. Whiting improving slowly. Mrs. Fred Whiting remained there for a few days visit with her father, Wm. Hewitt.

Mr. and Mrs. Owen Thornton left last Thursday for their home in Fraser, after spending part of the winter in Portland, and the rest of it in Southwick.

Those from Southwick that attended the play at Leland Friday night, given by the Ladies Aid were, Pearl Cowger, Imogene Trail, Miss Penny, Clara Hayward, Ross and Milford Armitage, Carlton Douglas, Carl Finke, Cecil Phillips, Mr. and Mrs. Homer Hayward and two sons, and Minnie, Wayne and Orla Bunker.

Mr. and Mrs. Claud Craig of Leland spent Monday at the home of Vester Whiting.

Mrs. Wm. Lawrence spent Monday afternoon, the guest of Mrs. Sherman Winters.

Mr. and Mrs. Vester Whiting, Mr. and Mrs. Roy Southwick, Mr. and Mrs. C. A. Cuddy and Mr. Ziemann drove to Lewiston, Wednesday.

Commie Perry was an overnight guest at the Wm Cowger home Monday night.

Walter Triplett and wife of Lewiston spent Sunday at the home of his parents, D. B. Triplett and wife.

Floyd Russell was a business visitor in Kendrick, Tuesday and Mrs. Russell spent the day in town as the guest of Mrs. Ben McCoy.

Mr. Isaman drove to Lewiston Friday evening returning home Saturday forenoon.

Mr. and Mrs. Phillips drove to Lewiston, Saturday, for a short visit with his parents, returning home the following day.

Jim Devore left Monday for Pullman, after spending the winter with Mr. and Mrs. Hoppe.

Mrs. Powell, who has been visiting her daughter, Mrs. Hoppe left Thursday for Peck, to visit with her daughter, Mrs. Bloom.

Wm. Bleck left Wednesday for Spokane to be with his wife, who will soon undergo an operation at one of the Spokane hospitals.

Jack Peterson went to Cavedish, Tuesday, to visit a few days with his brother, Virgil.

Mr. and Mrs. Attlee Mustoe spent Saturday and Sunday at the home of her parents, Harve Southwick and wife of Cream ridge.

Mr. and Mrs. Otto Schoeffler were the overnight guests of her sister, Mrs. Given Mustoe, Sunday night.

Mr. and Mrs. Russell Rogers, Mr. and Mrs. Jake Berriman, spent Sunday at the home of Mr. and Mrs. Gordon Harris.

A mother skunk, with three little skunks, was walking thru a forest. A lion approached. "Mother," said little Jimmy Skunk, "I am afraid that lion will eat us." The mother told him to be quiet, he had nothing to fear. The lion came closer. Little Johnny Skunk grew fearful, then Jimmy Skunk, but the mother quieted them. When the lion was almost upon them the mother stopped. "Children," she said, "Let us spray."—Ex.

JULIAETTA COMMUNITY NEWS

Accident Occurs

While Thomas Pierce was going from the Wm. Behrens home on Potlatch ridge to the Jess Cox place, with a team and wagon, he had the misfortune of getting his foot badly hurt. He was trotting down hill and the reach pole, being weak, broke off and ran into the ground, causing the hind wheels to be thrown over Thomas and pinned him down. The team trotted on with the front wheels until some one stopped them and tied them to a fence post.

Thomas finally got out from under the wheels. His foot and leg felt numb but otherwise he seemed uninjured. It was not until after he had reached home and had bathed his limb, that the feeling came back and it began to pain. A doctor's examination proved the injury to be a bad sprain in the ankle and several bruises.

Surprise Party

A crowd of neighbors and friends surprised Mr. O. Poole at his home Saturday evening. Mr. Poole immediately provided ample entertainment by rolling back the rug and placing the fiddler and organist with their instruments in one corner of the room. Delicious refreshments were served. Everyone departed having had a good time.

Young People's Class Entertain

Last Saturday evening the Methodist Young People entertained the Baptist Young People's classes and some non-attendant young people, in the basement of the church. Various interesting stunts, contests, active games and a mock wedding was the entertainment provided by the committee. Forrest Gallaher was the beautiful bride, Eugene Taylor the groom, Mrs. Powell Neilsson bridesmaid and Claude Clark was best man. With Mr. Metcalf officiating the bride took the groom as her unlawful wedded husband. Refreshments were served just before the close of the evenings entertainment.

Ladies Aid Meeting

The Methodist Ladies Aid met at the home of Mrs L. W. Houck Tuesday afternoon. The invited guests were: Mrs. Ed Taylor, Mrs. C Wright and Mrs. Hammond. Refreshments were served at five o'clock by the hostesses Mrs. Houck and Mrs. Geo. Dangherty.

Birthday Party Given

Mrs. J. Perry gave a surprise party last Wednesday evening on her son, Commodore, to celebrate his birthday. A good size crowd was present and they had an enjoyable evening playing games and listening to music provided for their entertainment. Refreshments were served at midnight.

Sustained Painful Injuries

S. S. Taber of Fix ridge was seriously injured one day last week while trying to fix a belt on the line shaft in the wash house. The belt was rather loose and it had slipped off several times before. As he was putting it on the last time, without stopping the engine, some pin screws on the shaft caught his clothing twisting him right up and over the shaft. As the shaft was quite close to the wall of the building, several boards were knocked out with his body as it whirled him around. It was thought that he went around about three times before his weight finally stopped the engine, and he was left hanging with his head downward. Mr. Taber though he hung there for about ten minutes before his wife found him. His clothing was all torn off and a great gash was cut under his arm, which laid bare all the arteries and veins and necessitated the taking of twenty stitches. Besides the cut he had several serious bruises and skinned places. Dr. Moorehead was called to attend him. He is in a rather weakened and nervous condition but is recovering as rapidly as could be expected.

Juliaetta Locals

Mrs. Mary Nutt returned last Wednesday from Lewiston.

George Schull was a Kendrick visitor last Thursday.

Mrs. Kate Keller, who was employed at a home some distance below Lewiston, left for that place last Thursday.

Mrs. W. R. Travis of Lewiston was a Juliaetta visitor last Thursday.

B. C. Custer transacted business in Kendrick last Friday.

Mr. and Mrs. Ira Fix of Fix ridge were Lewiston visitors Monday.

Mr. and Mrs. Wm. Beard of Spokane are visiting with Mr. Beard's brother, Bun, this week.

