

NEZ PERCE COUNTY SPELLING MATCH

Held at Lewiston Last Saturday Before Big Crowd.

It took several spell-downs to determine winners in the annual Nez Perce county grade school spelling contest which was held Saturday afternoon at the county court house before a crowd that completely filled the seats, sides and doors of the building. Contests were lively and the interest was good, says the Tribune.

Of the 138 pupils which qualified from the 13 centers of the county a week ago Friday, all but three registered and took part in the contests. This is by far the largest number to participate in a county spelling contest. There were so many ties in the various grades that it was decided by County Superintendent Miss Nellie Buckles to give special prizes to those who missed no words in the first spell-off. There were pupils in every grade which tied but the third grade. There were 18 such contests besides the 18 winners which had all of the original words correct. These spelling prizes will be mailed to the contestants this week.

Many of the schools in the county landed two pupils among the winners, but it was the little school of Chesley on Craig mountain which gained the honor of having three pupils placed among the winners.

Winners in the various contests are as follows:

Third grade: Betty Lambert, Lotus Grove, first; Naomi Armitage, Southwick, second; Stephen Ellenwood, Lapwai, third.

Fourth grade: Fay Southwick, Chesley, first; Ophelia Darrah, Gifford, second; Arnold Riggers, Gifford, third.

Fifth grade: Della Fay, Star school of Lenore, first; Jane Penny, Lapwai, second; Celestine Seth, Spalding, third.

Sixth grade: Margarie Hawk, Fairview, first; Gene Grim, Peck, second; Emily Keller, Culdesac, third.

Seventh grade: Clara Heitman, Fairview, first; Jaunita Bolen, Spalding, second; Everett Springston, Angel ridge, third.

Eighth grade: Elaine Carter, Summit, first; Robert Chambers, second; Harold Kirkpatrick, of Chesley, third.

Special prizes for those who missed no words in the ties in the various grades:

Fourth grade: Clotilda Lott, Lapwai; Margaret Quinn, Garner; Catherine Baumgartner, of Engle; Wilbur Larkham, North Tom Beall.

Fifth grade: Adrian DeWinter, Leland; Alice Hassinger, Gifford; Birdie Bell Buckingham, George school; Dick Clark, Chesley, and Gladys Stone, Bundy.

Sixth grade: Naomi Eller, Lapwai; Esther Whiting, Southwick; James DeCoursey, Culdesac.

Seventh grade: Anna Hayes, Gifford; Frances Steele, Spalding; Dwight Hoffman, Leland.

Eighth grade: Mary Bulen, Culdesac; Nell Davis, Welker; Sylvia Frazier, Rosetta; Elaine Hersey, Lenore.

Death of Mrs. Sarah Jacobus

Mrs. Sarah Jacobus, who for a number of years has made her home in Juliaetta, passed away peacefully while she slept. She was found Wednesday morning, death coming some time during the night or early morning.

Mrs. Jacobus was for many years a resident of American ridge, settling there over thirty years ago. She was one of the highly respected pioneers of the American ridge locality. Her sudden death came as a shock to the entire community.

Mrs. Jacobus is survived by three sisters, Mrs. Claus Eichner and Mrs. Mary Deobald of American ridge, and Mrs. Julia Brocke of Kendrick.

It is understood that funeral services will be held Sunday afternoon at the American ridge church and interment made in the American ridge cemetery.

IN IMPORTANT POST

Stokeley W. Morgan, who has just been appointed chief of the division of Latin-American affairs in the State department. Unusual importance attaches to Mr. Morgan's position as adviser to Secretary of State Kellogg at the present time, because of the crisis in American relations with Mexico and Nicaragua.

Valley League Schedule

The playing schedule for the Valley league was worked out the first of the week for the season beginning April 17. Decoration day is left open so that any games that have to be postponed on account of bad weather up to that time may be played off on that date. The schedule for the season is as follows:

April 17: Clarkston at Pomeroy, Uniontown at Kendrick, Juliaetta at Culdesac.

April 24: Culdesac at Clarkston, Pomeroy at Uniontown, Kendrick at Juliaetta.

May 1: Uniontown at Culdesac, Juliaetta at Pomeroy, Clarkston at Kendrick.

May 8: Kendrick at Uniontown, Culdesac at Juliaetta, Pomeroy at Clarkston.

May 15: Clarkston at Culdesac, Uniontown at Pomeroy, Juliaetta at Kendrick.

May 22: Uniontown at Clarkston, Kendrick at Culdesac, Pomeroy at Juliaetta.

May 29: Clarkston at Uniontown, Pomeroy at Kendrick, open dates for Culdesac and Juliaetta.

June 5: Kendrick at Clarkston, Uniontown at Juliaetta, Culdesac at Pomeroy.

June 12: Clarkston at Juliaetta, Pomeroy at Culdesac, open dates for Uniontown and Kendrick.

June 19: Juliaetta at Clarkston, Kendrick at Pomeroy, Culdesac at Uniontown.

June 26: Culdesac at Kendrick, Juliaetta at Uniontown, open dates for Pomeroy and Clarkston.

Planted 10,000 Trout

Ten thousand rainbow trout were planted in Potlatch river over the past week-end by County Game Warden Alfred S. Anderson in co-operation with sportsmen of Moscow and vicinity.

In all, approximately 100 cans of fish were planted. The largest portion was planted Sunday, 76 cans being put in Potlatch river above Kendrick. The other fish were placed in the river above Harvard Friday.

Fish planted measured from 5 1/2 inches to 8 inches in length. Formerly, fingerlings, from 1 to 2 inches in length were planted but state game officials have found the system a poor one, only a small portion of the fish surviving.

Fish planted this week-end were obtained from the rearing pond at Lapwai state game farm. They were taken from the hatchery at Grangeville last summer and placed in the rearing pond and fed ground beef liver.

Assisting Mr. Anderson were Harry Powell, Carl Smith, Art Perciful, Ed Briney, Al Martin and C. W. Rendfrew. The fish are furnished by the state department but planting is left to sportsmen of the several counties.—Star-Mirror.

Former Residents Visit Kendrick

Mr. and Mrs. John J. Hamley of Pendleton, Oregon, spent a few hours in Kendrick, Wednesday of this week. They were former residents of this place, Mr. Hamley having been in business here for nearly fifteen years. He will be remembered by the older residents of Kendrick and vicinity. Kendrick is proud of the fact that a man who has made such a distinguished success in business, at one time claimed this his home. He is now owner of one of the greatest, if not the greatest, saddle making establishments in the world, located at Pendleton, Oregon. Mr. Hamley made the town famous all over the world with the reputation he has worked up for his wonderful cowboy saddles.

Mr. Hamley stated to the writer that he believed this community deserved severe censure for the extremely bad condition of the roads. He was disappointed to see such a lack of progress along that line. He said the town itself had improved remarkably in the past few years but he didn't know of any place where such bad road conditions exist as in the territory surrounding Kendrick.