I. Williamson of Moscow was a visitor in Juliaetta Thursday.

Mrs. Hershall Strohm of Trinidad, Mrs. John Riley of Kendrick, Wm Fowler of Culdesac, Mr. and Mrs. Lou Stevens of Winchester, Mr. and Mrs. Harry Fowler of Clarkston, and Bryan Cargill of Princeton, were here Thursday to attend the funeral of Oliver Cargill.

John Draper was a business visitor in Kendrick, Friday.

B. H. Weatherby of Fix ridge was a Moscow visitor Saturday.

J. A. Kite of Kendrick visited in Juliaetta Saturday.

Jack Taylor was a visitor in Kendrick Saturday.

Wilma Vincent returned home from Lewiston last Wednesday.

Mrs. Susan Armstrong, who has been visiting at the Eben Adams home left Saturday for Spokane.

Charlie Levitt was a Kendrick visitor Saturday.

G. C. Bowen left Monday for Troy.

C. W. Jessup transacted business in Kendrick Saturday.

T. O. Greene made a business trip to Moscow, Saturday.

J. H. Williamson visited in Kendrick one day last week.

J. M. Hall left Sunday for a visit in Moscow.

There is to be an old time fiddlers contest at the theatre Saturday night after the show.

The Misses Gertrude and Ida Fox, Myrtle Kimberling and Bernice Woodruff were among those, who visited in Kendrick, Saturday.

Eddie Richardson was a visitor in Moscow, Monday.

Mrs. W. Buchanan transacted business in Kendrick, Monday.

Betty and Phyllis Cargill of Lewiston are visiting with their grandparents, Mr and Mrs. John Cargill.

Mr. and Mrs. Mel Miller of Potlatch ridge returned Sunday from Lewiston, where they have been taking treatments for the past two weeks.

Marion Hanks, who is employed on the railroad at Arrow, visited at the M. B. Pierce home Sunday.

W. J. Cochran, C. S. Biddison, and A. W. Behrens motored to Moscow, on business Wednesday. Albert and Dan Gruell of Arrow visited home folks Sunday.

Miss Margaret Pierce and Irving Jensen visited Miss Pierce's parents, Mr. and Mrs. M. B. Pierce, Sunday.

Card of Thanks

We wish to thank our kind friends and neighbors for their loving sympathy and help in our bereavement and also for the many beautiful flowers.

Mrs. Ella Jones and family.

Singing Hen Not Happy as Many People Thought

Singing hens have long been thought to be happy when, in fact, she sings only when all is not well in poultrydom. Hens, like human beings, are almost all very temperamental. The singing of a hen must not be confused with clucking. Biddy's song starts softly, proceeds without break for as long as breath will allow, and often ends in a high, nasal intonation. If the hen finds no suitable place to lay, she sings; when all the nests are full and she can't find one, she sings. Song gives vent to her feelings if hunger is troubling her, or thirst. She sings in strange surroundings like the small boy sent on an errand in the dark. Worry and shyness also bring song. She tries by singing to make herself look brave and at home at times when her self-assurance has been shaken. Poultrymen who want to keep their flocks in perfect contentment will keep them from singing.

Rations Fed to Layers Are Lacking in Protein

During recent experiments at the Nebraska Agricultural college, it was found that rations fed to laying hens were commonly lacking in some form of complete protein like meat meal, skim milk, tankage, dried buttermilk, or liquid buttermilk. An addition of six pounds of high-grade tankage to a typical corn-belt ration increased the egg production from 59 in the check pen to 183 eggs per hen in the tankage-fed lot. Skim milk or buttermilk, when available at all times, may take the place of meat meal or tankage in

the mash mixture, but it is necessary that each hen consume about 110 pounds of milk in a year in order to get the equivalent protein furnished by six pounds of tankage.

Statues for Deserving

Some one has observed that "he who explains is lost." This may be true of one who is constantly explaining. At any rate there are no statues erected to men who stopped to explain their mistakes. Statues are for those who achieve.—Grit.

A LOTTERY WITHOUT A WINNER

By W. R. MOREHOUSE
Public Relations Commission, American Bankers Association

(There is presented herewith the first of a series of articles exposing the wiles of sharpers who are after your money.)

ALMOST unbelievable amounts are lost to the American people annually from unwise ventures. This loss, estimated at nearly one billion dollars a year, is accounted for when you take into consideration that practically all of the money "invested" in numerous fake schemes and half-baked projects is forfeited by the investors. In presenting this series of articles regarding sharp practices and various kinds of swindles we hope to prevent thousands of people from falling into the traps already set for them by irresponsible and unscrupulous promoters.

W. R. MOREHOUSE

Through the use of only actual cases selected from several thousand, it is hoped to prove conclusively the futility of taking a "gambler's chance" with your savings, for as in a lottery without a winner you are bound to lose. Much of the material here used has been supplied by the Better Business Bureaus throughout the United States which are non-profit organizations serving the investor without charge and acting wholly in the public interest. Read these cases and then file them away for future reference, for sooner or later you may find yourself on the verge of "taking a leap in the dark",—of speculating with your savings as the people here told about were inveigled into doing.

A "good front" has put over more crooked deals than any other one thing. Every irresponsible promoter specializes in putting on a "good front" in his dealings with those whom he fleeces out of their savings. Whether or not he is successful is due to a large degree on how good a front he is able to put on. In motion pictures, the sets, or "props" as they are called, supply the setting for the scenes. They are used to portray things that seem large, things that seem grand and beautiful. Peer behind those sets and what do you see there? You see that the attractive fronts are supported by braces made of the cheapest, knottiest and poorest timber imaginable.

They serve their purpose in the world of make-believe, but in real life you cannot afford to buy

Satanic cunning they fall in line with their intended victim's likes and dislikes, his viewpoint and his hobby, and when they have gained his favor and trust they grow more and more confidential, presently taking a great interest in his welfare and happiness. Before long they are offering advice and pointing out how he can better his own interests by making a new disposition of his available cash or by selling his present good securities and buying others recommended by them.

Your promoter will draw upon your imagination and paint a picture of a scheme by which you can make thou-

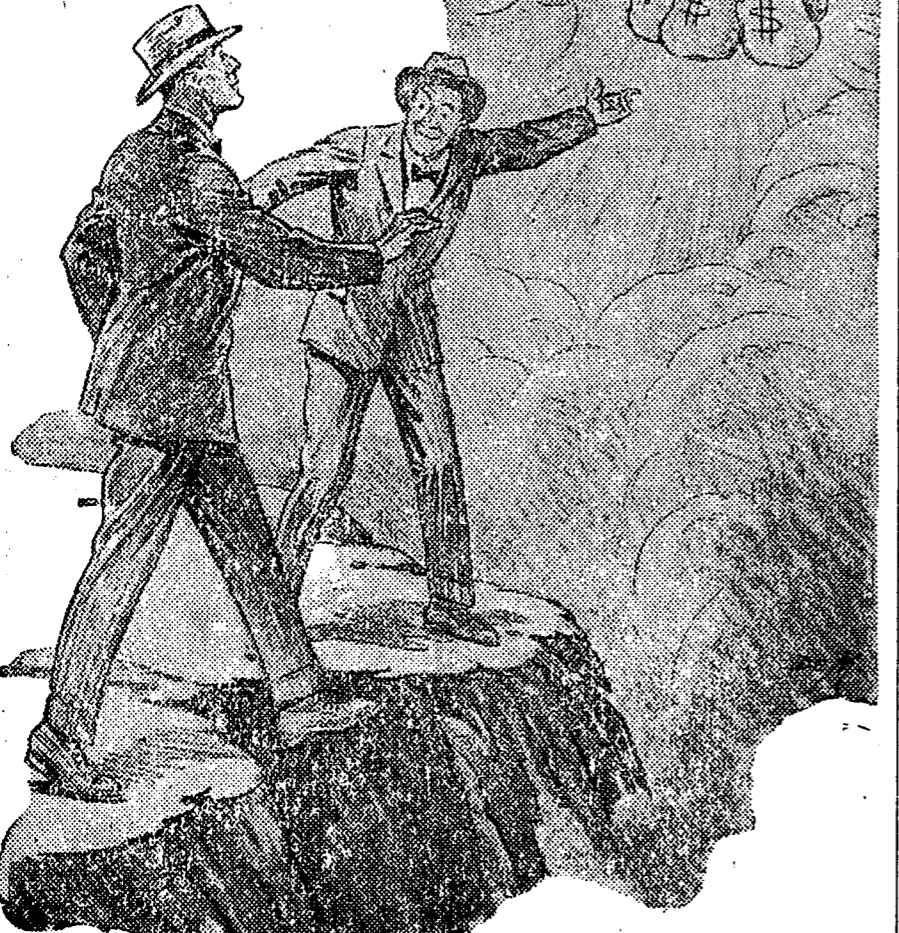

sands of dollars without effort or risk,—he may describe some invention selling for an astounding sum, or depict the prospects of a "fabulous mine or oil company that is going to double and treble in value over night. As a climax he may paint the picture of a vine-covered cottage which is to be yours in your old age, with its radiantly burning fire on the hearth and with all the luxuries that go with a happy home. And finally, he may paint you sitting before this fire, happy and contented—*independent for life, as the result of an investment made according to his advice.*

But there is a great difference between what you get and what the wild-cat promoter paints in the imagination of his victims. By the lure of easy money he leads them over the precipice of financial ruin. Instead of old-age ease and comforts there usually results poverty and privation.

Unscrupulous persons of the "good front" type are expert actors in the role of "big brother" to inexperienced investors with money at their command. As protector and advisor to the widow and the inexperienced, which they claim to be, they are in reality wolves in sheep's clothing.

Some Vegetables Should Be Sown Early in Spring

The seed of certain kinds of vegetables should be sown early in the spring for best results, states W. T. Macoun, Canadian horticulturist. One should be prepared to begin operations in the garden as soon as the soil is dry enough. Those plants of which the leaves are eaten which should be started early are lettuce, spinach, mustard and cress, and there is little danger of planting them too soon. Other vegetables which are grown for their bulbs or roots may also be planted at the same time though they are not quite so hardy as those grown for their leaves. These are onions, carrots, beets, parsnips and early turnips. Peas are about as hardy as these but may rot if the weather turns cold and wet. However, it usually pays to plant peas at the same time as the others, as early sown peas give a much better crop as a rule than if sown late. Other vegetables which should be started early to get best results are cabbage, cauliflower, tomatoes and melon. The latter will not stand any fro-

sands of dollars without effort or risk,—he may describe some invention selling for an astounding sum, or depict the prospects of a "fabulous mine or oil company that is going to double and treble in value over night. As a climax he may paint the picture of a vine-covered cottage which is to be yours in your old age, with its radiantly burning fire on the hearth and with all the luxuries that go with a happy home. And finally, he may paint you sitting before this fire, happy and contented—*independent for life, as the result of an investment made according to his advice.*

DAIRY

BIG ADVANTAGES OF FALL CALVES

There are a number of advantages in having dairy calves dropped in the fall. Cows which freshen in the fall usually produce more milk than cows which freshen at other seasons of the year. Heifers are usually bred so that they will come in milk at two years of age. If they are full calves they will mature at the proper season. Calves which are to be raised on skim milk can be kept growing nicely during the winter and turned out on pasture without checking their growth. The disadvantages of feeding and care in winter are more than offset by the annoyance from flies and hot weather which are experienced by the spring calves. In addition there is usually more time available for giving the calves proper attention in the winter.

Clean pails for feeding and clean barns for housing are two important essentials in raising the calves. The calves will need to have a stall or lot where they can get plenty of sunshine. If the calves are confined to a dirty, dark stall they are apt to become unthrifty.

Calves should have their mothers' milk when they are started on feed. Whole milk should be continued for the first month and gradually shifted to skim milk. The calves should be given grain as soon as they will eat it. If a little cracked corn is placed in the bottom of the milk pails the calves will soon acquire a taste for it. The amount of milk and grain should always be limited. Better results are obtained if the calves are kept hungry.

An abundance of clean water should be accessible at all times or available at frequent intervals. Good hay should be provided. Many people favor mixed hay for calves as it is less apt to cause scours than alfalfa hay. However, good results can be had in feeding alfalfa hay if it is fed in limited quantities so that the calves will not gorge themselves. If any scours appear, the hay should be changed and special attention paid to cleanliness of both the stalls and milk pails. Sanitation, feeding and housing are the important details in raising fall calves successfully.

Dairyman Gains Much by Better Feeding Methods

That ground corn and ground oats make a dairy cow ration that is far superior to broken ear corn has been strikingly demonstrated in the case of one Knox county (Ill.) dairy herd, says C. S. Rhode, dairy extension specialist of the college of agriculture, University of Illinois, who has charge of the county dairy herd improvement associations in the state. The owner of this Knox county herd increased his profits \$27.74 during one month by changing from a feed of broken ear corn to one of ground corn and ground oats, Fred Shipley, tester in the county herd improvement association, reported. With the change in the ration came an increase in the average production of each cow for the month of 100 pounds of milk and 6.7 pounds of butterfat.