Mr. Hamley has had an interesting career. He was born in 1859, and when he was five years old his father enlisted in the Civil War. After returning from the war, his father took up the same business again. John stayed with his father until he was 24 years of age. The family was large and they had no money, so John, and his brother Henry, having learned the trade as mechanics, decided, in 1883, that they wanted to go West and start for themselves. They left Wisconsin, each with a railroad ticket to Ashton, South Dakota, and ten dollars in cash between them. Of course they needed something besides this ten dollars, as they were "going into business," so they stopped at a wholesale house in Minneapolis, in some way, induced the manager of that concern to allow them credit to the extent of \$500. This \$500 stock was shipped to Ashton and the saddle and harness store they started was known as "Hamley Bros."

Things went fine in Ashton for about three years. Business was good and they made a little money. Four straight years of crop failures hit that country then, however, and in 1890 they had lost what they had made and were badly in debt besides. They had one asset, though, which could not be lost in that way, and this asset was the "nerve and pluck" they had shown the manager of the wholesale house in Minneapolis, when they asked for the \$500 credit.

The brothers decided there must be some better place than South Dakota just at that particular time, so with their wives and John's one-year old son, Lester, moved West again. This time to Kendrick, Idaho. By a little more good luck than bad, John was able to withstand a fire in 1892, which burned his store as well as every other store in the town; the death of his brother, Henry, in 1893; the rainy fall of 1894; pay up his old debts, which he was obligated to leave in South Dakota; put a family of three children through school; withstand another fire in 1904, which again burned every store in town; and landed him in Pendleton, Oregon, in 1905, with a capital of about \$5,000 in cash, and a name for honesty, integrity and aggressiveness among wholesalers, both east and west, as well as among his customers and friends who knew him personally.

Mr. and Mrs. J. E. Nessly of Boise arrived Wednesday morning to visit at the home of Mrs. Nessly's sister, Mrs. Ralph B. Knepper. Mr. Nessly, until recently, was editor of the Idaho Progressive, published at Nampa. Mr. and Mrs. Nessly expect to spend the summer on their stock farm near Enterprise, Oregon.

700 Baby Chicks Burned

Seven hundred baby chicks, from which the University of Idaho's entries in poultry shows of the northwest next fall would be made, were destroyed by fire which late Monday night burned a large brooding house on the university poultry farm.

Five varieties of Chickens, White Leghorns to Barred Rocks, were included in the lot destroyed, and were valued at more than \$1,000 by R. T. Parkhurst, head of the poultry department.

The greatest loss will be prize chicks which cannot be replaced in time for entries next year. The chicks were from six to eight weeks old, hatched in the middle of February. At first check it appeared that only 500 were in the building destroyed, but later an additional 200 were found to have been placed in the building.

Fire was caused, apparently, from a furnace near the building used to heat the brooder, and before the fire department could arrive the structure was doomed. Alarm was turned in about 10:30 o'clock.

The structure itself is worth \$350, partially covered by insurance. George Vann, caretaker, had made a trip through the farm about 9:30 o'clock and reported that everything was all right.—Star-Mirror.

Draw Trial Jury

Thirty-five Latah county citizens were drawn Saturday on the trial jury list to appear in the district court Monday morning, April 11, at 9 o'clock, says the Star-Mirror. Drawing was made in accordance with a decree issued by Judge Edgar C. Steele the middle part of the week.

Selections of the first jury were made by lot from a list of 103 names drawn by the county commissioners the first of the year. Drawing was made by Harry A. Thatcher, county auditor and ex-officio clerk of the district court; Judge Adrian Nelson, probate judge; and Sheriff Charlie Summerfield.

Men selected to appear in court April 11 for trial jury were: Charles J. Munson, J. Wallace Emmett, Peter Clyde, Milburn Kenworthy, Edwin Smolt, J. A. Heacock, L. C. Wolhuter, Harold Cornelison, Richard Condell, Ericks Oller.

Howard M. Freeze, Carl F. Anderson, Lawrence Carlson, Robert Oldenburg, A. P. Dahl, Fred Strobel, H. M. Hoskins, John H. Horton, F. J. Scharbach, Walter E. Melgard, B. Brigham, Elmer Wells, W. S. Ross, Al Presby.

Harry Benseoter G. H. Wiley, C. E. Carlson, William Lennox, Chas. G. Talbott, Joseph P. Anderson, Gust Sandberg and D. M. Horney.

Camp Fire Meeting

The Camp Fire Girls met at the home of Lillian Long. It was a business meeting, but the girls also had a song and play practice.

A hike was planned for Friday which will be "treasure hunt." Edna Stanton, Marjorie Davidson and Nettie Mae McDowell have charge of it. Miss Weaver will be their chaparone. The girls are planning on giving their play some time near the first of May.

Entertained at Cards

Mr. and Mrs. A. H. Daubenberg entertained the Okoke bridge club at their home last Friday evening. A delightful evening was spent with keen interest displayed in the scores. The totals gave high scores to Mrs. Anderson and Mr. Carlson, who were awarded prizes. Dainty refreshments consisting of sandwiches, salad and coffee were served. Mr. and Mrs. Arnold Behrens of Juliaetta were guests of the evening.

Wilson Rogers of Moscow visited friends here a short time yesterday afternoon.

BLACKMAILED

Fulton R. Gordon, millionaire Washington realty operator, reported to the police that he had received threatening letters, advising him that he would be safe in the future only if he left \$10,000 in a designated spot on Monroe street. Gordon, fifty-eight, recently married Ellen Gray, twenty-six, nurse.

Car Badly Wrecked

While Mr. and Mrs. A. H. Daubenberg were driving between the top of Lewiston hill and Genesee last Saturday evening in their Buick runabout, a Buick touring car, driven by a party of young people from Lewiston, crashed into them and practically demolished their car. Mrs. Daubenberg received a few scratches and slight bruises, no one else was hurt.

Mr. Daubenberg stated he was driving on his side of the road and as he was rounding a curve saw two cars coming towards him, one attempting to pass the other on the curve. Both cars traveling at an estimated speed of 30 or 35 miles per hour. This threw the one car on Mr. Daubenberg's side of the road, directly in front of him. To prevent a head-on collision Mr. Daubenberg whipped his car to the inside and just as he turned the other driver turned to the inside, striking the right front wheel of Mr. Daubenberg's car with a terrific impact that practically wrecked the car. It is so badly damaged that Mr. Daubenberg will not have it repaired but will sell it for what parts there are left.

Mr. Daubenberg is an exceptionally good driver and careful and the fact that the driver of the car that ran into him was passing another car on a curve, is rather conclusive evidence that the fault of the collision could not be laid to Mr. Daubenberg.

Craig-Harris

Miss Bertha Craig, daughter of Mr. and Mrs. Claud Craig of Leland, was united in marriage last Saturday at Lewiston to Mr. Chester Harris of Lake Stevens, Wash. The ceremony was performed by Rev. Charles McHarness at the Baptist parsonage.

The bride, who was a popular young lady in the Leland community, has been employed in Lewiston during the past winter. Her many friends in this locality will be pleased to learn of her happy marriage.

Shot Himself With Revolver

Sanford Weaver of Park suffered quite a severe gunshot wound last Saturday, when a revolver, which he dropped on the floor, was accidentally discharged. The bullet entered the fleshy part of the thigh and almost went through the leg. Dr. Moorehead was called and removed the bullet. It is not thought the wound will prove at all serious.

Maude Compton, Hazel Stanton and Agnes Jones, who are attending the normal at Lewiston, arrived Wednesday afternoon to spend their spring vacation with home folks.

ITEMS OF INTEREST FROM SOUTHWICK

Written for Gazette by Special Correspondent

Miss Pearl Powell of Leland was an overnight guest, Monday at the home of Mr. and Mrs. Zoel Fairley.

Elmer McCoy and wife and Ray Triplett and wife arrived Thursday evening after spending the last few months in Cosmopolis. They expect to remain here for some time and are moving into the bungalow across the street from the phone office.

Mrs. Mary Stump is visiting her son, Will and family, after having spent the winter in Spokane.

Given Mustoc and family were the guests of Mr. and Mrs. Geo. Jones, Sunday.

Mr. and Mrs. Hoppe spent last Monday at the home of Ben McCoy. Mr. Hoppe was doing repair work on the switch board.

J. R. King and family and Floyd Russell and family spent Sunday at the home of Ray Southwick on Cream ridge.

Elbert Armitage and Lon Douglas are spending this week with their parents.

Miss Alice Cramer of Lewiston passed thru town on Tuesday for a visit (with her mother at Crescent.

John Stalnaker is quite ill at his home south of town, being threatened with appendicitis. Dr. Truitt was called to attend him.

Mr. and Mrs. Gordon Harris spent Sunday with Jake Berriman and family of Cameron.

An oyster supper was served at the ladies aid hall Tuesday evening by the P. T. A. The proceeds will go toward buying books for the school library.

Mr. and Mrs. Vester Whiting and daughter, Mrs. Harold Whiting and Miss Lucile Whiting went to Lewiston, Saturday, returning home Saturday evening.

Mr. and Mrs. Henderson and daughter, Mr. and Mrs. Benjamin and Nadine McCoy spent Sunday at the home of Elton McCoy.

J. E. Hoppe was a business visitor in Kendrick.

Pearl McIver, who attended the spelling contest at Orofino last Saturday, won first prize in her grade.

Mr. Isaman went to Reubens, Tuesday afternoon.

Mr. and Mrs. Wm. Stump and son, Harry, and Miss Penney went to Lewiston, Saturday, returning home Sunday.

Russell Baker spent Sunday at the home of his uncle D. D. Wright.

Several friends gathered at the Roy Southwick home last Monday evening. During the supper hour a soup-eating contest was staged between Ira Luce, who is rather a large man and Tom Armitage, who is rather small. The contest resulted in a draw, each contestant getting away with 7 1/2 bowls. The soup was in addition to the regular supper, so you may judge the capacity of these two champion soup eaters. Those present were Mr. and Mrs. Vester Whiting and family Mr. and Mrs. Armitage, Ira Luce and the host and hostess.

Power Line Coming

While no definite announcement has been given out here, it is understood that the Potlatch Consolidated Electric Co., has purchased poles and other equipment for the line to be run from Troy east to Deary and Bovill this spring. It is stated that Mr. Wilmot will have his crews at work at the earliest possible date. The roads must improve before the poles can be strung along the right of way. Once this can be done the work will move rapidly. Deary and Bovill are keen to see the line completed. Both towns will appreciate a full twenty-four electrical service, and will not be long before the juice will be adapted for other household and mechanical purposes by the installation of motors.—Deary Press.

JULIAETTA COMMUNITY NEWS

Fire Destroys Indian Home

Last Friday night about midnight the Pete Mox Mox home, about 3 miles below town was discovered on fire. The origin of the fire was unknown as there was no one living there, the owner being away on a visit. The house was completely destroyed.

Show House Changes Hands

Herb Millard closed a deal this week with Mr. Hickenbottom for the purchase of the moving picture machine. Mr. Millard expects to keep the shows going on every week as before.

Surprise Party Given

A crowd of ladies surprised Mrs. Anna O. Trout at her home Thursday afternoon, the occasion of the surprise was to celebrate Mrs. Trout's birthday. The ladies all expressed it as having been the most enjoyable gathering they had attended for some time. Lunch was served before the close of the merry occasion.

Julietta Locals

Miss Gertrude Bowen was a Kendrick visitor one day last week.

R. E. Wood went to Lewiston last Wednesday.

E. R. Carlson was a business visitor in Kendrick last Wednesday.

Mrs. E. W. Porter of Boise was visiting friends and relatives in Julietta last week.

Mrs. M. A. Perryman visited with her son, Arthur, in Kendrick last Thursday.

H. H. Greene went to Trout Creek Friday.

Miss Corrine Snyder returned Thursday to the N. B. Long home in Kendrick where she is employed.

D. A. Bishop was a visitor at Stites Sunday.

Mrs. George Miller and children of Moscow are visiting with her prents, Mr. and Mrs. T. O. Greene.

Mr. Goans of Lewiston spent Sunday with his family.

Loey Reichman of Moscow visited a few days last week with his father.

Miss Cecile Harris of Lewiston visited Sunday with her parents, Mr. and Mrs. Ray Harris.

Miss M. Griffith and Mr. R. Johnson of Lewiston visited at the A. W. Behrens home Sunday.

Albert Gruell was a Kendrick visitor Saturday.

Mrs. M. McCall transacted business in Kendrick Saturday.

Jay Fowler made a business trip to Moscow, Monday.

Mr. and Mrs. A. Cole were Kendrick visitors Saturday.

Mrs. Koker and daughter, Buella, of Bakersfield, California, were visiting friends in Julietta this week.

Mrs. Brant, who has been visiting at the Eben Adams home, left Tuesday for her home in Hibbing, Minn.

Mrs. Selma Welch was a visitor in Moscow, Monday.

Chas. Leavitt transacted business in Lewiston Monday.

J. A. Hickenbottom left Monday for Milton, Oregon.

Mrs. Glenn Flesham of Potlatch ridge went to Lewiston, Tuesday.

Mr. and Mrs. Ira Jenks of Clarkston were Sunday visitors at the Tom Stinson home.

Glenn Flesham of Potlatch ridge left Tuesday for Nezperce.

Morris Henchet, who has been visiting at the Tom Stinson home left Wednesday for Lewiston. He expects to go to Michigan in a few days.

Mr. and Mrs. R. G. Snyder and children of Grangeville visited a few days with Mrs. Snyder's parents, Mr. and Mrs. Amos Nigh.

The concert which was given by Richard and Zelma Roe and Junior Church of Lewiston was enjoyed by all present.

Subscription Price \$1.50
Entered at the Post Office at Kendrick as second class mail matter.

Kendrick School Notes

On April 1, Miss Weaver's room observed "crazy clothes day." There were tramps, flappers, shiels, old fashioned ladies, sailors and many others that represented a mixture of ideas. Indeed, they made a queer looking group.

The fifth and sixth grade boys have organized a baseball team. Two boys from the fourth grade are included in the team. They have played two games with the Julietta boys, but were defeated both times. They have had very little practice but hope to make a better showing in the future.

Otis Ross entered the fifth grade last week. He had been attending school at Moscow before entering here.