The ration was improved both by grinding the corn and by adding the ground oats, Rhode explained. The benefits of grinding in this case are in line with the results of experimental work and the experiences of practical dairymen, according to Rhode. Dairy cows are hard-working animals and they will give better results if such feeds as corn, oats and barley are given to them in the ground form, he added.

Twin Bulls Declared to Be Potent as Breeders

Will twin calves breed? This subject is often misunderstood. Twin bulls are as sure breeders as bulls of single birth and there is no reason to suspect failure to breed when a bull is twinned with another bull, says W. W. Swett of the Missouri College of Agriculture.

The same thing can be said of heifers that are twinned together. They are as sure to be breeders as

any other heifers.

When a heifer and a bull are born together, the heifer is known as a free-martin. The bull, twinned with a heifer is as certain to be a breeder as a bull of single birth, but the free-martin heifer is almost sure to be sterile.

Only a very few free-martins have been known to breed, and the chances are very small that they will ever reproduce. As a rule it is not advisable to raise free-martin heifers as they usually result in failures and are worth no more than their beef value.

Effect of Big Storm

Dairymen who have kept milk records for a series of years well know the effect of a big storm on the producing herd. Invariably there is a severe shrink resulting from a cold, stormy winter period. To prevent this shrink requires some additional work on the part of the cow keeper. A herdsman who is able to prevent a shrink during a blizzard understands his business and deserves commendation, for he has proven that he is efficient in his work.

Use Care in This

Fertilizers of any kind should be added only in small quantities and only to healthy growing plants, says Nature Magazine. More harm is done to house plants by overfertilization than any other single agency. Fertilizer is a plant food and, as such, is very rich. It must not, therefore, be given in large quantities nor to sickly plants.

Petrified Wood

Petrification of wood is the result of water carrying in solution certain chemicals, especially silica or quartz. The wood becomes saturated with the water and each particle of wood is replaced, atom for atom, by the silica. We speak of a tree turning to stone becoming petrified. The wood does not "turn to" stone, but is replaced by "stone."

First Long-Distance Talk

The first long-distance conversation was held on the telephone, between Boston and Salem, November 26, 1876.

Australia's First Name

New Holland was the name originally given to Australia by its Dutch discoverers in 1606.

Green Feeds Essential for Health of Poultry

During the last cold spells of the season many cases of leg weakness in hens that have been laying heavily are reported. These are usually traceable to the fact that the owner has run out of green food. Such foods contain what is technically known as vitamins. When they are exhausted from the bird's body she begins to suffer. If green feed is given the bird will soon recover. Cabbage, sprouted grains or even steamed alfalfa leaves are beneficial.—O. C. Krum, Poultry Specialist, Colorado Agricultural College.

Farm Hints

It's easy to haul lime in winter on a sled.

High priced protein feeds mean that we should grow more alfalfa and clover.

More than twenty million forest trees were planted in New York state during 1926.

It pays to pay cash for seeds and fertilizers. Get credit at a bank; they make that their business and they charge less too.

Vegetable protein such as is contained in cottonseed meal is best for cattle and sheep, while the animal protein of tankage is best for hogs.

A handy helper in burning roadsides and inside fence rows is a torch made by twisting a piece of baling wire around a gunny sack that has been rolled into a tight wad and soaked in used crank case oil. Such a torch when effectively applied makes the stubbornest trash burn clean.

Skim Milk Good for Farm Stock

Can Be Made Into Concentrated Product for Poultry and Hogs.

(Prepared by the United States Department of Agriculture.)

Surplus skim milk at creameries and city milk plants can be made into a concentrated product suitable for poultry and hog feeding, says the United States Department of Agriculture. Improved methods of souring and concentrating skim milk, developed by the bureau of dairy industry, make it possible to manufacture a product that will keep without spoiling, thus overcoming the chief difficulty experienced in the past in using skim milk in this way. The method is described in department circular 404 C, just issued and now ready for distribution.

Special Culture Used.
Concentrated skim milk must have an acidity high enough to keep it from spoiling. The ordinary lactic bacteria in milk do not produce sufficient acidity for this purpose. In the new method a special culture which develops a high acidity is used. By this method the bureau has been able to develop an acidity in concentrated skim milk of 6 per cent, which is sufficient to keep the product indefinitely without appreciable change.

Many concerns are now making poultry and hog feed from skim milk concentrated by these improved methods. The product usually sells from 8 cents a pound at the factory when sold in car lots to 4 cents in small packages. No difficulty has been experienced in disposing of large quantities, either to poultrymen and hog raisers in the vicinity of the plant or to jobbers who specialize in poultry feeds.

Estimated Cost of Production.
At an estimated production cost of 1 1/2 cents per pound for the product, a price of 3 cents at the factory would net about 25 cents per hundred for skim milk, and at 4 cents the return would be about 58 cents. As a means of disposing of surplus skim milk this product has certain advantages, says the bureau of dairy industry. It is a staple product with an established market. It can be made at any season of the year and stored to supply a uniform demand, or it can be sold to jobbers whenever a sufficient quantity for shipment has accumulated.

Copies of the circular may be obtained, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington, D. C.

Three Good Methods of Treating Oats for Smut

Three methods of treating seed oats for control of smut have been suggested. In the formaldehyde treatment the grain is spread on a clean floor or canvas and sprinkled with a solution of 1 pint of formaldehyde to 40 gallons of water. The solution is applied at the rate of three-fourths of a gallon to each bushel, as the grain is shoveled and then the pile covered with a blanket or canvas for two or three hours. After the seed has been spread to dry, it should be sown as soon as possible to avoid injury to germination.

In the dry method, 1 pint of formaldehyde is diluted in 10 gallons of water. This being a stronger solution, only 1 pint per bushel is required and may be spread with a vapor sprayer, after which the grain is covered for two hours and then spread to dry.

The dust treatment, though more expensive, has an advantage inasmuch as the grain may be treated at any time before seeding, without impairing the germination. The dust is prepared by thoroughly mixing and pulverizing together 2 pounds of corrosive sublimate and 1 pound of copper sulphate or blue stone, and dusted on, 3 ounces to each bushel of grain.

FARM NOTES

Idle land is an expensive luxury.

One of the best uses of waste land is for growing a farm wood lot.

Lime put on the soil in the fall is best for the crops which follow and saves labor in the spring also.

Lime is a bulky product. The economical way to handle it is to haul direct from the car to the field. Extra handling means added expense.