The faculty had charge of the General Assembly program given last Friday. It was as follows: Bible reading, Mr. Lynch; Song by Neva Ware; Piano Solo, Miss LaPine; Talk by E. H. Dammarell; Songs by the Glee Club. The talk by Mr. Dammarell was especially appreciated. It was very interesting. The Glee Club songs were some nursery rhymes, that were an April Fool joke.

The high school play, "Go Slow Mary," will be put on the last part of April. The date has not been decided for sure, but the students have their parts well learned.

Mr. Lynch has been giving his classes a number of tests preparatory to the six weeks exams. The English IV class has been giving book reports.

The K. H. S. boys baseball team was defeated at Julietta last Friday. The score was 8 to 16 in favor of the Julietta boys.

Mr. McCracken is not going to give his students any six weeks examinations. Written lessons will be substituted.

Big Bear Ridge News
You are cordially invited to

the Community hall, Saturday evening, April 9th. A program will be given at 8 p. m. Following this, baskets will be sold, and lunch served. The proceeds will go towards the hall.

Miss Mildred Kleth came home from Lewiston to spend the week end. Her sister, Miss Betsy, accompanied her to Lewiston for a few days visit.

Anton Lien has returned home from Los Angeles, California, where he spent the winter.

Mrs. Jennie Running of Seattle is visiting with Mrs. Zack Aas and other friends here.

Mrs. A. Kleth entertained the Lutheran Ladies Aid at her home Monday afternoon.

Special offer to the readers of this paper

WE want you to know that each of the seven quality automobiles named below is a General Motors car. We want you to know how General Motors doubly guarantees these cars—how it is passing the savings of vast manufacturing operations (1,200,000 cars last year) on to you—in finely built engines, Fisher Bodies, Duco finish, quality materials in those vital points where quality counts most in comfort, safety, long life and high resale value.

Read about the General Motors line. "A car for every purse and purpose." See the wide choice of models—the wide range of prices. Decide which car interests you most; then clip and mail the coupon.

As a special offer, we will also send you a wonderfully interesting little book about the General Motors Proving Ground. It gives facts which you ought to have before you select any car. Fully illustrated. And its reading may save you hard cash. Act today.

CHEVROLET 7 models—\$525 to \$745

The quality car of the low-priced field. 3-speed transmission. Strong rear axle. Smooth dry-disc clutch. Over-head valve engine. Fisher Bodies. Duco finish. Alemite lubrication. Fully equipped. CHEVROLET TRUCK CHASSIS: 1/2-ton, \$395; 1-ton, \$495.

PONTIAC 5 models—\$775 to \$975

A low-priced "six" which is a quality product in appearance and construction. Has largest 6-cylinder engine in its price class. Beautiful, stylish lines. Fisher Bodies. Duco finish. All conveniences included. Value proved by unprecedented sale.

OLDSMOBILE 11 models—\$875 to \$1190

Gratifies your finer taste; satisfies every need. A truly fine car at moderate cost. Beautiful Fisher Bodies. Duco finish. Powerful 6-cylinder motor. Harmonic balancer. 4-wheel brakes. Many other new improvements. And a wide range of models to choose from.

OAKLAND 7 models—\$1095 to \$1295

Winning and holding goodwill everywhere because of its advanced engineering and precision construction. Fisher Bodies. Duco finish. Rubber silenced chassis. 4-wheel brakes. A "six" whose quality is doubly assured as a product of General Motors.

BUICK 18 models—\$1195 to \$1995

Everybody knows Buick's worth. General Motors emphasizes Buick's statement that its new models represent "The Greatest Buick Ever Built." Vibrationless beyond belief. Famous 6-cylinder valve-in-head engine. Bodies by Fisher. Duco finish. Many models.

LASALLE 6 models—\$2495 to \$2685

General Motors' latest contribution to the fine car field. This is the new and beautiful car designed and built by Cadillac as a companion car to Cadillac. Has V-type 8-cylinder engine. Fisher Bodies. Duco finish. Now on display.

CADILLAC 50 body styles and types —\$2995 to \$9000

The pioneer in the 8-cylinder field. Standard of the world. Improved V-type 90-degree engine. Marvelous bodies by Fisher and Fleetwood. Duco finishes. A choice of 500 different color and upholstery combinations to emphasize individuality in ownership.

ALSO—

FRIGIDAIRE electric refrigerators. The largest selling electric refrigerator in the world. Built by General Motors. Many models—many prices.

DELCO-LIGHT electric plants. Another General Motors product. Brings you all the conveniences and labor-saving devices of electricity.

The DAIRY

FINE POINTS OF GOOD MILK COWS

One thing that seems to trouble many purchasers of cattle for dairying is to judge from conformation, etc., whether an individual is or will be a profitable milker. I have found that all signs fall occasionally and that sometimes an animal will show both good and poor points and be either profitable or otherwise one year, and the opposite the next, so we cannot always be sure as to points. If I were selecting for myself the following would be points for which I should look, and if not found any animal would not be considered desirable, no matter how large or handsome she was. Most of these points can be noted upon a calf after about four weeks if well fed.

1. A broad nose and mouth, at least 1 1/2 inches wider at end than at 4 inches toward eyes on milkers, and proportionate with younger stock; bulls included.

2. A spacing of three or more finger widths between two back ribs extending well down toward belly; the longer the back rib the better; an excellent point in bulls as well as cows.

3. A wide and long escutcheon with no breaks or curls above the udder; curls upon the back of udder are better than not; this point is not so noticeable upon bulls as cows.

4. The milk veins should be large and long; the crookedier the better, and should come from between fourth and fifth rib or farther forward; heavy veins upon the udder are also good.

5. Other secondary points include mealy (pliable) skin; broad milk cord found vertically above the flank; long slender tail, end of dock coming below points of gambrel; deep pocket on front of both shoulder and hind leg, near flank, inside front; rough back, not humped.

6. A herd sire should have as many of the foregoing points as possible to obtain, together with four well-defined teats.

All of these points may be found in all milking cattle, some being more conspicuous in different individuals, and often very pronounced, while other points are negligible. Such animals are doubtful and often unsatisfactory to purchaser.—Howard H. House in Rural New Yorker.

Raise Calf Successfully by Using Various Plans

Calves have been raised successfully by various methods. Whatever plan is used must include cleanliness in feed utensils and housing, plenty of exercise, and direct sunlight.

A common method is to let the calf nurse three or four days. Then feed whole milk for three weeks. At the end of the third week start substituting sweet skim-milk, say one-eighth each day, until only skim-milk is used. If from the separator remove froth or foam. Feed three times a day at regular intervals. Do not overfeed, and watch the bowels for any sign of scours. The feeding of milk may be continued around five or six months. After two months many feeders use sour milk, which appears to be suitable if in good condition.

Meanwhile the calf is allowed to pick at a little good hay, clover or alfalfa preferred, and a mixture of grain, such as ground corn, oats and bran—only a moderate amount of alfalfa or grain.

When the milk is discontinued at around six months the calf should be eating a regular ration of grain and hay. No stated amount can be named. The essential is for the feeder to watch the calf and keep it in good growing condition. A little oil-meal, provided it is fed carefully, is an advantage.

Dairy Facts

Do not force the cows to drink ice-cold water—and water them at least twice daily.

The old-fashioned milk cow must go—cow-testing associations are weeding her out.

The breeding of a cow cannot be changed, so if she produces more milk the roughage and grain must account for it.

It is only when one twin is a male and the other a female that the female rarely ever breeds, so that it never pays to raise the female born twin with a male for breeding purposes.

A bull is "more than half the herd." Hence the necessity of buying a sire of merit, and not just a bull.

At no time since the beginning of the World war have prices of feeds been so favorable to economical milk production as they are now.

A study of the feed and dairy products markets shows the observer that this is an especially good time to market large amounts of grain and other feeds through dairy cattle.

"Sheep Acres" Is of Much Interest

Extra Feeding of Ewes at Breeding Time Helps.

(Prepared by the United States Department of Agriculture.)

Comprising a tract of approximately 100 acres of tillable land in the animal husbandry experiment farm at Beltsville, Md., "Sheep Acres" is yielding many results of interest to flock owners of the United States. The name is gradually coming to mean the proving ground for problems of sheep production under intensive conditions typical of farm sheep raising. A practical system of forage-crop pastures, experiments already have shown, enables sheep to be pastured longer and moved from field to field, thereby controlling parasites more fully than when maintained under the usual permanent-pasture method. This practice makes it possible also to keep a farm flock on less cured feed, thereby saving expense and labor.

Another important result of experimental work at "Sheep Acres" concerns the effect of extra feeding of ewes at breeding time on the percentage of twins in the lamb crop. An advantage of 16 lambs per 100 ewes has resulted from keeping ewes in a highly nourished condition during that season.

Other experiments deal with growth of lambs, both in weight and size, fixing of type in purebred sheep by selective breeding, and rate of wool growth. The flock at "Sheep Acres" consists of approximately 200 sheep, including rams, ewes and lambs, representing the Southdown, Shropshire, Hampshire and Corriedale breeds.

D. A. Spencer is in charge of the investigations conducted at "Sheep Acres," and B. F. Brandon is superintendent of the farm of which "Sheep Acres" is a part.

Farm Machine Hospital Saves Time and Money

During cold winter and early spring days the farm shop is a very busy place for the successful farmer. He may profitably utilize his spare time there and make repairs of all sorts, according to John W. Sjogren, associate professor of agronomy, Colorado Agricultural college.

"Among the more important farm repairs to be made are: Replacing broken hammer and fork handles, overhauling farm machinery and equipment, and the repairing and oiling of work harness. On many farms the tractor and automobile are also part of the farm equipment. Where a farm machinery hospital is available, these machines are readily repaired and adjusted during the winter months.

"The farm shop need not be an expensive building or contain a large assortment of expensive tools. The tools that are very desirable to have in any repair shop, are: Work bench, vise, hammer, hand saws, hack saw, wrenches, cold chisels, punches, planes, drills, square, level, hatchet, screw-driver, drawing knife, yoke shave, forge, anvil, blacksmith hammer, tongs, grindstone, emery wheel, drill, and harness repair tools.

Garden Is Best Paying Patch on Average Farm

Garden time comes when the farmer is so busy with other necessary work that he thinks he cannot spare the time to put in the garden. Many say they can't fiddle around with a little old garden. The result is that the wife assumes the responsibility as well as all the work for the farm garden.

No matter how low the prices of farm crops fall, the farmer can always be sure of a good garden and enough to eat. If the wife has to look after the garden in addition to her household duties, the garden will necessarily be small. If the farmer himself spends more time in his garden, he will find that the garden pays better than any field crop he can grow for the amount of land it occupies and the amount of labor required.—Thomas H. Summers, Extension Service, Colorado Agricultural College.

FARM FACTS

Gulls steal soil fertility. A brush dam will stop them.

Good preparation of the seedbed usually means that less cultivation will be needed later.

Only the farmer who feels a real dignity in his calling has the right attitude towards farming.

Money for legume seed and labor used in soil improvement is a profitable investment, not an expense.

To grow careless in watching out for the various pests may mean a serious crop loss. The spray should not lie idle long.

Clover following wheat is especially favored by phosphate fertilization. The effect of this fertilization can frequently be observed for several years.

With the high price of potatoes, one wants to get new potatoes real quick. Place them in trays in a warm room in the sunlight, while the ground is being prepared. The sprouting will advance their growth by weeks.

GOOD CARE COUNTS WITH HEN FLOCKS

Summarizing a year's reports of 31 Minnesota poultry record flocks in 19 counties, Cora E. Cooke, poultry specialist with the agricultural extension service, University of Minnesota, finds that one location is about as good as another in Minnesota for keeping poultry; that there is no one most profitable breed; that improved feeding more than pays for itself in increased returns; that good housing is essential to good returns, and that Minnesota farm flocks are an asset to the farm business.

Also the records seem to show that increased annual net returns can be expected from a high egg production, a low feed cost, and the selling of poultry and eggs to advantage, especially for breeding purposes.

Six breeds are represented in the 31 flocks. The average number of eggs laid per hen was 128 and the average feed cost per hen for the year was \$1.95. The average net return per bird was \$2.53. In the ten flocks having the highest production, the actual feed cost was \$2.04 per hen as compared with a cost of \$1.88 in the ten lowest producing flocks. Figured in

terms of a dozen eggs, the high-producing flocks did the best with feed costs amounting to only 15.04 cents per dozen eggs, while it was 25 cents a dozen in the low producing flocks. The average was 18 cents a dozen. In other words, it costs more to produce more eggs, but the increased production brings a greater return.

Separate Breeding Pen

Many seem to have acquired the idea that keeping a separate breeding pen means a considerable expense and much extra labor for the farmer. This is not the case or if there are such cases it is unnecessary. Maintaining a breeding pen simply means that the best birds in the flock are selected and placed by themselves during the breeding season. The breeding pen furnishes eggs for hatching during the hatching season. This means that the chicks will be much improved.

Importance of Rooster

The male is as important in poultry as in dairying. Be sure that he is of a good flock. It does not matter whether or not he is a cockerel or a old cock, as long as he has a good physical make-up, plenty of self-

fully matured. Males show a preference for certain hens, and there should be plenty of males in the flock. The number of females and males, and the relation between them, depends upon breed characteristic, size of flock, and time of season.

A Woman's Lot

The best way to improve a woman's lot is to build a house on it and install a good man in the house as sort of assistant manager.—Chittanooga News.

Appalling Fire Loss

Fifteen thousand deaths and over a half billion dollars annually is this country's toll from fires, most of them due to carelessness.

Buddhistic Teaching

Let a man overcome anger by kindness, evil by good. Let him conquer the stingy by a gift; the lie by truth.—Buddha.

Stamp Duty Free

The Treasury department says that, according to the custom law, "all canceled or uncancelled stamps are free of duty."

Have Plenty of Nests

Every poultry house should be equipped with plenty of nests so that each hen may have an opportunity to have the sole use of a nest when she wants to lay. One nest for each two hens is not too many, but two to five hens will do pretty well. Nests should be about 12 inches by 14 inches, and at least 12 inches deep. The opening should be about 8 inches wide and 9 inches deep. This will allow for enough straw in the bottom to make a soft nest.