Kill ants in the garden with carbon bisulphide. Thrust a stick into the middle of the hill. Pour in a spoonful of bisulphide and cover the hole.

Mixtures of sudan and soy beans grown together did not yield as much as sudan alone, but the quality of the hay was improved in test experiments carried out.

Late fall and winter dressings of manure on old stands of alfalfa have increased the hay yields by nearly one ton per acre, when the manure was applied at 2 1/2 tons annually.

The sweet clover plant is hardy but that does not mean it needs no care or management. This crop is used in a number of different ways and its proper management is, therefore, dependent very largely upon the use made of it.

FARM POULTRY

RIGHT CARE AND FEED FOR EGGS

In the summer the farm hen may forage for a supply of animal feed and garner all the available bugs, worms, and green feed needed to replenish worn-out body tissue and to produce an abundant quantity of eggs. But winter has come now and the bugs are gone. So has the green feed on many farms and the hen must be fed if she is expected to produce eggs in profitable quantities.

"Eggs are high-priced in the winter because so few farm hens are laying at this season," says Dr. B. F. Kaupp, head of the poultry department at South Carolina State college. "The two usual reasons for low egg production are found in the poor producing power of the hen and also because she may not have the proper food and care. If the hen comes from a high producing strain and is not laying as she should, it is possible that she may not have a comfortable house, or that she is not free of parasites, and does not have the right kind of feed and other care."

Doctor Kaupp states that eggs are low in price during the spring months because everybody's hens are laying them. Eggs always go down in the spring and the farmers' organizations should store eggs at that season. In the winter eggs go up to 75 cents and \$1-per dozen because the hens are not laying. Then the storage houses bring out the cheap spring eggs to sell at a good profit.

The poultry department has prepared extension circulars 155, 156 and 157 which tell how to put the farm flock on a paying basis. These bulletins are free and will tell how to cul and feed the birds for winter eggs. It should be remembered, states Doctor Kaupp, that laying hens must have mash before them at all times. The mash must contain crushed grains, minerals, fish or meat meal, or the surplus milk of the farm. Tender, green feed is also needed each day. Water should be constantly before the birds, and the grain feed given them twice each day.

Most Poultry Diseases Can Easily Be Conquered

A broom, shovel, scraper and a spray pump with some crude oil or other good spray material will conquer most poultry diseases. The University of Nebraska lists these remedies as the best for most poultry diseases. Unfortunately, they also require energy and initiative on the part of the flock owner. It is much easier to put pills or dope in the drinking water after the hens are sick than it is to scald the fountains and clean up the house.

Of course, poultry yields to treatment the same as other live stock, but why allow sickness to gain a foothold in the first place? Furthermore, the fellow who pins too much faith on bright-colored, strong-smelling medicines usually forgets to remove the cause of the trouble. A little study usually proves it to be over-crowding, poor ventilation, filth and vermin. Disease will cure the overcrowding, but it is an expensive method. Just plain prevention is all most poultry raisers need to avoid losses.

Profits Increased From Hens by Use of Lights

Tests at the Nebraska experiment station last winter on two pens of 90 leghorns each showed that electric lights increased the income from 90 hens \$25.44. The hens in both lots were as near alike as possible and both groups were kept in ordinary houses.

Both pens received exactly the same care except that one was lighted at 5 o'clock each morning and the other was not. Pulletts well matured and ready to lay by November 1 respond to lights all winter. Yearling hens that have molted late should not be forced before January 1. Morning light proved more practical from the standpoint of feed and management. Scratch feed was scattered in the litter at night so the hens could go to work in the morning as soon as an alarm turned on the lights.

Breeding Pens

Although the average poultry man cannot afford to trapnest his hens, he can greatly improve his flock by making a special breeding pen of his best male bird and a few choice hens or pullets. In choosing these breeders both egg producing and standard qualities should be kept in mind. By toe-marking or banding chicks hatched from this pen it will be found that the chicks hatched from the eggs from this pen will be superior to those from the general flock.

Dry Mash for Hens

The amount of dry mash that the hens eat is usually determined by the amount of scratch feed given to the flock. Satisfactory results are obtained by feeding twice as much scratch feed as mash during the winter months, the ratio being reversed during the summer and spring months. It is a good plan to give the heaviest feed late in the afternoon. Succulent feeds like alfalfa, clover, sprouted oats, etc., are rich in vitamins, and have an excellent effect on the digestive system.

Control Cadelle By Poison Fumigation

One Big Factor Is Cleanliness in Storehouse.

(Prepared by the United States Department of Agriculture.)

Cleanliness in the storehouse and granary is one of the most important factors in the control of the cadelle, a grain pest known all over the world and first described in 1758, says the United States Department of Agriculture. The habit of the larvae of burrowing into wooden floors, partitions and walls of bins, storehouses, and ships, accounts for much of the loss occasioned by fresh supplies becoming infested when placed in storage space formerly occupied by infested material.

A history of the cadelle, its distribution, and information concerning its control are contained in Department Bulletin No. 1428-D, just issued by the United States Department of Agriculture. The pest is usually associated in its attack upon food products with other grain pests. In the case of package goods, such as breakfast foods, the holes it bores in the cartons, give other and smaller pests avenues of attack upon foods that otherwise might remain free from infestation.

The cadelle in all stages can be killed by fumigation with carbon disulphide, from six to eight pounds per thousand cubic feet of bin space being used where bins are tight. Carbon tetrachloride has the advantage over carbon disulphide in that its vapor is nonexplosive and noninflammable, but it has the disadvantage of being about one-half to one-third as effective and must therefore be used in larger quantities.

On farms where grain bins are usually constructed of wood, hardwood should be used in preference to soft woods, and the construction made as tight as possible. Bins should be inspected annually and any badly burrowed woodwork removed. The substitution of concrete for wood wherever possible is one of the best means of preventing the rapid infestation of fresh supplies of grain or grain products.

A copy of the bulletin may be obtained, as long as the supply lasts, by writing to the United States Department of Agriculture, Washington.

Take Inventory of Farm When Least to Figure

The best time to take a farm inventory is when the least figuring has to be done. For general crop and stock farms, this is usually between January 1 and when the spring work starts. For poultry farms, the best time to take it probably is just after the pullets have been put in winter quarters. For those who have to comply with the income tax regulations, January 1 is the best date.

No specific date is set for taking such an inventory, but any convenient time will do if it is taken approximately the same time each year, according to the farm management department of the New York State College of Agriculture at Ithaca, N. Y.