White Orpington Breed

The White Orpington is one of the large breeds of chickens. The males should weigh 10 pounds and the adult hens around 8 pounds. They are fairly good layers the first year and lay a good-sized brown egg. Of course, the laying is more a matter of feed, care and breeding than it is of the breed. They are good mothers. Hens after their first laying year are likely to be broody a great deal and do not lay as well. For this reason pullets are favored for laying.

Devoted to Vocations

It is a characteristic of modern Russia that every woman and girl seems to devote herself to some vocation or other, and may even enlist as a soldier, if she desires, according to Paula Stelner, woman journalist, who has made repeated visits to Russia.

Crystal Gazing Old

Crystal gazing was practiced by the ancients. References appear to it in the literature of the Seventeenth and Eighteenth centuries. There were similar practices among the native tribes of North and South America, Asia, Australia and Africa.

Long Without Change

The newspaper, printed in New York city in 1797, called the Commercial Advertiser, ran from 1797 to 1900 under the same name and the same kind of management.

POULTRY FACTS

HEN EGGS STAND HEAVY PRESSURE

That an ordinary hen's egg will stand heavy pressure was proved in an exhibit which the poultry department at the College of Agriculture at Ithaca displayed at the New York state fair.

A 10-pound steel sledge hammer was arranged so that it came down on the egg once a minute, being raised and lowered automatically. The egg was placed on a scale which registered the pressure; extra weight was applied and the egg stood the weight of 23 pounds, or all that the scales would register. A special trial was made when still more weight was applied on the handle of the sledge, and it is estimated that the egg stood more than 50 pounds pressure before it broke.

The purpose of the demonstration was to show the pressure that an ordinary egg would stand, and to show why it was desirable to produce eggs with strong shells. Strong shelled eggs ship best, and evaporate least; this prolongs their freshness, and pleases the consumer, because a greater proportion of them reach the market in good condition.

"This is the first time such an arrangement has been used to demonstrate the strength of the shells of hen eggs," according to C. K. Powell, in charge of the exhibit. "Usually, the breaking strength has been tested by pressing the eggs between two hardwood blocks."

Breaking strength of eggs indicates, to some extent, breeding and feeding of the hens. Minerals must make up a part of the ration, and, in this connection, it is said that cod liver oil aids in the assimilation of the minerals by the birds.

Tobacco Dust Useful to Destroy Worms in Flock

Placing 2 per cent of tobacco dust in the mash is a common remedy for removing worms from poultry. Then once each week give epsom salts to the flock at the rate of a pound per hundred birds. The salts can be given in the drinking water or in the amount of wet mash that the flock will eat quickly, allowing as even a distribution of the medicine as possible.

Some poultrymen are using the commercial worm capsules with good success, as it insures every bird receiving the proper share. Keep the droppings removed from the houses, and distribute them as far as possible from the poultry houses and range. This helps to keep down the infestation of worms.

Laying Hens Need Good, Palatable Grain Mash

A good mash should be fed to laying hens, according to G. L. Stevenson, head of the department of poultry husbandry at South Dakota State college. The mash used at State college consists of one-fourth part of oilmeal to one part each of bran, middlings, tankage, ground oats and cornmeal when it is not too high. Ground barley is now being used in place of cornmeal. Two pounds of charcoal are also mixed with each 500 pounds of meal, and about one-half pound of salt is mixed per 100 pounds of meal. The salt makes the meal more palatable.

Poultry Hints

Let the breeding flocks have the range when you shut up the hens for winter eggs.

Watch the water supply. Poultry should never be allowed to drink frozen water.

For hatching eggs breed from the best of the late-laying hens, rather than from the pullets.

Be on guard for the first sign of colds or roup in the poultry, and to separate the afflicted from the rest.

It is not well to force heavy egg production through feeding where birds are to be used for breeding pens.

It is a good scheme to plow or spade up the poultry runs each spring in order to get rid of worms that cause gapes in chickens.

Nature's way of resting her feathered family is to let them rear a family. Turkeys and chickens are both better for the season of rest.

Turning hens out of the warm henhouse on a chill wintry day, or with a cold wind blowing, or with snow or ice on the ground, opens the way to wheezing roup before midnight.

If you shut up the pullets they may lose their appetite. Coax them along with frequent grain feedings and a moist mash once a day.

Cement makes the best floor for a poultry house. When properly built it is economical, easy to clean, rat proof, durable, and free from dampness.

Breed only from birds producing eggs of a uniform size and as near chalk white in color as possible. Trap-nest pullets during first winter and mark birds producing poor type eggs

Modern taste revels in the goodness of Camel

SMOKERS of today—the most particular and hardest to please—find their smoking wishes realized in the mellow goodness of Camels. They demand the choicest Turkish and Domestic tobaccos, and find them in Camel gloriously blended. Modern smokers put Camel ahead of all other cigarettes.

You should know the mildness, the mellowness that brings enjoyment to present-day smokers. You'll find it in Camel—every good point that could be looked for in a cigarette.

It's the modern favorite. "Have a Camel!"

Little Potatoes Good for Planting

Avoid Tubers That Are Badly Sprouted.

Plant the small ones and save expense, is the advice of F. A. Krantz of the division of horticulture, University of Minnesota, to potato growers who are beginning to think in terms of seed for next spring.

Mr. Krantz says that whole small potatoes are even better to plant than seed pieces from large tubers, provided they come from vigorous, healthy plants. If planted when weather conditions are unfavorable there is less likelihood of the whole small potato rotting in the ground than there is of the seed pieces cut from large potatoes.

"Growers who have kept up seed

plots will be perfectly safe in planting their small, unmarketable stock," says Mr. Krantz. "The small seed potato should be firm in substance, with the first sprouts just beginning to appear, and should be of a minimum weight of two ounces. Badly sprouted small potatoes should not be planted. In a time of high prices like the present growers can make a saving by using their smallest tubers, if properly grown, for this year's seed. But do not increase the acreage."

Fencing Aids Different Fields on Stock Farms

Any farmer who raises stock knows that fencing and subdividing his pasture so he can rotate the pasture gives 25 per cent more feed value to his stock because it eliminates the big percentage of feed that is trampled down. This soon pays for the price of the fence.

There is another gain, however, realized by the farmer who keeps books.

The farmer who has all his fields fenced off not only pastures, but corn, oats and wheat lands is able to turn his stock in these fields during the fall and winter. The stock not only benefits from the food value of the roughage but is at the same time scattering fertilizer on the fields.

One farmer who kept track of his expenses closely said that the saving of labor cost in distributing fertilizer, as well as the smaller amount of commercial fertilizer that he had to buy, more than paid for his fence without counting the other benefits.

This farmer said: "Every farmer pays for a fence whether or not he has it, the only difference being that the farmer who has good fences gets a big return on his investment."

March 21, 1927. 12-5

Tender and Palatable Meat Is Most Desirable

If a farmer will fatten his heifers and kill and dress them properly he will have very tender and palatable meat. A quick finish is desirable because it is economical, but beef that is fattened slowly may be very good too.

Care should be taken not to excite the animal before killing, as this adversely affects the quality of the meat. The carcass should hang for at least a week of ten days before using, in order to get the best flavor.

Some people think that the best flavored beef is from mature beasts, but meat from yearlings properly fattened, killed, dressed, ripened and properly cooked is very good.