The inventory should include real estate, horses, cattle, sheep, hogs, poultry, farm tools and equipment, and supplies on hand such as hay, straw, grain and silage.

In placing values, a conservative estimate of what an animal or article would sell for, with a reasonable length of time in which to dispose of it, is the best basis. This is about comparable to what it would bring at a well-attended farm auction.

After inventorying all the farm property, list other assets such as liberty bonds, certificates of indebtedness, receivable bills and cash. Shares of stock in corporations should be included at market value.

After inventorying all resources, list debts such as mortgages, notes, and bills owed, including with the notes and mortgages the dates of maturity.

After a complete list of all that is owed is made, make a summary showing the total value of each kind of farm property.

Compute the total resources, and from this subtract the total liabilities. This, then, represents the net worth or the true financial standing.

Sweet Clover Is One of the Best Soil Builders

Sweet clover is one of the best soil builders we can grow for soil building purposes. This does not mean that we should grow it to the exclusion of alfalfa or even red clover, but it does mean that we ought to seed down every acre of small grain with sweet clover that is not being seeded to some other legume intended for hay. Or perhaps at least half of the farms in Iowa we ought to grow sweet clover for pasture. It should be introduced in the rotation for both pasture and soil building. Let us pay more attention to that crop, not for hay, for alfalfa is much superior for that purpose, but, as stated, for pasture and for the addition of nitrogenous organic matter to the soil.

Light in Scratching Shed

Different poultrymen are building their scratching shed or house with one or two small windows at the rear of the house so that the chickens have light to work there. This keeps the litter worked out from the walls, and amounts to increasing the scratching area. If measured and estimated it will be surprising how much smaller some poultry houses are in actual service capacity than their dimensions would seem to indicate.

This modern age discriminates—and smokes Camels

THIS age is the hardest to satisfy—it's the most discriminating age ever known. That's why it goes to Camel for cigarette enjoyment. It takes real tobacco to satisfy modern smokers and Camels are made of the choicest tobaccos grown, marvelously blended. Smokers of today are right in demanding Camels; no better cigarettes are made, regardless of price.

To seek a real smoke is to find Camel—the choice of the modern world. Camels are a revelation of goodness, always mellow, smooth and mild. This age shows the way to smoke contentment—"Have a Camel!"

MORE HORSEPOWER FOR FARM RELIEF

All proposed plans have thus far failed to provide the farmer with farm relief by increasing his selling prices. Industry, however, met a somewhat similar situation by lowering the cost of production. A similar solution can be successfully applied to agriculture.

The increasing of production per worker on the farm is being met to a certain extent by using larger units of power, whether horse or mechanical. Where one man was using a single horse or team he is now using from 3 to 8 horses, thus increasing the ground covered from two to five times. By the use of larger power units hired labor can be reduced or eliminated.

An analysis of raising corn divides costs according to the following:

Land	50 percent
Labor	20 percent
Power	20 percent
Miscellaneous	10 percent

Of these items one can be considered stationary, namely, the land cost. Labor and power are variable and

have been the main obstructions to lower production costs. Larger power units are doing much to decrease labor factors. Also, larger power units if used over larger farm areas can do much to lower the power percentage.

Professor J. B. Davidson, senior agricultural engineer, United States Department of Agriculture, summing up investigational work in 36 states, offers this equation for farming:

$I = (S - C)Q$
When "I" equals income
"S" is selling price
"C" is cost of production
"Q" is the quantity of production

Professor Davidson states: "Where quantity of production is held uppermost one finds prosperous farmers who plan to farm more acres without increasing the overhead."

Corn controls central western agriculture. In that area the acreage one man can farm is dependent on the number he can cultivate. With the single row cultivator he was unable to cultivate more than four to seven acres per day. The two row cultivator doubled this amount. Three and four row cultivators are now on the market—even six row were used this season. It cultivates fifty acres per day.

Uncle Eben
"De Ten Commandments," said Uncle Eben. "Is supposed to direct de whole world. All put together, dey ain't as long as a plain ev'ryday matter like de traffic regulations.—Washington Star.

Optical Illusion
The pointed appearance of stars is due to an optical illusion of the eye. The stars are so far away that we can see them only as points of light, not as round or any other shape.

Desk for Busy People
The "pocket desk," a skeleton frame of silk cord suspended from the neck, has been invented in England for those who wish to read or knit without holding the book.

Leafiness, good green color, soft stems, and freedom from weeds and trash are the best indications of high feed value in alfalfa hay.

Little potatoes are no good for seed, the Ohio agricultural experiment station says, unless you know they come from high-yielding disease-free hills.

There is an old saying that the best "catch crop" is to catch up with the weeds. That is well, but a better way is to keep ahead of them all the time.

Don't forget to plant the healthful string bean. They taste mighty good when winter comes. The Kentucky Wonder is a very prolific bean, and few, if any, excel it in flavor.

INFLUENCES ON VALUE OF EGGS.

Eggs vary in size and color, but investigations show that healthy hens, fed normal rations, lay eggs that are consistently of good quality. However, there are many factors that influence the market value of eggs, most of which are within the control of the

producer and dealer of eggs. Eggs are not bought and sold by the pound, but the size of the eggs causes considerable difference in their value. "Extras" must weigh 46 pounds net per case of 30 dozen.

This is an average of slightly over two ounces per egg. "Extra firsts" must weigh 44 pounds per case. The proper selection of breeding stock is undoubtedly the biggest factor in securing eggs of good size, although the size is influenced to some extent by proper feeding.

Cleanliness has an important influence on the value of eggs. Dirty eggs deteriorate more rapidly than clean eggs, do not present as pleasant an appearance, are not fit for storage, and, therefore, do not sell for as high a price as eggs that are clean. Dirty eggs may be largely eliminated by providing plenty of clean nests which are well supplied with clean litter. On rainy days it may be helpful to keep the hens confined until 10 a. m. when most of the hens will be through laying for the day.

Some markets pay a premium for white eggs. A few markets pay a premium for brown eggs. Dealers seldom pay a premium for eggs of one color, as compared with mixed colors. In shipping eggs, it is necessary to take this characteristic of the market into consideration. Uniformity of color is always appreciated and this is one of the advantages gained by improving the flock through the use of improved stock.

Eggs may be of the same size and color but vary considerably in market value. This is on account of the difference in quality of the interior. Most eggs are good when they are first laid, but different methods of handling influence the quality to a large extent. Therefore, the problem of handling eggs is important as well as proper management of the flock.

Laughing Spell

The case of a patient who laughed 17 hours steadily was reported in a recent medical communication. It was pure laughter, with no other complications, and was finally arrested by the continued use of sedative drugs.

To Enlarge Windows

A small window may be made to look larger by setting the curtain rods beyond the casing on each side and using draperies of a material heavy enough so that casings will not be seen through material.

Cat's Nine Lives

The notion concerning the nine lives of a cat goes back to ancient Egypt. The cat-headed goddess Pasht was said to have nine lives. It is amazing how a thought will persist through the ages.

Early Suffrage Parade

A woman suffrage demonstration was held in New York on October 23, 1915. The demonstration was one of protest, and an approximate estimate sets the number who paraded at 25,000.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho.....

Notice is hereby given, That the Annual School Meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 16th day of April, 1927, and the said meeting shall convene at 1 o'clock P. M. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of, at the school house in said district; that at said meeting the following business will be transacted:

1. One trustee to serve a term of three (3) years will be elected.
2. The length of time school shall be taught in said District for the ensuing year and the seasons of the

year in which the same shall be taught will be determined.

3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.

4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot. Dated this 25th day of March 1927.

A. K. CARLSON,
Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3

Notice of Village Election

Notice is hereby given that an election will be held at the City Hall, April 26, 1927, according to law, to elect three members of the Village Board to succeed Trustee Newton, Trustee Long, Trustee Raby and Trustee Deobald, whose terms then expire. Nominations for these offices may be made by a mass meeting or

caucus of ten qualified electors of the village who will certify their nominations to the Village Clerk at least ten days prior to said election. Nominations may also be made by petition signed by ten or more qualified electors of the Village, said petition to be filed with the Village Clerk at least ten days prior to said election.

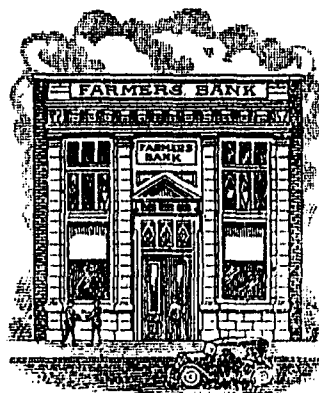

Registration books are open at the office of the Village Clerk. By order of the Village Board, Ralph B. Knepper, Clerk. 13-4

Notice to Creditors

Estate of Wm. Benner, Deceased.

Notice is hereby given by the undersigned, executors of the estate of Wm. Benner, deceased, to the creditors of, and all persons having claims against the said deceased, to exhibit them with the necessary vouchers within four months after March 25th, 1927, the first publication of this notice, to the said executors at the residence of F. C. Lyons, Linden, Idaho, the same being the place for the transaction of the business of said estate, in Latah County, State of Idaho.

F. C. LYONS, and
A. M. ALLEN, Executors.
Dated at Kendrick, Idaho,
March 21, 1927. 12-5

Advice Free

There is nothing so cheap as advice, more especially if you are not particular about the kind. There is so much advice afloat that even the humblest can have a plenty. From the street corner orator to the housewife's admonition to the neighbor over the back yard fence, advice, free as the air, is always in circulation. There are many grades of advice, but the kind most valued is the kind that is SOUGHT. The banker handles money and is in touch with financial deals of many kinds. Are you a patron of the bank? Do you need advice? Would you like to know what someone thinks who ought to be in a position to know something about business deals? The banker is busy with his own affairs, but he is not too busy to give you his frank opinion if you ask for it. That is the kind of advice that is worth having, the kind asked for, and even that kind does not cost you anything.

GLEANINGS

Ben Callison and son, Norla, were Moscow visitors last Saturday.

Mr. and Mrs. L. J. Westacott and son, Dick, of Lewiston, spent Sunday in Kendrick at the home of Mr. and Mrs. R. H. Ramey.

Joday Long returned last Sunday evening from a business trip to Spokane, making the trip in his car.

Buck Phillips came up from Lewiston, Sunday, to visit his sister, Mrs. Harold Thomas.

Rev. B. J. Carey of Orofino was a Kendrick visitor the first of the week.

A. Wilmot and Miss Ecklund drove to Lewiston and returned Monday afternoon.

Mr. and Mrs. J. D. McCracken and children, who spent the winter in Kendrick, left Tuesday for Oakland, Cal., to make their home.

Mr. and Mrs. O. E. MacPherson and son, Donald, and Miss Neva Ware, drove to Lewiston last Sunday to visit relatives.

Kester Dammarell took delivery of a new Pontiac coach the first of the week.

Mrs. R. D. Newton and daughter, Marilyn, went to Moscow the first of the week to visit Mrs. Newton's sister, Mrs. Harvey Smith.

Rev. and Mrs. C. D. Bell of Moscow, spent last Friday night at the home of Mr. and Mrs. Wm. Watts.

Mrs. O. Miller of Texas ridge was taken to Lewiston early Wednesday morning by Dr. Moorehead, where she underwent an operation.

The Kendrick Bear Kats, under the direction of Rev. Taber, put in several hours of hard work last Saturday morning helping to clean up the city park. Some of the Bear Kats were a little too light to handle the business end of a rake but they made up in enthusiasm what they lacked in physical ability.

Mrs. R. D. Newton received a telegram from her husband last Saturday that he had bought a drug store at Colville, Wash. The town has a population of about 2,000 and there are two drug stores there. Mr. Newton has the larger of the two stores. He is well pleased with the prospects in his new location. Mrs. Newton and the children plan to join him there soon.

Mr. and Mrs. Wayne Herres drove up from Lewiston last Sunday afternoon to visit relatives here.

Mr. and Mrs. James Nesbit and little son of Moscow spent Sunday at the home of James' parents, Mr. and Mrs. Frank Nesbit.

Mr. and Mrs. Carl Hartung and son, August, left Wednesday for Seattle for a short visit. They expect to be gone about a week.

Mr. and Mrs. Clyde Daugherty and two children drove to Lewiston and return last Sunday afternoon.

Mrs. Liddie Ameling and son, Harry, returned last Friday from their trip to California. They report a fine time and no car trouble to speak of. Harry said he was only pinched once for violating traffic rules, which isn't such a bad record.

Mr. and Mrs. Wilbur Fix left Saturday for Lewiston where they will make their home.

Ed Deobald was in Moscow on business Wednesday of this week.

Geo. E. Knepper went to Lewiston Wednesday afternoon to attend a Masonic meeting there in the evening.