Harness Oiled and Repaired

This is the time of year to bring in your harness for repairs and then get it oiled. It is economy to have this done before your spring work starts.

NOTICE OF ANNUAL SCHOOL MEETING AND ELECTION

In Joint Common School District No. 24, Latah County, Idaho.....

Notice is hereby given, That the Annual School Meeting of Joint Common School District No. 24, County of Latah, State of Idaho, will be held on Saturday the 16th day of April, 1927, and the said meeting shall convene at 1 o'clock P. M. on said day and continue uninterruptedly until the business properly coming before said meeting is disposed of, at the school house in said district; that at said meeting the following business will be transacted:

1. One trustee to serve a term of three (3) years will be elected.
2. The length of time school shall be taught in said District for the ensuing year and the seasons of the year in which the same shall be taught will be determined.
3. That at the said annual meeting in said District there will be determined the amount of money to be raised by special taxation, the levy for which purpose shall not exceed ten (10) mills on each dollar of taxable property of the District, and shall determine the purposes for which the money derived therefrom shall be expended, naming in each instance the proportion of the whole amount which is to be used for the various and separate purposes.
4. That at said meeting general questions pertaining to school and school interests will be taken up and disposed of.

The name or names of all candidates for election of trustees together with the term for which nominated shall be placed on file with the Clerk of the Board of Trustees at least six (6) days prior to the day of election, excluding the day of election.

That the election at said meeting will be by secret and separate ballot.

Dated this 25th day of March 1927.
A. K. CARLSON,
Clerk of Joint Common School District No. 24, of Latah County, Idaho. 13-3

Notice of Village Election

Notice is hereby given that an election will be held at the City Hall, April 26, 1927, according to law, to elect three members of the Village Board to succeed Trustee Newton, Trustee Long, Trustee Raby and Trustee Deobald, whose terms then expire. Nominations for these offices may be made by a mass meeting or caucus of ten qualified electors of the village who will certify their nominations to the Village Clerk at least ten days prior to said election. Nominations may also be made by petition signed by ten or more qualified electors of the Village, said petition to be filed with the Village Clerk at least ten days prior to said election.

Registration books are open at the office of the Village Clerk.

By order of the Village Board,
Ralph B. Knepper, Clerk. 13-4

Pure-Bred Sires Winning Favor

Three New Counties Took Up Work During the Past Three Months.

(Prepared by the United States Department of Agriculture.)

The last report of progress in live-stock improvement under the systematic "Better Sires-Better Stock" plan conducted by the bureau of animal industry of the United States Department of Agriculture and various states shows 17,047 participants. Some of these persons have large herds and flocks, while others are beginners, but all have agreed to follow the department's recommendation in using pure-bred sires for all classes of live stock raised.

Three New Counties Enter.

The report, which summarizes progress to January 1, 1927, shows that three new counties took up the work during the last three months. These new centers of activity were Piscataquis, Maine; Breathitt, Kentucky, and Cascade, Montana. In the last-named county the 15 newly enrolled participants owned among them more than 1,000 cattle and 3,000 sheep.

During the last three months' period of activity Campbell county, Kentucky, of which Gordon B. Nance is county agent, qualified for the honor roll of counties containing 100 or more live-stock owners enrolled in this progressive means for improving the domestic animals in the country. The list of such counties, several of which have more than 500 persons so enrolled, now totals 44 distributed among 10 states.

Outstanding Achievement.

The outstanding achievement during the centennial year in the better-sires campaign was the success of Union county, Kentucky, in graduating all grade and scrub bulls, thereby being the first county in the United States to achieve this much-sought distinction. Persons participating in the campaign receive a suitably engraved certificate of recognition and also, on request, an attractive barn sign entitled "Pure-Bred Sires Exclusively Used on This Farm." It is lithographed on heavy weather-proof cardboard and resembles a metal tablet. Further details concerning the conduct and progress of the work may be obtained from county agricultural agents or from the bureau of animal

Industry, United States Department of Agriculture, Washington, D. C.

Alsike and Soy Beans

Good as Protein Feed

Many farmers are needing a dry crop that will afford a good supply of protein, other than alfalfa and red clover. These two legumes require a nonacid soil, but not every farm is in this condition. And not every owner is financially able to apply enough lime so that the soil will raise sufficient protein hay for his feeding needs.

Fortunately, there are two good legumes that will help out a farmer who finds himself in this fix. These are alsike clover and soy beans.

Both will grow in a relatively acid soil, and both are able to hold their own as a protein feed with their prouder relatives, alfalfa and red clover.

Plant alsike and soy beans for hay till you can have your farm limed all over, by applying a little each year as your funds will allow. That's good business.

On the fields that are limed sufficiently, alfalfa and red clover may be grown.

Sudan Grass Furnishes

Good Midsummer Pasture

H. D. Hughes and P. S. Wilkins are the authors of a new bulletin just published by the Iowa agricultural experiment station, Ames, which reports the results and conclusions reached following 14 years of observation and experimental work with sudan grass. (The new bulletin No. 283, is entitled, "Sudan Grass.") Copies will be sent to any one interested upon request to the Bulletin Section, Iowa State College, Ames.

Sudan grass is one of the best emergency, nontoxic crops to use for hay or pasture in Iowa, the bulletin declares. Among the strong points found for this crop, are: "Its heavy yield of forage, low seed cost, ability to furnish midsummer pasture, extreme drought resistance, ease and cheapness of growing, dependability, adaptability to almost any soil and the long period over which it may be sown following corn planting."

Farm Hint

Get a stump a day, it will help make the farm pay.

Good care and regular overhauling will materially extend the life, and add to the usefulness of farm equipment.

Head lettuce cannot stand hot dry weather so the plants should be started early in a hothed or coldframe, hardened off by leaving the glass off during mild weather.

From a soil fertility standpoint, not much dependence could be placed on soy beans grown in corn. For such purpose they would probably not be worth the corn they would displace.

A Similar Offense

A man named William Shakespeare was fined in court for game trespass. It was for a like offense the greatest William Shakespeare was forced to flee from his home.

Value of Knocks

The old editor's solace to a young reporter who was unjustly criticized: Keep it up; it's a sign you are attracting attention.—Atchison Globe.

Cut and Dried

A fellow could make a lot of money winning prizes if he could learn about the various contests before they are over.—Louisville Courier-Journal.

Resemblance

G. H. L. writes: "Self-respect is a good deal like one's appendix—you scarcely know you've got it till it's gone."—Boston Transcript.

Dixie Jubilee Quartet Coming

Watch the Gazette for information and date of the coming of the Dixie Jubilee Quartet of California, under the auspices of the Methodist Church Choir. This is said to be one of the finest entertaining troops on the road. Program consists of banjo and ukulele solos and duets, violin and saxophone selections, original cartoons, piano solos, vocal solos and lots of male quartett numbers. Watch the Gazette for further announcement. 14-1

Wonderful Birds, The Frogs Are

Two colored men were digging in a trench when one remarked: "Say, if I won dat Bok prize, I'd t'row dis shovel 'bout seven miles."

"Yeah," sneered his companion, "an' if a bullfrog had wings he'd fly."

"I dunno. Maybe he wouldn't," said the first man. "He done got fo' legs and he won't walk."—Ex.

Deep Sea Stuff

Two gentlemen of Hebrew ex-

traction were shipwrecked. For two days they floated around on a life raft. Near the end of the second day one of them cried: "Morris, look! I see a sail!" "Vell, vat good does dot do us," snappd baek Morris. "Vat ain't got no samples."—Ex.

A SAVINGS ACCOUNT

Your Secret of Success May Be In a Savings Account

One of the truest definitions of success is thrift in all its phases as applied to savings

A man may have many friends, but he will find none so steadfast so constant, so ready to respond to his wants, so capable of pushing him ahead, as a little savings book with the name of the KENDRICK STATE BANK on its cover.

Savings is the first great principal of success. It creates independence, it gives a man standing, it fills him with vigor, it stimulates him with the proper energy, in fact, it brings to him the best part of any success, happiness and contentment.

English communion services will be held, at the Lutheran church Sunday.

The ladies aid meeting last Wednesday was well attended. Mrs. Stoneburner is visiting at

Spokane. Miss Adeline Rogers is visiting at the Brunisiek home.

Develop Your Resistance

Foreign peddlers are again flooding the state with glib promises and guarantees which can never be fulfilled. The Idaho Home Industries Association has issued a warning against this subtle system which drains Idaho of thousands of dollars annually and leaves behind quantities of poor goods, cheap in quality but not in price. The people of Idaho are asked to develop a resistance to the "high-pressure" salesmen, who invariably sell you something which you did not want when they first knocked at the door. Many times these peddlers are discourteous and actually force their wares upon the unwilling housewife, who buys to get rid of the persistent visitor. This salesman contributes nothing to the community's best interests, pays no taxes, supports no local institutions, but takes from the community a great deal of wealth which rightfully belongs to the local merchants.

The taxes paid by the home merchant make possible the schools and many other institutions of the community. The local business man supports the clubs, churches, libraries and all other worthy enterprises. He is your neighbor—your friend. He keeps his store open on holidays for your convenience and he is always ready to replace goods which have not given perfect satisfaction. The home merchant, therefore, deserves better support from the consumers of the community.

Housewives are asked to be on their guard especially against the chain hose and underwear salesmen, who depend for their profit upon the fact that a number of their customers must first lose money.

At present, the worst form of buncombe is being practiced upon gullible men and women by blanket and rug salesmen. Prices are fixed at an unreasonably high figure and gradually reduced to meet the resistance of the prospective customer. Whatever price is paid it is much higher than the price for which the same article, or one of better quality, can be secured at the local stores.

Will Serve Birthday Dinner

The Junior League of Kendrick will serve a Birthday Dinner in the church hall April 14th, beginning at 5:30 p. m. and continuing until 7:30 p. m. One cent for each year of age will be charged up to 35c, there will be no charge over thirty-five cents. The public is invited. A free program consisting of a play and other features will be given at 8 o'clock p. m.

Come to dinner and help the kiddies raise some funds for their work. They are a live bunch but they need your help.

Linden News

Mrs. Ed Kent and children spent the week end with her sister at Juliaetta.

Mrs. Jack Travis returned home Wednesday from a visit with her parents and other relatives in Canada.

Miss Mae Inger and brother, who have been visiting Mr. and Mrs. Arthur Bohn, returned to their home at Park, Thursday.

Mrs. Ed Darby and daughter, Marie, were guests of Mrs. Longfellow, Wednesday and Thursday.

Mr. and Mrs. Clem Israel, Mrs. Louis Alexander and Mrs. R. C. Winegardner motored to Lewiston, Wednesday for the day.

Walter and Cecil Darby spent last week with relatives in Coeur d'Alene.

Mr. and Mrs. W. Weyen and family were Lewiston visitors, Thursday.

Mrs. A. Alexander spent Wednesday afternoon with Eva Smith.

Mr. and Mrs. Joe Perry of Julinetta visited over Sunday at the McPhee home.

Mrs. George Garner spent Friday with Mrs. Carr.

There will be a basket dinner at the church Easter Sunday, following Sunday school. Every one welcome. Come and bring your dinner along.

Crescent Clippings

Mrs. H. E. Rudolph and daughter returned to Spokane, Wednesday after spending the last few months with Mrs. Rudolph's

sister, Mrs. John Darby.

School closed in the Crescent district last Friday evening with a program. After the program the audience and pupils alike, played games and visited. Luncheon was served about eleven. Between that time and the wee sma' hours of the morning the neighbors returned home after wishing good bye and good luck to Miss Eva Slatter who successfully taught this term.

Mrs. M. L. Robeson and daughter, Sue, visited with Mrs. Albert Dorendorf, Sunday evening. Mr. and Mrs. Leroy Southwick and daughters visited with Mrs. Southwick's mother, Mrs. Wm. Kauder, Saturday and Sunday.

Mr. and Mrs. Albert Dorendorf and son, Harry, and Antone Kirchknopf were over to Linden Monday.

The W. H. Loeser family were Sunday guests at the Kauder home.

Lloyd and Helen Slatter of Leland were among those present at the program Friday evening. Their sister, Eva Slatter, returned home with them Sunday afternoon.

We are in hopes that the work being done on the Crescent-Southwick telephone line will mean a big improvement in the use of the line.

Protect Against Crop Pests

Two new quarantines to go into effect immediately have been promulgated by the State Department of Agriculture for the protection of two important Idaho crops against the entrance of serious crop pests, the European Corn Borer and the Mexican Bean Beetle, according to John S. Welch, Commissioner of Agriculture. Neither of these pests are known to exist in the State and were they to gain a foothold it would mean heavy losses to the corn and bean growers of this state.

The quarantine against the European Corn Borer prevents the shipment within the boundaries of this State from infested territory of the following plants and plant products: corn, broom-corn, sorghums, sudan grass, celery, green beans in the pod, beets with tops rhubarb, oat and rye straw, Cut flowers or entire plants of chrysanthemum, aster, cosmos zinnia, hollyhock, and cut flowers or entire plants of gladiolus and dahia, except the bulbs, without stems. No restrictions however, are placed on any of the ten articles enumerated when they shall have been manufactured or processed in such a manner as to eliminate all risk of carriage of the European Corn Borer, and accompanied by an official certificate, signed by the duly authorized inspection of-

Mississippi, New Mexico, North Carolina, Ohio, Pennsylvania, South Carolina, Tennessee, Texas, Virginia, West Virginia, Wyoming and Washington County, Utah. The quarantine prevents the shipment into Idaho of dried seed beans or dried field beans, except in paper seed packets, from infested territory except when fumigated and placed in new sacks immediately before shipment and accompanied

by a certificate to this effect from the duly authorized state inspection officials. Although these quarantines are designed to prevent the shipment into the state of any produce from infested territory which might be the source of infestation, the people of Idaho are urged to assist in keeping this a free area by not ordering such produce from the territory which is now infested.

New Things For Spring

We have a nice line of New Spring Merchandise that will appeal to you and we invite you to come and look them over. You will be pleased.

Pretty Laces

New and pretty laces imported from Germany, England and France at prices from 6c and up to 35c