Mr. and Mrs. H. P. Hull returned Wednesday afternoon from their tour of California, where they spent the past three months. They enjoyed their vacation very much and saw many former Kendrick people in various parts of California.

Grinolds News

The farmers of this section welcome the period of good weather and are commencing their spring work.

Emma Wegner, Myrtle Gertje, Thelma Mill and Edwardine Wegner will represent this school at the contest to be held at Lewiston, April 2.

The pupils neither absent nor tardy for the school month ending April 1, were as follows: Ernest Brammer, Emma Wegner, Myrtle Gertje, Thelma Mill, Heine and Joseph Wittman, Edwardine and Eleanor Wegner, Tyler Mill, Warner Brammer and Richard Pagel.

Mr. and Mrs. Henry Brammer and family were Sunday guests of Mr. and Mrs. Reich of Cameron.

The Sunday visitors at the Gus Wegner home were Mr. and Mrs. Wm. Deobald and family, Eddie and Walter Wegner and Lena Reiche.

Mr. and Mrs. C. Davis and family spent Sunday at the Frank Wittman home.

Douglas Thain spent the week end at his home near Melrose.

Miss Edna Lohman spent Wednesday evening with Miss Martha Brammer.

The C. Davis family were the guests of Mr. and Mrs. C. W. Lowe, Saturday evening.

Mr. and Mrs. Bennett and Alma were Kendrick visitors Wednesday.

Mr. and Mrs. Ed Gertje motored to Lewiston and back Monday.

Mrs. Bertha Tschantz and Miss Anna Tschantz are staying with Mrs. Will Jones this week.

Too Much Envy

When you see the other fellow forging steadily toward success, how easy it is to become envious, how hard to give a word of good cheer and a friendly pat on the back. Envy is the canker that eats away at the heart and takes much of the joy out of life. For some unknown reason it seems implanted in nearly every human breast. And the individual who gives the impulse of envy full sway, who does not try to cursh it out or keep it down, is sure to embitter his life to a great measure, for given a free hand, envy will grow until it crushes out most of the finer impulses. Train yourself to rejoice with the successful ones. Avoid the selfishness that bids you envy. Even from a purely selfish standpoint it is better to be cheerful, appreciative and helpful, than morose and critical. Fall in with the climbers. Help boost. Nothing can be expected from the knockers. Their purpose is to wreck the machine in case they are not permitted to run it. When it comes to going forward it is a lot better to be a spoke in the wheel than a brake. Envy is the brake on the wheel of progress—for you as well as for others.—Selected.

Libel!

"Are you the editor?"
"We are."
"My name's Smith—Godolphus H. Smith."
"Sit down Mr. Smith."
"Not on your life! Your paper printed an article about me yesterday."
"Yes."
"You called me a corruptor of public morals, a thief, a black-leg and a lot of other things."
"We did!"
"Well, sir, I am here to tell you, by thunder that my middle initial is H. and not J! If you can't spell my name right after this, let it alone!"—Ex.

Attaining Peace

Nothing can bring you peace but yourself. Nothing can bring you peace but the triumph of principles.—Emerson.

A Sure Relic

An old-fashioned woman has very little confidence in medicine that tastes good.—Atchison Globe.

Rooster Needs Special

Feeding and Management

The rooster should have special feeding and management so as to keep up his vigor, vitality, constitution and activity, says H. A. Bittenbender, head of the poultry husbandry department at Iowa State college.

"Care must be taken in the selection of roosters, but even after the proper males have been put into the flock, it is entirely possible to ruin the chances of getting a large number of fertile eggs," says Mr. Bittenbender. "First, have the right proportion of females in the flock. Generally we can use the following guide: For Mediterranean breeds, in the early part of the season, one male to 14 females, and as the season advances increase to 25; for American breeds, one male to ten females early in the season and one to 15 later; for Asiatic and English breeds, in most cases it has been found best to use a lesser number of females than of the American breeds."

One good method of managing the rooster is to keep the hens that are not laying in a pen by themselves, and as they come into laying, put them into the breeding pens. In this way it is possible to insure a greater percentage of fertility from the ones that are laying during the earlier part of the season. It is not necessary to have a trap nest in order to do this.

Wintering Turkeys Not a Very Difficult Task

As soon as the turkeys, which have been fed for Christmas holidays, have been marketed the ration which was used during the fattening period, no doubt consisting largely of corn, may be reduced.

A breeding flock should be brought through the winter in good flesh and care should be taken not to have excess fat. Corn is a good winter food, but it is not considered best to make more than one-third of ration corn. A mixture of corn, wheat and oats in equal parts will serve as the main part of the ration.

As long as it is possible for the turkeys to range through the woods and over the field one feeding a day is sufficient. When the fields become covered with snow it may be necessary to increase the grain feeding. Green food is very essential and can be supplied in the form of carrots, turnips, cabbage, beets, etc. Meat scraps, sour milk, fresh ground bone and oyster shell will supply food which is very essential.

Take care of the flock this winter, and next year you will be rewarded for your efforts and work.

Linden News

Mrs. A. Alexander and Walter Carmin spent Sunday afternoon at the Ed Darby home.

Mr. and Mrs. Joe Perry and family of Troy spent Sunday with Mr. and Mrs. Wm. Sadler.

Mr. and Mrs. Roy Bohn were week end guests of Mr. and Mrs. Edgar Bohn.

Miss Mae Enger arrived from Lewiston, Saturday, and will spend a few days at the home of her sister, Mrs. Arthur Bohn, before returning to her home at Park.

A number of men from the ridge attended the Wm. Behrens sale at Leland, Friday.

Mr. and Mrs. Ed Darby attended the funeral of Mrs. Chas. Hill at Juliaetta, Saturday.

Mr. and Mrs. Geo. Christensen are rejoicing over the arrival of a baby girl, born Friday morning.

Mr. and Mrs. Louis Alexander and family, Mrs. Emma Long, fellow and Rev. Luce were callers at the F. C. Lyons home Sunday.

Claud Craig of Leland was buying cattle on the ridge the first of the week.

Mr. and Mrs. George Garner and family spent Sunday with Mr. and Mrs. Edgar Bohn.

Mr. and Mrs. Bud Harris and family spent Sunday with James Ball.

A new son arrived Saturday to make his home with Mr. and Mrs. C. H. Fry. Mrs. A. G. Wilson is caring for them.

Mr. Bateman made his first trip of the season on the mail route, Tuesday, with his truck.

Crescent Clippings

Some of the friends and neighbors of Grandma Wells surprised her, Sunday, at the home of her daughter, Mrs. Frank Souders.
